Some of our friends have said we should kill this bill because the exchanges are not strong enough. Well, I have been working on the exchanges with about 70 different groups in America ranging from seniors' representatives, union representatives, small business, and other representatives, all of whom are concerned about the exchanges being strong. I am pleased to say those who claim the exchanges in this Senate bill are not strong enough have not read the bill. You do not have to get past the first 200 pages in this bill to see how the exchanges have been strengthened.

In the Finance Committee, I offered an amendment to allow State exchanges to engage in prudent, selective purchasing of insurance. Under my proposal, exchanges would negotiate with plans for lower bids, encourage plans to form select networks, and exclude plans that did not offer good cost and good value.

The Senate bill we are looking at now provides exchanges with strong authority to certify whether a plan can participate in the exchange based on a number of criteria, including whether the plans meet certain marketing requirements, whether it has broad provider networks, whether they deliver quality benefits for the price. They can literally negotiate for all of those things. You do not have that today. You just have plans, and you have no control over what is in them.

So we actually create an exchange that can negotiate down the prices. And they have the power to approve the participation of plans if they are determined to be in the best interests of qualified individuals and qualified employers in the State.

I have advocated for these provisions because of a simple reason. In Massachusetts today we have this ability. We do this, and it has driven down the premiums. In Massachusetts, we have something called the Connector. In fact, the exchange that is in this bill is significantly based on the Connector in Massachusetts. In that, the Connector has the ability to negotiate contracts for what is called Commonwealth Care, and it has placed pressure on the carriers to reduce the rates overall. We have had this in place for 3 years now. The average premium increases have been only 4.7 percent compared to 8 percent average premium increases for private insurance.

The language in the Senate bill is modeled after the strength of the exchanges in Massachusetts, and I believe it will ensure that taxpayer dollars are spent in a smart way. That is what this does. It guarantees you can go negotiate for lower premiums, so you are driving down the cost to the taxpayers.

This bill also will ensure that all Americans have access to quality, affordable health care and will create the transformation within the health care

system necessary to contain costs. The Congressional Budget Office has determined that it is fully paid for—fully paid for—and it is going to provide coverage to more than 94 percent of all Americans. Even as it does that, it stays under the \$900 billion limit President Obama established. It reduces the costs of health care in America, and it reduces the deficit over the next 10 years and beyond.

I cannot think of how few the times were over the course of 25 years where we had a piece of legislation that accomplished a social goal that managed to simultaneously lower the deficit. That is an enormous accomplishment.

This bill includes immediate changes to the way health insurance companies do business to protect consumers from discriminatory practices, and it provides Americans with better preventive coverage—something we do not do enough of in America. We spend an amazing amount of time in our health care system just responding to symptoms, addressing disease, hospitalizing people with expensive procedures. A classic example of that is diabetes because we do not screen people. Because a lot of Americans do not have coverage, they do not get screened at an early stage. Therefore, when they are discovered to have diabetes, it becomes a far more acute treatment as a consequence of having gone all those years without the discovery. So you wind up with expensive alternatives, such as the amputation of limbs, dialysis, instead of having treated them earlier with oral intake of a pill or other treatments, diet, and other kinds of things that ultimately would save billions.

Well, this bill tries to encourage the embrace of better coverage for prevention and wellness. It empowers people in America. It does not say, in Washington: You have to do this or that. It is not command and control. It puts information at the disposal of Americans, so every American can decide what they want, where they want to go get it, who will treat them. That fundamental principle of American health care is absolutely, totally preserved and sacrosanct in this bill. Every American can choose their own doctor, choose their own plan. No one is told to go do this or go do that.

Uninsured Americans with a pre-existing condition can have access to an immediate insurance program and help them avoid medical bankruptcy. One of the huge bankruptcy causes in America is health care. How many seniors have had the situation where they have had to spend down by selling their homes, selling—if they are lucky enough to have any stocks—whatever assets they have, sell the family farm, sell the small business because they are very ill and they do not have the money, the kids do not have the money? But they hope to leave that

money to their kids. They hope to leave something to their children. Instead, we just wipe it out because we do not provide a lot of those folks with the insurance they deserve.

The new health insurance exchanges will make coverage affordable and accessible for individuals and small businesses. Premium tax credits and cost-sharing assistance is going to help people who need assistance. Insurance companies are going to be barred from discriminating based on preexisting conditions, health status, and gender.

The bill also improves the quality and efficiency of health care itself. As the Presiding Officer knows, we are strengthening the Medicare Program for America's seniors. I cannot believe the distortion that has been taking place over the course of these last weeks, months. Time and again, someone on the other side of the aisle will come to the floor and say this is attacking Medicare or this is going to tax the benefits.

Well, we believe—we, the party that created Medicare; we, the party that expanded Medicare; we, the party that has lifted a huge percentage of Americans out of poverty over the last 50, 60 years through Medicare—that it is a sacred trust, and we are going to keep it. This bill helps, in fact, to extend the life of Medicare. The cost of inaction is unacceptable for seniors and the Medicare Program that serves them. In fact, the Medicare hospital trust fund, as we know, is expected to go broke in over 7 years. This bill makes Medicare stronger. It makes it more sustainable. It extends the solvency by 9 years.

Medicare currently reimburses health care providers on the basis of the volume of care they provide rather than the value of the care they provide. For each test, scan, or procedure conducted, Medicare provides a separate payment. So we do that regardless of whether that was necessary or whether it had anything to do with the outcome for that particular patient. That does not make a lot of sense. We do not pay people to build our home the wrong way, or to build something we did not ask for and charge us more, or a whole bunch of other kinds of examples. But Medicare is doing that.

I think Americans deserve to get something better out of their taxpayer dollar. This bill includes a number of proposals to move away from what we call the “*a la carte*” Medicare fee-for-service system so that we begin to pay for quality and value, and that reduces costs to America's seniors.

This bill promotes, as I said, preventive care and improves the public health to help Americans live healthier lives and to help restrain the growth of health care costs over time. It, importantly, eliminates copays and deductibles for recommended preventive care, and it provides individuals with information they need to be able

to make good decisions about their health care and improves education on disease prevention, public health, and invests in a national prevention and public health strategy. It does all of that. All of those things just put to shame the idea of just scrapping this legislation.

Currently, 65 million Americans live in communities where they cannot access a primary care provider. An additional 16,500 practitioners are required to meet their needs. If you scrap this, that number is going to go up, and the number of millions—65 million today—of Americans who do not have access to a primary care provider is going to go up.

This bill addresses the shortages in primary care in other areas of practice by making necessary investments in the Nation's health care workforce.

Specifically, this bill will invest in the National Health Service Corps, scholarship and loan repayment programs. It will expand the health care workforce. The bill includes incentives for primary care practitioners and for providers to serve underserved areas.

Don't listen to me on the transformational changes. Listen to a fellow by the name of Jon Gruber, who is a very respected and renowned economist from MIT, and here is what he writes:

The United States stands on the verge of the most significant change to our health care system since the 1965 introduction of Medicare. The bill that was passed by the House and the parallel bill before the Senate would cover most uninsured Americans, saving thousands of lives each year and putting an end to our status as the only developed country that places so many of its citizens at risk for medical bankruptcy. Moreover, the bill would accomplish this while reducing the Federal deficit over the next decade and beyond. They would reform insurance markets, lower administrative costs, increase people's insurance choices, and provide “insurance for the insured” by disallowing medical underwriting and the exclusion of preexisting conditions. The Senate bill in particular would move us closer to taming the uncontrolled increase in health care spending that threatens to bankrupt our society.

That is what this bill does. That is what the Republicans are opposing.

These aren't minor things. These are things we have been striving to accomplish here for decades. I see colleagues who were here with me back when we struggled with the Clinton administration's effort on health care and every one of us would have been more than happy back then to have accepted—right then and there, we would have accepted what we have here today. I will tell you something: We would have had Republicans, such as Senator John Chafee, and I think Bob Packwood and others at that time, who would have tried to get a compromise passed, not totally dissimilar from the direction we are moving in here, and it was totally rejected by the Clinton administration.

So now is the time to examine what we have promised our people and decide where we stand. We know where the other side stands when they say “let's begin over,” pretending to America there is some place to begin over here. They have engaged in fear-mongering and deliberate misinformation. Those have been the core of the arguments they have used, fundamentally, to stop the success of President Obama.

They are also continuing now, obviously, to use procedural tactics, chewing up the Senate's time. The week before Christmas: Boy, let's see if we can back this right up and make it look as bad as possible and try to make the Congress look as bad as possible; make them fold. So they use this idea, and they are willing to block the funding for our troops so we can go on with this delay. We could have voted today, but they have said no.

There is no reason to do this. I think there is a snow storm coming to Washington. I suspect they are hoping the snow will prevent some Senator from getting here and then they won't be able to vote, because normal decency would have said, Hey, why don't we convenience everybody and have the vote before the snowstorm, but no. So they link it to blocking the money for the troops. I hate to think what some of those troops think is going on here. It is embarrassing.

We have heard repeatedly from Republicans that our health care reform bill is going to drive insurance premiums sky high for families. That is what they say, but the Congressional Budget Office says the opposite. It says that the 134 million Americans who get their insurance through their employer would end up paying 3 percent less for their premiums if we passed the reform measure before us. In addition, the CBO says the subsidies included in the measure would result in a 59-percent reduction in costs for nearly 18 million Americans who purchase their own insurance—a 59-percent reduction for a lot of Americans out there who buy their insurance individually. You don't think they want a 59-percent reduction? And despite the fact that the CBO says there is a 59-percent reduction, they continually come out here and tell people otherwise. Because one of the things we have learned in American politics is that if you throw the mud out there, throw the lie out there, throw the distortion out there enough, enough people will hear it and they won't know the difference.

Health care reform has dramatically reduced the premiums in Massachusetts. Premiums fell by 40 percent. We are not here conjecturing as to what is going to happen. This isn't some pie-in-the-sky theory that if we do this, here is what is going to happen. We have done it. In Massachusetts, we are insuring over 97 percent of all of our citizens, the highest level of insurance in

the United States of America. Guess what. The number of companies participating in the program has gone up since it was passed, and they like it. The premiums fell by 40 percent, from \$8,537 at the end of 2006 to \$5,143 in mid 2009, while the rest of the Nation saw a 14-percent increase. So in Massachusetts, premiums go down for the individual market by 40 percent; the rest of the Nation they go up 14 percent. What do you think most Americans would rather have, the 40-percent reduction or the 14-percent increase? Our bill gives Americans the opportunity to experience the same success we have enjoyed in Massachusetts.

We have also heard repeatedly from Republicans that this bill will add billions of dollars to the Federal budget deficit, despite the fact that the CBO analysis concludes that the bill is not going to add one dime to the Federal deficit—not one dime. From the very beginning of this debate, our colleagues on the other side of the aisle have tried to make the case that seniors' Medicare benefits—benefits—are jeopardized by our reform measure. Well, it is patently false, but we keep hearing it. It gets repeated again and again no matter how many times it has been shown to be false. The bill before us, in fact, does exactly the opposite. It actually adds benefits for seniors.

For example, there are new screening benefits. The bill shrinks the so-called doughnut hole in the Medicare prescription drug benefit. When we passed the prescription drug benefit, millions of seniors had a large gap in coverage. In 2009 seniors will experience a \$3,454 coverage gap. Even though they must continue to pay their monthly premium, they will receive no assistance with their drugs costs between \$2700 and \$6,154. That is a lot of money out of pocket for seniors. Well, we have reached an agreement where now that will be closed, and no longer will those seniors be out of pocket for the costs of drugs in the middle of that bracket.

In addition, the nonpartisan National Committee to Preserve Social Security and Medicare sent a letter to every Senator a few days ago. The Republicans and Democrats alike got this letter, but it hasn't stopped them from continuing to make the argument, but here is what the argument says: Not a single penny in the Senate bill will come out of the pockets of beneficiaries in the traditional Medicare Program. In fact, the letter adds that our reforms: "will positively impact millions of Medicare beneficiaries by slowing the rate of increases and out-of-pocket costs and improving benefits, and it will extend the solvency of the Medicare trust fund by 5 years."

To me, and to I think all of my colleagues here on our side of the aisle, that is a win-win for seniors, and it is a win-win for the Medicare Program.

Since sending that letter, the CMS actuary released a report saying that

the solvency of the Medicare trust fund would be extended by 9 years as a result of the Senate bill. So it has been interesting to watch Republicans speak about protecting Medicare, as I said earlier, a program that their party has opposed since the very beginning. While claiming to be trying to protect Medicare, they have simultaneously warned us many times about the evils of a government-run program. Again, I would ask, if they are so opposed to a government-run program, why don't they come to the floor with an amendment or a proposal to do away with Medicare? They won't, of course, because Medicare prevents millions of seniors from falling into poverty due to health care costs.

They also always promote the idea that competition is good for the marketplace, yet they adamantly oppose adding an option that could help provide some of that competition. President Obama said it clearly, that a public plan would help keep the private plans honest. I couldn't agree more.

Like some of our friends, some of our progressive friends, the Republicans have argued again and again about starting over. Let me remind my colleagues about one of the greatest legislators of the Senate's attitude about that, and one of the greatest champions of health care. Ted Kennedy fought for health care from the day he came here. One of his early speeches on the Senate floor was about health care. He often said that the biggest political mistake that he personally made in the 46 years he legislated was turning down a health care deal with Richard Nixon in 1971 that for the first time would have required all companies to provide a health plan for their employees, with Federal subsidies for low-income workers. That is how far the Republican Party has drifted from one of their own Presidents who, most people would agree, despite what happened in terms of what cost him the presidency, that he was a strong and capable President with respect to social policy in America.

The fact is that for the first time, all companies would have been required to cover their employees. That is the plan Richard Nixon offered Ted Kennedy and Ted Kennedy made the mistake of turning it down. He backed away from that deal under heavy pressure from fellow Democrats who wanted to hold out for a single-payer system once the party recaptured the White House in the wake of the Watergate scandal.

Well, 38 years have passed and single payer is still out of reach; not even on the table. Some people want to give up what we have available to us here and repeat that greatest mistake.

The lesson Teddy learned is this: that when it comes to historic breakthroughs in America, especially in social policies, you make the best deal you can and then immediately start pushing for ways to improve the deal.

Let me share a quick story with my colleagues. We all remember how Ted Kennedy on the floor of the Senate kept pushing and pushing to raise the minimum wage, which hadn't been raised in years. Finally, he pushed so hard that Robert Dole, who was then the majority leader and who was then running for President, decided he couldn't run for President while Ted Kennedy was pushing that hard, tying up the Senate, to get the legislation passed. It might raise people just a little bit; it wouldn't even get them up to par. Robert Dole resigned from the Senate to go run for President. He said, Ted Kennedy doesn't run the world, but he did.

Trent Lott came in. Senator Lott from Mississippi became the majority leader. He vowed the same thing. He said: This isn't going to happen. Within months, within months, Senator Kennedy was doing the same thing again, pushing for the rise in the minimum wage. Senator Lott acceded to him. We got the minimum wage passed. And at a rally where he was celebrating the rise of the minimum wage, which was then not even up to par, he was in the victory moment and he turned to Congressman GEORGE MILLER and he said: I am introducing a bill to raise the minimum wage. GEORGE MILLER said, What do you mean? We haven't even let the dust settle. He said, We have to move on this.

That is what is going to happen with this bill. We all know there are things we are going to have to watch, there are things we are going to have to do, things we are going to have to improve, things that aren't in it that we want to get in it. But to pass up the opportunity for all of the things I have talked about and listed would be an enormous—an enormous—mistake.

Since 1965, when Medicare and Medicaid were created, they have involved and improved over the years.

When Medicare first passed, it didn't cover individuals with disabilities or individuals with end-stage renal disease. Now it does. Similarly, Medicaid evolved to allow States to cover additional services such as home- and community-based care. Now, both Medicare and Medicaid are indispensable elements of the social contract of the United States.

Our march to this point has been too long and too slow—almost a century, in fact. It began in 1912 when Teddy Roosevelt ran for President promising government protection against, as he put it, "the hazards of sickness." There have been fits and starts ever since—through the shouting and distortions and big interests clinging to the status quo, and we cannot allow that to continue any longer.

We know the legislative process is a long one. But 97 years is way too long for America to finally join the other major industrialized nations in guaranteeing health care for all of our people.

That we are here today, with an opportunity to take a giant step, shows not only what a challenge this undertaking has been, but it shows what hard work, skill, and dedication a lot of Senators have shown trying to get us here.

I particularly applaud the effort of Senator REID, who personally has sacrificed the effort to help move this, and the entire leadership, including Senator BAUCUS, chairman of the Finance Committee, and Senator DODD, of the HELP Committee, who was carrying that load for Senator Kennedy. TOM HARKIN is now doing that job, and he and BARBARA MIKULSKI and JEFF BINGAMAN were central to shaping what is coming to the floor.

Hundreds of Republican amendments were accepted during that process. Senator BAUCUS considered hundreds of amendments on the Republican side. The bill is not perfect. Tell me what bill is. All of us would like to change it here and there, but none of us can credibly claim we didn't get a chance to have input to this bill.

Make no mistake, this legislation, with cooperation and bipartisanship, can make history and improve the lives of Americans for decades to come, and that is important to this country and to our economy. It can help change who we are as a country. Ninety-four percent of Americans will have health care. Just think of that. If we do nothing, things are only going to get worse—more expense, more bankruptcies, and more people without coverage.

I can't help but think how often we have private conversations around here at the Prayer Breakfast, at the National Prayer Breakfast, at the Senate Prayer Breakfast, and in private conversations about what the duties and obligations are of good adherence to most of the organized religions of the world and certainly most of the philosophies of the world. They all embrace a component of the Golden Rule. You can go to any Scripture and you can read about one person's human responsibility to another human. These kinds of opportunities to live up to those guidelines, these values, don't come very often. Many of us here saw that pass in 1993. We learned a lot of tough lessons then.

I say to my progressive friends in this country, after that, we did a little better with the Children's Health Insurance Program, and we did better with portability and little pieces here and there. But still the system is out of whack and gets more expensive, and still more Americans lose their health insurance. Still, we wind up with institutionalized unfairness.

I remind my colleagues of when Ted Kennedy worked on the Children's Health Insurance Program. Do you know who the minority cosponsor was? It was ORRIN HATCH. He said that passing it was the mark of a compas-

sionate, caring Congress. We still have millions of kids who are not covered by health insurance.

Compassion can be the mark of this Congress, if we act with respect, courage, and with cooperation. I don't think we can stop now. I don't think there is any object but to get this job done after all these years.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

Mr. MENENDEZ. Mr. President, my distinguished colleague from Massachusetts has been talking about the urgency and the importance of this legislation, and he has done so masterfully. We have been debating health care for weeks. We have been debating it for months if you think about the markup that took place in the HELP Committee, as well as in the Senate Finance Committee. We have been debating it even more if you consider the times of negotiation that took place between a group of six Members of the Senate—three Democrats and three Republicans—in search of a bipartisan effort. So all of this talk that this is a rush to judgment doesn't square itself with the facts.

But there is another bill that is pending before the Senate, a bill that should have passed without any difficulty.

Mr. President, the tactics of delay and obstruction we have seen on this floor for the last few weeks on the part of the minority have now reached critical mass. We are fighting two wars. It is nice to be home. It is nice to be home for the holidays. It is nice to be here in the comfort of the Senate. It is nice to be able to see your family. But we are fighting two wars abroad. We have work to do for the American people, and these continued unnecessary delays from the Republican side of the aisle are now impacting our military men and women on the ground in Iraq and Afghanistan. These delays come at a time when we are seeing greater success in Iraq, a time when we are more focused on wiping out al-Qaida along the Afghanistan-Pakistan border.

Our colleagues on the other side of the aisle are engaged not in governing, not in the bipartisanship they claim to embrace, but in pure politics—a political game that does not threaten the majority, does not benefit the minority; what it does is threaten the health, safety, and in some cases the lives of military men and women in harm's way.

Never have so few been asked to sacrifice so much on behalf of their country. Never have a relatively small group of Americans in uniform, in harm's way, been asked to sacrifice so much, with multiple tours of duty, while the rest of America enjoys security at home because of their sacrifice. You would think that our friends on the other side of the aisle would want

to join expeditiously to make sure that their pay, their health care, and the equipment they need would be there as quickly as possible.

Our friends on the other side of the aisle have determined that their only strategy is to bring the work of the Senate to a halt—to diminish the effectiveness of the Senate they serve in an effort to diminish the majority. It is a shame, but our Republican colleagues have come to their view as a political tactic, the road to electoral victory next year in the midterm elections of 2010 and then preparing themselves already for the Presidential election of 2012, wanting this President to fail and this Congress to fail. If you looked at it as a political tactic, you might say, well, as a political tactic it might make sense for them.

It is a horrid political tactic because it is not about this President failing. It is not about this Congress failing. It is about the failure for the country in one of its most precarious moments.

This President inherited the worst economy since the Great Depression, and I don't think people understand how close to the abyss we were from facing a real depression once again in our history. Financial institutions were collapsing, and we cared but not for the sake of them as big institutions but what they would have meant to the economy as a whole. There was a free-fall in the housing market and the reality of two wars raging abroad, which he inherited, in Iraq and Afghanistan. There is a nuclear North Korea and nuclear-thirsty Iran, an energy policy that sends \$1 trillion to countries that are despotic and wish us ill. Ultimately, we give them the money to act out on their despotism. This is what this President inherited.

Instead of working with him, our colleagues on the other side of the aisle have determined that the politics of failure will lead them to electoral victory, and that is more important than the future of the country. They have come to the floor of the Senate to say no to everything—first, health care, and now to providing for our troops in harm's way. They have come armed with an arsenal of parliamentary maneuvers—not to govern or do what is best for the American people, not to do what is best for the Senate, but to do what is politically expedient for them.

Diminishing the Senate's ability to pass the Defense appropriations as well as health care reform in order to score political points—and then call it victory—is an insult to the American people. It flies in the face of what our Founders intended of a true representative democracy—not to tear down the institutions of government and bring them to a halt but to make them work for the people.

Sam Rayburn once said:

A jackass can kick a barn door down, but it takes a carpenter to build one.

My friends on the other side of the aisle seem intent on kicking the barn door down. In my view, that is not victory. Doing nothing, delaying, obfuscating, saying no, no to everything, blocking the ability of this Chamber to fulfill its duty to the people is no victory.

Saying no to funding our troops serving bravely overseas in Iraq and Afghanistan is hardly victory. Delaying it is hardly victory. Saying no to funding medical care for our military men and women and their families is not a victory; it is shameful delay of needed care. Saying no to \$120 million for traumatic brain injury and psychological health research at a time when so many of our troops are coming home from Iraq and Afghanistan with such injuries is by no means a victory. Saying no to necessary funding to train and equip Afghan security forces so they can stand up for their own country and get our people out is contrary to the President's surge policy, which our friends on the other side publicly supported.

Imagine if the tables were turned and it were the Democrats delaying funding for mine resistant vehicles to protect our troops in Iraq and Afghanistan. What would our friends on the other side say then? Imagine if it were this side of the aisle delaying passage of \$636 billion for the military, including \$128 billion in funding for contingency operations in Iraq and Afghanistan. Imagine if it were this side of the aisle delaying \$154 billion to increase readiness and training of our troops. Imagine if it were this side of the aisle delaying funding for Bradley Fighting Vehicles, Stryker Combat Vehicles, and three E-2D Hawkeye aircraft. Imagine if it were this side of the aisle delaying all of this critical equipment. Imagine if Democrats were standing in the way of funding military health care for service men and women and their children. This is all included in the Defense appropriations bill. But that is what our Republican friends on the other side are doing. Imagine if the Democrats were holding up needed assistance in health coverage for Americans who lost their jobs and are unemployed in this economy at this time of the year. That is included in the bill as well. But that is what our friends on the other side are doing. What would our colleagues on the other side say of our patriotism if we on this side were delaying funding for our troops?

Patriotism doesn't shift with the political tides. It is not something used to advance a political agenda because if it is, it is not patriotism.

We can disagree on the issues. We can disagree on substance. We can hold opposing views. That is what happens in a democracy. But there is no victory in diminishing the functions of government, the responsibilities of government, the duties of this Chamber for

calculated political gain. There is no victory in holding up extending desperately needed unemployment benefits included in this bill. There is no victory in blocking the extension of COBRA health insurance subsidies in this bill for people who have lost their job, their health care, and may be in danger of losing everything—everything—they have worked for, especially at this time of the year.

As I think about this time of the year, it is not a stretch to look at the delaying tactics of our friends on the other side of the aisle on this legislation and think of that famous Christmas movie, "A Christmas Carol," and think of Ebenezer Scrooge who, when asked for a contribution to those who were in need, replied: What, are there no poor houses?

Our colleagues on the other side are holding so tightly to their tactics that they are forgetting the very democratic values they profess so fiercely to protect.

I urge my colleagues on the other side to see victory not in delay and obstruction but in doing what is right for the American people. Do what is right for our military men and women who will spend this holiday season in Iraq and Afghanistan in harm's way.

I say if the tables were turned, my colleagues on the other side would come to this floor, wave the flag, proclaim themselves the only true patriots and vilify this side of the aisle as un-American, unpatriotic, undemocratic.

The fact is, we are all patriots, and as patriots, though, we have a job to do. That job is to make sure our men and women have everything they need, even when we disagree as to whether it is an appropriate engagement. Once they are engaged, it is our responsibility to ensure they are appropriately taken care of.

The tactics of delay for political advantage can never—never—be accepted. I urge my colleagues: Do not play politics with the Defense appropriations that includes funding necessary to protect our men and women in uniform. Let's not play politics at the expense of unemployed Americans in need in this economy at this time of the year. It is not time for those debates. Those debates should be behind us. And it is not time for the political tactics that, in essence, put people at risk.

There are many other ways to try to achieve political victory. You can do it with the power of your ideas, but you certainly do not have to do it by a political tactic that puts the country in jeopardy, that puts our men and women in jeopardy, that at the end of the day says we would rather see failure than success so we can win an election. That is not acceptable.

I yield the floor.

Mr. JOHNSON. Mr. President, I rise today to recognize the momentum pro-

pellung us forward in the health care reform debate.

Today, one-sixth of our economy is consumed by health care. In the absence of reform, the Congressional Budget Office projects total health care spending to consume an ever greater share of our economy, up to 30 percent by 2035. What should we expect in return for the staggering amount of money our nation spends on health? Shouldn't one-sixth of our economy buy us health care for every American? I believe that it can. Not only will the Senate health care reform proposal extend access to health insurance to 30 million Americans, but it will reduce health spending in the long run. This is vital to the future of our economy and our continued competitiveness in the international community.

We may be at the global forefront of medical innovation, but we remain the only industrialized nation to not guarantee each of its citizens access to basic health care. Americans are being priced out of our private health care market at alarming rates. Health care premiums have risen 98 percent since 2000 and continue to rise four times faster than wages. In South Dakota, where incomes are lower than in most other States, families making \$50,000 per year can expect to pay on average 10 percent of their income for a policy on the individual market. And this share will only grow if we fail to reform the system.

Families and small businesses are faltering under the weight of increasing health care costs and medical bankruptcies. A 2005 study linking medical bills to bankruptcy found that even brief lapses in coverage, such as during a job change, expose individuals to significant risk. I have heard from far too many South Dakotans forced into bankruptcy due to a health emergency. I would like to share one of those specific stories with my colleagues. Mary had just started a job when she was diagnosed with breast cancer. Her new policy required a 3-month waiting period before coverage began, but cancer treatment could not be postponed. She frequently traveled over 50 miles to the nearest facility for radiation, chemotherapy and follow-up appointments, but often went without necessary care because she could not afford it. Her brief lapse in coverage left her with thousands of dollars in out-of-pocket medical bills and, after 2 years of garnished wages, she was ultimately forced into bankruptcy.

Her problems didn't end there. The aggressive radiation and chemotherapy treatment for her breast cancer has caused her other health problems. She now requires dental care to address her weakened tooth enamel, but can't afford to pay out-of-pocket and doesn't qualify for low-income public programs. At one point, this woman was securely employed and carried health

insurance, but misfortune left her in financial ruin and with poor health. Like millions of underinsured Americans, she discovered the inadequacies of our health care system the moment she needed it most.

Most insured Americans have a false sense of security and don't realize that many health insurance policies prove inadequate in the face of serious illness. The Patient Protection and Affordable Care Act holds health insurance companies accountable, creates competition and provides assistance to those who need help buying insurance. As the end of the year approaches, we stand on the brink of passing historic legislation. Never before have we been this close to reforming our health care system in such a positive way. I urge my colleagues to seize this opportunity to provide all American with the security of health insurance through all of life's transitions.

Mr. INHOFE. Mr. President, we may be quickly approaching the end of this health care debate in the Senate. It has been a partisan event. Republican amendments have consistently failed roughly along party lines. However, I don't want to overlook some of my Democratic colleagues who have voted with us on a number of the Republican offered amendments. However, I want to focus my remarks on the half a trillion dollar increase in taxes this health care bill imposes on individuals, families, and businesses. I would also like to focus my remarks on one of the 471 amendments filed to this bill highlighting the new taxes on assistive medical devices under this bill.

President Obama repeatedly promised during his campaign that no one making under \$250,000 per year would see their taxes increase. However, the Democrats plan to spend \$2.5 trillion in new healthcare promises at a time when the country can't afford the promises we have already made and we have a record 1-year budget deficit of \$1.4 trillion. This health care reform bill, currently under consideration in the Senate, raises revenues to a large extent on the backs of middle class Americans despite Obama's pledge—his firm pledge—that this would not happen.

Reading through the legislation, I am struck by the myriad of ways this bill raises taxes on American citizens, from job-creating small businesses to middle class families. I count about a dozen of them, adding up to about \$500 billion in tax increases over the next few years. Half a trillion dollars in new taxes. So everyone should get ready to pay a higher health care bill and a higher tax bill should this measure become law. I mentioned the tax increases in this legislation last week, but I believe it bears repeating and I plan to specifically point out a tax increase in this bill I find particularly objectionable.

First let me remind the Senate and the American people that when the bill

is fully enacted, the nonpartisan Joint Committee on Taxation, JCT, found that, on average, individuals making over \$50,000 and families making over \$75,000 would see their taxes go up in this bill. Let me repeat that: if you make over \$50,000 as an individual or \$75,000 as a family, your taxes are going up under this bill. Indeed, according to the JCT 42 million middle class families and individuals, those making less than \$200,000, on average will pay higher taxes in this bill.

If you have health insurance, you get taxed. According to the nonpartisan Congressional Budget Office, new excise taxes applied to health insurance providers will end up taxing the beneficiaries. This tax also has the effect of increasing premiums as well. So you are double taxed on this deal. That is if you do have health insurance.

If you don't have health insurance, you get taxed. Under the bill, you get taxed if you don't carry health insurance as a penalty. Where does this burden fall? You guessed it, middle class Americans. CBO has said that half of the Americans affected by this provision make between \$22,800 and \$68,400—for a family of four.

If you take prescription drugs, you get taxed. According to JCT and CBO, new taxes in this bill applied to the provision of prescription drugs will end up raising the cost of those drugs. Taxed again.

So those are some examples of what you can do to pay higher taxes under this bill: have health insurance, don't have it, take prescription drugs. All of these activities are taxed mercilessly under this legislation. There is yet another tax provision that I find extremely detrimental and objectionable. If you happen to need a medical device, you get taxed. Section 9009 imposes a new \$2 billion a year tax on assistive devices which includes items like pacemakers, ventilators, prosthetics, hearing aids, glucose monitors for diabetics, and incubators for premature babies. It has no regard for the age or status of the individual requiring the device. It's totally indiscriminate. I have filed an amendment that will exempt assistive devices for individuals with disabilities from this tax. It is amendment No. 3053.

Let's look at some of the individuals impacted by this \$2 billion a year tax.

My son-in-law, Brad Swan, installs pacemakers and defibrillators. One morning last week, at 1 a.m., he was called to an emergency involving an 8-year-old boy with no heartbeat. He was born with congenital heart disease, had a pacemaker put in, and was healthy that morning. My older sister, Marilyn, faced a similar situation 9 years ago and is alive and healthy today. Additionally, Dr. Stanley DeFehr, a cardiologist in my hometown of Tulsa, explained to me that “the decision of who needs a pacemaker could be com-

plicated, particularly the decisions to put in a pacemaker on someone we might consider quite elderly. But it's a false economy to deny putting one in because of their risk of falling and breaking a hip or shoulder. In the case where they fall, the costs become quite high. The cost of a pacemaker (\$5,000, lasting 10 years) pales in comparison to the cost of a stroke or multiple fractures.”

Let's look at the impact this tax will have on our servicemen and women.

We all remember when Congress passed the Wounded Warriors Act as part of the Fiscal Year 2008 National Defense Reauthorization Act, which required the Department of Defense and Veterans Administration to jointly develop a comprehensive policy on improvements to care for our servicemembers. The bill created three Centers of Excellence in the prevention, diagnosis, mitigation, treatment, and rehabilitation of traumatic brain injury, post-traumatic stress disorder, PTSD, and eye injuries.

The very next year, I successfully amended the Wounded Warriors Act in the Fiscal Year 2009 National Defense Reauthorization Act to expand the Center of Excellence care network in the Wounded Warriors Act to include amputations and traumatic extremity injuries. Eighty-two percent of injuries from the global war on terror involve the extremities, and are often severe, including multiple injuries to the arms, legs, head and neck.

In fact, Congress has found, “Extremity injuries are the number one battlefield injury. Dynamic research and treatment is necessary to provide servicemembers the greatest ability to recover from injuries sustained on the battlefield.” When limbs cannot be saved, often these injuries are treated with the use of state of the art prosthetic devices enabling our service men and women in some part to regain the use of arms or legs lost from combat injuries.

I have long supported the innovations in prosthetics and assistive devices for our Nation's service men and women. Today, there are nearly 2 million Americans with limb loss. Prosthetic technologies developed for military medicine are almost universally dual-use, meaning the technology can be applied for civilian use as well. Much of this research is being done at the University of Oklahoma and by Oklahoma companies such as Hanger Prosthetics, Martin Bionics, and Sabolich Prosthetics. Oklahoma has a long, proud history of excellence in prosthetic care. For the past twenty-five years, persons who have lost limbs have traveled to Oklahoma from around the world to receive the finest in prosthetic care. Only this past October, I visited the Oklahoma City-based company, OrthoCare Innovations,

which is developing a robotic prosthetic alignment system which builds on its prosthetic innovations.

The Democrat health bill includes a tax on all assistive devices. In fact, to add insult to injury, the Democrat health bill contemplates the detrimental effect the bill may have on our veterans. Section 9011 calls for a study on the impact of this tax on our veterans after the fact. However, a study after the damage is done is too little, too late. This is simply irresponsible and damaging for those veterans who need these devices.

The Democrat agenda and this bill clearly include more taxes on Americans. The new taxes may be hidden but they are there. It is disingenuous. It is costly. This bill is expected to cost \$2.5 trillion on top of our already exploding debt. This bill is exactly what America does not need, and that is why Americans oppose it. It is common sense.

Mr. ENZI. Mr. President, I rise to express my concerns about the Fiscal Year 2010 Defense Appropriations Act which is currently pending before the Senate. I was one of the seven Members of the Senate to vote against our version of this bill in October and I regret that I must vote against it once again. This time it was also held to a time when they thought Christmas would force fast action even on things that don't belong on a defense bill that should have been last October.

Congress has gotten into a bad habit of using our military funding bills as "must pass" legislation to get approval for other unrelated items. This year, the items are a number of extensions on legislation we were not able to finish as part of our regular business. The majority leadership wouldn't allow us to work together to get our job done so some are using a troop bill as cover. There are 13 sections attached to this bill that have nothing to do with our troops.

Now folks might wonder why Congress attaches unrelated items to military bills. Because doing what is right is a difficult stand to take and say no to military funding. The majority party is hoping that enough Senators will want to avoid voting against military funding and be willing to take the bad or the unknown with the good.

We are also now considering this defense bill not as a conference report that has gone through our regular process, but as a message between the House and Senate in order to avoid normal Senate procedures. The Senate has our rules and procedures for a reason. Our procedures are designed to allow Senators the opportunity to fully consider what legislation does and does not do. When Senate leaders avoid Senate rules and procedures, they dodge their responsibility to those who elect us.

I want to make very clear my strong support for the members of our Armed

Forces and the vital work they are doing around the world every day. My State of Wyoming currently has about 900 soldiers deployed with our National Guard in Iraq and Kuwait our largest deployment ever.

I have the greatest admiration for all of them for their commitment to preserving our freedoms and maintaining our national security. They are all true heroes and they are the ones who are doing the heavy lifting and making great sacrifices in our country's name so that we might continue to be the land of the free and the home of the brave.

I am extremely disappointed that our troops must continue to pay the price for political posturing in a must-pass military funding bill loaded with unrelated and unquestioned provisions. Do our troops at home and deployed need the funding for the programs in this legislation? Do they deserve better from their elected congressional representation than being used as cover to enact unrelated legislation? The answer is yes.

Mr. LEVIN. Mr. President, I support the Department of Defense Appropriations Act for 2010.

This legislation provides the funding our men and women in uniform need to continue their efforts on behalf of our Nation. The \$128.3 billion included in this bill to fund operations in Iraq and Afghanistan is an important statement of support for the troops who are serving so bravely so far from home.

This bill also includes important measures that will help Michigan and other states weather the economic strain they now face.

Most important of these are provisions that will extend unemployment benefits and Federal assistance to offset the costs of health insurance for those who have lost their jobs. Existing unemployment benefits are expected to expire at the end of this year. I am pleased that under this bill, benefits will be extended to February 28, 2010, making many Michiganders and other Americans eligible for expanded benefits that provide more support, and for a longer duration. This is crucial assistance to families coping with the devastation of job loss.

In addition, the bill extends from nine to 15 months the American Recovery and Reinvestment Act's assistance to workers who have involuntarily lost their jobs to pay for health coverage under COBRA. That assistance pays up to 65 percent of workers' COBRA premiums. Under current law, workers who lose their jobs after December 31 would not be eligible for this assistance, but the bill extends that deadline to February 28, 2010, ensuring that thousands of Americans will not have to deal with the loss of health care at the same time they face the loss of a job.

The legislation also would continue improvements in Small Business Ad-

ministration loan programs, improvements enacted in the American Recovery and Reinvestment Act to make SBA loan guarantee programs more attractive to borrowers and lenders. Through February 28, 2010, the SBA would be able to continue offering guarantees up to 90 percent of loan amounts, and to continue waiving or reducing loan fees. Access to capital is among the biggest factors keeping companies from hiring, and continuing these measures is an important step toward boosting employment.

This bill also includes provisions to ensure that the Supplemental Nutrition Assistance Program, SNAP, has the funding required to meet increasing demand, and to provide States with funding to process the growing number of applications for the program more quickly. And it will maintain 2009 poverty guidelines for Health and Human Services programs through February 28, 2010, preventing a loss of eligibility for many recipients of means-tested programs, including Medicaid, SNAP and child nutrition programs. These provisions will prevent the opening of holes in our social safety net just as Americans are most in need of support.

These provisions are much needed to help blunt the impact of recession on America's workers as we work toward a brighter economic future.

MORNING BUSINESS

Mr. MENENDEZ. Mr. President, I ask unanimous consent that the Senate proceed to a period for the transaction of morning business, with Senators permitted to speak for up to 10 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CONGRATULATING THE NORTHWEST MISSOURI STATE UNIVERSITY FOOTBALL TEAM

Mr. President, I commend and congratulate the Northwest Missouri State University Football team on their most recent victory in the NCAA Division II Championship this past weekend. Their journey to this game and their performance in it testifies to their dedication and perseverance.

The Bearcat football team has seen much success and disappointment over the past four seasons. Having reached the championship contest the previous 4 years only to fall short in the title game, the Bearcats, led by Coach Mel Tjeerdsma, would not be denied victory in this fifth straight championship contest.

By a score of 30-23 over the Grand Valley State Lakers, a formidable opponent, the Northwest Missouri State Bearcats wiped away their heartbreak from the past with their win.

The victory comes on the 10th anniversary of their last national championship, and once again brings great

pride to their football program, students, faculty, their home city of Maryville, and the entire State of Missouri. The NWMSU Bearcats have now won three national championships since 1998, proving to be one of the best programs in Division II football.

It is with great pleasure that I congratulate Coach Tjeerdsma and his entire coaching staff, current students, faculty and alumni, and most all the football players who never gave up—especially the senior class who have gone through the challenges of the past 4 years. They proved that with hard work and dedication any goal is attainable.

Congratulations to the Northwest Missouri State University Bearcats on their third Division II football National Championship. We look forward to more good things to come from this university and this football program.

COPENHAGEN CONFERENCE ON CLIMATE CHANGE

Mr. LEAHY. Mr. President, I want to speak briefly as the Copenhagen conference on climate change approaches its final hours.

Earlier this week, Secretary of State Clinton announced on behalf of the United States the intention to work with other governments to raise \$100 billion in long-term financing by 2020 to help developing countries address global climate change. This is an important commitment and an essential part of any comprehensive approach to global warming. If the United States is to play a leading role in addressing climate change, we must provide not only strong policies and resources here at home in our factories and on our farms, but also help poor countries adapt to rising sea levels and temperatures which affect agricultural productivity, and to reduce their own emissions of the greenhouse gases that affect every American as well as billions of others across the globe.

The United States has been historically the major emitter of CO₂, and we clearly have a responsibility to help address this global problem. Those who suggest otherwise ignore history. But this is a win-win situation: By exporting U.S. clean energy technology and expertise, we will also generate jobs here at home, help other countries reduce their emissions in a transparent, verifiable and accountable manner, and help to avoid the worst effects of global warming.

Other nations, particularly China and India, are also major contributors to global warming. The administration is right to insist that they be part of the solution and agree to verifiable limits on their own greenhouse gas emissions. It is encouraging that China is already a major investor in renewable energy technology, but at the same time is building coal-fired powerplants at an alarming rate.

For the past 8 years, the policy of the Bush administration was to ignore this problem. In fact it was worse than that, as the last administration actively sought to discredit the scientific evidence and oppose any efforts both here and abroad to address global warming with anything more than lip-service.

Fortunately, times have changed. We have a President and a Congress that are committed to developing a strategy to invest in clean energy, energy efficiency and new high-tech infrastructure that will bring us to long-sought goals: energy independence, good jobs for our citizens, and a healthy planet for our children and grandchildren. The recently passed fiscal year 2010 Department of State, Foreign Operations, and Related Programs Appropriations Act provides more than \$1.2 billion for climate change and environment programs overseas. This is a significant increase over last year. From exports of renewable energy technology to programs to protect tropical forests, these funds will play a part in our bilateral and multilateral efforts to work collectively with other countries.

This and Secretary Clinton's announcement are important steps, but the relentless burning of fossil fuels and destruction of the world's remaining forests call for nothing less than unprecedented commitments to reverse these trends. There is already speculation that Copenhagen will fall far short of what is needed. I am hopeful that before the conference concludes the Obama administration will demonstrate further that the U.S. is going to do what is necessary so future generations will not look back and ask why we failed when faced with this great challenge.

HONORING OUR ARMED FORCES

PRIVATE FIRST CLASS JAICIAE L. PAULEY

Mr. BAYH. Mr. President, I rise today with a heavy heart to honor the life of PFC Jaiciae L. Pauley. Jaiciae was 29 years old when he lost his life on December 11, 2009, in Kirkuk, Iraq. He was assigned to the 1st Battalion, 30th Infantry Regiment, 2nd Brigade Combat Team, 3rd Infantry Division, Fort Stewart, GA. Jaiciae died supporting Operation Iraqi Freedom.

Today, I join Jaiciae's family and friends in mourning his death. Jaiciae will forever be remembered as a loving son and a friend to many. Jaiciae is survived by his parents, Mr. Roger D. Pauley of Muncie, IN; his mother, Ms. Caitlin Ramshaw of Fort Pierce, FL; and a community of his family and friends.

Jaiciae was an ambulance aide and driver. He joined the Army in 2008, and this was his first deployment.

While we struggle to express our sorrow over this loss, we can take pride in Jaiciae's service as a soldier and in his

life as a son and friend. Today and always, he will be remembered by family, friends and fellow Hoosiers as an American hero, and we cherish the memory of his service and his life.

As I search for words to do justice to this fallen soldier, I recall President Abraham Lincoln's words as he addressed the families of soldiers who died at Gettysburg: "We cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here, have consecrated it, far above our poor power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here." This statement is just as true today as it was nearly 150 years ago, as we search for some measure of solace in knowing that Jaiciae's sacrifice and memory will outlive the record of the words spoken here.

It is my sad duty to enter the name of Jaiciae L. Pauley in the RECORD of the U.S. Senate for his service to this country and to freedom, democracy and peace. I pray that Jaiciae's family can find comfort in the words of the prophet Isaiah, who said, "He will swallow up death in victory; and the Lord God will wipe away tears from off all faces."

May God grant strength and peace to those who mourn, and may God be with all of you, as I know He is with Jaiciae.

MESSAGE FROM THE HOUSE

At 12:58 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the bill (H.R. 2847) making appropriations for the Departments of Commerce and Justice, and Science, and Related Agencies for the fiscal year ending September 30, 2010, and for other purposes, with an amendment, in which it requests the concurrence of the Senate.

The message also announced that pursuant to section 1238(b)(3) of the Floyd D. Spence National Defense Authorization Act of Fiscal Year 2001 (22 U.S.C. 7002), amended by division P of the Consolidated Appropriations Resolution, 2003 (22 U.S.C. 6901), and the order of the House of January 6, 2009, the Speaker reappoints to the United States-China Economic and Security Review Commission the following private citizens: Ms. Carolyn Bartholomew of Washington, DC, and Mr. Jeffrey L. Fiedler of Great Falls, Virginia.

MEASURES PLACED ON THE CALENDAR

The following bill was read the second time, and placed on the calendar:

H.R. 4314. An act to permit continued financing of Government operations.

MEASURES READ THE FIRST TIME

The following bill was read the first time:

H.R. 4314. An act to permit continued financing of Government operations.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-4098. A communication from the Chief of Research and Analysis, Food and Nutrition Services, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "School Food Safety Program Based on Hazard Analysis and Critical Control Point Principles" (RIN0584-AD65) received in the Office of the President of the Senate on December 16, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4099. A communication from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Importation of Swine Hides and Skins, Bird Trophies, and Ruminant Hides and Skins" (Docket No. APHIS-2006-0113) received in the Office of the President of the Senate on December 16, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4100. A communication from the Congressional Review Coordinator, Animal and Plant Health Inspection Service, Department of Agriculture, transmitting, pursuant to law, the report of a rule entitled "Importation of Cooked Pork Skins" (Docket No. APHIS-2008-0032) received in the Office of the President of the Senate on December 16, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4101. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Tribenuron methyl; Pesticide Tolerances" (FRL No. 8797-9) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4102. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Rimsulfuron; Pesticide Tolerances" (FRL No. 8796-9) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4103. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Quinclorac; Pesticide Tolerances" (FRL No. 8800-7) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4104. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Prosulfuron; Pesticide Tolerances" (FRL No. 8800-8) received in the Office of the

President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4105. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Prometryn; Pesticide Tolerances" (FRL No. 8801-8) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4106. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Mesotrione; Pesticide Tolerances" (FRL No. 8799-1) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4107. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Glyphosate; Pesticide Tolerances" (FRL No. 8408-1) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4108. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Fluoxastrobin; Pesticide Tolerances" (FRL No. 8803-4) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4109. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Fenarimol; Pesticide Tolerances" (FRL No. 8793-5) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4110. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Endothall; Pesticide Tolerances" (FRL No. 8804-8) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4111. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Dinotefuran; Pesticide Tolerances" (FRL No. 8803-1) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4112. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Chlorimuron Ethyl; Pesticide Tolerances" (FRL No. 8798-1) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4113. A communication from the Director of the Regulatory Management Division,

Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Bifenazate; Pesticide Tolerances" (FRL No. 8804-1) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4114. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "2,6-Diisopropyl-naphthalene (2,6-DIPN); Time-Limited Pesticide Tolerances" (FRL No. 8798-5) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4115. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "2-propenoic acid, butyl ester; polymer with ethenylbenzene, methyl 2-methyl-2-propenoate and 2-propenoic acid; Tolerance Exemption" (FRL No. 8800-6) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4116. A communication from the Assistant Secretary, Bureau of Political-Military Affairs, Department of State, transmitting, pursuant to law, an addendum to a certification, transmittal number: DDTC 131-09, of the proposed sale or export of defense articles, including technical data, and defense services to a Middle East country regarding any possible affects such a sale might have relating to Israel's Qualitative Military Edge over military threats to Israel; to the Committee on Armed Services.

EC-4117. A communication from the Director of Defense Procurement and Acquisition Policy, Department of Defense, transmitting, pursuant to law, the report of a rule entitled "Defense Federal Acquisition Regulation Supplement; Foreign Participation in Acquisitions in Support of Operations in Afghanistan" (DFARS Case 2009-D012) received in the Office of the President of the Senate on December 16, 2009; to the Committee on Armed Services.

EC-4118. A communication from the Director of Defense Procurement and Acquisition Policy, Department of Defense, transmitting, pursuant to law, the report of a rule entitled "Defense Federal Acquisition Regulation Supplement; Statutory Waiver for Commercially Available Off-the-Shelf Items" (DFARS Case 2008-D009) received in the Office of the President of the Senate on December 16, 2009; to the Committee on Armed Services.

EC-4119. A communication from the Director of Defense Procurement and Acquisition Policy, Department of Defense, transmitting, pursuant to law, the report of a rule entitled "Defense Federal Acquisition Regulation Supplement; Technical Data and Computer Software Requirements for Major Weapon Systems" (DFARS Case 2006-D055) received in the Office of the President of the Senate on December 16, 2009; to the Committee on Armed Services.

EC-4120. A communication from the Director of Defense Procurement and Acquisition Policy, Department of Defense, transmitting, pursuant to law, the report of a rule entitled "Defense Federal Acquisition Regulation Supplement; Allowability of Costs to Lease Government Equipment for Display or Demonstration" (DFARS Case 2007-D004) received in the Office of the President of the

Senate on December 16, 2009; to the Committee on Armed Services.

EC-4121. A communication from the Assistant General Counsel for Legislation, Regulation and Energy Efficiency, Department of Energy, transmitting, pursuant to law, the report of a rule entitled "Inflation Adjustment of Civil Monetary Penalties" (RIN1990-AA32) received in the Office of the President of the Senate on December 15, 2009; to the Committee on Banking, Housing, and Urban Affairs.

EC-4122. A communication from the Deputy Secretary, Division of Corporation Finance, Securities and Exchange Commission, transmitting, pursuant to law, the report of a rule entitled "Extension for Filing Accommodation for Static Pool Information in Filings With Respect to Asset-Backed Securities" (RIN3235-AK44) received in the Office of the President of the Senate on December 16, 2009; to the Committee on Banking, Housing, and Urban Affairs.

EC-4123. A communication from the Attorney-Advisor, Departmental Offices, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Terrorism Risk Insurance Program; Cap on Annual Liability" (RIN1505-AB92) received in the Office of the President of the Senate on December 16, 2009; to the Committee on Banking, Housing, and Urban Affairs.

EC-4124. A communication from the Attorney-Advisor, Departmental Offices, Department of the Treasury, transmitting, pursuant to law, the report of a rule entitled "Terrorism Risk Insurance Program; Recoupment Provisions" (RIN1505-AB10) received in the Office of the President of the Senate on December 16, 2009; to the Committee on Banking, Housing, and Urban Affairs.

EC-4125. A communication from the Secretary of the Treasury, transmitting, pursuant to law, a six-month periodic report relative to the national emergency with respect to Belarus; to the Committee on Banking, Housing, and Urban Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HARKIN, from the Committee on Health, Education, Labor, and Pensions, with an amendment in the nature of a substitute:

S. 510. A bill to amend the Federal Food, Drug, and Cosmetic Act with respect to the safety of the food supply.

By Mr. KERRY, from the Committee on Foreign Relations, with an amendment in the nature of a substitute:

S. 1739. A bill to promote freedom of the press around the world.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Ms. CANTWELL (for herself and Mrs. MURRAY):

S. 2906. A bill to amend the Act of August 9, 1955, to modify a provision relating to leases involving certain Indian tribes; to the Committee on Indian Affairs.

By Ms. MURKOWSKI (for herself, Mr. BEGICH, and Mr. UDALL of Colorado):

S. 2907. A bill to establish a coordinated avalanche protection program, and for other

purposes; to the Committee on Energy and Natural Resources.

By Mr. KOHL (for himself, Mr. CORKER, and Mr. FEINGOLD):

S. 2908. A bill to amend the Energy Policy and Conservation Act to require the Secretary of Energy to publish a final rule that establishes a uniform efficiency descriptor and accompanying test methods for covered water heaters, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. SANDERS (for himself, Mr. LEAHY, Mr. BROWN, and Mr. MENENDEZ):

S. 2909. A bill to provide State programs to encourage employee ownership and participation in business decisionmaking throughout the United States, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. SANDERS:

S. 2910. A bill to increase wages and benefits of blue collar workers by strengthening labor provisions in the H-2B program, to provide for labor recruiter accountability, and for other purposes; to the Committee on the Judiciary.

By Mr. SESSIONS (for himself, Mr. BUNNING, Mr. VITTER, Mr. LEMIEUX, Mr. ENZI, Mr. CORNYN, Mr. BARRASSO, and Mr. HATCH):

S. 2911. A bill to reduce the deficit by establishing 5-year discretionary spending caps and strengthened Pay-As-You-Go procedures; to the Committee on the Budget.

By Mr. NELSON of Florida:

S. 2912. A bill to require lenders of loans with Federal guarantees or Federal insurance to consent to mandatory mediation; to the Committee on Banking, Housing, and Urban Affairs.

By Ms. COLLINS (for herself and Mr. CARPER):

S. 2913. A bill to establish a national mercury monitoring program, and for other purposes; to the Committee on Environment and Public Works.

By Mr. SANDERS (for himself, Mr. LEAHY, Mr. BROWN, and Mr. MENENDEZ):

S. 2914. A bill to provide for the establishment of the United States Employee Ownership Bank, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. CORKER (for himself, Mr. ALEXANDER, Mr. CRAPO, and Mr. VITTER):

S. 2915. A bill to provide that employment-related arbitration agreements shall not be enforceable with respect to any claim related to a tort arising out of rape; to the Committee on Health, Education, Labor, and Pensions.

By Mr. BUNNING:

S. 2916. A bill to provide that Internal Revenue Service Notice 2010-2 shall have no force and effect and to amend the Internal Revenue Code of 1986 to restrict the authority of the Secretary of the Treasury to prescribe regulations under section 382 of such Code; to the Committee on Finance.

By Mr. BAUCUS (for himself, Mr. GRASSLEY, Mr. NELSON of Nebraska, Ms. LANDRIEU, Mr. BOND, Mr. LUGAR, Mr. BROWNBACK, Mr. ROBERTS, Mr. HATCH, and Mr. CRAPO):

S. 2917. A bill to amend the Internal Revenue Code of 1986 to modify the penalty for failure to disclose certain reportable transactions and the penalty for submitting a bad check to the Internal Revenue Service, to modify certain rules relating to Federal ven-

dors, and for other purposes; to the Committee on Finance.

By Mr. CORNYN (for himself, Mr. ALEXANDER, Mr. BARRASSO, Mr. BENNETT, Mr. BOND, Mr. BROWNBACK, Mr. BURR, Mr. CHAMBLISS, Mr. COBURN, Mr. COCHRAN, Ms. COLLINS, Mr. CORKER, Mr. CRAPO, Mr. DEMINT, Mr. ENSIGN, Mr. ENZI, Mr. GRAHAM, Mr. GRASSLEY, Mr. GREGG, Mr. INHOFE, Mr. ISAKSON, Mr. KYL, Mr. LEMIEUX, Mr. LUGAR, Mr. MCCAIN, Mr. MCCONNELL, Ms. MURKOWSKI, Mr. RISCH, Mr. ROBERTS, Mr. SESSIONS, Mr. THUNE, Mr. VITTER, and Mr. WICKER):

S.J. Res. 24. A joint resolution providing for congressional disapproval under chapter 8 of title 5, United States Code, of the rule submitted by the Department of Labor relating to financial disclosure and transparency by labor union management; to the Committee on Health, Education, Labor, and Pensions.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MCCAIN (for himself, Mr. KERRY, Mrs. LINCOLN, Mr. INOUE, Mr. BEGICH, Mr. FEINGOLD, Mr. SPECTER, Mr. GRASSLEY, Mr. BURR, Ms. COLLINS, Ms. MURKOWSKI, and Mr. COCHRAN):

S. Res. 380. A resolution designating January 2010 as "National Mentoring Month"; to the Committee on the Judiciary.

By Mrs. MURRAY (for herself and Ms. COLLINS):

S. Res. 381. A resolution designating the week of February 1 through February 5, 2010, as "National School Counseling Week"; to the Committee on the Judiciary.

ADDITIONAL COSPONSORS

S. 144

At the request of Mr. KERRY, the names of the Senator from Virginia (Mr. WARNER) and the Senator from California (Mrs. BOXER) were added as cosponsors of S. 144, a bill to amend the Internal Revenue Code of 1986 to remove cell phones from listed property under section 280F.

S. 416

At the request of Mrs. FEINSTEIN, the name of the Senator from West Virginia (Mr. ROCKEFELLER) was added as a cosponsor of S. 416, a bill to limit the use of cluster munitions.

S. 538

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 538, a bill to increase the recruitment and retention of school counselors, school social workers, and school psychologists by low-income local educational agencies.

S. 634

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 634, a bill to amend the Elementary and Secondary Education Act of 1965 to improve standards for physical education.

S. 663

At the request of Mr. NELSON of Nebraska, the names of the Senator from Montana (Mr. TESTER) and the Senator from Missouri (Mr. BOND) were added as cosponsors of S. 663, a bill to amend title 38, United States Code, to direct the Secretary of Veterans Affairs to establish the Merchant Mariner Equity Compensation Fund to provide benefits to certain individuals who served in the United States merchant marine (including the Army Transport Service and the Naval Transport Service) during World War II.

S. 818

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 818, a bill to reauthorize the Enhancing Education Through Technology Act of 2001, and for other purposes.

S. 941

At the request of Mr. CRAPO, the name of the Senator from North Carolina (Mr. BURR) was added as a cosponsor of S. 941, a bill to reform the Bureau of Alcohol, Tobacco, Firearms, and Explosives, modernize firearm laws and regulations, protect the community from criminals, and for other purposes.

S. 1029

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 1029, a bill to create a new incentive fund that will encourage States to adopt the 21st Century Skills Framework.

S. 1052

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 1052, a bill to amend the small, rural school achievement program and the rural and low-income school program under part B of title VI of the Elementary and Secondary Education Act of 1965.

S. 1129

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 1129, a bill to authorize the Secretary of Education to award grants to local educational agencies to improve college enrollment.

S. 1137

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 1137, a bill to amend the Elementary and Secondary Education Act of 1965 to establish a Volunteer Teacher Advisory Committee.

S. 1431

At the request of Mr. NELSON of Florida, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 1431, a bill to amend the Help America Vote Act of 2002 to require a voter-verified permanent paper ballot under title III of such Act, and for other purposes.

S. 1646

At the request of Mr. REED, the name of the Senator from Vermont (Mr.

SANDERS) was added as a cosponsor of S. 1646, a bill to keep Americans working by strengthening and expanding short-time compensation programs that provide employers with an alternative to layoffs.

S. 1652

At the request of Mr. SPECTER, his name was added as a cosponsor of S. 1652, a bill to amend part B of the Individuals with Disabilities Education Act to provide full Federal funding of such part.

S. 2847

At the request of Mr. WHITEHOUSE, the name of the Senator from Ohio (Mr. BROWN) was added as a cosponsor of S. 2847, a bill to regulate the volume of audio on commercials.

S. 2869

At the request of Ms. LANDRIEU, the name of the Senator from Maryland (Mr. CARDIN) was added as a cosponsor of S. 2869, a bill to increase loan limits for small business concerns, to provide for low interest refinancing for small business concerns, and for other purposes.

S. 2886

At the request of Ms. CANTWELL, the name of the Senator from Delaware (Mr. KAUFMAN) was added as a cosponsor of S. 2886, a bill to prohibit certain affiliations (between commercial banking and investment banking companies), and for other purposes.

AMENDMENT NO. 2909

At the request of Mr. NELSON of Florida, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of amendment No. 2909 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2941

At the request of Mr. SPECTER, the name of the Senator from Michigan (Ms. STABENOW) was added as a cosponsor of amendment No. 2941 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 2976

At the request of Mr. VITTER, his name was added as a cosponsor of amendment No. 2976 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3046

At the request of Mr. KERRY, the name of the Senator from Nebraska

(Mr. NELSON) was added as a cosponsor of amendment No. 3046 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3185

At the request of Mr. BROWN, the names of the Senator from North Carolina (Mrs. HAGAN) and the Senator from New Jersey (Mr. MENENDEZ) were added as cosponsors of amendment No. 3185 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3256

At the request of Mr. BENNET, the names of the Senator from North Carolina (Mrs. HAGAN) and the Senator from Virginia (Mr. WARNER) were added as cosponsors of amendment No. 3256 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Ms. MURKOWSKI (for herself, Mr. BEGICH, and Mr. UDALL of Colorado):

S. 2907. A bill to establish a coordinated avalanche protection program, and for other purposes; to the Committee on Energy and Natural Resources.

Ms. MURKOWSKI. Mr. President, I rise today to reintroduce in the Senate legislation that will help to reduce the Nation's yearly death toll caused by snow and ice avalanches.

As a member of the Congressional Hazards Caucus, I am introducing legislation, the Federal Land Avalanche Protection Act of 2009 to tackle the impacts of one of our Nation's natural hazards, avalanches. I am introducing this bill jointly with Senators MARK BEGICH and MARK UDALL. It is identical to a measure introduced earlier this week in the House of Representatives by Alaska's Congressman DON YOUNG, who was its prime sponsor when first introduced in May 2008 late in the 110th Congress.

The goal of the bill is to better protect people in avalanche zones nationwide and to reduce the growing potential for avalanches to damage properties, as more and more building takes place on mountainsides and in valleys threatened by potential avalanches. Avalanches are a continuing problem in this country. Last year 49 avalanches in 10 States and Canada caused

54 fatalities in North America, 28 in America. The fall-winter-spring of 2008–2009, however, was not unusual.

In the 2007–2008 season, 36 Americans lost their lives as a result of avalanches. Another 16 Canadians died that season in 43 reported avalanches. In the 2002–03 season, 58 people in North America died as a result of 55 reported avalanches. For the past decade 38 people have died on average each year in North America from avalanches. Most occur in the western States of Colorado, Montana, Idaho, Wyoming, Utah, Alaska, California, Oregon, Washington, but deaths certainly have occurred in eastern States such as Vermont and New Hampshire, as well.

Many think that avalanches are just a problem for backcountry skiers, hikers, or snowboarders. But as urbanization spreads the dangers caused by snow and ice buildups on steep slopes will grow and affect more urban populations, and especially more motorists traveling through mountain passes and along valley roads. So far this season, just in the past 2 months, 11 skiers and 1 ice climber have been caught in avalanches in Montana, Utah, and Colorado. Fortunately only one death has so far resulted. But this Nation needs to devote additional resources to warning and battling the impacts of avalanches because there are things that we know how to do to improve forecasts, increase warnings, and take advance actions to reduce the build up of snow loads on steep slopes, thus lessening the danger of larger, deadly avalanches when snow packs release.

The bill I introduce today directs the Secretary of Agriculture, acting through the Chief of the U.S. Forest Service, to establish an avalanche protection program to: identify the potential for avalanches on Federal lands and inform the public about the probability of avalanches and their potential adverse effects; carry out ongoing research to improve avalanche forecasting; and reduce the risks of avalanches and mitigate their effects.

The bill requires the Secretary to coordinate the program to ensure protection for recreational users of public land under the Secretary of the Interior's jurisdiction, using resources of the Forest Service's National Avalanche Center; to establish an advisory committee to assist in program development and implementation; and with the Secretary of Transportation and the Secretary of the Army, to establish a central depository for weapons, ammunition, and parts for avalanche control purposes.

The measure also authorizes the Secretary to make grants to carry out projects and activities to assist in the prevention, forecasting, detection, and mitigation of avalanches; maintain essential transportation, utilities, and communications; assist avalanche artillery users to ensure the availability

of adequate supplies of artillery and explosives required for avalanche control in specified areas; and assist research and development activities for alternatives to minimize reliance on military weapons for avalanche control.

It directs the Secretary to give priority to projects carried out in avalanche zones with a high frequency or severity of avalanches or in which deaths, injuries, or damage to public facilities and communities have occurred. It requires the Administrator of the General Services Administration to transfer specified property suitable for avalanche control purposes to a user of surplus ordnance.

When first introduced last year for public and professional consideration and comment the measure was strongly supported by Federal avalanche officials.

Just in my home State of Alaska avalanches are a concern not just in the backcountry at Hatcher Pass, north of Palmer, or for heli-skiing enthusiasts near Thompson Pass outside of Valdez or Johnson Pass on the Kenai Peninsula, but in urban areas, such as the capital city of Juneau, or for motorists who daily drive the Seward Highway from Girdwood to Anchorage or through Turnagain Pass. While Alaska's three fatalities last year occurred in Thompson and Johnson Pass among recreational skiers, the future is that we need to do more on Federal lands, and we need to do more to assist states to lessen the severity of avalanche dangers on State and private lands.

This bill would take logically, fiscally prudent steps, to doing just that. I urge members to support its passage and modest funding for implementation next year.

By Mr. KOHL (for himself, Mr. CORKER, and Mr. FEINGOLD):

S. 2908. A bill to amend the Energy Policy and Conservation Act to require the Secretary of Energy to publish a final rule that establishes a uniform efficiency descriptor and accompanying test methods for covered water heaters, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. KOHL. Mr. President, I rise today to introduce a bill with Senator CORKER that would establish a uniform energy efficiency descriptor for all water heaters and improve the testing methods by which that descriptor is determined. Currently, water heaters are lumped into two categories under two federal statutes, based on arbitrary gallon capacity and energy input ratings. "Smaller" water heaters are covered by the National Appliance Energy Conservation Act, NAECA, and must be rated using an energy factor or EF rating. "Larger" water heaters are within the scope of the Energy Policy Act,

EPACT, and must be rated using a thermal efficiency or TE rating. Not only do the testing methods differ, but a manufacturer is forbidden to place an EF rating on a TE-sized unit, and vice-versa.

The difference between energy factor and thermal efficiency was based on the assumption that smaller units are exclusively for residential uses while larger units are exclusively for commercial purposes, so the competing rating methods would not cause any confusion or adverse effects. Due to advances in manufacturing technology over the past 15 years, the assumptions underlying the earlier dividing line are no longer accurate. In fact, both larger and smaller units made by leading U.S. manufacturers are used in residences without regard to which Federal law applies. Yet, Federal legislation continues to be written by taking this distinction into account.

This legislation would direct the Department of Energy, DOE, to work with industry stakeholders to develop a uniform energy efficiency descriptor that applies to all sizes of water heaters. It also would develop a test method to accurately determine that descriptor for all types of water heaters, including new, efficient, advanced technologies, like heat pump water heaters, hybrids, and others, that are not correctly rated under today's test methods.

This bill, which has the support of the Air-Conditioning, Heating, and Refrigeration Institute, AHRI, and the American Council for an Energy-Efficient Economy, ACEEE, brings the DOE and affected industries together to focus on this effort. It is my hope that the water heating manufacturing community can develop and implement the new test method and descriptor that will eliminate confusion and enable consumers and business owners to make informed purchasing decisions on water heaters.

By Ms. COLLINS (for herself and Mr. CARPER):

S. 2913. A bill to establish a national mercury monitoring program, and for other purposes; to the Committee on Environment and Public Works.

Ms. COLLINS. Mr. President, today, along with my colleague from Delaware, Senator CARPER, I am introducing the Comprehensive National Mercury Monitoring Act. This bill will ensure the Environmental Protection Agency has accurate information about the extent of mercury pollution in our nation as it works to enforce regulations about this toxic chemical.

Mercury is a dangerous substance that can cause serious neuron-developmental harm, especially to children and pregnant women. Scientists at the Environmental Protection Agency, EPA, estimate that some 630,000 infants are born each year with blood mercury levels higher than what is considered safe.

Mercury is hazardous not only to people, but also to wildlife. As of 2006, States issued 533 new fish advisories bringing the nationwide total advisories to 3,851. These advisories cover 38 percent of the Nation's total lake acreage and 26 percent of the Nation's total river miles. Almost 65 percent of the U.S. coastline, except Alaska, is under advisory, including 92 percent of the Atlantic coast and 100 percent of the Gulf coast.

Each new scientific study seems to find higher levels of mercury in more ecosystems and in more species than we had previously thought. We must have more comprehensive information and we must have it soon; otherwise, we risk making misguided policy decisions.

For example, in 2005 the Environmental Protection Agency issued a new mercury regulation based on computer measurements that were not peer-reviewed and that were not verified with actual measurements. The effect of the regulation was to allow power plants to continue spewing unlimited amounts of mercury into our air until the year 2018. Many experts, including the EPA Inspector General, sharply criticized the science underlying that new regulation and recommended that EPA develop and implement a mercury monitoring plan. That was a major reason why I am introducing the Comprehensive National Mercury Monitoring Act.

Specifically, my mercury bill would establish mercury monitoring sites across the nation in order to measure mercury levels in the air, rain, soil, lakes and streams, as well as in plants and animals; authorize about \$30 million annually for fiscal years 2011 through 2013 for the Environmental Protection Agency, United States Geological Survey, United States Fish and Wildlife Service, the National Oceanic and Atmospheric Administration, and the National Park Service to perform scientific mercury measurements; and create a "Mercury Monitoring Advisory Committee" to advise the Administrator of the EPA in choosing the monitoring sites.

We must establish a more robust national mercury monitoring network to provide EPA the data it needs to make decisions that protect the people and environment of Maine and the entire Nation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 2913

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Comprehensive National Mercury Monitoring Act".

SEC. 2. FINDINGS.

Congress finds that

(1)(A) mercury is a potent neurotoxin of significant ecological and public health concern;

(B) exposure to mercury occurs largely by consumption of contaminated fish;

(C) children and women of childbearing age who consume large quantities of fish are at high risk of adverse effects;

(D) it is estimated that more than 630,000 children born each year in the United States are exposed to levels of mercury in the womb that are high enough to impair neurological development; and

(E) the Centers for Disease Control and Prevention have found that 8 percent of women in the United States of childbearing age have blood mercury levels in excess of values determined to be safe by the Environmental Protection Agency;

(2)(A) as of 2006, 3,080 fish consumption advisories due to mercury contamination have been issued for 48 States, including 23 statewide advisories for freshwater and 12 statewide advisories for coastal waters;

(B) that is a 26 percent increase over the number of advisories issued in 2004;

(C) those advisories represent more than 22,000 square miles of lakes and 882,000 miles of rivers;

(D) however, fish and shellfish are an important source of dietary protein, and a healthy fishing resource is important to the economy of the United States; and

(E) the extent of fish consumption advisories underscores the extensive human and ecological health risk posed by mercury pollution;

(3)(A) in many locations, the primary route for mercury input to aquatic ecosystems is atmospheric emissions, transport, and deposition;

(B) the cycling of mercury in the environment and resulting accumulation in biota are not fully understood; and

(C) computer models and other assessment tools provide varying effectiveness in predicting mercury concentrations in fish, and no broad-scale data sets exist to test model predictions;

(4)(A) on September 14 through 17, 2003, the Environmental Protection Agency cosponsored a Society of Environmental Toxicology and Chemistry workshop involving more than 30 international experts to formulate a system to quantify and document mercury changes in the various environment fields resulting from anticipated reductions in mercury emissions in the United States; and

(B) the resulting plan proposes a holistic, multimedia, long-term mercury monitoring program that is documented in 2 sources—

(i) on January 1, 2005, the article entitled "Monitoring the Response to Changing Mercury Deposition" was published in the journal *Environmental Science and Technology*; and

(ii) in 2008, the book entitled "Ecosystem Responses to Mercury Contamination: Indicators of Change" was published by CRC Press;

(5) as of the date of enactment of this Act, many regulations limiting mercury emissions from different sources have gone into effect or will be implemented, but ongoing monitoring programs are not adequately measuring the environmental benefits and effectiveness of mercury emission controls;

(6) on May 15, 2006, the Office of Inspector General of the Environmental Protection Agency issued a report entitled, "Monitoring Needed to Assess Impact of EPA's Clean Air Mercury Rule (CAMR) on Potential Hotspots", Report No. 2006-P-0025, which states, in part—

(A) "Without field data from an improved monitoring network, EPA's ability to advance mercury science will be limited and 'utility-attributable hotspots' that pose health risks may occur and go undetected"; and

(B) "We recommend that the EPA develop and implement a mercury monitoring plan to assess the impact of CAMR, if adopted, on mercury deposition and fish tissue and evaluate and refine mercury estimation tools and models";

(7)(A) on January 1, 2007, the articles entitled "Biological Mercury Hotspots in the Northeastern U.S. and Southeastern Canada" and "Contamination in Remote Forest and Aquatic Ecosystems in the Northeastern U.S.: Sources, Transformations and Management Options" were published in the journal *BioScience*; and

(B) the authors of the articles—

(i) identified 5 biological mercury hotspots and 9 areas of concern in the northeastern United States and southeastern Canada associated primarily with atmospheric mercury emissions and deposition;

(ii) located an area of particularly high mercury deposition adjacent to a coal-fired utility in southern New Hampshire; and

(iii) concluded that local impacts from mercury emissions should be closely monitored in order to assess the impact of Federal and State policies; and

(8)(A) building on previous efforts in 2003, on May 5 through 7, 2008, the Environmental Protection Agency coconvened a workshop with experts from the United States Geological Survey, the National Oceanic and Atmospheric Administration, the United States Fish and Wildlife Service, the National Park Service, State and tribal agencies, the Biodiversity Research Institute, the National Atmospheric Deposition Program, industry, and other institutions;

(B) more than 50 workshop scientists participated and agreed on a goal and major design elements for a national mercury monitoring program, including a national distribution of approximately 20 intensive sites to understand the sources, consequences, and trends in United States mercury pollution;

(C) the consortium found that "policy makers, scientists and the public need a comprehensive and integrated mercury monitoring network to accurately quantify regional and national changes in atmospheric deposition, ecosystem contamination, and bioaccumulation of mercury in fish and wildlife in response to changes in mercury emissions."; and

(D) the workshop findings are published in a report of the Environmental Protection Agency (430-K-09-001).

SEC. 3. DEFINITIONS.

In this Act:

(1) ADMINISTRATOR.—The term "Administrator" means the Administrator of the Environmental Protection Agency.

(2) ADVISORY COMMITTEE.—The term "Advisory Committee" means the Mercury Monitoring Advisory Committee established under section 5.

(3) ANCILLARY MEASURE.—The term "ancillary measure" means a measure that is used to understand the impact and interpret results of measurements under the program.

(4) ECOREGION.—The term "ecoregion" means a large area of land and water that contains a geographically distinct assemblage of natural communities, including similar land forms, climate, ecological processes, and vegetation.

(5) **MERCURY EXPORT.**—The term “mercury export” means mercury flux from a watershed to the corresponding water body, or from 1 water body to another water body (such as a lake to a river), generally expressed as mass per unit of time.

(6) **MERCURY FLUX.**—The term “mercury flux” means the rate of transfer of mercury between ecosystem components (such as between water and air), or between portions of ecosystem components, expressed in terms of mass per unit of time or mass per unit of area per time.

(7) **PROGRAM.**—The term “program” means the national mercury monitoring program established under section 4.

(8) **SURFACE SEDIMENT.**—The term “surface sediment” means sediment in the uppermost 2 centimeters of a lakebed or riverbed.

SEC. 4. MONITORING PROGRAM.

(a) ESTABLISHMENT.—

(1) **IN GENERAL.**—The Administrator, in consultation with the Director of the United States Fish and Wildlife Service, the Director of the United States Geological Survey, the Director of the National Park Service, the Administrator of the National Oceanic and Atmospheric Administration, and the heads of other appropriate Federal agencies, shall establish a national mercury monitoring program.

(2) **PURPOSE.**—The purpose of the program is to track—

(A) long-term trends in atmospheric mercury concentrations and deposition; and

(B) mercury levels in watersheds, surface waters, and fish and wildlife in terrestrial, freshwater, and coastal ecosystems in response to changing mercury emissions over time.

(3) MONITORING SITES.—

(A) **IN GENERAL.**—In carrying out paragraph (1), not later than 1 year after the date of enactment of this Act and in coordination with the Advisory Committee, the Administrator, after consultation with the heads of Federal agencies described in paragraph (1) and considering the requirement for reports under section 6, shall select multiple monitoring sites representing multiple ecoregions of the United States.

(B) **LOCATIONS.**—Locations of monitoring sites shall include national parks, wildlife refuges, National Estuarine Research Reserve units, and other sensitive ecological areas that include long-term protection and in which substantive changes are expected from reductions in domestic mercury emissions.

(C) **COLOCATION.**—If practicable, monitoring sites shall be colocated with sites from other long-term environmental monitoring programs.

(4) **MONITORING PROTOCOLS.**—Not later than 1 year after the date of enactment of this Act, the Administrator, in coordination with the Advisory Committee, shall establish and publish standardized measurement protocols for the program under this Act.

(5) **DATA COLLECTION AND DISTRIBUTION.**—Not later than 1 year after the date of enactment of this Act, the Administrator, in coordination with the Advisory Committee, shall establish a centralized database for existing and newly collected environmental mercury data that can be freely accessed once data assurance and quality standards established by the Administrator are met.

(b) AIR AND WATERSHEDS.—

(1) **IN GENERAL.**—The program shall monitor long-term changes in mercury levels and important ancillary measures in the air at locations selected under subsection (a)(3).

(2) **MEASUREMENTS.**—The Administrator, in consultation with the Director of the United

States Fish and Wildlife Service, the Director of the United States Geological Survey, the Director of the National Park Service, the Administrator of the National Oceanic and Atmospheric Administration, and the heads of other appropriate Federal agencies, shall determine appropriate measurements, including—

(A) the measurement and recording of wet and estimation of dry mercury deposition, mercury flux, and mercury export;

(B) the measurement and recording of the level of mercury reemitted from aquatic and terrestrial environments into the atmosphere; and

(C) the measurement of sulfur species and ancillary measurements at a portion of locations selected under subsection (a)(3) to fully understand the cycling of mercury through the ecosystem.

(c) **WATER AND SOIL CHEMISTRY.**—The program shall monitor long-term changes in mercury and methyl mercury levels and important ancillary measures in the water and soil or sediments at locations selected under subsection (a)(3) that the Administrator, in primary consultation with the Director of the United States Geological Survey, determines to be appropriate, including—

(1) extraction and analysis of soil and sediment cores;

(2) measurement and recording of total mercury and methyl mercury concentration, and percent methyl mercury in surface sediments;

(3) measurement and recording of total mercury and methyl mercury concentration in surface water; and

(4) measurement and recording of total mercury and methyl mercury concentrations throughout the water column and sediments.

(d) **AQUATIC AND TERRESTRIAL ORGANISMS.**—The program shall monitor long-term changes in mercury and methyl mercury levels and important ancillary measures in the aquatic and terrestrial organisms at locations selected under subsection (a)(3) that the Administrator, in primary consultation with the Director of the United States Fish and Wildlife Service and the Administrator of the National Oceanic and Atmospheric Administration, determines to be appropriate, including—

(1) measurement and recording of total mercury and methyl mercury concentrations in—

(A) zooplankton and other invertebrates;

(B) yearling fish; and

(C) commercially, recreationally, or conservation relevant fish; and

(2) measurement and recording of total mercury concentrations in—

(A) selected insect- and fish-eating birds; and

(B) measurement and recording of total mercury concentrations in selected insect- and fish-eating mammals.

SEC. 5. ADVISORY COMMITTEE.

(a) **ESTABLISHMENT.**—There shall be established a scientific advisory committee, to be known as the “Mercury Monitoring Advisory Committee”, to advise the Administrator and Federal agencies described in section 4(a)(1), on the establishment, site selection, measurement and recording protocols, and operation of the program.

(b) **MEMBERSHIP.**—The Advisory Committee shall consist of scientists who are not employees of the Federal Government, including—

(1) 3 scientists appointed by the Administrator;

(2) 2 scientists appointed by the Director of the United States Fish and Wildlife Service;

(3) 2 scientists appointed by the Director of the United States Geological Survey;

(4) 2 scientists appointed by the Director of the National Park Service; and

(5) 2 scientists appointed by the Administrator of the National Oceanic and Atmospheric Administration.

SEC. 6. REPORTS AND PUBLIC DISCLOSURE.

(a) **REPORTS.**—Not later than 2 years after the date of enactment of this Act and every 2 years thereafter, the Administrator shall submit to Congress a report on the program, including trend data.

(b) **ASSESSMENT.**—At least once every 4 years, the report required under subsection (a) shall include an assessment of the reduction in mercury deposition rates that are required to be achieved in order to prevent adverse human and ecological effects.

(c) **AVAILABILITY OF DATA.**—The Administrator shall make all data obtained under this Act available to the public through a dedicated website and on written request.

SEC. 7. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this Act—

(1) for fiscal year 2011 to—

(A) the Environmental Protection Agency \$15,000,000;

(B) the United States Fish and Wildlife Service \$9,000,000;

(C) the United States Geological Survey \$5,000,000;

(D) the National Oceanic and Atmospheric Administration \$4,000,000; and

(E) the National Park Service \$4,000,000;

(2) for fiscal year 2012 to—

(A) the Environmental Protection Agency \$12,000,000;

(B) the United States Fish and Wildlife Service \$7,000,000;

(C) the United States Geological Survey \$4,000,000;

(D) the National Oceanic and Atmospheric Administration \$3,000,000; and

(E) the National Park Service \$3,000,000;

(3) for fiscal year 2013 to—

(A) the Environmental Protection Agency \$12,000,000;

(B) the United States Fish and Wildlife Service \$7,000,000;

(C) the United States Geological Survey \$4,000,000;

(D) the National Oceanic and Atmospheric Administration \$3,000,000; and

(E) the National Park Service \$3,000,000; and

(4) such sums as are necessary for each of fiscal years 2014 through 2016 to—

(A) the Environmental Protection Agency;

(B) the United States Fish and Wildlife Service;

(C) the United States Geological Survey;

(D) the National Oceanic and Atmospheric Administration; and

(E) the National Park Service.

By Mr. BUNNING:

S. 2916. A bill to provide that Internal Revenue Service Notice 2010-2 shall have no force and effect and to amend the Internal Revenue Code of 1986 to restrict the authority of the Secretary of the Treasury to prescribe regulations under section 382 of such Code; to the Committee on Finance.

Mr. BUNNING. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 2916

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. LIMITATION ON REGULATORY AUTHORITY RELATING TO LIMITATION ON LOSSES FOLLOWING OWNERSHIP CHANGE.

(a) REPEAL OF NOTICE 2010-2.—Internal Revenue Service Notice 2010-2 shall have no force and effect.

(b) MODIFICATION OF REGULATORY AUTHORITY UNDER SECTION 382.—Section 382(m) of the Internal Revenue Code of 1986 is amended by adding at the end the following flush sentence:

“Notwithstanding the preceding sentence or any other provision of law, the Secretary may not prescribe any regulation after December 18, 2009, which provides an exemption or special rule under this section which is restricted to dispositions of instruments acquired by the Secretary unless such exemption or special rule is specifically authorized by Congress.”.

(c) NO INFERENCE.—Nothing in subsection (a) or in the amendment made by subsection (b) shall be construed to create any inference with respect to the authority of the Secretary of the Treasury on or before December 18, 2009, to provide exceptions to the application of the rules of section 382 of the Internal Revenue Code of 1986 with respect to certain classes of taxpayers.

By Mr. CORNYN (for himself, Mr. ALEXANDER, Mr. BARRASSO, Mr. BENNETT, Mr. BOND, Mr. BROWNBACK, Mr. BURR, Mr. CHAMBLISS, Mr. COBURN, Mr. COCHRAN, Ms. COLLINS, Mr. CORKER, Mr. CRAPO, Mr. DEMINT, Mr. ENSIGN, Mr. ENZI, Mr. GRAHAM, Mr. GRASSLEY, Mr. GREGG, Mr. INHOFE, Mr. ISAKSON, Mr. KYL, Mr. LEMIEUX, Mr. LUGAR, Mr. MCCAIN, Mr. MCCONNELL, Ms. MURKOWSKI, Mr. RISCH, Mr. ROBERTS, Mr. SESSIONS, Mr. THUNE, Mr. VITTER, and Mr. WICKER):

S.J. Res. 24. A joint resolution providing for congressional disapproval under chapter 8 of title 5, United States Code, of the rule submitted by the Department of Labor relating to financial disclosure and transparency by labor union management; to the Committee on Health, Education, Labor, and Pensions.

Mr. CORNYN. Mr. President, the U.S. Department of Labor's Office of Labor-Management Standards, OLMS, is responsible for ensuring that labor unions follow basic standards of fiscal responsibility. OLMS collects annual financial disclosure reports, LM-2, from labor organizations with annual receipts of \$250,000 or more. Union members who work hard to pay their dues deserve to know how their money has been spent. So, these annual financial disclosure reports provide rank-and-file members with an essential tool for exercising union democracy: information about important financial decisions made by their union leadership. Consequently, it is vital that OLMS have the necessary tools to monitor

union compliance with the law as well as to deter corruption. Yet, on average, over ONE third of all unions fail to comply with existing requirements to file annual financial disclosure reports on time.

In fact, between 2001 and 2008, OLMS reported that its investigations yielded a total of 1,004 indictments with 929 convictions and court-ordered restitution of more than \$93 million dollars. For example, according to statistics reported by the Office of Management and Budget, OMB, the OLMS audits turned up criminal violations in about 11.5 percent of audits and nearly 8 percent of unions showed some fraudulent activity in 2008 alone. Between January 1 and October 19, 2009, OLMS reported obtaining indictments, convictions and sentences in embezzlement cases that total nearly \$3 million in theft from union funds.

In order to provide a better method for collecting information about union finances, the Department of Labor proposed modifying the LM-2 form. After a lengthy rulemaking process, the Department issued a final rule on January 21, 2009, which required additional information about the receipt and disbursement of labor organization funds, and established standards and procedures for revoking, where appropriate, a labor organization's simplified filing privilege. But politics got in the way of transparency and good government. And on October 13, 2009, the Department announced a final decision to rescind these regulations.

This is outrageous. No one is talking about protecting rank-and-file members' ability to hold their leadership accountable. Instead, the Secretary of Labor has bowed to pressure and complaints from labor unions. The unions argued that requiring labor organizations with reported annual receipts over \$250,000 to file more detailed disclosure reports was unnecessarily burdensome and imposed additional administrative costs on their organizations.

Rigorous disclosure requirements promote union transparency and accountability of union leaders to their rank-and-file members. The annual financial reports ensure that workers' dues are used legitimately and can also help workers and oversight investigators detect fraudulent or criminal activity. Bringing corrupt union officials to justice and recovering millions of dollars in hard-earned dues would not be possible if unions were not required to file annual financial disclosure reports.

For this reason, I am introducing a Congressional Review Act resolution disapproving the Department of Labor's October 13 decision to rescind the LM-2 rule. My resolution, which is cosponsored by 17 of my colleagues, would have the effect of reinstating the original LM-2 rule published in Janu-

ary 2009 and would ensure that OLMS continues to protect the rights of rank-and-file union members against corrupt union leaders.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 380—DESIGNATING JANUARY 2010 AS “NATIONAL MENTORING MONTH”

Mr. MCCAIN (for himself, Mr. KERRY, Mrs. LINCOLN, Mr. INOUE, Mr. BEGICH, Mr. FEINGOLD, Mr. SPECTER, Mr. GRASSLEY, Mr. BURR, Ms. COLLINS, Ms. MURKOWSKI, and Mr. COCHRAN) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 380

Whereas mentoring is a longstanding tradition in which a dependable, caring adult provides guidance, support, and encouragement to facilitate a young person's social, emotional, and cognitive development;

Whereas continued research on mentoring shows that formal, high-quality mentoring focused on developing the competence and character of the mentee promotes positive outcomes, such as improved academic achievement, self-esteem, social skills, and career development;

Whereas further research on mentoring provides strong evidence that mentoring successfully reduces substance use and abuse, academic failure, and delinquency;

Whereas mentoring, in addition to preparing young people for school, work, and life, is extremely rewarding for those serving as mentors;

Whereas more than 4,700 mentoring programs in communities of all sizes across the United States focus on building strong, effective relationships between mentors and mentees;

Whereas approximately 3,000,000 young people in the United States are in solid mentoring relationships due to the remarkable vigor, creativity, and resourcefulness of the thousands of mentoring programs in communities throughout the Nation;

Whereas in spite of the progress made to increase mentoring, the United States has a serious “mentoring gap”, with nearly 15,000,000 young people in need of mentors;

Whereas mentoring partnerships between the public and private sectors bring State and local leaders together to support mentoring programs by preventing duplication of efforts, offering training in industry best practices, and making the most of limited resources to benefit young people in the United States;

Whereas the designation of January 2010 as “National Mentoring Month” will help call attention to the critical role mentors play in helping young people realize their potential;

Whereas a month-long celebration of mentoring will encourage more individuals and organizations, including schools, businesses, nonprofit organizations, faith institutions, and foundations, to become engaged in mentoring across the United States; and

Whereas National Mentoring Month will, most significantly, build awareness of mentoring and encourage more people to become mentors and help close the mentoring gap in the United States: Now, therefore, be it

Resolved, That the Senate—

(1) designates the month of January 2010 as “National Mentoring Month”;

(2) recognizes with gratitude the contributions of the millions of caring adults and students who are already volunteering as mentors and encourages more adults and students to volunteer as mentors; and

(3) encourages the people of the United States to observe National Mentoring Month with appropriate ceremonies and activities that promote awareness of, and volunteer involvement with, youth mentoring.

Mr. McCAIN. Mr. President, I am pleased today to join many of my colleagues in introducing a resolution designating January 2010 as National Mentoring Month.

We all agree that young people need a supportive environment based on structured and trusting relationships with adults. The world is more complicated for children today than it ever was when I was growing up. Mentors can help young people through the difficult periods, help them see the difference between right and wrong, alleviate their doubts and concerns, and answer their questions frankly. Mentors can dramatically impact a young person's life by providing the support and encouragement that children need in order to grow into responsible, caring adults.

This resolution recognizes the value of volunteering time to make a difference in the life of a child. A growing body of research has shown that high-quality programs can make all the difference and help students in need achieve the type of future they might never have thought possible. Children with mentors are shown to improve in school performance and attendance. Also, they are more self-confident, have good social skills, and above all else, they are motivated to reach their full potential. Unfortunately, a severe shortage of volunteers has left over 15 million young people without mentors.

National Mentoring Month highlights the needs and goals of mentoring in this country and honors the contributions of the many volunteers across the country that are currently connecting with youth in such programs. Next month, non-profit organizations, schools, businesses, faith communities, and Government agencies—led by the National Mentoring Partnership and the Harvard School of Public Health—will join together to encourage adults to serve as mentors for our young people. Programs must be expanded to recruit more volunteers to help fill the mentoring gap. Mentoring has successfully helped many children in this country and we must work together to expand such valuable programs. I urge the Senate to approve this resolution.

SENATE RESOLUTION 381—DESIGNATING THE WEEK OF FEBRUARY 1 THROUGH FEBRUARY 5, 2010, AS “NATIONAL SCHOOL COUNSELING WEEK”

Mrs. MURRAY (for herself and Ms. COLLINS) submitted the following reso-

lution; which was referred to the Committee on the Judiciary:

S. RES. 381

Whereas the American School Counselor Association has declared the week of February 1 through February 5, 2010, as “National School Counseling Week”;

Whereas the Senate has recognized the importance of school counseling through the inclusion of elementary and secondary school counseling programs in the reauthorization of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6301 et seq.);

Whereas school counselors have long advocated that the education system of the United States must leave no child behind and must provide opportunities for every student;

Whereas personal and social growth results in increased academic achievement;

Whereas school counselors help develop well-rounded students by guiding the students through their academic, personal, social, and career development;

Whereas school counselors have been instrumental in helping students, teachers, and parents deal with the trauma that was inflicted upon them by hurricanes Katrina, Rita, and Wilma, and other recent natural disasters;

Whereas students face a myriad of challenges every day, including peer pressure, depression, the deployment of family members to serve in conflicts overseas, and school violence;

Whereas school counselors are usually the only professionals in a school building who are trained in both education and mental health matters;

Whereas the roles and responsibilities of school counselors are often misunderstood, and the school counselor position is often among the first to be eliminated in order to meet budgetary constraints;

Whereas the national average ratio of students to school counselors of 475-to-1 is almost twice the 250-to-1 ratio recommended by the American School Counselor Association, the American Counseling Association, the American Medical Association, the American Psychological Association, and other organizations; and

Whereas the celebration of National School Counseling Week would increase awareness of the important and necessary role school counselors play in the lives of students in the United States: Now, therefore, be it

Resolved, That the Senate—

(1) designates the week of February 1 through February 5, 2010, as “National School Counseling Week”; and

(2) encourages the people of the United States to observe the week with appropriate ceremonies and activities that promote awareness of the role school counselors perform in the school and the community at large in preparing students for fulfilling lives as contributing members of society.

AMENDMENTS SUBMITTED AND PROPOSED

SA 3265. Mr. VITTER submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table.

SA 3266. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3267. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3268. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3269. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3270. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3271. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3272. Mr. LEMIEUX submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3273. Mrs. SHAHEEN (for herself, Mr. BENNET, and Ms. COLLINS) submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3274. Mr. MERKLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3275. Ms. SNOWE submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 3265. Mr. VITTER submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 179, line 5, add at the end the following: “Of the amount appropriated under this subsection, there shall be made available \$100,000,000 for each of fiscal years 2010 through 2019 to carry out section 4101 (and the amendments made by such section),

\$1,000,000,000 for each of fiscal years 2010 through 2013 for the National Cancer Institute (in addition to amounts otherwise appropriated to such Institute), and \$120,000,000 for each of fiscal years 2010 through 2019 for the Maternal and Child Health Services Block Grant program under title V of the Social Security Act.”.

SA 3266. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 1798, between lines 21 and 22, insert the following:

SEC. 6608. REQUIRED INVESTIGATION OF OUTLIERS.

Section 1862 of the Social Security Act (42 U.S.C. 1395y), as amended by section 6402(h), is amended by adding at the end the following new subsection:

“(p) **REQUIRED INVESTIGATION OF OUTLIERS.**—The Secretary shall conduct an investigation (in consultation with the Inspector General of the Department of Health and Human Services) or other appropriate review of a provider of services or supplier if the Secretary determines that the provider of services or supplier is an outlier in terms of utilization or payment under this title over a period of not less than 2 years.”.

SA 3267. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 1783, between lines 2 and 3, insert the following:

SEC. 6412. REQUIRING INDIVIDUALS OR ENTITIES THAT PARTICIPATE IN OR CONDUCT ACTIVITIES UNDER FEDERAL HEALTH CARE PROGRAMS TO COMPLY WITH CERTAIN CONGRESSIONAL REQUESTS.

(a) **IN GENERAL.**—Section 1128J of the Social Security Act, as added by section 6402, is amended by adding at the end the following new subsection:

“(f) **COMPLIANCE WITH CERTAIN REQUESTS BY INDIVIDUALS AND ENTITIES THAT PARTICIPATE IN OR CONDUCT ACTIVITIES UNDER FEDERAL HEALTH CARE PROGRAMS.**—

“(1) **IN GENERAL.**—Any individual or entity that participates in or conducts activities under a Federal health care program (as defined in section 1128B(f)) shall, as a condition of such participation or such conduct, comply (at a time and in a manner specified by the Chairman or ranking member) with any request submitted by the Chairman or the ranking member of a relevant committee of Congress to the individual or entity for the following:

- “(A) Documents.
- “(B) Information.

“(C) Interviews.

“(2) **RELEVANT COMMITTEE OF CONGRESS DEFINED.**—In this subsection, the term ‘relevant committee of Congress’ means the Committees on Ways and Means and Energy and Commerce of the House of Representatives and the Committee on Finance of the Senate.”.

(b) **EFFECTIVE DATE.**—The amendments made by this section shall take effect on the date that is 2 years after the date of enactment of this Act.

SA 3268. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 1798, between lines 21 and 22, insert the following:

SEC. 6608. MEDICAL ID THEFT INFORMATION SHARING PROGRAM AND CLEARINGHOUSE.

(a) **ESTABLISHMENT.**—Not later than 24 months after the date of enactment of this Act, the Secretary of Health and Human Services (in this section referred to as the “Secretary”), acting through the Administrator of the Centers for Medicare & Medicaid Services and in coordination with the Chairman of the Federal Trade Commission, shall establish an information sharing program regarding beneficiary medical ID theft under the programs under titles XVIII, XIX, and XXI of the Social Security Act (in this section referred to as the “program”).

(b) **CONTENTS OF PROGRAM.**—The program shall include—

- (1) the establishment of methods to identify and detect relevant warning signs of medical ID theft; and
- (2) the establishment of appropriate responses to such warning signs that would mitigate and prevent beneficiary medical ID theft; and
- (3) the development of a detailed plan to update the program as appropriate, taking into consideration such warning signs and appropriate responses.

(c) **ESTABLISHMENT OF CLEARINGHOUSE.**—The Secretary, in coordination with the Chairman of the Federal Trade Commission, shall establish a clearinghouse at the Centers for Medicare & Medicaid Services that collects reports of ID theft against beneficiaries under the programs under titles XVIII, XIX, and XXI of the Social Security Act from the Federal Trade Commission and other sources determined appropriate by the Secretary. Such clearinghouse shall be used to fight medical ID theft against beneficiaries and to prevent the improper payment of claims under such programs.

SA 3269. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 1740, strike lines 1 through 16, and insert the following:

“(o) **SUSPENSION AUTHORITY.**—

“(1) **IN GENERAL.**—The Secretary shall suspend payment to a provider of services or supplier under this title pending an investigation of credible allegations of fraud against the provider of services or supplier, unless the Secretary finds good cause not to suspend such payment.

“(2) **CONSULTATION.**—The Secretary shall consult with the Inspector General of the Department of Health and Human Services in determining whether there is a credible allegation of fraud against a provider of services or supplier.”.

SA 3270. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 1798, between lines 21 and 22, insert the following:

SEC. 6608. PERMISSIVE EXCLUSION AUTHORITY.

Clauses (i) and (ii) of section 1128(b)(15)(A) of the Social Security Act (42 U.S.C. 1320a-7(b)(15)(A)) are amended to read as follows:

“(i) who has or had a direct or indirect ownership or control interest in the sanctioned entity and who knew or should have known (as defined in section 1128A(i)(7)) of the action constituting the basis for the conviction or exclusion described in subparagraph (B); or

“(ii) who is or was an officer or managing employee (as defined in section 1126(b)) of such an entity at the time of the action constituting the basis for the conviction or exclusion so described.”.

SA 3271. Mr. GRASSLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 1783, between lines 2 and 3, insert the following:

SEC. 6412. REQUIREMENTS FOR THE TRANSMISSION OF MANAGEMENT IMPLICATION REPORTS BY THE HHS OIG.

Section 1128J of the Social Security Act, as added by section 6402, is amended by adding at the end the following new subsection:

“(f) **TRANSMISSION OF MANAGEMENT IMPLICATION REPORTS BY THE HHS OIG.**—

“(1) **CONGRESSIONAL NOTIFICATION.**—Not later than 30 days after the transmission by the Inspector General of the Department of Health and Human Services to another agency of the Department of Health and Human Services of a management implication report, the Inspector General shall notify the relevant committees of Congress of such transmission.

“(2) **SECRETARIAL RESPONSE.**—The Secretary shall respond to a management implication report transmitted under paragraph

(1) not later than 90 days after such transmission.

“(3) RELEVANT COMMITTEES OF CONGRESS DEFINED.—In this subsection, the term ‘relevant committees of Congress’ means the Committees on Ways and Means and Energy and Commerce of the House of Representatives and the Committee on Finance of the Senate.”.

SA 3272. Mr. LEMIEUX submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 1798, between lines 21 and 22, insert the following:

SEC. 6608. OTHER MISCELLANEOUS PROVISIONS.

(a) INCREASED CIVIL MONEY PENALTIES AND CRIMINAL FINES AND SENTENCES FOR MEDICARE FRAUD AND ABUSE.—

(1) INCREASED CIVIL PENALTIES AND CRIMINAL FINES.—

(A) INCREASED CIVIL MONEY PENALTIES.—Section 1128A of the Social Security Act (42 U.S.C. 1320a-7a) is amended—

(i) in subsection (a), in the flush matter following paragraph (7)—

(I) by striking “\$10,000” each place it appears and inserting “\$20,000”;

(II) by striking “\$15,000” and inserting “\$30,000”; and

(III) by striking “\$50,000” and inserting “\$100,000”; and

(ii) in subsection (b)—

(I) in paragraph (1), in the flush matter following subparagraph (B), by striking “\$2,000” and inserting “\$4,000”;

(II) in paragraph (2), by striking “\$2,000” and inserting “\$4,000”; and

(III) in paragraph (3)(A)(i), by striking “\$5,000” and inserting “\$10,000”.

(B) INCREASED CRIMINAL FINES.—Section 1128B of the Social Security Act (42 U.S.C. 1320a-7b) is amended—

(i) in subsection (a), in the flush matter following paragraph (6)—

(I) by striking “\$25,000” and inserting “\$100,000”; and

(II) by striking “\$10,000” and inserting “\$20,000”;

(ii) in subsection (b)—

(I) in paragraph (1), in the flush matter following subparagraph (B), by striking “\$25,000” and inserting “\$100,000”; and

(II) in paragraph (2), in the flush matter following subparagraph (B), by striking “\$25,000” and inserting “\$100,000”;

(iii) in subsection (c), by striking “\$25,000” and inserting “\$100,000”;

(iv) in subsection (d), in the second flush matter following subparagraph (B), by striking “\$25,000” and inserting “\$100,000”; and

(v) in subsection (e), by striking “\$2,000” and inserting “\$4,000”.

(C) EFFECTIVE DATE.—The amendments made by this subsection shall apply to civil money penalties and fines imposed for actions taken on or after the date of enactment of this Act.

(2) INCREASED SENTENCES FOR FELONIES INVOLVING MEDICARE FRAUD AND ABUSE.—

(A) FALSE STATEMENTS AND REPRESENTATIONS.—Section 1128B(a) of the Social Security Act (42 U.S.C. 1320a-7b(a)) is amended, in clause (i) of the flush matter following para-

graph (6), by striking “not more than 5 years” and inserting “not more than 10 years”.

(B) ANTI-KICKBACK.—Section 1128B(b) of the Social Security Act (42 U.S.C. 1320a-7b(b)) is amended—

(i) in paragraph (1), in the flush matter following subparagraph (B), by striking “not more than 5 years” and inserting “not more than 10 years”; and

(ii) in paragraph (2), in the flush matter following subparagraph (B), by striking “not more than 5 years” and inserting “not more than 10 years”.

(C) FALSE STATEMENT OR REPRESENTATION WITH RESPECT TO CONDITIONS OR OPERATIONS OF FACILITIES.—Section 1128B(c) of the Social Security Act (42 U.S.C. 1320a-7b(c)) is amended by striking “not more than 5 years” and inserting “not more than 10 years”.

(D) EXCESS CHARGES.—Section 1128B(d) of the Social Security Act (42 U.S.C. 1320a-7b(d)) is amended, in the second flush matter following subparagraph (B), by striking “not more than 5 years” and inserting “not more than 10 years”.

(E) MINIMUM SENTENCE.—Section 1128B of the Social Security Act (42 U.S.C. 1320a-7b) is amended by adding at the end thereof the following:

“(g) Notwithstanding any other provision of this section, the minimum period of imprisonment for a conviction under this section relating to Medicare fraud and abuse (if such imprisonment is otherwise provided for under this section) shall be 1 year and 1 day.”.

(F) EFFECTIVE DATE.—The amendments made by this subsection shall apply to criminal penalties imposed for actions taken on or after the date of enactment of this Act.

(b) CONSUMER RIGHT-TO-KNOW.—At the end of title I, insert the following:

“SEC. 1563. CONSUMER RIGHT TO KNOW.

“(a) DEVELOPMENT OF INFORMATION SYSTEM.—Not later than 1 year after the date of enactment of this Act, the Secretary of Health and Human Services shall develop a system for the collection of quality and pricing information related to the provision of health care services. Through the use of such information, the Secretary shall, to the extent practicable—

“(1) determine the lowest, median, average, and highest charged amount and reimbursed amount for each outpatient and inpatient health care procedure conducted at each facility in the United States;

“(2) provide comparisons of such prices with respect to procedures in similar facilities in the same county, city, State and on a national basis; and

“(3) develop quality of care data, including data on consumer satisfaction, coordination and continuity of care, infrastructure, the results of accreditation, Medicare-related information, and other survey information, and combine such data with price information to enable consumers to make informed choices.

“(b) USE OF EXISTING SOURCES.—To the extent that the information required under subsection (a) is being collected by the Centers for Medicare & Medicaid Services, States, State medical societies, or private sector entities, the Secretary, to the extent practicable, utilize such information to carry out such subsection.

“(c) AVAILABILITY OF INFORMATION.—The Secretary, either directly or through contract, shall make the information and data collected and developed under this section available on an Internet website. Such information and data shall be displayed by payer

(such as Medicare, Medicaid, health insurance plans, employer-based health plans, and other types of health care coverage).”.

(c) PRODUCTIVITY AWARD PROGRAM.—After section 3027, insert the following:

“SEC. 3028. PRODUCTIVITY AWARD PROGRAM.

“Not later than 1 year after the date of enactment of this Act, the Secretary of Health and Human Services shall establish a Productivity Award Program to recognize employees, work units, and contractors of the Centers for Medicare & Medicaid whose work significantly and measurably increases productivity and promotes innovation to improve the delivery of services and achieving savings for taxpayers. The amount of any such award shall be equal to 10 percent of the amount of the estimated saving to the Federal Government as a result of the action resulting in the award (as determined by the Secretary), but not to exceed \$50,000.”.

SA 3273. Mrs. SHAHEEN (for herself, Mr. BENNET, and Ms. COLLINS) submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 796, between lines 5 and 6, insert the following:

SEC. 3028. IMPROVEMENTS TO COMMUNITY-BASED CARE TRANSITIONS PROGRAM.

Section 3026 is amended—

(1) in subsection (a), by inserting “evidence-based” before “care transition services”;

(2) in subsection (b)—

(A) in paragraph (1), in the matter preceding subparagraph (A), by striking “The term” and inserting “Subject to paragraph (7), the term”; and

(B) by adding at the end the following new paragraph:

“(7) LIMITATION.—The term ‘eligible entity’ includes a subsection (d) hospital described in paragraph (1)(A) or a community-based organization described in paragraph (1)(B) only if the provider of services or organization demonstrates to the Secretary relevant training and experience in the delivery of care transition services, including for individuals providing such services under the program.”;

(3) in subsection (c)—

(A) in paragraph (1)—

(i) by redesignating subparagraph (B) as subparagraph (C);

(ii) by inserting after subparagraph (A) the following new subparagraph:

“(B) EVALUATION.—

“(i) IN GENERAL.—The Secretary shall conduct an evaluation of the program, and shall take such evaluation into account in determining whether to expand the program under subparagraph (C).

“(ii) DETERMINATION OF CRITERIA.—The Secretary shall determine the criteria used under such evaluation, taking into account hospital readmission rates and the experiences of primary caregivers and high-risk Medicare beneficiaries under the program, including the quality of care transition interventions and health outcomes.”;

(iii) in subparagraph (C), as redesignated by subparagraph (A), by striking “that such

expansion" and all that follows through the period at the end and inserting "that such expansion would—

"(i) reduce spending under title XVIII of the Social Security Act without reducing quality of care;

"(ii) improve quality of care and reduce such spending; or

"(iii) improve quality of care without increasing such spending."; and

(iv) by adding at the end the following new subparagraph:

"(D) REQUIRED ELEMENTS OF PROGRAM DURING EXPANSION PERIOD.—If the Secretary expands the program under subparagraph (C), the following shall apply with respect to such expansion:

"(i) EVIDENCE-BASED SERVICES.—The Secretary shall require the use of only evidence-based care transition services during such expansion.

"(ii) EXPANSION OF ELIGIBLE ENTITIES.—The Secretary shall expand the type of providers of services or organizations that may qualify as eligible entities for the provision of care transition services under subsection (b)(1), such as a home health agency, primary health care practice, or a Federally qualified health center. Any provider of services or organization that so qualifies under the preceding sentence shall be required to demonstrate to the Secretary relevant training and experience in the delivery of evidence-based care transition services, including for individuals providing such services under the program.";

(B) in paragraph (2)(B)—

(i) in the matter preceding clause (i), by striking " , which may include the following:" and inserting " . Each care transition intervention proposed shall include, at a minimum, the following:";

(ii) in clause (i)—

(I) by inserting "(and, as appropriate, the primary caregiver of the beneficiary)" after "high-risk Medicare beneficiary";

(II) by striking "not later than 24 hours"; and

(III) by inserting " , with a recommendation that such services should be initiated not less than 24 hours prior to such discharge and, whenever possible, earlier in the stay at the eligible entity" before the period at the end; and

(iii) by adding at the end the following new clauses:

"(vi) Providing care transition services to the high-risk Medicare beneficiary (and, as appropriate, the primary caregiver of the beneficiary) under the care transition intervention after admission and prior to the discharge of the beneficiary from the eligible entity and for a period of up to 90 days after such discharge.

"(vii) Providing at least some of the care transition services provided to the high-risk Medicare beneficiary under the care transition intervention in-person."; and

(C) in paragraph (3)—

(i) in subparagraph (A), by striking "or" at the end;

(ii) in subparagraph (B), by striking the period at the end and inserting " ; or"; and

(iii) by adding at the end the following new subparagraph:

"(C) support inpatient and ambulatory health care providers in improving the safety and quality of care, with a governing body that is not comprised of a majority of any type of provider or profession.";

(4) by redesignating subsection (f) as subsection (g); and

(5) by inserting after subsection (e) the following new subsection:

"(f) PROVISION OF DE-IDENTIFIED DATA TO PROVIDERS OF SERVICES AND SUPPLIERS.—

"(1) IN GENERAL.—Notwithstanding any other provision of law, subject to paragraph (3), an eligible entity participating in the program may make available to providers of services and suppliers participating in a care transition intervention under the program de-identified data with respect to high-risk Medicare beneficiaries.

"(2) DATA.—Data made available under paragraph (1) shall identify services provided by providers of services and suppliers to high-risk Medicare beneficiaries, for the purposes of—

"(A) improving the safety, quality, and effectiveness of care transition services provided to those beneficiaries under the program; and

"(B) measuring the safety, quality, and effectiveness of such services provided by a provider of services or supplier to the safety, quality, and effectiveness of such services provided by another provider of services or supplier.

"(3) PRIVACY STANDARDS.—Nothing in this subsection shall be construed to limit, alter, or affect the requirements imposed by the regulations promulgated under section 264(c) of the Health Insurance Portability and Accountability Act of 1996."

SA 3274. Mr. MERKLEY submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 144, between lines 23 and 24, insert the following:

(3) STANDARDS FOR OFFERING PLANS THROUGH EXCHANGE.—In carrying out its responsibilities under paragraph (1)(B), an Exchange may—

(A) set standards under which health plans may be offered through the Exchange, including the authority to negotiate bids; and

(B) enforce such standards, including by refusing to certify a health plan as a qualified health plan that may be offered through the Exchange.

SA 3275. Ms. SNOWE submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 816, after line 20, insert the following:

SEC. 3115. ACCREDITATION REQUIREMENT FOR ROTARY WING AIR AMBULANCE SERVICES.

Section 1834 of the Social Security Act (42 U.S.C. 1395m), as amended by this Act, is amended by adding at the end the following new subsection:

"(p) ESTABLISHMENT OF ROTARY WING AIR AMBULANCE ACCREDITATION PROCESS.—

"(1) IN GENERAL.—

"(A) ESTABLISHMENT OF PROCESS.—The Secretary, in consultation with the Secretary of Transportation (acting through the Administrator of the Federal Aviation Administration), shall establish a process for the accreditation of suppliers and providers of rotary wing air ambulance services reimbursed under the fee schedule established under subsection (1).

"(B) REQUIREMENT.—On or after January 1, 2012, payment may only be made to a supplier or provider of rotary wing air ambulance services (whether provided directly or under arrangement with a provider under this part) under the fee schedule established under subsection (1) if such supplier or provider is accredited by an organization designated by the Secretary pursuant to the process described in paragraph (2).

"(2) ACCREDITATION ORGANIZATIONS.—

"(A) DESIGNATION.—Not later than June 30, 2011, the Secretary shall designate organizations to accredit suppliers and providers of rotary wing air ambulance services under the process established under paragraph (1).

"(B) FACTORS FOR DESIGNATION.—The Secretary shall consider the following factors in designating accreditation organizations under subparagraph (A):

"(i) The ability of the organization to provide timely reviews of applications.

"(ii) Whether the organization uses random site visits, site audits, or other strategies for ensuring adherence to the criteria developed under paragraphs (3), (4), and (5).

"(iii) The ability of the organization to take into account the capacities of and special circumstances applicable to suppliers and providers of rural air ambulance services (as defined in subsection (1)(4)(C)).

"(iv) The ability of the organization to take into account the capacities of and special circumstances applicable to suppliers and providers of air ambulance services that are owned and operated by units of State or local government, including those that utilize a single aircraft for both air ambulance services and public safety purposes.

"(v) Whether the organization has established reasonable fees to be charged to suppliers and providers applying for accreditation.

"(vi) With respect to application of the criteria developed under paragraphs (3), (4), and (5), whether the organization has applicable experience in the accreditation of suppliers and providers.

"(vii) Whether the organization has developed an accreditation program that is adequate and appropriate to the goal of ensuring high caliber rotary wing air ambulance services.

"(viii) Such additional factors as are specified by the Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) with respect to quality, medical services, and emergency medical services integration considerations under paragraph (3)(A)(i).

"(ix) Such additional aviation safety-related factors as are developed by the Administrator of the Federal Aviation Administration under paragraph (4)(A).

"(x) The ability of the organization to effectively enforce the criteria developed under paragraphs (3), (4), and (5).

"(xi) Such other factors as the Secretary determines appropriate.

"(C) REVIEW AND MODIFICATION OF LIST OF ACCREDITATION ORGANIZATIONS.—The Secretary, in consultation with the Secretary of Transportation (acting through the Administrator of the Federal Aviation Administration) shall review on a regular basis the list

of organizations designated under subparagraph (A) with reference to the factors described in subparagraph (B) and, as a result of such review, may modify the list of organizations so designated by adding or removing organizations from such list.

“(3) DEVELOPMENT OF QUALITY, MEDICAL SERVICES, AND EMS INTEGRATION-RELATED DESIGNATION FACTORS AND ACCREDITATION CRITERIA.—

“(A) DEVELOPMENT OF DESIGNATION FACTORS AND ACCREDITATION CRITERIA BY ADMINISTRATOR OF CMS.—Not later than January 1, 2011, subject to subparagraphs (B) and (C), the Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) shall—

“(i) develop and transmit to the Secretary the additional quality, medical services, and integration with State emergency medical services systems related factors considered under paragraph (2)(B)(viii) in designating accreditation organizations under paragraph (2)(A); and

“(ii) develop and provide to the Secretary high-caliber quality, medical services, and emergency medical services integration criteria that accreditation organizations designated under paragraph (2)(A) shall utilize in the accreditation process established under paragraph (1).

“(B) CONSULTATION WITH FEDERAL AVIATION ADMINISTRATION.—The Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) shall consult with the Administrator of the Federal Aviation Administration in the development of the factors and criteria under clauses (i) and (ii), respectively, of subparagraph (A).

“(C) SCOPE OF QUALITY, MEDICAL SERVICES, AND EMS INTEGRATION-RELATED CRITERIA.—

“(i) CONSIDERATIONS.—In developing the criteria under subparagraph (A)(ii), the Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) shall consider National Transportation Safety Board Recommendations A-09-102 through A-09-103 and A-09-106 through A-09-107.

“(ii) CRITERIA.—Such criteria shall address—

“(I) the presence and qualifications of medical personnel on board the air ambulance;

“(II) real-time coordination between suppliers and providers and 911 systems and integration with State emergency medical systems;

“(III) medical oversight of paramedics, flight nurses, or other medical personnel on board air ambulances;

“(IV) quality assurance;

“(V) design of the air ambulance medical bay for the provision of patient care;

“(VI) minimum medically related service requirements;

“(VII) medical equipment and supplies on board the air ambulance;

“(VIII) the need to obtain licensure of the air ambulance by the State within which it is based, consistent with paragraph (8)(C); and

“(IX) such other matters as the Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) determines appropriate.

“(4) DEVELOPMENT OF AVIATION SAFETY-RELATED DESIGNATION FACTORS AND ACCREDITATION CRITERIA BY ADMINISTRATOR OF THE FAA.—

“(A) DEVELOPMENT OF DESIGNATION FACTORS AND ACCREDITATION CRITERIA.—Not later than January 1, 2011, subject to subparagraphs (B) and (C), the Administrator of the Federal Aviation Administration shall—

“(i) develop and transmit to the Secretary the additional aviation safety-related factors to be used under paragraph (2)(B)(ix) in designating accreditation organizations under paragraph (2)(A); and

“(ii) develop and provide to the Secretary aviation safety-related criteria that accreditation organizations designated under paragraph (2)(A) shall utilize in the accreditation process established under paragraph (1).

“(B) SOLE AUTHORITY OF FAA OVER DEVELOPMENT OF AVIATION SAFETY-RELATED DESIGNATION FACTORS AND ACCREDITATION CRITERIA.—The Administrator of the Federal Aviation Administration shall have sole authority over the development of designation factors and accreditation criteria under subparagraph (A).

“(C) SCOPE OF AVIATION SAFETY-RELATED CRITERIA.—

“(i) IN GENERAL.—The criteria developed by the Administrator of the Federal Aviation Administration under subparagraph (A) shall comprise minimum safety requirements for suppliers and providers of rotary wing air ambulance services to address aviation safety considerations particular to the transportation of patients between health care facilities and from emergency response locations for purposes of medical care and treatment that augment the operating standards under part 135 of title 14, Code of Federal Regulations and other statutory and regulatory requirements pertaining to aviation safety of helicopter aircraft used for emergency medical service.

“(ii) CRITERIA.—Such criteria shall consist of—

“(I) those criteria that the Administrator of the Federal Aviation Administration adopts based upon consideration of any National Transportation Safety Board Recommendations regarding the use of helicopter aircraft for emergency medical service that are not otherwise required by statute or regulation; and

“(II) such other matters as the Administrator of the Federal Aviation Administration determines appropriate.

“(5) REQUIREMENTS FOR CRITERIA DEVELOPMENT PROCESS.—

“(A) CONSIDERATION OF IMPACTS ON PATIENT AND RURAL ACCESS AND GOVERNMENT OWNED AND OPERATED SERVICE PROVIDERS; REQUIREMENT FOR STAKEHOLDER PARTICIPATION.—In developing accreditation criteria under paragraphs (3) and (4), the Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) and the Administrator of the Federal Aviation Administration, respectively, shall—

“(i) ensure that such criteria avoid adversely impacting beneficiaries under this title and other patient access to medically necessary and reasonable rotary wing air ambulance services, particularly in rural areas;

“(ii) expressly consider—

“(I) the particular needs and circumstances of suppliers and providers of rural air ambulance services (as defined in subsection (1)(14)(C));

“(II) the particular needs and circumstances of those suppliers and providers of air ambulance services that are owned and operated by units of State or local government (including those that utilize a single aircraft for both air ambulance services and public safety purposes);

“(III) the extent to which any such criteria is economically feasible to ensure continued access to rotary wing air ambulance services, particularly in rural areas;

“(IV) the extent to which any such criteria is technically feasible, taking into account

the ability of existing aircraft to comply with any such standards, as well as the market availability and future development of equipment and products that can be installed on or carried aboard existing rotary wing aircraft; and

“(V) the incorporation of any such criteria during appropriate implementation timeframes with the goal of transitioning toward higher caliber criteria for beneficiaries under this title over a reasonable period of time and in a manner that does not impede access to rotary wing air ambulance services, particularly in rural areas; and

“(iii) ensure that the process of developing such criteria is undertaken through a transparent process that provides for input from various stakeholders, including organizations representing physicians and other medical professionals, State, or local governments that own and operate air ambulance services, organizations representing air medical suppliers or providers, patient organizations, State emergency medical services, public health officials, and any other stakeholders determined appropriate by the Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) or the Administrator of the Federal Aviation Administration, respectively.

“(B) REGULAR UPDATING OF CRITERIA.—The Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) and the Administrator of the Federal Aviation Administration shall ensure that the criteria developed under paragraphs (3) and (4), respectively, are reviewed not less than frequently than every 2 years and updated as appropriate to reflect consideration of new medical and aviation standards, technologies, and equipment.

“(6) INCORPORATION OF ACCREDITATION CRITERIA.—

“(A) IN GENERAL.—The Secretary shall combine the criteria developed by the Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) under paragraph (3) and the criteria developed by the Administrator of the Federal Aviation Administration under paragraph (4) into a single set of final criteria and ensure that accreditation organizations designated under paragraph (2)(A) apply such set of final criteria as substantive requirements in the accreditation process established under paragraph (1).

“(B) REVIEW.—The Secretary shall review such set of final criteria to ensure that, taken as a whole, such criteria are consistent with the requirements of clauses (i) and (ii) of paragraph (5)(A). If the Secretary determines that such set of final criteria is not consistent with such requirements, the Secretary shall request that the Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services) and the Administrator of the Federal Aviation Administration modify such criteria in accordance with the process described in paragraphs (3), (4), and (5).

“(7) GRANDFATHER PROTECTION FOR AIRCRAFT PRESENTLY PROVIDING ROTARY WING AIR AMBULANCE SERVICES.—

“(A) IN GENERAL.—Subject to subparagraph (B), the Secretary shall exempt any rotary wing air ambulance listed on a currently valid operating certificate with A021 air ambulance operations specifications pursuant to parts 119 and 135 of title 14, Code of Federal Regulations or any air ambulance for which a contractual obligation to purchase such air ambulance had been entered into prior to the date of enactment of the Patient Protection and Affordable Care Act, from

compliance with any accreditation criteria developed under paragraphs (3), (4), and (5) or incorporated under paragraph (6), if, as determined by the Administrator of the Federal Aviation Administration in consultation with the Secretary (acting through the Administrator of the Centers for Medicare & Medicaid Services), compliance with such criteria would require the replacement of such aircraft or impose an undue economic burden on a supplier or provider of rotary wing air ambulance services with respect to compliance costs.

“(B) LIMITATION.—The exemption authority under subparagraph (A) shall not apply to any new or used aircraft purchased after the date of enactment of the Patient Protection and Affordable Care Act (including aircraft purchased as a replacement for an existing aircraft) unless the supplier or provider was under contractual obligation to purchase such air ambulance prior to such date of enactment.

“(8) RELATIONSHIP TO OTHER LAWS AND AUTHORITIES.—Nothing in this section shall—

“(A) limit the authority of the Federal Aviation Administration over civil aviation or infringe upon any regulations or guidance respecting civil aviation safety;

“(B) affect the provisions of or requirements under section 41713(b) of title 49, United States Code; or

“(C) affect the authority of States to license providers of air ambulance services or medical personnel aboard such air ambulances, except to the extent otherwise prohibited by law, including such section 41713(b).”.

EXPANDING VETERAN ELIGIBILITY FOR REIMBURSEMENT

Mr. MENENDEZ. Mr. President, I ask unanimous consent that the Veterans' Affairs Committee be discharged from further consideration of H.R. 1377 and the Senate proceed to its immediate consideration.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will report the bill by title.
The bill clerk read as follows:

A bill (H.R. 1377) to amend title 38, United States Code, to expand veteran eligibility for reimbursements by the Secretary of Veterans Affairs for emergency treatment furnished in a non-Department facility, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. AKAKA. Mr. President, today I urge our colleagues to pass legislation that would rightfully correct a deficiency in the law governing emergency health care treatment for veterans.

H.R. 1377, which passed the House in March of this year, would expand veteran eligibility for reimbursement for emergency treatment furnished in a non-Department facility. H.R. 1377 is a companion bill to provisions contained in S. 1963, the Caregiver and Veterans Omnibus Health Services Act of 2009, which passed the Senate just a few weeks ago.

Under current law, originally enacted on November 30, 1999, a veteran who is enrolled in VA's health care system

can be reimbursed for emergency treatment received at a non-VA hospital. However, the statute only permits such VA reimbursement if the veteran has no other outside health insurance, no matter how limited that other coverage might be. This means that a veteran who has any insurance is not entitled to reimbursement from VA for emergency medical treatment received at a non-VA facility. This holds true even if the veteran's insurance policy does not cover the full amount owed.

In discussing the importance of this legislation, I mention one particular story that came to the committee's attention. A disabled Vietnam veteran from Illinois was in a serious motorcycle accident which led to emergency medical bills totaling over \$100,000. This veteran had state mandated motorcycle insurance, but it only covered \$10,000 in expenses. Because under current law veterans are personally responsible for any difference between whatever coverage they have and the costs of their emergency care, VA was prohibited from paying for this veteran's care.

H.R. 1377 would modify current law so that a veteran who has outside insurance would be eligible for reimbursement in the event that the outside insurance does not cover the full amount of the emergency care. VA would be authorized to cover the difference between the amount the veteran's insurance will pay and the total cost of care. In essence, VA would become the payer of last resort in such cases. This would keep the veteran from being burdened by medical fees with no insurance with which to pay them. Additionally, this bill would also allow the Secretary of Veterans Affairs to retroactively apply this law to emergency treatment received between the effective date of the current law and the date of enactment of the legislation, thereby ensuring assistance to as many veterans as possible.

Mr. President, I urge passage of H.R. 1377 to rightfully fill this hole in veterans' health care.

Mr. MENENDEZ. Mr. President, I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to the bill be printed in the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The bill (H.R. 1377) was ordered to a third reading, was read the third time, and passed.

RECOGNIZING EFFORTS TO PROVIDE GAME MEAT TO FEED THE HUNGRY

Mr. MENENDEZ. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 230, S. Res. 374.

The ACTING PRESIDENT pro tempore. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 374) recognizing the cooperative efforts of hunters, sportsmen's associations, meat processors, hunger relief organizations, and State wildlife, health, and food safety agencies to establish programs that provide game meat to feed the hungry.

There being no objection, the Senate proceeded to consider the resolution.

Mr. MENENDEZ. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to the resolution be printed in the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The resolution (S. Res. 374) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 374

Whereas almost every State has a program in which hunters may donate game meat to feed the hungry;

Whereas hunters, sportsmen's associations, meat processors, community hunger organizations, and State wildlife, health, and food safety agencies work together successfully to operate such programs whereby hunters feed the hungry; and

Whereas such programs have brought hundreds of thousands of pounds of game meat to homeless shelters, soup kitchens, and food banks: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the cooperative efforts of hunters, sportsmen's associations, meat processors, hunger relief organizations, and State wildlife, health and food safety agencies to establish programs that provide game meat to feed the hungry across the United States; and

(2) recognizes the contributions of such programs to efforts to decrease hunger and feed individuals in need.

EXPRESSING SYMPATHY FOR CIVILIANS KILLED IN THE PHILIPPINES

Mr. MENENDEZ. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of H. Con. Res. 218 and the Senate proceed to its immediate consideration.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will report the concurrent resolution by title.

The bill clerk read as follows:

A concurrent resolution (H. Con. Res. 218) expressing sympathy for the 57 civilians who were killed in the southern Philippines on November 23, 2009.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. MENENDEZ. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to the concurrent resolution be printed in the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 218) was agreed to.

The preamble was agreed to.

ORDERS FOR SATURDAY,
DECEMBER 19, 2009

Mr. MENENDEZ. Mr. President, I ask unanimous consent that when the Senate completes its business today, it ad-

journal until 6:45 a.m., Saturday, December 19; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of the House message with respect to H.R. 3326, the Department of Defense Appropriations Act, with the time until 7:20 a.m. equally divided and controlled between the two leaders or their designees, with the final 10 minutes reserved for the two leaders, with the majority leader controlling the final 5 minutes. Finally, I ask that the time during the adjournment and any period of morning business count postcloture.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PROGRAM

Mr. MENENDEZ. Mr. President, Senators should expect multiple votes to begin at approximately 7:20 a.m. tomorrow.

ADJOURNMENT UNTIL 6:45 A.M.
TOMORROW

Mr. MENENDEZ. If there is no further business to come before the Senate, I ask unanimous consent that it adjourn under the previous order.

There being no objection, the Senate, at 6:52 p.m., adjourned until Saturday, December 19, 2009, at 6:45 a.m.

HOUSE OF REPRESENTATIVES—Saturday, December 19, 2009

The House met at noon and was called to order by the Speaker pro tempore (Ms. EDWARDS of Maryland).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
December 19, 2009.

I hereby appoint the Honorable DONNA F. EDWARDS to act as Speaker pro tempore on this day.

NANCY PELOSI,
Speaker of the House of Representatives.

COMMUNICATION FROM THE SERGEANT AT ARMS OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Sergeant at Arms of the House of Representatives:

OFFICE OF THE SERGEANT AT ARMS,
HOUSE OF REPRESENTATIVES,
Washington, DC, December 18, 2009.

Hon. NANCY PELOSI,
The Speaker,
Washington, DC.

DEAR MADAM SPEAKER, As you are aware, the time previously appointed for the next meeting of the House is 6 p.m. on Saturday, December 19, 2009. This is to notify you, pursuant to clause 12(c) of rule I, of an imminent impairment of the place of reconvening at that time. The impairment is due to the weather.

Respectfully,

WILSON LIVINGOOD,
Sergeant at Arms.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Under clause 12(c) of rule I, the Speaker established this time for reconvening and notified Members accordingly.

PRAYER

The Reverend Gene Hemrick, Washington Theological Union, Washington, D.C., offered the following prayer:

Lord, during this holy season which prompts us to especially lift our thoughts to You, may You bless this Congress with Your wisdom and the peace and justice it creates when we turn to You.

We further pray that in this inclement weather You give its Members safe passage home to be with their loved ones and to experience the joy this creates. Amen.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. The Chair will lead the House in the Pledge of Allegiance.

The SPEAKER pro tempore led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

OFFICE OF THE CLERK,
HOUSE OF REPRESENTATIVES,
Washington, DC, December 19, 2009.

Hon. NANCY PELOSI,
The Speaker,
Washington, DC.

DEAR MADAM SPEAKER: Pursuant to the permission granted in Clause 2(h) of Rule II of the Rules of the U.S. House of Representatives, the Clerk received the following message from the Secretary of the Senate on December 19, 2009, at 10:00 a.m.

That the Senate concurs in the amendment of the House to the amendment of the Senate to the bill H.R. 3326.

That the Senate passed without amendment H.R. 1377.

That the Senate agreed to without amendment H. Con. Res. 218.

That the Senate agreed to without amendment H.J. Res. 64.

With best wishes, I am
Sincerely,

LORRAINE C. MILLER,
Clerk of the House.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(c) of rule I, the House shall stand in recess until approximately 11:30 a.m. on Wednesday, December 23, 2009.

Accordingly (at 12 o'clock and 3 minutes p.m.), the House stood in recess.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. MORAN of Virginia) at 11 o'clock and 30 minutes a.m.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

HOUSE OF REPRESENTATIVES,
Washington, DC, December 22, 2009.

Hon. NANCY PELOSI,
The Speaker, The Capitol, House of Representatives,
Washington, DC.

DEAR MADAM SPEAKER: Pursuant to the permission granted in Clause 2(h) of Rule II of the Rules of the U.S. House of Representatives, the Clerk received the following message from the Secretary of the Senate on December 22, 2009, at 9:45 a.m.:

That the Senate passed without amendment H.R. 2877.

That the Senate passed without amendment H.R. 3072.

That the Senate passed without amendment H.R. 3319.

That the Senate passed without amendment H.R. 3539.

That the Senate passed without amendment H.R. 3667.

That the Senate passed without amendment H.R. 3767.

That the Senate passed without amendment H.R. 3788.

That the Senate passed without amendment H.R. 1817.

With best wishes, I am

Sincerely,

LORRAINE C. MILLER,
Clerk of the House.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

HOUSE OF REPRESENTATIVES,
Washington, DC, December 22, 2009.

Hon. NANCY PELOSI,
The Speaker, The Capitol, House of Representatives,
Washington, DC.

DEAR MADAM SPEAKER: Pursuant to the permission granted in Clause 2(h) of Rule II of the Rules of the U.S. House of Representatives, the Clerk received the following message from the Secretary of the Senate on December 22, 2009, at 9:17 a.m.:

That the Senate passed without amendment H.R. 4282.

That the Senate agreed to without amendment H. Con. Res. 206.

Appointments: United States-China Inter-parliamentary Group (2).

With best wishes, I am

Sincerely,

LORRAINE C. MILLER,
Clerk of the House.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 4 of rule I, the following enrolled bill and joint resolution were signed on Saturday, December 19, 2009:

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

By the Speaker:

H.R. 3326, making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes;

and by Speaker pro tempore VAN HOLLEN:

H.J. Res. 64, making further continuing appropriations for fiscal year 2010, and for other purposes.

ENROLLED BILLS SIGNED

Lorraine C. Miller, Clerk of the House, reported and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker on Saturday, December 19, 2009:

H.R. 3326. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes.

Lorraine C. Miller, Clerk of the House, further reported and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker pro tempore, Mr. VAN HOLLEN, on Saturday, December 19, 2009:

H.J. Res. 64. Joint resolution making further continuing appropriations for fiscal year 2010, and for other purposes.

ADJOURNMENT

The SPEAKER pro tempore. Pursuant to section 11(b) of House Resolution 976, the House shall stand adjourned until noon today unless the conditions specified in section 11(c) of that resolution have been met, in which case the House shall stand adjourned sine die pursuant to House Concurrent Resolution 223.

Accordingly (at 11 o'clock and 33 minutes a.m.), the House adjourned until today, Wednesday, December 23, 2009, at noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5172. A communication from the President of the United States, transmitting an supplemental consolidated report, consistent with the War Powers Resolution, to help ensure that the Congress is kept fully informed on U.S. military activities in support of the war on terror and Kosovo, pursuant to Public Law 93-148; (H. Doc. No. 111-79); to the Committee on Foreign Affairs and ordered to be printed.

5173. A letter from the Acting Executive Secretary, U.S. Agency For International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5174. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant

to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5175. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5176. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5177. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5178. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5179. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5180. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5181. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5182. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5183. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5184. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5185. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5186. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5187. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

5188. A letter from the Acting Executive Secretary, U.S. Agency for International Development, transmitting a report pursuant

to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Omitted from the Record of December 16, 2009]

Mr. CONYERS: Committee on the Judiciary. H.R. 3845. A bill to extend and modify authorities needed to combat terrorism and protect civil liberties, and for other purposes; with an amendment (Rept. 111-382 Pt. 1). Ordered to be printed.

[The following actions occurred on December 17, 2009]

Mr. SKELTON: Committee on Armed Services. House Resolution 924. Resolution directing the Secretary of Defense to transmit to the House of Representatives copies of any document, record, memo, correspondence, or other communication of the Department of Defense, or any portion of such communication, that refers or relates to the trial or detention of Khalid Sheikh Mohamed, Walid Muhammad Salih Mubarek Bin 'Attash, Ramzi Binalshibh, Ali Abdul Aziz Ali, or Mustafa Ahmed Adam al Hawsawi, with an amendment (Rept. 111-383). Referred to the House Calendar.

Mr. REYES: Permanent Select Committee on Intelligence. House Resolution 923. Resolution requesting the President to transmit to the House of Representatives all documents in the possession of the President relating to the effects on foreign intelligence collection of the transfer of detainees held at Naval Station, Guantanamo Bay, Cuba, into the United States, with an amendment (Rept. 111-384). Referred to the House Calendar.

[Filed on December 23 (legislative day of December 19), 2009]

Mrs. MALONEY: The 2009 Joint Economic Report (Rept. 111-388). Referred to the Committee of the Whole House on the State of the Union.

DISCHARGE OF COMMITTEE

Pursuant to clause 2 of rule XIII the Committees on Financial Services and the Judiciary discharged from further consideration, H.R. 977 referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

Pursuant to clause 2 of rule XIII the Committee on Financial Services discharged from further consideration, H.R. 2646 referred to the Committee of the Whole House on the State of the Union, and ordered to be printed.

REPORTED BILL SEQUENTIALLY REFERRED

Under clause 2 of rule XII, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. PETERSON: Committee on Agriculture. H.R. 977. A bill to amend the Commodity Exchange Act to bring greater transparency and accountability to commodity markets, and for other purposes, with an amendment, Rept. 111-385, Pt. 1; Referred to

the Committee on Judiciary for a period ending not later than December 19, 2009, for consideration of such provisions of the bill and amendment as fall within the jurisdiction of that committee pursuant to clause 1(k), rule X.

Mr. OBERSTAR: Committee on Transportation and Infrastructure. H.R. 3376. A bill to amend title 46, United States Code, to ensure the traditional right of self-defense of United States mariners against acts of piracy, and for other purposes, Rept. 111-386, Part 1; Referred to the Committees on Judiciary, and Homeland Security for a period ending not later than March 25, 2010, for consideration of such provisions of the bill as fall within the jurisdiction of those committees pursuant to clause 1(k) and 1(i) respectively, rule X.

Mr. TOWNS: Committee on Oversight and Government Reform. H.R. 2646. A bill to amend title 31, United States Code, to enhance the oversight authorities of the Comptroller General, and for other purposes, with an amendment, Rept. 111-387, Part 1; Referred to the Committee on Financial Services for a period ending not later than December 19, 2009, for consideration of such provisions of the bill and amendment as fall within the jurisdiction of that committee pursuant to clause 1(g), rule X.

TIME LIMITATION OF REFERRED BILL PURSUANT TO RULE XII

Pursuant to clause 2 of rule XII the following action was taken by the Speaker:

[Omitted from the Record of December 16, 2009]

H.R. 4312: Mr. HOEKSTRA.

H.R. 4357: Mr. PIERLUISI.

H.R. 4400: Mr. CASTLE and Mr. RAHALL.

H. Res. 444: Mr. LIPINSKI.

H. Res. 988: Mr. WOLF and Mr. BOEHNER.

SENATE—Saturday, December 19, 2009

The Senate met at 6:45 a.m. and was called to order by the Honorable ROBERT P. CASEY, Jr., a Senator from the Commonwealth of Pennsylvania.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Almighty God, remove from our hearts any destructive fear of the future, whether of the life that now is or the life that is to come. Today, abide with our lawmakers, giving them wisdom to allow Your Spirit to have access to their hearts. Deepen their joy during this sacred season when we remember Your journey to our world to save us from sin. Remind them that they cannot begin to manage life as You intend it to be unless they look to You for guidance and power. Renew their trust in You as the Sovereign of our Nation and the generous Benefactor of the blessings that come to our land.

We pray in Your mighty Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable ROBERT P. CASEY, Jr., led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 19, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT P. CASEY, Jr., a Senator from the Commonwealth of Pennsylvania, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. CASEY thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Mr. President, following leader remarks, if any, the Senate will resume the House message with respect to H.R. 3326, the Department of Defense Appropriations Act.

The time until 7:20 a.m. will be equally divided and controlled between the two leaders or their designees, with the final 10 minutes reserved for the two leaders, with the majority leader controlling the final 5 minutes. At approximately 7:20 a.m. the Senate will proceed to a series of votes with respect to the Defense appropriations bill.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2010

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of the House message with respect to H.R. 3326, which the clerk will report.

The legislative clerk read as follows:

House message to accompany H.R. 3326, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes.

Pending:

Reid motion to concur in the amendment of the House to the amendment of the Senate to the bill.

Reid motion to concur in the amendment of the House to the amendment of the Senate with amendment No. 3248 (to the House amendment to the Senate amendment), to change the enactment date.

Reid amendment No. 3252 (to Reid amendment No. 3248), to change the enactment date.

The ACTING PRESIDENT pro tempore. Under the previous order, the time until 7:20 a.m. shall be equally divided and controlled between the two leaders or their designees, with the final 10 minutes reserved for the two leaders, and with the final 5 minutes controlled by the majority leader.

The majority leader is recognized.

Mr. REID. Mr. President, it is my understanding the time until 7:10 is equally divided and controlled; is that right?

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. REID. Mr. President, I designate the majority whip, the Senator from Illinois, DICK DURBIN, to have control of that 10 minutes on our side.

The ACTING PRESIDENT pro tempore. Who yields time?

The Senator from Tennessee.

Mr. ALEXANDER. Mr. President, how much time do we have on this side?

The ACTING PRESIDENT pro tempore. Ten minutes.

Mr. ALEXANDER. Mr. President, please let me know when 1 minute remains.

Mr. President, we are here on this early Saturday morning, as we lead up to Christmas Day, to finish work on the Defense appropriations bill. But the country knows the focus of our attention, the reason we are here, is because of the health care debate. We are in our 20th consecutive day of considering health care, and we still do not have a final bill. In other words, we do not yet know what we are voting on, how much it costs, or how it affects the American people.

On October 6, 2009, eight Democratic Senators wrote the majority leader a letter which expressed the view also of all 40 Republican Senators, and it said what ought to be obvious: that when debating even a minor bill, but certainly a major bill of this magnitude, the "public's participation in this process"—so the letter went—"is critical to our overall success of creating a bill that lowers health care costs and offers access to quality and affordable health care for all Americans."

The letter from the eight Democratic Senators continues:

Every step of the process needs to be transparent, and information regarding the bill needs to be readily available to our constituents before the Senate starts to vote on legislation that will affect the lives of every American.

The letter continues:

The legislative text and complete budget scores from the Congressional Budget Office of the health care legislation considered on the Senate floor should be made available on a website the public can access for at least 72 hours prior to the first vote to proceed to the legislation. Likewise, the legislative text and complete CBO scores of the health care legislation as amended should be made available to the public for 72 hours prior to the vote on final passage of the bill in the Senate. Further, the legislative text of all amendments filed and offered for debate on the Senate floor should be posted on a public website prior to beginning debate on the amendment on the Senate floor. Lastly, upon a final agreement between the House of Representatives and the Senate, a formal conference report detailing the agreement and complete CBO scores of the agreement should be made available to the public for 72 hours prior to the vote on final passage of the conference report in the Senate.

Mr. President, that is wise advice from Senator LINCOLN, Senator BAYH, Senator LANDRIEU, Senator LIEBERMAN, Senator MCCASKILL, Senator NELSON,

Senator PRYOR, and Senator WEBB. What they are saying is, before we vote on a health care bill that affects nearly every 1 of all 300 million Americans we ought to have 72 hours to read the bill and know what it costs. We know the current version, when fully implemented, will spend \$2.5 trillion, which the Chief Actuary of the government says insofar as we know it will increase the cost of health care rather than reduce it. We know that the version we have seen so far will take \$1 trillion out of Medicare when the bill is fully implemented and not use it to strengthen Medicare—which is becoming insolvent in the years 2015 to 2017, according to the trustees of Medicare—but instead would spend that money on some other program. We know it would—as David Brooks in a New York Times column said yesterday—create a huge tax, \$1.42 trillion in the second decade of its operation to help pay for this, which the Director of the Congressional Budget Office has said would inevitably be passed along to consumers and cause premium costs to go up, not down. And we know it would expand Medicaid, the other large government program we already have for low-income Americans, sending a bill of \$25 billion to the States that has been roundly denounced by almost every Governor in the country, Democratic and Republican.

Because at a time when the States are struggling more than they have since the Great Depression with their own budgets, when they cannot print money, when they have to balance their budgets, we are expanding health care and sending them a huge bill to help pay for it. This inevitably will force States to raise taxes, raise college tuition; and, in my State, the Governor is considering releasing up to 4,000 nonviolent offenders from the prisons as a result of some of the budgetary pressures that are on him.

So that is what we do know about the bill. But we do not have the final version of the bill. Yet it is said we should vote on this by Christmas when, in fact, most of the provisions of the bill do not take effect until 2014. That is 4 years from now. Only a few provisions start right away. Mr. President, \$73 billion in taxes start right away. Medicare cuts start right away. Mandates start right away. A few benefits start right away.

But, basically, the thrust of this massive legislation that affects 17 percent of our economy does not take effect for 4 years. So if we do not have the bill, and if most of the legislation does not take effect for 4 more years, then why are we spending this time staying up all night, rushing to enact the bill by Christmas?

I believe it is because the majority knows the longer the public sees the bill, the more they know about it, the less they will like it, and they want to

try to pass it before people know what is in it. Otherwise, we would already have the bill. Otherwise, we would be taking the time we took with the farm bill, with the Education bill, with the Energy bill, with other major legislation that takes 5, 6, 8, 10 weeks. Otherwise, we would have worked across party lines and had many different kinds of views. So this is a rush.

There has been a lot of talk about making history on health care. The problem is, there are different kinds of history. In this case, the Democratic majority seems to be determined to pursue a political kamikaze mission toward an historic mistake. If it succeeds, the results will be disastrous for the Democrats in 2010, I would predict. But, unfortunately, it will be a bigger disaster for our country.

Now, this will not be Congress's first historic mistake. The Smoot-Hawley tariff of 1930 "to buy American" sounded pretty good. It sounded like a good way to protect jobs by keeping foreign products out. But historians agree it was an historic mistake, setting off retaliatory waves, tariffs, and making the Great Depression worse.

The Alien and Sedition Acts of 1798 sounded good too. The idea was, let's protect the country from enemies within our midst, mostly French then. But that turned out to be an historic mistake encouraging more protests and offending our traditions of free speech.

In 1969, the Congress found 155 Americans who were not paying taxes and said: Let's have a millionaires tax. That sounded good too. It turned out to be another historic mistake. Last year, it caught 28 million Americans before we rushed to patch it, to fix it for a year.

More recently, there was the Catastrophic Coverage Act of 1988 to help seniors deal with financial losses. The trouble is, seniors resented paying for it, and angry crowds surrounded the chairman of the House Ways and Means Committee in his home district. Congress repealed that mistake, and the leader of those angry seniors is now a Congresswoman from Illinois.

Then there was the luxury tax on boats in 1991. That sounded good: We are going to get all those people who have boats that cost more than \$100,000. The trouble was, it raised about half the revenue projected, and it nearly sank the boat industry, putting 7,600 people out of work. A change in Congress repealed that one too. Rather than make history of this sort, Congress should learn from history. We should take Governor Schwarzenegger's advice this week.

He suggested:

So I would say, be very careful to the federal overment before you go to bed with all this. Let's rethink it. There's no rush from one second to the next. Let's take another week or two and come up with the right package.

The Governor, of course, was concerned about the Medicaid expansion

costs in his State—\$3 billion for California. He said:

[The] last thing we need is another \$3 billion of [state] spending when we already have a \$20 billion deficit.

So why the rush? We do not have the bill. We have plenty of time to deal with this. Most of it does not take effect for 4 more years. And what if in trying to fix everything all at once we get it wrong—will Congress be rushing back to fix health care again? Because if Congress makes another historic mistake, it will not be nearly as easy to fix as repealing a boat tax.

I thank the Acting President pro tempore, and I yield the floor.

The ACTING PRESIDENT pro tempore. The assistant majority leader is recognized.

Mr. DURBIN. Mr. President, we met before 7 a.m. on this Saturday morning, and I am reminded of the famous quote:

Neither snow nor rain nor heat nor gloom of night stays these couriers from the swift completion of their appointed rounds.

A snowstorm has struck Washington, DC. Yet 100 Members of the Senate will be called on in less than half an hour to be on the floor of the Senate to vote at this early morning hour. And for any who are hale and hearty and up watching or following this debate, the obvious question is, why? Why is the Senate in? What is it doing?

Well, we are in because the Republican Senators are filibustering the Department of Defense appropriations bill. This is the money for our troops, for our military, for their families, for their health care, for their equipment, for their paychecks. It is a bill which usually passes with a few patriotic speeches and little controversy. Yet the Republicans have held us now. This is the third day on the floor because they are filibustering the Department of Defense appropriations bill.

You might ask yourself: What is happening? Has the Republican Party turned on America's military? I do not think so. I think, in fact, they support America's military. But they are willing to use them and use their spending bill as part of their parliamentary procedure.

We know what this is all about. It is about delaying the business of the Senate and not just health care. They want to delay everything in the Senate. That is their strategy. That is what they have to offer to the American people. Not ideas, not alternatives, not solutions, but delay.

I suppose they think that is a winning way. The Senator from Tennessee just predicted in the next election the American people will rally behind this strategy of theirs of doing nothing, of failing to respond to the challenges facing America. I see it otherwise. I have this simple analysis of why I am here. The people of Illinois sent me here to try to do a good job for them

and make some good judgments on the Senate floor, but basically to help improve their lives. If you do nothing, if you deny, if you filibuster, if that is all you do, you don't have much to show for it at the end of the day.

The record is pretty clear. We have been debating health care reform for more than 2 weeks, about 19 or 20 days of debate, on a 2,000-page bill. The Senator from Tennessee complains: Well, we just don't know what is in this bill. This bill has been posted on the Republican Senate Web site for more than 2 weeks. I think they know what is in it.

Do you know how many amendments they came up with to change the language of this bill in the span of 20 days? How many bright, creative Republican ideas came up to change this bill in 20 days? Four, four amendments in 20 days. The combined wisdom of the Republican Senate caucus came up with four amendments to this bill of 2,000 pages in 20 days and six different motions to send the bill back to committee and stop talking about it.

Now the Senator tells us: We just need more time.

You have had time. You have had plenty of time. You have had time to offer your substitute. We have been waiting on the Republicans to come forward, if they think America's health care system could be improved, with their ideas. The Senator from Oklahoma, Mr. COBURN, has said he has a plan. He never offered it. I don't know if he tried to offer it, if the Republican leadership turned him down. He never offered it.

Senator GRASSLEY from Iowa said on the Senate floor: We have a plan.

Where is this secret plan? Where is the Republican plan for reforming health care? Carefully hidden, secreted away in a cloakroom? Is it under a snowdrift in a parking lot? What have you done with your plan? You don't have one. If you go to the Republican Senate Web site and look for health care reform, you will find it. You will find the Democratic bill because, frankly, they have nothing to offer.

Now comes the Senator from Tennessee and he says stop what we are doing. Let's stop right now. Our plan is to slow down, filibuster the Defense appropriations bill, and then slow down everything that comes after it in the hope that we will stop and do nothing. He argues that is good for the American people. Let me tell my colleagues what the Senator from Tennessee will risk for the American people if he has his way.

We know immediately—immediately—the doughnut hole in the Medicare prescription Part D for seniors is going to be filled across America. What it means is seniors who have a gap in insurance coverage for prescription drugs will have that filled. Eight million seniors in 2007 hit that doughnut hole because they had med-

ical bills more expensive than what Medicare covered. We are going to fill that doughnut hole. By 2010, seniors across America, immediately, will see the benefit.

The Senator from Tennessee says: This bill will destroy Medicare. Not quite true. In fact, the Congressional Budget Office says this bill will put Medicare on sound footing. Medicare untouched will go broke in about 8 years. Medicare, because of this bill, will have another 10 years of sound financial footing—exactly the opposite of what has been stated on the floor of the Senate.

How many parents get worried because their kids are in college and they are on their family health care plan and they are about to graduate and they wonder if they are going to have health insurance. Well, in most places across America, most policies, by age 24 your dependent child is no longer covered by your family plan. Immediately, with the passage of this bill, we are going to extend coverage, providing immediate help for 13 million to 14 million young Americans no longer in college and not covered by their own employment insurance, not eligible for their parents' coverage. They are going to have coverage under this plan.

Only 6 months after the enactment of this bill, insurers will be required to permit children to stay on family policies until age 26, in the year 2010. So when the Senator from Tennessee says nothing happens until 2014 except collecting taxes, he is mistaken. That happens. It happens immediately.

Free prevention services are going to be available as well—prevention services that will help a lot of people avoid serious illness. Today, many Americans pay 20 percent of the cost of many preventive services. Millions have no access to them at all. The Senate bill will require coverage of prevention and wellness benefits. For seniors, the Senate bill is going to provide free annual wellness checkups, immediately.

There is insurance reform as well. The Senator from Tennessee keeps overlooking this, and he shouldn't. One of the biggest ripoffs for American consumers are health insurance companies that turn you down because of pre-existing conditions and a variety of other reasons they find not to cover you. This Senate bill will give Americans the opportunity to focus on healthy living, will put patients first. It will eliminate abuses by insurance companies. It immediately bans rescissions, the practice where health insurance companies cancel your policy. Six months after enactment in 2010, insurers are prohibited from imposing lifetime limits on benefits. These are immediate benefits.

We know what the Republican playbook is because they gave it to us—maybe not intentionally. But early on, 8 months ago, the Republican strate-

gist Frank Luntz sent out a memo before the bill was even written and said: Here is how we can defeat health care reform. That suggests to me there was never a good-faith effort at the top in the Republican Party to even consider health care reform. Frank Luntz went through all the things to defeat health care reform even before the bill was introduced, talking about rationing and denial and talking about government programs and so forth and so on—buzz words. Then, the current inspiration of the Republican National Party, Michael Steele, the Republican National Committee chairman, a man I am sure the Senator from Tennessee holds in the highest esteem, recently shared with us the following in a memo. Chairman Steele wrote:

I urge everyone to spend every bit of capital and energy you have to stop this health care reform. The Democrats have accused us of trying to delay, stall, slow down, and stop this bill. They are right.

Chairman Steele says, his words: "Delay, stall, slow down, and stop." And for 8 months that has been the Republican strategy.

Unfortunately, that strategy now applies to the Department of Defense appropriations bill which we will vote on this morning. One hundred Senators will trek through the snow and come in early this morning to vote on a bill which we should all support unanimously. They will try parliamentary efforts to stop the bill, derail the bill, even though the continuing resolution expired last night.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

Mr. DURBIN. I hope we can gather enough bipartisan support for our troops this morning, have a cup of coffee, and go home to our families soon to celebrate the holiday season.

I reserve the remainder of my time and yield the floor.

Mr. REID. Mr. President, I ask unanimous consent that 5 of the 10 minutes I have been reserved for the Senator from Illinois.

Mr. President, I withdraw that request.

The ACTING PRESIDENT pro tempore. The Senator from Texas is recognized.

Mrs. HUTCHISON. Mr. President, I will be using some of the leader's time, and if the leader decides to step in, all he has to do is signal.

I wish to, first of all, say how much I appreciate the leader, Senator MCCONNELL, the Republican leader for the heroic efforts he has made in the last few weeks to try to assure that the American people know what is in the bill that will be put before us very soon. Now, I say put before us very soon because we don't know what the substitute bill is that has been worked on for the last few days. We haven't seen it yet. I think that brings up an important point.

I am hoping the distinguished majority leader, who is also on the floor, will allow America, as well as Senators certainly, to see the managers' amendment which includes all of the changes in the bill that is before us before we are forced to vote on this monumental piece of legislation.

When I am talking to my constituents back home, my friends, the people who just come up to me on an airplane, they say: What are you doing? Why is this being rushed through when it is one-sixth of our economy, when it is quality of life for every American, when we are talking about jobs in the private sector that will be sacrificed for a big government takeover, more government jobs, fewer private sector jobs. People are saying: What are you doing?

When I was talking about the taxes that are going to take effect in 2 weeks, before the bill takes effect 4 years from now, people were surprised. Even very informed people who read all the major newspapers, they said: What? The taxes are going to take effect 4 years before the bill takes effect? I mean, what are you all doing? Has Congress ever done that before?

I couldn't remember a time when Congress would pass taxes for 4 years, purporting to put together a new program, and then all of a sudden, after 4 years, the program would start but the taxes have accumulated, and it is going to be \$75 billion that will have accumulated before any implementation of the bill that is before us.

So I have heard the criticism on the floor that Republicans are trying to slow this down, that they are trying to stop this bill. It is very important that this health care bill be slowed down so that not only the Senate but the people of America can look at this and determine how it affects them personally, so they can look at what the proposed options are going to be. They can look at the taxes. They can look at the mandates. They can look at the small business requirements that could actually cost jobs.

Now, one might say: Well, if it costs a few jobs, maybe there is a greater good. We are in the toughest recession we have been in since the 1940s, since World War II. We are in the toughest recession we have been in, and here we are maybe stopping job increases or maybe adding to the unemployment figures which are the highest in 40 years in our country.

So I know the American people are saying: Why? Why push this through? Why push it through so fast when we are talking about maybe losing jobs in an economic downturn, when people are already hurting. Even the people who are employed are afraid that maybe they are going to be laid off because times seem to be getting tougher out there. We hear that the buying season, the Christmas season, is not going

as well as retailers have come to expect to try to make their yearly requirements to make their profits.

What does that mean? If we do not make those profits, then people are not buying and people are not going to be hired and maybe people are going to be laid off.

I do not think this is the time to be talking about losing jobs, something that is going to increase the burden and the mandate and the taxes on our business.

Mr. AKAKA. Mr. President, I strongly support the Defense appropriations conference report for 2010, H.R. 3326. This bill provides funding for our troops in Afghanistan, Iraq, and elsewhere. I thank the chairman and ranking member of the Senate Appropriations Committee, Senators INOUE and COCHRAN, as well as other committee members, for their efforts to develop this vital legislation.

This bill keeps our commitments to our troops and military families. The bill provides a 3.4-percent military pay raise, \$29.2 billion for the Defense Health Program, including \$120 million for traumatic brain injury and psychological health research. The measure also includes \$472 million for family advocacy programs which include quality childcare, job training for spouses, and expanded counseling for families experiencing stress due to deployments.

In order for our military to continue to perform at its best, we must continue to provide ample funds for training and readiness accounts. This bill provides \$154 billion to increase the readiness and training of our troops. Funding is being adjusted to ensure that we are training for the conflicts of today and those in the future.

Continuing our strong support for our troops in Iraq and Afghanistan, the bill includes over \$23 billion for equipment to be used in the region. This includes \$6.3 billion to complete procurement of over 6,600 Mine Resistant Ambush Protected, MRAP, all-terrain vehicles to protect our troops; \$1.1 billion for High Mobility Multi-Purpose Wheeled Vehicles, HMMWVs; and \$950 million for the National Guard and Reserve equipment accounts.

I am also pleased that this bill includes just under \$200 million for defense projects in the State of Hawaii including many of the projects which I requested. This includes a standoff improvised explosive device, IED, detection program, a virtual combat training program, and an anti-corrosion effort to extend the life of weapons systems. These are examples of programs in which innovators in Hawaii produce systems and products which will enhance military capabilities.

In addition to doing right by our troops, this bill also includes measures that will help other segments of our country.

Small business represents a vital part of our economy, but many small

business owners are having difficulties securing loans in today's economic climate. This bill includes a measure which will allow the Small Business Administration, SBA, to extend enhancements to its loan guarantee program which will free up capital by making loans more attractive.

The bill also includes an extension of unemployment insurance benefits. As many of our citizens continue to navigate a difficult labor market, it is vital that we continue to provide benefits for the unemployed.

In addition, this bill includes an extension for COBRA subsidies. It extends from 9 to 15 months the 65-percent COBRA health insurance subsidy for individuals who have lost their jobs. This vital program will help those who have lost jobs keep their health insurance.

These are just some of the projects and programs this important bill will fund for the 2010 fiscal year. I appreciate the hard work of Chairman INOUE, Ranking Member COCHRAN, and the rest of the Appropriations Committee for bringing this conference report before us, and I urge my colleagues to support it.

Mr. FEINGOLD. Mr. President, I strongly oppose this fiscally irresponsible and misguided bill. While the bill includes many good provisions, it will also fund a massive troop surge in Afghanistan that will overburden our troops and will likely hurt, not help, our efforts to eliminate the global threat posed by al-Qaida and its affiliates. And it is stuffed with earmarks and wasteful spending, such as \$2.5 billion for 10 C-17s that the Defense Department does not want and \$130 million for a Presidential helicopter program that has been cancelled.

While I will vote against the Defense appropriations bill, I am not going to be part of a partisan and cynical effort to delay passage of the Defense bill in order to block the Senate from considering health care reform. That is why I voted to end debate on the Defense appropriations bill, so the Senate could conduct a final vote on that bill and return to debating and voting on health care reform legislation.

The ACTING PRESIDENT pro tempore. The minority time has expired.

Mrs. HUTCHISON. I hope we can have a bill that will be bipartisan that we can all support.

The ACTING PRESIDENT pro tempore. The majority leader.

Mr. REID. Mr. President, my understanding is there is 5 minutes remaining.

The ACTING PRESIDENT pro tempore. That is correct.

Mr. REID. Mr. President, I direct this question to my distinguished colleague, Senator MCCONNELL, who is on the floor. Is my distinguished friend going to use any of his leader time this morning?

Mr. McCONNELL. No.

Mr. REID. To my friend from Texas, whom I care about a great deal—she is a member of the Appropriations Committee. I am disappointed she spent all morning not talking about the bill before us; namely, the bill that is going to fund our troops. That is why she is here. It is just after 7 in the morning in Washington. It is just after 4 a.m. in Nevada. Those watching around the United States may be wondering why we are voting at this rare hour, early on a Saturday morning, in what is shaping up to be the worst snowstorm in Washington's history.

The reason is very simple. We have work to do. We are going to support the troops, to make sure they have all the resources they need. I am confident my Republican colleagues will join with us in that regard.

I also say to my friend from Texas and others, it is as if they are in some other universe. First of all, we offered a unanimous consent request as soon as these proceedings started dealing with health care. I said:

I ask unanimous consent that no amendment be in order to the Reid substitute amendment . . . unless the text . . . of the amendment is posted on the home page of the official Senate Web site of the Member of the Senate who is sponsoring the amendment prior to the amendment being called up for consideration by the Senate and the amendment is filed at the desk. Further, that this unanimous consent request be in effect for the duration of the consideration of [this bill].

That is pretty direct. Offer an amendment and people should be able to see it. Guess what. The Republicans objected to that. Here is exactly what the senior Senator from Wyoming said:

In light of some of the trust problems and transparency problems we have, while this appears to lead to greater transparency . . . I object.

Something that creates transparency, they object because it does not create transparency.

Let me just say, we are going to finish this Defense bill. We are going to move on, at the appropriate time, and vote on the so-called managers' package, which will save lives—along with the other bill that is now before the Senate on health care—save money, and save Medicare. There are immediate deliverables.

I don't know what in the world the Senator from Texas was talking about. Something that is picked up on talk radio? I don't know. But it is not anything that deals with reality. We are going to do away with preexisting disabilities. The letters we receive from around the country, what insurance companies do is incredible. We will insure 31 million new people—pretty good, 31 million. Thousands of primary care physicians will be created and thousands of community health centers, which we should have been doing a long time ago.

I can remember, as a new Senator, that seat right there in the back of the Chamber was held by the famous Pat Moynihan. We were, at that time, dealing with homelessness. That was the issue of the day. He turned around to me, a new Senator, and said: This is ridiculous. The reason there are so many homeless is because we did not do our job. When the insane asylums, the mental institutions were emptied, because we had medicine that would take care of these people in institutions, part of the deal was we would have community health centers to have them come and get their medication, have them taken care of. We didn't do that, and that is why we have so many homeless people. This bill is going to alleviate most of that.

We have something in this legislation called the CLASS Act, which will offer for the first time in the history of this country for people who are working to plan ahead in case they become disabled. It is fully paid for. CBO said, in the far future, decades and decades into the future, it is paid for. I did not use a penny of that money for the bill that is before the Senate.

Again, I say to my friends on the other side of the aisle, I am sorry this has been such a method of just saying no to everything—everything, everything. It is too bad we didn't have a little more help. We received none. We hope they will join with us, the minority, as did the Republicans in the House of Representatives, and support the troops, 395 to 34. Out of 435 Members, only 34 voted against that bill. Democrats and Republicans—overwhelming majorities—over 90 percent of Democrats and Republicans in that House supported that bill. That is what we need to do in a show of good faith for the men and women fighting around the world.

For example, in Afghanistan, I read the morning news from Nevada. The Nevada National Guard, in the mountains of Afghanistan, had a vicious fire-fight lasting more than a day, chasing these evil people through villages. Many of them were killed. One Nevadan was wounded. That is what this legislation before this body is about.

I hope we can do what needs to be done.

Mr. President, I move to table the motion to concur in the House amendment to the Senate amendment with amendments, and I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Is there a sufficient second?

There appears to be a sufficient second.

The question is on agreeing to the motion.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Connecticut (Mr. LIEBERMAN), is necessarily absent.

Mr. KYL. The following Senator is necessarily absent: the Senator from New Hampshire, Mr. GREGG.

The ACTING PRESIDENT pro tempore. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 63, nays 35, as follows:

[Rollcall Vote No. 382 Leg.]

YEAS—63

Akaka	Feingold	Mikulski
Baucus	Feinstein	Murray
Bayh	Franken	Nelson (NE)
Begich	Gillibrand	Nelson (FL)

DeMint	Lugar	

NOT VOTING—2

Gregg Lieberman

The motion was agreed to.

The ACTING PRESIDENT pro tempore. The Senator from Oklahoma is recognized.

Mr. COBURN. Mr. President, the pending motion to concur to the House amendment would cause an aggregate level of outlays for fiscal year 2010, as set out in the most recently agreed to concurrent resolution on the budget, S. Con. Res. 13, to be exceeded.

Therefore, I raise a point of order under section 311(a)(2) of the Congressional Budget Act of 1974.

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

Mr. REID. Mr. President, pursuant to section 904 of the Congressional Budget Act of 1974, I move to waive all applicable sections of the Budget Act for purposes of the pending motion, and I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the motion.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Connecticut (Mr. LIEBERMAN) is necessarily absent.

Mr. KYL. The following Senator is necessarily absent: the Senator from New Hampshire, Mr. GREGG.

The yeas and nays resulted—yeas 63, nays 35, as follows:

[Rollcall Vote No. 383 Leg.]

The motion was agreed to.

VOTE EXPLANATION

Mr. LIEBERMAN. Madam President, I regret that I was unable to be present to vote for the final passage of H.R. 3326, the Department of Defense Appropriations Act for Fiscal Year 2010, but had I been present, I would have supported it.

This Act will provide \$636.3 billion in funding for the Department of Defense, including nearly \$125 billion in funds that will directly support the men and women fighting at the frontlines of this Nation's wars. I am honored to serve on the Senate Armed Services Committee, which drafted the law authorizing these funds, and thank my colleagues on the Senate Appropriations Committee, led by Chairman DANIEL INOUE, for their hard work guiding this bill to its final approval.

This bill will do much to both protect our service members overseas and improve their lives at home. It will provide \$6.3 billion to procure additional mine resistant ambush protected, MRAP, vehicles and more than 6,600 MRAP all-terrain vehicles, MRAP-ATVs, which will save countless lives in Iraq and Afghanistan. For our service members and their families, it will also provide a 3.4-percent pay raise, additional funding for the Defense Health Program, and \$120 million to support research for traumatic brain injury and psychological health research.

I am particularly proud of the critical role that Connecticut plays in supporting our Nation's defense, a role that this act reaffirms. Connecticut workers are essential to building critical equipment and systems that account for nearly 15 percent of the \$104.4 billion in procurement funds provided in this bill. These include the Virginia class submarine, the Blackhawk family of utility helicopters, the engines that power the F-35 Joint Strike Fighter, the powerful radar on the Joint STARS aircraft, and even the Colt carbine that our soldiers carry at the frontlines of

battle. There truly is a Connecticut worker supporting every member of the U.S. Armed Forces.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. REID. Could we have order?

The PRESIDING OFFICER. The majority leader.

Mr. REID. First of all, to the Senate: This is a good, strong message we have sent to our men and women in uniform around the world as 88 Senators voted. It was a little bit of a struggle to get here, but we got here, and I am so grateful we were able to do that.

MAKING FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 2010

Mr. REID. Madam President, we are going to do the continuing resolution now until the 23rd. The reason for that is this Defense bill will take a little time to enroll. We want to make sure there are no gaps in having full funding for Secretary Gates.

I ask unanimous consent that the Senate proceed to the immediate consideration of H.J. Res. 64, the continuing resolution received from the House and that is at the desk; that the joint resolution be read three times and passed, and a motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The joint resolution (H.J. Res. 64) was ordered to a third reading, was read the third time, and passed.

SERVICEMEMBERS HOME OWNER-SHIP TAX ACT OF 2009—Resumed

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A bill (H.R. 3590) to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

Pending:

Reid Amendment No. 2786, in the nature of a substitute.

AMENDMENT NO. 3276 TO AMENDMENT NO. 2786

Mr. REID. Madam President, I ask unanimous consent that the amendment be considered read.

Mr. MCCONNELL. I object.

The PRESIDING OFFICER. The majority leader.

Mr. REID. It is my understanding that the amendment needs to be reported at this time.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Nevada (Mr. REID), for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN, proposes an amendment numbered 3276 to amendment No. 2786.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. REID. Madam President, before offering the amendment, the so-called managers' amendment, I have spoken to my Republican counterpart.

I ask unanimous consent that a Democratic Senator on my side be allowed to speak for up to 9 minutes prior to my offering the amendment.

Mr. McCONNELL. Madam President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. McCONNELL addressed the Chair.

Mr. REID. I have not given up the floor, Madam President.

Mr. McCONNELL. Madam President, I have a parliamentary inquiry.

The PRESIDING OFFICER. The minority leader is recognized for a parliamentary inquiry.

Mr. McCONNELL. What is the pending business?

The PRESIDING OFFICER. The amendment No. 3276 that has been presented.

Mr. McCONNELL. Is it necessary to report the last amendment?

Mr. REID. The amendment, I think, has been reported.

The PRESIDING OFFICER. The amendment has been reported.

Mr. REID. I still have the floor; is that right?

Mr. McCONNELL addressed the Chair.

The PRESIDING OFFICER. The regular order is the reading of the amendment unless consent is granted that that not occur.

Mr. REID. Madam President, first of all, it is my understanding—Madam President, I understand the amendment has to be read. This is the so-called managers' amendment that is at the desk.

I ask unanimous consent that—if the minority wants this amendment read, it is going to take a little bit of time to do that, and I understand that. But I ask unanimous consent, as I did, that Senator NELSON of Nebraska be allowed to speak for up to 9 minutes.

Mr. McCONNELL. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. REID. Madam President, it is my understanding that the Senator from Nebraska told me before coming here he had a question he wanted to ask; is that right?

Mr. NELSON of Nebraska. The Senator is correct.

Mr. McCONNELL. The regular order is the reading of the amendment, I understand.

The PRESIDING OFFICER. The regular order is the reading of the amendment.

The clerk will read the amendment.

The legislative clerk continued with the reading of the amendment.

Mr. UDALL of New Mexico. Mr. President, I ask unanimous consent

that the reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. BURRIS). Is there objection?

Mr. ENSIGN. Objection.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue.

The assistant legislative clerk continued with the reading of the amendment.

Mrs. BOXER. Mr. President, I ask unanimous consent that this amendment be considered as read.

The PRESIDING OFFICER (Mr. DURBIN). Is there objection?

Mr. SESSIONS. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will continue.

The Assistant Parliamentarian (Leigh Hildebrand) continued with the reading of the amendment.

Mr. UDALL of New Mexico. Mr. President, I ask unanimous consent to dispense with the reading of the amendment.

Mr. SESSIONS. I object.

The PRESIDING OFFICER (Mr. ROCKEFELLER). Objection is heard. The clerk will continue.

The Assistant Secretary continued with the reading of the amendment.

(The text of the amendment is printed in today's RECORD under "Text of Amendments.")

The PRESIDING OFFICER (Mr. BENNET). The majority leader is recognized.

CLOTURE MOTIONS

Mr. REID. Mr. President, I have three cloture motions at the desk.

The PRESIDING OFFICER. The cloture motions having been presented under rule XXII, the Chair directs the clerk to read the motions.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the Reid amendment No. 3276 to the Reid substitute amendment No. 2786, to H.R. 3590, the Service Members Home Ownership Tax Act of 2009.

Christopher J. Dodd, Richard Durbin, Max Baucus, Paul G. Kirk, Jr., Claire McCaskill, Jon Tester, Maria Cantwell, Barbara A. Mikulski, Mark Udall, Arlen Specter, Sherrod Brown, Mark Begich, Sheldon Whitehouse, Bill Nelson, Roland W. Burris, Kirsten E. Gillibrand, Ron Wyden.

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the Reid substitute amendment No. 2786 to H.R. 3590, the Service Members Home Ownership Tax Act of 2009.

Christopher J. Dodd, Richard Durbin, Paul G. Kirk, Jr., Max Baucus, Claire McCaskill, Jon Tester, Maria Cantwell, Barbara A. Mikulski, Mark Udall, Sherrod Brown, Arlen Specter, Bill Nelson, Mark Begich, Sheldon Whitehouse, Roland W. Burris, Kirsten E. Gillibrand, Ron Wyden.

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.R. 3590, the Service Members Home Ownership Tax Act of 2009.

Christopher J. Dodd, Richard Durbin, Mark Begich, Paul G. Kirk, Jr., Sheldon Whitehouse, Roland W. Burris, Max Baucus, Sherrod Brown, Claire McCaskill, Jon Tester, Barbara A. Mikulski, Bill Nelson, Maria Cantwell, Mark Udall, Arlen Specter, Kirsten E. Gillibrand, Ron Wyden.

The PRESIDING OFFICER. The majority leader is recognized.

AMENDMENT NO. 3276

Mr. REID. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 3277 TO AMENDMENT NO. 3276

Mr. REID. Mr. President, I have a second-degree amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID] proposes an amendment numbered 3277 to amendment No. 3276.

The amendment is as follows:

At the end of the amendment, add the following:

The provisions of this Act shall become effective 5 days after enactment.

AMENDMENT NO. 3278

Mr. REID. Mr. President, I have an amendment to the language proposed to be stricken.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID] proposes an amendment numbered 3278 to the language proposed to be stricken by amendment No. 2786.

The amendment is as follows:

At the end of the language proposed to be stricken, insert the following:

This section shall become effective 4 days after enactment.

Mr. REID. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? The appears to be a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 3279 TO AMENDMENT NO. 3278

Mr. REID. Mr. President, I have a second-degree amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID] proposes an amendment numbered 3279 to amendment No. 3278.

The amendment is as follows:

In the amendment, strike "4" and insert "3".

MOTION TO COMMIT WITH AMENDMENT NO. 3280

Mr. REID. Mr. President, I have at the desk a motion to commit the bill with instructions.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID] moves to commit the bill to the Finance Committee with instructions to report back with the following amendment numbered 3280.

The amendment is as follows:

At the end, insert the following:

The provisions of this Act shall become effective 2 days after the enactment.

Mr. REID. Mr. President, I now ask for the yeas and nays on that motion.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 3281

Mr. REID. Mr. President, I have an amendment to those instructions.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada [Mr. REID] proposes an amendment numbered 3281 to the instructions of the motion to commit.

The amendment is as follows:

Strike "2 days" and insert "1 day".

Mr. REID. Mr. President, I ask for the yeas and nays on that amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

AMENDMENT NO. 3282 TO AMENDMENT NO. 3281

Mr. REID. Mr. President, I have a second-degree amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada (Mr. REID) proposes an amendment numbered 3282 to amendment No. 3281.

The amendment is as follows:

Strike "1 day" and insert "immediately"

Mr. REID. Mr. President, I ask unanimous consent that the mandatory quorums be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. COBURN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. REID. Mr. President, reserving the right to object.

The PRESIDING OFFICER. Is there objection?

Mr. REID. I object.

The PRESIDING OFFICER. Objection is heard.

The legislative clerk continued with the call of the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The majority leader is recognized.

Mr. REID. Mr. President, I have spoken to my friend, the Senator from Oklahoma, and he thinks this is appropriate. He wants to speak, and we have known that for some time. So I ask the following unanimous consent request: I ask unanimous consent that at the conclusion of 10 minutes for Senator STABENOW and 10 minutes for Senator DURBIN, Senator COBURN be recognized; that at the conclusion of his remarks—and he said he will probably take a couple of hours—the Senate then stand adjourned, after he completes his remarks, until 1 p.m. tomorrow, Sunday, December 20; that on Sunday, following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, and the time for the two leaders be reserved for their use later in the day, and that the Senate resume consideration of H.R. 3590, and that the time until 1:30 p.m. be equally divided and controlled between the two leaders; that beginning at 1:30 p.m. and until 11:30 p.m., Sunday, there be alternating hour blocks of time, with Republicans controlling the first hour block; that at 11:30 p.m., Sunday, the Senate then recess until 12:01 a.m., Monday, December 21; that following the prayer and pledge, the time until 1 a.m. be equally divided and controlled between the two leaders or their designees, with the majority leader controlling the final 10 minutes prior to 1 a.m., and the Republican leader controlling the 10 minutes immediately prior to that; that at 1 a.m. the Senate proceed to vote on the motion to invoke cloture on the Reid and others managers' amendment; and that today the debate of Senators DURBIN, STABENOW, and COBURN be for debate only; and that also for Sunday the same thing. I did not mention that before.

The PRESIDING OFFICER. Is there objection?

Mr. COBURN. Mr. President, reserving the right to object, and I do not intend to object, but I want to make a parliamentary inquiry prior to us doing that. And the inquiry is this: Based on the second-degree amendments just filed by the majority leader, as well as the elimination of their language, is it, in fact, the effect that no other amendments will be allowed on this bill?

The PRESIDING OFFICER. There are no available amendment slots at this time.

Mr. COBURN. Further in my parliamentary inquiry, if there were amendments available, could they be filed on this bill?

Mr. REID. I am sorry, I could not hear my friend.

Mr. COBURN. If, in fact, amendments were available, could amendments be filed to this bill and made pending?

I will restate my inquiry to the Chair. Is it, in fact, a fact that because of the filling of the tree by the majority leader, the opportunity to amend the bill before us will be limited?

The PRESIDING OFFICER. The Senator is correct.

Mr. COBURN. Thank you.

I do not object.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. REID. Mr. President, this may surprise everyone, but the day after tomorrow is the shortest day of the year, December 21. We start longer days after that.

The PRESIDING OFFICER. The Republican leader is recognized.

Mr. MCCONNELL. Mr. President, I just want to take this opportunity to thank the clerks. I know it has been a challenging experience to have to read for the last 7 or 8 hours, but I just wanted to thank them for their good work and good spirits in the holiday season; and for those who substituted during the process, I hope you will extend to them our thanks as well.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. REID. Mr. President, it is very nice of the Republican leader to recognize them. I join in his remarks, and not only the reading, but the long, long hours they have had to bear over the last several weeks.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Mr. President, I do not see the Senator from Michigan on the Senate floor. I hope she will not be upset if I go first. I had spoken to her earlier about a 10-minute statement, and she is to have a 10-minute statement, as well, relative to this managers' amendment.

We just spent the last 7½ or 8 hours having the clerks dutifully read this 383-page amendment. During that period of time, many of us have had a chance to read it ourselves. We have had staff explain it to us, and for those who are wondering what has happened, we can tell them the following.

Originally, we offered this bill—2,074 pages—on health care reform. It was offered by Senator REID, after a merger of the bills created by the Health, Education, Labor, and Pensions Committee as well as the Finance Committee. Then an effort was made to perfect this bill and address some other provisions that were not included. That effort was underway for a lengthy period of time because the Congressional Budget Office had to look at each suggestion to see whether it had an impact on the cost of the bill or the goal of the bill, which is to make health insurance more affordable.

Finally, the Congressional Budget Office has given its report—not in its entirety—but at least its preliminary report, and the news is very encouraging. Many of my colleagues come to the floor—the Senator from Oklahoma, who will speak after Senator STABENOW and I—and talked about our Nation's deficit. It is appropriate that issue be raised and taken seriously.

But I hope the Senator from Oklahoma and others who raise that issue will acknowledge something; this health care reform bill, as amended, is the greatest deficit reduction bill in the history of the United States. We have now been told by the Congressional Budget Office this bill will not only reduce our deficit over the next 10 years by over \$130 billion, but in the following 10 years, their new calculation is it will reduce the deficit of the United States up to \$1.3 trillion. How does it achieve this? It achieves this by achieving the goal of this bill: to bring down the increase in costs in health care.

The Congressional Budget Office tells us—and this is an independent group that looks at these things—we are achieving our goal to start bringing down the cost of health care in America. For those who will come to the floor and make speeches about our deficit and debt, please give credit where it is due. This bill will do more to reduce the deficit than anything ever proposed in Congress.

The second thing I wish to say is the basics of this bill remain. At the end of the day, 94 percent of the people in America will have health insurance, the highest percentage insured in our history. Thirty-one million uninsured Americans will have health insurance because of this legislation.

In addition to bringing down the costs of medical care and health insurance, in addition to extending the protection of insurance to over 30 million Americans currently uninsured, this bill will also provide protections to individuals against discrimination by health insurance companies. The new amendment which has been introduced today goes even further than the original bill. I think it will be a source of great consolation to many families across America to know this new amendment will say, in a very brief period of time, that every child under the age of 18 will be entitled to health insurance regardless of preexisting conditions. That is an amazing statement. It is an incredible statement. It says we are going to move forward quickly on this protection of the bill to eliminate the discrimination against people because of preexisting conditions and we will start with those under the age of 18 and do it in short order. That, to me, is a dramatic change.

Then, it says health insurance companies are now going to have to assert that the premiums collected are actu-

ally used to pay medical expenses. We will require of them that the medical loss ratio of certain companies be 80 percent and others up to 85 percent, which means the money collected in premiums—that money, up to 85 percent—has to be spent on actual medical expenses. That reduces the amount of money for these health insurance companies to spend on advertising, on salaries, on bonuses, on clerical help to deny claims. It says: Focus the money on helping people or rebate the money to those who pay the premiums.

In addition to that, this bill is going to make certain, with this new amendment, that patient health insurers have to abide by patient protections; for example, that protect an individual's right to choose their own doctor; also, ensuring access to needed care and guaranteeing an opportunity to appeal any denial of coverage. This bill, with its new amendment, is going to offer alternatives that aren't available today. I look at all these things in the bill, and I think of the profound impact some of them will have.

One of the provisions in this bill is going to dramatically expand community health centers across America. Senator BERNIE SANDERS of Vermont has been credited with being the leader on this, and he should be. He has done an extraordinary job. What a legacy he will leave and this bill will create: 10,000 more clinics and health care centers across America providing primary care in towns large and small. Rural and underserved communities will have opportunities tomorrow they don't have today because of this.

In addition to these things, this bill expands the small business health care affordability tax credit. I am not going to go into depth on this because Senator STABENOW from Michigan has been our leader on that, and she will tell you how. To the critics on the other side of the aisle who say this bill raises taxes and doesn't help people: Wait until you hear from Senator STABENOW what this bill does for small businesses. It expands tax credits to small businesses so they can provide health insurance to their employees. What a breakthrough this will be for many businesses that can't afford to do it today.

We also have provisions in here to engage in more direct efforts to try to find ways to reduce medical malpractice and the lawsuits that follow. It is an aggressive effort to find ways to protect victims of medical malpractice and yet reduce any lawsuits which should not be filed to the lowest possible number.

This bill increases access to workplace wellness programs, something all of us believe is the way of the future.

Let me also tell my colleagues that this bill has a provision in it which I have included, and I thank the leadership for accepting, on congenital heart

research. This is near and dear to me and my family. The problem we have run into is many children born with congenital heart defects end up living into adulthood without the necessary surveillance to determine what is the best practice to keep them alive and healthy and comfortable. This is a very tiny part of this bill, but it is so important to so many families that we will finally have surveillance of these patients around America with congenital heart defects and find those therapies that work best, those surgeries that will succeed. It will bring peace of mind to a lot of families to know we are going to make this extra special effort with a birth defect which affects literally hundreds of thousands of Americans.

I think this bill has been improved by this amendment. I know the Senator from Oklahoma is going to speak about the issue of amendments. I wish to say for the record that this is the 20th day since we brought this bill to the floor. In the 20 days the Senate has been considering this bill, the Republican side of the aisle has offered four amendments to change the bill—four amendments in 20 days. They offered another six motions to send the bill back to committee and stop the deliberation on the Senate floor but only four substantive amendments. We have been promised over and over there would be a substitute amendment which is even better than ours. It has never been introduced by the Republican side of the aisle. It certainly has never been cleared with the Congressional Budget Office. If they had a better idea, where has it been for 20 days? The amendments which they offered, many of them, related directly to the Medicare Advantage Program.

I think they offered at least two of their four amendments to protect that program. It is a private health insurance program, heavily subsidized by the Federal Government and one that, frankly, is wasting dollars that should be spent to help people and expand their care under Medicare. They have tried, time and again, on behalf of these health insurance companies to continue the subsidy, but we know it is wasteful and we know there is a better expenditure.

So I would say to those who would complain now while here, we are almost out of time to offer amendments, where have you been? For 20 days, for almost 3 weeks, where have you been? Where have your amendments been? You had your chance. Your leadership could have brought them to the floor but, instead, we had six motions to commit—take the bill off the floor—instead of amendments that dealt with the basic substance of the bill.

I think we have a good bill, and I think we have reached the point where we should vote, have an up-or-down vote. The Senate has considered this

for a year. We have no Republican alternative that has been cleared by the Congressional Budget Office that indicated it is a viable alternative, and now we should bring the one bill before us that can make a difference in America: make health care more affordable, expand its coverage to 94 percent of our people, give our families and individuals across America a chance to bargain effectively with health insurance companies that say no. That, to me, is a good bill.

The bill that has just been read on the floor has been posted on the Internet now for more than 4 hours. Go to Senate Democrats, take a look, you will find it, and when you do, you will find the original bill and this amendment. All of America will get a chance to read this bill in its entirety today, tomorrow, and Monday, before the vote is going to be taken as to whether we are going to proceed with this managers' amendment, 72 hours before there is a vote on Tuesday morning, so America will have a chance, as it should, because it is a critically important issue.

The last thing I wish to do—Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has consumed 10 minutes.

Mr. DURBIN. I ask unanimous consent for 1 minute.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. DURBIN. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an article written by Victoria Reggie Kennedy, which will be published tomorrow in the Washington Post Sunday edition. It is entitled, "The moment Ted Kennedy would not want to lose."

There are many things said here which we can expect, but the one paragraph I wish to read into the RECORD is as follows, from the wife of Senator Ted Kennedy:

Still, Ted knew that accomplishing reform would be difficult. If it were easy, he told me, it would have been done a long time ago. He predicted that as the Senate got closer to a vote, compromises would be necessary, coalitions would falter and many ardent supporters of reform would want to walk away. He hoped that they wouldn't do so. He knew from experience, he told me, that this kind of opportunity to enact health care reform wouldn't arise again for a generation.

This bill has been called many things. It is officially titled the "Patient Protection and Affordable Care Act." I am going to refer to it as "Kennedy Care" because Ted Kennedy, throughout his public career, cared deeply about this health care issue.

Our time is here, and in his name and in his memory, we need to pass this historic legislation.

I yield the floor.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE MOMENT TED KENNEDY WOULD NOT WANT TO LOSE

(By Victoria Reggie Kennedy)

The Washington Post—Sunday, December 20, 2009; A19—My late husband, Ted Kennedy, was passionate about health-care reform. It was the cause of his life. He believed that health care for all our citizens was a fundamental right, not a privilege, and that this year the stars—and competing interests—were finally aligned to allow our nation to move forward with fundamental reform. He believed that health-care reform was essential to the financial stability of our nation's working families and of our economy as a whole.

Still, Ted knew that accomplishing reform would be difficult. If it were easy, he told me, it would have been done a long time ago. He predicted that as the Senate got closer to a vote, compromises would be necessary, coalitions would falter and many ardent supporters of reform would want to walk away. He hoped that they wouldn't do so. He knew from experience, he told me, that this kind of opportunity to enact health-care reform wouldn't arise again for a generation.

In the early 1970s, Ted worked with the Nixon administration to find consensus on health-care reform. Those efforts broke down in part because the compromise wasn't ideologically pure enough for some constituency groups. More than 20 years passed before there was another real opportunity for reform, years during which human suffering only increased. Even with the committed leadership of then-President Bill Clinton and his wife, reform was thwarted in the 1990s. As Ted wrote in his memoir, he was deeply disappointed that the Clinton health-care bill did not come to a vote in the full Senate. He believed that senators should have gone on the record, up or down.

Ted often said that we can't let the perfect be the enemy of the good. He also said that it was better to get half a loaf than no loaf at all, especially with so many lives at stake. That's why, even as he never stopped fighting for comprehensive health-care reform, he also championed incremental but effective reforms such as a Patients' Bill of Rights, the Children's Health Insurance Program and COBRA continuation of health coverage.

The bill before the Senate, while imperfect, would achieve many of the goals Ted fought for during the 40 years he championed access to quality, affordable health care for all Americans. If this bill passes:

Insurance protections like the ones Ted fought for his entire life would become law.

Thirty million Americans who do not have coverage would finally be able to afford it. Ninety-four percent of Americans would be insured. Americans would finally be able to live without fear that a single illness could send them into financial ruin.

Insurance companies would no longer be able to deny people the coverage they need because of a preexisting illness or condition. They would not be able to drop coverage when people get sick. And there would be a limit on how much they can force Americans to pay out of their own pockets when they do get sick.

Small-business owners would no longer have to fear being forced to lay off workers or shut their doors because of exorbitant insurance rates. Medicare would be strengthened for the millions of seniors who count on it.

And by eliminating waste and inefficiency in our health-care system, this bill would bring down the deficit over time.

Health care would finally be a right, and not a privilege, for the citizens of this country. While my husband believed in a robust public option as an effective way to lower costs and increase competition, he also believed in not losing sight of the forest for the trees. As long as he wasn't compromising his principles or values, he looked for a way forward.

As President Obama noted to Congress this fall, for Ted, health-care reform was not a matter of ideology or politics. It was not about left or right, Democrat or Republican. It was a passion born from the experience of his own life, the experience of our family and the experiences of the millions of Americans across this country who considered him their senator, too.

The bill before Congress will finally deliver on the urgent needs of all Americans. It would make their lives better and do so much good for this country. That, in the end, must be the test of reform. That was always the test for Ted Kennedy. He's not here to urge us not to let this chance slip through our fingers. So I humbly ask his colleagues to finish the work of his life, the work of generations, to allow the vote to go forward and to pass health-care reform now. As Ted always said, when it's finally done, the people will wonder what took so long.

The PRESIDING OFFICER. The Senator from Michigan is recognized for 10 minutes.

Ms. STABENOW. Mr. President, I wish to thank our distinguished assistant majority leader for being on the floor, for his passion, for his commitment to the issue of health care, affordable health care for every American. I thank him always for his comments.

The bottom line for all of us is, this legislation is about saving lives, saving money, and saving Medicare. I would also say it is about saving jobs.

That is certainly a big focus for me, coming from the State of Michigan. The reality is that this year 45,000 people lost their lives because they couldn't find affordable health insurance. Forty-five thousand families during the holidays will have one less person sharing dinner and exchanging gifts. We can do better than that in this great country. This morning, 14,000 people got up with health insurance and they will go to bed tonight without it and that happens every day, every day, every day. We can do better, and this bill does better than that.

As Senator DURBIN indicated, in addition to other provisions in the bill, this amendment would dramatically expand community health centers across the country where people can have the opportunity to go into the neighborhood community health center, see a doctor, see a nurse, and get the care they need—incredibly important.

This bill saves money. It saves money at every level. This bill has over \$400 billion in tax cuts for small businesses and families in it. I am very pleased and proud to have been part of an effort with other colleagues, including the chair of the Small Business Committee, MARY LANDRIEU, and the

distinguished Senator from Arkansas, BLANCHE LINCOLN, and other colleagues to strengthen the provisions for small business that are in this amendment. It is very important.

The 35-percent tax credit for small businesses with up to 25 employees will start next year. So right out of the gate, that is something that will be available for small businesses. We also expand on the provisions that would add to the benefits for that particular tax cut. Going forward, the whole point of creating an insurance pool that small businesses can buy into and self-employed individuals can buy into and people without insurance is because, right now, big businesses already provide insurance, for the most part, and they get a good deal because they have enough employees to negotiate a better rate. So health insurance reform, in terms of new coverage, is very much about small businesses.

Most of the people who don't have health insurance work. They don't qualify for Medicaid for low-income individuals. They are not in a big business that has health insurance.

They are working for a small business or maybe they are working one part-time job, two part-time jobs, or three part-time jobs without insurance or maybe they had a job and then lost their job and, like many people in my great State, lost their job on day one and lost their insurance on day two. This is very much tied to small business and filling the gap.

Of the people who have insurance now, about 60 percent of the public will keep what they have. They will benefit from the insurance reforms, so they are getting what they are paying for, and people with preexisting conditions will be able to find insurance that they cannot find today. Those who have public plans, such as Medicare, will be able to continue with a strengthened plan. I want to talk about that in a minute.

For that 15 to 20 percent today who cannot find affordable insurance, that is what this health reform is all about—to make sure small businesses and individuals working out of their homes, their garages—the next entrepreneur, the next Bill Gates down the road—have the opportunity to find affordable insurance through a large group pool. That is what this is very much about.

I am very pleased to say we have increased the amount of tax cuts for small businesses and tax cuts overall in this bill to help people afford to buy health insurance.

Also, as a part of saving money, we are for taxpayers saving dollars and reducing the deficit over the first 10 years, the second 10 years, and beyond. The Congressional Budget Office now says that during the first 10 years, we will decrease the deficit by \$131 billion, not the huge increases that are being talked about on the other side of the

aisle, and in the second 10 years, we are looking at up to \$1.3 trillion in reduced deficits.

For my large businesses that compete internationally, where we do not have a level playing field right now, in many ways because of health care costs, we are going to be able to bring those costs down. It is absolutely critical for us if we are going to stay competitive and be able to create good-paying middle-class jobs in this country.

We also know we have to stop the insurance company abuses that are occurring today, whether it is dropping people when they get sick because of a technicality, blocking people from getting care, putting on artificial caps, lifetime caps that stop people from getting coverage, or whether they are spending way too much on administrative costs and on profits rather than putting it into medical care. We address all of those issues in this bill, and this amendment strengthens that as well.

We are very much about saving Medicare. We stop overpayments to for-profit insurance companies and put that money back into closing what has been a gap in prescription drug coverage. We add preventive care with no out-of-pocket costs for seniors, and we lengthen the life of the Medicare trust fund.

I have to take just a moment because we have reached a milestone in all of the delaying tactics that have gone on this year, much of it focused on stopping us from passing health care reform that benefits Americans.

We have now reached 101 different Republican objections to moving our country forward as of today. The party of no has blocked us from moving forward 101 times. People oftentimes say: What does that mean? How can they do that?

The rules of the Senate are such that each Member has the ability to object to something going forward. Most of the time, we operate in a way where people agree and we do not object. But if someone objects and you are trying to get something done, you have to go through motions and time clocks and things that become very difficult for people who are following this to understand.

The reality is, if there is an objection, our leader has to do what he has done today. He files a motion to get past a filibuster, we have to wait 2 days, then we vote on stopping the filibuster, then we wait 30 hours, and then we vote on whatever it is—the amendment, the bill, whatever it is we are trying to do. After that, we then move on to the next step. There is an objection again, as there has been on health care, the leader has to file a motion to stop the filibuster, wait 2 days, vote to stop the filibuster, wait 30 hours, and then vote on whatever it is. This goes on and on.

We have seen historic numbers—what I view as an abuse of the process—his-

toric numbers in order to block us not just from health care reform but from funding the troops with the Department of Defense, extending unemployment insurance for unemployed Americans—I can go on and on.

At every step of what we have tried to do this year—and we have done some historic things—every step of the way, we have had to maneuver through an unprecedented effort to block and stall and say no. Mr. President, 101 times now this has happened.

Despite that, we have accomplished many very important things. We are not done. I am not going to be done until we make sure everybody who wants to work has a good job in this country, and we are all focused on that. We have a tremendous amount to do together to tackle the debt, to make sure we are supporting efforts for good-paying jobs to be created. But this health reform is a critical part of that because it does, in fact, affect costs in this country. It saves lives. We should care about that.

In this amendment, we add additional funds for prenatal care and to support families who want to adopt children with a refundable tax credit. We put in place other items to support women who are pregnant to make sure they have the health care they need so they and their babies can be healthy moving forward.

This saves lives, saves money, saves Medicare. It is the right thing to do, and it is time to get it done. Now is the time to get this done.

THE PRESIDING OFFICER. The Senator's time has expired.

The Senator from Oklahoma.

Mr. COBURN. Mr. President, I am going to spend a few minutes talking this afternoon. I apologize in advance because the staff is going to stay here, but this is an issue so big, this country has never faced it before. So the inconvenience for us to be here in the Senate Chamber is going to be very well worth it to the American people.

We just heard the assistant majority leader and the Senator from Michigan explain how great what is getting ready to happen is, and I want to tell you, there is a different perspective coming from a country doctor from Oklahoma who has practiced under Medicare and Medicaid for a number of years.

What we heard was, and it is important to the American people listening to this—I am going to go through what the Federal Government has been doing for the last 3 or 4 years, if you want to stay tuned for a civics lesson about the tremendous amount of incompetency and waste in this Federal Government.

We just heard the assistant majority leader talking about amendments. What he did not tell the American people is that the majority required unanimous consent for us to get an amendment and they limited us to 10 amendments over the last 2 weeks. They

strung it out so we could not get our amendments up.

The other point I wish to make is that we now have a new amendment—the one offered by the majority leader—to this bill, which we have no opportunity to amend. It is one-sixth of the bill, but there is no opportunity to amend it. So now we have a \$2.5 trillion bill that has had 10 substantive amendments offered to it. The American people should not trust that process.

We heard the Senator from Michigan just say it saves lives. I want to tell you, as a practicing physician, this bill is not going to save lives. It is going to cost lives because we are going to allow the Federal Government to determine what treatment you can get, when you can get that treatment, and who is going to give it to you. That is the ultimate result of this bill. Over the next few days, we will be explaining and showing why that is the case.

The Washington-speak of “it saves Medicare,” a program that is bankrupt now, that has an infinite \$85 trillion unfunded liability—we are going to cut \$1 trillion out of it over the next full first 10 years of this program. And the American people are supposed to expect this is going to save Medicare? It is not going to come anywhere close. And save money? The assistant majority leader quoted the CBO. Let me read to you what he did not quote:

It is unlikely that key cost containment provisions that are in this bill will remain intact.

That is what CBO said today. You did not hear that statement from the assistant majority leader.

Here is the other thing:

It reduces payments to physicians by 21 percent starting in 2011.

Do you really think we are going to reduce payments to physicians 21 percent in Medicare in 2011? One of the first bills we will see on this floor come January will be \$250 billion that will be stolen from our kids to adjust the sustainable growth rate formula for Medicare. It will not be paid for, and that is one of the reasons this thing looks for—that is why the CBO said: Wait a minute, before you claim this thing is so good, recognize that you are not accounting for \$250 billion you are going to call an emergency and not pay for it.

Here is the third thing he did not mention:

An unaccountable, unelected board of bureaucrats must make arbitrary budget cuts to ensure the cost containments in this bill.

We are saying we are going to have cost containment, but we are going to pin that on three different programs, boards, and panels in this bill that are not going to cause you to save lives. It certainly might save us money, but it certainly is not going to increase the quality of care and it certainly is not going to save Medicare.

Here is the other thing he did not mention:

CBO cannot predict that the quality of care will not decline.

That is what they are saying.

It is unclear whether such a reduction in growth rate can be achieved and, if so, whether it would be accomplished through greater efficiencies in the delivery of health care or would reduce access to care or diminish the quality of care.

That is from the CBO.

Here is the other thing the assistant majority leader did not mention:

The long-term budgetary impact could be quite different if key provisions of the legislation were ultimately changed or not fully implemented.

The U.S. Preventive Services Task Force recommended a change in breast cancer screening. They did it based on cost. We reversed it. I will bet a dollar against a nickel that the next three or four they recommend, we will not do, either, which are counted on in CBO's score for us to do. So the numbers on this do not make any sense.

CBO says this will reduce the deficit, but people who understand the CBO from the inside out admit even their best estimates are professional guesses with lots of uncertainty.

I ask unanimous consent to have printed in the RECORD the comments of Donald Marron, Alice Rivlin, and Phil Ellis.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WILL THE REID HEALTH BILL REALLY REDUCE THE DEFICIT?

(Claim: CBO says this bill will reduce the deficit)

PEOPLE WHO UNDERSTAND CBO FROM THE INSIDE OUT ADMIT THAT EVEN THEIR BEST ESTIMATES ARE PROFESSIONAL GUESSES WITH LOTS OF UNCERTAINTY

Donald Marron, former Acting Director of CBO, said that “the Congressional budget process demands specific estimates of how much proposed legislation will cost, so that’s what CBO produces. But reality is much more complex, and the actual costs will undoubtedly be more or less. That uncertainty can be frustrating, but it’s unavoidable.”

Alice Rivlin, CBO's founding director in 1975, said that “Everyone in the process—especially the CBO—knows that it is very, very difficult to make these estimates and that they’re no more than very educated guesses . . .”

Phi Ellis, head of CBO's health insurance modeling unit, admitted this in an October Washington Post article, saying: “We’re always putting out these estimates: This is going to cost \$1.042 trillion exactly. But you sort of want to add, you know, ‘Your mileage may vary.’”

The Washington Post ran a front page story in October with the headline: “In health debate, those numbers are just numbers,” saying that “the CBO's price tags are educated guesses, but guesses nonetheless.”

EXAMINE WASHINGTON'S RECORD OF ESTIMATING THE COST OF HEALTH PROGRAMS

Washington has just run a \$1.4 trillion budget deficit for fiscal 2009, even as we are told a massive, new health-care government program will reduce deficits by raising and spending about a trillion dollars over 10 years.

To believe that fantastic claim, you have to ignore everything we know about Washington and the history of government health-care programs.

Some argue that more federal control or “competition” will restrain costs and make health care more affordable. The problem with this argument is that it ignores history.

LOOK AT THE RECORD OF CONGRESSIONAL FORECASTERS IN PREDICTING COSTS

Start with Medicaid, the joint state-federal program for the poor. The House Ways and Means Committee estimated that its first-year costs would be \$238 million. Instead it hit more than \$1 billion, and costs have kept climbing.

Medicaid now costs 37 times more than it did when it was launched—after adjusting for inflation.

Its current cost is over \$250 billion, up 25% or \$50 billion in fiscal 2009 alone, and that's before the health-care bill covers millions of new beneficiaries.

MEDICARE HAS A SIMILAR RECORD. IN 1965, CONGRESSIONAL BUDGETERS SAID THAT IT WOULD COST \$12 BILLION IN 1990. ITS ACTUAL COST THAT YEAR WAS \$90 BILLION

The Medicare hospitalization program alone was supposed to cost \$9 billion but wound up costing \$67 billion. These aren't small forecasting errors. The rate of increase in Medicare spending has outpaced overall inflation in nearly every year (up 9.8% in 2009), so a program that began at \$4 billion now costs \$428 billion.

The Medicare program for renal disease was originally estimated in 1973 to cover 11,000 participants. Today it covers 395,000, at a cost of \$22 billion.

The 1988 Medicare home-care benefit was supposed to cost \$4 billion by 1993, but the actual cost was \$10 billion, because many more people participated than expected. This is nearly always the case with government programs because their entitlement nature—accepting everyone who meets the age or income limits—means there's no fixed annual budget.

ONE OF THE FEW HEALTH-CARE ENTITLEMENTS THAT HAS COME IN WELL BELOW THE ORIGINAL ESTIMATE IS THE 2003 MEDICARE PRESCRIPTION DRUG BILL

Those costs are now about one-third below the original projections, according to the Medicare actuaries. Part of the reason is lower than expected participation by seniors and savings from generic drugs.

But as White House budget director Peter Orszag told Congress when he ran the Congressional Budget Office, the “primary cause” of these cost savings is that “the pricing is coming in better than anticipated, and that is likely a reflection of the competition that's occurring in the private market.”

The Centers for Medicare and Medicaid Services agrees, stating that “the drug plans competing for Medicare beneficiaries have been able to establish greater than expected savings from aggressive price negotiation.” It adds that when given choices, “beneficiaries have overwhelmingly selected less costly drug plans.”

THE RECORD IS CLEAR: GOVERNMENT COST ESTIMATES ARE EDUCATED GUESSES AND NOT COMPLETELY RELIABLE BECAUSE OF CONGRESSIONAL SPENDING. OUR COUNTRY NEEDS REAL HEALTH REFORM, TO LOWER COST AND INCREASE CHOICES, NOT INCREASED FEDERAL CONTROL

Yet today, Democrats in Congress still fight against private-competition, instead

preferring government intervention and price controls—through a Medicaid expansion, a Medicare board of bureaucrats, federal mandates and regulation of all health insurance, and

This is all headed in the wrong direction. The Majority wants to increase the role of the federal government in health care and prevent private health plans from really competing.

Congress can hold insurers accountable and cover pre-existing conditions without increasing federal control of health care. The government does not have a good record with programs.

The government already controls too much of health care. Uncle Sam is directly or indirectly financially directing nearly two thirds of all health care. Roughly one out of 3 Americans is already on Medicaid and Medicare—programs which are going bankrupt.

The lesson here is that spending on nearly all federal benefit programs grows relentlessly once they are established. This history won't stop Democrats bent on pushing for a massive new tax hike and cuts to seniors on Medicare to raise money for new handouts.

Every Member who votes for the Democrats' plans is guaranteeing larger deficits and higher taxes far into the future. And that is a future we cannot afford.

Mr. COBURN. Mr. President, let's look at Washington's estimate of the cost of health care. We have just run a \$1.4 trillion deficit this last year. It is going to be bigger next year. It is going to be bigger. And we are going to have a brandnew health care system where we are going to start collecting taxes with some very minor changes in the health care system.

We are going to have the CLASS Act that is going to collect \$72 billion over the next 12 or 13 years, but we are not going to reduce the deficit because we refuse to make the hard choices to do so.

Mr. President, I ask unanimous consent to have printed in the RECORD CBO's key caveats on the pricetag of the Reid amendment.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CBO'S KEY CAVEATS ON PRICE TAG OF REID AMENDMENT

UNLIKELY THAT KEY COST CONTAINMENT PROVISIONS REMAIN ENACTED

"These longer-term calculations assume that the provisions are enacted and remain unchanged throughout the next two decades, which is often not the case for major legislation. For example, the sustainable growth rate (SGR) mechanism governing Medicare's payments to physicians has frequently been modified (either through legislation or administrative action) to avoid reductions in those payments, and legislation to do so again is currently under consideration in the Congress."

REDUCES MEDICARE PAYMENT TO PHYSICIANS BY 21 PERCENT IN 2011

"The legislation would maintain and put into effect a number of procedures that might be difficult to sustain over a long period of time. Under current law and under the proposal, payment rates for physicians' services in Medicare would be reduced by about 21 percent in 2010 and then decline further in subsequent years."

UNACCOUNTABLE, UNELECTED BOARD OF BUREAUCRATS MUST MAKE ARBITRARY BUDGET CUTS TO ENSURE COST CONTAINMENT

"At the same time, the legislation includes a number of provisions that would constrain payment rates for other providers of Medicare services. In particular, increases in payment rates for many providers would be held below the rate of inflation (in expectation of ongoing productivity improvements in the delivery of health care). The projected longer-term savings for the legislation also assume that the Independent Payment Advisory Board is fairly effective in reducing costs beyond the reductions that would be achieved by other aspects of the legislation. Based on the extrapolation described above, CBO expects that Medicare spending under the legislation would increase at an average annual rate of roughly 6 percent during the next two decades—well below the roughly 8 percent annual growth rate of the past two decades (excluding the effect of establishing the Medicare prescription drug benefit)."

BUT CBO CANNOT PREDICT THAT QUALITY OF CARE WILL NOT DECLINE

"It is unclear whether such a reduction in the growth rate could be achieved, and if so, whether it would be accomplished through greater efficiencies in the delivery of health care or would reduce access to care or diminish the quality of care."

ONE CHANGE COULD BLOW UP THE DEFICIT NEUTRALITY AND COSTS

"The long-term budgetary impact could be quite different if key provisions of the legislation were ultimately changed or not fully implemented. If those changes arose from future legislation, CBO would estimate their costs when that legislation was being considered by the Congress."

Mr. COBURN. Mr. President, the other statement the assistant majority leader made was that no bill was offered that they would not allow to be scored. There are four comprehensive bills out there that they have not allowed to be scored.

Tomorrow afternoon, on this same floor, RICHARD BURR and I will go through the Patients' Choice Act which saves billions, saves the States trillions, covers exactly the same number of people or more, gives everybody freedom of choice and gets the government out of health care, requires competition, requires coverage of pre-existing illness, accomplishes everything we say we want to accomplish in this bill.

So now we are getting ready to turn over \$2.5 trillion more of health care to the Federal Government. What kind of job have we done? Let's look at it for a second.

Here is what we have done this year: 43 cents out of every dollar we spent in the Federal Government we borrowed against our children. It is going to be 45 cents next year. As we spend our taxpayers' money—and, oh, by the way, I recall that the Senator from Michigan stated that we are going to improve people's lives. We are going to improve everybody's lives except the generation that follows us and their children. We are going to damage their lives.

So 43 cents of every dollar that the Federal Government spends, we are borrowing. How have we been doing? The claim is Medicare isn't broke. Anybody with a high school accounting class knows it is broke. The reason we know it is broke—and it is not only broke fiscally, it is broke in terms of methodology—is because it is a Ponzi scheme. We have robbed the money. We have promised benefits for years and never raised the taxes to pay for them. We now manage 60 percent of the health care in the country.

Medicare is broke, the State Medicaid Programs are broke, the census is broke. We heard this week that Fannie and Freddie aren't going to require just \$400 billion—that is a government-run mortgage insurance company that the Congress created—it is going to require \$800 billion, almost \$1 trillion to get us out of that. Social Security, we know, is going to be broke. It is fiscally unsustainable. The U.S. Post Office business model is broke; cash for clunkers; the highway trust fund is broke. We can't even get the \$8 billion we need to continue to run it. We have done a great job managing that. Now we are going to put another 20 percent of health care in this country under the auspices of the very people who run the broke programs that have created \$1.4 trillion worth of deficits.

What is the meaning of that? How does it affect you? Well, right now, every child, every person, every grandparent in this country owes directly \$39,000 in Federal debt, and that doesn't count everything they owe. That just counts what is external debt. That doesn't count internal debt, which is another \$39,000. What do we know with regard to Madelyn here? She says: I am already \$38,375 in debt—and, by the way, that was in October; it is over \$39,000 now—and I only own a dollhouse.

What we know is, this Federal Government spent \$33,880 per household this last fiscal year, the highest total in history. The Federal Government collected \$18,000 in taxes, and the remaining \$15,000 we borrowed, mostly from the Chinese. Over 40 percent of everything we are doing, we can't fund. The inefficiencies of the programs we have created—but with no oversight and we won't manage—we continue to allow to fail.

It is good for us to learn from our Founders. I will quote Thomas Jefferson:

My reading of history convinces me that most bad government results from too much government.

Creating \$2.5 trillion in new health care programs and damaging the health care programs we have today isn't going to save lives, it isn't going to improve health care, and it certainly isn't going to save money. Nobody can name one thing the Federal Government does that saves money.

Nobody can—that saves money. So I thought I would spend this afternoon kind of going through the last 4 years of oversight so people could actually get an opportunity to see some of the examples.

It is interesting that in the last 12 days of Christmas, here is what the Congress will have done: On Sunday, December 13, we spent \$445 billion on an omnibus package; on Saturday, December 19, we spent \$626 billion on fiscal 2010 DOD, plus billions in pork; and on December 24, we are going to create a health care program that is going to consume \$2.5 trillion over a 10-year period—or truly \$250 billion per year—and run it through the government.

So in the 12 days of Christmas, the Senate is on pace to spend \$1.942 trillion—in the 12 days leading up to Christmas. We are on pace to spend \$6.7 billion an hour in the 12 days before Christmas. Then, before you know it, we will have to raise the debt limit by \$190 billion. Then we are going to have to come back and raise the debt limit another \$1.8 trillion because, statutorily, we can't borrow money we don't have, and we will not make the hard choices to cut wasteful spending. So what we are going to do is we are going to borrow it against our children's future.

I have never voted for a debt increase. I have no intention of ever voting for one in the future. I have every intention to try to stop any debt increase we might vote on because the only thing that will cause us to make the hard priority choices in this country is not having the ability to borrow money from our children and our grandchildren.

If you go to the Web sites of Members—and you can go to cuburn.senate.gov—or any other Member site—and look at oversight reports—I thought I would go through a few of them so the American people can see where the waste is in the Federal Government. I am going to spend the time to talk about it because it is ludicrous what we have done and what we continue to do.

Here is the Justice Department. We put out a report this last year showing \$10 billion worth of waste a year in the Justice Department. That is \$100 billion every 10 years. Here is a synopsis. Here is the report we put out. Nobody in Congress read it, other than my staff and a few other Members who are concerned about our spending:

There were \$500 million in grants allowed to recipients who were not legally capable of receiving them; \$1.6 billion in unspent, unobligated funds. They are the only Federal agency that has unobligated funds that is allowed to keep them, and we have no management over it.

We have this debate on earmarks—that we ought to be directing—but we will not do anything about allowing

the Department of Justice to save the money at the end of the year that they don't spend and then spend it any way they want. We will not even do an oversight hearing on it.

Here is \$312 million on conferences for the Department of Justice—\$312 million for conferences. In 2007 alone, they lost 125,476 hours to employees who were supposed to be there that didn't check out, weren't on paid leave, weren't on sick leave, weren't taking unpaid time off, we paid them, and they didn't show up for work. Here is \$529.7 million, 1,500 special projects that were earmarked from DOJ funding.

What is an earmark? An earmark is something that benefits somebody politically and benefits somebody parochially and 98 percent of them are never competitively bid. What they are is they are the corruption of this Congress. Yet here we see \$529.7 million worth of earmarks through the Justice Department.

I will not go into the details, but if you want to go to our Web site, you can see this report and you can see how \$10 billion of your money was wasted in the Justice Department.

How about the Centers for Disease Control and Prevention? A 115-page report detailing the waste and mismanagement at the CDC and wasting billions of dollars in taxpayer money. We have offered amendments to clean up this stuff. They never pass because Members of Congress don't want to make the hard choices. They do not want to offend anybody.

They had \$45 million in conferences just last year, \$1.7 million for a Hollywood liaison program, where we pay tax dollars to tell Hollywood studios how to get it right in terms of how they portray things. That is a wonderful use of our tax dollars, when we are borrowing \$1.4 trillion a year.

Again, a 115-page report outlining instance after instance of waste that the Congress will not do anything about with regard to the CDC.

Here is a special little one that the American people, I know, will love. We are spending hundreds of millions of dollars a year putting sand back on beaches that nature says shouldn't be there. So the people who live in States on beaches share the tax dollars of people who don't rather than pay for it themselves because most of these are earmarked. The lobbying method of choice to get a beach replenished is to get an earmark. So hundreds of millions of dollars every year go out of here to put sand back that we put back 2 years ago, but because of the natural occurrence, it normally washes away.

That is not a Federal responsibility. We are confused about our responsibility. But we are so enamored of the power to look good at home, we send taxpayer money home that is not a priority so we can get reelected.

Here is a report on highway transportation waste: \$78 billion has been obligated over the last 5 years for purposes other than the construction and maintenance of highways and bridges. Let me say that, again: Over the last 5 years, \$78 billion from the Transportation Department has been spent on things other than highways and bridges and transportation, and we wonder why the highway trust fund is belly up and broke.

This is all detailed. You can go to our Web site and find all the details of the stupid stuff, the low-priority stuff, the things that don't matter in the context of the problems we have and the situation we find ourselves in today of borrowing this kind of money against our children's future.

Then we had a nice little Christmas gift last year—"The Worst Waste of 2008." We will be coming up with "The Worst Waste of 2009." There was \$2.4 million for a 3D space theater in Indiana—an earmark—so people in Colorado, I would remind the President pro tempore, got to pay for that. I know that has to be a priority. At a time when our country is struggling with 10 percent unemployment and a \$1.4 trillion deficit, we are doing that kind of stuff. How about \$2.8 million for a visitor center for a hatchery in Missouri? They have the hatchery, but we spent \$2.8 million to create a visitor center in the worst economic times we have ever seen.

How about \$100,000 for studying Chinese video game habits? That has to be a priority for our country. We have to know what the habits are of the Chinese population in terms of playing video games. A \$298,000 earmark to develop a potato for high-end restaurants or \$82 million in SBA loans to liquor stores. That is wonderfully good for our society. Here is \$13 million for an art museum in Iraq—not for us, for them. We are going to spend \$13 million for that. Then we spent \$784,000 for training classes for casino workers in Kansas.

That is a high-quality project. You know, if you have casinos in Kansas maybe you ought to train your own workers rather than take the money from Colorado and Oklahoma to do that.

If you would like to see that, this is a wonderful little—it has Santa Claus on the front, cheery—fits with our time.

Then we put out two stimulus reports. We have a burr under the saddle for some people but, you know, dadgummit, if we are going to spend \$787 billion, and the inspector general says of that \$787 billion at least \$50 billion is going to get wasted—let me say that again: at least \$50 billion is going to get wasted; that is the expectation from Washington—then we ought to be talking about where it is getting wasted and who is benefiting from it. The

fact is that the vast majority of the funds that have gone out from the stimulus project so far have not been competitively bid, so the well-connected—those people who give campaign contributions—are the ones who are getting the contracts. Those who are most connected with people who are appropriators get the contracts. They do not have to competitively bid it, it is a gift.

The first stimulus report outlined \$5.5 billion. Remember, we have only sent \$200 billion out the door on the stimulus, and we have already listed \$12 billion in two stimulus reports of pure waste or at least nonpriority items.

How about guard rails for a road over a nonexistent lake in my home State, \$1 million? So we have one boondoggle in our State where the Corp of Engineers builds a lake where no water ever comes—never has come and never will come—and then we are going to spend \$1 million on the road rather than close the road around a nonexistent lake—but that is the kind of priority we have?

We are going to spend \$10 million to renovate a train station that has not been used in 30 years and call this a priority rather than fix bridges that are crumbling in this country. Or how about the town of Union, NY, given a grant to spend money it did not request for a homeless problem it does not have, according to local officials? Or give a Nevada nonprofit a contract to do weatherization after it had been previously fired by the government for not doing good quality work? But we give the same money back to the same people? I wonder if there was any political connection. That is the first stimulus report.

In the second one we sent out \$350 million to get a broadband map that we could have bought for \$35 million, but we spend 10 times what it was worth to get that done. How are we doing? Do you think we are doing a good job? Do you think we have our eye on the ball? Do we have a priority? Are we spending the American people's money wisely? No, because the Senate refuses to do significant oversight on spending. There is a reason for it because, when you oversight it, you expose the connectedness of the well-connected to Congress. So we do not want to do that.

Then we talk about the census. The census is going to cost at least double what it did 10 years ago.

Where do we find ourselves? We find ourselves with a government we cannot afford and there is not any other way you can describe that. If we were borrowing \$1.4 trillion last year, and we are going to borrow \$1.5 trillion this year, and the Senate has refused every attempt through the amendment process to cut spending in any area, every attempt—they may pass it when we have the bill, but when it comes out of

conference it is always gone. So they want to look good, and then they can deny they knew it was taken out when they vote for the conference report.

So not once in the last 5 years have we passed an amendment that has stuck, that reduced the spending in this country on waste and junk, like I just outlined.

On January 1, 2009, the national debt was \$10.6 trillion. It now stands at \$12.1 trillion. That is not President Obama's fault. Do not confuse this with a partisan attack. My attack is on the Senate and on the Congress and the irresponsible behavior of Members of Congress who say they want to do one thing and then in the dark do something totally different. Our debt is rising \$4.2 billion a day. In January 2009 the unemployment rate was 7.6 percent. Today it is 10 percent. That is not President Obama's fault either. That is our fault. It is the fault of the Members of Congress because in fact we created Fannie Mae and Freddie Mac. We allowed it, we failed to do the oversight. When we had an opportunity to fix it we got it struck down because of the well-connectedness of the financially influential people associated with that program.

What it means is that we lost 12,210 jobs every day since January 1, and we saw an uptick in that this last week.

That debt, as I show in the picture of Madelyn, is \$39,000 per citizen. But it is important to think long term, which is my own criticism of my colleagues in the Senate. We think about the next election. We don't think long term. We think: How does this look for the next election?

What the next election is going to show us is that we are going to be \$14 trillion in debt; that every young person who is 25 years of age or younger in this country, they and their children when they are 45—that is 20 years from now—will each be responsible for debt and unfunded liabilities of \$1,119,000.

Let me say that again. Twenty years from now everybody in this country who is 45 years of age or younger will be responsible for \$1,119,000 worth of debt and unfunded liabilities. Those are unfunded liabilities they will get no benefit from. Those are for the people who came before them. So they will be paying about \$70,000 per year per individual just to fund the interest on the debt obligation that we are creating for them because we refuse to eliminate the silliness. We refuse to make priorities. We refuse to make the tough choices that may make somebody uncomfortable with us because we are thinking about the next election rather than the next generation.

While individuals, families all across this country are worried about having a job next year, Congress is busy trying to keep their jobs by passing out earmarks; by trying not to offend the well-connected and well-heeled in this Nation.

We have talked a lot about earmarks in the last year. Earmarks went down 6 percent this year in total number. They went down to 12,099 earmarks. Divide that by 100 Senators and see what you get. But the cost of them went up.

In the last 11 months, Congress has passed trillions of dollars in new spending on everything from a multibillion-dollar lands omnibus package stuffed with 100 parochial bills benefiting only a few and endangering the property rights of Americans across the country, to a stimulus bill meant to generate economic growth and create jobs, the vast majority of which hired more government workers and transfer statements to States rather than created true economic activity.

We bailed out the auto industry, we loaned hundreds of billions of dollars to private companies, we passed another omnibus spending bill just this past weekend with a price tag of \$500 billion, including \$3.7 billion in additional earmarks. Now we hear we are doing another stimulus, another jobs package.

Where are we going to get the money? Where does the House say we are going to get the money? We are going to take the money from TARP that had not been borrowed yet, so we are going to borrow the money for another stimulus package against our children and grandchildren.

The Congressional Budget Office had this to say about our fiscal situation, and we have had the Congressional Budget Office quoted:

Over the long term, beyond the 10-year baseline projection, the budget remains on an unsustainable path. Unless changes are made to current policies, the nation will face a growing demand for budgetary resources caused by rising health care costs—

Not lowering health care costs, contrary to what we have heard in this body—

rising health care costs and the aging of the population. Continued large deficits and the resulting increases in Federal debt over time would reduce long-term economic growth by lowering the national saving and investment rates. Unless revenues were increased correspondingly—

And remember what we are talking about: significant, steep, severe tax increases on the American public—annual deficits would climb and the Federal debt would grow, significantly posing a threat to the economy. Alternatively, if taxes were raised to finance the rise in spending, tax rates would have to reach levels never seen in the United States—

Never. We have had it up as high as 90 percent, I remind my colleagues—

some combination of significant changes in benefit programs, rationing, and other spending and tax policies will be necessary in order to attain long-term fiscal balance.

We actually find our deficit situation endangering our national security now because so much of the value of the dollar is now dependent upon what China does because we have not been

good stewards of the American people's money.

If we want to reduce government spending, Congress has to start somewhere, even if it is just eliminating waste. I am going to go through \$350 billion worth of waste that occurs every year in the Federal Government—\$350 billion. I will not go through every bit of it to allow the clerk and the Presiding Officer and the staff to go home, but I am going to go through enough of it so people get a flavor of where the waste is.

The cover of Newsweek's December 7 issue entitled: "Steep Debt, Slow Growth, and High Spending Kill Empires—And America Could Be Next" warns that our current fiscal situation is putting our country at risk and calling into question our position of power in the global economy.

This is how an empire declines. It begins with a debt explosion. It ends with inexorable reduction in the Army, Navy and Air Force. . . .

What did we just pass? A 4-percent increase for the military and an average 11 percent increase for every other branch of the Federal Government. We are already starting to see it. We actually increased our own budgets 6 percent, but what did we do to our military? What they are predicting in Newsweek we are already doing. We are destroying the ability to defend ourselves because, financially, we are not secure because we do not have the courage to make the hard choices in Washington.

Government has grown to such an enormous size it is almost impossible to fully grasp just how huge the Federal operation has become. The 2008–2009 U.S. Government Manual now is nearly 700 pages long and provides details on 15 executive branch agencies and nearly 60 independent establishments and government corporations—60. We have 60 government corporations.

The Government Accountability Office found that 13 different Federal agencies spent nearly \$3 billion from 2004 to 2007 to fund 207 Federal Government programs to encourage students to enter the fields of math and science.

Let me read that again:

Thirteen different Federal agencies spent nearly \$3 billion . . . to fund 207 Federal programs to encourage students to enter the fields of math and science.

Why wouldn't we just have one? Why do we have 207 programs run from 13 different agencies to encourage people to go into math and science? That is the idiocy of what we are doing.

Another example, the GAO report said with \$30 billion, the Federal Government "funds more than 44 job training programs, administered by 9 different Federal training agencies across the Federal bureaucracy."—\$30 billion, 44 programs by 9 different agencies. The right hand doesn't have any idea

what the left hand is doing. Why not one agency? Why not all job training programs in one agency? We do not have the courage to change that?

How about Federal domestic assistance? Fourteen departments within the Federal Government, forty-nine Federal agencies operating exchanges for study-abroad programs.

Let me say that again. We have 14 different departments within the Federal Government, and 49 independent agencies operating study-abroad programs.

Why not one? And why not ask the question, Is that a role for the Federal Government rather than the State government? Yet despite the decades of government spending hundreds of billions of dollars on programs that address every possible issue from homelessness to job training to obesity to education and everything in between, all these problems are actually worse—they still exist and they continue to worsen.

This calls into question if mortgaging our children's future and endangering the country to spend money we simply do not have on programs that are working is truly an effective way to address the changes we face as a Nation. We have to address these issues.

The reason I am spending time on our fiscal nature is because the thing that got us in trouble in health care, the thing that causes our problem in health care is the lack of any Federal restraint. Now we are going to move one-sixth of our economy under the purview of the Federal Government. Let me outline quickly \$387.7 billion worth of waste that could be cut from the Federal Government: The general government in total, \$150 billion; Department of Agriculture, \$9 billion; Department of Commerce, \$5.9 billion; Department of Defense, \$36.6 billion; Department of Education, we could cut \$6 billion, nobody would ever notice the difference; Department of Energy, \$2.2 billion; Department of Health and Human Services, we could cut \$1.8 billion and nobody would ever notice the difference. Medicare, by all sorts of studies now, we know that at least there is \$100 billion worth of fraud in Medicare. We know that. The bill we are so proud of that our colleagues are going to pass without significant amendments on our part goes after \$2 billion of that over 10 years. So they are going to go after two-tenths of 1 percent of the fraud and say they have done something rather than go after the fraud. Medicaid, we could cut \$48 billion from it in waste, duplication, and fraud; Indian Health Service, the inefficiency in the AIDS program; Department of Homeland Security, \$1.5 billion; Department of Housing and Urban Development, \$4.8 billion; Department of the Interior, \$2 billion; the Corps of Engineers, \$1 billion; Department of Justice, at a minimum \$1.6 bil-

lion. We have this report that outlines \$10 billion of waste. They have \$1.6 billion left over at the end of almost every year. They are the only agency that gets to keep their unexpended balances. We have no control over how they spend it. We haven't changed that. We have offered amendments to change it. They have been rejected. We have offered amendments to have that money come back to the Treasury. They have been rejected. Department of Labor, \$12.4 billion worth of waste; Department of State, \$2.5 billion; Department of Transportation, \$4.3 billion; Department of Veterans Affairs, \$1.3 billion. That comes to \$387.7 billion a year which tomorrow would markedly improve the value of the dollar and could markedly change the long-term curve that we are going to have.

Here is what it is. People need to pay attention to this. Every year we don't get rid of the \$387.7 billion and continue to waste it speeds this curve up. Because this chart, which shows where we are now, shows the debt held by the public as a percent of GDP versus where it is going. So if you have a child today who is 1 or 2 years old or you are like Madelyn, the little girl who is 3, where is she going to be in 40 years? Forty years from now puts her at 2050. That means 300 percent of her GDP will be held by the public. What happens when we do that? No growth. Look at the lost decade of Japan. What is the implication for that? The implication is opportunity gets stolen. It is paramount that we change how we operate in the Senate and we start thinking long term. It is not a partisan issue. What it is is a careerism issue and a parochialism issue.

If we care about what our oath is to this little book, the oath that every one of us took to uphold and defend the Constitution, and if we care about what the future holds, we should be worried about this. Because quite frankly, right here the interest on the debt will become \$1 trillion a year, and that is irreversible. That will happen. By 2020, the interest on the U.S. debt will be at least \$1 trillion a year. That is 10 years from now. We are going to be borrowing money and adding to the debt to pay the interest on the debt. That is called bankruptcy. That is why the Chinese are so worried about what we are doing and the fact that we are not effectively managing our government. At the end of World War II, with all the debt we had, we were only at 109 percent of our GDP; in 2080, if we don't change what we are doing, 600 percent of our GDP.

Translate that into what that means for somebody's individual life. That means my grandchildren and their children will never be able to buy a home. They will never own a home. They won't send their kids to college to advance their education. They may not even be able to buy transportation for

themselves. The reason it is important is because it is counter to the heritage we have. We are the first generation in this country, in its whole history, to leave the next generation worse off. Nobody seems to be worried about it. Nobody is willing to sacrifice their position in Washington to make the hard choices to fix what is wrong with the country. That doesn't mean I don't want to fix health care. I do. I have seen the experience, in 25 years of practicing medicine, of what government-run health care does to health care. And with all these other systems that are broke and all these different agencies that are broke and all this duplication and we won't fix it, what makes you think we will fix it this time?

There is a rumble in America. I said that on the floor the first time 4½ years ago. It is growing. It is getting big. For the first time in America, independents poll higher than either Democrats or Republicans. There is a reason for it. They can't stand us. We refuse to make the hard choices they send us here to make. Consequently, they are discouraged. There is a crisis of confidence in America about a government that is supposed to be serving them instead of them serving the government.

As this rumble builds, we should make no mistake about what the long-term consequences are, as many of us won't be here because Americans have had enough. If the average American knew what was in this book, the things we have allowed to happen and continue to allow to happen, they should fire every one of us today. There should be a recall election for every one of us. Because no matter where you are on the political spectrum, none of us has done enough to fix what is wrong. None of us has lessened the risk that will happen to our children. None of us has changed the curve of government dominance over liberty. Until we start doing that, that rumble is going to grow.

The only way that rumble calms down is when we start taking the oath to the Constitution and recognizing the enumerated powers and having respect for the tenth amendment that says specifically, everything that is not specifically mentioned in here as a role for the Federal Government is explicitly reserved to people and their States. All you have to do is look at the health care bill that is going to pass Christmas Eve. We are taking a valuable freedom away in that bill. We are taking away a right. We are going to say if you are an American citizen, you have to buy something. That is a big leap on the commerce clause that we have never had before. It is going to get challenged constitutionally. There is no question. But we are stealing liberty with that one little section called an individual mandate; you have to buy something in this country.

What should be our goal in the sunset years of our lives, after serving in this body, is that we should have preserved or increased freedom for people, not lessened it. Whether it is under Republican domination or Democratic domination, liberty has shrunk. As the government grows, liberty declines.

Another one of Thomas Jefferson's sayings:

Compelling a man to subsidize with his taxes the propagation of ideas which he disbelieves and abhors is sinful and tyrannical.

That last word is an important word in America. They see tyranny. You are going to tell me I have to buy a health insurance policy. What if I have \$250,000 in the bank and I don't want to buy a health insurance policy; you are going to tell me I have to buy it? I have to buy it? That is tyranny. There is no freedom in that. There is no freedom to make an economic choice. There is no freedom to be responsible and accountable. We have said the government will know best.

I will put some information on my Web site so that the Federal Government doesn't have to spend money. If we quit publishing this every day—it is available on line—we could save \$6.5 million a year. Nobody reads them. Everybody looks at them on the computer. We could save \$6.5 million a year if we quit doing this. But we won't quit doing it. It is \$6.5 million peed down the drain every year for something that goes and gets recycled. But we won't do it. We won't do it. Those are the little examples. If you take 100 \$6.5 million programs, you get \$650 million worth of savings. There is thousands of \$6.5 million programs we could all get together and eliminate. But we don't do it. I will make this available on my Web site.

I had my staff use data from the Office of Personnel Management, the Office of Management and Budget, take data from those two areas compiled by the Congressional Research Service. Here is what I came up with in terms of Federal employees. It is pretty revealing. We now have in the Postal Service 762,000 employees; in the Department of Defense, civilians, 677,000 employees; in all the rest of the remainder of the Federal agencies we have 1.247 million employees. The direct compensation, the direct pay cost per person in the Postal Service is \$55,614 a year. The Department of Defense civilian is \$70,201. The remainder of the Federal agencies is \$81,271. That is the direct pay. The benefits, however, at the Postal Service are \$24,743 a year. Department of Defense civilian, not our soldiers, not our military, is \$18,796 a year. And the remaining of the Federal agencies is \$31,754 a year.

So the total per capita compensation for active Federal employees right now is \$113,000 a year—2½ times what it is in the private sector across this country.

So the next time somebody comes to me and says: We need to increase the wages of Federal employees, I am going to lay down and stop it until we create the opportunity our children deserve to have that was given to us. We have wonderful Federal employees, but that is part of the things on which we have to start making a decision. We cannot continue to increase, increase, increase when we are borrowing all the money that we use to increase.

With that, I yield to the Senator from South Dakota.

The PRESIDING OFFICER (Mr. UDALL of Colorado). The Senator from South Dakota is recognized.

Mr. THUNE. Before the Senator from Oklahoma leaves—and I understand the staff needs to get out of here, and the weather is not cooperating in Washington today—I am interested in his discussion and the points he was making about the liabilities we continue to rack up and how that is going to impact future generations.

I wonder if the Senator from Oklahoma might respond to a question with regard to the current debate. Because it strikes me, in light of all the spending and borrowing the country is doing, the concerns it is now creating about not only the economy in the near term but also the impact this could have on our country's strength in the long term, the way some of our creditors, the people who actually buy our debt, are viewing the debate about health care—in fact, when the President was in Asia recently, the discussion with the Chinese was more about, their interest was about what is going to happen with health care in this country, not because they cared about whether there was a public option in the bill, not because they cared about whether it was universal coverage, but because they were interested in what it was going to do to the debt, what it was going to do to the deficit. They were worried about their investments.

I think it is fair to say having this last fiscal year rack up a \$1.5 trillion deficit—and looking to be somewhere in that ballpark again this year—that we cannot sustain over time this pace we are on of borrowing, spending, and continuing just to mortgage the future of future generations, and that bears on the debate we are having today. Because under the best case scenario, this health care expansion, when it is fully implemented, is going to be a \$2.5 trillion expansion. And the managers' amendment, which was laid down today, actually increases the cost.

I do not know if the Senator from Oklahoma has—I am sure he has looked at this, but it was \$848 billion, and now it is \$871 billion. That is their first 10-year number, which I suspect means the fully implemented number, the \$2.5 trillion number—

Mr. COBURN. It is \$2.73 trillion.

Mr. THUNE.—is equally larger. The tax increases went up as well. The

taxes that were in the original bill were \$493 billion. It is now \$518 billion. The Medicare payroll tax, which was going to be a half a point increase is now nine-tenths of a point. That, of course, impacts the Medicare trust fund, for which this will be the first time I think that a payroll tax will be levied that does not go to the trust fund; it actually goes to create a new entitlement program.

But I just wonder what the Senator from Oklahoma thinks about how the health care debate and the spending that is going to be associated with that is going to impact the scenario he was describing, the fiscal condition of our country as we head into the future, and whether we will be able to really keep the cost at the \$2.5 trillion, and whether the tax and the Medicare cuts—which the CMS Actuary says it is unlikely, on a permanent basis, that those cuts will be sustainable—how does this thing get paid for? It seems to me it gets paid for by putting more on the debt, by putting more on future generations.

I am interested in the reaction of the Senator from Oklahoma to that.

Mr. COBURN. I think it gets paid for by rationing health care to Americans. That is how I think it gets paid for. You have three different programs within this bill, three different panels that are going to mandate what I as a physician can do with my patients. Once it gets applied, there is not going to be an exception to it. For 80 percent of Americans that is going to be fine. The real key is to ratchet it down by rationing care.

What do we know? We know \$1 out of every \$3 that is spent on health care today does not help anybody. Do we fix that in this bill? No. We know that \$1 out of every \$3 does not prevent anybody from getting sick and does not treat anybody's illness. Did we fix that in this bill? No. We did not do anything about it.

I will tell the Senator from South Dakota, the tenet of medicine is you do not treat symptoms. You find the disease and you treat the disease. The bill we have before us is a bill that treats the symptoms. It does not attack the disease. Because that \$600 billion a year, at a minimum, that does not help anybody get well and does not prevent them from getting sick—if we just took half of it, we could cover everybody who is not covered in this country today. We could cover everybody and not spend a penny more on health care. But we have not attacked the disease. We are treating symptoms. We are not working to solve the real problems underlying health care.

The problem in America for health care is access to services. The access limitation is because of cost. If you cut costs 15 percent tomorrow, you would increase the same number of people who are increased in the bill in terms

of availability. If you had real transparency in the insurance industry, where people could see and actually compete and buy all across this country what they wanted, and we hammered the insurance industry in terms of transparency of outcomes—the same for doctors—you would cut the cost even further. In other words, you put the patient in charge. We have a government-in-charge bill that we are going to be voting on instead of the patients.

So we are treating symptoms. We are not treating the disease. We are treating those who are screaming the loudest, but we are not fixing the problem. We are just making the problem worse and bigger.

Mr. THUNE. If the Senator from Oklahoma would yield for another question, does the CMS Actuary and the Congressional Budget Office conclude, when it is all said and done, that the overall cost of health care goes up, not down? It seems to me, at least, that as to the points the Senator mentioned, if we were sincere about reforming health care in this country, what most small businesses, what most individuals, what most families want to see is health care costs going down. This actually bends the cost curve up, according to the CMS Actuary, with a \$234 billion increase in health care costs over 10 years.

According to the Congressional Budget Office, it is a \$160 billion increase in health care over 10 years. So there is a slight difference in terms of their analyses, but both conclude that health care costs will go up. The amount we spend on health care as a part of our total economy in this country—

Mr. COBURN. Will rise to 21 percent.

Mr. THUNE.—will be 21 percent. It is currently about 17 percent or in that ballpark. So it seems to me, at least, we have done very little—

Mr. COBURN. You are not fixing the disease.

Mr. THUNE. If anything, to address that problem.

So I simply would ask the Senator from Oklahoma, some of the things the Senator talks about in terms of actually attacking the disease could be the basis upon which we could put together a consensus bill around here that actually does reform health care in a way that drives down the cost rather than raise it and does not rely on all these tax increases, does not rely on the \$1 trillion in Medicare cuts, which the CMS Actuary says are unlikely to be substained on a permanent basis, therefore, again putting more and more of the burden of the cost of this new expansion on future generations.

I just see this as a very dangerous path to be on when you are running \$1.5 trillion deficits, when you have an economy in recession, and unemployment is about 10 percent. We are talking about tax increases that are going

to be passed on in the form of higher premiums for most Americans.

To be fair, there will be some Americans who will benefit. Most will not. Most will see their premiums go up. We are going to see Medicare cuts. The program will be cut, but not to reform it or make it more sustainable or extend its life but, rather, to create a new entitlement program.

How can we move forward with legislation such as this and call it reform? Wouldn't it be fair to suggest that if our colleagues on the other side were serious about reforming health care, they would sit down with us in a way that is constructive that would actually represent the common ground we could find and not write these bills, as they have, behind closed doors and then spring it on us today on a Saturday morning, and try to push this thing through to passage before Thursday of next week or Friday on Christmas Day?

Mr. COBURN. The Senator has asked a lot of questions. There is an organization that is based out in Oklahoma. It is called Safeway. Safeway has 200,000 employees. They have had a zero percent increase in their health care costs in the last 5 years, doing the things that we talk about in the Patients' Choice Act: using market forces, getting patient participation.

What have they found out? Their workers are healthier. Their absenteeism rate has gone down. They have lost cumulatively thousands and thousands of pounds. Their work product is better and their company is healthier because they are not spending more.

What has happened to their wages? Their wages are going up. One of the statistics most people do not understand is that for every 3.5 percent rise in health care costs, you lose 2.5 percent in real wages. In other words, if health care costs would stay flat, you would get a 2.5-percent increase. If they go up 3.5 percent, you are going to lose that 2.5 percent. If they go up 7 percent, you are going to lose 5 percent. So controlling the costs, when we have a third of it wasted anyway, should be our goal, and that is not where we are headed.

So the disappointment is not that we do not need to fix health care. We do. The disappointment is that—which I think I have outlined here today—the government is highly inefficient at everything it does, and effective only on a limited basis on the things we do fund, and then we are going to move another 20 percent of health care under the control of an organization that has proven itself ineffective at what it does.

That is insanity. The direction of the bill is one that treats the symptoms so we will feel better for a while, but we still die. If we practiced medicine that way, we would be run out of town on a rail. You do not treat symptoms.

Symptoms cover up worsening disease. You treat the real disease, and the real disease is lack of transparency, lack of accountability, lack of reform, lack of tort reform, and lack of a competitive nature, both in the health insurance industry as well as in providers like myself.

Make me compete based on quality and price, and make sure my patients can see it, so that a consumer can make a real choice. If we were to do that—which this bill does none of that—if we were to do that, American consumers could get a much better deal.

I thank the Senator.

Mr. THUNE. Mr. President, if I might say, the Senator from Oklahoma has put forward a comprehensive approach to health care reform. It has been argued here many times on the floor that Republicans do not have their own ideas. We have argued throughout the course of this debate that we ought to be approaching this not in sort of a radical overhaul of an expansion of the Federal Government's role in our health care delivery system, which this legislation would do, but, rather, look at ways we can provide more competition and create a more robust private sector health care delivery system. Instead, this approach relies heavily on growing the government footprint with regard to health care, as is evidenced by the \$2.5 trillion cost of the legislation.

But the Senator from Oklahoma and our colleague from North Carolina have come up with a comprehensive solution, which is very, in my view, bold and does represent true reform that moves us away from the system we have today, which has demonstrated, as the Senator from Oklahoma has pointed out, that it continues to increase in cost and continues to probably—I think it will be argued—deliver less in terms of quality and makes the failures in the current system even bigger and worse, without doing anything to address the fundamental underlying problem or disease.

So I would say that inasmuch as the Senator from Oklahoma has a comprehensive solution, we also support what I would call more step-by-step approaches. One, of course, is interstate competition, allowing people to buy insurance across States lines. One would allow pooling, allowing small businesses to join a larger group, thereby getting the benefit of group purchasing power.

As the Senator from Oklahoma mentioned, medical malpractice reform is something we all believe needs to be done. The Congressional Budget Office, by the way, has said all these various solutions bend the cost curve down, not up. But those are all things we could be doing to improve upon the system we have today.

Frankly, I think we need to have a fair debate of the proposal of the Sen-

ator from Oklahoma, which is a comprehensive approach, which does take us away from the employer-based system, which empowers individuals through the form of tax credits to buy their own health insurance to make them more informed consumers. We always talk about a consumer-driven model. That is exactly the approach that his legislation and his reform proposal would employ.

So I would like to see us have an opportunity to debate that. We are not going to get that chance, I do not think, because it sounds as if the amendment tree has been filled. The bill that is before us now with the managers' amendment will prevent other alternatives, other amendments from being offered. That is unfortunate because I think the direction we are headed is a train wreck, as has been described by many, because it leads to more spending, more taxing, Medicare cuts, and I would argue, in the end, more borrowing, frankly, does little to solve the underlying problems that exist in our health care system today.

Mr. COBURN. Would the Senator yield for a moment?

Mr. THUNE. I am happy to yield.

Mr. COBURN. There is one area I needed to cover that I didn't, and I will do so rather quickly.

Since 1977, this country has said we are not going to take Federal taxpayer dollars to pay for abortions. That is a divisive issue. The only way we change that issue is to change people's hearts in this country. So we are going to have to all agree to disagree on abortion in this country, and it is about a 50-50 split. What is about a 70-30 split is that the vast majority of Americans don't think their tax dollars, whether they are pro-choice or not, should be used to pay for somebody else's abortion.

What we saw come through the Senate this morning is something that every significant pro-life group in this country, including the Catholic Bishops, including Right to Life, including this doctor who has delivered thousands of babies and understands the issues of life, is going to abhor. What we have done is ultimately eliminate the Hyde amendment, and come next September 30, throughout the Federal Government as well as in this bill, the Federal Government is now going to allow taxpayer dollars to be used to pay for abortion.

Congressman STUPAK, who is a friend of mine, who made sure the House did not allow that to happen, has recently been quoted today saying this is absolutely unacceptable, and it should be. We should not be using Federal funds for that procedure to end the life of an unborn human being.

With that, I yield the floor and yield back my time.

Mr. THUNE. I appreciate that. I appreciate and share the Senator's view

with regard to the changes or proposal that was unveiled this morning and how it treats the issue of abortion.

As was noted, the House of Representatives and Congressman STUPAK came up with a clear, unequivocal policy position that extends the policy, essentially, that has been in place now for the past 30 years in this country regarding the use of taxpayer funds for abortions. The language that supposedly was negotiated between the Senator from Nebraska and the Democratic majority does not follow through or maintain that policy and, in fact, opens the door to allowing Federal funding to be used for abortions.

Irrespective of which side you come down on, on this issue, there has been widespread and broad American support for a very long time. I think it is something both Republicans and Democrats have agreed upon, and we should not deviate from that. The American people have made it very plain that they believe—60 to 70 percent, in most surveys—the Federal Government should not be using taxpayer funds to finance abortions. The funding is clearly in the Senate version that now has been negotiated. As the Senator from Oklahoma mentioned, the opposition comes from the Catholic Bishops, the opposition comes from the National Right to Life. It is very clear that this provision that is now included in the managers' amendment does not maintain the long-held policy we have had in this country supported by so many Americans that we not use taxpayer funds for abortions. So that, too, is something this bill falls short on, along with all of the other many things I have mentioned.

I think we are going to have many opportunities over the course of the next several days to continue to discuss this issue. We just received the managers' amendment this morning, and I think it is important, as the debate over the managers' amendment begins and we have some votes that are going to be coming up in the next few days, that we continue to talk about why this is the wrong approach for America, why it is the wrong approach for health care, why it is the wrong approach for our economy, and why it is the wrong approach for jobs. We can do so much better by the American people. This needs to be done in a step-by-step way. It needs to be done right. This legislation takes us in the wrong direction for the future of this country.

Mr. President, I yield the floor.

MESSAGE FROM THE HOUSE

ENROLLED BILL AND JOINT RESOLUTION SIGNED

At 10:53 a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks,

announced that the Speaker has signed the following enrolled bill and joint resolution:

H.R. 3326. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes.

H.J. Res. 64. Joint resolution making further continuing appropriations for fiscal year 2010, and for other purposes.

The enrolled bill and joint resolution were subsequently signed by the Acting President pro tempore (Mr. CASEY).

ADDITIONAL COSPONSORS

S. 565

At the request of Mr. DURBIN, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of S. 565, a bill to amend title XVIII of the Social Security Act to provide continued entitlement to coverage for immunosuppressive drugs furnished to beneficiaries under the Medicare Program that have received a kidney transplant and whose entitlement to coverage would otherwise expire, and for other purposes.

AMENDMENT NO. 3065

At the request of Mr. CARDIN, the name of the Senator from West Virginia (Mr. ROCKEFELLER) was added as a cosponsor of amendment No. 3065 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3076

At the request of Mr. DURBIN, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of amendment No. 3076 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENT NO. 3077

At the request of Mr. DURBIN, the name of the Senator from Illinois (Mr. BURRIS) was added as a cosponsor of amendment No. 3077 intended to be proposed to H.R. 3590, a bill to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

AMENDMENTS SUBMITTED AND PROPOSED

SA 3276. Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) proposed an amendment to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit

in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

SA 3277. Mr. REID proposed an amendment to amendment SA 3276 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra.

SA 3278. Mr. REID proposed an amendment to the bill H.R. 3590, supra.

SA 3279. Mr. REID proposed an amendment to amendment SA 3278 proposed by Mr. REID to the bill H.R. 3590, supra.

SA 3280. Mr. REID proposed an amendment to the bill H.R. 3590, supra.

SA 3281. Mr. REID proposed an amendment to amendment SA 3280 proposed by Mr. REID to the bill H.R. 3590, supra.

SA 3282. Mr. REID proposed an amendment to amendment SA 3281 proposed by Mr. REID to the amendment SA 3280 proposed by Mr. REID to the bill H.R. 3590, supra.

SA 3283. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 3276. Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) proposed an amendment to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 2074, strike lines 22 through 25, and insert the following:

(f) **EFFECTIVE DATE.**—The amendments made by subsections (a) through (d) of this section shall apply to amounts paid or incurred after December 31, 2008, in taxable years beginning after such date.

TITLE X—STRENGTHENING QUALITY, AFFORDABLE HEALTH CARE FOR ALL AMERICANS

Subtitle A—Provisions Relating to Title I

SEC. 10101. AMENDMENTS TO SUBTITLE A.

(a) Section 2711 of the Public Health Service Act, as added by section 1001(5) of this Act, is amended to read as follows:

“SEC. 2711. NO LIFETIME OR ANNUAL LIMITS.

“(a) **PROHIBITION.**—

“(1) **IN GENERAL.**—A group health plan and a health insurance issuer offering group or individual health insurance coverage may not establish—

“(A) lifetime limits on the dollar value of benefits for any participant or beneficiary; or

“(B) except as provided in paragraph (2), annual limits on the dollar value of benefits for any participant or beneficiary.

“(2) **ANNUAL LIMITS PRIOR TO 2014.**—With respect to plan years beginning prior to January 1, 2014, a group health plan and a health insurance issuer offering group or individual health insurance coverage may only establish a restricted annual limit on the dollar value of benefits for any participant or bene-

ficiary with respect to the scope of benefits that are essential health benefits under section 1302(b) of the Patient Protection and Affordable Care Act, as determined by the Secretary. In defining the term ‘restricted annual limit’ for purposes of the preceding sentence, the Secretary shall ensure that access to needed services is made available with a minimal impact on premiums.

“(b) **PER BENEFICIARY LIMITS.**—Subsection (a) shall not be construed to prevent a group health plan or health insurance coverage from placing annual or lifetime per beneficiary limits on specific covered benefits that are not essential health benefits under section 1302(b) of the Patient Protection and Affordable Care Act, to the extent that such limits are otherwise permitted under Federal or State law.”.

(b) Section 2715(a) of the Public Health Service Act, as added by section 1001(5) of this Act, is amended by striking “and providing to enrollees” and inserting “and providing to applicants, enrollees, and policyholders or certificate holders”.

(c) Subpart II of part A of title XXVII of the Public Health Service Act, as added by section 1001(5), is amended by inserting after section 2715, the following:

“SEC. 2715A. PROVISION OF ADDITIONAL INFORMATION.

“A group health plan and a health insurance issuer offering group or individual health insurance coverage shall comply with the provisions of section 1311(e)(3) of the Patient Protection and Affordable Care Act, except that a plan or coverage that is not offered through an Exchange shall only be required to submit the information required to the Secretary and the State insurance commissioner, and make such information available to the public.”.

(d) Section 2716 of the Public Health Service Act, as added by section 1001(5) of this Act, is amended to read as follows:

“SEC. 2716. PROHIBITION ON DISCRIMINATION IN FAVOR OF HIGHLY COMPENSATED INDIVIDUALS.

“(a) **IN GENERAL.**—A group health plan (other than a self-insured plan) shall satisfy the requirements of section 105(h)(2) of the Internal Revenue Code of 1986 (relating to prohibition on discrimination in favor of highly compensated individuals).

“(b) **RULES AND DEFINITIONS.**—For purposes of this section—

“(1) **CERTAIN RULES TO APPLY.**—Rules similar to the rules contained in paragraphs (3), (4), and (8) of section 105(h) of such Code shall apply.

“(2) **HIGHLY COMPENSATED INDIVIDUAL.**—The term ‘highly compensated individual’ has the meaning given such term by section 105(h)(5) of such Code.”.

(e) Section 2717 of the Public Health Service Act, as added by section 1001(5) of this Act, is amended—

(1) by redesignating subsections (c) and (d) as subsections (d) and (e), respectively; and

(2) by inserting after subsection (b), the following:

“(c) **PROTECTION OF SECOND AMENDMENT GUN RIGHTS.—**

“(1) **WELLNESS AND PREVENTION PROGRAMS.**—A wellness and health promotion activity implemented under subsection (a)(1)(D) may not require the disclosure or collection of any information relating to—

“(A) the presence or storage of a lawfully-possessed firearm or ammunition in the residence or on the property of an individual; or

“(B) the lawful use, possession, or storage of a firearm or ammunition by an individual.

“(2) **LIMITATION ON DATA COLLECTION.**—None of the authorities provided to the Secretary

under the Patient Protection and Affordable Care Act or an amendment made by that Act shall be construed to authorize or may be used for the collection of any information relating to—

“(A) the lawful ownership or possession of a firearm or ammunition;

“(B) the lawful use of a firearm or ammunition; or

“(C) the lawful storage of a firearm or ammunition.

“(3) LIMITATION ON DATABASES OR DATA BANKS.—None of the authorities provided to the Secretary under the Patient Protection and Affordable Care Act or an amendment made by that Act shall be construed to authorize or may be used to maintain records of individual ownership or possession of a firearm or ammunition.

“(4) LIMITATION ON DETERMINATION OF PREMIUM RATES OR ELIGIBILITY FOR HEALTH INSURANCE.—A premium rate may not be increased, health insurance coverage may not be denied, and a discount, rebate, or reward offered for participation in a wellness program may not be reduced or withheld under any health benefit plan issued pursuant to or in accordance with the Patient Protection and Affordable Care Act or an amendment made by that Act on the basis of, or on reliance upon—

“(A) the lawful ownership or possession of a firearm or ammunition; or

“(B) the lawful use or storage of a firearm or ammunition.

“(5) LIMITATION ON DATA COLLECTION REQUIREMENTS FOR INDIVIDUALS.—No individual shall be required to disclose any information under any data collection activity authorized under the Patient Protection and Affordable Care Act or an amendment made by that Act relating to—

“(A) the lawful ownership or possession of a firearm or ammunition; or

“(B) the lawful use, possession, or storage of a firearm or ammunition.”

(f) Section 2718 of the Public Health Service Act, as added by section 1001(5), is amended to read as follows:

“SEC. 2718. BRINGING DOWN THE COST OF HEALTH CARE COVERAGE.

“(a) CLEAR ACCOUNTING FOR COSTS.—A health insurance issuer offering group or individual health insurance coverage (including a grandfathered health plan) shall, with respect to each plan year, submit to the Secretary a report concerning the ratio of the incurred loss (or incurred claims) plus the loss adjustment expense (or change in contract reserves) to earned premiums. Such report shall include the percentage of total premium revenue, after accounting for collections or receipts for risk adjustment and risk corridors and payments of reinsurance, that such coverage expends—

“(1) on reimbursement for clinical services provided to enrollees under such coverage;

“(2) for activities that improve health care quality; and

“(3) on all other non-claims costs, including an explanation of the nature of such costs, and excluding Federal and State taxes and licensing or regulatory fees.

The Secretary shall make reports received under this section available to the public on the Internet website of the Department of Health and Human Services.

“(b) ENSURING THAT CONSUMERS RECEIVE VALUE FOR THEIR PREMIUM PAYMENTS.—

“(1) REQUIREMENT TO PROVIDE VALUE FOR PREMIUM PAYMENTS.—

“(A) REQUIREMENT.—Beginning not later than January 1, 2011, a health insurance issuer offering group or individual health in-

surance coverage (including a grandfathered health plan) shall, with respect to each plan year, provide an annual rebate to each enrollee under such coverage, on a pro rata basis, if the ratio of the amount of premium revenue expended by the issuer on costs described in paragraphs (1) and (2) of subsection (a) to the total amount of premium revenue (excluding Federal and State taxes and licensing or regulatory fees and after accounting for payments or receipts for risk adjustment, risk corridors, and reinsurance under sections 1341, 1342, and 1343 of the Patient Protection and Affordable Care Act) for the plan year (except as provided in subparagraph (B)(ii)), is less than—

“(i) with respect to a health insurance issuer offering coverage in the large group market, 85 percent, or such higher percentage as a State may by regulation determine; or

“(ii) with respect to a health insurance issuer offering coverage in the small group market or in the individual market, 80 percent, or such higher percentage as a State may by regulation determine, except that the Secretary may adjust such percentage with respect to a State if the Secretary determines that the application of such 80 percent may destabilize the individual market in such State.

“(B) REBATE AMOUNT.—

“(i) CALCULATION OF AMOUNT.—The total amount of an annual rebate required under this paragraph shall be in an amount equal to the product of—

“(I) the amount by which the percentage described in clause (i) or (ii) of subparagraph (A) exceeds the ratio described in such subparagraph; and

“(II) the total amount of premium revenue (excluding Federal and State taxes and licensing or regulatory fees and after accounting for payments or receipts for risk adjustment, risk corridors, and reinsurance under sections 1341, 1342, and 1343 of the Patient Protection and Affordable Care Act) for such plan year.

“(ii) CALCULATION BASED ON AVERAGE RATIO.—Beginning on January 1, 2014, the determination made under subparagraph (A) for the year involved shall be based on the averages of the premiums expended on the costs described in such subparagraph and total premium revenue for each of the previous 3 years for the plan.

“(2) CONSIDERATION IN SETTING PERCENTAGES.—In determining the percentages under paragraph (1), a State shall seek to ensure adequate participation by health insurance issuers, competition in the health insurance market in the State, and value for consumers so that premiums are used for clinical services and quality improvements.

“(3) ENFORCEMENT.—The Secretary shall promulgate regulations for enforcing the provisions of this section and may provide for appropriate penalties.

“(c) DEFINITIONS.—Not later than December 31, 2010, and subject to the certification of the Secretary, the National Association of Insurance Commissioners shall establish uniform definitions of the activities reported under subsection (a) and standardized methodologies for calculating measures of such activities, including definitions of which activities, and in what regard such activities, constitute activities described in subsection (a)(2). Such methodologies shall be designed to take into account the special circumstances of smaller plans, different types of plans, and newer plans.

“(d) ADJUSTMENTS.—The Secretary may adjust the rates described in subsection (b) if

the Secretary determines appropriate on account of the volatility of the individual market due to the establishment of State Exchanges.

“(e) STANDARD HOSPITAL CHARGES.—Each hospital operating within the United States shall for each year establish (and update) and make public (in accordance with guidelines developed by the Secretary) a list of the hospital's standard charges for items and services provided by the hospital, including for diagnosis-related groups established under section 1886(d)(4) of the Social Security Act.”

(g) Section 2719 of the Public Health Service Act, as added by section 1001(4) of this Act, is amended to read as follows:

“SEC. 2719. APPEALS PROCESS.

“(a) INTERNAL CLAIMS APPEALS.—

“(1) IN GENERAL.—A group health plan and a health insurance issuer offering group or individual health insurance coverage shall implement an effective appeals process for appeals of coverage determinations and claims, under which the plan or issuer shall, at a minimum—

“(A) have in effect an internal claims appeal process;

“(B) provide notice to enrollees, in a culturally and linguistically appropriate manner, of available internal and external appeals processes, and the availability of any applicable office of health insurance consumer assistance or ombudsman established under section 2793 to assist such enrollees with the appeals processes; and

“(C) allow an enrollee to review their file, to present evidence and testimony as part of the appeals process, and to receive continued coverage pending the outcome of the appeals process.

“(2) ESTABLISHED PROCESSES.—To comply with paragraph (1)—

“(A) a group health plan and a health insurance issuer offering group health coverage shall provide an internal claims and appeals process that initially incorporates the claims and appeals procedures (including urgent claims) set forth at section 2560.503-1 of title 29, Code of Federal Regulations, as published on November 21, 2000 (65 Fed. Reg. 70256), and shall update such process in accordance with any standards established by the Secretary of Labor for such plans and issuers; and

“(B) a health insurance issuer offering individual health coverage, and any other issuer not subject to subparagraph (A), shall provide an internal claims and appeals process that initially incorporates the claims and appeals procedures set forth under applicable law (as in existence on the date of enactment of this section), and shall update such process in accordance with any standards established by the Secretary of Health and Human Services for such issuers.

“(b) EXTERNAL REVIEW.—A group health plan and a health insurance issuer offering group or individual health insurance coverage—

“(1) shall comply with the applicable State external review process for such plans and issuers that, at a minimum, includes the consumer protections set forth in the Uniform External Review Model Act promulgated by the National Association of Insurance Commissioners and is binding on such plans; or

“(2) shall implement an effective external review process that meets minimum standards established by the Secretary through guidance and that is similar to the process described under paragraph (1)—

“(A) if the applicable State has not established an external review process that meets the requirements of paragraph (1); or

“(B) if the plan is a self-insured plan that is not subject to State insurance regulation (including a State law that establishes an external review process described in paragraph (1)).

“(c) SECRETARY AUTHORITY.—The Secretary may deem the external review process of a group health plan or health insurance issuer, in operation as of the date of enactment of this section, to be in compliance with the applicable process established under subsection (b), as determined appropriate by the Secretary.”.

(h) Subpart II of part A of title XVIII of the Public Health Service Act, as added by section 1001(5) of this Act, is amended by inserting after section 2719 the following:

“SEC. 2719A. PATIENT PROTECTIONS.

“(a) CHOICE OF HEALTH CARE PROFESSIONAL.—If a group health plan, or a health insurance issuer offering group or individual health insurance coverage, requires or provides for designation by a participant, beneficiary, or enrollee of a participating primary care provider, then the plan or issuer shall permit each participant, beneficiary, and enrollee to designate any participating primary care provider who is available to accept such individual.

“(b) COVERAGE OF EMERGENCY SERVICES.—

“(1) IN GENERAL.—If a group health plan, or a health insurance issuer offering group or individual health insurance coverage, provides or covers any benefits with respect to services in an emergency department of a hospital, the plan or issuer shall cover emergency services (as defined in paragraph (2)(B)).

“(A) without the need for any prior authorization determination;

“(B) whether the health care provider furnishing such services is a participating provider with respect to such services;

“(C) in a manner so that, if such services are provided to a participant, beneficiary, or enrollee—

“(i) by a nonparticipating health care provider with or without prior authorization; or

“(ii) (I) such services will be provided without imposing any requirement under the plan for prior authorization of services or any limitation on coverage where the provider of services does not have a contractual relationship with the plan for the providing of services that is more restrictive than the requirements or limitations that apply to emergency department services received from providers who do have such a contractual relationship with the plan; and

“(II) if such services are provided out-of-network, the cost-sharing requirement (expressed as a copayment amount or coinsurance rate) is the same requirement that would apply if such services were provided in-network;

“(D) without regard to any other term or condition of such coverage (other than exclusion or coordination of benefits, or an affiliation or waiting period, permitted under section 2701 of this Act, section 701 of the Employee Retirement Income Security Act of 1974, or section 9801 of the Internal Revenue Code of 1986, and other than applicable cost-sharing).

“(2) DEFINITIONS.—In this subsection:

“(A) EMERGENCY MEDICAL CONDITION.—The term ‘emergency medical condition’ means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson, who possesses an average knowl-

edge of health and medicine, could reasonably expect the absence of immediate medical attention to result in a condition described in clause (i), (ii), or (iii) of section 1867(e)(1)(A) of the Social Security Act.

“(B) EMERGENCY SERVICES.—The term ‘emergency services’ means, with respect to an emergency medical condition—

“(i) a medical screening examination (as required under section 1867 of the Social Security Act) that is within the capability of the emergency department of a hospital, including ancillary services routinely available to the emergency department to evaluate such emergency medical condition, and

“(ii) within the capabilities of the staff and facilities available at the hospital, such further medical examination and treatment as are required under section 1867 of such Act to stabilize the patient.

“(C) STABILIZE.—The term ‘to stabilize’, with respect to an emergency medical condition (as defined in subparagraph (A)), has the meaning give in section 1867(e)(3) of the Social Security Act (42 U.S.C. 1395dd(e)(3)).

“(c) ACCESS TO PEDIATRIC CARE.—

“(1) PEDIATRIC CARE.—In the case of a person who has a child who is a participant, beneficiary, or enrollee under a group health plan, or health insurance coverage offered by a health insurance issuer in the group or individual market, if the plan or issuer requires or provides for the designation of a participating primary care provider for the child, the plan or issuer shall permit such person to designate a physician (allopathic or osteopathic) who specializes in pediatrics as the child’s primary care provider if such provider participates in the network of the plan or issuer.

“(2) CONSTRUCTION.—Nothing in paragraph (1) shall be construed to waive any exclusions of coverage under the terms and conditions of the plan or health insurance coverage with respect to coverage of pediatric care.

“(d) PATIENT ACCESS TO OBSTETRICAL AND GYNECOLOGICAL CARE.—

“(1) GENERAL RIGHTS.—

“(A) DIRECT ACCESS.—A group health plan, or health insurance issuer offering group or individual health insurance coverage, described in paragraph (2) may not require authorization or referral by the plan, issuer, or any person (including a primary care provider described in paragraph (2)(B)) in the case of a female participant, beneficiary, or enrollee who seeks coverage for obstetrical or gynecological care provided by a participating health care professional who specializes in obstetrics or gynecology. Such professional shall agree to otherwise adhere to such plan’s or issuer’s policies and procedures, including procedures regarding referrals and obtaining prior authorization and providing services pursuant to a treatment plan (if any) approved by the plan or issuer.

“(B) OBSTETRICAL AND GYNECOLOGICAL CARE.—A group health plan or health insurance issuer described in paragraph (2) shall treat the provision of obstetrical and gynecological care, and the ordering of related obstetrical and gynecological items and services, pursuant to the direct access described under subparagraph (A), by a participating health care professional who specializes in obstetrics or gynecology as the authorizing of the primary care provider.

“(2) APPLICATION OF PARAGRAPH.—A group health plan, or health insurance issuer offering group or individual health insurance coverage, described in this paragraph is a group health plan or coverage that—

“(A) provides coverage for obstetric or gynecologic care; and

“(B) requires the designation by a participant, beneficiary, or enrollee of a participating primary care provider.

“(3) CONSTRUCTION.—Nothing in paragraph (1) shall be construed to—

“(A) waive any exclusions of coverage under the terms and conditions of the plan or health insurance coverage with respect to coverage of obstetrical or gynecological care; or

“(B) preclude the group health plan or health insurance issuer involved from requiring that the obstetrical or gynecological provider notify the primary care health care professional or the plan or issuer of treatment decisions.”.

(i) Section 2794 of the Public Health Service Act, as added by section 1003 of this Act, is amended—

(1) in subsection (c)(1)—

(A) in subparagraph (A), by striking “and” at the end;

(B) in subparagraph (B), by striking the period and inserting “; and”; and

(C) by adding at the end the following:

“(C) in establishing centers (consistent with subsection (d)) at academic or other nonprofit institutions to collect medical reimbursement information from health insurance issuers, to analyze and organize such information, and to make such information available to such issuers, health care providers, health researchers, health care policy makers, and the general public.”; and

(2) by adding at the end the following:

“(d) MEDICAL REIMBURSEMENT DATA CENTERS.—

“(1) FUNCTIONS.—A center established under subsection (c)(1)(C) shall—

“(A) develop fee schedules and other database tools that fairly and accurately reflect market rates for medical services and the geographic differences in those rates;

“(B) use the best available statistical methods and data processing technology to develop such fee schedules and other database tools;

“(C) regularly update such fee schedules and other database tools to reflect changes in charges for medical services;

“(D) make health care cost information readily available to the public through an Internet website that allows consumers to understand the amounts that health care providers in their area charge for particular medical services; and

“(E) regularly publish information concerning the statistical methodologies used by the center to analyze health charge data and make such data available to researchers and policy makers.

“(2) CONFLICTS OF INTEREST.—A center established under subsection (c)(1)(C) shall adopt by-laws that ensures that the center (and all members of the governing board of the center) is independent and free from all conflicts of interest. Such by-laws shall ensure that the center is not controlled or influenced by, and does not have any corporate relation to, any individual or entity that may make or receive payments for health care services based on the center’s analysis of health care costs.

“(3) RULE OF CONSTRUCTION.—Nothing in this subsection shall be construed to permit a center established under subsection (c)(1)(C) to compel health insurance issuers to provide data to the center.”.

SEC. 10102. AMENDMENTS TO SUBTITLE B.

(a) Section 1102(a)(2)(B) of this Act is amended—

(1) in the matter preceding clause (i), by striking “group health benefits plan” and inserting “group benefits plan providing health benefits”; and

(2) in clause (i)(I), by inserting “or any agency or instrumentality of any of the foregoing” before the closed parenthetical.

(b) Section 1103(a) of this Act is amended—
(1) in paragraph (1), by inserting “, or small business in,” after “residents of any”; and

(2) by striking paragraph (2) and inserting the following:

“(2) CONNECTING TO AFFORDABLE COVERAGE.—An Internet website established under paragraph (1) shall, to the extent practicable, provide ways for residents of, and small businesses in, any State to receive information on at least the following coverage options:

“(A) Health insurance coverage offered by health insurance issuers, other than coverage that provides reimbursement only for the treatment or mitigation of—

“(i) a single disease or condition; or

“(ii) an unreasonably limited set of diseases or conditions (as determined by the Secretary).

“(B) Medicaid coverage under title XIX of the Social Security Act.

“(C) Coverage under title XXI of the Social Security Act.

“(D) A State health benefits high risk pool, to the extent that such high risk pool is offered in such State; and

“(E) Coverage under a high risk pool under section 1101.

“(F) Coverage within the small group market for small businesses and their employees, including reinsurance for early retirees under section 1102, tax credits available under section 45R of the Internal Revenue Code of 1986 (as added by section 1421), and other information specifically for small businesses regarding affordable health care options.”

SEC. 10103. AMENDMENTS TO SUBTITLE C.

(a) Section 2701(a)(5) of the Public Health Service Act, as added by section 1201(4) of this Act, is amended by inserting “(other than self-insured group health plans offered in such market)” after “such market”.

(b) Section 2708 of the Public Health Service Act, as added by section 1201(4) of this Act, is amended by striking “or individual”.

(c) Subpart I of part A of title XXVII of the Public Health Service Act, as added by section 1201(4) of this Act, is amended by inserting after section 2708, the following:

“SEC. 2709. COVERAGE FOR INDIVIDUALS PARTICIPATING IN APPROVED CLINICAL TRIALS.

“(a) COVERAGE.—

“(1) IN GENERAL.—If a group health plan or a health insurance issuer offering group or individual health insurance coverage provides coverage to a qualified individual, then such plan or issuer—

“(A) may not deny the individual participation in the clinical trial referred to in subsection (b)(2);

“(B) subject to subsection (c), may not deny (or limit or impose additional conditions on) the coverage of routine patient costs for items and services furnished in connection with participation in the trial; and

“(C) may not discriminate against the individual on the basis of the individual’s participation in such trial.

“(2) ROUTINE PATIENT COSTS.—

“(A) INCLUSION.—For purposes of paragraph (1)(B), subject to subparagraph (B), routine patient costs include all items and services consistent with the coverage provided in the plan (or coverage) that is typically covered for a qualified individual who is not enrolled in a clinical trial.

“(B) EXCLUSION.—For purposes of paragraph (1)(B), routine patient costs does not include—

“(i) the investigational item, device, or service, itself;

“(ii) items and services that are provided solely to satisfy data collection and analysis needs and that are not used in the direct clinical management of the patient; or

“(iii) a service that is clearly inconsistent with widely accepted and established standards of care for a particular diagnosis.

“(3) USE OF IN-NETWORK PROVIDERS.—If one or more participating providers is participating in a clinical trial, nothing in paragraph (1) shall be construed as preventing a plan or issuer from requiring that a qualified individual participate in the trial through such a participating provider if the provider will accept the individual as a participant in the trial.

“(4) USE OF OUT-OF-NETWORK.—Notwithstanding paragraph (3), paragraph (1) shall apply to a qualified individual participating in an approved clinical trial that is conducted outside the State in which the qualified individual resides.

“(b) QUALIFIED INDIVIDUAL DEFINED.—For purposes of subsection (a), the term ‘qualified individual’ means an individual who is a participant or beneficiary in a health plan or with coverage described in subsection (a)(1) and who meets the following conditions:

“(1) The individual is eligible to participate in an approved clinical trial according to the trial protocol with respect to treatment of cancer or other life-threatening disease or condition.

“(2) Either—

“(A) the referring health care professional is a participating health care provider and has concluded that the individual’s participation in such trial would be appropriate based upon the individual meeting the conditions described in paragraph (1); or

“(B) the participant or beneficiary provides medical and scientific information establishing that the individual’s participation in such trial would be appropriate based upon the individual meeting the conditions described in paragraph (1).

“(c) LIMITATIONS ON COVERAGE.—This section shall not be construed to require a group health plan, or a health insurance issuer offering group or individual health insurance coverage, to provide benefits for routine patient care services provided outside of the plan’s (or coverage’s) health care provider network unless out-of-network benefits are otherwise provided under the plan (or coverage).

“(d) APPROVED CLINICAL TRIAL DEFINED.—

“(1) IN GENERAL.—In this section, the term ‘approved clinical trial’ means a phase I, phase II, phase III, or phase IV clinical trial that is conducted in relation to the prevention, detection, or treatment of cancer or other life-threatening disease or condition and is described in any of the following subparagraphs:

“(A) FEDERALLY FUNDED TRIALS.—The study or investigation is approved or funded (which may include funding through in-kind contributions) by one or more of the following:

“(i) The National Institutes of Health.

“(ii) The Centers for Disease Control and Prevention.

“(iii) The Agency for Health Care Research and Quality.

“(iv) The Centers for Medicare & Medicaid Services.

“(v) cooperative group or center of any of the entities described in clauses (i) through

(iv) or the Department of Defense or the Department of Veterans Affairs.

“(vi) A qualified non-governmental research entity identified in the guidelines issued by the National Institutes of Health for center support grants.

“(vii) Any of the following if the conditions described in paragraph (2) are met:

“(I) The Department of Veterans Affairs.

“(II) The Department of Defense.

“(III) The Department of Energy.

“(B) The study or investigation is conducted under an investigational new drug application reviewed by the Food and Drug Administration.

“(C) The study or investigation is a drug trial that is exempt from having such an investigational new drug application.

“(2) CONDITIONS FOR DEPARTMENTS.—The conditions described in this paragraph, for a study or investigation conducted by a Department, are that the study or investigation has been reviewed and approved through a system of peer review that the Secretary determines—

“(A) to be comparable to the system of peer review of studies and investigations used by the National Institutes of Health, and

“(B) assures unbiased review of the highest scientific standards by qualified individuals who have no interest in the outcome of the review.

“(e) LIFE-THREATENING CONDITION DEFINED.—In this section, the term ‘life-threatening condition’ means any disease or condition from which the likelihood of death is probable unless the course of the disease or condition is interrupted.

“(f) CONSTRUCTION.—Nothing in this section shall be construed to limit a plan’s or issuer’s coverage with respect to clinical trials.

“(g) APPLICATION TO FEHBP.—Notwithstanding any provision of chapter 89 of title 5, United States Code, this section shall apply to health plans offered under the program under such chapter.

“(h) PREEMPTION.—Notwithstanding any other provision of this Act, nothing in this section shall preempt State laws that require a clinical trials policy for State regulated health insurance plans that is in addition to the policy required under this section.”

(d) Section 1251(a) of this Act is amended—
(1) in paragraph (2), by striking “With” and inserting “Except as provided in paragraph (3), with”; and

(2) by adding at the end the following:

“(3) APPLICATION OF CERTAIN PROVISIONS.—The provisions of sections 2715 and 2718 of the Public Health Service Act (as added by subtitle A) shall apply to grandfathered health plans for plan years beginning on or after the date of enactment of this Act.”

(e) Section 1253 of this Act is amended insert before the period the following: “, except that—

“(1) section 1251 shall take effect on the date of enactment of this Act; and

“(2) the provisions of section 2704 of the Public Health Service Act (as amended by section 1201), as they apply to enrollees who are under 19 years of age, shall become effective for plan years beginning on or after the date that is 6 months after the date of enactment of this Act.”

(f) Subtitle C of title I of this Act is amended—

(1) by redesignating section 1253 as section 1255; and

(2) by inserting after section 1252, the following:

"SEC. 1253. ANNUAL REPORT ON SELF-INSURED PLANS.

"Not later than 1 year after the date of enactment of this Act, and annually thereafter, the Secretary of Labor shall prepare an aggregate annual report, using data collected from the Annual Return/Report of Employee Benefit Plan (Department of Labor Form 5500), that shall include general information on self-insured group health plans (including plan type, number of participants, benefits offered, funding arrangements, and benefit arrangements) as well as data from the financial filings of self-insured employers (including information on assets, liabilities, contributions, investments, and expenses). The Secretary shall submit such reports to the appropriate committees of Congress.

"SEC. 1254. STUDY OF LARGE GROUP MARKET.

"(a) IN GENERAL.—The Secretary of Health and Human Services shall conduct a study of the fully-insured and self-insured group health plan markets to—

"(1) compare the characteristics of employers (including industry, size, and other characteristics as determined appropriate by the Secretary), health plan benefits, financial solvency, capital reserve levels, and the risks of becoming insolvent; and

"(2) determine the extent to which new insurance market reforms are likely to cause adverse selection in the large group market or to encourage small and midsize employers to self-insure.

"(b) COLLECTION OF INFORMATION.—In conducting the study under subsection (a), the Secretary, in coordination with the Secretary of Labor, shall collect information and analyze—

"(1) the extent to which self-insured group health plans can offer less costly coverage and, if so, whether lower costs are due to more efficient plan administration and lower overhead or to the denial of claims and the offering very limited benefit packages;

"(2) claim denial rates, plan benefit fluctuations (to evaluate the extent that plans scale back health benefits during economic downturns), and the impact of the limited recourse options on consumers; and

"(3) any potential conflict of interest as it relates to the health care needs of self-insured enrollees and self-insured employer's financial contribution or profit margin, and the impact of such conflict on administration of the health plan.

"(c) REPORT.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to the appropriate committees of Congress a report concerning the results of the study conducted under subsection (a)."

SEC. 10104. AMENDMENTS TO SUBTITLE D.

(a) Section 1301(a) of this Act is amended by striking paragraph (2) and inserting the following:

"(2) INCLUSION OF CO-OP PLANS AND MULTI-STATE QUALIFIED HEALTH PLANS.—Any reference in this title to a qualified health plan shall be deemed to include a qualified health plan offered through the CO-OP program under section 1322, and a multi-State plan under section 1334, unless specifically provided for otherwise.

"(3) TREATMENT OF QUALIFIED DIRECT PRIMARY CARE MEDICAL HOME PLANS.—The Secretary of Health and Human Services shall permit a qualified health plan to provide coverage through a qualified direct primary care medical home plan that meets criteria established by the Secretary, so long as the qualified health plan meets all requirements that are otherwise applicable and the services covered by the medical home plan are

coordinated with the entity offering the qualified health plan.

"(4) VARIATION BASED ON RATING AREA.—A qualified health plan, including a multi-State qualified health plan, may as appropriate vary premiums by rating area (as defined in section 2701(a)(2) of the Public Health Service Act)."

(b) Section 1302 of this Act is amended—

(1) in subsection (d)(2)(B), by striking "may issue" and inserting "shall issue"; and

(2) by adding at the end the following:

"(g) PAYMENTS TO FEDERALLY-QUALIFIED HEALTH CENTERS.—If any item or service covered by a qualified health plan is provided by a Federally-qualified health center (as defined in section 1905(l)(2)(B) of the Social Security Act (42 U.S.C. 1396d(l)(2)(B)) to an enrollee of the plan, the offeror of the plan shall pay to the center for the item or service an amount that is not less than the amount of payment that would have been paid to the center under section 1902(bb) of such Act (42 U.S.C. 1396a(bb)) for such item or service."

(c) Section 1303 of this Act is amended to read as follows:

"SEC. 1303. SPECIAL RULES.

"(a) STATE OPT-OUT OF ABORTION COVERAGE.—

"(1) IN GENERAL.—A State may elect to prohibit abortion coverage in qualified health plans offered through an Exchange in such State if such State enacts a law to provide for such prohibition.

"(2) TERMINATION OF OPT OUT.—A State may repeal a law described in paragraph (1) and provide for the offering of such services through the Exchange.

"(b) SPECIAL RULES RELATING TO COVERAGE OF ABORTION SERVICES.—

"(1) VOLUNTARY CHOICE OF COVERAGE OF ABORTION SERVICES.—

"(A) IN GENERAL.—Notwithstanding any other provision of this title (or any amendment made by this title)—

"(i) nothing in this title (or any amendment made by this title), shall be construed to require a qualified health plan to provide coverage of services described in subparagraph (B)(i) or (B)(ii) as part of its essential health benefits for any plan year; and

"(ii) subject to subsection (a), the issuer of a qualified health plan shall determine whether or not the plan provides coverage of services described in subparagraph (B)(i) or (B)(ii) as part of such benefits for the plan year.

"(B) ABORTION SERVICES.—

"(i) ABORTIONS FOR WHICH PUBLIC FUNDING IS PROHIBITED.—The services described in this clause are abortions for which the expenditure of Federal funds appropriated for the Department of Health and Human Services is not permitted, based on the law as in effect as of the date that is 6 months before the beginning of the plan year involved.

"(ii) ABORTIONS FOR WHICH PUBLIC FUNDING IS ALLOWED.—The services described in this clause are abortions for which the expenditure of Federal funds appropriated for the Department of Health and Human Services is permitted, based on the law as in effect as of the date that is 6 months before the beginning of the plan year involved.

"(2) PROHIBITION ON THE USE OF FEDERAL FUNDS.—

"(A) IN GENERAL.—If a qualified health plan provides coverage of services described in paragraph (1)(B)(i), the issuer of the plan shall not use any amount attributable to any of the following for purposes of paying for such services:

"(i) The credit under section 36B of the Internal Revenue Code of 1986 (and the amount

(if any) of the advance payment of the credit under section 1412 of the Patient Protection and Affordable Care Act).

"(ii) Any cost-sharing reduction under section 1402 of the Patient Protection and Affordable Care Act (and the amount (if any) of the advance payment of the reduction under section 1412 of the Patient Protection and Affordable Care Act).

"(B) ESTABLISHMENT OF ALLOCATION ACCOUNTS.—In the case of a plan to which subparagraph (A) applies, the issuer of the plan shall—

"(i) collect from each enrollee in the plan (without regard to the enrollee's age, sex, or family status) a separate payment for each of the following:

"(I) an amount equal to the portion of the premium to be paid directly by the enrollee for coverage under the plan of services other than services described in paragraph (1)(B)(i) (after reduction for credits and cost-sharing reductions described in subparagraph (A)); and

"(II) an amount equal to the actuarial value of the coverage of services described in paragraph (1)(B)(i), and

"(ii) shall deposit all such separate payments into separate allocation accounts as provided in subparagraph (C).

In the case of an enrollee whose premium for coverage under the plan is paid through employee payroll deposit, the separate payments required under this subparagraph shall each be paid by a separate deposit.

"(C) SEGREGATION OF FUNDS.—

"(i) IN GENERAL.—The issuer of a plan to which subparagraph (A) applies shall establish allocation accounts described in clause (ii) for enrollees receiving amounts described in subparagraph (A).

"(ii) ALLOCATION ACCOUNTS.—The issuer of a plan to which subparagraph (A) applies shall deposit—

"(I) all payments described in subparagraph (B)(i)(I) into a separate account that consists solely of such payments and that is used exclusively to pay for services other than services described in paragraph (1)(B)(i); and

"(II) all payments described in subparagraph (B)(i)(II) into a separate account that consists solely of such payments and that is used exclusively to pay for services described in paragraph (1)(B)(i).

"(D) ACTUARIAL VALUE.—

"(i) IN GENERAL.—The issuer of a qualified health plan shall estimate the basic per enrollee, per month cost, determined on an average actuarial basis, for including coverage under the qualified health plan of the services described in paragraph (1)(B)(i).

"(ii) CONSIDERATIONS.—In making such estimate, the issuer—

"(I) may take into account the impact on overall costs of the inclusion of such coverage, but may not take into account any cost reduction estimated to result from such services, including prenatal care, delivery, or postnatal care;

"(II) shall estimate such costs as if such coverage were included for the entire population covered; and

"(III) may not estimate such a cost at less than \$1 per enrollee, per month.

"(E) ENSURING COMPLIANCE WITH SEGREGATION REQUIREMENTS.—

"(i) IN GENERAL.—Subject to clause (ii), State health insurance commissioners shall ensure that health plans comply with the segregation requirements in this subsection through the segregation of plan funds in accordance with applicable provisions of generally accepted accounting requirements,

circulars on funds management of the Office of Management and Budget, and guidance on accounting of the Government Accountability Office.

“(ii) CLARIFICATION.—Nothing in clause (1) shall prohibit the right of an individual or health plan to appeal such action in courts of competent jurisdiction.

“(3) RULES RELATING TO NOTICE.—

“(A) NOTICE.—A qualified health plan that provides for coverage of the services described in paragraph (1)(B)(i) shall provide a notice to enrollees, only as part of the summary of benefits and coverage explanation, at the time of enrollment, of such coverage.

“(B) RULES RELATING TO PAYMENTS.—The notice described in subparagraph (A), any advertising used by the issuer with respect to the plan, any information provided by the Exchange, and any other information specified by the Secretary shall provide information only with respect to the total amount of the combined payments for services described in paragraph (1)(B)(i) and other services covered by the plan.

“(4) NO DISCRIMINATION ON BASIS OF PROVISION OF ABORTION.—No qualified health plan offered through an Exchange may discriminate against any individual health care provider or health care facility because of its unwillingness to provide, pay for, provide coverage of, or refer for abortions

“(C) APPLICATION OF STATE AND FEDERAL LAWS REGARDING ABORTION.—

“(1) NO PREEMPTION OF STATE LAWS REGARDING ABORTION.—Nothing in this Act shall be construed to preempt or otherwise have any effect on State laws regarding the prohibition of (or requirement of) coverage, funding, or procedural requirements on abortions, including parental notification or consent for the performance of an abortion on a minor.

“(2) NO EFFECT ON FEDERAL LAWS REGARDING ABORTION.—

“(A) IN GENERAL.—Nothing in this Act shall be construed to have any effect on Federal laws regarding—

“(i) conscience protection;

“(ii) willingness or refusal to provide abortion; and

“(iii) discrimination on the basis of the willingness or refusal to provide, pay for, cover, or refer for abortion or to provide or participate in training to provide abortion.

“(3) NO EFFECT ON FEDERAL CIVIL RIGHTS LAW.—Nothing in this subsection shall alter the rights and obligations of employees and employers under title VII of the Civil Rights Act of 1964.

“(d) APPLICATION OF EMERGENCY SERVICES LAWS.—Nothing in this Act shall be construed to relieve any health care provider from providing emergency services as required by State or Federal law, including section 1867 of the Social Security Act (popularly known as ‘EMTALA’).”

(d) Section 1304 of this Act is amended by adding at the end the following:

“(e) EDUCATED HEALTH CARE CONSUMERS.—The term ‘educated health care consumer’ means an individual who is knowledgeable about the health care system, and has background or experience in making informed decisions regarding health, medical, and scientific matters.”

(e) Section 1311(d) of this Act is amended—

(1) in paragraph (3)(B), by striking clause (i) and inserting the following:

“(ii) STATE MUST ASSUME COST.—A State shall make payments—

“(I) to an individual enrolled in a qualified health plan offered in such State; or

“(II) on behalf of an individual described in subclause (I) directly to the qualified health plan in which such individual is enrolled;

to defray the cost of any additional benefits described in clause (1).”; and

(2) in paragraph (6)(A), by inserting “educated” before “health care”.

(f) Section 1311(e) of this Act is amended—

(1) in paragraph (2), by striking “may” in the second sentence and inserting “shall”; and

(2) by adding at the end the following:

“(3) TRANSPARENCY IN COVERAGE.—

“(A) IN GENERAL.—The Exchange shall require health plans seeking certification as qualified health plans to submit to the Exchange, the Secretary, the State insurance commissioner, and make available to the public, accurate and timely disclosure of the following information:

“(i) Claims payment policies and practices.

“(ii) Periodic financial disclosures.

“(iii) Data on enrollment.

“(iv) Data on disenrollment.

“(v) Data on the number of claims that are denied.

“(vi) Data on rating practices.

“(vii) Information on cost-sharing and payments with respect to any out-of-network coverage.

“(viii) Information on enrollee and participant rights under this title.

“(ix) Other information as determined appropriate by the Secretary.

“(B) USE OF PLAIN LANGUAGE.—The information required to be submitted under subparagraph (A) shall be provided in plain language. The term ‘plain language’ means language that the intended audience, including individuals with limited English proficiency, can readily understand and use because that language is concise, well-organized, and follows other best practices of plain language writing. The Secretary and the Secretary of Labor shall jointly develop and issue guidance on best practices of plain language writing.

“(C) COST SHARING TRANSPARENCY.—The Exchange shall require health plans seeking certification as qualified health plans to permit individuals to learn the amount of cost-sharing (including deductibles, copayments, and coinsurance) under the individual’s plan or coverage that the individual would be responsible for paying with respect to the furnishing of a specific item or service by a participating provider in a timely manner upon the request of the individual. At a minimum, such information shall be made available to such individual through an Internet website and such other means for individuals without access to the Internet.

“(D) GROUP HEALTH PLANS.—The Secretary of Labor shall update and harmonize the Secretary’s rules concerning the accurate and timely disclosure to participants by group health plans of plan disclosure, plan terms and conditions, and periodic financial disclosure with the standards established by the Secretary under subparagraph (A).”

(g) Section 1311(g)(1) of this Act is amended—

(1) in subparagraph (C), by striking “; and” and inserting a semicolon;

(2) in subparagraph (D), by striking the period and inserting “; and”; and

(3) by adding at the end the following:

“(E) the implementation of activities to reduce health and health care disparities, including through the use of language services, community outreach, and cultural competency trainings.”

(h) Section 1311(i)(2)(B) of this Act is amended by striking “small business devel-

opment centers” and inserting “resource partners of the Small Business Administration”.

(i) Section 1312 of this Act is amended—

(1) in subsection (a)(1), by inserting “and for which such individual is eligible” before the period;

(2) in subsection (e)—

(A) in paragraph (1), by inserting “and employers” after “enroll individuals”; and

(B) by striking the flush sentence at the end; and

(3) in subsection (f)(1)(A)(ii), by striking the parenthetical.

(j)(1) Subparagraph (B) of section 1313(a)(6) of this Act is hereby deemed null, void, and of no effect.

(2) Section 3730(e) of title 31, United States Code, is amended by striking paragraph (4) and inserting the following:

“(4)(A) The court shall dismiss an action or claim under this section, unless opposed by the Government, if substantially the same allegations or transactions as alleged in the action or claim were publicly disclosed—

“(i) in a Federal criminal, civil, or administrative hearing in which the Government or its agent is a party;

“(ii) in a congressional, Government Accountability Office, or other Federal report, hearing, audit, or investigation; or

“(iii) from the news media, unless the action is brought by the Attorney General or the person bringing the action is an original source of the information.

“(B) For purposes of this paragraph, “original source” means an individual who either (1) prior to a public disclosure under subsection (e)(4)(a), has voluntarily disclosed to the Government the information on which allegations or transactions in a claim are based, or (2) who has knowledge that is independent of and materially adds to the publicly disclosed allegations or transactions, and who has voluntarily provided the information to the Government before filing an action under this section.”

(k) Section 1313(b) of this Act is amended—

(1) in paragraph (3), by striking “and” at the end;

(2) by redesignating paragraph (4) as paragraph (5); and

(3) by inserting after paragraph (3) the following:

“(4) a survey of the cost and affordability of health care insurance provided under the Exchanges for owners and employees of small business concerns (as defined under section 3 of the Small Business Act (15 U.S.C. 632)), including data on enrollees in Exchanges and individuals purchasing health insurance coverage outside of Exchanges; and”

(1) Section 1322(b) of this Act is amended—

(1) by redesignating paragraph (3) as paragraph (4); and

(2) by inserting after paragraph (2), the following:

“(3) REPAYMENT OF LOANS AND GRANTS.—Not later than July 1, 2013, and prior to awarding loans and grants under the CO-OP program, the Secretary shall promulgate regulations with respect to the repayment of such loans and grants in a manner that is consistent with State solvency regulations and other similar State laws that may apply. In promulgating such regulations, the Secretary shall provide that such loans shall be repaid within 5 years and such grants shall be repaid within 15 years, taking into consideration any appropriate State reserve requirements, solvency regulations, and requisite surplus note arrangements that must be constructed in a State to provide for such

repayment prior to awarding such loans and grants.”.

(m) Part III of subtitle D of title I of this Act is amended by striking section 1323.

(n) Section 1324(a) of this Act is amended by striking “, a community health” and all that follows through “1333(b)” and inserting “, or a multi-State qualified health plan under section 1334”.

(o) Section 1331 of this Act is amended—

(1) in subsection (d)(3)(A)(i), by striking “85” and inserting “95”; and

(2) in subsection (e)(1)(B), by inserting before the semicolon the following: “, or, in the case of an alien lawfully present in the United States, whose income is not greater than 133 percent of the poverty line for the size of the family involved but who is not eligible for the Medicaid program under title XIX of the Social Security Act by reason of such alien status”.

(p) Section 1333 of this Act is amended by striking subsection (b).

(q) Part IV of subtitle D of title I of this Act is amended by adding at the end the following:

“SEC. 1334. MULTI-STATE PLANS.

“(a) OVERSIGHT BY THE OFFICE OF PERSONNEL MANAGEMENT.—

“(1) IN GENERAL.—The Director of the Office of Personnel Management (referred to in this section as the ‘Director’) shall enter into contracts with health insurance issuers (which may include a group of health insurance issuers affiliated either by common ownership and control or by the common use of a nationally licensed service mark), without regard to section 5 of title 41, United States Code, or other statutes requiring competitive bidding, to offer at least 2 multi-State qualified health plans through each Exchange in each State. Such plans shall provide individual, or in the case of small employers, group coverage.

“(2) TERMS.—Each contract entered into under paragraph (1) shall be for a uniform term of at least 1 year, but may be made automatically renewable from term to term in the absence of notice of termination by either party. In entering into such contracts, the Director shall ensure that health benefits coverage is provided in accordance with the types of coverage provided for under section 2701(a)(1)(A)(i) of the Public Health Service Act.

“(3) NON-PROFIT ENTITIES.—In entering into contracts under paragraph (1), the Director shall ensure that at least one contract is entered into with a non-profit entity.

“(4) ADMINISTRATION.—The Director shall implement this subsection in a manner similar to the manner in which the Director implements the contracting provisions with respect to carriers under the Federal employees health benefit program under chapter 89 of title 5, United States Code, including (through negotiating with each multi-state plan)—

“(A) a medical loss ratio;

“(B) a profit margin;

“(C) the premiums to be charged; and

“(D) such other terms and conditions of coverage as are in the interests of enrollees in such plans.

“(5) AUTHORITY TO PROTECT CONSUMERS.—The Director may prohibit the offering of any multi-State health plan that does not meet the terms and conditions defined by the Director with respect to the elements described in subparagraphs (A) through (D) of paragraph (4).

“(6) ASSURED AVAILABILITY OF VARIED COVERAGE.—In entering into contracts under this subsection, the Director shall ensure

that with respect to multi-State qualified health plans offered in an Exchange, there is at least one such plan that does not provide coverage of services described in section 1303(b)(1)(B)(i).

“(7) WITHDRAWAL.—Approval of a contract under this subsection may be withdrawn by the Director only after notice and opportunity for hearing to the issuer concerned without regard to subchapter II of chapter 5 and chapter 7 of title 5, United States Code.

“(b) ELIGIBILITY.—A health insurance issuer shall be eligible to enter into a contract under subsection (a)(1) if such issuer—

“(1) agrees to offer a multi-State qualified health plan that meets the requirements of subsection (c) in each Exchange in each State;

“(2) is licensed in each State and is subject to all requirements of State law not inconsistent with this section, including the standards and requirements that a State imposes that do not prevent the application of a requirement of part A of title XXVII of the Public Health Service Act or a requirement of this title;

“(3) otherwise complies with the minimum standards prescribed for carriers offering health benefits plans under section 8902(e) of title 5, United States Code, to the extent that such standards do not conflict with a provision of this title; and

“(4) meets such other requirements as determined appropriate by the Director, in consultation with the Secretary.

“(c) REQUIREMENTS FOR MULTI-STATE QUALIFIED HEALTH PLAN.—

“(1) IN GENERAL.—A multi-State qualified health plan meets the requirements of this subsection if, in the determination of the Director—

“(A) the plan offers a benefits package that is uniform in each State and consists of the essential benefits described in section 1302;

“(B) the plan meets all requirements of this title with respect to a qualified health plan, including requirements relating to the offering of the bronze, silver, and gold levels of coverage and catastrophic coverage in each State Exchange;

“(C) except as provided in paragraph (5), the issuer provides for determinations of premiums for coverage under the plan on the basis of the rating requirements of part A of title XXVII of the Public Health Service Act; and

“(D) the issuer offers the plan in all geographic regions, and in all States that have adopted adjusted community rating before the date of enactment of this Act.

“(2) STATES MAY OFFER ADDITIONAL BENEFITS.—Nothing in paragraph (1)(A) shall preclude a State from requiring that benefits in addition to the essential health benefits required under such paragraph be provided to enrollees of a multi-State qualified health plan offered in such State.

“(3) CREDITS.—

“(A) IN GENERAL.—An individual enrolled in a multi-State qualified health plan under this section shall be eligible for credits under section 36B of the Internal Revenue Code of 1986 and cost sharing assistance under section 1402 in the same manner as an individual who is enrolled in a qualified health plan.

“(B) NO ADDITIONAL FEDERAL COST.—A requirement by a State under paragraph (2) that benefits in addition to the essential health benefits required under paragraph (1)(A) be provided to enrollees of a multi-State qualified health plan shall not affect the amount of a premium tax credit provided under section 36B of the Internal Revenue Code of 1986 with respect to such plan.

“(4) STATE MUST ASSUME COST.—A State shall make payments—

“(A) to an individual enrolled in a multi-State qualified health plan offered in such State; or

“(B) on behalf of an individual described in subparagraph (A) directly to the multi-State qualified health plan in which such individual is enrolled; to defray the cost of any additional benefits described in paragraph (2).

“(5) APPLICATION OF CERTAIN STATE RATING REQUIREMENTS.—With respect to a multi-State qualified health plan that is offered in a State with age rating requirements that are lower than 3:1, the State may require that Exchanges operating in such State only permit the offering of such multi-State qualified health plans if such plans comply with the State’s more protective age rating requirements.

“(d) PLANS DEEMED TO BE CERTIFIED.—A multi-State qualified health plan that is offered under a contract under subsection (a) shall be deemed to be certified by an Exchange for purposes of section 1311(d)(4)(A).

“(e) PHASE-IN.—Notwithstanding paragraphs (1) and (2) of subsection (b), the Director shall enter into a contract with a health insurance issuer for the offering of a multi-State qualified health plan under subsection (a) if—

“(1) with respect to the first year for which the issuer offers such plan, such issuer offers the plan in at least 60 percent of the States;

“(2) with respect to the second such year, such issuer offers the plan in at least 70 percent of the States;

“(3) with respect to the third such year, such issuer offers the plan in at least 85 percent of the States; and

“(4) with respect to each subsequent year, such issuer offers the plan in all States.

“(f) APPLICABILITY.—The requirements under chapter 89 of title 5, United States Code, applicable to health benefits plans under such chapter shall apply to multi-State qualified health plans provided for under this section to the extent that such requirements do not conflict with a provision of this title.

“(g) CONTINUED SUPPORT FOR FEHBP.—

“(1) MAINTENANCE OF EFFORT.—Nothing in this section shall be construed to permit the Director to allocate fewer financial or personnel resources to the functions of the Office of Personnel Management related to the administration of the Federal Employees Health Benefit Program under chapter 89 of title 5, United States Code.

“(2) SEPARATE RISK POOL.—Enrollees in multi-State qualified health plans under this section shall be treated as a separate risk pool apart from enrollees in the Federal Employees Health Benefit Program under chapter 89 of title 5, United States Code.

“(3) AUTHORITY TO ESTABLISH SEPARATE ENTITIES.—The Director may establish such separate units or offices within the Office of Personnel Management as the Director determines to be appropriate to ensure that the administration of multi-State qualified health plans under this section does not interfere with the effective administration of the Federal Employees Health Benefit Program under chapter 89 of title 5, United States Code.

“(4) EFFECTIVE OVERSIGHT.—The Director may appoint such additional personnel as may be necessary to enable the Director to carry out activities under this section.

“(5) ASSURANCE OF SEPARATE PROGRAM.—In carrying out this section, the Director shall ensure that the program under this section

is separate from the Federal Employees Health Benefit Program under chapter 89 of title 5, United States Code. Premiums paid for coverage under a multi-State qualified health plan under this section shall not be considered to be Federal funds for any purposes.

“(6) FEHBP PLANS NOT REQUIRED TO PARTICIPATE.—Nothing in this section shall require that a carrier offering coverage under the Federal Employees Health Benefit Program under chapter 89 of title 5, United States Code, also offer a multi-State qualified health plan under this section.

“(h) ADVISORY BOARD.—The Director shall establish an advisory board to provide recommendations on the activities described in this section. A significant percentage of the members of such board shall be comprised of enrollees in a multi-State qualified health plan, or representatives of such enrollees.

“(i) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated, such sums as may be necessary to carry out this section.”.

(r) Section 1341 of this Act is amended—

(1) in the section heading, by striking “AND SMALL GROUP MARKETS” and inserting “MARKET”;

(2) in subsection (b)(2)(B), by striking “paragraph (1)(A)” and inserting “paragraph (1)(B)”;

(3) in subsection (c)(1)(A), by striking “and small group markets” and inserting “market”.

SEC. 10105. AMENDMENTS TO SUBTITLE E.

(a) Section 36B(b)(3)(A)(ii) of the Internal Revenue Code of 1986, as added by section 1401(a) of this Act, is amended by striking “is in excess of” and inserting “equals or exceeds”.

(b) Section 36B(c)(1)(A) of the Internal Revenue Code of 1986, as added by section 1401(a) of this Act, is amended by inserting “equals or” before “exceeds”.

(c) Section 36B(c)(2)(C)(iv) of the Internal Revenue Code of 1986, as added by section 1401(a) of this Act, is amended by striking “subsection (b)(3)(A)(ii)” and inserting “subsection (b)(3)(A)(iii)”.

(d) Section 1401(d) of this Act is amended by adding at the end the following:

“(3) Section 6211(b)(4)(A) of the Internal Revenue Code of 1986 is amended by inserting ‘36B,’ after ‘36A.’”.

(e)(1) Subparagraph (B) of section 45R(d)(3) of the Internal Revenue Code of 1986, as added by section 1421(a) of this Act, is amended to read as follows:

“(B) DOLLAR AMOUNT.—For purposes of paragraph (1)(B) and subsection (c)(2)—

“(i) 2010, 2011, 2012, AND 2013.—The dollar amount in effect under this paragraph for taxable years beginning in 2010, 2011, 2012, or 2013 is \$25,000.

“(ii) SUBSEQUENT YEARS.—In the case of a taxable year beginning in a calendar year after 2013, the dollar amount in effect under this paragraph shall be equal to \$25,000, multiplied by the cost-of-living adjustment under section 1(f)(3) for the calendar year, determined by substituting ‘calendar year 2012’ for ‘calendar year 1992’ in subparagraph (B) thereof.”.

(2) Subsection (g) of section 45R of the Internal Revenue Code of 1986, as added by section 1421(a) of this Act, is amended by striking “2011” both places it appears and inserting “2010, 2011”.

(3) Section 280C(h) of the Internal Revenue Code of 1986, as added by section 1421(d)(1) of this Act, is amended by striking “2011” and inserting “2010, 2011”.

(4) Section 1421(f) of this Act is amended by striking “2010” both places it appears and inserting “2009”.

(5) The amendments made by this subsection shall take effect as if included in the enactment of section 1421 of this Act.

(f) Part I of subtitle E of title I of this Act is amended by adding at the end of subpart B, the following:

“SEC. 1416. STUDY OF GEOGRAPHIC VARIATION IN APPLICATION OF FPL.

“(a) IN GENERAL.—The Secretary shall conduct a study to examine the feasibility and implication of adjusting the application of the Federal poverty level under this subtitle (and the amendments made by this subtitle) for different geographic areas so as to reflect the variations in cost-of-living among different areas within the United States. If the Secretary determines that an adjustment is feasible, the study should include a methodology to make such an adjustment. Not later than January 1, 2013, the Secretary shall submit to Congress a report on such study and shall include such recommendations as the Secretary determines appropriate.

“(b) INCLUSION OF TERRITORIES.—

“(1) IN GENERAL.—The Secretary shall ensure that the study under subsection (a) covers the territories of the United States and that special attention is paid to the disparity that exists among poverty levels and the cost of living in such territories and to the impact of such disparity on efforts to expand health coverage and ensure health care.

“(2) TERRITORIES DEFINED.—In this subsection, the term ‘territories of the United States’ includes the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, the Northern Mariana Islands, and any other territory or possession of the United States.”.

SEC. 10106. AMENDMENTS TO SUBTITLE F.

(a) Section 1501(a)(2) of this Act is amended to read as follows:

“(2) EFFECTS ON THE NATIONAL ECONOMY AND INTERSTATE COMMERCE.—The effects described in this paragraph are the following:

“(A) The requirement regulates activity that is commercial and economic in nature: economic and financial decisions about how and when health care is paid for, and when health insurance is purchased. In the absence of the requirement, some individuals would make an economic and financial decision to forego health insurance coverage and attempt to self-insure, which increases financial risks to households and medical providers.

“(B) Health insurance and health care services are a significant part of the national economy. National health spending is projected to increase from \$2,500,000,000,000, or 17.6 percent of the economy, in 2009 to \$4,700,000,000,000 in 2019. Private health insurance spending is projected to be \$854,000,000,000 in 2009, and pays for medical supplies, drugs, and equipment that are shipped in interstate commerce. Since most health insurance is sold by national or regional health insurance companies, health insurance is sold in interstate commerce and claims payments flow through interstate commerce.

“(C) The requirement, together with the other provisions of this Act, will add millions of new consumers to the health insurance market, increasing the supply of, and demand for, health care services, and will increase the number and share of Americans who are insured.

“(D) The requirement achieves near-universal coverage by building upon and strengthening the private employer-based health insurance system, which covers 176,000,000 Americans nationwide. In Massachusetts, a similar requirement has

strengthened private employer-based coverage: despite the economic downturn, the number of workers offered employer-based coverage has actually increased.

“(E) The economy loses up to \$207,000,000,000 a year because of the poorer health and shorter lifespan of the uninsured. By significantly reducing the number of the uninsured, the requirement, together with the other provisions of this Act, will significantly reduce this economic cost.

“(F) The cost of providing uncompensated care to the uninsured was \$43,000,000,000 in 2008. To pay for this cost, health care providers pass on the cost to private insurers, which pass on the cost to families. This cost-shifting increases family premiums by on average over \$1,000 a year. By significantly reducing the number of the uninsured, the requirement, together with the other provisions of this Act, will lower health insurance premiums.

“(G) 62 percent of all personal bankruptcies are caused in part by medical expenses. By significantly increasing health insurance coverage, the requirement, together with the other provisions of this Act, will improve financial security for families.

“(H) Under the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1001 et seq.), the Public Health Service Act (42 U.S.C. 201 et seq.), and this Act, the Federal Government has a significant role in regulating health insurance. The requirement is an essential part of this larger regulation of economic activity, and the absence of the requirement would undercut Federal regulation of the health insurance market.

“(I) Under sections 2704 and 2705 of the Public Health Service Act (as added by section 1201 of this Act), if there were no requirement, many individuals would wait to purchase health insurance until they needed care. By significantly increasing health insurance coverage, the requirement, together with the other provisions of this Act, will minimize this adverse selection and broaden the health insurance risk pool to include healthy individuals, which will lower health insurance premiums. The requirement is essential to creating effective health insurance markets in which improved health insurance products that are guaranteed issue and do not exclude coverage of pre-existing conditions can be sold.

“(J) Administrative costs for private health insurance, which were \$90,000,000,000 in 2006, are 26 to 30 percent of premiums in the current individual and small group markets. By significantly increasing health insurance coverage and the size of purchasing pools, which will increase economies of scale, the requirement, together with the other provisions of this Act, will significantly reduce administrative costs and lower health insurance premiums. The requirement is essential to creating effective health insurance markets that do not require underwriting and eliminate its associated administrative costs.”.

(b)(1) Section 5000A(b)(1) of the Internal Revenue Code of 1986, as added by section 1501(b) of this Act, is amended to read as follows:

“(1) IN GENERAL.—If a taxpayer who is an applicable individual, or an applicable individual for whom the taxpayer is liable under paragraph (3), fails to meet the requirement of subsection (a) for 1 or more months, then, except as provided in subsection (e), there is hereby imposed on the taxpayer a penalty with respect to such failures in the amount determined under subsection (c).”.

(2) Paragraphs (1) and (2) of section 5000A(c) of the Internal Revenue Code of 1986, as so added, are amended to read as follows:

“(1) IN GENERAL.—The amount of the penalty imposed by this section on any taxpayer for any taxable year with respect to failures described in subsection (b)(1) shall be equal to the lesser of—

“(A) the sum of the monthly penalty amounts determined under paragraph (2) for months in the taxable year during which 1 or more such failures occurred, or

“(B) an amount equal to the national average premium for qualified health plans which have a bronze level of coverage, provide coverage for the applicable family size involved, and are offered through Exchanges for plan years beginning in the calendar year with or within which the taxable year ends.

“(2) MONTHLY PENALTY AMOUNTS.—For purposes of paragraph (1)(A), the monthly penalty amount with respect to any taxpayer for any month during which any failure described in subsection (b)(1) occurred is an amount equal to 1/2 of the greater of the following amounts:

“(A) FLAT DOLLAR AMOUNT.—An amount equal to the lesser of—

“(i) the sum of the applicable dollar amounts for all individuals with respect to whom such failure occurred during such month, or

“(ii) 300 percent of the applicable dollar amount (determined without regard to paragraph (3)(C)) for the calendar year with or within which the taxable year ends.

“(B) PERCENTAGE OF INCOME.—An amount equal to the following percentage of the taxpayer's household income for the taxable year:

“(i) 0.5 percent for taxable years beginning in 2014.

“(ii) 1.0 percent for taxable years beginning in 2015.

“(iii) 2.0 percent for taxable years beginning after 2015.”

(3) Section 5000A(c)(3) of the Internal Revenue Code of 1986, as added by section 1501(b) of this Act, is amended by striking “\$350” and inserting “\$495”.

(c) Section 5000A(d)(2)(A) of the Internal Revenue Code of 1986, as added by section 1501(b) of this Act, is amended to read as follows:

“(A) RELIGIOUS CONSCIENCE EXEMPTION.—Such term shall not include any individual for any month if such individual has in effect an exemption under section 1311(d)(4)(H) of the Patient Protection and Affordable Care Act which certifies that such individual is—

“(i) a member of a recognized religious sect or division thereof which is described in section 1402(g)(1), and

“(ii) an adherent of established tenets or teachings of such sect or division as described in such section.”

(d) Section 5000A(e)(1)(C) of the Internal Revenue Code of 1986, as added by section 1501(b) of this Act, is amended to read as follows:

“(C) SPECIAL RULES FOR INDIVIDUALS RELATED TO EMPLOYEES.—For purposes of subparagraph (B)(i), if an applicable individual is eligible for minimum essential coverage through an employer by reason of a relationship to an employee, the determination under subparagraph (A) shall be made by reference to required contribution of the employee.”

(e) Section 4980H(b) of the Internal Revenue Code of 1986, as added by section 1513(a) of this Act, is amended to read as follows:

“(b) LARGE EMPLOYERS WITH WAITING PERIODS EXCEEDING 60 DAYS.—

“(1) IN GENERAL.—In the case of any applicable large employer which requires an extended waiting period to enroll in any minimum essential coverage under an employer-sponsored plan (as defined in section 5000A(f)(2)), there is hereby imposed on the employer an assessable payment of \$600 for each full-time employee of the employer to whom the extended waiting period applies.

“(2) EXTENDED WAITING PERIOD.—The term ‘extended waiting period’ means any waiting period (as defined in section 2701(b)(4) of the Public Health Service Act) which exceeds 60 days.”

(f)(1) Subparagraph (A) of section 4980H(d)(4) of the Internal Revenue Code of 1986, as added by section 1513(a) of this Act, is amended by inserting “, with respect to any month,” after “means”.

(2) Section 4980H(d)(2) of the Internal Revenue Code of 1986, as added by section 1513(a) of this Act, is amended by adding at the end the following:

“(D) APPLICATION TO CONSTRUCTION INDUSTRY EMPLOYERS.—In the case of any employer the substantial annual gross receipts of which are attributable to the construction industry—

“(i) subparagraph (A) shall be applied by substituting ‘who employed an average of at least 5 full-time employees on business days during the preceding calendar year and whose annual payroll expenses exceed \$250,000 for such preceding calendar year’ for ‘who employed an average of at least 50 full-time employees on business days during the preceding calendar year’, and

“(ii) subparagraph (B) shall be applied by substituting ‘5’ for ‘50’.”

(3) The amendment made by paragraph (2) shall apply to months beginning after December 31, 2013.

(g) Section 6056(b) of the Internal Revenue Code of 1986, as added by section 1514(a) of the Act, is amended by adding at the end the following new flush sentence:

“The Secretary shall have the authority to review the accuracy of the information provided under this subsection, including the applicable large employer's share under paragraph (2)(C)(iv).”

SEC. 10107. AMENDMENTS TO SUBTITLE G.

(a) Section 1562 of this Act is amended, in the amendment made by subsection (a)(2)(B)(iii), by striking “subpart 1” and inserting “subparts I and II”; and

(b) Subtitle G of title I of this Act is amended—

(1) by redesignating section 1562 (as amended) as section 1563; and

(2) by inserting after section 1561 the following:

“SEC. 1562. GAO STUDY REGARDING THE RATE OF DENIAL OF COVERAGE AND ENROLLMENT BY HEALTH INSURANCE ISSUERS AND GROUP HEALTH PLANS.

“(a) IN GENERAL.—The Comptroller General of the United States (referred to in this section as the ‘Comptroller General’) shall conduct a study of the incidence of denials of coverage for medical services and denials of applications to enroll in health insurance plans, as described in subsection (b), by group health plans and health insurance issuers.

“(b) DATA.—

“(1) IN GENERAL.—In conducting the study described in subsection (a), the Comptroller General shall consider samples of data concerning the following:

“(A)(i) denials of coverage for medical services to a plan enrollees, by the types of services for which such coverage was denied; and

“(ii) the reasons such coverage was denied; and

“(B)(i) incidents in which group health plans and health insurance issuers deny the application of an individual to enroll in a health insurance plan offered by such group health plan or issuer; and

“(ii) the reasons such applications are denied.

“(2) SCOPE OF DATA.—

“(A) FAVORABLY RESOLVED DISPUTES.—The data that the Comptroller General considers under paragraph (1) shall include data concerning denials of coverage for medical services and denials of applications for enrollment in a plan by a group health plan or health insurance issuer, where such group health plan or health insurance issuer later approves such coverage or application.

“(B) ALL HEALTH PLANS.—The study under this section shall consider data from varied group health plans and health insurance plans offered by health insurance issuers, including qualified health plans and health plans that are not qualified health plans.

“(c) REPORT.—Not later than one year after the date of enactment of this Act, the Comptroller General shall submit to the Secretaries of Health and Human Services and Labor a report describing the results of the study conducted under this section.

“(d) PUBLICATION OF REPORT.—The Secretaries of Health and Human Services and Labor shall make the report described in subsection (c) available to the public on an Internet website.

“SEC. 1563. SMALL BUSINESS PROCUREMENT.

“Part 19 of the Federal Acquisition Regulation, section 15 of the Small Business Act (15 U.S.C. 644), and any other applicable laws or regulations establishing procurement requirements relating to small business concerns (as defined in section 3 of the Small Business Act (15 U.S.C. 632)) may not be waived with respect to any contract awarded under any program or other authority under this Act or an amendment made by this Act.”

SEC. 10108. FREE CHOICE VOUCHERS.

(a) IN GENERAL.—An offering employer shall provide free choice vouchers to each qualified employee of such employer.

(b) OFFERING EMPLOYER.—For purposes of this section, the term “offering employer” means any employer who—

(1) offers minimum essential coverage to its employees consisting of coverage through an eligible employer-sponsored plan; and

(2) pays any portion of the costs of such plan.

(c) QUALIFIED EMPLOYEE.—For purposes of this section—

(1) IN GENERAL.—The term “qualified employee” means, with respect to any plan year of an offering employer, any employee—

(A) whose required contribution (as determined under section 5000A(e)(1)(B)) for minimum essential coverage through an eligible employer-sponsored plan—

(i) exceeds 8 percent of such employee's household income for the taxable year described in section 1412(b)(1)(B) which ends with or within in the plan year; and

(ii) does not exceed 9.8 percent of such employee's household income for such taxable year;

(B) whose household income for such taxable year is not greater than 400 percent of the poverty line for a family of the size involved; and

(C) who does not participate in a health plan offered by the offering employer.

(2) INDEXING.—In the case of any calendar year beginning after 2014, the Secretary shall

adjust the 8 percent under paragraph (1)(A)(i) and 9.8 percent under paragraph (1)(A)(ii) for the calendar year to reflect the rate of premium growth between the preceding calendar year and 2013 over the rate of income growth for such period.

(d) FREE CHOICE VOUCHER.—

(1) AMOUNT.—

(A) IN GENERAL.—The amount of any free choice voucher provided under subsection (a) shall be equal to the monthly portion of the cost of the eligible employer-sponsored plan which would have been paid by the employer if the employee were covered under the plan with respect to which the employer pays the largest portion of the cost of the plan. Such amount shall be equal to the amount the employer would pay for an employee with self-only coverage unless such employee elects family coverage (in which case such amount shall be the amount the employer would pay for family coverage).

(B) DETERMINATION OF COST.—The cost of any health plan shall be determined under the rules similar to the rules of section 2204 of the Public Health Service Act, except that such amount shall be adjusted for age and category of enrollment in accordance with regulations established by the Secretary.

(2) USE OF VOUCHERS.—An Exchange shall credit the amount of any free choice voucher provided under subsection (a) to the monthly premium of any qualified health plan in the Exchange in which the qualified employee is enrolled and the offering employer shall pay any amounts so credited to the Exchange.

(3) PAYMENT OF EXCESS AMOUNTS.—If the amount of the free choice voucher exceeds the amount of the premium of the qualified health plan in which the qualified employee is enrolled for such month, such excess shall be paid to the employee.

(e) OTHER DEFINITIONS.—Any term used in this section which is also used in section 5000A of the Internal Revenue Code of 1986 shall have the meaning given such term under such section 5000A.

(f) EXCLUSION FROM INCOME FOR EMPLOYEE.—

(1) IN GENERAL.—Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1986 is amended by inserting after section 139C the following new section:

“SEC. 139D. FREE CHOICE VOUCHERS.

“Gross income shall not include the amount of any free choice voucher provided by an employer under section 10108 of the Patient Protection and Affordable Care Act to the extent that the amount of such voucher does not exceed the amount paid for a qualified health plan (as defined in section 1301 of such Act) by the taxpayer.”.

(2) CLERICAL AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 of such Code is amended by inserting after the item relating to section 139C the following new item:

“Sec. 139D. Free choice vouchers.”.

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to vouchers provided after December 31, 2013.

(g) DEDUCTION ALLOWED TO EMPLOYER.—

(1) IN GENERAL.—Section 162(a) of the Internal Revenue Code of 1986 is amended by adding at the end the following new sentence: “For purposes of paragraph (1), the amount of a free choice voucher provided under section 10108 of the Patient Protection and Affordable Care Act shall be treated as an amount for compensation for personal services actually rendered.”.

(2) EFFECTIVE DATE.—The amendments made by this subsection shall apply to vouchers provided after December 31, 2013.

(h) VOUCHER TAKEN INTO ACCOUNT IN DETERMINING PREMIUM CREDIT.—

(1) IN GENERAL.—Subsection (c)(2) of section 36B of the Internal Revenue Code of 1986, as added by section 1401, is amended by adding at the end the following new subparagraph:

“(D) EXCEPTION FOR INDIVIDUAL RECEIVING FREE CHOICE VOUCHERS.—The term ‘coverage month’ shall not include any month in which such individual has a free choice voucher provided under section 10108 of the Patient Protection and Affordable Care Act.”.

(2) EFFECTIVE DATE.—The amendment made by this subsection shall apply to taxable years beginning after December 31, 2013.

(i) COORDINATION WITH EMPLOYER RESPONSIBILITIES.—

(1) SHARED RESPONSIBILITY PENALTY.—

(A) IN GENERAL.—Subsection (c) of section 4980H of the Internal Revenue Code of 1986, as added by section 1513, is amended by adding at the end the following new paragraph:

“(3) SPECIAL RULES FOR EMPLOYERS PROVIDING FREE CHOICE VOUCHERS.—No assessable payment shall be imposed under paragraph (1) for any month with respect to any employee to whom the employer provides a free choice voucher under section 10108 of the Patient Protection and Affordable Care Act for such month.”.

(B) EFFECTIVE DATE.—The amendment made by this paragraph shall apply to months beginning after December 31, 2013.

(2) NOTIFICATION REQUIREMENT.—Section 18B(a)(3) of the Fair Labor Standards Act of 1938, as added by section 1512, is amended—

(A) by inserting “and the employer does not offer a free choice voucher” after “Exchange”; and

(B) by striking “will lose” and inserting “may lose”.

(j) EMPLOYER REPORTING.—

(1) IN GENERAL.—Subsection (a) of section 6056 of the Internal Revenue Code of 1986, as added by section 1514, is amended by inserting “and every offering employer” before “shall”.

(2) OFFERING EMPLOYERS.—Subsection (f) of section 6056 of such Code, as added by section 1514, is amended to read as follows:

“(f) DEFINITIONS.—For purposes of this section—

“(1) OFFERING EMPLOYER.—

“(A) IN GENERAL.—The term ‘offering employer’ means any offering employer (as defined in section 10108(b) of the Patient Protection and Affordable Care Act) if the required contribution (within the meaning of section 5000A(e)(1)(B)(i)) of any employee exceeds 8 percent of the wages (as defined in section 3121(a)) paid to such employee by such employer.

“(B) INDEXING.—In the case of any calendar year beginning after 2014, the 8 percent under subparagraph (A) shall be adjusted for the calendar year to reflect the rate of premium growth between the preceding calendar year and 2013 over the rate of income growth for such period.

“(2) OTHER DEFINITIONS.—Any term used in this section which is also used in section 4980H shall have the meaning given such term by section 4980H.”.

(3) CONFORMING AMENDMENTS.—

(A) The heading of section 6056 of such Code, as added by section 1514, is amended by striking “LARGE” and inserting “CERTAIN”.

(B) Section 6056(b)(2)(C) of such Code is amended—

(i) by inserting “in the case of an applicable large employer,” before “the length” in clause (i);

(ii) by striking “and” at the end of clause (iii);

(iii) by striking “applicable large employer” in clause (iv) and inserting “employer”;

(iv) by inserting “and” at the end of clause (iv); and

(v) by inserting at the end the following new clause:

“(v) in the case of an offering employer, the option for which the employer pays the largest portion of the cost of the plan and the portion of the cost paid by the employer in each of the enrollment categories under such option.”.

(C) Section 6056(d)(2) of such Code is amended by inserting “or offering employer” after “applicable large employer”.

(D) Section 6056(e) of such Code is amended by inserting “or offering employer” after “applicable large employer”.

(E) Section 6724(d)(1)(B)(xxv) of such Code, as added by section 1514, is amended by striking “large” and inserting “certain”.

(F) Section 6724(d)(2)(HH) of such Code, as added by section 1514, is amended by striking “large” and inserting “certain”.

(G) The table of sections for subpart D of part III of subchapter A of chapter 1 of such Code, as amended by section 1514, is amended by striking “Large employers” in the item relating to section 6056 and inserting “Certain employers”.

(4) EFFECTIVE DATE.—The amendments made by this subsection shall apply to periods beginning after December 31, 2013.

SEC. 10109. DEVELOPMENT OF STANDARDS FOR FINANCIAL AND ADMINISTRATIVE TRANSACTIONS.

(a) ADDITIONAL TRANSACTION STANDARDS AND OPERATING RULES.—

(1) DEVELOPMENT OF ADDITIONAL TRANSACTION STANDARDS AND OPERATING RULES.—Section 1173(a) of the Social Security Act (42 U.S.C. 1320d-2(a)), as amended by section 1104(b)(2), is amended—

(A) in paragraph (1)(B), by inserting before the period the following: “, and subject to the requirements under paragraph (5)”; and

(B) by adding at the end the following new paragraph:

“(5) CONSIDERATION OF STANDARDIZATION OF ACTIVITIES AND ITEMS.—

“(A) IN GENERAL.—For purposes of carrying out paragraph (1)(B), the Secretary shall solicit, not later than January 1, 2012, and not less than every 3 years thereafter, input from entities described in subparagraph (B) on—

“(i) whether there could be greater uniformity in financial and administrative activities and items, as determined appropriate by the Secretary; and

“(ii) whether such activities should be considered financial and administrative transactions (as described in paragraph (1)(B)) for which the adoption of standards and operating rules would improve the operation of the health care system and reduce administrative costs.

“(B) SOLICITATION OF INPUT.—For purposes of subparagraph (A), the Secretary shall seek input from—

“(i) the National Committee on Vital and Health Statistics, the Health Information Technology Policy Committee, and the Health Information Technology Standards Committee; and

“(ii) standard setting organizations and stakeholders, as determined appropriate by the Secretary.”.

(b) ACTIVITIES AND ITEMS FOR INITIAL CONSIDERATION.—For purposes of section 1173(a)(5) of the Social Security Act, as added by subsection (a), the Secretary of Health and Human Services (in this section referred

to as the “Secretary”) shall, not later than January 1, 2012, seek input on activities and items relating to the following areas:

(1) Whether the application process, including the use of a uniform application form, for enrollment of health care providers by health plans could be made electronic and standardized.

(2) Whether standards and operating rules described in section 1173 of the Social Security Act should apply to the health care transactions of automobile insurance, worker’s compensation, and other programs or persons not described in section 1172(a) of such Act (42 U.S.C. 1320d–1(a)).

(3) Whether standardized forms could apply to financial audits required by health plans, Federal and State agencies (including State auditors, the Office of the Inspector General of the Department of Health and Human Services, and the Centers for Medicare & Medicaid Services), and other relevant entities as determined appropriate by the Secretary.

(4) Whether there could be greater transparency and consistency of methodologies and processes used to establish claim edits used by health plans (as described in section 1171(5) of the Social Security Act (42 U.S.C. 1320d(5))).

(5) Whether health plans should be required to publish their timelines of payment rules.

(c) ICD CODING CROSSWALKS.—

(1) ICD-9 TO ICD-10 CROSSWALK.—The Secretary shall task the ICD-9-CM Coordination and Maintenance Committee to convene a meeting, not later than January 1, 2011, to receive input from appropriate stakeholders (including health plans, health care providers, and clinicians) regarding the crosswalk between the Ninth and Tenth Revisions of the International Classification of Diseases (ICD-9 and ICD-10, respectively) that is posted on the website of the Centers for Medicare & Medicaid Services, and make recommendations about appropriate revisions to such crosswalk.

(2) REVISION OF CROSSWALK.—For purposes of the crosswalk described in paragraph (1), the Secretary shall make appropriate revisions and post any such revised crosswalk on the website of the Centers for Medicare & Medicaid Services.

(3) USE OF REVISED CROSSWALK.—For purposes of paragraph (2), any revised crosswalk shall be treated as a code set for which a standard has been adopted by the Secretary for purposes of section 1173(c)(1)(B) of the Social Security Act (42 U.S.C. 1320d–2(c)(1)(B)).

(4) SUBSEQUENT CROSSWALKS.—For subsequent revisions of the International Classification of Diseases that are adopted by the Secretary as a standard code set under section 1173(c) of the Social Security Act (42 U.S.C. 1320d–2(c)), the Secretary shall, after consultation with the appropriate stakeholders, post on the website of the Centers for Medicare & Medicaid Services a crosswalk between the previous and subsequent version of the International Classification of Diseases not later than the date of implementation of such subsequent revision.

**Subtitle B—Provisions Relating to Title II
PART I—MEDICAID AND CHIP**

SEC. 10201. AMENDMENTS TO THE SOCIAL SECURITY ACT AND TITLE II OF THIS ACT.

(a)(1) Section 1902(a)(10)(A)(i)(IX) of the Social Security Act (42 U.S.C. 1396a(a)(10)(A)(i)(IX)), as added by section 2004(a), is amended to read as follows:

“(IX) who—

“(aa) are under 26 years of age;

“(bb) are not described in or enrolled under any of subclauses (I) through (VII) of this

clause or are described in any of such subclauses but have income that exceeds the level of income applicable under the State plan for eligibility to enroll for medical assistance under such subclause;

“(cc) were in foster care under the responsibility of the State on the date of attaining 18 years of age or such higher age as the State has elected under section 475(8)(B)(iii); and

“(dd) were enrolled in the State plan under this title or under a waiver of the plan while in such foster care;”.

(2) Section 1902(a)(10) of the Social Security Act (42 U.S.C. 1396a(a)(10)), as amended by section 2001(a)(5)(A), is amended in the matter following subparagraph (G), by striking “and (XV)” and inserting “(XV)”, and by inserting “and (XVI) if an individual is described in subclause (IX) of subparagraph (A)(i) and is also described in subclause (VIII) of that subparagraph, the medical assistance shall be made available to the individual through subclause (IX) instead of through subclause (VIII)” before the semicolon.

(3) Section 2004(d) of this Act is amended by striking “2019” and inserting “2014”.

(b) Section 1902(k)(2) of the Social Security Act (42 U.S.C. 1396a(k)(2)), as added by section 2001(a)(4)(A), is amended by striking “January 1, 2011” and inserting “April 1, 2010”.

(c) Section 1905 of the Social Security Act (42 U.S.C. 1396d), as amended by sections 2001(a)(3), 2001(a)(5)(C), 2006, and 4107(a)(2), is amended—

(1) in subsection (a), in the matter preceding paragraph (1), by inserting in clause (xiv), “or 1902(a)(10)(A)(i)(IX)” before the comma;

(2) in subsection (b), in the first sentence, by inserting “, (z),” before “and (aa)”;

(3) in subsection (y)—

(A) in paragraph (1)(B)(ii)(II), in the first sentence, by inserting “includes inpatient hospital services,” after “100 percent of the poverty line, that”; and

(B) in paragraph (2)(A), by striking “on the date of enactment of the Patient Protection and Affordable Care Act” and inserting “as of December 1, 2009”;

(4) by inserting after subsection (y) the following:

“(z) **EQUITABLE SUPPORT FOR CERTAIN STATES.**—

“(1)(A) During the period that begins on January 1, 2014, and ends on September 30, 2019, notwithstanding subsection (b), the Federal medical assistance percentage otherwise determined under subsection (b) with respect to a fiscal year occurring during that period shall be increased by 2.2 percentage points for any State described in subparagraph (B) for amounts expended for medical assistance for individuals who are not newly eligible (as defined in subsection (y)(2)) individuals described in subclause (VIII) of section 1902(a)(10)(A)(i).

“(B) For purposes of subparagraph (A), a State described in this subparagraph is a State that—

“(i) is an expansion State described in subsection (y)(1)(B)(ii)(II);

“(ii) the Secretary determines will not receive any payments under this title on the basis of an increased Federal medical assistance percentage under subsection (y) for expenditures for medical assistance for newly eligible individuals (as so defined); and

“(iii) has not been approved by the Secretary to divert a portion of the DSH allotment for a State to the costs of providing medical assistance or other health benefits

coverage under a waiver that is in effect on July 2009.

“(2)(A) During the period that begins on January 1, 2014, and ends on December 31, 2016, notwithstanding subsection (b), the Federal medical assistance percentage otherwise determined under subsection (b) with respect to all or any portion of a fiscal year occurring during that period shall be increased by .5 percentage point for a State described in subparagraph (B) for amounts expended for medical assistance under the State plan under this title or under a waiver of that plan during that period.

“(B) For purposes of subparagraph (A), a State described in this subparagraph is a State that—

“(i) is described in clauses (i) and (ii) of paragraph (1)(B); and

“(ii) is the State with the highest percentage of its population insured during 2008, based on the Current Population Survey.

“(3) Notwithstanding subsection (b) and paragraphs (1) and (2) of this subsection, the Federal medical assistance percentage otherwise determined under subsection (b) with respect to all or any portion of a fiscal year that begins on or after January 1, 2017, for the State of Nebraska, with respect to amounts expended for newly eligible individuals described in subclause (VIII) of section 1902(a)(10)(A)(i), shall be determined as provided for under subsection (y)(1)(A) (notwithstanding the period provided for in such paragraph).

“(4) The increase in the Federal medical assistance percentage for a State under paragraphs (1), (2), or (3) shall apply only for purposes of this title and shall not apply with respect to—

“(A) disproportionate share hospital payments described in section 1923;

“(B) payments under title IV;

“(C) payments under title XXI; and

“(D) payments under this title that are based on the enhanced FMAP described in section 2105(b).”;

(5) in subsection (aa), is amended by striking “without regard to this subsection and subsection (y)” and inserting “without regard to this subsection, subsection (y), subsection (z), and section 10202 of the Patient Protection and Affordable Care Act” each place it appears;

(6) by adding after subsection (bb), the following:

“(cc) **REQUIREMENT FOR CERTAIN STATES.**—Notwithstanding subsections (y), (z), and (aa), in the case of a State that requires political subdivisions within the State to contribute toward the non-Federal share of expenditures required under the State plan under section 1902(a)(2), the State shall not be eligible for an increase in its Federal medical assistance percentage under such subsections if it requires that political subdivisions pay a greater percentage of the non-Federal share of such expenditures, or a greater percentage of the non-Federal share of payments under section 1923, than the respective percentages that would have been required by the State under the State plan under this title, State law, or both, as in effect on December 31, 2009, and without regard to any such increase. Voluntary contributions by a political subdivision to the non-Federal share of expenditures under the State plan under this title or to the non-Federal share of payments under section 1923, shall not be considered to be required contributions for purposes of this subsection. The treatment of voluntary contributions, and the treatment of contributions required by a State under the State plan under this

title, or State law, as provided by this subsection, shall also apply to the increases in the Federal medical assistance percentage under section 5001 of the American Recovery and Reinvestment Act of 2009.”.

(d) Section 1108(g)(4)(B) of the Social Security Act (42 U.S.C. 1308(g)(4)(B)), as added by section 2005(b), is amended by striking “income eligibility level in effect for that population under title XIX or under a waiver” and inserting “the highest income eligibility level in effect for parents under the commonwealth’s or territory’s State plan under title XIX or under a waiver of the plan”.

(e)(1) Section 1923(f) of the Social Security Act (42 U.S.C. 1396r-4(f)), as amended by section 2551, is amended—

(A) in paragraph (6)—

(i) by striking the paragraph heading and inserting the following: “ALLOTMENT ADJUSTMENTS”; and

(ii) in subparagraph (B), by adding at the end the following:

“(iii) ALLOTMENT FOR 2D, 3RD, AND 4TH QUARTER OF FISCAL YEAR 2012, FISCAL YEAR 2013, AND SUCCEEDING FISCAL YEARS.—Notwithstanding the table set forth in paragraph (2) or paragraph (7):

“(I) 2D, 3RD, AND 4TH QUARTER OF FISCAL YEAR 2012.—The DSH allotment for Hawaii for the 2d, 3rd, and 4th quarters of fiscal year 2012 shall be \$7,500,000.

“(II) TREATMENT AS A LOW-DSH STATE FOR FISCAL YEAR 2013 AND SUCCEEDING FISCAL YEARS.—With respect to fiscal year 2013, and each fiscal year thereafter, the DSH allotment for Hawaii shall be increased in the same manner as allotments for low DSH States are increased for such fiscal year under clause (iii) of paragraph (5)(B).

“(III) CERTAIN HOSPITAL PAYMENTS.—The Secretary may not impose a limitation on the total amount of payments made to hospitals under the QUEST section 1115 Demonstration Project except to the extent that such limitation is necessary to ensure that a hospital does not receive payments in excess of the amounts described in subsection (g), or as necessary to ensure that such payments under the waiver and such payments pursuant to the allotment provided in this clause do not, in the aggregate in any year, exceed the amount that the Secretary determines is equal to the Federal medical assistance percentage component attributable to disproportionate share hospital payment adjustments for such year that is reflected in the budget neutrality provision of the QUEST Demonstration Project.”; and

(B) in paragraph (7)—

(i) in subparagraph (A), in the matter preceding clause (i), by striking “subparagraph (E)” and inserting “subparagraphs (E) and (G)”;

(ii) in subparagraph (B)—

(I) in clause (i), by striking subclauses (I) and (II), and inserting the following:

“(I) if the State is a low DSH State described in paragraph (5)(B) and has spent not more than 99.90 percent of the DSH allotments for the State on average for the period of fiscal years 2004 through 2008, as of September 30, 2009, the applicable percentage is equal to 25 percent;

“(II) if the State is a low DSH State described in paragraph (5)(B) and has spent more than 99.90 percent of the DSH allotments for the State on average for the period of fiscal years 2004 through 2008, as of September 30, 2009, the applicable percentage is equal to 17.5 percent;

“(III) if the State is not a low DSH State described in paragraph (5)(B) and has spent not more than 99.90 percent of the DSH allot-

ments for the State on average for the period of fiscal years 2004 through 2008, as of September 30, 2009, the applicable percentage is equal to 50 percent; and

“(IV) if the State is not a low DSH State described in paragraph (5)(B) and has spent more than 99.90 percent of the DSH allotments for the State on average for the period of fiscal years 2004 through 2008, as of September 30, 2009, the applicable percentage is equal to 35 percent.”;

(II) in clause (ii), by striking subclauses (I) and (II), and inserting the following:

“(I) if the State is a low DSH State described in paragraph (5)(B) and has spent not more than 99.90 percent of the DSH allotments for the State on average for the period of fiscal years 2004 through 2008, as of September 30, 2009, the applicable percentage is equal to the product of the percentage reduction in uncovered individuals for the fiscal year from the preceding fiscal year and 27.5 percent;

“(II) if the State is a low DSH State described in paragraph (5)(B) and has spent more than 99.90 percent of the DSH allotments for the State on average for the period of fiscal years 2004 through 2008, as of September 30, 2009, the applicable percentage is equal to the product of the percentage reduction in uncovered individuals for the fiscal year from the preceding fiscal year and 20 percent;

“(III) if the State is not a low DSH State described in paragraph (5)(B) and has spent not more than 99.90 percent of the DSH allotments for the State on average for the period of fiscal years 2004 through 2008, as of September 30, 2009, the applicable percentage is equal to the product of the percentage reduction in uncovered individuals for the fiscal year from the preceding fiscal year and 55 percent; and

“(IV) if the State is not a low DSH State described in paragraph (5)(B) and has spent more than 99.90 percent of the DSH allotments for the State on average for the period of fiscal years 2004 through 2008, as of September 30, 2009, the applicable percentage is equal to the product of the percentage reduction in uncovered individuals for the fiscal year from the preceding fiscal year and 40 percent.”;

(III) in subparagraph (E), by striking “35 percent” and inserting “50 percent”; and

(IV) by adding at the end the following:

“(G) NONAPPLICATION.—The preceding provisions of this paragraph shall not apply to the DSH allotment determined for the State of Hawaii for a fiscal year under paragraph (6).”.

(f) Section 2551 of this Act is amended by striking subsection (b).

(g) Section 2105(d)(3)(B) of the Social Security Act (42 U.S.C. 1397ee(d)(3)(B)), as added by section 2101(b)(1), is amended by adding at the end the following: “For purposes of eligibility for premium assistance for the purchase of a qualified health plan under section 36B of the Internal Revenue Code of 1986 and reduced cost-sharing under section 1402 of the Patient Protection and Affordable Care Act, children described in the preceding sentence shall be deemed to be ineligible for coverage under the State child health plan.”.

(h) Clause (i) of subparagraph (C) of section 513(b)(2) of the Social Security Act, as added by section 2953 of this Act, is amended to read as follows:

“(i) Healthy relationships, including marriage and family interactions.”.

(i) Section 1115 of the Social Security Act (42 U.S.C. 1315) is amended by inserting after subsection (c) the following:

“(d)(1) An application or renewal of any experimental, pilot, or demonstration project undertaken under subsection (a) to promote the objectives of title XIX or XXI in a State that would result in an impact on eligibility, enrollment, benefits, cost-sharing, or financing with respect to a State program under title XIX or XXI (in this subsection referred to as a ‘demonstration project’) shall be considered by the Secretary in accordance with the regulations required to be promulgated under paragraph (2).

“(2) Not later than 180 days after the date of enactment of this subsection, the Secretary shall promulgate regulations relating to applications for, and renewals of, a demonstration project that provide for—

“(A) a process for public notice and comment at the State level, including public hearings, sufficient to ensure a meaningful level of public input;

“(B) requirements relating to—

“(i) the goals of the program to be implemented or renewed under the demonstration project;

“(ii) the expected State and Federal costs and coverage projections of the demonstration project; and

“(iii) the specific plans of the State to ensure that the demonstration project will be in compliance with title XIX or XXI;

“(C) a process for providing public notice and comment after the application is received by the Secretary, that is sufficient to ensure a meaningful level of public input;

“(D) a process for the submission to the Secretary of periodic reports by the State concerning the implementation of the demonstration project; and

“(E) a process for the periodic evaluation by the Secretary of the demonstration project.

“(3) The Secretary shall annually report to Congress concerning actions taken by the Secretary with respect to applications for demonstration projects under this section.”.

(j) Subtitle F of title III of this Act is amended by adding at the end the following: **“SEC. 3512. GAO STUDY AND REPORT ON CAUSES OF ACTION.**

“(a) STUDY.—

“(1) IN GENERAL.—The Comptroller General of the United States shall conduct a study of whether the development, recognition, or implementation of any guideline or other standards under a provision described in paragraph (2) would result in the establishment of a new cause of action or claim.

“(2) PROVISIONS DESCRIBED.—The provisions described in this paragraph include the following:

“(A) Section 2701 (adult health quality measures).

“(B) Section 2702 (payment adjustments for health care acquired conditions).

“(C) Section 3001 (Hospital Value-Based Purchase Program).

“(D) Section 3002 (improvements to the Physician Quality Reporting Initiative).

“(E) Section 3003 (improvements to the Physician Feedback Program).

“(F) Section 3007 (value based payment modifier under physician fee schedule).

“(G) Section 3008 (payment adjustment for conditions acquired in hospitals).

“(H) Section 3013 (quality measure development).

“(I) Section 3014 (quality measurement).

“(J) Section 3021 (Establishment of Center for Medicare and Medicaid Innovation).

“(K) Section 3025 (hospital readmission reduction program).

“(L) Section 3501 (health care delivery system research, quality improvement).

“(M) Section 4003 (Task Force on Clinical and Preventive Services).

“(N) Section 4301 (research to optimize delivery of public health services).

“(b) REPORT.—Not later than 2 years after the date of enactment of this Act, the Comptroller General of the United States shall submit to the appropriate committees of Congress, a report containing the findings made by the Comptroller General under the study under subsection (a).”.

SEC. 10202. INCENTIVES FOR STATES TO OFFER HOME AND COMMUNITY-BASED SERVICES AS A LONG-TERM CARE ALTERNATIVE TO NURSING HOMES.

(a) **STATE BALANCING INCENTIVE PAYMENTS PROGRAM.**—Notwithstanding section 1905(b) of the Social Security Act (42 U.S.C. 1396d(b)), in the case of a balancing incentive payment State, as defined in subsection (b), that meets the conditions described in subsection (c), during the balancing incentive period, the Federal medical assistance percentage determined for the State under section 1905(b) of such Act and, if applicable, increased under subsection (z) or (aa) shall be increased by the applicable percentage points determined under subsection (d) with respect to eligible medical assistance expenditures described in subsection (e).

(b) **BALANCING INCENTIVE PAYMENT STATE.**—A balancing incentive payment State is a State—

(1) in which less than 50 percent of the total expenditures for medical assistance under the State Medicaid program for a fiscal year for long-term services and supports (as defined by the Secretary under subsection (f)(1)) are for non-institutionally-based long-term services and supports described in subsection (f)(1)(B);

(2) that submits an application and meets the conditions described in subsection (c); and

(3) that is selected by the Secretary to participate in the State balancing incentive payment program established under this section.

(c) **CONDITIONS.**—The conditions described in this subsection are the following:

(1) **APPLICATION.**—The State submits an application to the Secretary that includes, in addition to such other information as the Secretary shall require—

(A) a proposed budget that details the State's plan to expand and diversify medical assistance for non-institutionally-based long-term services and supports described in subsection (f)(1)(B) under the State Medicaid program during the balancing incentive period and achieve the target spending percentage applicable to the State under paragraph (2), including through structural changes to how the State furnishes such assistance, such as through the establishment of a “no wrong door - single entry point system”, optional presumptive eligibility, case management services, and the use of core standardized assessment instruments, and that includes a description of the new or expanded offerings of such services that the State will provide and the projected costs of such services; and

(B) in the case of a State that proposes to expand the provision of home and community-based services under its State Medicaid program through a State plan amendment under section 1915(i) of the Social Security Act, at the option of the State, an election to increase the income eligibility for such services from 150 percent of the poverty line to such higher percentage as the State may establish for such purpose, not to exceed 300 percent of the supplemental security income benefit rate established by section 1611(b)(1)

of the Social Security Act (42 U.S.C. 1382(b)(1)).

(2) **TARGET SPENDING PERCENTAGES.**—

(A) In the case of a balancing incentive payment State in which less than 25 percent of the total expenditures for long-term services and supports under the State Medicaid program for fiscal year 2009 are for home and community-based services, the target spending percentage for the State to achieve by not later than October 1, 2015, is that 25 percent of the total expenditures for long-term services and supports under the State Medicaid program are for home and community-based services.

(B) In the case of any other balancing incentive payment State, the target spending percentage for the State to achieve by not later than October 1, 2015, is that 50 percent of the total expenditures for long-term services and supports under the State Medicaid program are for home and community-based services.

(3) **MAINTENANCE OF ELIGIBILITY REQUIREMENTS.**—The State does not apply eligibility standards, methodologies, or procedures for determining eligibility for medical assistance for non-institutionally-based long-term services and supports described in subsection (f)(1)(B) under the State Medicaid program that are more restrictive than the eligibility standards, methodologies, or procedures in effect for such purposes on December 31, 2010.

(4) **USE OF ADDITIONAL FUNDS.**—The State agrees to use the additional Federal funds paid to the State as a result of this section only for purposes of providing new or expanded offerings of non-institutionally-based long-term services and supports described in subsection (f)(1)(B) under the State Medicaid program.

(5) **STRUCTURAL CHANGES.**—The State agrees to make, not later than the end of the 6-month period that begins on the date the State submits an application under this section, the following changes:

(A) **“NO WRONG DOOR - SINGLE ENTRY POINT SYSTEM”.**—Development of a statewide system to enable consumers to access all long-term services and supports through an agency, organization, coordinated network, or portal, in accordance with such standards as the State shall establish and that shall provide information regarding the availability of such services, how to apply for such services, referral services for services and supports otherwise available in the community, and determinations of financial and functional eligibility for such services and supports, or assistance with assessment processes for financial and functional eligibility.

(B) **CONFLICT-FREE CASE MANAGEMENT SERVICES.**—Conflict-free case management services to develop a service plan, arrange for services and supports, support the beneficiary (and, if appropriate, the beneficiary's caregivers) in directing the provision of services and supports for the beneficiary, and conduct ongoing monitoring to assure that services and supports are delivered to meet the beneficiary's needs and achieve intended outcomes.

(C) **CORE STANDARDIZED ASSESSMENT INSTRUMENTS.**—Development of core standardized assessment instruments for determining eligibility for non-institutionally-based long-term services and supports described in subsection (f)(1)(B), which shall be used in a uniform manner throughout the State, to determine a beneficiary's needs for training, support services, medical care, transportation, and other services, and develop an individual service plan to address such needs.

(6) **DATA COLLECTION.**—The State agrees to collect from providers of services and

through such other means as the State determines appropriate the following data:

(A) **SERVICES DATA.**—Services data from providers of non-institutionally-based long-term services and supports described in subsection (f)(1)(B) on a per-beneficiary basis and in accordance with such standardized coding procedures as the State shall establish in consultation with the Secretary.

(B) **QUALITY DATA.**—Quality data on a selected set of core quality measures agreed upon by the Secretary and the State that are linked to population-specific outcomes measures and accessible to providers.

(C) **OUTCOMES MEASURES.**—Outcomes measures data on a selected set of core population-specific outcomes measures agreed upon by the Secretary and the State that are accessible to providers and include—

(i) measures of beneficiary and family caregiver experience with providers;

(ii) measures of beneficiary and family caregiver satisfaction with services; and

(iii) measures for achieving desired outcomes appropriate to a specific beneficiary, including employment, participation in community life, health stability, and prevention of loss in function.

(d) **APPLICABLE PERCENTAGE POINTS INCREASE IN FMAP.**—The applicable percentage points increase is—

(1) in the case of a balancing incentive payment State subject to the target spending percentage described in subsection (c)(2)(A), 5 percentage points; and

(2) in the case of any other balancing incentive payment State, 2 percentage points.

(e) **ELIGIBLE MEDICAL ASSISTANCE EXPENDITURES.**—

(1) **IN GENERAL.**—Subject to paragraph (2), medical assistance described in this subsection is medical assistance for non-institutionally-based long-term services and supports described in subsection (f)(1)(B) that is provided by a balancing incentive payment State under its State Medicaid program during the balancing incentive payment period.

(2) **LIMITATION ON PAYMENTS.**—In no case may the aggregate amount of payments made by the Secretary to balancing incentive payment States under this section during the balancing incentive period exceed \$3,000,000,000.

(f) **DEFINITIONS.**—In this section:

(1) **LONG-TERM SERVICES AND SUPPORTS DEFINED.**—The term “long-term services and supports” has the meaning given that term by Secretary and may include any of the following (as defined for purposes of State Medicaid programs):

(A) **INSTITUTIONALLY-BASED LONG-TERM SERVICES AND SUPPORTS.**—Services provided in an institution, including the following:

(i) Nursing facility services.

(ii) Services in an intermediate care facility for the mentally retarded described in subsection (a)(15) of section 1905 of such Act.

(B) **NON-INSTITUTIONALLY-BASED LONG-TERM SERVICES AND SUPPORTS.**—Services not provided in an institution, including the following:

(i) Home and community-based services provided under subsection (c), (d), or (i) of section 1915 of such Act or under a waiver under section 1115 of such Act.

(ii) Home health care services.

(iii) Personal care services.

(iv) Services described in subsection (a)(26) of section 1905 of such Act (relating to PACE program services).

(v) Self-directed personal assistance services described in section 1915(j) of such Act.

(2) **BALANCING INCENTIVE PERIOD.**—The term “balancing incentive period” means the period that begins on October 1, 2011, and ends on September 30, 2015.

(3) **POVERTY LINE.**—The term “poverty line” has the meaning given that term in section 2110(c)(5) of the Social Security Act (42 U.S.C. 1397jj(c)(5)).

(4) **STATE MEDICAID PROGRAM.**—The term “State Medicaid program” means the State program for medical assistance provided under a State plan under title XIX of the Social Security Act and under any waiver approved with respect to such State plan.

SEC. 10203. EXTENSION OF FUNDING FOR CHIP THROUGH FISCAL YEAR 2015 AND OTHER CHIP-RELATED PROVISIONS.

(a) Section 1311(c)(1) of this Act is amended by striking “and” at the end of subparagraph (G), by striking the period at the end of subparagraph (H) and inserting “; and”, and by adding at the end the following:

“(I) report to the Secretary at least annually and in such manner as the Secretary shall require, pediatric quality reporting measures consistent with the pediatric quality reporting measures established under section 1139A of the Social Security Act.”.

(b) Effective as if included in the enactment of the Children’s Health Insurance Program Reauthorization Act of 2009 (Public Law 111–3):

(1) Section 1906(e)(2) of the Social Security Act (42 U.S.C. 1396e(e)(2)) is amended by striking “means” and all that follows through the period and inserting “has the meaning given that term in section 2105(c)(3)(A).”.

(2)(A) Section 1906A(a) of the Social Security Act (42 U.S.C. 1396e–1(a)), is amended by inserting before the period the following: “and the offering of such a subsidy is cost-effective, as defined for purposes of section 2105(c)(3)(A).”.

(B) This Act shall be applied without regard to subparagraph (A) of section 2003(a)(1) of this Act and that subparagraph and the amendment made by that subparagraph are hereby deemed null, void, and of no effect.

(3) Section 2105(c)(10) of the Social Security Act (42 U.S.C. 1397ee(c)(10)) is amended—

(A) in subparagraph (A), in the first sentence, by inserting before the period the following: “if the offering of such a subsidy is cost-effective, as defined for purposes of paragraph (3)(A)”;

(B) by striking subparagraph (M); and

(C) by redesignating subparagraph (N) as subparagraph (M).

(4) Section 2105(c)(3)(A) of the Social Security Act (42 U.S.C. 1397ee(c)(3)(A)) is amended—

(A) in the matter preceding clause (i), by striking “to” and inserting “to—”; and

(B) in clause (ii), by striking the period and inserting a semicolon.

(c) Section 2105 of the Social Security Act (42 U.S.C. 1397ee), as amended by section 2101, is amended—

(1) in subsection (b), in the second sentence, by striking “2013” and inserting “2015”; and

(2) in subsection (d)(3)—

(A) in subparagraph (A)—

(i) in the first sentence, by inserting “as a condition of receiving payments under section 1903(a),” after “2019,”;

(ii) in clause (i), by striking “or” at the end;

(iii) by redesignating clause (ii) as clause (iii); and

(iv) by inserting after clause (i), the following:

“(ii) after September 30, 2015, enrolling children eligible to be targeted low-income

children under the State child health plan in a qualified health plan that has been certified by the Secretary under subparagraph (C); or”;

(B) in subparagraph (B), by striking “provided coverage” and inserting “screened for eligibility for medical assistance under the State plan under title XIX or a waiver of that plan and, if found eligible, enrolled in such plan or a waiver. In the case of such children who, as a result of such screening, are determined to not be eligible for medical assistance under the State plan or a waiver under title XIX, the State shall establish procedures to ensure that the children are enrolled in a qualified health plan that has been certified by the Secretary under subparagraph (C) and is offered”; and

(C) by adding at the end the following:

“(C) **CERTIFICATION OF COMPARABILITY OF PEDIATRIC COVERAGE OFFERED BY QUALIFIED HEALTH PLANS.**—With respect to each State, the Secretary, not later than April 1, 2015, shall review the benefits offered for children and the cost-sharing imposed with respect to such benefits by qualified health plans offered through an Exchange established by the State under section 1311 of the Patient Protection and Affordable Care Act and shall certify those plans that offer benefits for children and impose cost-sharing with respect to such benefits that the Secretary determines are at least comparable to the benefits offered and cost-sharing protections provided under the State child health plan.”.

(d)(1) Section 2104(a) of such Act (42 U.S.C. 1397dd(a)) is amended—

(A) in paragraph (15), by striking “and” at the end; and

(B) by striking paragraph (16) and inserting the following:

“(16) for fiscal year 2013, \$17,406,000,000;

“(17) for fiscal year 2014, \$19,147,000,000; and

“(18) for fiscal year 2015, for purposes of making 2 semi-annual allotments—

“(A) \$2,850,000,000 for the period beginning on October 1, 2014, and ending on March 31, 2015, and

“(B) \$2,850,000,000 for the period beginning on April 1, 2015, and ending on September 30, 2015.”.

(2)(A) Section 2104(m) of such Act (42 U.S.C. 1397dd(m)), as amended by section 2102(a)(1), is amended—

(i) in the subsection heading, by striking “2013” and inserting “2015”; and

(ii) in paragraph (2)—

(I) in the paragraph heading, by striking “2012” and inserting “2014”; and

(II) by adding at the end the following:

“(B) **FISCAL YEARS 2013 AND 2014.**—Subject to paragraphs (4) and (6), from the amount made available under paragraphs (16) and (17) of subsection (a) for fiscal years 2013 and 2014, respectively, the Secretary shall compute a State allotment for each State (including the District of Columbia and each commonwealth and territory) for each such fiscal year as follows:

“(i) **REBASING IN FISCAL YEAR 2013.**—For fiscal year 2013, the allotment of the State is equal to the Federal payments to the State that are attributable to (and countable towards) the total amount of allotments available under this section to the State in fiscal year 2012 (including payments made to the State under subsection (n) for fiscal year 2012 as well as amounts redistributed to the State in fiscal year 2012), multiplied by the allotment increase factor under paragraph (5) for fiscal year 2013.

“(ii) **GROWTH FACTOR UPDATE FOR FISCAL YEAR 2014.**—For fiscal year 2014, the allotment of the State is equal to the sum of—

“(I) the amount of the State allotment under clause (i) for fiscal year 2013; and

“(II) the amount of any payments made to the State under subsection (n) for fiscal year 2013,

multiplied by the allotment increase factor under paragraph (5) for fiscal year 2014.”;

(iii) in paragraph (3)—

(I) in the paragraph heading, by striking “2013” and inserting “2015”; and

(II) in subparagraphs (A) and (B), by striking “paragraph (16)” each place it appears and inserting “paragraph (18)”;

(III) in subparagraph (C)—

(aa) by striking “2012” each place it appears and inserting “2014”; and

(bb) by striking “2013” and inserting “2015”; and

(IV) in subparagraph (D)—

(aa) in clause (i)(I), by striking “subsection (a)(16)(A)” and inserting “subsection (a)(18)(A)”; and

(bb) in clause (ii)(II), by striking “subsection (a)(16)(B)” and inserting “subsection (a)(18)(B)”;

(iv) in paragraph (4), by striking “2013” and inserting “2015”; and

(v) in paragraph (6)—

(I) in subparagraph (A), by striking “2013” and inserting “2015”; and

(II) in the flush language after and below subparagraph (B)(ii), by striking “or fiscal year 2012” and inserting “, fiscal year 2012, or fiscal year 2014”; and

(vi) in paragraph (8)—

(I) in the paragraph heading, by striking “2013” and inserting “2015”; and

(II) by striking “2013” and inserting “2015”.

(B) Section 2104(n) of such Act (42 U.S.C. 1397dd(n)) is amended—

(i) in paragraph (2)—

(I) in subparagraph (A)(ii)—

(aa) by striking “2012” and inserting “2014”; and

(bb) by striking “2013” and inserting “2015”; and

(II) in subparagraph (B)—

(aa) by striking “2012” and inserting “2014”; and

(bb) by striking “2013” and inserting “2015”; and

(ii) in paragraph (3)(A), by striking “or a semi-annual allotment period for fiscal year 2013” and inserting “fiscal year 2013, fiscal year 2014, or a semi-annual allotment period for fiscal year 2015”.

(C) Section 2105(g)(4) of such Act (42 U.S.C. 1397ee(g)(4)) is amended—

(i) in the paragraph heading, by striking “2013” and inserting “2015”; and

(ii) in subparagraph (A), by striking “2013” and inserting “2015”.

(D) Section 2110(b) of such Act (42 U.S.C. 1397jj(b)) is amended—

(i) in paragraph (2)(B), by inserting “except as provided in paragraph (6),” before “a child”; and

(ii) by adding at the end the following new paragraph:

“(6) **EXCEPTIONS TO EXCLUSION OF CHILDREN OF EMPLOYEES OF A PUBLIC AGENCY IN THE STATE.**—

“(A) **IN GENERAL.**—A child shall not be considered to be described in paragraph (2)(B) if—

“(i) the public agency that employs a member of the child’s family to which such paragraph applies satisfies subparagraph (B); or

“(ii) subparagraph (C) applies to such child.

“(B) **MAINTENANCE OF EFFORT WITH RESPECT TO PER PERSON AGENCY CONTRIBUTION FOR FAMILY COVERAGE.**—For purposes of subparagraph (A)(i), a public agency satisfies this

subparagraph if the amount of annual agency expenditures made on behalf of each employee enrolled in health coverage paid for by the agency that includes dependent coverage for the most recent State fiscal year is not less than the amount of such expenditures made by the agency for the 1997 State fiscal year, increased by the percentage increase in the medical care expenditure category of the Consumer Price Index for All-Urban Consumers (all items: U.S. City Average) for such preceding fiscal year.

“(C) **HARDSHIP EXCEPTION.**—For purposes of subparagraph (A)(ii), this subparagraph applies to a child if the State determines, on a case-by-case basis, that the annual aggregate amount of premiums and cost-sharing imposed for coverage of the family of the child would exceed 5 percent of such family’s income for the year involved.”.

(E) Section 2113 of such Act (42 U.S.C. 1397mm) is amended—

(i) in subsection (a)(1), by striking “2013” and inserting “2015”; and

(ii) in subsection (g), by striking “\$100,000,000 for the period of fiscal years 2009 through 2013” and inserting “\$140,000,000 for the period of fiscal years 2009 through 2015”.

(F) Section 108 of Public Law 111-3 is amended by striking “\$11,706,000,000” and all that follows through the second sentence and inserting “\$15,361,000,000 to accompany the allotment made for the period beginning on October 1, 2014, and ending on March 31, 2015, under section 2104(a)(18)(A) of the Social Security Act (42 U.S.C. 1397dd(a)(18)(A)), to remain available until expended. Such amount shall be used to provide allotments to States under paragraph (3) of section 2104(m) of the Social Security Act (42 U.S.C. 1397dd(m)) for the first 6 months of fiscal year 2015 in the same manner as allotments are provided under subsection (a)(18)(A) of such section 2104 and subject to the same terms and conditions as apply to the allotments provided from such subsection (a)(18)(A).”.

PART II—SUPPORT FOR PREGNANT AND PARENTING TEENS AND WOMEN

SEC. 10211. DEFINITIONS.

In this part:

(1) **ACCOMPANIMENT.**—The term “accompaniment” means assisting, representing, and accompanying a woman in seeking judicial relief for child support, child custody, restraining orders, and restitution for harm to persons and property, and in filing criminal charges, and may include the payment of court costs and reasonable attorney and witness fees associated therewith.

(2) **ELIGIBLE INSTITUTION OF HIGHER EDUCATION.**—The term “eligible institution of higher education” means an institution of higher education (as such term is defined in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001)) that has established and operates, or agrees to establish and operate upon the receipt of a grant under this part, a pregnant and parenting student services office.

(3) **COMMUNITY SERVICE CENTER.**—The term “community service center” means a nonprofit organization that provides social services to residents of a specific geographical area via direct service or by contract with a local governmental agency.

(4) **HIGH SCHOOL.**—The term “high school” means any public or private school that operates grades 10 through 12, inclusive, grades 9 through 12, inclusive or grades 7 through 12, inclusive.

(5) **INTERVENTION SERVICES.**—The term “intervention services” means, with respect to domestic violence, sexual violence, sexual assault, or stalking, 24-hour telephone hot-

line services for police protection and referral to shelters.

(6) **SECRETARY.**—The term “Secretary” means the Secretary of Health and Human Services.

(7) **STATE.**—The term “State” includes the District of Columbia, any commonwealth, possession, or other territory of the United States, and any Indian tribe or reservation.

(8) **SUPPORTIVE SOCIAL SERVICES.**—The term “supportive social services” means transitional and permanent housing, vocational counseling, and individual and group counseling aimed at preventing domestic violence, sexual violence, sexual assault, or stalking.

(9) **VIOLENCE.**—The term “violence” means actual violence and the risk or threat of violence.

SEC. 10212. ESTABLISHMENT OF PREGNANCY ASSISTANCE FUND.

(a) **IN GENERAL.**—The Secretary, in collaboration and coordination with the Secretary of Education (as appropriate), shall establish a Pregnancy Assistance Fund to be administered by the Secretary, for the purpose of awarding competitive grants to States to assist pregnant and parenting teens and women.

(b) **USE OF FUND.**—A State may apply for a grant under subsection (a) to carry out any activities provided for in section 10213.

(c) **APPLICATIONS.**—To be eligible to receive a grant under subsection (a), a State shall submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a description of the purposes for which the grant is being requested and the designation of a State agency for receipt and administration of funding received under this part.

SEC. 10213. PERMISSIBLE USES OF FUND.

(a) **IN GENERAL.**—A State shall use amounts received under a grant under section 10212 for the purposes described in this section to assist pregnant and parenting teens and women.

(b) **INSTITUTIONS OF HIGHER EDUCATION.**—

(1) **IN GENERAL.**—A State may use amounts received under a grant under section 10212 to make funding available to eligible institutions of higher education to enable the eligible institutions to establish, maintain, or operate pregnant and parenting student services. Such funding shall be used to supplement, not supplant, existing funding for such services.

(2) **APPLICATION.**—An eligible institution of higher education that desires to receive funding under this subsection shall submit an application to the designated State agency at such time, in such manner, and containing such information as the State agency may require.

(3) **MATCHING REQUIREMENT.**—An eligible institution of higher education that receives funding under this subsection shall contribute to the conduct of the pregnant and parenting student services office supported by the funding an amount from non-Federal funds equal to 25 percent of the amount of the funding provided. The non-Federal share may be in cash or in-kind, fairly evaluated, including services, facilities, supplies, or equipment.

(4) **USE OF FUNDS FOR ASSISTING PREGNANT AND PARENTING COLLEGE STUDENTS.**—An eligible institution of higher education that receives funding under this subsection shall use such funds to establish, maintain or operate pregnant and parenting student services and may use such funding for the following programs and activities:

(A) Conduct a needs assessment on campus and within the local community—

(i) to assess pregnancy and parenting resources, located on the campus or within the local community, that are available to meet the needs described in subparagraph (B); and

(ii) to set goals for—

(I) improving such resources for pregnant, parenting, and prospective parenting students; and

(II) improving access to such resources.

(B) Annually assess the performance of the eligible institution in meeting the following needs of students enrolled in the eligible institution who are pregnant or are parents:

(i) The inclusion of maternity coverage and the availability of riders for additional family members in student health care.

(ii) Family housing.

(iii) Child care.

(iv) Flexible or alternative academic scheduling, such as telecommuting programs, to enable pregnant or parenting students to continue their education or stay in school.

(v) Education to improve parenting skills for mothers and fathers and to strengthen marriages.

(vi) Maternity and baby clothing, baby food (including formula), baby furniture, and similar items to assist parents and prospective parents in meeting the material needs of their children.

(vii) Post-partum counseling.

(C) Identify public and private service providers, located on the campus of the eligible institution or within the local community, that are qualified to meet the needs described in subparagraph (B), and establishes programs with qualified providers to meet such needs.

(D) Assist pregnant and parenting students, fathers or spouses in locating and obtaining services that meet the needs described in subparagraph (B).

(E) If appropriate, provide referrals for prenatal care and delivery, infant or foster care, or adoption, to a student who requests such information. An office shall make such referrals only to service providers that serve the following types of individuals:

(i) Parents.

(ii) Prospective parents awaiting adoption.

(iii) Women who are pregnant and plan on parenting or placing the child for adoption.

(iv) Parenting or prospective parenting couples.

(5) **REPORTING.**—

(A) **ANNUAL REPORT BY INSTITUTIONS.**—

(i) **IN GENERAL.**—For each fiscal year that an eligible institution of higher education receives funds under this subsection, the eligible institution shall prepare and submit to the State, by the date determined by the State, a report that—

(I) itemizes the pregnant and parenting student services office’s expenditures for the fiscal year;

(II) contains a review and evaluation of the performance of the office in fulfilling the requirements of this section, using the specific performance criteria or standards established under subparagraph (B)(i); and

(III) describes the achievement of the office in meeting the needs listed in paragraph (4)(B) of the students served by the eligible institution, and the frequency of use of the office by such students.

(ii) **PERFORMANCE CRITERIA.**—Not later than 180 days before the date the annual report described in clause (i) is submitted, the State—

(I) shall identify the specific performance criteria or standards that shall be used to prepare the report; and

(II) may establish the form or format of the report.

(B) **REPORT BY STATE.**—The State shall annually prepare and submit a report on the findings under this subsection, including the number of eligible institutions of higher education that were awarded funds and the number of students served by each pregnant and parenting student services office receiving funds under this section, to the Secretary.

(C) **SUPPORT FOR PREGNANT AND PARENTING TEENS.**—A State may use amounts received under a grant under section 10212 to make funding available to eligible high schools and community service centers to establish, maintain or operate pregnant and parenting services in the same general manner and in accordance with all conditions and requirements described in subsection (b), except that paragraph (3) of such subsection shall not apply for purposes of this subsection.

(D) **IMPROVING SERVICES FOR PREGNANT WOMEN WHO ARE VICTIMS OF DOMESTIC VIOLENCE, SEXUAL VIOLENCE, SEXUAL ASSAULT, AND STALKING.**—

(1) **IN GENERAL.**—A State may use amounts received under a grant under section 10212 to make funding available to its State Attorney General to assist Statewide offices in providing—

(A) intervention services, accompaniment, and supportive social services for eligible pregnant women who are victims of domestic violence, sexual violence, sexual assault, or stalking.

(B) technical assistance and training (as described in subsection (c)) relating to violence against eligible pregnant women to be made available to the following:

(i) Federal, State, tribal, territorial, and local governments, law enforcement agencies, and courts.

(ii) Professionals working in legal, social service, and health care settings.

(iii) Nonprofit organizations.

(iv) Faith-based organizations.

(2) **ELIGIBILITY.**—To be eligible for a grant under paragraph (1), a State Attorney General shall submit an application to the designated State agency at such time, in such manner, and containing such information, as specified by the State.

(3) **TECHNICAL ASSISTANCE AND TRAINING DESCRIBED.**—For purposes of paragraph (1)(B), technical assistance and training is—

(A) the identification of eligible pregnant women experiencing domestic violence, sexual violence, sexual assault, or stalking;

(B) the assessment of the immediate and short-term safety of such a pregnant woman, the evaluation of the impact of the violence or stalking on the pregnant woman's health, and the assistance of the pregnant woman in developing a plan aimed at preventing further domestic violence, sexual violence, sexual assault, or stalking, as appropriate;

(C) the maintenance of complete medical or forensic records that include the documentation of any examination, treatment given, and referrals made, recording the location and nature of the pregnant woman's injuries, and the establishment of mechanisms to ensure the privacy and confidentiality of those medical records; and

(D) the identification and referral of the pregnant woman to appropriate public and private nonprofit entities that provide intervention services, accompaniment, and supportive social services.

(4) **ELIGIBLE PREGNANT WOMAN.**—In this subsection, the term "eligible pregnant woman" means any woman who is pregnant on the date on which such woman becomes a victim of domestic violence, sexual violence,

sexual assault, or stalking or who was pregnant during the one-year period before such date.

(E) **PUBLIC AWARENESS AND EDUCATION.**—A State may use amounts received under a grant under section 10212 to make funding available to increase public awareness and education concerning any services available to pregnant and parenting teens and women under this part, or any other resources available to pregnant and parenting women in keeping with the intent and purposes of this part. The State shall be responsible for setting guidelines or limits as to how much of funding may be utilized for public awareness and education in any funding award.

SEC. 10214. APPROPRIATIONS.

There is authorized to be appropriated, and there are appropriated, \$25,000,000 for each of fiscal years 2010 through 2019, to carry out this part.

PART III—INDIAN HEALTH CARE IMPROVEMENT

SEC. 10221. INDIAN HEALTH CARE IMPROVEMENT.

(A) **IN GENERAL.**—Except as provided in subsection (b), S. 1790 entitled "A bill to amend the Indian Health Care Improvement Act to revise and extend that Act, and for other purposes," as reported by the Committee on Indian Affairs of the Senate in December 2009, is enacted into law.

(B) **AMENDMENTS.**—

(1) Section 119 of the Indian Health Care Improvement Act (as amended by section 111 of the bill referred to in subsection (a)) is amended—

(A) in subsection (d)—

(i) in paragraph (2), by striking "In establishing" and inserting "Subject to paragraphs (3) and (4), in establishing"; and

(ii) by adding at the end the following:

"(3) **ELECTION OF INDIAN TRIBE OR TRIBAL ORGANIZATION.**—

"(A) **IN GENERAL.**—Subparagraph (B) of paragraph (2) shall not apply in the case of an election made by an Indian tribe or tribal organization located in a State (other than Alaska) in which the use of dental health aide therapist services or midlevel dental health provider services is authorized under State law to supply such services in accordance with State law.

"(B) **ACTION BY SECRETARY.**—On an election by an Indian tribe or tribal organization under subparagraph (A), the Secretary, acting through the Service, shall facilitate implementation of the services elected.

"(4) **VACANCIES.**—The Secretary shall not fill any vacancy for a certified dentist in a program operated by the Service with a dental health aide therapist.";

(B) by adding at the end the following:

"(e) **EFFECT OF SECTION.**—Nothing in this section shall restrict the ability of the Service, an Indian tribe, or a tribal organization to participate in any program or to provide any service authorized by any other Federal law."

(2) The Indian Health Care Improvement Act (as amended by section 134(b) of the bill referred to in subsection (a)) is amended by striking section 125 (relating to treatment of scholarships for certain purposes).

(3) Section 806 of the Indian Health Care Improvement Act (25 U.S.C. 1676) is amended—

(A) by striking "Any limitation" and inserting the following:

"(a) **HHS APPROPRIATIONS.**—Any limitation"; and

(B) by adding at the end the following:

"(b) **LIMITATIONS PURSUANT TO OTHER FEDERAL LAW.**—Any limitation pursuant to

other Federal laws on the use of Federal funds appropriated to the Service shall apply with respect to the performance or coverage of abortions."

(4) The bill referred to in subsection (a) is amended by striking section 201.

Subtitle C—Provisions Relating to Title III

SEC. 10301. PLANS FOR A VALUE-BASED PURCHASING PROGRAM FOR AMBULATORY SURGICAL CENTERS.

(A) **IN GENERAL.**—Section 3006 is amended by adding at the end the following new subsection:

"(f) **AMBULATORY SURGICAL CENTERS.**—

"(1) **IN GENERAL.**—The Secretary shall develop a plan to implement a value-based purchasing program for payments under the Medicare program under title XVIII of the Social Security Act for ambulatory surgical centers (as described in section 1833(i) of the Social Security Act (42 U.S.C. 1395l(i))).

"(2) **DETAILS.**—In developing the plan under paragraph (1), the Secretary shall consider the following issues:

"(A) The ongoing development, selection, and modification process for measures (including under section 1890 of the Social Security Act (42 U.S.C. 1395aaa) and section 1890A of such Act, as added by section 3014), to the extent feasible and practicable, of all dimensions of quality and efficiency in ambulatory surgical centers.

"(B) The reporting, collection, and validation of quality data.

"(C) The structure of value-based payment adjustments, including the determination of thresholds or improvements in quality that would substantiate a payment adjustment, the size of such payments, and the sources of funding for the value-based bonus payments.

"(D) Methods for the public disclosure of information on the performance of ambulatory surgical centers.

"(E) Any other issues determined appropriate by the Secretary.

"(3) **CONSULTATION.**—In developing the plan under paragraph (1), the Secretary shall—

"(A) consult with relevant affected parties; and

"(B) consider experience with such demonstrations that the Secretary determines are relevant to the value-based purchasing program described in paragraph (1).

"(4) **REPORT TO CONGRESS.**—Not later than January 1, 2011, the Secretary shall submit to Congress a report containing the plan developed under paragraph (1)."

(B) **TECHNICAL.**—Section 3006(a)(2)(A) is amended by striking clauses (i) and (ii).

SEC. 10302. REVISION TO NATIONAL STRATEGY FOR QUALITY IMPROVEMENT IN HEALTH CARE.

Section 399HH(a)(2)(B)(iii) of the Public Health Service Act, as added by section 3011, is amended by inserting "(taking into consideration the limitations set forth in subsections (c) and (d) of section 1182 of the Social Security Act)" after "information".

SEC. 10303. DEVELOPMENT OF OUTCOME MEASURES.

(A) **DEVELOPMENT.**—Section 931 of the Public Health Service Act, as added by section 3013(a), is amended by adding at the end the following new subsection:

"(f) **DEVELOPMENT OF OUTCOME MEASURES.**—

"(1) **IN GENERAL.**—The Secretary shall develop, and periodically update (not less than every 3 years), provider-level outcome measures for hospitals and physicians, as well as other providers as determined appropriate by the Secretary.

"(2) **CATEGORIES OF MEASURES.**—The measures developed under this subsection shall

include, to the extent determined appropriate by the Secretary—

“(A) outcome measurement for acute and chronic diseases, including, to the extent feasible, the 5 most prevalent and resource-intensive acute and chronic medical conditions; and

“(B) outcome measurement for primary and preventative care, including, to the extent feasible, measurements that cover provision of such care for distinct patient populations (such as healthy children, chronically ill adults, or infirm elderly individuals).

“(3) GOALS.—In developing such measures, the Secretary shall seek to—

“(A) address issues regarding risk adjustment, accountability, and sample size;

“(B) include the full scope of services that comprise a cycle of care; and

“(C) include multiple dimensions.

“(4) TIMEFRAME.—

“(A) ACUTE AND CHRONIC DISEASES.—Not later than 24 months after the date of enactment of this Act, the Secretary shall develop not less than 10 measures described in paragraph (2)(A).

“(B) PRIMARY AND PREVENTIVE CARE.—Not later than 36 months after the date of enactment of this Act, the Secretary shall develop not less than 10 measures described in paragraph (2)(B).”

(b) HOSPITAL-ACQUIRED CONDITIONS.—Section 1890A of the Social Security Act, as amended by section 3013(b), is amended by adding at the end the following new subsection:

“(f) HOSPITAL ACQUIRED CONDITIONS.—The Secretary shall, to the extent practicable, publicly report on measures for hospital-acquired conditions that are currently utilized by the Centers for Medicare & Medicaid Services for the adjustment of the amount of payment to hospitals based on rates of hospital-acquired infections.”

(c) CLINICAL PRACTICE GUIDELINES.—Section 304(b) of the Medicare Improvements for Patients and Providers Act of 2008 (Public Law 110-275) is amended by adding at the end the following new paragraph:

“(4) IDENTIFICATION.—

“(A) IN GENERAL.—Following receipt of the report submitted under paragraph (2), and not less than every 3 years thereafter, the Secretary shall contract with the Institute to employ the results of the study performed under paragraph (1) and the best methods identified by the Institute for the purpose of identifying existing and new clinical practice guidelines that were developed using such best methods, including guidelines listed in the National Guideline Clearinghouse.

“(B) CONSULTATION.—In carrying out the identification process under subparagraph (A), the Secretary shall allow for consultation with professional societies, voluntary health care organizations, and expert panels.”

SEC. 10304. SELECTION OF EFFICIENCY MEASURES.

Sections 1890(b)(7) and 1890A of the Social Security Act, as added by section 3014, are amended by striking “quality” each place it appears and inserting “quality and efficiency”.

SEC. 10305. DATA COLLECTION; PUBLIC REPORTING.

Section 3991I(a) of the Public Health Service Act, as added by section 3015, is amended to read as follows:

“(a) IN GENERAL.—

“(1) ESTABLISHMENT OF STRATEGIC FRAMEWORK.—The Secretary shall establish and implement an overall strategic framework to

carry out the public reporting of performance information, as described in section 399JJ. Such strategic framework may include methods and related timelines for implementing nationally consistent data collection, data aggregation, and analysis methods.

“(2) COLLECTION AND AGGREGATION OF DATA.—The Secretary shall collect and aggregate consistent data on quality and resource use measures from information systems used to support health care delivery, and may award grants or contracts for this purpose. The Secretary shall align such collection and aggregation efforts with the requirements and assistance regarding the expansion of health information technology systems, the interoperability of such technology systems, and related standards that are in effect on the date of enactment of the Patient Protection and Affordable Care Act.

“(3) SCOPE.—The Secretary shall ensure that the data collection, data aggregation, and analysis systems described in paragraph (1) involve an increasingly broad range of patient populations, providers, and geographic areas over time.”

SEC. 10306. IMPROVEMENTS UNDER THE CENTER FOR MEDICARE AND MEDICAID INNOVATION.

Section 1115A of the Social Security Act, as added by section 3021, is amended—

(1) in subsection (a), by inserting at the end the following new paragraph:

“(5) TESTING WITHIN CERTAIN GEOGRAPHIC AREAS.—For purposes of testing payment and service delivery models under this section, the Secretary may elect to limit testing of a model to certain geographic areas.”;

(2) in subsection (b)(2)—

(A) in subparagraph (A)—

(i) in the second sentence, by striking “the preceding sentence may include” and inserting “this subparagraph may include, but are not limited to,”; and

(ii) by inserting after the first sentence the following new sentence: “The Secretary shall focus on models expected to reduce program costs under the applicable title while preserving or enhancing the quality of care received by individuals receiving benefits under such title.”;

(B) in subparagraph (B), by adding at the end the following new clauses:

“(xix) Utilizing, in particular in entities located in medically underserved areas and facilities of the Indian Health Service (whether operated by such Service or by an Indian tribe or tribal organization (as those terms are defined in section 4 of the Indian Health Care Improvement Act)), telehealth services—

“(I) in treating behavioral health issues (such as post-traumatic stress disorder) and stroke; and

“(II) to improve the capacity of non-medical providers and non-specialized medical providers to provide health services for patients with chronic complex conditions.

“(xx) Utilizing a diverse network of providers of services and suppliers to improve care coordination for applicable individuals described in subsection (a)(4)(A)(i) with 2 or more chronic conditions and a history of prior-year hospitalization through interventions developed under the Medicare Coordinated Care Demonstration Project under section 4016 of the Balanced Budget Act of 1997 (42 U.S.C. 1395b-1 note).”; and

(C) in subparagraph (C), by adding at the end the following new clause:

“(viii) Whether the model demonstrates effective linkage with other public sector or private sector payers.”;

(3) in subsection (b)(4), by adding at the end the following new subparagraph:

“(C) MEASURE SELECTION.—To the extent feasible, the Secretary shall select measures under this paragraph that reflect national priorities for quality improvement and patient-centered care consistent with the measures described in 1890(b)(7)(B).”; and

(4) in subsection (c)—

(A) in paragraph (1)(B), by striking “care and reduce spending; and” and inserting “patient care without increasing spending.”;

(B) in paragraph (2), by striking “reduce program spending under applicable titles.” and inserting “reduce (or would not result in any increase in) net program spending under applicable titles; and”; and

(C) by adding at the end the following:

“(3) the Secretary determines that such expansion would not deny or limit the coverage or provision of benefits under the applicable title for applicable individuals.

In determining which models or demonstration projects to expand under the preceding sentence, the Secretary shall focus on models and demonstration projects that improve the quality of patient care and reduce spending.”

SEC. 10307. IMPROVEMENTS TO THE MEDICARE SHARED SAVINGS PROGRAM.

Section 1899 of the Social Security Act, as added by section 3022, is amended by adding at the end the following new subsections:

“(i) OPTION TO USE OTHER PAYMENT MODELS.—

“(1) IN GENERAL.—If the Secretary determines appropriate, the Secretary may use any of the payment models described in paragraph (2) or (3) for making payments under the program rather than the payment model described in subsection (d).

“(2) PARTIAL CAPITATION MODEL.—

“(A) IN GENERAL.—Subject to subparagraph (B), a model described in this paragraph is a partial capitation model in which an ACO is at financial risk for some, but not all, of the items and services covered under parts A and B, such as at risk for some or all physicians’ services or all items and services under part B. The Secretary may limit a partial capitation model to ACOs that are highly integrated systems of care and to ACOs capable of bearing risk, as determined to be appropriate by the Secretary.

“(B) NO ADDITIONAL PROGRAM EXPENDITURES.—Payments to an ACO for items and services under this title for beneficiaries for a year under the partial capitation model shall be established in a manner that does not result in spending more for such ACO for such beneficiaries than would otherwise be expended for such ACO for such beneficiaries for such year if the model were not implemented, as estimated by the Secretary.

“(3) OTHER PAYMENT MODELS.—

“(A) IN GENERAL.—Subject to subparagraph (B), a model described in this paragraph is any payment model that the Secretary determines will improve the quality and efficiency of items and services furnished under this title.

“(B) NO ADDITIONAL PROGRAM EXPENDITURES.—Subparagraph (B) of paragraph (2) shall apply to a payment model under subparagraph (A) in a similar manner as such subparagraph (B) applies to the payment model under paragraph (2).

“(j) INVOLVEMENT IN PRIVATE PAYER AND OTHER THIRD PARTY ARRANGEMENTS.—The Secretary may give preference to ACOs who are participating in similar arrangements with other payers.

“(k) TREATMENT OF PHYSICIAN GROUP PRACTICE DEMONSTRATION.—During the period beginning on the date of the enactment of this

section and ending on the date the program is established, the Secretary may enter into an agreement with an ACO under the demonstration under section 1866A, subject to rebasing and other modifications deemed appropriate by the Secretary.”.

SEC. 10308. REVISIONS TO NATIONAL PILOT PROGRAM ON PAYMENT BUNDLING.

(a) IN GENERAL.—Section 1866D of the Social Security Act, as added by section 3023, is amended—

(1) in paragraph (a)(2)(B), in the matter preceding clause (i), by striking “8 conditions” and inserting “10 conditions”;

(2) by striking subsection (c)(1)(B) and inserting the following:

“(B) EXPANSION.—The Secretary may, at any point after January 1, 2016, expand the duration and scope of the pilot program, to the extent determined appropriate by the Secretary, if—

“(i) the Secretary determines that such expansion is expected to—

“(I) reduce spending under title XVIII of the Social Security Act without reducing the quality of care; or

“(II) improve the quality of care and reduce spending;

“(ii) the Chief Actuary of the Centers for Medicare & Medicaid Services certifies that such expansion would reduce program spending under such title XVIII; and

“(iii) the Secretary determines that such expansion would not deny or limit the coverage or provision of benefits under this title for individuals.”; and

(3) by striking subsection (g) and inserting the following new subsection:

“(g) APPLICATION OF PILOT PROGRAM TO CONTINUING CARE HOSPITALS.—

“(1) IN GENERAL.—In conducting the pilot program, the Secretary shall apply the provisions of the program so as to separately pilot test the continuing care hospital model.

“(2) SPECIAL RULES.—In pilot testing the continuing care hospital model under paragraph (1), the following rules shall apply:

“(A) Such model shall be tested without the limitation to the conditions selected under subsection (a)(2)(B).

“(B) Notwithstanding subsection (a)(2)(D), an episode of care shall be defined as the full period that a patient stays in the continuing care hospital plus the first 30 days following discharge from such hospital.

“(3) CONTINUING CARE HOSPITAL DEFINED.—In this subsection, the term ‘continuing care hospital’ means an entity that has demonstrated the ability to meet patient care and patient safety standards and that provides under common management the medical and rehabilitation services provided in inpatient rehabilitation hospitals and units (as defined in section 1886(d)(1)(B)(ii)), long term care hospitals (as defined in section 1886(d)(1)(B)(iv)(I)), and skilled nursing facilities (as defined in section 1819(a)) that are located in a hospital described in section 1886(d).”.

(b) TECHNICAL AMENDMENTS.—

(1) Section 3023 is amended by striking “1886C” and inserting “1866C”.

(2) Title XVIII of the Social Security Act is amended by redesignating section 1866D, as added by section 3024, as section 1866E.

SEC. 10309. REVISIONS TO HOSPITAL READMISSIONS REDUCTION PROGRAM.

Section 1886(q)(1) of the Social Security Act, as added by section 3025, in the matter preceding subparagraph (A), is amended by striking “the Secretary shall reduce the payments” and all that follows through “the product of” and inserting “the Secretary

shall make payments (in addition to the payments described in paragraph (2)(A)(ii)) for such a discharge to such hospital under subsection (d) (or section 1814(b)(3), as the case may be) in an amount equal to the product of”.

SEC. 10310. REPEAL OF PHYSICIAN PAYMENT UPDATE.

The provisions of, and the amendment made by, section 3101 are repealed

SEC. 10311. REVISIONS TO EXTENSION OF AMBULANCE ADD-ONS.

(a) GROUND AMBULANCE.—Section 1834(l)(13)(A) of the Social Security Act (42 U.S.C. 1395m(l)(13)(A)), as amended by section 3105(a), is further amended—

(1) in the matter preceding clause (i)—

(A) by striking “2007, for” and inserting “2007, and for”; and

(B) by striking “2010, and for such services furnished on or after April 1, 2010, and before January 1, 2011” and inserting “2011”; and

(2) in each of clauses (i) and (ii)—

(A) by striking “, and on or after April 1, 2010, and before January 1, 2011” each place it appears; and

(B) by striking “January 1, 2010” and inserting “January 1, 2011” each place it appears.

(b) AIR AMBULANCE.—Section 146(b)(1) of the Medicare Improvements for Patients and Providers Act of 2008 (Public Law 110-275), as amended by section 3105(b), is further amended by striking “December 31, 2009, and during the period beginning on April 1, 2010, and ending on January 1, 2011” and inserting “December 31, 2010”.

(c) SUPER RURAL AMBULANCE.—Section 1834(l)(12)(A) of the Social Security Act (42 U.S.C. 1395m(l)(12)(A)), as amended by section 3105(c), is further amended by striking “2010, and on or after April 1, 2010, and before January 1, 2011” and inserting “2011”.

SEC. 10312. CERTAIN PAYMENT RULES FOR LONG-TERM CARE HOSPITAL SERVICES AND MORATORIUM ON THE ESTABLISHMENT OF CERTAIN HOSPITALS AND FACILITIES.

(a) CERTAIN PAYMENT RULES.—Section 114(c) of the Medicare, Medicaid, and SCHIP Extension Act of 2007 (42 U.S.C. 1395ww note), as amended by section 4302(a) of the American Recovery and Reinvestment Act (Public Law 111-5) and section 3106(a) of this Act, is further amended by striking “4-year period” each place it appears and inserting “5-year period”.

(b) MORATORIUM.—Section 114(d) of such Act (42 U.S.C. 1395ww note), as amended by section 3106(b) of this Act, in the matter preceding subparagraph (A), is amended by striking “4-year period” and inserting “5-year period”.

SEC. 10313. REVISIONS TO THE EXTENSION FOR THE RURAL COMMUNITY HOSPITAL DEMONSTRATION PROGRAM.

(a) IN GENERAL.—Subsection (g) of section 410A of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Public Law 108-173; 117 Stat. 2272), as added by section 3123(a) of this Act, is amended to read as follows:

“(g) FIVE-YEAR EXTENSION OF DEMONSTRATION PROGRAM.—

“(1) IN GENERAL.—Subject to the succeeding provisions of this subsection, the Secretary shall conduct the demonstration program under this section for an additional 5-year period (in this section referred to as the ‘5-year extension period’) that begins on the date immediately following the last day of the initial 5-year period under subsection (a)(5).

“(2) EXPANSION OF DEMONSTRATION STATES.—Notwithstanding subsection (a)(2),

during the 5-year extension period, the Secretary shall expand the number of States with low population densities determined by the Secretary under such subsection to 20. In determining which States to include in such expansion, the Secretary shall use the same criteria and data that the Secretary used to determine the States under such subsection for purposes of the initial 5-year period.

“(3) INCREASE IN MAXIMUM NUMBER OF HOSPITALS PARTICIPATING IN THE DEMONSTRATION PROGRAM.—Notwithstanding subsection (a)(4), during the 5-year extension period, not more than 30 rural community hospitals may participate in the demonstration program under this section.

“(4) HOSPITALS IN DEMONSTRATION PROGRAM ON DATE OF ENACTMENT.—In the case of a rural community hospital that is participating in the demonstration program under this section as of the last day of the initial 5-year period, the Secretary—

“(A) shall provide for the continued participation of such rural community hospital in the demonstration program during the 5-year extension period unless the rural community hospital makes an election, in such form and manner as the Secretary may specify, to discontinue such participation; and

“(B) in calculating the amount of payment under subsection (b) to the rural community hospital for covered inpatient hospital services furnished by the hospital during such 5-year extension period, shall substitute, under paragraph (1)(A) of such subsection—

“(i) the reasonable costs of providing such services for discharges occurring in the first cost reporting period beginning on or after the first day of the 5-year extension period, for

“(ii) the reasonable costs of providing such services for discharges occurring in the first cost reporting period beginning on or after the implementation of the demonstration program.”.

(b) CONFORMING AMENDMENTS.—Subsection (a)(5) of section 410A of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Public Law 108-173; 117 Stat. 2272), as amended by section 3123(b) of this Act, is amended by striking “1-year extension” and inserting “5-year extension”.

SEC. 10314. ADJUSTMENT TO LOW-VOLUME HOSPITAL PROVISION.

Section 1886(d)(12) of the Social Security Act (42 U.S.C. 1395ww(d)(12)), as amended by section 3125, is amended—

(1) in subparagraph (C)(i), by striking “1,500 discharges” and inserting “1,600 discharges”; and

(2) in subparagraph (D), by striking “1,500 discharges” and inserting “1,600 discharges”.

SEC. 10315. REVISIONS TO HOME HEALTH CARE PROVISIONS.

(a) REBASING.—Section 1895(b)(3)(A)(iii) of the Social Security Act, as added by section 3131, is amended—

(1) in the clause heading, by striking “2013” and inserting “2014”; and

(2) in subclause (I), by striking “2013” and inserting “2014”; and

(3) in subclause (II), by striking “2016” and inserting “2017”.

(b) REVISION OF HOME HEALTH STUDY AND REPORT.—Section 3131(d) is amended to read as follows:

“(d) STUDY AND REPORT ON THE DEVELOPMENT OF HOME HEALTH PAYMENT REVISIONS IN ORDER TO ENSURE ACCESS TO CARE AND PAYMENT FOR SEVERITY OF ILLNESS.—

“(1) IN GENERAL.—The Secretary of Health and Human Services (in this section referred to as the ‘Secretary’) shall conduct a study

on home health agency costs involved with providing ongoing access to care to low-income Medicare beneficiaries or beneficiaries in medically underserved areas, and in treating beneficiaries with varying levels of severity of illness. In conducting the study, the Secretary may analyze items such as the following:

“(A) Methods to potentially revise the home health prospective payment system under section 1895 of the Social Security Act (42 U.S.C. 1395fff) to account for costs related to patient severity of illness or to improving beneficiary access to care, such as—

“(i) payment adjustments for services that may involve additional or fewer resources;

“(ii) changes to reflect resources involved with providing home health services to low-income Medicare beneficiaries or Medicare beneficiaries residing in medically underserved areas;

“(iii) ways outlier payments might be revised to reflect costs of treating Medicare beneficiaries with high levels of severity of illness; and

“(iv) other issues determined appropriate by the Secretary.

“(B) Operational issues involved with potential implementation of potential revisions to the home health payment system, including impacts for both home health agencies and administrative and systems issues for the Centers for Medicare & Medicaid Services, and any possible payment vulnerabilities associated with implementing potential revisions.

“(C) Whether additional research might be needed.

“(D) Other items determined appropriate by the Secretary.

“(2) CONSIDERATIONS.—In conducting the study under paragraph (1), the Secretary may consider whether patient severity of illness and access to care could be measured by factors, such as—

“(A) population density and relative patient access to care;

“(B) variations in service costs for providing care to individuals who are dually eligible under the Medicare and Medicaid programs;

“(C) the presence of severe or chronic diseases, which might be measured by multiple, discontinuous home health episodes;

“(D) poverty status, such as evidenced by the receipt of Supplemental Security Income under title XVI of the Social Security Act; and

“(E) other factors determined appropriate by the Secretary.

“(3) REPORT.—Not later than March 1, 2014, the Secretary shall submit to Congress a report on the study conducted under paragraph (1), together with recommendations for such legislation and administrative action as the Secretary determines appropriate.

“(4) CONSULTATIONS.—In conducting the study under paragraph (1), the Secretary shall consult with appropriate stakeholders, such as groups representing home health agencies and groups representing Medicare beneficiaries.

“(5) MEDICARE DEMONSTRATION PROJECT BASED ON THE RESULTS OF THE STUDY.—

“(A) IN GENERAL.—Subject to subparagraph (D), taking into account the results of the study conducted under paragraph (1), the Secretary may, as determined appropriate, provide for a demonstration project to test whether making payment adjustments for home health services under the Medicare program would substantially improve access to care for patients with high severity levels of illness or for low-income or underserved Medicare beneficiaries.

“(B) WAIVING BUDGET NEUTRALITY.—The Secretary shall not reduce the standard prospective payment amount (or amounts) under section 1895 of the Social Security Act (42 U.S.C. 1395fff) applicable to home health services furnished during a period to offset any increase in payments during such period resulting from the application of the payment adjustments under subparagraph (A).

“(C) NO EFFECT ON SUBSEQUENT PERIODS.—A payment adjustment resulting from the application of subparagraph (A) for a period—

“(i) shall not apply to payments for home health services under title XVIII after such period; and

“(ii) shall not be taken into account in calculating the payment amounts applicable for such services after such period.

“(D) DURATION.—If the Secretary determines it appropriate to conduct the demonstration project under this subsection, the Secretary shall conduct the project for a four year period beginning not later than January 1, 2015.

“(E) FUNDING.—The Secretary shall provide for the transfer from the Federal Hospital Insurance Trust Fund under section 1817 of the Social Security Act (42 U.S.C. 1395i) and the Federal Supplementary Medical Insurance Trust Fund established under section 1841 of such Act (42 U.S.C. 1395t), in such proportion as the Secretary determines appropriate, of \$500,000,000 for the period of fiscal years 2015 through 2018. Such funds shall be made available for the study described in paragraph (1) and the design, implementation and evaluation of the demonstration described in this paragraph. Amounts available under this subparagraph shall be available until expended.

“(F) EVALUATION AND REPORT.—If the Secretary determines it appropriate to conduct the demonstration project under this subsection, the Secretary shall—

“(i) provide for an evaluation of the project; and

“(ii) submit to Congress, by a date specified by the Secretary, a report on the project.

“(G) ADMINISTRATION.—Chapter 35 of title 44, United States Code, shall not apply with respect to this subsection.”

SEC. 10316. MEDICARE DSH.

Section 1886(r)(2)(B) of the Social Security Act, as added by section 3133, is amended—

(1) in clause (i)—

(A) in the matter preceding subclause (I), by striking “(divided by 100)”;

(B) in subclause (I), by striking “2012” and inserting “2013”;

(C) in subclause (II), by striking the period at the end and inserting a comma; and

(D) by adding at the end the following flush matter:

“minus 1.5 percentage points.”

(2) in clause (ii)—

(A) in the matter preceding subclause (I), by striking “(divided by 100)”;

(B) in subclause (I), by striking “2012” and inserting “2013”;

(C) in subclause (II), by striking the period at the end and inserting a comma; and

(D) by adding at the end the following flush matter:

“and, for each of 2018 and 2019, minus 1.5 percentage points.”

SEC. 10317. REVISIONS TO EXTENSION OF SECTION 508 HOSPITAL PROVISIONS.

Section 3137(a) is amended to read as follows:

“(a) EXTENSION.—

“(1) IN GENERAL.—Subsection (a) of section 106 of division B of the Tax Relief and Health Care Act of 2006 (42 U.S.C. 1395 note), as

amended by section 117 of the Medicare, Medicaid, and SCHIP Extension Act of 2007 (Public Law 110-173) and section 124 of the Medicare Improvements for Patients and Providers Act of 2008 (Public Law 110-275), is amended by striking ‘September 30, 2009’ and inserting ‘September 30, 2010’.

“(2) SPECIAL RULE FOR FISCAL YEAR 2010.—

“(A) IN GENERAL.—Subject to subparagraph (B), for purposes of implementation of the amendment made by paragraph (1), including (notwithstanding paragraph (3) of section 117(a) of the Medicare, Medicaid and SCHIP Extension Act of 2007 (Public Law 110-173), as amended by section 124(b) of the Medicare Improvements for Patients and Providers Act of 2008 (Public Law 110-275)) for purposes of the implementation of paragraph (2) of such section 117(a), during fiscal year 2010, the Secretary of Health and Human Services (in this subsection referred to as the ‘Secretary’) shall use the hospital wage index that was promulgated by the Secretary in the Federal Register on August 27, 2009 (74 Fed. Reg. 43754), and any subsequent corrections.

“(B) EXCEPTION.—Beginning on April 1, 2010, in determining the wage index applicable to hospitals that qualify for wage index reclassification, the Secretary shall include the average hourly wage data of hospitals whose reclassification was extended pursuant to the amendment made by paragraph (1) only if including such data results in a higher applicable reclassified wage index.

“(3) ADJUSTMENT FOR CERTAIN HOSPITALS IN FISCAL YEAR 2010.—

“(A) IN GENERAL.—In the case of a subsection (d) hospital (as defined in subsection (d)(1)(B) of section 1886 of the Social Security Act (42 U.S.C. 1395ww)) with respect to which—

“(i) a reclassification of its wage index for purposes of such section was extended pursuant to the amendment made by paragraph (1); and

“(ii) the wage index applicable for such hospital for the period beginning on October 1, 2009, and ending on March 31, 2010, was lower than for the period beginning on April 1, 2010, and ending on September 30, 2010, by reason of the application of paragraph (2)(B); the Secretary shall pay such hospital an additional payment that reflects the difference between the wage index for such periods.

“(B) TIMEFRAME FOR PAYMENTS.—The Secretary shall make payments required under subparagraph by not later than December 31, 2010.”

SEC. 10318. REVISIONS TO TRANSITIONAL EXTRA BENEFITS UNDER MEDICARE ADVANTAGE.

Section 1853(p)(3)(A) of the Social Security Act, as added by section 3201(h), is amended by inserting “in 2009” before the period at the end.

SEC. 10319. REVISIONS TO MARKET BASKET ADJUSTMENTS.

(a) INPATIENT ACUTE HOSPITALS.—Section 1886(b)(3)(B)(xii) of the Social Security Act, as added by section 3401(a), is amended—

(1) in subclause (I), by striking “and” at the end;

(2) by redesignating subclause (II) as subclause (III);

(3) by inserting after subclause (II) the following new subclause:

“(II) for each of fiscal years 2012 and 2013, by 0.1 percentage point; and”; and

(4) in subclause (III), as redesignated by paragraph (2), by striking “2012” and inserting “2014”.

(b) LONG-TERM CARE HOSPITALS.—Section 1886(m)(4) of the Social Security Act, as added by section 3401(c), is amended—

(1) in subparagraph (A)—
 (A) in clause (i)—
 (i) by striking “each of rate years 2010 and 2011” and inserting “rate year 2010”; and
 (ii) by striking “and” at the end;
 (B) by redesignating clause (ii) as clause (iv);
 (C) by inserting after clause (i) the following new clauses:
 “(ii) for rate year 2011, 0.50 percentage point;
 “(iii) for each of the rate years beginning in 2012 and 2013, 0.1 percentage point; and”;
 and
 (D) in clause (iv), as redesignated by subparagraph (B), by striking “2012” and inserting “2014”; and
 (2) in subparagraph (B), by striking “(A)(ii)” and inserting “(A)(iv)”.
(c) INPATIENT REHABILITATION FACILITIES.—Section 1886(j)(3)(D)(i) of the Social Security Act, as added by section 3401(d), is amended—
 (1) in subclause (I), by striking “and” at the end;
 (2) by redesignating subclause (II) as subclause (III);
 (3) by inserting after subclause (II) the following new subclause:
 “(II) for each of fiscal years 2012 and 2013, 0.1 percentage point; and”; and
 (4) in subclause (III), as redesignated by paragraph (2), by striking “2012” and inserting “2014”.
(d) HOME HEALTH AGENCIES.—Section 1895(b)(3)(B)(vi)(II) of such Act, as added by section 3401(e), is amended by striking “and 2012” and inserting “, 2012, and 2013”.
(e) PSYCHIATRIC HOSPITALS.—Section 1886(s)(3)(A) of the Social Security Act, as added by section 3401(f), is amended—
 (1) in clause (i), by striking “and” at the end;
 (2) by redesignating clause (ii) as clause (iii);
 (3) by inserting after clause (ii) the following new clause:
 “(ii) for each of the rate years beginning in 2012 and 2013, 0.1 percentage point; and”; and
 (4) in clause (iii), as redesignated by paragraph (2), by striking “2012” and inserting “2014”.
(f) HOSPICE CARE.—Section 1814(i)(1)(C) of the Social Security Act (42 U.S.C. 1395f(i)(1)(C)), as amended by section 3401(g), is amended—
 (1) in clause (iv)(II), by striking “0.5” and inserting “0.3”; and
 (2) in clause (v), in the matter preceding subclause (I), by striking “0.5” and inserting “0.3”.
(g) OUTPATIENT HOSPITALS.—Section 1833(t)(3)(G)(i) of the Social Security Act, as added by section 3401(i), is amended—
 (1) in subclause (I), by striking “and” at the end;
 (2) by redesignating subclause (II) as subclause (III);
 (3) by inserting after subclause (II) the following new subclause:
 “(II) for each of 2012 and 2013, 0.1 percentage point; and”; and
 (4) in subclause (III), as redesignated by paragraph (2), by striking “2012” and inserting “2014”.
SEC. 10320. EXPANSION OF THE SCOPE OF, AND ADDITIONAL IMPROVEMENTS TO, THE INDEPENDENT MEDICARE ADVISORY BOARD.
 (a) IN GENERAL.—Section 1899A of the Social Security Act, as added by section 3403, is amended—
 (1) in subsection (c)—
 (A) in paragraph (1)(B), by adding at the end the following new sentence: “In any year

(beginning with 2014) that the Board is not required to submit a proposal under this section, the Board shall submit to Congress an advisory report on matters related to the Medicare program.”;
 (B) in paragraph (2)(A)—
 (i) in clause (iv), by inserting “or the full premium subsidy under section 1860D–14(a)” before the period at the end of the last sentence; and
 (ii) by adding at the end the following new clause:
 “(vii) If the Chief Actuary of the Centers for Medicare & Medicaid Services has made a determination described in subsection (e)(3)(B)(i)(II) in the determination year, the proposal shall be designed to help reduce the growth rate described in paragraph (8) while maintaining or enhancing beneficiary access to quality care under this title.”;
 (C) in paragraph (2)(B)—
 (i) in clause (v), by striking “and” at the end;
 (ii) in clause (vi), by striking the period at the end and inserting “; and”; and
 (iii) by adding at the end the following new clause:
 “(vii) take into account the data and findings contained in the annual reports under subsection (n) in order to develop proposals that can most effectively promote the delivery of efficient, high quality care to Medicare beneficiaries.”;
 (D) in paragraph (3)—
 (i) in the heading, by striking “TRANSMISSION OF BOARD PROPOSAL TO PRESIDENT” and inserting “SUBMISSION OF BOARD PROPOSAL TO CONGRESS AND THE PRESIDENT”;
 (ii) in subparagraph (A)(i), by striking “transmit a proposal under this section to the President” and insert “submit a proposal under this section to Congress and the President”; and
 (iii) in subparagraph (A)(ii)—
 (I) in subclause (I), by inserting “or” at the end;
 (II) in subclause (II), by striking “; or” and inserting a period; and
 (III) by striking subclause (III);
 (E) in paragraph (4)—
 (i) by striking “the Board under paragraph (3)(A)(i) or”; and
 (ii) by striking “immediately” and inserting “within 2 days”;
 (F) in paragraph (5)—
 (i) by striking “to but” and inserting “but”; and
 (ii) by inserting “Congress and” after “submit a proposal to”; and
 (G) in paragraph (6)(B)(i), by striking “per unduplicated enrollee” and inserting “(calculated as the sum of per capita spending under each of parts A, B, and D)”;
 (2) in subsection (d)—
 (A) in paragraph (1)(A)—
 (i) by inserting “the Board or” after “a proposal is submitted by”; and
 (ii) by inserting “subsection (c)(3)(A)(i) or” after “the Senate under”; and
 (B) in paragraph (2)(A), by inserting “the Board or” after “a proposal is submitted by”;
 (3) in subsection (e)—
 (A) in paragraph (1), by inserting “the Board or” after “a proposal submitted by”; and
 (B) in paragraph (3)—
 (i) by striking “EXCEPTION.—The Secretary shall not be required to implement the recommendations contained in a proposal submitted in a proposal year by” and inserting “EXCEPTIONS.—
 “(A) IN GENERAL.—The Secretary shall not implement the recommendations contained

in a proposal submitted in a proposal year by the Board or”;
 (ii) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), respectively, and indenting appropriately; and
 (iii) by adding at the end the following new subparagraph:
 “(B) LIMITED ADDITIONAL EXCEPTION.—
 “(i) IN GENERAL.—Subject to clause (ii), the Secretary shall not implement the recommendations contained in a proposal submitted by the Board or the President to Congress pursuant to this section in a proposal year (beginning with proposal year 2019) if—
 “(I) the Board was required to submit a proposal to Congress under this section in the year preceding the proposal year; and
 “(II) the Chief Actuary of the Centers for Medicare & Medicaid Services makes a determination in the determination year that the growth rate described in subsection (c)(8) exceeds the growth rate described in subsection (c)(6)(A)(i).
 “(ii) LIMITED ADDITIONAL EXCEPTION MAY NOT BE APPLIED IN TWO CONSECUTIVE YEARS.—This subparagraph shall not apply if the recommendations contained in a proposal submitted by the Board or the President to Congress pursuant to this section in the year preceding the proposal year were not required to be implemented by reason of this subparagraph.
 “(iii) NO AFFECT ON REQUIREMENT TO SUBMIT PROPOSALS OR FOR CONGRESSIONAL CONSIDERATION OF PROPOSALS.—Clause (i) and (ii) shall not affect—
 “(I) the requirement of the Board or the President to submit a proposal to Congress in a proposal year in accordance with the provisions of this section; or
 “(II) Congressional consideration of a legislative proposal (described in subsection (c)(3)(B)(iv)) contained such a proposal in accordance with subsection (d).”;
 (4) in subsection (f)(3)(B)—
 (A) by striking “or advisory reports to Congress” and inserting “, advisory reports, or advisory recommendations”; and
 (B) by inserting “or produce the public report under subsection (n)” after “this section”; and
 (5) by adding at the end the following new subsections:
 “(n) ANNUAL PUBLIC REPORT.—
 “(1) IN GENERAL.—Not later than July 1, 2014, and annually thereafter, the Board shall produce a public report containing standardized information on system-wide health care costs, patient access to care, utilization, and quality-of-care that allows for comparison by region, types of services, types of providers, and both private payers and the program under this title.
 “(2) REQUIREMENTS.—Each report produced pursuant to paragraph (1) shall include information with respect to the following areas:
 “(A) The quality and costs of care for the population at the most local level determined practical by the Board (with quality and costs compared to national benchmarks and reflecting rates of change, taking into account quality measures described in section 1890(b)(7)(B)).
 “(B) Beneficiary and consumer access to care, patient and caregiver experience of care, and the cost-sharing or out-of-pocket burden on patients.
 “(C) Epidemiological shifts and demographic changes.
 “(D) The proliferation, effectiveness, and utilization of health care technologies, including variation in provider practice patterns and costs.

“(E) Any other areas that the Board determines affect overall spending and quality of care in the private sector.

“(o) ADVISORY RECOMMENDATIONS FOR NON-FEDERAL HEALTH CARE PROGRAMS.—

“(1) IN GENERAL.—Not later than January 15, 2015, and at least once every two years thereafter, the Board shall submit to Congress and the President recommendations to slow the growth in national health expenditures (excluding expenditures under this title and in other Federal health care programs) while preserving or enhancing quality of care, such as recommendations—

“(A) that the Secretary or other Federal agencies can implement administratively;

“(B) that may require legislation to be enacted by Congress in order to be implemented;

“(C) that may require legislation to be enacted by State or local governments in order to be implemented;

“(D) that private sector entities can voluntarily implement; and

“(E) with respect to other areas determined appropriate by the Board.

“(2) COORDINATION.—In making recommendations under paragraph (1), the Board shall coordinate such recommendations with recommendations contained in proposals and advisory reports produced by the Board under subsection (c).

“(3) AVAILABLE TO PUBLIC.—The Board shall make recommendations submitted to Congress and the President under this subsection available to the public.”.

(b) NAME CHANGE.—Any reference in the provisions of, or amendments made by, section 3403 to the “Independent Medicare Advisory Board” shall be deemed to be a reference to the “Independent Payment Advisory Board”.

(c) RULE OF CONSTRUCTION.—Nothing in the amendments made by this section shall preclude the Independent Medicare Advisory Board, as established under section 1899A of the Social Security Act (as added by section 3403), from solely using data from public or private sources to carry out the amendments made by subsection (a)(4).

SEC. 10321. REVISION TO COMMUNITY HEALTH TEAMS.

Section 3502(c)(2)(A) is amended by inserting “or other primary care providers” after “physicians”.

SEC. 10322. QUALITY REPORTING FOR PSYCHIATRIC HOSPITALS.

(a) IN GENERAL.—Section 1886(s) of the Social Security Act, as added by section 3401(f), is amended by adding at the end the following new paragraph:

“(4) QUALITY REPORTING.—

“(A) REDUCTION IN UPDATE FOR FAILURE TO REPORT.—

“(i) IN GENERAL.—Under the system described in paragraph (1), for rate year 2014 and each subsequent rate year, in the case of a psychiatric hospital or psychiatric unit that does not submit data to the Secretary in accordance with subparagraph (C) with respect to such a rate year, any annual update to a standard Federal rate for discharges for the hospital during the rate year, and after application of paragraph (2), shall be reduced by 2 percentage points.

“(ii) SPECIAL RULE.—The application of this subparagraph may result in such annual update being less than 0.0 for a rate year, and may result in payment rates under the system described in paragraph (1) for a rate year being less than such payment rates for the preceding rate year.

“(B) NONCUMULATIVE APPLICATION.—Any reduction under subparagraph (A) shall apply

only with respect to the rate year involved and the Secretary shall not take into account such reduction in computing the payment amount under the system described in paragraph (1) for a subsequent rate year.

“(C) SUBMISSION OF QUALITY DATA.—For rate year 2014 and each subsequent rate year, each psychiatric hospital and psychiatric unit shall submit to the Secretary data on quality measures specified under subparagraph (D). Such data shall be submitted in a form and manner, and at a time, specified by the Secretary for purposes of this subparagraph.

“(D) QUALITY MEASURES.—

“(i) IN GENERAL.—Subject to clause (ii), any measure specified by the Secretary under this subparagraph must have been endorsed by the entity with a contract under section 1890(a).

“(ii) EXCEPTION.—In the case of a specified area or medical topic determined appropriate by the Secretary for which a feasible and practical measure has not been endorsed by the entity with a contract under section 1890(a), the Secretary may specify a measure that is not so endorsed as long as due consideration is given to measures that have been endorsed or adopted by a consensus organization identified by the Secretary.

“(iii) TIME FRAME.—Not later than October 1, 2012, the Secretary shall publish the measures selected under this subparagraph that will be applicable with respect to rate year 2014.

“(E) PUBLIC AVAILABILITY OF DATA SUBMITTED.—The Secretary shall establish procedures for making data submitted under subparagraph (C) available to the public. Such procedures shall ensure that a psychiatric hospital and a psychiatric unit has the opportunity to review the data that is to be made public with respect to the hospital or unit prior to such data being made public. The Secretary shall report quality measures that relate to services furnished in inpatient settings in psychiatric hospitals and psychiatric units on the Internet website of the Centers for Medicare & Medicaid Services.”.

(b) CONFORMING AMENDMENT.—Section 1890(b)(7)(B)(i)(I) of the Social Security Act, as added by section 3014, is amended by inserting “1886(s)(4)(D),” after “1886(o)(2),”.

SEC. 10323. MEDICARE COVERAGE FOR INDIVIDUALS EXPOSED TO ENVIRONMENTAL HEALTH HAZARDS.

(a) IN GENERAL.—Title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.) is amended by inserting after section 1881 the following new section:

“SEC. 1881A. MEDICARE COVERAGE FOR INDIVIDUALS EXPOSED TO ENVIRONMENTAL HEALTH HAZARDS.

“(a) DEEMING OF INDIVIDUALS AS ELIGIBLE FOR MEDICARE BENEFITS.—

“(1) IN GENERAL.—For purposes of eligibility for benefits under this title, an individual determined under subsection (c) to be an environmental exposure affected individual described in subsection (e)(2) shall be deemed to meet the conditions specified in section 226(a).

“(2) DISCRETIONARY DEEMING.—For purposes of eligibility for benefits under this title, the Secretary may deem an individual determined under subsection (c) to be an environmental exposure affected individual described in subsection (e)(3) to meet the conditions specified in section 226(a).

“(3) EFFECTIVE DATE OF COVERAGE.—An individual who is deemed eligible for benefits under this title under paragraph (1) or (2) shall be—

“(A) entitled to benefits under the program under Part A as of the date of such deeming; and

“(B) eligible to enroll in the program under Part B beginning with the month in which such deeming occurs.

“(b) PILOT PROGRAM FOR CARE OF CERTAIN INDIVIDUALS RESIDING IN EMERGENCY DECLARATION AREAS.—

“(1) PROGRAM; PURPOSE.—

“(A) PRIMARY PILOT PROGRAM.—The Secretary shall establish a pilot program in accordance with this subsection to provide innovative approaches to furnishing comprehensive, coordinated, and cost-effective care under this title to individuals described in paragraph (2)(A).

“(B) OPTIONAL PILOT PROGRAMS.—The Secretary may establish a separate pilot program, in accordance with this subsection, with respect to each geographic area subject to an emergency declaration (other than the declaration of June 17, 2009), in order to furnish such comprehensive, coordinated and cost-effective care to individuals described in subparagraph (2)(B) who reside in each such area.

“(2) INDIVIDUAL DESCRIBED.—For purposes of paragraph (1), an individual described in this paragraph is an individual who enrolls in part B, submits to the Secretary an application to participate in the applicable pilot program under this subsection, and—

“(A) is an environmental exposure affected individual described in subsection (e)(2) who resides in or around the geographic area subject to an emergency declaration made as of June 17, 2009; or

“(B) is an environmental exposure affected individual described in subsection (e)(3) who—

“(i) is deemed under subsection (a)(2); and

“(ii) meets such other criteria or conditions for participation in a pilot program under paragraph (1)(B) as the Secretary specifies.

“(3) FLEXIBLE BENEFITS AND SERVICES.—A pilot program under this subsection may provide for the furnishing of benefits, items, or services not otherwise covered or authorized under this title, if the Secretary determines that furnishing such benefits, items, or services will further the purposes of such pilot program (as described in paragraph (1)).

“(4) INNOVATIVE REIMBURSEMENT METHODOLOGIES.—For purposes of the pilot program under this subsection, the Secretary—

“(A) shall develop and implement appropriate methodologies to reimburse providers for furnishing benefits, items, or services for which payment is not otherwise covered or authorized under this title, if such benefits, items, or services are furnished pursuant to paragraph (3); and

“(B) may develop and implement innovative approaches to reimbursing providers for any benefits, items, or services furnished under this subsection.

“(5) LIMITATION.—Consistent with section 1862(b), no payment shall be made under the pilot program under this subsection with respect to benefits, items, or services furnished to an environmental exposure affected individual (as defined in subsection (e)) to the extent that such individual is eligible to receive such benefits, items, or services through any other public or private benefits plan or legal agreement.

“(6) WAIVER AUTHORITY.—The Secretary may waive such provisions of this title and title XI as are necessary to carry out pilot programs under this subsection.

“(7) FUNDING.—For purposes of carrying out pilot programs under this subsection, the

Secretary shall provide for the transfer, from the Federal Hospital Insurance Trust Fund under section 1817 and the Federal Supplementary Medical Insurance Trust Fund under section 1841, in such proportion as the Secretary determines appropriate, of such sums as the Secretary determines necessary, to the Centers for Medicare & Medicaid Services Program Management Account.

“(8) **WAIVER OF BUDGET NEUTRALITY.**—The Secretary shall not require that pilot programs under this subsection be budget neutral with respect to expenditures under this title.

“(c) **DETERMINATIONS.**—

“(1) **BY THE COMMISSIONER OF SOCIAL SECURITY.**—For purposes of this section, the Commissioner of Social Security, in consultation with the Secretary, and using the cost allocation method prescribed in section 201(g), shall determine whether individuals are environmental exposure affected individuals.

“(2) **BY THE SECRETARY.**—The Secretary shall determine eligibility for pilot programs under subsection (b).

“(d) **EMERGENCY DECLARATION DEFINED.**—For purposes of this section, the term ‘emergency declaration’ means a declaration of a public health emergency under section 104(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980.

“(e) **ENVIRONMENTAL EXPOSURE AFFECTED INDIVIDUAL DEFINED.**—

“(1) **IN GENERAL.**—For purposes of this section, the term ‘environmental exposure affected individual’ means—

“(A) an individual described in paragraph (2); and

“(B) an individual described in paragraph (3).

“(2) **INDIVIDUAL DESCRIBED.**—

“(A) **IN GENERAL.**—An individual described in this paragraph is any individual who—

“(i) is diagnosed with 1 or more conditions described in subparagraph (B);

“(ii) as demonstrated in such manner as the Secretary determines appropriate, has been present for an aggregate total of 6 months in the geographic area subject to an emergency declaration specified in subsection (b)(2)(A), during a period ending—

“(I) not less than 10 years prior to such diagnosis; and

“(II) prior to the implementation of all the remedial and removal actions specified in the Record of Decision for Operating Unit 4 and the Record of Decision for Operating Unit 7;

“(iii) files an application for benefits under this title (or has an application filed on behalf of the individual), including pursuant to this section; and

“(iv) is determined under this section to meet the criteria in this subparagraph.

“(B) **CONDITIONS DESCRIBED.**—For purposes of subparagraph (A), the following conditions are described in this subparagraph:

“(i) Asbestosis, pleural thickening, or pleural plaques as established by—

“(I) interpretation by a ‘B Reader’ qualified physician of a plain chest x-ray or interpretation of a computed tomographic radiograph of the chest by a qualified physician, as determined by the Secretary; or

“(II) such other diagnostic standards as the Secretary specifies,

except that this clause shall not apply to pleural thickening or pleural plaques unless there are symptoms or conditions requiring medical treatment as a result of these diagnoses.

“(ii) Mesothelioma, or malignancies of the lung, colon, rectum, larynx, stomach, esophagus, pharynx, or ovary, as established by—

“(I) pathologic examination of biopsy tissue;

“(II) cytology from bronchioalveolar lavage; or

“(III) such other diagnostic standards as the Secretary specifies.

“(iii) Any other diagnosis which the Secretary, in consultation with the Commissioner of Social Security, determines is an asbestos-related medical condition, as established by such diagnostic standards as the Secretary specifies.

“(3) **OTHER INDIVIDUAL DESCRIBED.**—An individual described in this paragraph is any individual who—

“(A) is not an individual described in paragraph (2);

“(B) is diagnosed with a medical condition caused by the exposure of the individual to a public health hazard to which an emergency declaration applies, based on such medical conditions, diagnostic standards, and other criteria as the Secretary specifies;

“(C) as demonstrated in such manner as the Secretary determines appropriate, has been present for an aggregate total of 6 months in the geographic area subject to the emergency declaration involved, during a period determined appropriate by the Secretary;

“(D) files an application for benefits under this title (or has an application filed on behalf of the individual), including pursuant to this section; and

“(E) is determined under this section to meet the criteria in this paragraph.”

(b) **PROGRAM FOR EARLY DETECTION OF CERTAIN MEDICAL CONDITIONS RELATED TO ENVIRONMENTAL HEALTH HAZARDS.**—Title XX of the Social Security Act (42 U.S.C. 1397 et seq.), as amended by section 5507, is amended by adding at the end the following:

“SEC. 2009. PROGRAM FOR EARLY DETECTION OF CERTAIN MEDICAL CONDITIONS RELATED TO ENVIRONMENTAL HEALTH HAZARDS.

“(a) **PROGRAM ESTABLISHMENT.**—The Secretary shall establish a program in accordance with this section to make competitive grants to eligible entities specified in subsection (b) for the purpose of—

“(1) screening at-risk individuals (as defined in subsection (c)(1)) for environmental health conditions (as defined in subsection (c)(3)); and

“(2) developing and disseminating public information and education concerning—

“(A) the availability of screening under the program under this section;

“(B) the detection, prevention, and treatment of environmental health conditions; and

“(C) the availability of Medicare benefits for certain individuals diagnosed with environmental health conditions under section 1881A.

“(b) **ELIGIBLE ENTITIES.**—

“(1) **IN GENERAL.**—For purposes of this section, an eligible entity is an entity described in paragraph (2) which submits an application to the Secretary in such form and manner, and containing such information and assurances, as the Secretary determines appropriate.

“(2) **TYPES OF ELIGIBLE ENTITIES.**—The entities described in this paragraph are the following:

“(A) A hospital or community health center.

“(B) A Federally qualified health center.

“(C) A facility of the Indian Health Service.

“(D) A National Cancer Institute-designated cancer center.

“(E) An agency of any State or local government.

“(F) A nonprofit organization.

“(G) Any other entity the Secretary determines appropriate.

“(c) **DEFINITIONS.**—In this section:

“(1) **AT-RISK INDIVIDUAL.**—The term ‘at-risk individual’ means an individual who—

“(A)(i) as demonstrated in such manner as the Secretary determines appropriate, has been present for an aggregate total of 6 months in the geographic area subject to an emergency declaration specified under paragraph (2), during a period ending—

“(I) not less than 10 years prior to the date of such individual’s application under subparagraph (B); and

“(II) prior to the implementation of all the remedial and removal actions specified in the Record of Decision for Operating Unit 4 and the Record of Decision for Operating Unit 7; or

“(ii) meets such other criteria as the Secretary determines appropriate considering the type of environmental health condition at issue; and

“(B) has submitted an application (or has an application submitted on the individual’s behalf), to an eligible entity receiving a grant under this section, for screening under the program under this section.

“(2) **EMERGENCY DECLARATION.**—The term ‘emergency declaration’ means a declaration of a public health emergency under section 104(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980.

“(3) **ENVIRONMENTAL HEALTH CONDITION.**—The term ‘environmental health condition’ means—

“(A) asbestosis, pleural thickening, or pleural plaques, as established by—

“(i) interpretation by a ‘B Reader’ qualified physician of a plain chest x-ray or interpretation of a computed tomographic radiograph of the chest by a qualified physician, as determined by the Secretary; or

“(ii) such other diagnostic standards as the Secretary specifies;

“(B) mesothelioma, or malignancies of the lung, colon, rectum, larynx, stomach, esophagus, pharynx, or ovary, as established by—

“(i) pathologic examination of biopsy tissue;

“(ii) cytology from bronchioalveolar lavage; or

“(iii) such other diagnostic standards as the Secretary specifies; and

“(C) any other medical condition which the Secretary determines is caused by exposure to a hazardous substance or pollutant or contaminant at a Superfund site to which an emergency declaration applies, based on such criteria and as established by such diagnostic standards as the Secretary specifies.

“(4) **HAZARDOUS SUBSTANCE; POLLUTANT; CONTAMINANT.**—The terms ‘hazardous substance’, ‘pollutant’, and ‘contaminant’ have the meanings given those terms in section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601).

“(5) **SUPERFUND SITE.**—The term ‘Superfund site’ means a site included on the National Priorities List developed by the President in accordance with section 105(a)(8)(B) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9605(a)(8)(B)).

“(d) **HEALTH COVERAGE UNAFFECTED.**—Nothing in this section shall be construed to affect any coverage obligation of a governmental or private health plan or program relating to an at-risk individual.

“(e) FUNDING.—

“(1) IN GENERAL.—Out of any funds in the Treasury not otherwise appropriated, there are appropriated to the Secretary, to carry out the program under this section—

“(A) \$23,000,000 for the period of fiscal years 2010 through 2014; and

“(B) \$20,000,000 for each 5-fiscal year period thereafter.

“(2) AVAILABILITY.—Funds appropriated under paragraph (1) shall remain available until expended.

“(f) NONAPPLICATION.—

“(1) IN GENERAL.—Except as provided in paragraph (2), the preceding sections of this title shall not apply to grants awarded under this section.

“(2) LIMITATIONS ON USE OF GRANTS.—Section 2005(a) shall apply to a grant awarded under this section to the same extent and in the same manner as such section applies to payments to States under this title, except that paragraph (4) of such section shall not be construed to prohibit grantees from conducting screening for environmental health conditions as authorized under this section.”.

SEC. 10324. PROTECTIONS FOR FRONTIER STATES.

(a) FLOOR ON AREA WAGE INDEX FOR HOSPITALS IN FRONTIER STATES.—

(1) IN GENERAL.—Section 1886(d)(3)(E) of the Social Security Act (42 U.S.C. 1395ww(d)(3)(E)) is amended—

(A) in clause (i), by striking “clause (ii)” and inserting “clause (ii) or (iii)”; and

(B) by adding at the end the following new clause:

“(iii) FLOOR ON AREA WAGE INDEX FOR HOSPITALS IN FRONTIER STATES.—

“(I) IN GENERAL.—Subject to subclause (IV), for discharges occurring on or after October 1, 2010, the area wage index applicable under this subparagraph to any hospital which is located in a frontier State (as defined in subclause (II)) may not be less than 1.00.

“(II) FRONTIER STATE DEFINED.—In this clause, the term ‘frontier State’ means a State in which at least 50 percent of the counties in the State are frontier counties.

“(III) FRONTIER COUNTY DEFINED.—In this clause, the term ‘frontier county’ means a county in which the population per square mile is less than 6.

“(IV) LIMITATION.—This clause shall not apply to any hospital located in a State that receives a non-labor related share adjustment under paragraph (5)(H).”.

(2) WAIVING BUDGET NEUTRALITY.—Section 1886(d)(3)(E) of the Social Security Act (42 U.S.C. 1395ww(d)(3)(E)), as amended by subsection (a), is amended in the third sentence by inserting “and the amendments made by section 10324(a)(1) of the Patient Protection and Affordable Care Act” after “2003”.

(b) FLOOR ON AREA WAGE ADJUSTMENT FACTOR FOR HOSPITAL OUTPATIENT DEPARTMENT SERVICES IN FRONTIER STATES.—Section 1833(t) of the Social Security Act (42 U.S.C. 1395l(t)), as amended by section 3138, is amended—

(1) in paragraph (2)(D), by striking “the Secretary” and inserting “subject to paragraph (19), the Secretary”; and

(2) by adding at the end the following new paragraph:

“(19) FLOOR ON AREA WAGE ADJUSTMENT FACTOR FOR HOSPITAL OUTPATIENT DEPARTMENT SERVICES IN FRONTIER STATES.—

“(A) IN GENERAL.—Subject to subparagraph (B), with respect to covered OPD services furnished on or after January 1, 2011, the area wage adjustment factor applicable

under the payment system established under this subsection to any hospital outpatient department which is located in a frontier State (as defined in section 1886(d)(3)(E)(iii)(II)) may not be less than 1.00. The preceding sentence shall not be applied in a budget neutral manner.

“(B) LIMITATION.—This paragraph shall not apply to any hospital outpatient department located in a State that receives a non-labor related share adjustment under section 1886(d)(5)(H).”.

(c) FLOOR FOR PRACTICE EXPENSE INDEX FOR PHYSICIANS’ SERVICES FURNISHED IN FRONTIER STATES.—Section 1848(e)(1) of the Social Security Act (42 U.S.C. 1395w-4(e)(1)), as amended by section 3102, is amended—

(1) in subparagraph (A), by striking “and (H)” and inserting “(H), and (I)”; and

(2) by adding at the end the following new subparagraph:

“(I) FLOOR FOR PRACTICE EXPENSE INDEX FOR SERVICES FURNISHED IN FRONTIER STATES.—

“(i) IN GENERAL.—Subject to clause (ii), for purposes of payment for services furnished in a frontier State (as defined in section 1886(d)(3)(E)(iii)(II)) on or after January 1, 2011, after calculating the practice expense index in subparagraph (A)(i), the Secretary shall increase any such index to 1.00 if such index would otherwise be less than 1.00. The preceding sentence shall not be applied in a budget neutral manner.

“(ii) LIMITATION.—This subparagraph shall not apply to services furnished in a State that receives a non-labor related share adjustment under section 1886(d)(5)(H).”.

SEC. 10325. REVISION TO SKILLED NURSING FACILITY PROSPECTIVE PAYMENT SYSTEM.

(a) TEMPORARY DELAY OF RUG-IV.—Notwithstanding any other provision of law, the Secretary of Health and Human Services shall not, prior to October 1, 2011, implement Version 4 of the Resource Utilization Groups (in this subsection referred to as “RUG-IV”) published in the Federal Register on August 11, 2009, entitled “Prospective Payment System and Consolidated Billing for Skilled Nursing Facilities for FY 2010; Minimum Data Set, Version 3.0 for Skilled Nursing Facilities and Medicaid Nursing Facilities” (74 Fed. Reg. 40288). Beginning on October 1, 2010, the Secretary of Health and Human Services shall implement the change specific to therapy furnished on a concurrent basis that is a component of RUG-IV and changes to the lookback period to ensure that only those services furnished after admission to a skilled nursing facility are used as factors in determining a case mix classification under the skilled nursing facility prospective payment system under section 1888(e) of the Social Security Act (42 U.S.C. 1395yy(e)).

(b) CONSTRUCTION.—Nothing in this section shall be interpreted as delaying the implementation of Version 3.0 of the Minimum Data Sets (MDS 3.0) beyond the planned implementation date of October 1, 2010.

SEC. 10326. PILOT TESTING PAY-FOR-PERFORMANCE PROGRAMS FOR CERTAIN MEDICARE PROVIDERS.

(a) IN GENERAL.—Not later than January 1, 2016, the Secretary of Health and Human Services (in this section referred to as the “Secretary”) shall, for each provider described in subsection (b), conduct a separate pilot program under title XVIII of the Social Security Act to test the implementation of a value-based purchasing program for payments under such title for the provider.

(b) PROVIDERS DESCRIBED.—The providers described in this paragraph are the following:

(1) Psychiatric hospitals (as described in clause (i) of section 1886(d)(1)(B) of such Act (42 U.S.C. 1395ww(d)(1)(B))) and psychiatric units (as described in the matter following clause (v) of such section).

(2) Long-term care hospitals (as described in clause (iv) of such section).

(3) Rehabilitation hospitals (as described in clause (ii) of such section).

(4) PPS-exempt cancer hospitals (as described in clause (v) of such section).

(5) Hospice programs (as defined in section 1861(dd)(2) of such Act (42 U.S.C. 1395x(dd)(2))).

(c) WAIVER AUTHORITY.—The Secretary may waive such requirements of titles XI and XVIII of the Social Security Act as may be necessary solely for purposes of carrying out the pilot programs under this section.

(d) NO ADDITIONAL PROGRAM EXPENDITURES.—Payments under this section under the separate pilot program for value based purchasing (as described in subsection (a)) for each provider type described in paragraphs (1) through (5) of subsection (b) for applicable items and services under title XVIII of the Social Security Act for a year shall be established in a manner that does not result in spending more under each such value based purchasing program for such year than would otherwise be expended for such provider type for such year if the pilot program were not implemented, as estimated by the Secretary.

(e) EXPANSION OF PILOT PROGRAM.—The Secretary may, at any point after January 1, 2018, expand the duration and scope of a pilot program conducted under this subsection, to the extent determined appropriate by the Secretary, if—

(1) the Secretary determines that such expansion is expected to—

(A) reduce spending under title XVIII of the Social Security Act without reducing the quality of care; or

(B) improve the quality of care and reduce spending;

(2) the Chief Actuary of the Centers for Medicare & Medicaid Services certifies that such expansion would reduce program spending under such title XVIII; and

(3) the Secretary determines that such expansion would not deny or limit the coverage or provision of benefits under such title XIII for Medicare beneficiaries.

SEC. 10327. IMPROVEMENTS TO THE PHYSICIAN QUALITY REPORTING SYSTEM.

(a) IN GENERAL.—Section 1848(m) of the Social Security Act (42 U.S.C. 1395w-4(m)) is amended by adding at the end the following new paragraph:

“(7) ADDITIONAL INCENTIVE PAYMENT.—

“(A) IN GENERAL.—For 2011 through 2014, if an eligible professional meets the requirements described in subparagraph (B), the applicable quality percent for such year, as described in clauses (iii) and (iv) of paragraph (1)(B), shall be increased by 0.5 percentage points.

“(B) REQUIREMENTS DESCRIBED.—In order to qualify for the additional incentive payment described in subparagraph (A), an eligible professional shall meet the following requirements:

“(i) The eligible professional shall—

“(I) satisfactorily submit data on quality measures for purposes of paragraph (1) for a year; and

“(II) have such data submitted on their behalf through a Maintenance of Certification Program (as defined in subparagraph (C)(i)) that meets—

“(aa) the criteria for a registry (as described in subsection (k)(4)); or

“(bb) an alternative form and manner determined appropriate by the Secretary.

“(ii) The eligible professional, more frequently than is required to qualify for or maintain board certification status—

“(I) participates in such a Maintenance of Certification program for a year; and

“(II) successfully completes a qualified Maintenance of Certification Program practice assessment (as defined in subparagraph (C)(ii)) for such year.

“(iii) A Maintenance of Certification program submits to the Secretary, on behalf of the eligible professional, information—

“(I) in a form and manner specified by the Secretary, that the eligible professional has successfully met the requirements of clause (ii) (which may be in the form of a structural measure);

“(II) if requested by the Secretary, on the survey of patient experience with care (as described in subparagraph (C)(ii)(II)); and

“(III) as the Secretary may require, on the methods, measures, and data used under the Maintenance of Certification Program and the qualified Maintenance of Certification Program practice assessment.

“(C) DEFINITIONS.—For purposes of this paragraph:

“(i) The term ‘Maintenance of Certification Program’ means a continuous assessment program, such as qualified American Board of Medical Specialties Maintenance of Certification program or an equivalent program (as determined by the Secretary), that advances quality and the lifelong learning and self-assessment of board certified specialty physicians by focusing on the competencies of patient care, medical knowledge, practice-based learning, interpersonal and communication skills and professionalism. Such a program shall include the following:

“(I) The program requires the physician to maintain a valid, unrestricted medical license in the United States.

“(II) The program requires a physician to participate in educational and self-assessment programs that require an assessment of what was learned.

“(III) The program requires a physician to demonstrate, through a formalized, secure examination, that the physician has the fundamental diagnostic skills, medical knowledge, and clinical judgment to provide quality care in their respective specialty.

“(IV) The program requires successful completion of a qualified Maintenance of Certification Program practice assessment as described in clause (ii).

“(i) The term ‘qualified Maintenance of Certification Program practice assessment’ means an assessment of a physician’s practice that—

“(I) includes an initial assessment of an eligible professional’s practice that is designed to demonstrate the physician’s use of evidence-based medicine;

“(II) includes a survey of patient experience with care; and

“(III) requires a physician to implement a quality improvement intervention to address a practice weakness identified in the initial assessment under subclause (I) and then to remeasure to assess performance improvement after such intervention.”.

(b) AUTHORITY.—Section 3002(c) of this Act is amended by adding at the end the following new paragraph:

“(3) AUTHORITY.—For years after 2014, if the Secretary of Health and Human Services determines it to be appropriate, the Secretary may incorporate participation in a Maintenance of Certification Program and

successful completion of a qualified Maintenance of Certification Program practice assessment into the composite of measures of quality of care furnished pursuant to the physician fee schedule payment modifier, as described in section 1848(p)(2) of the Social Security Act (42 U.S.C. 1395w-4(p)(2)).”.

(c) ELIMINATION OF MA REGIONAL PLAN STABILIZATION FUND.—

(1) IN GENERAL.—Section 1858 of the Social Security Act (42 U.S.C. 1395w-27a) is amended by striking subsection (e).

(2) TRANSITION.—Any amount contained in the MA Regional Plan Stabilization Fund as of the date of the enactment of this Act shall be transferred to the Federal Supplementary Medical Insurance Trust Fund.

SEC. 10328. IMPROVEMENT IN PART D MEDICATION THERAPY MANAGEMENT (MTM) PROGRAMS.

(a) IN GENERAL.—Section 1860D-4(c)(2) of the Social Security Act (42 U.S.C. 1395w-104(c)(2)) is amended—

(1) by redesignating subparagraphs (C), (D), and (E) as subparagraphs (E), (F), and (G), respectively; and

(2) by inserting after subparagraph (B) the following new subparagraphs:

“(C) REQUIRED INTERVENTIONS.—For plan years beginning on or after the date that is 2 years after the date of the enactment of the Patient Protection and Affordable Care Act, prescription drug plan sponsors shall offer medication therapy management services to targeted beneficiaries described in subparagraph (A)(ii) that include, at a minimum, the following to increase adherence to prescription medications or other goals deemed necessary by the Secretary:

“(i) An annual comprehensive medication review furnished person-to-person or using telehealth technologies (as defined by the Secretary) by a licensed pharmacist or other qualified provider. The comprehensive medication review—

“(I) shall include a review of the individual’s medications and may result in the creation of a recommended medication action plan or other actions in consultation with the individual and with input from the prescriber to the extent necessary and practicable; and

“(II) shall include providing the individual with a written or printed summary of the results of the review.

The Secretary, in consultation with relevant stakeholders, shall develop a standardized format for the action plan under subclause (I) and the summary under subclause (II).

“(ii) Follow-up interventions as warranted based on the findings of the annual medication review or the targeted medication enrollment and which may be provided person-to-person or using telehealth technologies (as defined by the Secretary).

“(D) ASSESSMENT.—The prescription drug plan sponsor shall have in place a process to assess, at least on a quarterly basis, the medication use of individuals who are at risk but not enrolled in the medication therapy management program, including individuals who have experienced a transition in care, if the prescription drug plan sponsor has access to that information.

“(E) AUTOMATIC ENROLLMENT WITH ABILITY TO OPT-OUT.—The prescription drug plan sponsor shall have in place a process to—

“(i) subject to clause (ii), automatically enroll targeted beneficiaries described in subparagraph (A)(ii), including beneficiaries identified under subparagraph (D), in the medication therapy management program required under this subsection; and

“(ii) permit such beneficiaries to opt-out of enrollment in such program.”.

(b) RULE OF CONSTRUCTION.—Nothing in this section shall limit the authority of the Secretary of Health and Human Services to modify or broaden requirements for a medication therapy management program under part D of title XVIII of the Social Security Act or to study new models for medication therapy management through the Center for Medicare and Medicaid Innovation under section 1115A of such Act, as added by section 3021.

SEC. 10329. DEVELOPING METHODOLOGY TO ASSESS HEALTH PLAN VALUE.

(a) DEVELOPMENT.—The Secretary of Health and Human Services (referred to in this section as the “Secretary”), in consultation with relevant stakeholders including health insurance issuers, health care consumers, employers, health care providers, and other entities determined appropriate by the Secretary, shall develop a methodology to measure health plan value. Such methodology shall take into consideration, where applicable—

(1) the overall cost to enrollees under the plan;

(2) the quality of the care provided for under the plan;

(3) the efficiency of the plan in providing care;

(4) the relative risk of the plan’s enrollees as compared to other plans;

(5) the actuarial value or other comparative measure of the benefits covered under the plan; and

(6) other factors determined relevant by the Secretary.

(b) REPORT.—Not later than 18 months after the date of enactment of this Act, the Secretary shall submit to Congress a report concerning the methodology developed under subsection (a).

SEC. 10330. MODERNIZING COMPUTER AND DATA SYSTEMS OF THE CENTERS FOR MEDICARE & MEDICAID SERVICES TO SUPPORT IMPROVEMENTS IN CARE DELIVERY.

(a) IN GENERAL.—The Secretary of Health and Human Services (in this section referred to as the “Secretary”) shall develop a plan (and detailed budget for the resources needed to implement such plan) to modernize the computer and data systems of the Centers for Medicare & Medicaid Services (in this section referred to as “CMS”).

(b) CONSIDERATIONS.—In developing the plan, the Secretary shall consider how such modernized computer system could—

(1) in accordance with the regulations promulgated under section 264(c) of the Health Insurance Portability and Accountability Act of 1996, make available data in a reliable and timely manner to providers of services and suppliers to support their efforts to better manage and coordinate care furnished to beneficiaries of CMS programs; and

(2) support consistent evaluations of payment and delivery system reforms under CMS programs.

(c) POSTING OF PLAN.—By not later than 9 months after the date of the enactment of this Act, the Secretary shall post on the website of the Centers for Medicare & Medicaid Services the plan described in subsection (a).

SEC. 10331. PUBLIC REPORTING OF PERFORMANCE INFORMATION.

(a) IN GENERAL.—

(1) DEVELOPMENT.—Not later than January 1, 2011, the Secretary shall develop a Physician Compare Internet website with information on physicians enrolled in the Medicare program under section 1866(j) of the Social Security Act (42 U.S.C. 1395cc(j)) and other

eligible professionals who participate in the Physician Quality Reporting Initiative under section 1848 of such Act (42 U.S.C. 1395w-4).

(2) **PLAN.**—Not later than January 1, 2013, and with respect to reporting periods that begin no earlier than January 1, 2012, the Secretary shall also implement a plan for making publicly available through Physician Compare, consistent with subsection (c), information on physician performance that provides comparable information for the public on quality and patient experience measures with respect to physicians enrolled in the Medicare program under such section 1866(j). To the extent scientifically sound measures that are developed consistent with the requirements of this section are available, such information, to the extent practicable, shall include—

(A) measures collected under the Physician Quality Reporting Initiative;

(B) an assessment of patient health outcomes and the functional status of patients;

(C) an assessment of the continuity and coordination of care and care transitions, including episodes of care and risk-adjusted resource use;

(D) an assessment of efficiency;

(E) an assessment of patient experience and patient, caregiver, and family engagement;

(F) an assessment of the safety, effectiveness, and timeliness of care; and

(G) other information as determined appropriate by the Secretary.

(b) **OTHER REQUIRED CONSIDERATIONS.**—In developing and implementing the plan described in subsection (a)(2), the Secretary shall, to the extent practicable, include—

(1) processes to assure that data made public, either by the Centers for Medicare & Medicaid Services or by other entities, is statistically valid and reliable, including risk adjustment mechanisms used by the Secretary;

(2) processes by which a physician or other eligible professional whose performance on measures is being publicly reported has a reasonable opportunity, as determined by the Secretary, to review his or her individual results before they are made public;

(3) processes by the Secretary to assure that the implementation of the plan and the data made available on Physician Compare provide a robust and accurate portrayal of a physician's performance;

(4) data that reflects the care provided to all patients seen by physicians, under both the Medicare program and, to the extent practicable, other payers, to the extent such information would provide a more accurate portrayal of physician performance;

(5) processes to ensure appropriate attribution of care when multiple physicians and other providers are involved in the care of a patient;

(6) processes to ensure timely statistical performance feedback is provided to physicians concerning the data reported under any program subject to public reporting under this section; and

(7) implementation of computer and data systems of the Centers for Medicare & Medicaid Services that support valid, reliable, and accurate public reporting activities authorized under this section.

(c) **ENSURING PATIENT PRIVACY.**—The Secretary shall ensure that information on physician performance and patient experience is not disclosed under this section in a manner that violates sections 552 or 552a of title 5, United States Code, with regard to the privacy of individually identifiable health information.

(d) **FEEDBACK FROM MULTI-STAKEHOLDER GROUPS.**—The Secretary shall take into consideration input provided by multi-stakeholder groups, consistent with sections 1890(b)(7) and 1890A of the Social Security Act, as added by section 3014 of this Act, in selecting quality measures for use under this section.

(e) **CONSIDERATION OF TRANSITION TO VALUE-BASED PURCHASING.**—In developing the plan under this subsection (a)(2), the Secretary shall, as the Secretary determines appropriate, consider the plan to transition to a value-based purchasing program for physicians and other practitioners developed under section 131 of the Medicare Improvements for Patients and Providers Act of 2008 (Public Law 110-275).

(f) **REPORT TO CONGRESS.**—Not later than January 1, 2015, the Secretary shall submit to Congress a report on the Physician Compare Internet website developed under subsection (a)(1). Such report shall include information on the efforts of and plans made by the Secretary to collect and publish data on physician quality and efficiency and on patient experience of care in support of value-based purchasing and consumer choice, together with recommendations for such legislation and administrative action as the Secretary determines appropriate.

(g) **EXPANSION.**—At any time before the date on which the report is submitted under subsection (f), the Secretary may expand (including expansion to other providers of services and suppliers under title XVIII of the Social Security Act) the information made available on such website.

(h) **FINANCIAL INCENTIVES TO ENCOURAGE CONSUMERS TO CHOOSE HIGH QUALITY PROVIDERS.**—The Secretary may establish a demonstration program, not later than January 1, 2019, to provide financial incentives to Medicare beneficiaries who are furnished services by high quality physicians, as determined by the Secretary based on factors in subparagraphs (A) through (G) of subsection (a)(2). In no case may Medicare beneficiaries be required to pay increased premiums or cost sharing or be subject to a reduction in benefits under title XVIII of the Social Security Act as a result of such demonstration program. The Secretary shall ensure that any such demonstration program does not disadvantage those beneficiaries without reasonable access to high performing physicians or create financial inequities under such title.

(i) **DEFINITIONS.**—In this section:

(1) **ELIGIBLE PROFESSIONAL.**—The term “eligible professional” has the meaning given that term for purposes of the Physician Quality Reporting Initiative under section 1848 of the Social Security Act (42 U.S.C. 1395w-4).

(2) **PHYSICIAN.**—The term “physician” has the meaning given that term in section 1861(r) of such Act (42 U.S.C. 1395x(r)).

(3) **PHYSICIAN COMPARE.**—The term “Physician Compare” means the Internet website developed under subsection (a)(1).

(4) **SECRETARY.**—The term “Secretary” means the Secretary of Health and Human Services.

SEC. 10332. AVAILABILITY OF MEDICARE DATA FOR PERFORMANCE MEASUREMENT.

(a) **IN GENERAL.**—Section 1874 of the Social Security Act (42 U.S.C. 1395kk) is amended by adding at the end the following new subsection:

“(e) **AVAILABILITY OF MEDICARE DATA.**—

“(1) **IN GENERAL.**—Subject to paragraph (4), the Secretary shall make available to qualified entities (as defined in paragraph (2))

data described in paragraph (3) for the evaluation of the performance of providers of services and suppliers.

“(2) **QUALIFIED ENTITIES.**—For purposes of this subsection, the term ‘qualified entity’ means a public or private entity that—

“(A) is qualified (as determined by the Secretary) to use claims data to evaluate the performance of providers of services and suppliers on measures of quality, efficiency, effectiveness, and resource use; and

“(B) agrees to meet the requirements described in paragraph (4) and meets such other requirements as the Secretary may specify, such as ensuring security of data.

“(3) **DATA DESCRIBED.**—The data described in this paragraph are standardized extracts (as determined by the Secretary) of claims data under parts A, B, and D for items and services furnished under such parts for one or more specified geographic areas and time periods requested by a qualified entity. The Secretary shall take such actions as the Secretary deems necessary to protect the identity of individuals entitled to or enrolled for benefits under such parts.

“(4) **REQUIREMENTS.**—

“(A) **FEE.**—Data described in paragraph (3) shall be made available to a qualified entity under this subsection at a fee equal to the cost of making such data available. Any fee collected pursuant to the preceding sentence shall be deposited into the Federal Supplementary Medical Insurance Trust Fund under section 1841.

“(B) **SPECIFICATION OF USES AND METHODOLOGIES.**—A qualified entity requesting data under this subsection shall—

“(i) submit to the Secretary a description of the methodologies that such qualified entity will use to evaluate the performance of providers of services and suppliers using such data;

“(ii)(I) except as provided in subclause (II), if available, use standard measures, such as measures endorsed by the entity with a contract under section 1890(a) and measures developed pursuant to section 931 of the Public Health Service Act; or

“(II) use alternative measures if the Secretary, in consultation with appropriate stakeholders, determines that use of such alternative measures would be more valid, reliable, responsive to consumer preferences, cost-effective, or relevant to dimensions of quality and resource use not addressed by such standard measures;

“(iii) include data made available under this subsection with claims data from sources other than claims data under this title in the evaluation of performance of providers of services and suppliers;

“(iv) only include information on the evaluation of performance of providers and suppliers in reports described in subparagraph (C);

“(v) make available to providers of services and suppliers, upon their request, data made available under this subsection; and

“(vi) prior to their release, submit to the Secretary the format of reports under subparagraph (C).

“(C) **REPORTS.**—Any report by a qualified entity evaluating the performance of providers of services and suppliers using data made available under this subsection shall—

“(i) include an understandable description of the measures, which shall include quality measures and the rationale for use of other measures described in subparagraph (B)(ii)(II), risk adjustment methods, physician attribution methods, other applicable methods, data specifications and limitations, and the sponsors, so that consumers, providers of services and suppliers, health plans,

researchers, and other stakeholders can assess such reports;

“(ii) be made available confidentially, to any provider of services or supplier to be identified in such report, prior to the public release of such report, and provide an opportunity to appeal and correct errors;

“(iii) only include information on a provider of services or supplier in an aggregate form as determined appropriate by the Secretary; and

“(iv) except as described in clause (ii), be made available to the public.

“(D) APPROVAL AND LIMITATION OF USES.—The Secretary shall not make data described in paragraph (3) available to a qualified entity unless the qualified entity agrees to release the information on the evaluation of performance of providers of services and suppliers. Such entity shall only use such data, and information derived from such evaluation, for the reports under subparagraph (C). Data released to a qualified entity under this subsection shall not be subject to discovery or admission as evidence in judicial or administrative proceedings without consent of the applicable provider of services or supplier.”

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on January 1, 2012.

SEC. 10333. COMMUNITY-BASED COLLABORATIVE CARE NETWORKS.

Part D of title III of the Public Health Service Act (42 U.S.C. 254b et seq.) is amended by adding at the end the following new subpart:

“Subpart XI—Community-Based Collaborative Care Network Program

“SEC. 340H. COMMUNITY-BASED COLLABORATIVE CARE NETWORK PROGRAM.

“(a) IN GENERAL.—The Secretary may award grants to eligible entities to support community-based collaborative care networks that meet the requirements of subsection (b).

“(b) COMMUNITY-BASED COLLABORATIVE CARE NETWORKS.—

“(1) DESCRIPTION.—A community-based collaborative care network (referred to in this section as a ‘network’) shall be a consortium of health care providers with a joint governance structure (including providers within a single entity) that provides comprehensive coordinated and integrated health care services (as defined by the Secretary) for low-income populations.

“(2) REQUIRED INCLUSION.—A network shall include the following providers (unless such provider does not exist within the community, declines or refuses to participate, or places unreasonable conditions on their participation):

“(A) A hospital that meets the criteria in section 1923(b)(1) of the Social Security Act; and

“(B) All Federally qualified health centers (as defined in section 1861(aa) of the Social Security Act located in the community.

“(3) PRIORITY.—In awarding grants, the Secretary shall give priority to networks that include—

“(A) the capability to provide the broadest range of services to low-income individuals;

“(B) the broadest range of providers that currently serve a high volume of low-income individuals; and

“(C) a county or municipal department of health.

“(c) APPLICATION.—

“(1) APPLICATION.—A network described in subsection (b) shall submit an application to the Secretary.

“(2) RENEWAL.—In subsequent years, based on the performance of grantees, the Sec-

retary may provide renewal grants to prior year grant recipients.

“(d) USE OF FUNDS.—

“(1) USE BY GRANTEEES.—Grant funds may be used for the following activities:

“(A) Assist low-income individuals to—

“(i) access and appropriately use health services;

“(ii) enroll in health coverage programs; and

“(iii) obtain a regular primary care provider or a medical home.

“(B) Provide case management and care management.

“(C) Perform health outreach using neighborhood health workers or through other means.

“(D) Provide transportation.

“(E) Expand capacity, including through telehealth, after-hours services or urgent care.

“(F) Provide direct patient care services.

“(2) GRANT FUNDS TO HRSA GRANTEEES.—The Secretary may limit the percent of grant funding that may be spent on direct care services provided by grantees of programs administered by the Health Resources and Services Administration or impose other requirements on such grantees deemed necessary.

“(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section such sums as may be necessary for each of fiscal years 2011 through 2015.”

SEC. 10334. MINORITY HEALTH.

(a) OFFICE OF MINORITY HEALTH.—

(1) IN GENERAL.—Section 1707 of the Public Health Service Act (42 U.S.C. 300u-6) is amended—

(A) in subsection (a), by striking “within the Office of Public Health and Science” and all that follows through the end and inserting “. The Office of Minority Health as existing on the date of enactment of the Patient Protection and Affordable Care Act shall be transferred to the Office of the Secretary in such manner that there is established in the Office of the Secretary, the Office of Minority Health, which shall be headed by the Deputy Assistant Secretary for Minority Health who shall report directly to the Secretary, and shall retain and strengthen authorities (as in existence on such date of enactment) for the purpose of improving minority health and the quality of health care minorities receive, and eliminating racial and ethnic disparities. In carrying out this subsection, the Secretary, acting through the Deputy Assistant Secretary, shall award grants, contracts, enter into memoranda of understanding, cooperative, interagency, intra-agency and other agreements with public and nonprofit private entities, agencies, as well as Departmental and Cabinet agencies and organizations, and with organizations that are indigenous human resource providers in communities of color to assure improved health status of racial and ethnic minorities, and shall develop measures to evaluate the effectiveness of activities aimed at reducing health disparities and supporting the local community. Such measures shall evaluate community outreach activities, language services, workforce cultural competence, and other areas as determined by the Secretary.”; and

(B) by striking subsection (h) and inserting the following:

“(h) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of carrying out this section, there are authorized to be appropriated such sums as may be necessary for each of fiscal years 2011 through 2016.”

(2) TRANSFER OF FUNCTIONS.—There are transferred to the Office of Minority Health in the office of the Secretary of Health and Human Services, all duties, responsibilities, authorities, accountabilities, functions, staff, funds, award mechanisms, and other entities under the authority of the Office of Minority Health of the Public Health Service as in effect on the date before the date of enactment of this Act, which shall continue in effect according to the terms in effect on the date before such date of enactment, until modified, terminated, superseded, set aside, or revoked in accordance with law by the President, the Secretary, a court of competent jurisdiction, or by operation of law.

(3) REPORTS.—Not later than 1 year after the date of enactment of this section, and biennially thereafter, the Secretary of Health and Human Services shall prepare and submit to the appropriate committees of Congress a report describing the activities carried out under section 1707 of the Public Health Service Act (as amended by this subsection) during the period for which the report is being prepared. Not later than 1 year after the date of enactment of this section, and biennially thereafter, the heads of each of the agencies of the Department of Health and Human Services shall submit to the Deputy Assistant Secretary for Minority Health a report summarizing the minority health activities of each of the respective agencies.

(b) ESTABLISHMENT OF INDIVIDUAL OFFICES OF MINORITY HEALTH WITHIN THE DEPARTMENT OF HEALTH AND HUMAN SERVICES.—

(1) IN GENERAL.—Title XVII of the Public Health Service Act (42 U.S.C. 300u et seq.) is amended by inserting after section 1707 the following section:

“SEC. 1707A. INDIVIDUAL OFFICES OF MINORITY HEALTH WITHIN THE DEPARTMENT.

“(a) IN GENERAL.—The head of each agency specified in subsection (b)(1) shall establish within the agency an office to be known as the Office of Minority Health. The head of each such Office shall be appointed by the head of the agency within which the Office is established, and shall report directly to the head of the agency. The head of such agency shall carry out this section (as this section relates to the agency) acting through such Director.

“(b) SPECIFIED AGENCIES.—The agencies referred to in subsection (a) are the Centers for Disease Control and Prevention, the Health Resources and Services Administration, the Substance Abuse and Mental Health Services Administration, the Agency for Healthcare Research and Quality, the Food and Drug Administration, and the Centers for Medicare & Medicaid Services.

“(c) DIRECTOR; APPOINTMENT.—Each Office of Minority Health established in an agency listed in subsection (a) shall be headed by a director, with documented experience and expertise in minority health services research and health disparities elimination.

“(d) REFERENCES.—Except as otherwise specified, any reference in Federal law to an Office of Minority Health (in the Department of Health and Human Services) is deemed to be a reference to the Office of Minority Health in the Office of the Secretary.

“(e) FUNDING.—

“(1) ALLOCATIONS.—Of the amounts appropriated for a specified agency for a fiscal year, the Secretary must designate an appropriate amount of funds for the purpose of carrying out activities under this section through the minority health office of the agency. In reserving an amount under the preceding sentence for a minority health office for a fiscal year, the Secretary shall reduce, by substantially the same percentage,

the amount that otherwise would be available for each of the programs of the designated agency involved.

“(2) AVAILABILITY OF FUNDS FOR STAFFING.—The purposes for which amounts made available under paragraph may be expended by a minority health office include the costs of employing staff for such office.”

(2) NO NEW REGULATORY AUTHORITY.—Nothing in this subsection and the amendments made by this subsection may be construed as establishing regulatory authority or modifying any existing regulatory authority.

(3) LIMITATION ON TERMINATION.—Notwithstanding any other provision of law, a Federal office of minority health or Federal appointive position with primary responsibility over minority health issues that is in existence in an office of agency of the Department of Health and Human Services on the date of enactment of this section shall not be terminated, reorganized, or have any of its power or duties transferred unless such termination, reorganization, or transfer is approved by an Act of Congress.

(c) REDESIGNATION OF NATIONAL CENTER ON MINORITY HEALTH AND HEALTH DISPARITIES.—

(1) REDESIGNATION.—Title IV of the Public Health Service Act (42 U.S.C. 281 et seq.) is amended—

(A) by redesignating subpart 6 of part E as subpart 20;

(B) by transferring subpart 20, as so redesignated, to part C of such title IV;

(C) by inserting subpart 20, as so redesignated, after subpart 19 of such part C; and

(D) in subpart 20, as so redesignated—

(i) by redesignating sections 485E through 485H as sections 464z-3 through 464z-6, respectively;

(ii) by striking “National Center on Minority Health and Health Disparities” each place such term appears and inserting “National Institute on Minority Health and Health Disparities”; and

(iii) by striking “Center” each place such term appears and inserting “Institute”.

(2) PURPOSE OF INSTITUTE; DUTIES.—Section 464z-3 of the Public Health Service Act, as so redesignated, is amended—

(A) in subsection (h)(1), by striking “research endowments at centers of excellence under section 736.” and inserting the following: “research endowments—

“(1) at centers of excellence under section 736; and

“(2) at centers of excellence under section 464z-4.”;

(B) in subsection (h)(2)(A), by striking “average” and inserting “median”; and

(C) by adding at the end the following:

“(h) INTERAGENCY COORDINATION.—The Director of the Institute, as the primary Federal officials with responsibility for coordinating all research and activities conducted or supported by the National Institutes of Health on minority health and health disparities, shall plan, coordinate, review and evaluate research and other activities conducted or supported by the Institutes and Centers of the National Institutes of Health.”.

(3) TECHNICAL AND CONFORMING AMENDMENTS.—

(A) Section 401(b)(24) of the Public Health Service Act (42 U.S.C. 281(b)(24)) is amended by striking “Center” and inserting “Institute”.

(B) Subsection (d)(1) of section 903 of the Public Health Service Act (42 U.S.C. 299a-1(d)(1)) is amended by striking “section 485E” and inserting “section 464z-3”.

SEC. 10335. TECHNICAL CORRECTION TO THE HOSPITAL VALUE-BASED PURCHASING PROGRAM.

Section 1886(o)(2)(A) of the Social Security Act, as added by section 3001, is amended, in the first sentence, by inserting “, other than measures of readmissions,” after “shall select measures”.

SEC. 10336. GAO STUDY AND REPORT ON MEDICARE BENEFICIARY ACCESS TO HIGH-QUALITY DIALYSIS SERVICES.

(a) STUDY.—

(1) IN GENERAL.—The Comptroller General of the United States shall conduct a study on the impact on Medicare beneficiary access to high-quality dialysis services of including specified oral drugs that are furnished to such beneficiaries for the treatment of end stage renal disease in the bundled prospective payment system under section 1881(b)(14) of the Social Security Act (42 U.S.C. 1395rr(b)(14)) (pursuant to the proposed rule published by the Secretary of Health and Human Services in the Federal Register on September 29, 2009 (74 Fed. Reg. 49922 et seq.)). Such study shall include an analysis of—

(A) the ability of providers of services and renal dialysis facilities to furnish specified oral drugs or arrange for the provision of such drugs;

(B) the ability of providers of services and renal dialysis facilities to comply, if necessary, with applicable State laws (such as State pharmacy licensure requirements) in order to furnish specified oral drugs;

(C) whether appropriate quality measures exist to safeguard care for Medicare beneficiaries being furnished specified oral drugs by providers of services and renal dialysis facilities; and

(D) other areas determined appropriate by the Comptroller General.

(2) SPECIFIED ORAL DRUG DEFINED.—For purposes of paragraph (1), the term “specified oral drug” means a drug or biological for which there is no injectable equivalent (or other non-oral form of administration).

(b) REPORT.—Not later than 1 year after the date of the enactment of this Act, the Comptroller General of the United States shall submit to Congress a report containing the results of the study conducted under subsection (a), together with recommendations for such legislation and administrative action as the Comptroller General determines appropriate.

Subtitle D—Provisions Relating to Title IV

SEC. 10401. AMENDMENTS TO SUBTITLE A.

(a) Section 4001(h)(4) and (5) of this Act is amended by striking “2010” each place such appears and inserting “2020”.

(b) Section 4002(c) of this Act is amended—

(1) by striking “research and health screenings” and inserting “research, health screenings, and initiatives”; and

(2) by striking “for Preventive” and inserting “Regarding Preventive”.

(c) Section 4004(a)(4) of this Act is amended by striking “a Gateway” and inserting “an Exchange”.

SEC. 10402. AMENDMENTS TO SUBTITLE B.

(a) Section 399Z-1(a)(1)(A) of the Public Health Service Act, as added by section 4101(b) of this Act, is amended by inserting “and vision” after “oral”.

(b) Section 1861(hhh)(4)(G) of the Social Security Act, as added by section 4103(b), is amended to read as follows:

“(G) A beneficiary shall be eligible to receive only an initial preventive physical examination (as defined under subsection (ww)(1)) during the 12-month period after the date that the beneficiary’s coverage begins

under part B and shall be eligible to receive personalized prevention plan services under this subsection each year thereafter provided that the beneficiary has not received either an initial preventive physical examination or personalized prevention plan services within the preceding 12-month period.”.

SEC. 10403. AMENDMENTS TO SUBTITLE C.

Section 4201 of this Act is amended—

(1) in subsection (a), by adding before the period the following: “, with not less than 20 percent of such grants being awarded to rural and frontier areas”;

(2) in subsection (c)(2)(B)(vii), by striking “both urban and rural areas” and inserting “urban, rural, and frontier areas”; and

(3) in subsection (f), by striking “each fiscal year” and inserting “each of fiscal year”.

SEC. 10404. AMENDMENTS TO SUBTITLE D.

Section 399MM(2) of the Public Health Service Act, as added by section 4303 of this Act, is amended by striking “by ensuring” and inserting “and ensuring”.

SEC. 10405. AMENDMENTS TO SUBTITLE E.

Subtitle E of title IV of this Act is amended by striking section 4401.

SEC. 10406. AMENDMENT RELATING TO WAIVING COINSURANCE FOR PREVENTIVE SERVICES.

Section 4104(b) of this Act is amended to read as follows:

“(b) PAYMENT AND ELIMINATION OF COINSURANCE IN ALL SETTINGS.—Section 1833(a)(1) of the Social Security Act (42 U.S.C. 1395l(a)(1)), as amended by section 4103(c)(1), is amended—

“(1) in subparagraph (T), by inserting ‘(or 100 percent if such services are recommended with a grade of A or B by the United States Preventive Services Task Force for any indication or population and are appropriate for the individual)’ after ‘80 percent’;

“(2) in subparagraph (W)—

“(A) in clause (i), by inserting ‘(if such subparagraph were applied, by substituting ‘100 percent’ for ‘80 percent’))’ after ‘subparagraph (D)’; and

“(B) in clause (ii), by striking ‘80 percent’ and inserting ‘100 percent’;

“(3) by striking ‘and’ before ‘(X)’; and

“(4) by inserting before the semicolon at the end the following: ‘, and (Y) with respect to preventive services described in subparagraphs (A) and (B) of section 1861(ddd)(3) that are appropriate for the individual and, in the case of such services described in subparagraph (A), are recommended with a grade of A or B by the United States Preventive Services Task Force for any indication or population, the amount paid shall be 100 percent of (i) except as provided in clause (ii), the lesser of the actual charge for the services or the amount determined under the fee schedule that applies to such services under this part, and (ii) in the case of such services that are covered OPD services (as defined in subsection (t)(1)(B)), the amount determined under subsection (t).’.

SEC. 10407. BETTER DIABETES CARE.

(a) SHORT TITLE.—This section may be cited as the “Catalyst to Better Diabetes Care Act of 2009”.

(b) NATIONAL DIABETES REPORT CARD.—

(1) IN GENERAL.—The Secretary, in collaboration with the Director of the Centers for Disease Control and Prevention (referred to in this section as the “Director”), shall prepare on a biennial basis a national diabetes report card (referred to in this section as a “Report Card”) and, to the extent possible, for each State.

(2) CONTENTS.—

(A) IN GENERAL.—Each Report Card shall include aggregate health outcomes related to individuals diagnosed with diabetes and prediabetes including—

- (i) preventative care practices and quality of care;
- (ii) risk factors; and
- (iii) outcomes.

(B) UPDATED REPORTS.—Each Report Card that is prepared after the initial Report Card shall include trend analysis for the Nation and, to the extent possible, for each State, for the purpose of—

- (i) tracking progress in meeting established national goals and objectives for improving diabetes care, costs, and prevalence (including Healthy People 2010); and
- (ii) informing policy and program development.

(3) AVAILABILITY.—The Secretary, in collaboration with the Director, shall make each Report Card publicly available, including by posting the Report Card on the Internet.

(C) IMPROVEMENT OF VITAL STATISTICS COLLECTION.—

(1) IN GENERAL.—The Secretary, acting through the Director of the Centers for Disease Control and Prevention and in collaboration with appropriate agencies and States, shall—

(A) promote the education and training of physicians on the importance of birth and death certificate data and how to properly complete these documents, including the collection of such data for diabetes and other chronic diseases;

(B) encourage State adoption of the latest standard revisions of birth and death certificates; and

(C) work with States to re-engineer their vital statistics systems in order to provide cost-effective, timely, and accurate vital systems data.

(2) DEATH CERTIFICATE ADDITIONAL LANGUAGE.—In carrying out this subsection, the Secretary may promote improvements to the collection of diabetes mortality data, including the addition of a question for the individual certifying the cause of death regarding whether the deceased had diabetes.

(d) STUDY ON APPROPRIATE LEVEL OF DIABETES MEDICAL EDUCATION.—

(1) IN GENERAL.—The Secretary shall, in collaboration with the Institute of Medicine and appropriate associations and councils, conduct a study of the impact of diabetes on the practice of medicine in the United States and the appropriateness of the level of diabetes medical education that should be required prior to licensure, board certification, and board recertification.

(2) REPORT.—Not later than 2 years after the date of the enactment of this Act, the Secretary shall submit a report on the study under paragraph (1) to the Committees on Ways and Means and Energy and Commerce of the House of Representatives and the Committees on Finance and Health, Education, Labor, and Pensions of the Senate.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section such sums as may be necessary.

SEC. 10408. GRANTS FOR SMALL BUSINESSES TO PROVIDE COMPREHENSIVE WORKPLACE WELLNESS PROGRAMS.

(a) ESTABLISHMENT.—The Secretary shall award grants to eligible employers to provide their employees with access to comprehensive workplace wellness programs (as described under subsection (c)).

(b) SCOPE.—

(1) DURATION.—The grant program established under this section shall be conducted for a 5-year period.

(2) ELIGIBLE EMPLOYER.—The term “eligible employer” means an employer (including a non-profit employer) that—

(A) employs less than 100 employees who work 25 hours or greater per week; and

(B) does not provide a workplace wellness program as of the date of enactment of this Act.

(c) COMPREHENSIVE WORKPLACE WELLNESS PROGRAMS.—

(1) CRITERIA.—The Secretary shall develop program criteria for comprehensive workplace wellness programs under this section that are based on and consistent with evidence-based research and best practices, including research and practices as provided in the Guide to Community Preventive Services, the Guide to Clinical Preventive Services, and the National Registry for Effective Programs.

(2) REQUIREMENTS.—A comprehensive workplace wellness program shall be made available by an eligible employer to all employees and include the following components:

(A) Health awareness initiatives (including health education, preventive screenings, and health risk assessments).

(B) Efforts to maximize employee engagement (including mechanisms to encourage employee participation).

(C) Initiatives to change unhealthy behaviors and lifestyle choices (including counseling, seminars, online programs, and self-help materials).

(D) Supportive environment efforts (including workplace policies to encourage healthy lifestyles, healthy eating, increased physical activity, and improved mental health).

(d) APPLICATION.—An eligible employer desiring to participate in the grant program under this section shall submit an application to the Secretary, in such manner and containing such information as the Secretary may require, which shall include a proposal for a comprehensive workplace wellness program that meet the criteria and requirements described under subsection (c).

(e) AUTHORIZATION OF APPROPRIATION.—For purposes of carrying out the grant program under this section, there is authorized to be appropriated \$200,000,000 for the period of fiscal years 2011 through 2015. Amounts appropriated pursuant to this subsection shall remain available until expended.

SEC. 10409. CURES ACCELERATION NETWORK.

(a) SHORT TITLE.—This section may be cited as the “Cures Acceleration Network Act of 2009”.

(b) REQUIREMENT FOR THE DIRECTOR OF NIH TO ESTABLISH A CURES ACCELERATION NETWORK.—Section 402(b) of the Public Health Service Act (42 U.S.C. 282(b)) is amended—

(1) in paragraph (22), by striking “and” at the end;

(2) in paragraph (23), by striking the period and inserting “; and”; and

(3) by inserting after paragraph (23), the following:

“(24) implement the Cures Acceleration Network described in section 402C.”.

(c) ACCEPTING GIFTS TO SUPPORT THE CURES ACCELERATION NETWORK.—Section 499(c)(1) of the Public Health Service Act (42 U.S.C. 290b(c)(1)) is amended by adding at the end the following:

“(E) The Cures Acceleration Network described in section 402C.”.

(d) ESTABLISHMENT OF THE CURES ACCELERATION NETWORK.—Part A of title IV of the

Public Health Service Act is amended by inserting after section 402B (42 U.S.C. 282b) the following:

“SEC. 402C. CURES ACCELERATION NETWORK.

“(a) DEFINITIONS.—In this section:

“(1) BIOLOGICAL PRODUCT.—The term ‘biological product’ has the meaning given such term in section 351 of the Public Health Service Act.

“(2) DRUG; DEVICE.—The terms ‘drug’ and ‘device’ have the meanings given such terms in section 201 of the Federal Food, Drug, and Cosmetic Act.

“(3) HIGH NEED CURE.—The term ‘high need cure’ means a drug (as that term is defined by section 201(g)(1) of the Federal Food, Drug, and Cosmetic Act, biological product (as that term is defined by section 262(i)), or device (as that term is defined by section 201(h) of the Federal Food, Drug, and Cosmetic Act) that, in the determination of the Director of NIH—

“(A) is a priority to diagnose, mitigate, prevent, or treat harm from any disease or condition; and

“(B) for which the incentives of the commercial market are unlikely to result in its adequate or timely development.

“(4) MEDICAL PRODUCT.—The term ‘medical product’ means a drug, device, biological product, or product that is a combination of drugs, devices, and biological products.

“(b) ESTABLISHMENT OF THE CURES ACCELERATION NETWORK.—Subject to the appropriation of funds as described in subsection (g), there is established within the Office of the Director of NIH a program to be known as the Cures Acceleration Network (referred to in this section as ‘CAN’), which shall—

“(1) be under the direction of the Director of NIH, taking into account the recommendations of a CAN Review Board (referred to in this section as the ‘Board’), described in subsection (d); and

“(2) award grants and contracts to eligible entities, as described in subsection (e), to accelerate the development of high need cures, including through the development of medical products and behavioral therapies.

“(c) FUNCTIONS.—The functions of the CAN are to—

“(1) conduct and support revolutionary advances in basic research, translating scientific discoveries from bench to bedside;

“(2) award grants and contracts to eligible entities to accelerate the development of high need cures;

“(3) provide the resources necessary for government agencies, independent investigators, research organizations, biotechnology companies, academic research institutions, and other entities to develop high need cures;

“(4) reduce the barriers between laboratory discoveries and clinical trials for new therapies; and

“(5) facilitate review in the Food and Drug Administration for the high need cures funded by the CAN, through activities that may include—

“(A) the facilitation of regular and ongoing communication with the Food and Drug Administration regarding the status of activities conducted under this section;

“(B) ensuring that such activities are coordinated with the approval requirements of the Food and Drug Administration, with the goal of expediting the development and approval of countermeasures and products; and

“(C) connecting interested persons with additional technical assistance made available under section 565 of the Federal Food, Drug, and Cosmetic Act.

“(d) CAN BOARD.—

“(1) ESTABLISHMENT.—There is established a Cures Acceleration Network Review Board (referred to in this section as the ‘Board’), which shall advise the Director of NIH on the conduct of the activities of the Cures Acceleration Network.

“(2) MEMBERSHIP.—

“(A) IN GENERAL.—

“(i) APPOINTMENT.—The Board shall be comprised of 24 members who are appointed by the Secretary and who serve at the pleasure of the Secretary.

“(ii) CHAIRPERSON AND VICE CHAIRPERSON.—The Secretary shall designate, from among the 24 members appointed under clause (i), one Chairperson of the Board (referred to in this section as the ‘Chairperson’) and one Vice Chairperson.

“(B) TERMS.—

“(i) IN GENERAL.—Each member shall be appointed to serve a 4-year term, except that any member appointed to fill a vacancy occurring prior to the expiration of the term for which the member's predecessor was appointed shall be appointed for the remainder of such term.

“(ii) CONSECUTIVE APPOINTMENTS; MAXIMUM TERMS.—A member may be appointed to serve not more than 3 terms on the Board, and may not serve more than 2 such terms consecutively.

“(C) QUALIFICATIONS.—

“(i) IN GENERAL.—The Secretary shall appoint individuals to the Board based solely upon the individual's established record of distinguished service in one of the areas of expertise described in clause (ii). Each individual appointed to the Board shall be of distinguished achievement and have a broad range of disciplinary interests.

“(ii) EXPERTISE.—The Secretary shall select individuals based upon the following requirements:

“(I) For each of the fields of—

“(aa) basic research;

“(bb) medicine;

“(cc) biopharmaceuticals;

“(dd) discovery and delivery of medical products;

“(ee) bioinformatics and gene therapy;

“(ff) medical instrumentation; and

“(gg) regulatory review and approval of medical products, the Secretary shall select at least 1 individual who is eminent in such fields.

“(II) At least 4 individuals shall be recognized leaders in professional venture capital or private equity organizations and have demonstrated experience in private equity investing.

“(III) At least 8 individuals shall represent disease advocacy organizations.

“(3) EX-OFFICIO MEMBERS.—

“(A) APPOINTMENT.—In addition to the 24 Board members described in paragraph (2), the Secretary shall appoint as ex-officio members of the Board—

“(i) a representative of the National Institutes of Health, recommended by the Secretary of the Department of Health and Human Services;

“(ii) a representative of the Office of the Assistant Secretary of Defense for Health Affairs, recommended by the Secretary of Defense;

“(iii) a representative of the Office of the Under Secretary for Health for the Veterans Health Administration, recommended by the Secretary of Veterans Affairs;

“(iv) a representative of the National Science Foundation, recommended by the Chair of the National Science Board; and

“(v) a representative of the Food and Drug Administration, recommended by the Commissioner of Food and Drugs.

“(B) TERMS.—Each ex-officio member shall serve a 3-year term on the Board, except that the Chairperson may adjust the terms of the initial ex-officio members in order to provide for a staggered term of appointment for all such members.

“(4) RESPONSIBILITIES OF THE BOARD AND THE DIRECTOR OF NIH.—

“(A) RESPONSIBILITIES OF THE BOARD.—

“(i) IN GENERAL.—The Board shall advise, and provide recommendations to, the Director of NIH with respect to—

“(I) policies, programs, and procedures for carrying out the duties of the Director of NIH under this section; and

“(II) significant barriers to successful translation of basic science into clinical application (including issues under the purview of other agencies and departments).

“(ii) REPORT.—In the case that the Board identifies a significant barrier, as described in clause (i)(II), the Board shall submit to the Secretary a report regarding such barrier.

“(B) RESPONSIBILITIES OF THE DIRECTOR OF NIH.—With respect to each recommendation provided by the Board under subparagraph (A)(i), the Director of NIH shall respond in writing to the Board, indicating whether such Director will implement such recommendation. In the case that the Director of NIH indicates a recommendation of the Board will not be implemented, such Director shall provide an explanation of the reasons for not implementing such recommendation.

“(5) MEETINGS.—

“(A) IN GENERAL.—The Board shall meet 4 times per calendar year, at the call of the Chairperson.

“(B) QUORUM; REQUIREMENTS; LIMITATIONS.—

“(i) QUORUM.—A quorum shall consist of a total of 13 members of the Board, excluding ex-officio members, with diverse representation as described in clause (iii).

“(ii) CHAIRPERSON OR VICE CHAIRPERSON.—Each meeting of the Board shall be attended by either the Chairperson or the Vice Chairperson.

“(iii) DIVERSE REPRESENTATION.—At each meeting of the Board, there shall be not less than one scientist, one representative of a disease advocacy organization, and one representative of a professional venture capital or private equity organization.

“(6) COMPENSATION AND TRAVEL EXPENSES.—

“(A) COMPENSATION.—Members shall receive compensation at a rate to be fixed by the Chairperson but not to exceed a rate equal to the daily equivalent of the annual rate of basic pay prescribed for level IV of the Executive Schedule under section 5315 of title 5, United States Code, for each day (including travel time) during which the member is engaged in the performance of the duties of the Board. All members of the Board who are officers or employees of the United States shall serve without compensation in addition to that received for their services as officers or employees of the United States.

“(B) TRAVEL EXPENSES.—Members of the Board shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for persons employed intermittently by the Federal Government under section 5703(b) of title 5, United States Code, while away from their homes or regular places of business in the performance of services for the Board.

“(e) GRANT PROGRAM.—

“(1) SUPPORTING INNOVATION.—To carry out the purposes described in this section, the

Director of NIH shall award contracts, grants, or cooperative agreements to the entities described in paragraph (2), to—

“(A) promote innovation in technologies supporting the advanced research and development and production of high need cures, including through the development of medical products and behavioral therapies.

“(B) accelerate the development of high need cures, including through the development of medical products, behavioral therapies, and biomarkers that demonstrate the safety or effectiveness of medical products; or

“(C) help the award recipient establish protocols that comply with Food and Drug Administration standards and otherwise permit the recipient to meet regulatory requirements at all stages of development, manufacturing, review, approval, and safety surveillance of a medical product.

“(2) ELIGIBLE ENTITIES.—To receive assistance under paragraph (1), an entity shall—

“(A) be a public or private entity, which may include a private or public research institution, an institution of higher education, a medical center, a biotechnology company, a pharmaceutical company, a disease advocacy organization, a patient advocacy organization, or an academic research institution;

“(B) submit an application containing—

“(i) a detailed description of the project for which the entity seeks such grant or contract;

“(ii) a timetable for such project;

“(iii) an assurance that the entity will submit—

“(I) interim reports describing the entity's—

“(aa) progress in carrying out the project; and

“(bb) compliance with all provisions of this section and conditions of receipt of such grant or contract; and

“(II) a final report at the conclusion of the grant period, describing the outcomes of the project; and

“(iv) a description of the protocols the entity will follow to comply with Food and Drug Administration standards and regulatory requirements at all stages of development, manufacturing, review, approval, and safety surveillance of a medical product; and

“(C) provide such additional information as the Director of NIH may require.

“(3) AWARDS.—

“(A) THE CURES ACCELERATION PARTNERSHIP AWARDS.—

“(i) INITIAL AWARD AMOUNT.—Each award under this subparagraph shall be not more than \$15,000,000 per project for the first fiscal year for which the project is funded, which shall be payable in one payment.

“(ii) FUNDING IN SUBSEQUENT FISCAL YEARS.—An eligible entity receiving an award under clause (i) may apply for additional funding for such project by submitting to the Director of NIH the information required under subparagraphs (B) and (C) of paragraph (2). The Director may fund a project of such eligible entity in an amount not to exceed \$15,000,000 for a fiscal year subsequent to the initial award under clause (i).

“(iii) MATCHING FUNDS.—As a condition for receiving an award under this subsection, an eligible entity shall contribute to the project non-Federal funds in the amount of \$1 for every \$3 awarded under clauses (i) and (ii), except that the Director of NIH may waive or modify such matching requirement in any case where the Director determines that the goals and objectives of this section cannot adequately be carried out unless such requirement is waived.

“(B) THE CURES ACCELERATION GRANT AWARDS.—

“(i) INITIAL AWARD AMOUNT.—Each award under this subparagraph shall be not more than \$15,000,000 per project for the first fiscal year for which the project is funded, which shall be payable in one payment.

“(ii) FUNDING IN SUBSEQUENT FISCAL YEARS.—An eligible entity receiving an award under clause (i) may apply for additional funding for such project by submitting to the Board the information required under subparagraphs (B) and (C) of paragraph (2). The Director of NIH may fund a project of such eligible entity in an amount not to exceed \$15,000,000 for a fiscal year subsequent to the initial award under clause (i).

“(C) THE CURES ACCELERATION FLEXIBLE RESEARCH AWARDS.—If the Director of NIH determines that the goals and objectives of this section cannot adequately be carried out through a contract, grant, or cooperative agreement, the Director of NIH shall have flexible research authority to use other transactions to fund projects in accordance with the terms and conditions of this section. Awards made under such flexible research authority for a fiscal year shall not exceed 20 percent of the total funds appropriated under subsection (g)(1) for such fiscal year.

“(4) SUSPENSION OF AWARDS FOR DEFAULTS, NONCOMPLIANCE WITH PROVISIONS AND PLANS, AND DIVERSION OF FUNDS; REPAYMENT OF FUNDS.—The Director of NIH may suspend the award to any entity upon noncompliance by such entity with provisions and plans under this section or diversion of funds.

“(5) AUDITS.—The Director of NIH may enter into agreements with other entities to conduct periodic audits of the projects funded by grants or contracts awarded under this subsection.

“(6) CLOSEOUT PROCEDURES.—At the end of a grant or contract period, a recipient shall follow the closeout procedures under section 74.71 of title 45, Code of Federal Regulations (or any successor regulation).

“(7) REVIEW.—A determination by the Director of NIH as to whether a drug, device, or biological product is a high need cure (for purposes of subsection (a)(3)) shall not be subject to judicial review.

“(f) COMPETITIVE BASIS OF AWARDS.—Any grant, cooperative agreement, or contract awarded under this section shall be awarded on a competitive basis.

“(g) AUTHORIZATION OF APPROPRIATIONS.—

“(1) IN GENERAL.—For purposes of carrying out this section, there are authorized to be appropriated \$500,000,000 for fiscal year 2010, and such sums as may be necessary for subsequent fiscal years. Funds appropriated under this section shall be available until expended.

“(2) LIMITATION ON USE OF FUNDS OTHERWISE APPROPRIATED.—No funds appropriated under this Act, other than funds appropriated under paragraph (1), may be allocated to the Cures Acceleration Network.”.

SEC. 10410. CENTERS OF EXCELLENCE FOR DEPRESSION.

(a) SHORT TITLE.—This section may be cited as the “Establishing a Network of Health-Advancing National Centers of Excellence for Depression Act of 2009” or the “ENHANCED Act of 2009”.

(b) CENTERS OF EXCELLENCE FOR DEPRESSION.—Subpart 3 of part B of title V of the Public Health Service Act (42 U.S.C. 290bb et seq.) is amended by inserting after section 520A the following:

“SEC. 520B. NATIONAL CENTERS OF EXCELLENCE FOR DEPRESSION.

“(a) DEPRESSIVE DISORDER DEFINED.—In this section, the term ‘depressive disorder’ means a mental or brain disorder relating to depression, including major depression, bipolar disorder, and related mood disorders.

“(b) GRANT PROGRAM.—

“(1) IN GENERAL.—The Secretary, acting through the Administrator, shall award grants on a competitive basis to eligible entities to establish national centers of excellence for depression (referred to in this section as ‘Centers’), which shall engage in activities related to the treatment of depressive disorders.

“(2) ALLOCATION OF AWARDS.—If the funds authorized under subsection (f) are appropriated in the amounts provided for under such subsection, the Secretary shall allocate such amounts so that—

“(A) not later than 1 year after the date of enactment of the ENHANCED Act of 2009, not more than 20 Centers may be established; and

“(B) not later than September 30, 2016, not more than 30 Centers may be established.

“(3) GRANT PERIOD.—

“(A) IN GENERAL.—A grant awarded under this section shall be for a period of 5 years.

“(B) RENEWAL.—A grant awarded under subparagraph (A) may be renewed, on a competitive basis, for 1 additional 5-year period, at the discretion of the Secretary. In determining whether to renew a grant, the Secretary shall consider the report cards issued under subsection (e)(2).

“(4) USE OF FUNDS.—Grant funds awarded under this subsection shall be used for the establishment and ongoing activities of the recipient of such funds.

“(5) ELIGIBLE ENTITIES.—

“(A) REQUIREMENTS.—To be eligible to receive a grant under this section, an entity shall—

“(i) be an institution of higher education or a public or private nonprofit research institution; and

“(ii) submit an application to the Secretary at such time and in such manner as the Secretary may require, as described in subparagraph (B).

“(B) APPLICATION.—An application described in subparagraph (A)(ii) shall include—

“(i) evidence that such entity—

“(I) provides, or is capable of coordinating with other entities to provide, comprehensive health services with a focus on mental health services and subspecialty expertise for depressive disorders;

“(II) collaborates with other mental health providers, as necessary, to address co-occurring mental illnesses;

“(III) is capable of training health professionals about mental health; and

“(ii) such other information, as the Secretary may require.

“(C) PRIORITIES.—In awarding grants under this section, the Secretary shall give priority to eligible entities that meet 1 or more of the following criteria:

“(i) Demonstrated capacity and expertise to serve the targeted population.

“(ii) Existing infrastructure or expertise to provide appropriate, evidence-based and culturally and linguistically competent services.

“(iii) A location in a geographic area with disproportionate numbers of underserved and at-risk populations in medically underserved areas and health professional shortage areas.

“(iv) Proposed innovative approaches for outreach to initiate or expand services.

“(v) Use of the most up-to-date science, practices, and interventions available.

“(vi) Demonstrated capacity to establish cooperative and collaborative agreements with community mental health centers and other community entities to provide mental health, social, and human services to individuals with depressive disorders.

“(6) NATIONAL COORDINATING CENTER.—

“(A) IN GENERAL.—The Secretary, acting through the Administrator, shall designate 1 recipient of a grant under this section to be the coordinating center of excellence for depression (referred to in this section as the ‘coordinating center’). The Secretary shall select such coordinating center on a competitive basis, based upon the demonstrated capacity of such center to perform the duties described in subparagraph (C).

“(B) APPLICATION.—A Center that has been awarded a grant under paragraph (1) may apply for designation as the coordinating center by submitting an application to the Secretary at such time, in such manner, and containing such information as the Secretary may require.

“(C) DUTIES.—The coordinating center shall—

“(i) develop, administer, and coordinate the network of Centers under this section;

“(ii) oversee and coordinate the national database described in subsection (d);

“(iii) lead a strategy to disseminate the findings and activities of the Centers through such database; and

“(iv) serve as a liaison with the Administration, the National Registry of Evidence-based Programs and Practices of the Administration, and any Federal interagency or interagency forum on mental health.

“(7) MATCHING FUNDS.—The Secretary may not award a grant or contract under this section to an entity unless the entity agrees that it will make available (directly or through contributions from other public or private entities) non-Federal contributions toward the activities to be carried out under the grant or contract in an amount equal to \$1 for each \$5 of Federal funds provided under the grant or contract. Such non-Federal matching funds may be provided directly or through donations from public or private entities and may be in cash or in-kind, fairly evaluated, including plant, equipment, or services.

“(c) ACTIVITIES OF THE CENTERS.—Each Center shall carry out the following activities:

“(1) GENERAL ACTIVITIES.—Each Center shall—

“(A) integrate basic, clinical, or health services interdisciplinary research and practice in the development, implementation, and dissemination of evidence-based interventions;

“(B) involve a broad cross-section of stakeholders, such as researchers, clinicians, consumers, families of consumers, and voluntary health organizations, to develop a research agenda and disseminate findings, and to provide support in the implementation of evidence-based practices;

“(C) provide training and technical assistance to mental health professionals, and engage in and disseminate translational research with a focus on meeting the needs of individuals with depressive disorders; and

“(D) educate policy makers, employers, community leaders, and the public about depressive disorders to reduce stigma and raise awareness of treatments.

“(2) IMPROVED TREATMENT STANDARDS, CLINICAL GUIDELINES, DIAGNOSTIC PROTOCOLS, AND CARE COORDINATION PRACTICE.—Each

Center shall collaborate with other Centers in the network to—

“(A) develop and implement treatment standards, clinical guidelines, and protocols that emphasize primary prevention, early intervention, treatment for, and recovery from, depressive disorders;

“(B) foster communication with other providers attending to co-occurring physical health conditions such as cardiovascular, diabetes, cancer, and substance abuse disorders;

“(C) leverage available community resources, develop and implement improved self-management programs, and, when appropriate, involve family and other providers of social support in the development and implementation of care plans; and

“(D) use electronic health records and telehealth technology to better coordinate and manage, and improve access to, care, as determined by the coordinating center.

“(3) TRANSLATIONAL RESEARCH THROUGH COLLABORATION OF CENTERS AND COMMUNITY-BASED ORGANIZATIONS.—Each Center shall—

“(A) demonstrate effective use of a public-private partnership to foster collaborations among members of the network and community-based organizations such as community mental health centers and other social and human services providers;

“(B) expand interdisciplinary, translational, and patient-oriented research and treatment; and

“(C) coordinate with accredited academic programs to provide ongoing opportunities for the professional and continuing education of mental health providers.

“(d) NATIONAL DATABASE.—

“(1) IN GENERAL.—The coordinating center shall establish and maintain a national, publicly available database to improve prevention programs, evidence-based interventions, and disease management programs for depressive disorders, using data collected from the Centers, as described in paragraph (2).

“(2) DATA COLLECTION.—Each Center shall submit data gathered at such center, as appropriate, to the coordinating center regarding—

“(A) the prevalence and incidence of depressive disorders;

“(B) the health and social outcomes of individuals with depressive disorders;

“(C) the effectiveness of interventions designed, tested, and evaluated;

“(D) other information, as the Secretary may require.

“(3) SUBMISSION OF DATA TO THE ADMINISTRATOR.—The coordinating center shall submit to the Administrator the data and financial information gathered under paragraph (2).

“(4) PUBLICATION USING DATA FROM THE DATABASE.—A Center, or an individual affiliated with a Center, may publish findings using the data described in paragraph (2) only if such center submits such data to the coordinating center, as required under such paragraph.

“(e) ESTABLISHMENT OF STANDARDS; REPORT CARDS AND RECOMMENDATIONS; THIRD PARTY REVIEW.—

“(1) ESTABLISHMENT OF STANDARDS.—The Secretary, acting through the Administrator, shall establish performance standards for—

“(A) each Center; and

“(B) the network of Centers as a whole.

“(2) REPORT CARDS.—The Secretary, acting through the Administrator, shall—

“(A) for each Center, not later than 3 years after the date on which such center of excellence is established and annually thereafter,

issue a report card to the coordinating center to rate the performance of such Center; and

“(B) not later than 3 years after the date on which the first grant is awarded under subsection (b)(1) and annually thereafter, issue a report card to Congress to rate the performance of the network of centers of excellence as a whole.

“(3) RECOMMENDATIONS.—Based upon the report cards described in paragraph (2), the Secretary shall, not later than September 30, 2015—

“(A) make recommendations to the Centers regarding improvements such centers shall make; and

“(B) make recommendations to Congress for expanding the Centers to serve individuals with other types of mental disorders.

“(4) THIRD PARTY REVIEW.—Not later than 3 years after the date on which the first grant is awarded under subsection (b)(1) and annually thereafter, the Secretary shall arrange for an independent third party to conduct an evaluation of the network of Centers to ensure that such centers are meeting the goals of this section.

“(f) AUTHORIZATION OF APPROPRIATIONS.—

“(1) IN GENERAL.—To carry out this section, there are authorized to be appropriated—

“(A) \$100,000,000 for each of the fiscal years 2011 through 2015; and

“(B) \$150,000,000 for each of the fiscal years 2016 through 2020.

“(2) ALLOCATION OF FUNDS AUTHORIZED.—Of the amount appropriated under paragraph (1) for a fiscal year, the Secretary shall determine the allocation of each Center receiving a grant under this section, but in no case may the allocation be more than \$5,000,000, except that the Secretary may allocate not more than \$10,000,000 to the coordinating center.”

SEC. 10411. PROGRAMS RELATING TO CONGENITAL HEART DISEASE.

(a) SHORT TITLE.—This subtitle may be cited as the “Congenital Heart Futures Act”.

(b) PROGRAMS RELATING TO CONGENITAL HEART DISEASE.—

(1) NATIONAL CONGENITAL HEART DISEASE SURVEILLANCE SYSTEM.—Part P of title III of the Public Health Service Act (42 U.S.C. 280g et seq.), as amended by section 5405, is further amended by adding at the end the following:

“SEC. 399V-2. NATIONAL CONGENITAL HEART DISEASE SURVEILLANCE SYSTEM.

“(a) IN GENERAL.—The Secretary, acting through the Director of the Centers for Disease Control and Prevention, may—

“(1) enhance and expand infrastructure to track the epidemiology of congenital heart disease and to organize such information into a nationally-representative, population-based surveillance system that compiles data concerning actual occurrences of congenital heart disease, to be known as the ‘National Congenital Heart Disease Surveillance System’; or

“(2) award a grant to one eligible entity to undertake the activities described in paragraph (1).

“(b) PURPOSE.—The purpose of the Congenital Heart Disease Surveillance System shall be to facilitate further research into the types of health services patients use and to identify possible areas for educational outreach and prevention in accordance with standard practices of the Centers for Disease Control and Prevention.

“(c) CONTENT.—The Congenital Heart Disease Surveillance System—

“(1) may include information concerning the incidence and prevalence of congenital heart disease in the United States;

“(2) may be used to collect and store data on congenital heart disease, including data concerning—

“(A) demographic factors associated with congenital heart disease, such as age, race, ethnicity, sex, and family history of individuals who are diagnosed with the disease;

“(B) risk factors associated with the disease;

“(C) causation of the disease;

“(D) treatment approaches; and

“(E) outcome measures, such that analysis of the outcome measures will allow derivation of evidence-based best practices and guidelines for congenital heart disease patients; and

“(3) may ensure the collection and analysis of longitudinal data related to individuals of all ages with congenital heart disease, including infants, young children, adolescents, and adults of all ages.

“(d) PUBLIC ACCESS.—The Congenital Heart Disease Surveillance System shall be made available to the public, as appropriate, including congenital heart disease researchers.

“(e) PATIENT PRIVACY.—The Secretary shall ensure that the Congenital Heart Disease Surveillance System is maintained in a manner that complies with the regulations promulgated under section 264 of the Health Insurance Portability and Accountability Act of 1996.

“(f) ELIGIBILITY FOR GRANT.—To be eligible to receive a grant under subsection (a)(2), an entity shall—

“(1) be a public or private nonprofit entity with specialized experience in congenital heart disease; and

“(2) submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require.”

(2) CONGENITAL HEART DISEASE RESEARCH.—Subpart 2 of part C of title IV of the Public Health Service Act (42 U.S.C. 285b et seq.) is amended by adding at the end the following:

“SEC. 425. CONGENITAL HEART DISEASE.

“(a) IN GENERAL.—The Director of the Institute may expand, intensify, and coordinate research and related activities of the Institute with respect to congenital heart disease, which may include congenital heart disease research with respect to—

“(1) causation of congenital heart disease, including genetic causes;

“(2) long-term outcomes in individuals with congenital heart disease, including infants, children, teenagers, adults, and elderly individuals;

“(3) diagnosis, treatment, and prevention;

“(4) studies using longitudinal data and retrospective analysis to identify effective treatments and outcomes for individuals with congenital heart disease; and

“(5) identifying barriers to life-long care for individuals with congenital heart disease.

“(b) COORDINATION OF RESEARCH ACTIVITIES.—The Director of the Institute may coordinate research efforts related to congenital heart disease among multiple research institutions and may develop research networks.

“(c) MINORITY AND MEDICALLY UNDERSERVED COMMUNITIES.—In carrying out the activities described in this section, the Director of the Institute shall consider the application of such research and other activities to minority and medically underserved communities.”

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to

carry out the amendments made by this section such sums as may be necessary for each of fiscal years 2011 through 2015.

SEC. 10412. AUTOMATED DEFIBRILLATION IN ADAM'S MEMORY ACT.

Section 312 of the Public Health Service Act (42 U.S.C. 244) is amended—

(1) in subsection (c)(6), after “clearing-house” insert “, that shall be administered by an organization that has substantial expertise in pediatric education, pediatric medicine, and electrophysiology and sudden death,”; and

(2) in the first sentence of subsection (e), by striking “fiscal year 2003” and all that follows through “2006” and inserting “for each of fiscal years 2003 through 2014”.

SEC. 10413. YOUNG WOMEN'S BREAST HEALTH AWARENESS AND SUPPORT OF YOUNG WOMEN DIAGNOSED WITH BREAST CANCER.

(a) **SHORT TITLE.**—This section may be cited as the “Young Women's Breast Health Education and Awareness Requires Learning Young Act of 2009” or the “EARLY Act”.

(b) **AMENDMENT.**—Title III of the Public Health Service Act (42 U.S.C. 241 et seq.), as amended by this Act, is further amended by adding at the end the following:

“PART V—PROGRAMS RELATING TO BREAST HEALTH AND CANCER

“SEC. 399NN. YOUNG WOMEN'S BREAST HEALTH AWARENESS AND SUPPORT OF YOUNG WOMEN DIAGNOSED WITH BREAST CANCER.

“(a) **PUBLIC EDUCATION CAMPAIGN.**—

“(1) **IN GENERAL.**—The Secretary, acting through the Director of the Centers for Disease Control and Prevention, shall conduct a national evidence-based education campaign to increase awareness of young women's knowledge regarding—

“(A) breast health in young women of all racial, ethnic, and cultural backgrounds;

“(B) breast awareness and good breast health habits;

“(C) the occurrence of breast cancer and the general and specific risk factors in women who may be at high risk for breast cancer based on familial, racial, ethnic, and cultural backgrounds such as Ashkenazi Jewish populations;

“(D) evidence-based information that would encourage young women and their health care professional to increase early detection of breast cancers; and

“(E) the availability of health information and other resources for young women diagnosed with breast cancer.

“(2) **EVIDENCE-BASED, AGE APPROPRIATE MESSAGES.**—The campaign shall provide evidence-based, age-appropriate messages and materials as developed by the Centers for Disease Control and Prevention and the Advisory Committee established under paragraph (4).

“(3) **MEDIA CAMPAIGN.**—In conducting the education campaign under paragraph (1), the Secretary shall award grants to entities to establish national multimedia campaigns oriented to young women that may include advertising through television, radio, print media, billboards, posters, all forms of existing and especially emerging social networking media, other Internet media, and any other medium determined appropriate by the Secretary.

“(4) **ADVISORY COMMITTEE.**—

“(A) **ESTABLISHMENT.**—Not later than 60 days after the date of the enactment of this section, the Secretary, acting through the Director of the Centers for Disease Control and Prevention, shall establish an advisory committee to assist in creating and con-

ducting the education campaigns under paragraph (1) and subsection (b)(1).

“(B) **MEMBERSHIP.**—The Secretary, acting through the Director of the Centers for Disease Control and Prevention, shall appoint to the advisory committee under subparagraph (A) such members as deemed necessary to properly advise the Secretary, and shall include organizations and individuals with expertise in breast cancer, disease prevention, early detection, diagnosis, public health, social marketing, genetic screening and counseling, treatment, rehabilitation, palliative care, and survivorship in young women.

“(b) **HEALTH CARE PROFESSIONAL EDUCATION CAMPAIGN.**—The Secretary, acting through the Director of the Centers for Disease Control and Prevention, and in consultation with the Administrator of the Health Resources and Services Administration, shall conduct an education campaign among physicians and other health care professionals to increase awareness—

“(1) of breast health, symptoms, and early diagnosis and treatment of breast cancer in young women, including specific risk factors such as family history of cancer and women that may be at high risk for breast cancer, such as Ashkenazi Jewish population;

“(2) on how to provide counseling to young women about their breast health, including knowledge of their family cancer history and importance of providing regular clinical breast examinations;

“(3) concerning the importance of discussing healthy behaviors, and increasing awareness of services and programs available to address overall health and wellness, and making patient referrals to address tobacco cessation, good nutrition, and physical activity;

“(4) on when to refer patients to a health care provider with genetics expertise;

“(5) on how to provide counseling that addresses long-term survivorship and health concerns of young women diagnosed with breast cancer; and

“(6) on when to provide referrals to organizations and institutions that provide credible health information and substantive assistance and support to young women diagnosed with breast cancer.

“(c) **PREVENTION RESEARCH ACTIVITIES.**—The Secretary, acting through—

“(1) the Director of the Centers for Disease Control and Prevention, shall conduct prevention research on breast cancer in younger women, including—

“(A) behavioral, survivorship studies, and other research on the impact of breast cancer diagnosis on young women;

“(B) formative research to assist with the development of educational messages and information for the public, targeted populations, and their families about breast health, breast cancer, and healthy lifestyles;

“(C) testing and evaluating existing and new social marketing strategies targeted at young women; and

“(D) surveys of health care providers and the public regarding knowledge, attitudes, and practices related to breast health and breast cancer prevention and control in high-risk populations; and

“(2) the Director of the National Institutes of Health, shall conduct research to develop and validate new screening tests and methods for prevention and early detection of breast cancer in young women.

“(d) **SUPPORT FOR YOUNG WOMEN DIAGNOSED WITH BREAST CANCER.**—

“(1) **IN GENERAL.**—The Secretary shall award grants to organizations and institu-

tions to provide health information from credible sources and substantive assistance directed to young women diagnosed with breast cancer and pre-neoplastic breast diseases.

“(2) **PRIORITY.**—In making grants under paragraph (1), the Secretary shall give priority to applicants that deal specifically with young women diagnosed with breast cancer and pre-neoplastic breast disease.

“(e) **NO DUPLICATION OF EFFORT.**—In conducting an education campaign or other program under subsections (a), (b), (c), or (d), the Secretary shall avoid duplicating other existing Federal breast cancer education efforts.

“(f) **MEASUREMENT; REPORTING.**—The Secretary, acting through the Director of the Centers for Disease Control and Prevention, shall—

“(1) measure—

“(A) young women's awareness regarding breast health, including knowledge of family cancer history, specific risk factors and early warning signs, and young women's proactive efforts at early detection;

“(B) the number or percentage of young women utilizing information regarding lifestyle interventions that foster healthy behaviors;

“(C) the number or percentage of young women receiving regular clinical breast exams; and

“(D) the number or percentage of young women who perform breast self exams, and the frequency of such exams, before the implementation of this section;

“(2) not less than every 3 years, measure the impact of such activities; and

“(3) submit reports to the Congress on the results of such measurements.

“(g) **DEFINITION.**—In this section, the term “young women” means women 15 to 44 years of age.

“(h) **AUTHORIZATION OF APPROPRIATIONS.**—To carry out subsections (a), (b), (c)(1), and (d), there are authorized to be appropriated \$9,000,000 for each of the fiscal years 2010 through 2014.”.

Subtitle E—Provisions Relating to Title V

SEC. 10501. AMENDMENTS TO THE PUBLIC HEALTH SERVICE ACT, THE SOCIAL SECURITY ACT, AND TITLE V OF THIS ACT.

(a) Section 5101 of this Act is amended—

(1) in subsection (c)(2)(B)(i)(II), by inserting “, including representatives of small business and self-employed individuals” after “employers”; and

(2) in subsection (d)(4)(A)—

(A) by redesignating clause (iv) as clause (v); and

(B) by inserting after clause (iii) the following:

“(iv) An analysis of, and recommendations for, eliminating the barriers to entering and staying in primary care, including provider compensation.”; and

(3) in subsection (i)(2)(B), by inserting “occupational therapists,” after “occupational therapists.”.

(b) Subtitle B of title V of this Act is amended by adding at the end the following:

“SEC. 5104. INTERAGENCY TASK FORCE TO ASSESS AND IMPROVE ACCESS TO HEALTH CARE IN THE STATE OF ALASKA.

“(a) **ESTABLISHMENT.**—There is established a task force to be known as the ‘Interagency Access to Health Care in Alaska Task Force’ (referred to in this section as the ‘Task Force’).

“(b) **DUTIES.**—The Task Force shall—

“(1) assess access to health care for beneficiaries of Federal health care systems in Alaska; and

“(2) develop a strategy for the Federal Government to improve delivery of health care to Federal beneficiaries in the State of Alaska.

“(c) MEMBERSHIP.—The Task Force shall be comprised of Federal members who shall be appointed, not later than 45 days after the date of enactment of this Act, as follows:

“(1) The Secretary of Health and Human Services shall appoint one representative of each of the following:

“(A) The Department of Health and Human Services.

“(B) The Centers for Medicare and Medicaid Services.

“(C) The Indian Health Service.

“(2) The Secretary of Defense shall appoint one representative of the TRICARE Management Activity.

“(3) The Secretary of the Army shall appoint one representative of the Army Medical Department.

“(4) The Secretary of the Air Force shall appoint one representative of the Air Force, from among officers at the Air Force performing medical service functions.

“(5) The Secretary of Veterans Affairs shall appoint one representative of each of the following:

“(A) The Department of Veterans Affairs.

“(B) The Veterans Health Administration.

“(6) The Secretary of Homeland Security shall appoint one representative of the United States Coast Guard.

“(d) CHAIRPERSON.—One chairperson of the Task Force shall be appointed by the Secretary at the time of appointment of members under subsection (c), selected from among the members appointed under paragraph (1).

“(e) MEETINGS.—The Task Force shall meet at the call of the chairperson.

“(f) REPORT.—Not later than 180 days after the date of enactment of this Act, the Task Force shall submit to Congress a report detailing the activities of the Task Force and containing the findings, strategies, recommendations, policies, and initiatives developed pursuant to the duty described in subsection (b)(2). In preparing such report, the Task Force shall consider completed and ongoing efforts by Federal agencies to improve access to health care in the State of Alaska.

“(g) TERMINATION.—The Task Force shall be terminated on the date of submission of the report described in subsection (f).”

(c) Section 399V of the Public Health Service Act, as added by section 5313, is amended—

(1) in subsection (b)(4), by striking “identify, educate, refer, and enroll” and inserting “identify and refer”; and

(2) in subsection (k)(1), by striking “, as defined by the Department of Labor as Standard Occupational Classification [21–1094]”.

(d) Section 738(a)(3) of the Public Health Service Act (42 U.S.C. 293b(a)(3)) is amended by inserting “schools offering physician assistant education programs,” after “public health,”.

(e) Subtitle D of title V of this Act is amended by adding at the end the following:

“SEC. 5316. DEMONSTRATION GRANTS FOR FAMILY NURSE PRACTITIONER TRAINING PROGRAMS.

“(a) ESTABLISHMENT OF PROGRAM.—The Secretary of Health and Human Services (referred to in this section as the ‘Secretary’) shall establish a training demonstration program for family nurse practitioners (referred to in this section as the ‘program’) to employ and provide 1-year training for nurse practitioners who have graduated from a

nurse practitioner program for careers as primary care providers in Federally qualified health centers (referred to in this section as ‘FQHCs’) and nurse-managed health clinics (referred to in this section as ‘NMHCs’).

“(b) PURPOSE.—The purpose of the program is to enable each grant recipient to—

“(1) provide new nurse practitioners with clinical training to enable them to serve as primary care providers in FQHCs and NMHCs;

“(2) train new nurse practitioners to work under a model of primary care that is consistent with the principles set forth by the Institute of Medicine and the needs of vulnerable populations; and

“(3) create a model of FQHC and NMHC training for nurse practitioners that may be replicated nationwide.

“(c) GRANTS.—The Secretary shall award 3-year grants to eligible entities that meet the requirements established by the Secretary, for the purpose of operating the nurse practitioner primary care programs described in subsection (a) in such entities.

“(d) ELIGIBLE ENTITIES.—To be eligible to receive a grant under this section, an entity shall—

“(1)(A) be a FQHC as defined in section 1861(aa) of the Social Security Act (42 U.S.C. 1395x(aa)); or

“(B) be a nurse-managed health clinic, as defined in section 330A-1 of the Public Health Service Act (as added by section 5208 of this Act); and

“(2) submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require.

“(e) PRIORITY IN AWARDED GRANTS.—In awarding grants under this section, the Secretary shall give priority to eligible entities that—

“(1) demonstrate sufficient infrastructure in size, scope, and capacity to undertake the requisite training of a minimum of 3 nurse practitioners per year, and to provide to each awardee 12 full months of full-time, paid employment and benefits consistent with the benefits offered to other full-time employees of such entity;

“(2) will assign not less than 1 staff nurse practitioner or physician to each of 4 precepted clinics;

“(3) will provide to each awardee specialty rotations, including specialty training in prenatal care and women’s health, adult and child psychiatry, orthopedics, geriatrics, and at least 3 other high-volume, high-burden specialty areas;

“(4) provide sessions on high-volume, high-risk health problems and have a record of training health care professionals in the care of children, older adults, and underserved populations; and

“(5) collaborate with other safety net providers, schools, colleges, and universities that provide health professions training.

“(f) ELIGIBILITY OF NURSE PRACTITIONERS.—

“(1) IN GENERAL.—To be eligible for acceptance to a program funded through a grant awarded under this section, an individual shall—

“(A) be licensed or eligible for licensure in the State in which the program is located as an advanced practice registered nurse or advanced practice nurse and be eligible or board-certified as a family nurse practitioner; and

“(B) demonstrate commitment to a career as a primary care provider in a FQHC or in a NMHC.

“(2) PREFERENCE.—In selecting awardees under the program, each grant recipient

shall give preference to bilingual candidates that meet the requirements described in paragraph (1).

“(3) DEFERRAL OF CERTAIN SERVICE.—The starting date of required service of individuals in the National Health Service Corps Service program under title II of the Public Health Service Act (42 U.S.C. 202 et seq.) who receive training under this section shall be deferred until the date that is 22 days after the date of completion of the program.

“(g) GRANT AMOUNT.—Each grant awarded under this section shall be in an amount not to exceed \$600,000 per year. A grant recipient may carry over funds from 1 fiscal year to another without obtaining approval from the Secretary.

“(h) TECHNICAL ASSISTANCE GRANTS.—The Secretary may award technical assistance grants to 1 or more FQHCs or NMHCs that have demonstrated expertise in establishing a nurse practitioner residency training program. Such technical assistance grants shall be for the purpose of providing technical assistance to other recipients of grants under subsection (c).

“(i) AUTHORIZATION OF APPROPRIATIONS.—To carry out this section, there is authorized to be appropriated such sums as may be necessary for each of fiscal years 2011 through 2014.”

(f)(1) Section 399W of the Public Health Service Act, as added by section 5405, is redesignated as section 399V-1.

(2) Section 399V-1 of the Public Health Service Act, as so redesignated, is amended in subsection (b)(2)(A) by striking “and the departments of 1 or more health professions schools in the State that train providers in primary care” and inserting “and the departments that train providers in primary care in 1 or more health professions schools in the State”.

(3) Section 934 of the Public Health Service Act, as added by section 3501, is amended by striking “399W” each place such term appears and inserting “399V-1”.

(4) Section 935(b) of the Public Health Service Act, as added by section 3503, is amended by striking “399W” and inserting “399V-1”.

(g) Part P of title III of the Public Health Service Act 42 U.S.C. 280g et seq.), as amended by section 10411, is amended by adding at the end the following:

“SEC. 399V-3. NATIONAL DIABETES PREVENTION PROGRAM.

“(a) IN GENERAL.—The Secretary, acting through the Director of the Centers for Disease Control and Prevention, shall establish a national diabetes prevention program (referred to in this section as the ‘program’) targeted at adults at high risk for diabetes in order to eliminate the preventable burden of diabetes.

“(b) PROGRAM ACTIVITIES.—The program described in subsection (a) shall include—

“(1) a grant program for community-based diabetes prevention program model sites;

“(2) a program within the Centers for Disease Control and Prevention to determine eligibility of entities to deliver community-based diabetes prevention services;

“(3) a training and outreach program for lifestyle intervention instructors; and

“(4) evaluation, monitoring and technical assistance, and applied research carried out by the Centers for Disease Control and Prevention.

“(c) ELIGIBLE ENTITIES.—To be eligible for a grant under subsection (b)(1), an entity shall be a State or local health department, a tribal organization, a national network of community-based non-profits focused on

health and wellbeing, an academic institution, or other entity, as the Secretary determines.

“(d) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of carrying out this section, there are authorized to be appropriated such sums as may be necessary for each of fiscal years 2010 through 2014.”.

(h) The provisions of, and amendment made by, section 5501(c) of this Act are repealed.

(i)(1) The provisions of, and amendments made by, section 5502 of this Act are repealed.

(2)(A) Section 1861(aa)(3)(A) of the Social Security Act (42 U.S.C. 1395w(aa)(3)(A)) is amended to read as follows:

“(A) services of the type described in subparagraphs (A) through (C) of paragraph (1) and preventive services (as defined in section 1861(ddd)(3)); and”.

(B) The amendment made by subparagraph (A) shall apply to services furnished on or after January 1, 2011.

(3)(A) Section 1834 of the Social Security Act (42 U.S.C. 1395m), as amended by section 4105, is amended by adding at the end the following new subsection:

“(o) DEVELOPMENT AND IMPLEMENTATION OF PROSPECTIVE PAYMENT SYSTEM.—

“(1) DEVELOPMENT.—

“(A) IN GENERAL.—The Secretary shall develop a prospective payment system for payment for Federally qualified health center services furnished by Federally qualified health centers under this title. Such system shall include a process for appropriately describing the services furnished by Federally qualified health centers and shall establish payment rates for specific payment codes based on such appropriate descriptions of services. Such system shall be established to take into account the type, intensity, and duration of services furnished by Federally qualified health centers. Such system may include adjustments, including geographic adjustments, determined appropriate by the Secretary.

“(B) COLLECTION OF DATA AND EVALUATION.—By not later than January 1, 2011, the Secretary shall require Federally qualified health centers to submit to the Secretary such information as the Secretary may require in order to develop and implement the prospective payment system under this subsection, including the reporting of services using HCPCS codes.

“(2) IMPLEMENTATION.—

“(A) IN GENERAL.—Notwithstanding section 1833(a)(3)(A), the Secretary shall provide, for cost reporting periods beginning on or after October 1, 2014, for payments of prospective payment rates for Federally qualified health center services furnished by Federally qualified health centers under this title in accordance with the prospective payment system developed by the Secretary under paragraph (1).

“(B) PAYMENTS.—

“(i) INITIAL PAYMENTS.—The Secretary shall implement such prospective payment system so that the estimated aggregate amount of prospective payment rates (determined prior to the application of section 1833(a)(1)(Z)) under this title for Federally qualified health center services in the first year that such system is implemented is equal to 100 percent of the estimated amount of reasonable costs (determined without the application of a per visit payment limit or productivity screen and prior to the application of section 1866(a)(2)(A)(ii)) that would have occurred for such services under this title in such year if the system had not been implemented.

“(ii) PAYMENTS IN SUBSEQUENT YEARS.—Payment rates in years after the year of implementation of such system shall be the payment rates in the previous year increased—

“(I) in the first year after implementation of such system, by the percentage increase in the MEI (as defined in section 1842(i)(3)) for the year involved; and

“(II) in subsequent years, by the percentage increase in a market basket of Federally qualified health center goods and services as promulgated through regulations, or if such an index is not available, by the percentage increase in the MEI (as defined in section 1842(i)(3)) for the year involved.

“(C) PREPARATION FOR PPS IMPLEMENTATION.—Notwithstanding any other provision of law, the Secretary may establish and implement by program instruction or otherwise the payment codes to be used under the prospective payment system under this section.”.

(B) Section 1833(a)(1) of the Social Security Act (42 U.S.C. 1395l(a)(1)), as amended by section 4104, is amended—

(i) by striking “and” before “(Y)”;

(ii) by inserting before the semicolon at the end the following: “, and (Z) with respect to Federally qualified health center services for which payment is made under section 1834(o), the amounts paid shall be 80 percent of the lesser of the actual charge or the amount determined under such section”.

(C) Section 1833(a) of the Social Security Act (42 U.S.C. 1395l(a)) is amended—

(i) in paragraph (3)(B)(i)—

(I) by inserting “(I)” after “otherwise been provided”; and

(II) by inserting “, or (II) in the case of such services furnished on or after the implementation date of the prospective payment system under section 1834(o), under such section (calculated as if ‘100 percent’ were substituted for ‘80 percent’ in such section) for such services if the individual had not been so enrolled” after “been so enrolled”; and

(ii) by adding at the end the following flush sentence:

“Paragraph (3)(A) shall not apply to Federally qualified health center services furnished on or after the implementation date of the prospective payment system under section 1834(o).”.

(j) Section 5505 is amended by adding at the end the following new subsection:

“(d) APPLICATION.—The amendments made by this section shall not be applied in a manner that requires reopening of any settled cost reports as to which there is not a jurisdictionally proper appeal pending as of the date of the enactment of this Act on the issue of payment for indirect costs of medical education under section 1886(d)(5)(B) of the Social Security Act (42 U.S.C. 1395ww(d)(5)(B)) or for direct graduate medical education costs under section 1886(h) of such Act (42 U.S.C. 1395ww(h)).”.

(k) Subtitle G of title V of this Act is amended by adding at the end the following:

“SEC. 5606. STATE GRANTS TO HEALTH CARE PROVIDERS WHO PROVIDE SERVICES TO A HIGH PERCENTAGE OF MEDICALLY UNDERSERVED POPULATIONS OR OTHER SPECIAL POPULATIONS.

“(a) IN GENERAL.—A State may award grants to health care providers who treat a high percentage, as determined by such State, of medically underserved populations or other special populations in such State.

“(b) SOURCE OF FUNDS.—A grant program established by a State under subsection (a) may not be established within a department, agency, or other entity of such State that

administers the Medicaid program under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.), and no Federal or State funds allocated to such Medicaid program, the Medicare program under title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.), or the TRICARE program under chapter 55 of title 10, United States Code, may be used to award grants or to pay administrative costs associated with a grant program established under subsection (a).”.

(l) Part C of title VII of the Public Health Service Act (42 U.S.C. 293k et seq.) is amended—

(1) after the part heading, by inserting the following:

“Subpart I—Medical Training Generally”;

and

(2) by inserting at the end the following:

“Subpart II—Training in Underserved Communities

“SEC. 749B. RURAL PHYSICIAN TRAINING GRANTS.

“(a) IN GENERAL.—The Secretary, acting through the Administrator of the Health Resources and Services Administration, shall establish a grant program for the purposes of assisting eligible entities in recruiting students most likely to practice medicine in underserved rural communities, providing rural-focused training and experience, and increasing the number of recent allopathic and osteopathic medical school graduates who practice in underserved rural communities.

“(b) ELIGIBLE ENTITIES.—In order to be eligible to receive a grant under this section, an entity shall—

“(1) be a school of allopathic or osteopathic medicine accredited by a nationally recognized accrediting agency or association approved by the Secretary for this purpose, or any combination or consortium of such schools; and

“(2) submit an application to the Secretary that includes a certification that such entity will use amounts provided to the institution as described in subsection (d)(1).

“(c) PRIORITY.—In awarding grant funds under this section, the Secretary shall give priority to eligible entities that—

“(1) demonstrate a record of successfully training students, as determined by the Secretary, who practice medicine in underserved rural communities;

“(2) demonstrate that an existing academic program of the eligible entity produces a high percentage, as determined by the Secretary, of graduates from such program who practice medicine in underserved rural communities;

“(3) demonstrate rural community institutional partnerships, through such mechanisms as matching or contributory funding, documented in-kind services for implementation, or existence of training partners with interprofessional expertise in community health center training locations or other similar facilities; or

“(4) submit, as part of the application of the entity under subsection (b), a plan for the long-term tracking of where the graduates of such entity practice medicine.

“(d) USE OF FUNDS.—

“(1) ESTABLISHMENT.—An eligible entity receiving a grant under this section shall use the funds made available under such grant to establish, improve, or expand a rural-focused training program (referred to in this section as the ‘Program’) meeting the requirements described in this subsection and to carry out such program.

“(2) STRUCTURE OF PROGRAM.—An eligible entity shall—

“(A) enroll no fewer than 10 students per class year into the Program; and

“(B) develop criteria for admission to the Program that gives priority to students—

“(i) who have originated from or lived for a period of 2 or more years in an underserved rural community; and

“(ii) who express a commitment to practice medicine in an underserved rural community.

“(3) CURRICULA.—The Program shall require students to enroll in didactic coursework and clinical experience particularly applicable to medical practice in underserved rural communities, including—

“(A) clinical rotations in underserved rural communities, and in applicable specialties, or other coursework or clinical experience deemed appropriate by the Secretary; and

“(B) in addition to core school curricula, additional coursework or training experiences focused on medical issues prevalent in underserved rural communities.

“(4) RESIDENCY PLACEMENT ASSISTANCE.—Where available, the Program shall assist all students of the Program in obtaining clinical training experiences in locations with postgraduate programs offering residency training opportunities in underserved rural communities, or in local residency training programs that support and train physicians to practice in underserved rural communities.

“(5) PROGRAM STUDENT COHORT SUPPORT.—The Program shall provide and require all students of the Program to participate in group activities designed to further develop, maintain, and reinforce the original commitment of such students to practice in an underserved rural community.

“(e) ANNUAL REPORTING.—An eligible entity receiving a grant under this section shall submit an annual report to the Secretary on the success of the Program, based on criteria the Secretary determines appropriate, including the residency program selection of graduating students who participated in the Program.

“(f) REGULATIONS.—Not later than 60 days after the date of enactment of this section, the Secretary shall by regulation define ‘underserved rural community’ for purposes of this section.

“(g) SUPPLEMENT NOT SUPPLANT.—Any eligible entity receiving funds under this section shall use such funds to supplement, not supplant, any other Federal, State, and local funds that would otherwise be expended by such entity to carry out the activities described in this section.

“(h) MAINTENANCE OF EFFORT.—With respect to activities for which funds awarded under this section are to be expended, the entity shall agree to maintain expenditures of non-Federal amounts for such activities at a level that is not less than the level of such expenditures maintained by the entity for the fiscal year preceding the fiscal year for which the entity receives a grant under this section.

“(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated \$4,000,000 for each of the fiscal years 2010 through 2013.”

(m)(1) Section 768 of the Public Health Service Act (42 U.S.C. 295c) is amended to read as follows:

“SEC. 768. PREVENTIVE MEDICINE AND PUBLIC HEALTH TRAINING GRANT PROGRAM.

“(a) GRANTS.—The Secretary, acting through the Administrator of the Health Resources and Services Administration and in consultation with the Director of the Centers for Disease Control and Prevention,

shall award grants to, or enter into contracts with, eligible entities to provide training to graduate medical residents in preventive medicine specialties.

“(b) ELIGIBILITY.—To be eligible for a grant or contract under subsection (a), an entity shall be—

“(1) an accredited school of public health or school of medicine or osteopathic medicine;

“(2) an accredited public or private non-profit hospital;

“(3) a State, local, or tribal health department; or

“(4) a consortium of 2 or more entities described in paragraphs (1) through (3).

“(c) USE OF FUNDS.—Amounts received under a grant or contract under this section shall be used to—

“(1) plan, develop (including the development of curricula), operate, or participate in an accredited residency or internship program in preventive medicine or public health;

“(2) defray the costs of practicum experiences, as required in such a program; and

“(3) establish, maintain, or improve—

“(A) academic administrative units (including departments, divisions, or other appropriate units) in preventive medicine and public health; or

“(B) programs that improve clinical teaching in preventive medicine and public health.

“(d) REPORT.—The Secretary shall submit to the Congress an annual report on the program carried out under this section.”

(2) Section 770(a) of the Public Health Service Act (42 U.S.C. 295e(a)) is amended to read as follows:

“(a) IN GENERAL.—For the purpose of carrying out this subpart, there is authorized to be appropriated \$43,000,000 for fiscal year 2011, and such sums as may be necessary for each of the fiscal years 2012 through 2015.”

(n)(1) Subsection (i) of section 331 of the Public Health Service Act (42 U.S.C. 254d) of the Public Health Service Act is amended—

(A) in paragraph (1), by striking “In carrying out subpart III” and all that follows through the period and inserting “In carrying out subpart III, the Secretary may, in accordance with this subsection, issue waivers to individuals who have entered into a contract for obligated service under the Scholarship Program or the Loan Repayment Program under which the individuals are authorized to satisfy the requirement of obligated service through providing clinical practice that is half time.”;

(B) in paragraph (2)—

(i) in subparagraphs (A)(ii) and (B), by striking “less than full time” each place it appears and inserting “half time”;

(ii) in subparagraphs (C) and (F), by striking “less than full-time service” each place it appears and inserting “half-time service”;

(iii) by amending subparagraphs (D) and (E) to read as follows:

“(D) the entity and the Corps member agree in writing that the Corps member will perform half-time clinical practice;

“(E) the Corps member agrees in writing to fulfill all of the service obligations under section 338C through half-time clinical practice and either—

“(i) double the period of obligated service that would otherwise be required; or

“(ii) in the case of contracts entered into under section 338B, accept a minimum service obligation of 2 years with an award amount equal to 50 percent of the amount that would otherwise be payable for full-time service; and”;

(C) in paragraph (3), by striking “In evaluating a demonstration project described in paragraph (1)” and inserting “In evaluating waivers issued under paragraph (1)”.

(2) Subsection (j) of section 331 of the Public Health Service Act (42 U.S.C. 254d) is amended by adding at the end the following:

“(5) The terms ‘full time’ and ‘full-time’ mean a minimum of 40 hours per week in a clinical practice, for a minimum of 45 weeks per year.

“(6) The terms ‘half time’ and ‘half-time’ mean a minimum of 20 hours per week (not to exceed 39 hours per week) in a clinical practice, for a minimum of 45 weeks per year.”

(3) Section 337(b)(1) of the Public Health Service Act (42 U.S.C. 254j(b)(1)) is amended by striking “Members may not be reappointed to the Council.”

(4) Section 338B(g)(2)(A) of the Public Health Service Act (42 U.S.C. 254l-1(g)(2)(A)) is amended by striking “\$35,000” and inserting “\$50,000, plus, beginning with fiscal year 2012, an amount determined by the Secretary on an annual basis to reflect inflation.”

(5) Subsection (a) of section 338C of the Public Health Service Act (42 U.S.C. 254m), as amended by section 5508, is amended—

(A) by striking the second sentence and inserting the following: “The Secretary may treat teaching as clinical practice for up to 20 percent of such period of obligated service.”; and

(B) by adding at the end the following: “Notwithstanding the preceding sentence, with respect to a member of the Corps participating in the teaching health centers graduate medical education program under section 340H, for the purpose of calculating time spent in full-time clinical practice under this section, up to 50 percent of time spent teaching by such member may be counted toward his or her service obligation.”

SEC. 10502. INFRASTRUCTURE TO EXPAND ACCESS TO CARE.

(a) APPROPRIATION.—There are authorized to be appropriated, and there are appropriated to the Department of Health and Human Services, \$100,000,000 for fiscal year 2010, to remain available for obligation until September 30, 2011, to be used for debt service on, or direct construction or renovation of, a health care facility that provides research, inpatient tertiary care, or outpatient clinical services. Such facility shall be affiliated with an academic health center at a public research university in the United States that contains a State’s sole public academic medical and dental school.

(b) REQUIREMENT.—Amount appropriated under subsection (a) may only be made available by the Secretary of Health and Human Services upon the receipt of an application from the Governor of a State that certifies that—

(1) the new health care facility is critical for the provision of greater access to health care within the State;

(2) such facility is essential for the continued financial viability of the State’s sole public medical and dental school and its academic health center;

(3) the request for Federal support represents not more than 40 percent of the total cost of the proposed new facility; and

(4) the State has established a dedicated funding mechanism to provide all remaining funds necessary to complete the construction or renovation of the proposed facility.

SEC. 10503. COMMUNITY HEALTH CENTERS AND THE NATIONAL HEALTH SERVICE CORPS FUND.

(a) PURPOSE.—It is the purpose of this section to establish a Community Health Center

Fund (referred to in this section as the "CHC Fund"), to be administered through the Office of the Secretary of the Department of Health and Human Services to provide for expanded and sustained national investment in community health centers under section 330 of the Public Health Service Act and the National Health Service Corps.

(b) FUNDING.—There is authorized to be appropriated, and there is appropriated, out of any monies in the Treasury not otherwise appropriated, to the CHC Fund—

(1) to be transferred to the Secretary of Health and Human Services to provide enhanced funding for the community health center program under section 330 of the Public Health Service Act—

- (A) \$700,000,000 for fiscal year 2011;
- (B) \$800,000,000 for fiscal year 2012;
- (C) \$1,000,000,000 for fiscal year 2013;
- (D) \$1,600,000,000 for fiscal year 2014; and
- (E) \$2,900,000,000 for fiscal year 2015; and

(2) to be transferred to the Secretary of Health and Human Services to provide enhanced funding for the National Health Service Corps—

- (A) \$290,000,000 for fiscal year 2011;
- (B) \$295,000,000 for fiscal year 2012;
- (C) \$300,000,000 for fiscal year 2013;
- (D) \$305,000,000 for fiscal year 2014; and
- (E) \$310,000,000 for fiscal year 2015.

(c) CONSTRUCTION.—There is authorized to be appropriated, and there is appropriated, out of any monies in the Treasury not otherwise appropriated, \$1,500,000,000 to be available for fiscal years 2011 through 2015 to be used by the Secretary of Health and Human Services for the construction and renovation of community health centers.

(d) USE OF FUND.—The Secretary of Health and Human Services shall transfer amounts in the CHC Fund to accounts within the Department of Health and Human Services to increase funding, over the fiscal year 2008 level, for community health centers and the National Health Service Corps.

(e) AVAILABILITY.—Amounts appropriated under subsections (b) and (c) shall remain available until expended.

SEC. 10504. DEMONSTRATION PROJECT TO PROVIDE ACCESS TO AFFORDABLE CARE.

(a) IN GENERAL.—Not later than 6 months after the date of enactment of this Act, the Secretary of Health and Human Services (referred to in this section as the "Secretary"), acting through the Health Resources and Services Administration, shall establish a 3 year demonstration project in up to 10 States to provide access to comprehensive health care services to the uninsured at reduced fees. The Secretary shall evaluate the feasibility of expanding the project to additional States.

(b) ELIGIBILITY.—To be eligible to participate in the demonstration project, an entity shall be a State-based, nonprofit, public-private partnership that provides access to comprehensive health care services to the uninsured at reduced fees. Each State in which a participant selected by the Secretary is located shall receive not more than \$2,000,000 to establish and carry out the project for the 3-year demonstration period.

(c) AUTHORIZATION.—There is authorized to be appropriated such sums as may be necessary to carry out this section.

Subtitle F—Provisions Relating to Title VI

SEC. 10601. REVISIONS TO LIMITATION ON MEDICAL CARE EXCEPTION TO THE PROHIBITION ON CERTAIN PHYSICIAN REFERRALS FOR HOSPITALS.

(a) IN GENERAL.—Section 1877(i) of the Social Security Act, as added by section 6001(a), is amended—

(1) in paragraph (1)(A)(i), by striking "February 1, 2010" and inserting "August 1, 2010"; and

(2) in paragraph (3)(A)—

(A) in clause (iii), by striking "August 1, 2011" and inserting "February 1, 2012"; and

(B) in clause (iv), by striking "July 1, 2011" and inserting "January 1, 2012".

(b) CONFORMING AMENDMENT.—Section 6001(b)(2) of this Act is amended by striking "November 1, 2011" and inserting "May 1, 2012".

SEC. 10602. CLARIFICATIONS TO PATIENT-CENTERED OUTCOMES RESEARCH.

Section 1181 of the Social Security Act (as added by section 6301) is amended—

(1) in subsection (d)(2)(B)—

(A) in clause (ii)(IV)—

(i) by inserting "as described in subparagraph (A)(ii)," after "original research"; and

(ii) by inserting "as long as the researcher enters into a data use agreement with the Institute for use of the data from the original research, as appropriate" after "publication"; and

(B) by amending clause (iv) to read as follows:

"(iv) SUBSEQUENT USE OF THE DATA.—The Institute shall not allow the subsequent use of data from original research in work-for-hire contracts with individuals, entities, or instrumentalities that have a financial interest in the results, unless approved under a data use agreement with the Institute.";

(2) in subsection (d)(8)(A)(iv), by striking "not be construed as mandates for" and inserting "do not include"; and

(3) in subsection (f)(1)(C), by amending clause (ii) to read as follows:

"(ii) 7 members representing physicians and providers, including 4 members representing physicians (at least 1 of whom is a surgeon), 1 nurse, 1 State-licensed integrative health care practitioner, and 1 representative of a hospital.".

SEC. 10603. STRIKING PROVISIONS RELATING TO INDIVIDUAL PROVIDER APPLICATION FEES.

(a) IN GENERAL.—Section 1866(j)(2)(C) of the Social Security Act, as added by section 6401(a), is amended—

(1) by striking clause (i);

(2) by redesignating clauses (ii) through (iv), respectively, as clauses (i) through (iii); and

(3) in clause (i), as redesignated by paragraph (2), by striking "clause (iii)" and inserting "clause (ii)".

(b) TECHNICAL CORRECTION.—Section 6401(a)(2) of this Act is amended to read as follows:

"(2) by redesignating paragraph (2) as paragraph (8); and".

SEC. 10604. TECHNICAL CORRECTION TO SECTION 6405.

Paragraphs (1) and (2) of section 6405(b) are amended to read as follows:

"(1) PART A.—Section 1814(a)(2) of the Social Security Act (42 U.S.C. 1395(a)(2)) is amended in the matter preceding subparagraph (A) by inserting "or, in the case of services described in subparagraph (C), a physician enrolled under section 1866(j)," after "in collaboration with a physician,".

"(2) PART B.—Section 1835(a)(2) of the Social Security Act (42 U.S.C. 1395n(a)(2)) is amended in the matter preceding subparagraph (A) by inserting "or, in the case of services described in subparagraph (A), a physician enrolled under section 1866(j)," after "a physician".

SEC. 10605. CERTAIN OTHER PROVIDERS PERMITTED TO CONDUCT FACE TO FACE ENCOUNTER FOR HOME HEALTH SERVICES.

(a) PART A.—Section 1814(a)(2)(C) of the Social Security Act (42 U.S.C. 1395f(a)(2)(C)), as amended by section 6407(a)(1), is amended by inserting "or a nurse practitioner or clinical nurse specialist (as those terms are defined in section 1861(aa)(5)) who is working in collaboration with the physician in accordance with State law, or a certified nurse-midwife (as defined in section 1861(gg)) as authorized by State law, or a physician assistant (as defined in section 1861(aa)(5)) under the supervision of the physician," after "himself or herself".

(b) PART B.—Section 1835(a)(2)(A)(iv) of the Social Security Act, as added by section 6407(a)(2), is amended by inserting "or a nurse practitioner or clinical nurse specialist (as those terms are defined in section 1861(aa)(5)) who is working in collaboration with the physician in accordance with State law, or a certified nurse-midwife (as defined in section 1861(gg)) as authorized by State law, or a physician assistant (as defined in section 1861(aa)(5)) under the supervision of the physician," after "must document that the physician".

SEC. 10606. HEALTH CARE FRAUD ENFORCEMENT.

(a) FRAUD SENTENCING GUIDELINES.—

(1) DEFINITION.—In this subsection, the term "Federal health care offense" has the meaning given that term in section 24 of title 18, United States Code, as amended by this Act.

(2) REVIEW AND AMENDMENTS.—Pursuant to the authority under section 994 of title 28, United States Code, and in accordance with this subsection, the United States Sentencing Commission shall—

(A) review the Federal Sentencing Guidelines and policy statements applicable to persons convicted of Federal health care offenses;

(B) amend the Federal Sentencing Guidelines and policy statements applicable to persons convicted of Federal health care offenses involving Government health care programs to provide that the aggregate dollar amount of fraudulent bills submitted to the Government health care program shall constitute prima facie evidence of the amount of the intended loss by the defendant; and

(C) amend the Federal Sentencing Guidelines to provide—

(i) a 2-level increase in the offense level for any defendant convicted of a Federal health care offense relating to a Government health care program which involves a loss of not less than \$1,000,000 and less than \$7,000,000;

(ii) a 3-level increase in the offense level for any defendant convicted of a Federal health care offense relating to a Government health care program which involves a loss of not less than \$7,000,000 and less than \$20,000,000;

(iii) a 4-level increase in the offense level for any defendant convicted of a Federal health care offense relating to a Government health care program which involves a loss of not less than \$20,000,000; and

(iv) if appropriate, otherwise amend the Federal Sentencing Guidelines and policy statements applicable to persons convicted of Federal health care offenses involving Government health care programs.

(3) REQUIREMENTS.—In carrying this subsection, the United States Sentencing Commission shall—

(A) ensure that the Federal Sentencing Guidelines and policy statements—

(i) reflect the serious harms associated with health care fraud and the need for aggressive and appropriate law enforcement action to prevent such fraud; and

(ii) provide increased penalties for persons convicted of health care fraud offenses in appropriate circumstances;

(B) consult with individuals or groups representing health care fraud victims, law enforcement officials, the health care industry, and the Federal judiciary as part of the review described in paragraph (2);

(C) ensure reasonable consistency with other relevant directives and with other guidelines under the Federal Sentencing Guidelines;

(D) account for any aggravating or mitigating circumstances that might justify exceptions, including circumstances for which the Federal Sentencing Guidelines, as in effect on the date of enactment of this Act, provide sentencing enhancements;

(E) make any necessary conforming changes to the Federal Sentencing Guidelines; and

(F) ensure that the Federal Sentencing Guidelines adequately meet the purposes of sentencing.

(b) **INTENT REQUIREMENT FOR HEALTH CARE FRAUD.**—Section 1347 of title 18, United States Code, is amended—

(1) by inserting “(a)” before “Whoever knowingly”; and

(2) by adding at the end the following:

“(b) With respect to violations of this section, a person need not have actual knowledge of this section or specific intent to commit a violation of this section.”.

(c) **HEALTH CARE FRAUD OFFENSE.**—Section 24(a) of title 18, United States Code, is amended—

(1) in paragraph (1), by striking the semicolon and inserting “or section 1128B of the Social Security Act (42 U.S.C. 1320a-7b); or”; and

(2) in paragraph (2)—

(A) by inserting “1349,” after “1343,”; and

(B) by inserting “section 301 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 331), or section 501 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1131),” after “title,”.

(d) **SUBPOENA AUTHORITY RELATING TO HEALTH CARE.**—

(1) **SUBPOENAS UNDER THE HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT OF 1996.**—Section 1510(b) of title 18, United States Code, is amended—

(A) in paragraph (1), by striking “to the grand jury”; and

(B) in paragraph (2)—

(i) in subparagraph (A), by striking “grand jury subpoena” and inserting “subpoena for records”; and

(ii) in the matter following subparagraph (B), by striking “to the grand jury”.

(2) **SUBPOENAS UNDER THE CIVIL RIGHTS OF INSTITUTIONALIZED PERSONS ACT.**—The Civil Rights of Institutionalized Persons Act (42 U.S.C. 1997 et seq.) is amended by inserting after section 3 the following:

“SEC. 3A. SUBPOENA AUTHORITY.

“(a) **AUTHORITY.**—The Attorney General, or at the direction of the Attorney General, any officer or employee of the Department of Justice may require by subpoena access to any institution that is the subject of an investigation under this Act and to any document, record, material, file, report, memorandum, policy, procedure, investigation, video or audio recording, or quality assurance report relating to any institution that is the subject of an investigation under this Act to determine whether there are condi-

tions which deprive persons residing in or confined to the institution of any rights, privileges, or immunities secured or protected by the Constitution or laws of the United States.

“(b) **ISSUANCE AND ENFORCEMENT OF SUBPOENAS.**—

“(1) **ISSUANCE.**—Subpoenas issued under this section—

“(A) shall bear the signature of the Attorney General or any officer or employee of the Department of Justice as designated by the Attorney General; and

“(B) shall be served by any person or class of persons designated by the Attorney General or a designated officer or employee for that purpose.

“(2) **ENFORCEMENT.**—In the case of contumacy or failure to obey a subpoena issued under this section, the United States district court for the judicial district in which the institution is located may issue an order requiring compliance. Any failure to obey the order of the court may be punished by the court as a contempt of that court.

“(c) **PROTECTION OF SUBPOENAED RECORDS AND INFORMATION.**—Any document, record, material, file, report, memorandum, policy, procedure, investigation, video or audio recording, or quality assurance report or other information obtained under a subpoena issued under this section—

“(1) may not be used for any purpose other than to protect the rights, privileges, or immunities secured or protected by the Constitution or laws of the United States of persons who reside, have resided, or will reside in an institution;

“(2) may not be transmitted by or within the Department of Justice for any purpose other than to protect the rights, privileges, or immunities secured or protected by the Constitution or laws of the United States of persons who reside, have resided, or will reside in an institution; and

“(3) shall be redacted, obscured, or otherwise altered if used in any publicly available manner so as to prevent the disclosure of any personally identifiable information.”.

SEC. 10607. STATE DEMONSTRATION PROGRAMS TO EVALUATE ALTERNATIVES TO CURRENT MEDICAL TORT LITIGATION.

Part P of title III of the Public Health Service Act (42 U.S.C. 280g et seq.), as amended by this Act, is further amended by adding at the end the following:

“SEC. 399V-4. STATE DEMONSTRATION PROGRAMS TO EVALUATE ALTERNATIVES TO CURRENT MEDICAL TORT LITIGATION.

“(a) **IN GENERAL.**—The Secretary is authorized to award demonstration grants to States for the development, implementation, and evaluation of alternatives to current tort litigation for resolving disputes over injuries allegedly caused by health care providers or health care organizations. In awarding such grants, the Secretary shall ensure the diversity of the alternatives so funded.

“(b) **DURATION.**—The Secretary may award grants under subsection (a) for a period not to exceed 5 years.

“(c) **CONDITIONS FOR DEMONSTRATION GRANTS.**—

“(1) **REQUIREMENTS.**—Each State desiring a grant under subsection (a) shall develop an alternative to current tort litigation that—

“(A) allows for the resolution of disputes over injuries allegedly caused by health care providers or health care organizations; and

“(B) promotes a reduction of health care errors by encouraging the collection and analysis of patient safety data related to dis-

putes resolved under subparagraph (A) by organizations that engage in efforts to improve patient safety and the quality of health care.

“(2) **ALTERNATIVE TO CURRENT TORT LITIGATION.**—Each State desiring a grant under subsection (a) shall demonstrate how the proposed alternative described in paragraph (1)(A)—

“(A) makes the medical liability system more reliable by increasing the availability of prompt and fair resolution of disputes;

“(B) encourages the efficient resolution of disputes;

“(C) encourages the disclosure of health care errors;

“(D) enhances patient safety by detecting, analyzing, and helping to reduce medical errors and adverse events;

“(E) improves access to liability insurance;

“(F) fully informs patients about the differences in the alternative and current tort litigation;

“(G) provides patients the ability to opt out of or voluntarily withdraw from participating in the alternative at any time and to pursue other options, including litigation, outside the alternative;

“(H) would not conflict with State law at the time of the application in a way that would prohibit the adoption of an alternative to current tort litigation; and

“(I) would not limit or curtail a patient's existing legal rights, ability to file a claim in or access a State's legal system, or otherwise abrogate a patient's ability to file a medical malpractice claim.

“(3) **SOURCES OF COMPENSATION.**—Each State desiring a grant under subsection (a) shall identify the sources from and methods by which compensation would be paid for claims resolved under the proposed alternative to current tort litigation, which may include public or private funding sources, or a combination of such sources. Funding methods shall to the extent practicable provide financial incentives for activities that improve patient safety.

“(4) **SCOPE.**—

“(A) **IN GENERAL.**—Each State desiring a grant under subsection (a) shall establish a scope of jurisdiction (such as Statewide, designated geographic region, a designated area of health care practice, or a designated group of health care providers or health care organizations) for the proposed alternative to current tort litigation that is sufficient to evaluate the effects of the alternative. No scope of jurisdiction shall be established under this paragraph that is based on a health care payer or patient population.

“(B) **NOTIFICATION OF PATIENTS.**—A State shall demonstrate how patients would be notified that they are receiving health care services that fall within such scope, and the process by which they may opt out of or voluntarily withdraw from participating in the alternative. The decision of the patient whether to participate or continue participating in the alternative process shall be made at any time and shall not be limited in any way.

“(5) **PREFERENCE IN AWARDING DEMONSTRATION GRANTS.**—In awarding grants under subsection (a), the Secretary shall give preference to States—

“(A) that have developed the proposed alternative through substantive consultation with relevant stakeholders, including patient advocates, health care providers and health care organizations, attorneys with expertise in representing patients and health care providers, medical malpractice insurers, and patient safety experts;

“(B) that make proposals that are likely to enhance patient safety by detecting, analyzing, and helping to reduce medical errors and adverse events; and

“(C) that make proposals that are likely to improve access to liability insurance.

“(d) APPLICATION.—

“(1) IN GENERAL.—Each State desiring a grant under subsection (a) shall submit to the Secretary an application, at such time, in such manner, and containing such information as the Secretary may require.

“(2) REVIEW PANEL.—

“(A) IN GENERAL.—In reviewing applications under paragraph (1), the Secretary shall consult with a review panel composed of relevant experts appointed by the Comptroller General.

“(B) COMPOSITION.—

“(i) NOMINATIONS.—The Comptroller General shall solicit nominations from the public for individuals to serve on the review panel.

“(ii) APPOINTMENT.—The Comptroller General shall appoint, at least 9 but not more than 13, highly qualified and knowledgeable individuals to serve on the review panel and shall ensure that the following entities receive fair representation on such panel:

“(I) Patient advocates.

“(II) Health care providers and health care organizations.

“(III) Attorneys with expertise in representing patients and health care providers.

“(IV) Medical malpractice insurers.

“(V) State officials.

“(VI) Patient safety experts.

“(C) CHAIRPERSON.—The Comptroller General, or an individual within the Government Accountability Office designated by the Comptroller General, shall be the chairperson of the review panel.

“(D) AVAILABILITY OF INFORMATION.—The Comptroller General shall make available to the review panel such information, personnel, and administrative services and assistance as the review panel may reasonably require to carry out its duties.

“(E) INFORMATION FROM AGENCIES.—The review panel may request directly from any department or agency of the United States any information that such panel considers necessary to carry out its duties. To the extent consistent with applicable laws and regulations, the head of such department or agency shall furnish the requested information to the review panel.

“(e) REPORTS.—

“(1) BY STATE.—Each State receiving a grant under subsection (a) shall submit to the Secretary an annual report evaluating the effectiveness of activities funded with grants awarded under such subsection. Such report shall, at a minimum, include the impact of the activities funded on patient safety and on the availability and price of medical liability insurance.

“(2) BY SECRETARY.—The Secretary shall submit to Congress an annual compendium of the reports submitted under paragraph (1) and an analysis of the activities funded under subsection (a) that examines any differences that result from such activities in terms of the quality of care, number and nature of medical errors, medical resources used, length of time for dispute resolution, and the availability and price of liability insurance.

“(f) TECHNICAL ASSISTANCE.—

“(1) IN GENERAL.—The Secretary shall provide technical assistance to the States applying for or awarded grants under subsection (a).

“(2) REQUIREMENTS.—Technical assistance under paragraph (1) shall include—

“(A) guidance on non-economic damages, including the consideration of individual facts and circumstances in determining appropriate payment, guidance on identifying avoidable injuries, and guidance on disclosure to patients of health care errors and adverse events; and

“(B) the development, in consultation with States, of common definitions, formats, and data collection infrastructure for States receiving grants under this section to use in reporting to facilitate aggregation and analysis of data both within and between States.

“(3) USE OF COMMON DEFINITIONS, FORMATS, AND DATA COLLECTION INFRASTRUCTURE.—States not receiving grants under this section may also use the common definitions, formats, and data collection infrastructure developed under paragraph (2)(B).

“(g) EVALUATION.—

“(1) IN GENERAL.—The Secretary, in consultation with the review panel established under subsection (d)(2), shall enter into a contract with an appropriate research organization to conduct an overall evaluation of the effectiveness of grants awarded under subsection (a) and to annually prepare and submit a report to Congress. Such an evaluation shall begin not later than 18 months following the date of implementation of the first program funded by a grant under subsection (a).

“(2) CONTENTS.—The evaluation under paragraph (1) shall include—

“(A) an analysis of the effects of the grants awarded under subsection (a) with regard to the measures described in paragraph (3);

“(B) for each State, an analysis of the extent to which the alternative developed under subsection (c)(1) is effective in meeting the elements described in subsection (c)(2);

“(C) a comparison among the States receiving grants under subsection (a) of the effectiveness of the various alternatives developed by such States under subsection (c)(1);

“(D) a comparison, considering the measures described in paragraph (3), of States receiving grants approved under subsection (a) and similar States not receiving such grants; and

“(E) a comparison, with regard to the measures described in paragraph (3), of—

“(i) States receiving grants under subsection (a);

“(ii) States that enacted, prior to the date of enactment of the Patient Protection and Affordable Care Act, any cap on non-economic damages; and

“(iii) States that have enacted, prior to the date of enactment of the Patient Protection and Affordable Care Act, a requirement that the complainant obtain an opinion regarding the merit of the claim, although the substance of such opinion may have no bearing on whether the complainant may proceed with a case.

“(3) MEASURES.—The evaluations under paragraph (2) shall analyze and make comparisons on the basis of—

“(A) the nature and number of disputes over injuries allegedly caused by health care providers or health care organizations;

“(B) the nature and number of claims in which tort litigation was pursued despite the existence of an alternative under subsection (a);

“(C) the disposition of disputes and claims, including the length of time and estimated costs to all parties;

“(D) the medical liability environment;

“(E) health care quality;

“(F) patient safety in terms of detecting, analyzing, and helping to reduce medical errors and adverse events;

“(G) patient and health care provider and organization satisfaction with the alternative under subsection (a) and with the medical liability environment; and

“(H) impact on utilization of medical services, appropriately adjusted for risk.

“(4) FUNDING.—The Secretary shall reserve 5 percent of the amount appropriated in each fiscal year under subsection (k) to carry out this subsection.

“(h) MEDPAC AND MACPAC REPORTS.—

“(1) MEDPAC.—The Medicare Payment Advisory Commission shall conduct an independent review of the alternatives to current tort litigation that are implemented under grants under subsection (a) to determine the impact of such alternatives on the Medicare program under title XVIII of the Social Security Act, and its beneficiaries.

“(2) MACPAC.—The Medicaid and CHIP Payment and Access Commission shall conduct an independent review of the alternatives to current tort litigation that are implemented under grants under subsection (a) to determine the impact of such alternatives on the Medicaid or CHIP programs under titles XIX and XXI of the Social Security Act, and their beneficiaries.

“(3) REPORTS.—Not later than December 31, 2016, the Medicare Payment Advisory Commission and the Medicaid and CHIP Payment and Access Commission shall each submit to Congress a report that includes the findings and recommendations of each respective Commission based on independent reviews conducted under paragraphs (1) and (2), including an analysis of the impact of the alternatives reviewed on the efficiency and effectiveness of the respective programs.

“(i) OPTION TO PROVIDE FOR INITIAL PLANNING GRANTS.—Of the funds appropriated pursuant to subsection (k), the Secretary may use a portion not to exceed \$500,000 per State to provide planning grants to such States for the development of demonstration project applications meeting the criteria described in subsection (c). In selecting States to receive such planning grants, the Secretary shall give preference to those States in which State law at the time of the application would not prohibit the adoption of an alternative to current tort litigation.

“(j) DEFINITIONS.—In this section:

“(1) HEALTH CARE SERVICES.—The term ‘health care services’ means any services provided by a health care provider, or by any individual working under the supervision of a health care provider, that relate to—

“(A) the diagnosis, prevention, or treatment of any human disease or impairment; or

“(B) the assessment of the health of human beings.

“(2) HEALTH CARE ORGANIZATION.—The term ‘health care organization’ means any individual or entity which is obligated to provide, pay for, or administer health benefits under any health plan.

“(3) HEALTH CARE PROVIDER.—The term ‘health care provider’ means any individual or entity—

“(A) licensed, registered, or certified under Federal or State laws or regulations to provide health care services; or

“(B) required to be so licensed, registered, or certified but that is exempted by other statute or regulation.

“(k) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, \$50,000,000 for the 5-fiscal year period beginning with fiscal year 2011.

“(l) CURRENT STATE EFFORTS TO ESTABLISH ALTERNATIVE TO TORT LITIGATION.—Nothing

in this section shall be construed to limit any prior, current, or future efforts of any State to establish any alternative to tort litigation.

“(m) **RULE OF CONSTRUCTION.**—Nothing in this section shall be construed as limiting states’ authority over or responsibility for their state justice systems.”.

SEC. 10608. EXTENSION OF MEDICAL MALPRACTICE COVERAGE TO FREE CLINICS.

(a) **IN GENERAL.**—Section 224(o)(1) of the Public Health Service Act (42 U.S.C. 233(o)(1)) is amended by inserting after “to an individual” the following: “, or an officer, governing board member, employee, or contractor of a free clinic shall in providing services for the free clinic.”.

(b) **EFFECTIVE DATE.**—The amendment made by this section shall take effect on the date of enactment of this Act and apply to any act or omission which occurs on or after that date.

SEC. 10609. LABELING CHANGES.

Section 505(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)) is amended by adding at the end the following:

“(10)(A) If the proposed labeling of a drug that is the subject of an application under this subsection differs from the listed drug due to a labeling revision described under clause (i), the drug that is the subject of such application shall, notwithstanding any other provision of this Act, be eligible for approval and shall not be considered misbranded under section 502 if—

“(i) the application is otherwise eligible for approval under this subsection but for expiration of patent, an exclusivity period, or of a delay in approval described in paragraph (5)(B)(iii), and a revision to the labeling of the listed drug has been approved by the Secretary within 60 days of such expiration;

“(ii) the labeling revision described under clause (i) does not include a change to the ‘Warnings’ section of the labeling;

“(iii) the sponsor of the application under this subsection agrees to submit revised labeling of the drug that is the subject of such application not later than 60 days after the notification of any changes to such labeling required by the Secretary; and

“(iv) such application otherwise meets the applicable requirements for approval under this subsection.

“(B) If, after a labeling revision described in subparagraph (A)(i), the Secretary determines that the continued presence in interstate commerce of the labeling of the listed drug (as in effect before the revision described in subparagraph (A)(i)) adversely impacts the safe use of the drug, no application under this subsection shall be eligible for approval with such labeling.”.

Subtitle G—Provisions Relating to Title VIII
SEC. 10801. PROVISIONS RELATING TO TITLE VIII.

(a) Title XXXII of the Public Health Service Act, as added by section 8002(a)(1), is amended—

(1) in section 3203—

(A) in subsection (a)(1), by striking subparagraph (E);

(B) in subsection (b)(1)(C)(i), by striking “for enrollment” and inserting “for reenrollment”; and

(C) in subsection (c)(1), by striking “, as part of their automatic enrollment in the CLASS program.”; and

(2) in section 3204—

(A) in subsection (c)(2), by striking subparagraph (A) and inserting the following:

“(A) receives wages or income on which there is imposed a tax under section 3101(a) or 3201(a) of the Internal Revenue Code of 1986; or”;

(B) in subsection (d), by striking “subparagraph (B) or (C) of subsection (c)(1)” and inserting “subparagraph (A) or (B) of subsection (c)(2)”;

(C) in subsection (e)(2)(A), by striking “subparagraph (A)” and inserting “paragraph (1)”;

(D) in subsection (g)(1), by striking “has elected to waive enrollment” and inserting “has not enrolled”.

(b) Section 8002 of this Act is amended in the heading for subsection (d), by striking “INFORMATION ON SUPPLEMENTAL COVERAGE” and inserting “CLASS PROGRAM INFORMATION”.

(c) Section 6021(d)(2)(A)(iv) of the Deficit Reduction Act of 2005, as added by section 8002(d) of this Act, is amended by striking “and coverage available” and all that follows through “that program.”.

Subtitle H—Provisions Relating to Title IX

SEC. 10901. MODIFICATIONS TO EXCISE TAX ON HIGH COST EMPLOYER-SPONSORED HEALTH COVERAGE.

(a) **LONGSHORE WORKERS TREATED AS EMPLOYEES ENGAGED IN HIGH-RISK PROFESSIONS.**—Paragraph (3) of section 4980I(f) of the Internal Revenue Code of 1986, as added by section 9001 of this Act, is amended by inserting “individuals whose primary work is longshore work (as defined in section 258(b) of the Immigration and Nationality Act (8 U.S.C. 1288(b)), determined without regard to paragraph (2) thereof,” before “and individuals engaged in the construction, mining”.

(b) **EXEMPTION FROM HIGH-COST INSURANCE TAX INCLUDES CERTAIN ADDITIONAL EXCEPTED BENEFITS.**—Clause (i) of section 4980I(d)(1)(B) of the Internal Revenue Code of 1986, as added by section 9001 of this Act, is amended by striking “section 9832(c)(1)(A)” and inserting “section 9832(c)(1) (other than subparagraph (G) thereof)”.

(c) **EFFECTIVE DATE.**—The amendments made by this section shall apply to taxable years beginning after December 31, 2012.

SEC. 10902. INFLATION ADJUSTMENT OF LIMITATION ON HEALTH FLEXIBLE SPENDING ARRANGEMENTS UNDER CAFETERIA PLANS.

(a) **IN GENERAL.**—Subsection (i) of section 125 of the Internal Revenue Code of 1986, as added by section 9005 of this Act, is amended to read as follows:

“(i) **LIMITATION ON HEALTH FLEXIBLE SPENDING ARRANGEMENTS.**—

“(1) **IN GENERAL.**—For purposes of this section, if a benefit is provided under a cafeteria plan through employer contributions to a health flexible spending arrangement, such benefit shall not be treated as a qualified benefit unless the cafeteria plan provides that an employee may not elect for any taxable year to have salary reduction contributions in excess of \$2,500 made to such arrangement.

“(2) **ADJUSTMENT FOR INFLATION.**—In the case of any taxable year beginning after December 31, 2011, the dollar amount in paragraph (1) shall be increased by an amount equal to—

“(A) such amount, multiplied by

“(B) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which such taxable year begins by substituting ‘calendar year 2010’ for ‘calendar year 1992’ in subparagraph (B) thereof. If any increase determined under this paragraph is not a multiple of \$50, such increase shall be rounded to the next lowest multiple of \$50.”.

(b) **EFFECTIVE DATE.**—The amendment made by this section shall apply to taxable years beginning after December 31, 2010.

SEC. 10903. MODIFICATION OF LIMITATION ON CHARGES BY CHARITABLE HOSPITALS.

(a) **IN GENERAL.**—Subparagraph (A) of section 501(r)(5) of the Internal Revenue Code of 1986, as added by section 9007 of this Act, is amended by striking “the lowest amounts charged” and inserting “the amounts generally billed”.

(b) **EFFECTIVE DATE.**—The amendment made by this section shall apply to taxable years beginning after the date of the enactment of this Act.

SEC. 10904. MODIFICATION OF ANNUAL FEE ON MEDICAL DEVICE MANUFACTURERS AND IMPORTERS.

(a) **IN GENERAL.**—Section 9009 of this Act is amended—

(1) by striking “2009” in subsection (a)(1) and inserting “2010”;

(2) by inserting “(\$3,000,000,000 after 2017)” after “\$2,000,000,000”; and

(3) by striking “2008” in subsection (i) and inserting “2009”.

(b) **EFFECTIVE DATE.**—The amendments made by this section shall take effect as if included in the enactment of section 9009.

SEC. 10905. MODIFICATION OF ANNUAL FEE ON HEALTH INSURANCE PROVIDERS.

(a) **DETERMINATION OF FEE AMOUNT.**—Subsection (b) of section 9010 of this Act is amended to read as follows:

“(b) **DETERMINATION OF FEE AMOUNT.**—

“(1) **IN GENERAL.**—With respect to each covered entity, the fee under this section for any calendar year shall be equal to an amount that bears the same ratio to the applicable amount as—

“(A) the covered entity’s net premiums written with respect to health insurance for any United States health risk that are taken into account during the preceding calendar year, bears to

“(B) the aggregate net premiums written with respect to such health insurance of all covered entities that are taken into account during such preceding calendar year.

“(2) **AMOUNTS TAKEN INTO ACCOUNT.**—For purposes of paragraph (1), the net premiums written with respect to health insurance for any United States health risk that are taken into account during any calendar year with respect to any covered entity shall be determined in accordance with the following table:

“With respect to a covered entity’s net premiums written during the calendar year that are:

The percentage of net premiums written that are taken into account is:

Not more than \$25,000,000	0 percent
More than \$25,000,000 but not more than \$50,000,000	50 percent
More than \$50,000,000	100 percent.

“(3) SECRETARIAL DETERMINATION.—The Secretary shall calculate the amount of each covered entity’s fee for any calendar year under paragraph (1). In calculating such amount, the Secretary shall determine such covered entity’s net premiums written with respect to any United States health risk on

the basis of reports submitted by the covered entity under subsection (g) and through the use of any other source of information available to the Secretary.”.

(b) APPLICABLE AMOUNT.—Subsection (e) of section 9010 of this Act is amended to read as follows:

“(e) APPLICABLE AMOUNT.—For purposes of subsection (b)(1), the applicable amount shall be determined in accordance with the following table:

“Calendar year

Calendar year	Applicable amount
2011	\$2,000,000,000
2012	\$4,000,000,000
2013	\$7,000,000,000
2014, 2015 and 2016	\$9,000,000,000
2017 and thereafter	\$10,000,000,000.”.

(c) EXEMPTION FROM ANNUAL FEE ON HEALTH INSURANCE FOR CERTAIN NONPROFIT ENTITIES.—Section 9010(c)(2) of this Act is amended by striking “or” at the end of subparagraph (A), by striking the period at the end of subparagraph (B) and inserting a comma, and by adding at the end the following new subparagraphs:

“(C) any entity—

“(i) which is incorporated as, is a wholly owned subsidiary of, or is a wholly owned affiliate of, a nonprofit corporation under a State law, or

“(II) which is described in section 501(c)(4) of the Internal Revenue Code of 1986 and the activities of which consist of providing commercial-type insurance (within the meaning of section 501(m) of such Code),

“(ii) the premium rate increases of which are regulated by a State authority,

“(iii) which, as of the date of the enactment of this section, acts as the insurer of last resort in the State and is subject to State guarantee issue requirements, and

“(iv) for which the medical loss ratio (determined in a manner consistent with the determination of such ratio under section 2718(b)(1)(A) of the Public Health Service Act) with respect to the individual insurance market for such entity for the calendar year is not less than 100 percent,

“(D) any entity—

“(i) which is incorporated as a nonprofit corporation under a State law, or

“(II) which is described in section 501(c)(4) of the Internal Revenue Code of 1986 and the activities of which consist of providing commercial-type insurance (within the meaning of section 501(m) of such Code), and

“(ii) for which the medical loss ratio (as so determined)—

“(I) with respect to each of the individual, small group, and large group insurance markets for such entity for the calendar year is not less than 90 percent, and

“(II) with respect to all such markets for such entity for the calendar year is not less than 92 percent, or

“(E) any entity—

“(i) which is a mutual insurance company, “(ii) which for the period reported on the 2008 Accident and Health Policy Experience Exhibit of the National Association of Insurance Commissioners had—

“(I) a market share of the insured population of a State of at least 40 but not more than 60 percent, and

“(II) with respect to all markets described in subparagraph (D)(ii)(I), a medical loss ratio of not less than 90 percent, and

“(iii) with respect to annual payment dates in calendar years after 2011, for which the medical loss ratio (determined in a manner consistent with the determination of such ratio under section 2718(b)(1)(A) of the Public Health Service Act) with respect to all such markets for such entity for the preceding

calendar year is not less than 89 percent (except that with respect to such annual payment date for 2012, the calculation under 2718(b)(1)(B)(ii) of such Act is determined by reference to the previous year, and with respect to such annual payment date for 2013, such calculation is determined by reference to the average for the previous 2 years).”.

(d) CERTAIN INSURANCE EXEMPTED FROM FEE.—Paragraph (3) of section 9010(h) of this Act is amended to read as follows:

“(3) HEALTH INSURANCE.—The term ‘health insurance’ shall not include—

“(A) any insurance coverage described in paragraph (1)(A) or (3) of section 9832(c) of the Internal Revenue Code of 1986,

“(B) any insurance for long-term care, or

“(C) any medicare supplemental health insurance (as defined in section 1882(g)(1) of the Social Security Act).”.

(e) ANTI-AVOIDANCE GUIDANCE.—Subsection (i) of section 9010 of this Act is amended by inserting “and shall prescribe such regulations as are necessary or appropriate to prevent avoidance of the purposes of this section, including inappropriate actions taken to qualify as an exempt entity under subsection (c)(2)” after “section”.

(f) CONFORMING AMENDMENTS.—

(1) Section 9010(a)(1) of this Act is amended by striking “2009” and inserting “2010”.

(2) Section 9010(c)(2)(B) of this Act is amended by striking “(except)” and all that follows through “1323”.

(3) Section 9010(c)(3) of this Act is amended by adding at the end the following new sentence: “If any entity described in subparagraph (C)(i)(I), (D)(i)(I), or (E)(i) of paragraph (2) is treated as a covered entity by reason of the application of the preceding sentence, the net premiums written with respect to health insurance for any United States health risk of such entity shall not be taken into account for purposes of this section.”.

(4) Section 9010(g)(1) of this Act is amended by striking “and third party administration agreement fees”.

(5) Section 9010(j) of this Act is amended—

(A) by striking “2008” and inserting “2009”, and

(B) by striking “, and any third party administration agreement fees received after such date”.

(g) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the enactment of section 9010.

SEC. 10906. MODIFICATIONS TO ADDITIONAL HOSPITAL INSURANCE TAX ON HIGH-INCOME TAXPAYERS.

(a) FICA.—Section 3101(b)(2) of the Internal Revenue Code of 1986, as added by section 9015(a)(1) of this Act, is amended by striking “.5 percent” and inserting “.9 percent”.

(b) SECA.—Section 1401(b)(2)(A) of the Internal Revenue Code of 1986, as added by section 9015(b)(1) of this Act, is amended by striking “.5 percent” and inserting “.9 percent”.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to remuneration received, and taxable years beginning, after December 31, 2012.

SEC. 10907. EXCISE TAX ON INDOOR TANNING SERVICES IN LIEU OF ELECTIVE COSMETIC MEDICAL PROCEDURES.

(a) IN GENERAL.—The provisions of, and amendments made by, section 9017 of this Act are hereby deemed null, void, and of no effect.

(b) EXCISE TAX ON INDOOR TANNING SERVICES.—Subtitle D of the Internal Revenue Code of 1986, as amended by this Act, is amended by adding at the end the following new chapter:

“CHAPTER 49—COSMETIC SERVICES

“Sec. 5000B. Imposition of tax on indoor tanning services.

“SEC. 5000B. IMPOSITION OF TAX ON INDOOR TANNING SERVICES.

“(a) IN GENERAL.—There is hereby imposed on any indoor tanning service a tax equal to 10 percent of the amount paid for such service (determined without regard to this section), whether paid by insurance or otherwise.

“(b) INDOOR TANNING SERVICE.—For purposes of this section—

“(1) IN GENERAL.—The term ‘indoor tanning service’ means a service employing any electronic product designed to incorporate 1 or more ultraviolet lamps and intended for the irradiation of an individual by ultraviolet radiation, with wavelengths in air between 200 and 400 nanometers, to induce skin tanning.

“(2) EXCLUSION OF PHOTOTHERAPY SERVICES.—Such term does not include any phototherapy service performed by a licensed medical professional.

“(c) PAYMENT OF TAX.—

“(1) IN GENERAL.—The tax imposed by this section shall be paid by the individual on whom the service is performed.

“(2) COLLECTION.—Every person receiving a payment for services on which a tax is imposed under subsection (a) shall collect the amount of the tax from the individual on whom the service is performed and remit such tax quarterly to the Secretary at such time and in such manner as provided by the Secretary.

“(3) SECONDARY LIABILITY.—Where any tax imposed by subsection (a) is not paid at the time payments for indoor tanning services are made, then to the extent that such tax is not collected, such tax shall be paid by the person who performs the service.”.

(c) CLERICAL AMENDMENT.—The table of chapter for subtitle D of the Internal Revenue Code of 1986, as amended by this Act, is amended by inserting after the item relating to chapter 48 the following new item:

“CHAPTER 49—COSMETIC SERVICES”.

(d) **EFFECTIVE DATE.**—The amendments made by this section shall apply to services performed on or after July 1, 2010.

SEC. 10908. EXCLUSION FOR ASSISTANCE PROVIDED TO PARTICIPANTS IN STATE STUDENT LOAN REPAYMENT PROGRAMS FOR CERTAIN HEALTH PROFESSIONALS.

(a) **IN GENERAL.**—Paragraph (4) of section 108(f) of the Internal Revenue Code of 1986 is amended to read as follows:

“(4) **PAYMENTS UNDER NATIONAL HEALTH SERVICE CORPS LOAN REPAYMENT PROGRAM AND CERTAIN STATE LOAN REPAYMENT PROGRAMS.**—In the case of an individual, gross income shall not include any amount received under section 338B(g) of the Public Health Service Act, under a State program described in section 338I of such Act, or under any other State loan repayment or loan forgiveness program that is intended to provide for the increased availability of health care services in underserved or health professional shortage areas (as determined by such State).”.

(b) **EFFECTIVE DATE.**—The amendment made by this section shall apply to amounts received by an individual in taxable years beginning after December 31, 2008.

SEC. 10909. EXPANSION OF ADOPTION CREDIT AND ADOPTION ASSISTANCE PROGRAMS.

(a) **INCREASE IN DOLLAR LIMITATION.**—

(1) **ADOPTION CREDIT.**—

(A) **IN GENERAL.**—Paragraph (1) of section 23(b) of the Internal Revenue Code of 1986 (relating to dollar limitation) is amended by striking “\$10,000” and inserting “\$13,170”.

(B) **CHILD WITH SPECIAL NEEDS.**—Paragraph (3) of section 23(a) of such Code (relating to \$10,000 credit for adoption of child with special needs regardless of expenses) is amended—

(i) in the text by striking “\$10,000” and inserting “\$13,170”, and

(ii) in the heading by striking “\$10,000” and inserting “\$13,170”.

(C) **CONFORMING AMENDMENT TO INFLATION ADJUSTMENT.**—Subsection (h) of section 23 of such Code (relating to adjustments for inflation) is amended to read as follows:

“(h) **ADJUSTMENTS FOR INFLATION.**—

“(1) **DOLLAR LIMITATIONS.**—In the case of a taxable year beginning after December 31, 2010, each of the dollar amounts in subsections (a)(3) and (b)(1) shall be increased by an amount equal to—

“(A) such dollar amount, multiplied by

“(B) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which the taxable year begins, determined by substituting ‘calendar year 2009’ for ‘calendar year 1992’ in subparagraph (B) thereof.

If any amount as increased under the preceding sentence is not a multiple of \$10, such amount shall be rounded to the nearest multiple of \$10.

“(2) **INCOME LIMITATION.**—In the case of a taxable year beginning after December 31, 2002, the dollar amount in subsection (b)(2)(A)(i) shall be increased by an amount equal to—

“(A) such dollar amount, multiplied by

“(B) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which the taxable year begins, determined by substituting ‘calendar year 2001’ for ‘calendar year 1992’ in subparagraph (B) thereof.

If any amount as increased under the preceding sentence is not a multiple of \$10, such amount shall be rounded to the nearest multiple of \$10.”.

(2) **ADOPTION ASSISTANCE PROGRAMS.**—

(A) **IN GENERAL.**—Paragraph (1) of section 137(b) of the Internal Revenue Code of 1986 (relating to dollar limitation) is amended by striking “\$10,000” and inserting “\$13,170”.

(B) **CHILD WITH SPECIAL NEEDS.**—Paragraph (2) of section 137(a) of such Code (relating to \$10,000 exclusion for adoption of child with special needs regardless of expenses) is amended—

(i) in the text by striking “\$10,000” and inserting “\$13,170”, and

(ii) in the heading by striking “\$10,000” and inserting “\$13,170”.

(C) **CONFORMING AMENDMENT TO INFLATION ADJUSTMENT.**—Subsection (f) of section 137 of such Code (relating to adjustments for inflation) is amended to read as follows:

“(f) **ADJUSTMENTS FOR INFLATION.**—

“(1) **DOLLAR LIMITATIONS.**—In the case of a taxable year beginning after December 31, 2010, each of the dollar amounts in subsections (a)(2) and (b)(1) shall be increased by an amount equal to—

“(A) such dollar amount, multiplied by

“(B) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which the taxable year begins, determined by substituting ‘calendar year 2009’ for ‘calendar year 1992’ in subparagraph (B) thereof.

If any amount as increased under the preceding sentence is not a multiple of \$10, such amount shall be rounded to the nearest multiple of \$10.

“(2) **INCOME LIMITATION.**—In the case of a taxable year beginning after December 31, 2002, the dollar amount in subsection (b)(2)(A) shall be increased by an amount equal to—

“(A) such dollar amount, multiplied by

“(B) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which the taxable year begins, determined by substituting ‘calendar year 2001’ for ‘calendar year 1992’ in subparagraph (B) thereof.

If any amount as increased under the preceding sentence is not a multiple of \$10, such amount shall be rounded to the nearest multiple of \$10.”.

(b) **CREDIT MADE REFUNDABLE.**—

(1) **CREDIT MOVED TO SUBPART RELATING TO REFUNDABLE CREDITS.**—The Internal Revenue Code of 1986 is amended—

(A) by redesignating section 23, as amended by subsection (a), as section 36C, and

(B) by moving section 36C (as so redesignated) from subpart A of part IV of subchapter A of chapter 1 to the location immediately before section 37 in subpart C of part IV of subchapter A of chapter 1.

(2) **CONFORMING AMENDMENTS.**—

(A) Section 24(b)(3)(B) of such Code is amended by striking “23.”.

(B) Section 25(e)(1)(C) of such Code is amended by striking “23,” both places it appears.

(C) Section 25A(i)(5)(B) of such Code is amended by striking “23, 25D,” and inserting “25D”.

(D) Section 25B(g)(2) of such Code is amended by striking “23.”.

(E) Section 26(a)(1) of such Code is amended by striking “23.”.

(F) Section 30(c)(2)(B)(ii) of such Code is amended by striking “23, 25D,” and inserting “25D”.

(G) Section 30B(g)(2)(B)(ii) of such Code is amended by striking “23.”.

(H) Section 30D(c)(2)(B)(ii) of such Code is amended by striking “sections 23 and” and inserting “section”.

(I) Section 36C of such Code, as so redesignated, is amended—

(i) by striking paragraph (4) of subsection (b), and

(ii) by striking subsection (c).

(J) Section 137 of such Code is amended—

(i) by striking “section 23(d)” in subsection (d) and inserting “section 36C(d)”, and

(ii) by striking “section 23” in subsection (e) and inserting “section 36C”.

(K) Section 904(i) of such Code is amended by striking “23.”.

(L) Section 1016(a)(26) is amended by striking “23(g)” and inserting “36C(g)”.

(M) Section 1400C(d) of such Code is amended by striking “23.”.

(N) Section 6211(b)(4)(A) of such Code is amended by inserting “36C,” before “53(e)”.

(O) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code of 1986 is amended by striking the item relating to section 23.

(P) Paragraph (2) of section 1324(b) of title 31, United States Code, as amended by this Act, is amended by inserting “36C,” after “36B.”.

(Q) The table of sections for subpart C of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1986, as amended by this Act, is amended by inserting after the item relating to section 36B the following new item:

“Sec. 36C. Adoption expenses.”.

(c) **APPLICATION AND EXTENSION OF EGTRRA SUNSET.**—Notwithstanding section 901 of the Economic Growth and Tax Relief Reconciliation Act of 2001, such section shall apply to the amendments made by this section and the amendments made by section 202 of such Act by substituting “December 31, 2011” for “December 31, 2010” in subsection (a)(1) thereof.

(d) **EFFECTIVE DATE.**—The amendments made by this section shall apply to taxable years beginning after December 31, 2009.

SA 3277. Mr. REID proposed an amendment to amendment SA 3276 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; as follows:

At the end of the amendment, add the following:

The provisions of this Act shall become effective 5 days after enactment.

SA 3278. Mr. REID proposed an amendment to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; as follows:

At the end of the language proposed to be stricken, insert the following:

This section shall become effective 4 days after enactment.

SA 3279. Mr. REID proposed an amendment to amendment SA 3278 proposed by Mr. REID to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of

the Armed Forces and certain other Federal employees, and for other purposes; as follows:

In the amendment, strike “4” and insert “3”.

SA 3280. Mr. REID proposed an amendment to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; as follows:

At the end, insert the following:

The provisions of this Act shall become effective 2 days after enactment.

SA 3281. Mr. REID proposed an amendment to amendment SA 3280 proposed by Mr. REID to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees; and for other purposes; as follows:

Strike “2 days” and insert “1 day”.

SA 3282. Mr. REID proposed an amendment to amendment SA 3281 proposed by Mr. REID to the amendment SA 3280 proposed by Mr. REID to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; as follows:

Strike “1 day” and insert “immediately”.

SA 3283. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) **SHORT TITLE.**—This Act may be cited as the “Patients’ Choice Act”.

(b) **TABLE OF CONTENTS.**—The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.

TITLE I—INVESTING IN PREVENTION

Sec. 101. Strategic approach to outcome-based prevention.

Sec. 102. State grants for outcome-based prevention effort.

Sec. 103. Focusing the food stamp program on nutrition.

Sec. 104. Immunizations.

TITLE II—STATE-BASED HEALTH CARE EXCHANGES

Sec. 201. State-based health care exchanges.

Sec. 202. Requirements.

Sec. 203. State Exchange incentives.

TITLE III—FAIR TAX TREATMENT FOR ALL AMERICANS TO AFFORD HEALTH CARE

Sec. 300. Reference.

Sec. 301. Refundable and advanceable credit for certain health insurance coverage.

Sec. 302. Requiring employer transparency about employee benefits.

Sec. 303. Changes to existing tax preferences for medical coverage, etc., for individuals eligible for qualified health insurance credit.

Sec. 304. Adjustments.

TITLE IV—FAIRNESS FOR EVERY AMERICAN PATIENT

Subtitle A—Medicaid Modernization

Sec. 401. Medicaid modernization.

Sec. 402. Outreach.

Sec. 403. Transition rules; miscellaneous provisions.

Subtitle B—Supplemental Health Care Assistance for Low-Income Families

Sec. 411. Supplemental Health Care Assistance for Low-Income Families.

TITLE V—FIXING MEDICARE FOR AMERICAN SENIORS

Subtitle A—Increasing Programmatic Efficiency, Economy, and Accountability

Sec. 501. Eliminating inefficiencies and increasing choice in Medicare Advantage.

Sec. 502. Medicare Accountable Care Organization demonstration program.

Sec. 503. Reducing government handouts to wealthier seniors.

Sec. 504. Rewarding prevention.

Sec. 505. Promoting healthcare provider transparency.

Sec. 506. Availability of Medicare and Medicaid claims and patient encounter data.

Subtitle B—Reducing Fraud and Abuse

Sec. 511. Requiring the Secretary of Health and Human Services to change the Medicare beneficiary identifier used to identify Medicare beneficiaries under the Medicare program.

Sec. 512. Use of technology for real-time data review.

Sec. 513. Detection of Medicare fraud and abuse.

Sec. 514. Edits on 855S Medicare enrollment application and exemption of pharmacists from surety bond requirement.

TITLE I—INVESTING IN PREVENTION**SEC. 101. STRATEGIC APPROACH TO OUTCOME-BASED PREVENTION.**

(a) INTERAGENCY COORDINATING COMMITTEE.—

(1) IN GENERAL.—The Secretary of Health and Human Services (referred to in this title as the “Secretary”) shall convene an interagency coordinating committee to develop a national strategic plan for prevention. The Secretary shall serve as the chairperson of the committee.

(2) COMPOSITION.—In carrying out paragraph (1), the Secretary shall include the participation of—

(A) the Director of the National Institutes of Health;

(B) the Director of the Centers for Disease Control and Prevention;

(C) the Administrator of the Agency for Healthcare Research and Quality;

(D) the Administrator of the Substance Abuse and Mental Health Services Administration;

(E) the Administrator of the Health Resources and Services Administration;

(F) the Secretary of Agriculture;

(G) the Director of the Centers for Medicare & Medicaid Services;

(H) the Administrator of the Environmental Protection Agency;

(I) the Director of the Indian Health Service;

(J) the Administrator of the Administration on Aging;

(K) the Secretary of Veterans Affairs;

(L) the Secretary of Defense;

(M) the Secretary of Education; and

(N) the Secretary of Labor.

(3) REPORT AND PLAN.—Not later than 1 year after the date of enactment of this Act, the Secretary, acting through the coordinating committee convened under paragraph (1), shall submit to Congress a report concerning the recommendation of the committee for health promotion and disease prevention activities. Such report shall include a specific strategic plan that shall include—

(A) a list of national priorities on health promotion and disease prevention to address lifestyle behavior modification (smoking cessation, proper nutrition, and appropriate exercise) and the prevention measures for the 5 leading disease killers in the United States;

(B) specific science-based initiatives to achieve the measurable goals of Healthy People 2010 regarding nutrition, exercise, and smoking cessation, and targeting the 5 leading disease killers in the United States;

(C) specific plans for consolidating Federal health programs and Centers that exist to promote healthy behavior and reduce disease risk (including eliminating programs and offices determined to be ineffective in meeting the priority goals of Healthy People 2010), that include transferring the nutrition guideline development responsibility from the Secretary of Agriculture to the Director of the Centers for Disease Control and Prevention;

(D) specific plans to ensure that all Federal health care programs are fully coordinated with science-based prevention recommendations promulgated by the Director of the Centers for Disease Control and Prevention;

(E) specific plans to ensure that all non-Department of Health and Human Services prevention programs are based on the science-based guidelines developed by the Centers for Disease Control and Prevention under subparagraph (D); and

(F) a list of new non-Federal and non-government partners identified by the com-

mittee to build Federal capacity in health promotion and disease prevention efforts.

(4) ANNUAL REQUEST TO GIVE TESTIMONY.—The Secretary shall annually request an opportunity to testify before Congress concerning the progress made by the United States in meeting the outcome-based standards of Healthy People 2010 with respect to disease prevention and measurable outcomes and effectiveness of Federal programs related to this goal.

(5) PERIODIC REVIEWS.—The Secretary shall conduct periodic reviews, not less than every 5 years, and grading of every Federal disease prevention and health promotion initiatives, programs, and agencies. Such reviews shall be evaluated based on effectiveness in meeting metrics-based goals with an analysis posted on such agencies’ public Internet websites.

(b) FEDERAL MESSAGING ON HEALTH PROMOTION AND DISEASE PREVENTION.—

(1) MEDIA CAMPAIGNS.—

(A) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Secretary, acting through the Director of the Centers for Disease Control and Prevention, shall establish and implement a national science-based media campaign on health promotion and disease prevention.

(B) REQUIREMENTS OF CAMPAIGN.—The campaign implemented under subparagraph (A)—

(i) shall be designed to address proper nutrition, regular exercise, smoking cessation, obesity reduction, the 5 leading disease killers in the United States, and secondary prevention through disease screening promotion;

(ii) shall be carried out through competitively bid contracts awarded to entities providing for the professional production and design of such campaign;

(iii) may include the use of television, radio, Internet, and other commercial marketing venues and may be targeted to specific age groups based on peer-reviewed social research;

(iv) shall not be duplicative of any other Federal efforts relating to health promotion and disease prevention; and

(v) may include the use of humor and nationally recognized positive role models.

(C) EVALUATION.—The Secretary shall ensure that the campaign implemented under subparagraph (A) is subject to an independent evaluation every 2 years and shall report every 2 years to Congress on the effectiveness of such campaigns towards meeting science-based metrics.

(2) WEBSITE.—The Secretary, in consultation with private-sector experts, shall maintain or enter into a contract to maintain an Internet website to provide science-based information on guidelines for nutrition, regular exercise, obesity reduction, smoking cessation, and specific chronic disease prevention. Such website shall be designed to provide information to health care providers and consumers.

(3) DISSEMINATION OF INFORMATION THROUGH PROVIDERS.—The Secretary, acting through the Centers for Disease Control and Prevention, shall develop and implement a plan for the dissemination of health promotion and disease prevention information consistent with national priorities described in the strategic and implementing plan under subsection (a)(3)(A), to health care providers who participate in Federal programs, including programs administered by the Indian Health Service, the Department of Veterans Affairs, the Department of Defense, and the Health Resources and Services Administration, and the Medicare and Medicaid Programs.

(4) PERSONALIZED PREVENTION PLANS.—

(A) CONTRACT.—The Secretary, acting through the Director of the Centers for Disease Control and Prevention, shall enter into a contract with a qualified entity for the development and operation of a Federal Internet website personalized prevention plan tool.

(B) USE.—The website developed under subparagraph (A) shall be designed to be used as a source of the most up-to-date scientific evidence relating to disease prevention for use by individuals. Such website shall contain a component that enables an individual to determine their disease risk (based on personal health and family history, BMI, and other relevant information) relating to the 5 leading diseases in the United States, and obtain personalized suggestions for preventing such diseases.

(5) INTERNET PORTAL.—The Secretary shall establish an Internet portal for accessing risk-assessment tools developed and maintained by private and academic entities.

(6) PRIORITY FUNDING.—Funding for the activities authorized under this section shall take priority over funding from the Centers for Disease Control and Prevention provided for grants to States and other entities for similar purposes and goals as provided for in this section. Not to exceed \$500,000,000 shall be expended on the campaigns and activities required under this Act.

SEC. 102. STATE GRANTS FOR OUTCOME-BASED PREVENTION EFFORT.

(a) IN GENERAL.—If the Secretary determines that it is essential to meeting the national priorities described in the plan required under section 101(a)(3)(A), the Secretary may award grants to States for the conduct of specific health promotion and disease prevention activities.

(b) ELIGIBILITY.—To be eligible to receive a grant under subsection (a), a State shall submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require, including a strategic plan that shall—

(1) describe the specific health promotion and disease prevention activities to be carried out under this grant;

(2) include a list of the barriers that exist within the State to meeting specific goals of Healthy People 2010;

(3) include targeted demographic indicators and measurable objectives with respect to health promotion and disease prevention;

(4) contain a set of process outcomes and milestones, based on the process outcomes and milestones developed by the Secretary, for measuring the effectiveness of activities carried out under the grant in the State; and

(5) outline the manner in which interventions to be carried out under this grant will reduce morbidity and mortality within the State over a 5-year period (or over a 10-year period, if the Secretary determines such period appropriate for adequately measuring progress).

(c) PROCESS OUTCOMES AND MILESTONES.—

(1) IN GENERAL.—The Secretary shall develop process outcomes and milestones to be used to measure the effectiveness of activities carried out under a grant under this section by a State.

(2) DETERMINATIONS.—If, beginning 2 years after the date on which a grant is awarded to a State under this section, the Secretary determines that the State is failing to make adequate progress in meeting the outcomes and milestones contained in the State plan under subsection (b)(4), the Secretary shall provide the State with technical assistance

on how to make such progress. Such technical assistance shall continue for a period of 2 years.

(3) **CONTINUED FAILURE TO MEET OBJECTIVES.**—If after the expiration of the 2-year period described in paragraph (2), the Secretary determines that the State is failing to make adequate progress in meeting the outcomes and milestones contained in the State plan under subsection (b)(4) over a 5-year period, the Secretary shall terminate all funding to the State under a grant under this section.

(d) **REGIONAL ACTIVITIES.**—A State may use an amount, not to exceed 15 percent of the total grant amount to such State, to carry out regional activities in conjunction with other States.

(e) **TARGETED ACTIVITIES.**—A State may use grant funds to target specific populations within the State to achieve specific outcomes described in Healthy People 2010.

(f) **INNOVATIVE INCENTIVE STRUCTURES.**—The Secretary may award grants to States for the purposes of developing innovative incentive structures to encourage individuals to adopt specific prevention behaviors such as reducing their body mass index or for smoking cessation.

(g) **WELLNESS BONUSES.**—

(1) **IN GENERAL.**—The Secretary shall award wellness bonus payments to at least 5, but not more than 10, States that demonstrate the greatest progress in reducing disease rates and risk factors and increasing healthy behaviors.

(2) **REQUIREMENT.**—To be eligible to receive a bonus payment under paragraph (1), a State shall demonstrate—

(A) the progress described in paragraph (1); and

(B) that the State has met a specific floor for progress outlined in the science-based metrics of Healthy People 2010.

(3) **USE OF PAYMENTS.**—Bonus payments under this subsection may only be used by a State for the purposes of health promotion and disease prevention.

(4) **FUNDING.**—Out of funds appropriated to the Director of the Centers for Disease Control and Prevention for each fiscal year beginning with fiscal year 2010, the Director shall give priority to using \$50,000,000 of such funds to make bonus payments under this subsection.

(h) **ADMINISTRATIVE EXPENSES.**—A State may use not more than 5 percent of the amount of a grant under this section to carry out administrative activities.

(i) **STATE.**—In this section, the term “State” means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, Samoa, the United States Virgin Islands, and the Commonwealth of the Northern Mariana Islands.

(j) **AUTHORIZATION OF APPROPRIATIONS.**—Funding for the activities authorized under this section shall take priority over funding from the Centers for Disease Control and Prevention provided for grants to States and other entities for similar purposes and goals as provided for in this section, not to exceed \$300,000,000 for each fiscal year.

SEC. 103. FOCUSING THE FOOD STAMP PROGRAM ON NUTRITION.

(a) **COUNSELING BROCHURE.**—The Director of the Centers for Disease Control and Prevention shall develop, and the Secretary of Agriculture shall distribute to each individual and family enrolled in the Food Stamp Program under the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.), a science-based nutrition counseling brochure.

(b) **LIMITATIONS ON FOOD STAMP PURCHASES.**—

(1) **IN GENERAL.**—Not later than 6 months after the date of enactment of this Act, the Secretary of Agriculture shall, based on scientific, peer-reviewed recommendations provided by a Commission that includes public health, medical, and nutrition experts and the Director of the Centers for Disease Control and Prevention, develop lists of foods that do not meet science-based standards for proper nutrition and that may not be purchased under the food stamp program. Such list shall be updated on an annual basis to ensure the most current science-based recommendations are applied to the food stamp program.

(2) **AUTOMATED ENFORCEMENT.**—The Secretary of Agriculture shall, through regulations, ensure that the limitations on food purchases under paragraph (1) is enforced through the food stamp program's automated system.

(3) **IMPLEMENTATION.**—The Secretary of Agriculture shall promulgate the regulations described in paragraph (2) by the date that is not later than 1 year after the date of enactment of this section.

SEC. 104. IMMUNIZATIONS.

(a) **PURCHASE OF VACCINES.**—Notwithstanding any other provision of law, a State may use amounts provided under section 317 of the Public Health Service Act (42 U.S.C. 247b) for immunization programs to purchase vaccines for use in health care provider offices and schools.

(b) **TECHNICAL ASSISTANCE AND REDUCTION IN FUNDING.**—If a State does not achieve a benchmark of 80 percent coverage within the State for Centers for Disease Control and Prevention-recommended vaccines, the Director of the Centers shall provide technical assistance to the State for a period of 2 years. If after the expiration of such 2-year period the State continues to fail to achieve such benchmark, the Secretary shall reduce funding provided under section 317 of the Public Health Service Act to such State by 5 percent.

(c) **BONUS GRANT.**—A State achieving a benchmark of 90 percent or greater coverage within the State for Centers for Disease Control and Prevention-recommended vaccines shall be eligible for a bonus grant from amounts appropriated under subsection (d).

(d) **AUTHORIZATION OF APPROPRIATIONS.**—Out of funds appropriated to the Director of the Centers for Disease Control and Prevention for each fiscal year beginning with fiscal year 2010, there shall be made available to carry out this section, \$50,000,000 for each fiscal year.

(e) **FUNDING FOR SECTION 317.**—Section 317(j)(1) of the Public Health Service Act (42 U.S.C. 247b(j)(1)) is amended by striking “2005” and inserting “2012”.

TITLE II—STATE-BASED HEALTH CARE EXCHANGES

SEC. 201. STATE-BASED HEALTH CARE EXCHANGES.

(a) **IN GENERAL.**—The Secretary of Health and Human Services (referred to in this title as the “Secretary”) shall establish a process for the review of applications submitted by States for the establishment and implementation of State-based health care Exchanges (referred to in this title as a “State Exchange”) and for the certification of such Exchanges. The Secretary shall certify a State Exchange if the Secretary determines that such Exchange meets the requirements of this title.

(b) **CONTINUED CERTIFICATION.**—The certification of a State Exchange under subsection (a) shall remain in effect until the Secretary determines that the Exchange has failed to

meet any of the requirements under this title.

SEC. 202. REQUIREMENTS.

(a) **GENERAL REQUIREMENTS FOR CERTIFICATION.**—An application for certification under section 201(a) shall demonstrate compliance with the following:

(1) **PURPOSE.**—The primary purpose of a State Exchange shall be the facilitation of the individual purchase of innovative private health insurance and the creation of a market where private health plans compete for enrollees based on price and quality.

(2) **ADMINISTRATION.**—A State shall ensure the operation of the State Exchange through direct contracts with the health insurance plans that are participating in the State Exchange or through a contract with a third party administrator for the operation of the Exchange.

(3) **PLAN PARTICIPATION.**—A State shall not restrict or otherwise limit the ability of a health insurance plan to participate in, and offer health insurance coverage through, the State Exchange, so long as the health insurance issuers involved are duly licensed under State insurance laws applicable to all health insurance issuers in the State and otherwise comply with the requirements of this title.

(4) **PREMIUMS.**—

(A) **AMOUNT.**—A State shall not determine premium or cost sharing amounts for health insurance coverage offered through the State Exchange.

(B) **COLLECTION METHOD.**—A State shall ensure the existence of an effective and efficient method for the collection of premiums for health insurance coverage offered through the State Exchange.

(b) **BENEFIT PARITY WITH MEMBERS OF CONGRESS.**—With respect to health insurance issuers offering health insurance coverage through the State Exchange, the State shall not impose any requirement that such issuers provide coverage that includes benefits different than requirements on plans offered to Members of Congress under chapter 89 of title 5, United States Code.

(c) **FACILITATING UNIVERSAL COVERAGE FOR AMERICANS.**—

(1) **AUTOMATIC ENROLLMENT.**—The State Exchange shall ensure that health insurance coverage offered through the Exchange provides for the application of uniform mechanisms that are designed to encourage and facilitate the enrollment of all eligible individuals in Exchange-based health insurance coverage. Such mechanisms shall include automatic enrollment through various venues, which may include emergency rooms, the submission of State tax forms, places of employment in the State, and State departments of motor vehicles.

(2) **OTHER ENROLLMENT OPPORTUNITIES.**—

(A) **IN GENERAL.**—The State Exchange shall ensure that health insurance coverage offered through the Exchange permits enrollment, and changes in enrollment, of individuals at the time such individuals become eligible individuals in the State.

(B) **ANNUAL OPEN ENROLLMENT PERIODS.**—The State Exchange shall ensure that health insurance coverage offered through the Exchange permits eligible individuals to annually change enrollment among the coverage offered through the Exchange, subject to subparagraph (A).

(C) **INCENTIVES FOR CONTINUOUS ANNUAL COVERAGE.**—The State Exchange shall include an incentive for eligible individuals to remain insured from plan year to plan year, and may include incentives such as State tax incentives or premium-based incentives.

(3) **GUARANTEED ACCESS FOR INDIVIDUALS.**—The State Exchange shall ensure that, with

respect to health insurance coverage offered through the Exchange, all eligible individuals are able to enroll in the coverage of their choice provided that such individuals agree to make applicable premium and cost sharing payments.

(4) **LIMITATION ON PRE-EXISTING CONDITION EXCLUSIONS.**—The State Exchange shall ensure that health insurance coverage offered through the Exchange meets the requirements of section 9801 of the Internal Revenue Code of 1986 in the same manner as if such coverage was a group health plan.

(5) **OPT-OUT.**—Nothing in this title shall be construed to require that an individual be enrolled in health insurance coverage.

(d) **LIMITATION ON EXORBITANT PREMIUMS.**—

(1) **ESTABLISHMENT OF MECHANISM.**—With respect to health insurance coverage offered through the State Exchange, the Exchange shall establish a mechanisms to protect enrollees from the imposition of excessive premiums, to reduce adverse selection, and to share risk.

(2) **MECHANISM OPTIONS.**—The mechanisms referred to in paragraph (1) may include the following:

(A) **INDEPENDENT RISK ADJUSTMENT.**—The implementation of risk-adjustment among health insurance coverage offered through the State Exchange through a contract entered into with a private, independent board. Such board shall include representation of health insurance issuers and State officials but shall be independently controlled. The State Exchange shall ensure that risk-adjustment implemented under this subparagraph shall be based on a blend of patient diagnoses and estimated costs.

(B) **HEALTH SECURITY POOLS.**—The establishment (or continued operation under section 2745 of the Public Health Service Act) of a health security pool to guarantee high-risk individuals access to affordable, quality health care.

(C) **REINSURANCE.**—The implementation of a successful reinsurance mechanisms to guarantee high-risk individuals access to affordable, quality health care.

(e) **MEDICAID AND SCHIP BENEFICIARIES.**—The State Exchange shall include procedures to permit eligible individuals who are receiving (or who are eligible to receive) health care under title XIX or XXI of the Social Security Act to enroll in health insurance coverage offered through the Exchange.

(f) **DISSEMINATION OF COVERAGE INFORMATION.**—The State Exchange shall ensure that each health insurance issuer that provides health insurance coverage through the Exchange disseminate to eligible individuals and employers within the State information concerning health insurance coverage options, including the plans offered and premiums and benefits for such plans.

(g) **REGIONAL OPTIONS.**—

(1) **INTERSTATE COMPACTS.**—Two or more States that establish a State Exchange may enter into interstate compact providing for the regulations of health insurance coverage offered within such States.

(2) **MODEL LEGISLATION.**—States adopting model legislation as developed by the National Association of Insurance Commissioners shall be eligible to enter into an interstate compact as provided for in this section.

(3) **MULTI-STATE POOLING ARRANGEMENTS.**—State Exchanges may implement a multi-state health care coverage pooling arrangement under this title.

(h) **PURCHASE ACROSS STATE LINES.**—Notwithstanding any other provision of law, an eligible individual may enroll in health in-

surance coverage offered through the Exchange in any State. The regulation of such coverage (and the addressing of grievances relating to such coverage) shall be subject to the laws of the State in which such coverage is purchased, regardless of the State in which the eligible individual resides.

(i) **ELIGIBLE INDIVIDUAL.**—In this title, the term “eligible individual” means an individual who is—

(1) a citizen or national of the United States or an alien lawfully admitted to the United States for permanent residence or otherwise residing in the United States under color of law;

(2) not incarcerated; and

(3) not eligible for coverage under parts A and B (or C) of the Medicare program under title XVIII of the Social Security Act.

SEC. 203. STATE EXCHANGE INCENTIVES.

(a) **GRANTS.**—The Secretary may award grants, pursuant to subsection (b), to States for the development, implementation, and evaluation of certified State Exchanges and to provide more options and choice for individuals purchasing health insurance coverage.

(b) **ONE-TIME INCREASE IN MEDICAID PAYMENT.**—In the case of a State awarded a grant to carry out this section, the total amount of the Federal payment determined for the State under section 1913 of the Social Security Act (as amended by section 401) for fiscal year 2011 shall be increased by an amount equal to 1 percent of the total amount of payments made to the State for fiscal year 2010 under section 1903(a) of the Social Security Act (42 U.S.C. 1396b(a)) for purposes of carrying out a grant awarded under this section. Amounts paid to a State pursuant to this subsection shall remain available until expended.

TITLE III—FAIR TAX TREATMENT FOR ALL AMERICANS TO AFFORD HEALTH CARE

SEC. 300. REFERENCE.

Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1986.

SEC. 301. REFUNDABLE AND ADVANCEABLE CREDIT FOR CERTAIN HEALTH INSURANCE COVERAGE.

(a) **ADVANCEABLE CREDIT.**—Subpart A of part IV of subchapter A of chapter 1 (relating to nonrefundable personal credits) is amended by adding at the end the following new section:

“SEC. 25E. QUALIFIED HEALTH INSURANCE CREDIT.

“(a) **ALLOWANCE OF CREDIT.**—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year the sum of the monthly limitations determined under subsection (b) for the taxpayer and the taxpayer’s spouse and dependents.

“(b) **MONTHLY LIMITATION.**—

“(1) **IN GENERAL.**—The monthly limitation for each month during the taxable year for an eligible individual is 1/12th of—

“(A) the applicable adult amount, in the case that the eligible individual is the taxpayer or the taxpayer’s spouse,

“(B) the applicable adult amount, in the case that the eligible individual is an adult dependent, and

“(C) the applicable child amount, in the case that the eligible individual is a child dependent.

“(2) **LIMITATION ON AGGREGATE AMOUNT.**—Notwithstanding paragraph (1), the aggregate

monthly limitations for the taxpayer and the taxpayer’s spouse and dependents for any month shall not exceed 1/12th of the applicable aggregate amount.

“(3) **NO CREDIT FOR INELIGIBLE MONTHS.**—With respect to any individual, the monthly limitation shall be zero for any month for which such individual is not an eligible individual.

“(4) **APPLICABLE AMOUNT.**—

“(A) **IN GENERAL.**—For purposes of this section—

“(i) **APPLICABLE ADULT AMOUNT.**—The applicable adult amount is \$2,290.

“(ii) **APPLICABLE CHILD AMOUNT.**—The applicable child amount is \$1,710.

“(iii) **APPLICABLE AGGREGATE AMOUNT.**—The applicable aggregate amount is \$5,710.

“(B) **COST-OF-LIVING ADJUSTMENTS.**—

“(i) **IN GENERAL.**—In the case of any taxable year beginning in a calendar year after 2011, each dollar amount contained in subparagraph (A) shall be increased by an amount equal to such dollar amount multiplied by the blended cost-of-living adjustment.

“(ii) **BLENDED COST-OF-LIVING ADJUSTMENT.**—For purposes of clause (i), the blended cost-of-living adjustment means one-half of the sum of—

“(I) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which the taxable year begins by substituting ‘calendar year 2010’ for ‘calendar year 1992’ in subparagraph (B) thereof, plus

“(II) the cost-of-living adjustment determined under section 213(d)(10)(B)(ii) for the calendar year in which the taxable year begins by substituting ‘2010’ for ‘1996’ in subclause (II) thereof.

“(iii) **ROUNDING.**—Any increase determined under clause (i) shall be rounded to the nearest multiple of \$10.

“(C) **REVENUE NEUTRALITY ADJUSTMENTS.**—

“(i) **IN GENERAL.**—In the case of any taxable year beginning in a calendar year after 2011, each dollar amount contained in subparagraph (A), as adjusted under subparagraph (B), shall be further adjusted (if necessary) such that the aggregate of such dollar amounts allowed as credits under this section for such taxable year equals but does not exceed the total increase in revenues in the Treasury resulting from the amendments made by sections 303 and 401 of the Patients’ Choice Act for such taxable year as estimated by the Secretary.

“(ii) **DATE OF ADJUSTMENT.**—The Secretary shall announce the adjustments for any taxable year under this subparagraph not later than the preceding October 1.

“(c) **LIMITATION BASED ON AMOUNT OF TAX.**—In the case of a taxable year to which section 26(a)(2) does not apply, the credit allowed under subsection (a) for the taxable year shall not exceed the excess of—

“(1) the sum of the regular tax liability (as defined in section 26(b)) plus the tax imposed by section 55, over

“(2) the sum of the credits allowable under this subpart (other than this section) and section 27 for the taxable year.

“(d) **EXCESS CREDIT REFUNDABLE TO CERTAIN TAX-FAVORED ACCOUNTS.**—If—

“(1) the credit which would be allowable under subsection (a) if only qualified refund eligible health insurance were taken into account under this section, exceeds

“(2) the limitation imposed by section 26 or subsection (c) for the taxable year, such excess shall be paid by the Secretary into the designated account of the taxpayer.

“(e) **ELIGIBLE INDIVIDUAL.**—For purposes of this section—

“(1) IN GENERAL.—The term ‘eligible individual’ means, with respect to any month, an individual who—

“(A) is the taxpayer, the taxpayer’s spouse, or the taxpayer’s dependent, and

“(B) is covered under qualified health insurance as of the 1st day of such month.

“(2) MEDICARE COVERAGE, MEDICAID DISABILITY COVERAGE, AND MILITARY COVERAGE.—The term ‘eligible individual’ shall not include any individual who for any month is—

“(A) entitled to benefits under part A of title XVIII of the Social Security Act or enrolled under part B of such title, and the individual is not a participant or beneficiary in a group health plan or large group health plan that is a primary plan (as defined in section 1862(b)(2)(A) of such Act),

“(B) enrolled by reason of disability in the program under title XIX of such Act, or

“(C) entitled to benefits under chapter 55 of title 10, United States Code, including under the TRICARE program (as defined in section 1072(7) of such title).

“(3) IDENTIFICATION REQUIREMENTS.—The term ‘eligible individual’ shall not include any individual for any month unless the policy number associated with the qualified health insurance and the TIN of each eligible individual covered under such health insurance for such month are included on the return of tax for the taxable year in which such month occurs.

“(4) PRISONERS.—The term ‘eligible individual’ shall not include any individual for a month if, as of the first day of such month, such individual is imprisoned under Federal, State, or local authority.

“(5) ALIENS.—The term ‘eligible individual’ shall not include any alien individual who is not a lawful permanent resident of the United States.

“(f) HEALTH INSURANCE.—For purposes of this section—

“(1) QUALIFIED HEALTH INSURANCE.—The term ‘qualified health insurance’ means any insurance constituting medical care which (as determined under regulations prescribed by the Secretary)—

“(A) has a reasonable annual and lifetime benefit maximum, and

“(B) provides coverage for inpatient and outpatient care, emergency benefits, and physician care.

Such term does not include any insurance substantially all of the coverage of which is coverage described in section 223(c)(1)(B).

“(2) QUALIFIED REFUND ELIGIBLE HEALTH INSURANCE.—The term ‘qualified refund eligible health insurance’ means any qualified health insurance which is coverage under a group health plan (as defined in section 5000(b)(1)).

“(g) DESIGNATED ACCOUNTS.—

“(1) DESIGNATED ACCOUNT.—For purposes of this section, the term ‘designated account’ means any specified account established and maintained by the provider of the taxpayer’s qualified refund eligible health insurance—

“(A) which is designated by the taxpayer (in such form and manner as the Secretary may provide) on the return of tax for the taxable year,

“(B) which, under the terms of the account, accepts the payment described in subsection (d) on behalf of the taxpayer, and

“(C) which, under such terms, provides for the payment of expenses by the taxpayer or on behalf of such taxpayer by the trustee or custodian of such account, including payment to such provider.

“(2) SPECIFIED ACCOUNT.—For purposes of this paragraph, the term ‘specified account’ means—

“(A) any health savings account under section 223 or Archer MSA under section 220, or

“(B) any health insurance reserve account.

“(3) HEALTH INSURANCE RESERVE ACCOUNT.—For purposes of this subsection, the term ‘health insurance reserve account’ means a trust created or organized in the United States as a health insurance reserve account exclusively for the purpose of paying the qualified medical expenses (within the meaning of section 223(d)(2)) of the account beneficiary (as defined in section 223(d)(3)), but only if the written governing instrument creating the trust meets the requirements described in subparagraphs (B), (C), (D), and (E) of section 223(d)(1). Rules similar to the rules under subsections (g) and (h) of section 408 shall apply for purposes of this subparagraph.

“(4) TREATMENT OF PAYMENT.—Any payment under subsection (d) to a designated account shall not be taken into account with respect to any dollar limitation which applies with respect to contributions to such account (or to tax benefits with respect to such contributions).

“(h) OTHER DEFINITIONS.—For purposes of this section—

“(1) DEPENDENT.—The term ‘dependent’ has the meaning given such term by section 152 (determined without regard to subsections (b)(1), (b)(2), and (d)(1)(B) thereof). An individual who is a child to whom section 152(e) applies shall be treated as a dependent of the custodial parent for a coverage month unless the custodial and noncustodial parent provide otherwise.

“(2) ADULT.—The term ‘adult’ means an individual who is not a child.

“(3) CHILD.—The term ‘child’ means a qualifying child (as defined in section 152(c)).

“(i) SPECIAL RULES.—

“(1) COORDINATION WITH MEDICAL DEDUCTION.—Any amount paid by a taxpayer for insurance which is taken into account for purposes of determining the credit allowable to the taxpayer under subsection (a) shall not be taken into account in computing the amount allowable to the taxpayer as a deduction under section 213(a) or 162(1).

“(2) COORDINATION WITH HEALTH CARE TAX CREDIT.—No credit shall be allowed under subsection (a) for any taxable year to any taxpayer and qualifying family members with respect to whom a credit under section 35 is allowed for such taxable year.

“(3) DENIAL OF CREDIT TO DEPENDENTS.—No credit shall be allowed under this section to any individual with respect to whom a deduction under section 151 is allowable to another taxpayer for a taxable year beginning in the calendar year in which such individual’s taxable year begins.

“(4) MARRIED COUPLES MUST FILE JOINT RETURN.—

“(A) IN GENERAL.—If the taxpayer is married at the close of the taxable year, the credit shall be allowed under subsection (a) only if the taxpayer and his spouse file a joint return for the taxable year.

“(B) MARITAL STATUS; CERTAIN MARRIED INDIVIDUALS LIVING APART.—Rules similar to the rules of paragraphs (3) and (4) of section 21(e) shall apply for purposes of this paragraph.

“(5) VERIFICATION OF COVERAGE, ETC.—No credit shall be allowed under this section with respect to any individual unless such individual’s coverage (and such related information as the Secretary may require) is verified in such manner as the Secretary may prescribe.

“(6) INSURANCE WHICH COVERS OTHER INDIVIDUALS; TREATMENT OF PAYMENTS.—Rules

similar to the rules of paragraphs (7) and (8) of section 35(g) shall apply for purposes of this section.

“(j) COORDINATION WITH ADVANCE PAYMENTS.—

“(1) REDUCTION IN CREDIT FOR ADVANCE PAYMENTS.—With respect to any taxable year, the amount which would (but for this subsection) be allowed as a credit to the taxpayer under subsection (a) shall be reduced (but not below zero) by the aggregate amount paid on behalf of such taxpayer under section 7527A for months beginning in such taxable year.

“(2) RECAPTURE OF EXCESS ADVANCE PAYMENTS.—If the aggregate amount paid on behalf of the taxpayer under section 7527A for months beginning in the taxable year exceeds the sum of the monthly limitations determined under subsection (b) for the taxpayer and the taxpayer’s spouse and dependents for such months, then the tax imposed by this chapter for such taxable year shall be increased by the sum of—

“(A) such excess, plus

“(B) interest on such excess determined at the underpayment rate established under section 6621 for the period from the date of the payment under section 7527A to the date such excess is paid.

For purposes of subparagraph (B), an equal part of the aggregate amount of the excess shall be deemed to be attributable to payments made under section 7527A on the first day of each month beginning in such taxable year, unless the taxpayer establishes the date on which each such payment giving rise to such excess occurred, in which case subparagraph (B) shall be applied with respect to each date so established. The Secretary may rescind or waive all or any portion of any amount imposed by reason of subparagraph (B) if such excess was not the result of the actions of the taxpayer.”

(b) ADVANCE PAYMENT OF CREDIT.—Chapter 77 (relating to miscellaneous provisions) is amended by inserting after section 7527 the following new section:

“SEC. 7527A. ADVANCE PAYMENT OF CREDIT FOR QUALIFIED REFUND ELIGIBLE HEALTH INSURANCE.

“(a) IN GENERAL.—The Secretary shall establish a program for making payments on behalf of individuals to providers of qualified refund eligible health insurance (as defined in section 25E(f)(2)) for such individuals.

“(b) LIMITATION.—The Secretary may make payments under subsection (a) only to the extent that the Secretary determines that the amount of such payments made on behalf of any taxpayer for any month does not exceed the sum of the monthly limitations determined under section 25E(b) for the taxpayer and taxpayer’s spouse and dependents for such month.”

(c) INFORMATION REPORTING.—

(1) IN GENERAL.—Subpart B of part III of subchapter A of chapter 61 (relating to information concerning transactions with other persons) is amended by inserting after section 6050W the following new section:

“SEC. 6050X. RETURNS RELATING TO CREDIT FOR QUALIFIED REFUND ELIGIBLE HEALTH INSURANCE.

“(a) REQUIREMENT OF REPORTING.—Every person who is entitled to receive payments for any month of any calendar year under section 7527A (relating to advance payment of credit for qualified refund eligible health insurance) with respect to any individual shall, at such time as the Secretary may prescribe, make the return described in subsection (b) with respect to each such individual.

“(b) FORM AND MANNER OF RETURNS.—A return is described in this subsection if such return—

“(1) is in such form as the Secretary may prescribe, and

“(2) contains, with respect to each individual referred to in subsection (a)—

“(A) the name, address, and TIN of each such individual,

“(B) the months for which amounts payable under section 7527A were received,

“(C) the amount of each such payment,

“(D) the type of insurance coverage provided by such person with respect to such individual and the policy number associated with such coverage,

“(E) the name, address, and TIN of the spouse and each dependent covered under such coverage, and

“(F) such other information as the Secretary may prescribe.

“(c) STATEMENTS TO BE FURNISHED TO INDIVIDUALS WITH RESPECT TO WHOM INFORMATION IS REQUIRED.—Every person required to make a return under subsection (a) shall furnish to each individual whose name is required to be set forth in such return a written statement showing—

“(1) the contact information of the person required to make such return, and

“(2) the information required to be shown on the return with respect to such individual.

The written statement required under the preceding sentence shall be furnished on or before January 31 of the year following the calendar year for which the return under subsection (a) is required to be made.

“(d) RETURNS WHICH WOULD BE REQUIRED TO BE MADE BY 2 OR MORE PERSONS.—Except to the extent provided in regulations prescribed by the Secretary, in the case of any amount received by any person on behalf of another person, only the person first receiving such amount shall be required to make the return under subsection (a).”.

(2) ASSESSABLE PENALTIES.—

(A) Subparagraph (B) of section 6724(d)(1) (relating to definitions) is amended by striking “or” at the end of clause (xxii), by striking “and” at the end of clause (xxiii) and inserting “or”, and by inserting after clause (xxiii) the following new clause:

“(xxiv) section 6050X (relating to returns relating to credit for qualified refund eligible health insurance), and”.

(B) Paragraph (2) of section 6724(d) is amended by striking “or” at the end of subparagraph (EE), by striking the period at the end of subparagraph (FF) and inserting “, or” and by inserting after subparagraph (FF) the following new subparagraph:

“(GG) section 6050X (relating to returns relating to credit for qualified refund eligible health insurance).”.

(d) CONFORMING AMENDMENTS.—

(1) Paragraph (2) of section 1324(b) of title 31, United States Code, is amended by inserting “25E,” before “35,”.

(2)(A) Section 24(b)(3)(B) is amended by inserting “, 25E,” after “25D”.

(B) Section 25(e)(1)(C)(ii) is amended by inserting “25E,” after “25D,”.

(C) Section 25B(g)(2) is amended by inserting “25E,” after “25D,”.

(D) Section 26(a)(1) is amended by inserting “25E,” after “25D,”.

(E) Section 30(c)(2)(B)(ii) is amended by inserting “25E,” after “25D,”.

(F) Section 30D(c)(2)(B)(ii) is amended by striking “and 25D” and inserting “, 25D, and 25E”.

(G) Section 904(i) is amended by inserting “25E,” after “25B,”.

(H) Section 1400C(d)(2) is amended by inserting “25E,” after “25D,”.

(3) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting after the item relating to section 25D the following new item:

“Sec. 25E. Qualified health insurance credit.”.

(4) The table of sections for chapter 77 is amended by inserting after the item relating to section 7527 the following new item:

“Sec. 7527A. Advance payment of credit for qualified refund eligible health insurance.”.

(5) The table of sections for subpart B of part III of subchapter A of chapter 61 is amended by adding at the end the following new item:

“Sec. 6050X. Returns relating to credit for qualified refund eligible health insurance.”.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2010.

SEC. 302. REQUIRING EMPLOYER TRANSPARENCY ABOUT EMPLOYEE BENEFITS.

(a) IN GENERAL.—Section 6051(a) (relating to W-2 requirement) is amended by striking “and” at the end of paragraph (12), by striking the period at the end of paragraph (13) and inserting “, and” and by inserting after paragraph (13) the following new paragraph:

“(14) the aggregate cost (within the meaning of section 4980B(f)(4)) for coverage of the employee under an accident or health plan which is excludable from the gross income of the employee under section 106(a) (other than coverage under a health flexible spending arrangement).”.

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to statements for calendar years beginning after 2009.

SEC. 303. CHANGES TO EXISTING TAX PREFERENCES FOR MEDICAL COVERAGE, ETC., FOR INDIVIDUALS ELIGIBLE FOR QUALIFIED HEALTH INSURANCE CREDIT.

(a) EXCLUSION FOR CONTRIBUTIONS BY EMPLOYER TO ACCIDENT AND HEALTH PLANS.—

(1) IN GENERAL.—Section 106 (relating to contributions by employer to accident and health plans) is amended by adding at the end the following new subsection:

“(f) NO EXCLUSION FOR INDIVIDUALS ELIGIBLE FOR QUALIFIED HEALTH INSURANCE CREDIT.—Subsection (a) shall not apply with respect to any employer-provided coverage under an accident or health plan for any individual for any month unless such individual is described in paragraph (2) or (5) of section 25E(e) for such month. The amount includible in gross income by reason of this subsection shall be determined under rules similar to the rules of section 4980B(f)(4).”.

(2) CONFORMING AMENDMENTS.—

(A) Section 106(b)(1) is amended—

(i) by inserting “gross income does not include” before “amounts contributed”, and

(ii) by striking “shall be treated as employer-provided coverage for medical expenses under an accident or health plan”.

(B) Section 106(d)(1) is amended—

(i) by inserting “gross income does not include” before “amounts contributed”, and

(ii) by striking “shall be treated as employer-provided coverage for medical expenses under an accident or health plan”.

(b) AMOUNTS RECEIVED UNDER ACCIDENT AND HEALTH PLANS.—Section 105 (relating to amounts received under accident and health plans) is amended by adding at the end the following new subsection:

“(f) NO EXCLUSION FOR INDIVIDUALS ELIGIBLE FOR QUALIFIED HEALTH INSURANCE CREDIT.—

Subsection (b) shall not apply with respect to any employer-provided coverage under an accident or health plan for any individual for any month unless such individual is described in paragraph (2) or (5) of section 25E(e) for such month.”.

(c) SPECIAL RULES FOR HEALTH INSURANCE COSTS OF SELF-EMPLOYED INDIVIDUALS.—Subsection (1) of section 162 (relating to special rules for health insurance costs of self-employed individuals) is amended by adding at the end the following new paragraph:

“(6) NO DEDUCTION TO INDIVIDUALS ELIGIBLE FOR QUALIFIED HEALTH INSURANCE.—Paragraph (1) shall not apply for any individual for any month unless such individual is described in paragraph (2) or (5) of section 25E(e) for such month.”.

(d) EARNED INCOME CREDIT UNAFFECTED BY REPEALED EXCLUSIONS.—Subparagraph (B) of section 32(c)(2) is amended by redesignating clauses (v) and (vi) as clauses (vi) and (vii), respectively, and by inserting after clause (iv) the following new clause:

“(v) the earned income of an individual shall be computed without regard to sections 105(f) and 106(f).”.

(e) MODIFICATION OF DEDUCTION FOR MEDICAL EXPENSES.—Subsection (d) of section 213 is amended by adding at the end the following new paragraph:

“(12) PREMIUMS FOR QUALIFIED HEALTH INSURANCE.—The term ‘medical care’ does not include any amount paid as a premium for coverage of an eligible individual (as defined in section 25E(e)) under qualified health insurance (as defined in section 25E(f)) for any month.”.

(f) REPORTING REQUIREMENT.—Subsection (a) of section 6051 is amended by striking “and” at the end of paragraph (12), by striking the period at the end of paragraph (13) and inserting “and”, and by inserting after paragraph (13) the following new paragraph:

“(14) the total amount of employer-provided coverage under an accident or health plan which is includible in gross income by reason of sections 105(f) and 106(f).”.

(g) RETIRED PUBLIC SAFETY OFFICERS.—Section 402(l)(4)(D) is amended by adding at the end the following: “Such term shall not include any premium for coverage by an accident or health insurance plan for any month unless such individual is described in paragraph (2) or (5) of section 25E(e) for such month.”.

(h) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 2010.

(i) NO INTENT TO ENCOURAGE STATE TAXATION OF HEALTH BENEFITS.—No intent to encourage any State to treat health benefits as taxable income for the purpose of increasing State income taxes may be inferred from the provisions of, and amendments made by, this section.

SEC. 304. DETERMINATION OF ELIGIBILITY.

(a) APPLICATION OF INCOME AND ELIGIBILITY VERIFICATION SYSTEM (IEVS) AND THE SYSTEMATIC ALIEN VERIFICATION FOR ENTITLEMENTS (SAVE) PROGRAMS.—In order to obtain coverage through an Exchange, an individual must have had his or her eligibility determined and approved under the Income and Eligibility Verification System (IEVS) and the Systematic Alien Verification for Entitlements (SAVE) programs under section 1137 of the Social Security Act. The benefit determination and approval under this subsection shall be the responsibility of the Exchange-participating health plans involved.

(b) CREDITS.—In addition to satisfying the eligibility requirements specified in subsection (a), to be considered a credit eligible

individual under the amendments made by this title, an individual must have had his or her eligibility for the credit determined and approved under the Income and Eligibility Verification System (IEVS) and the Systematic Alien Verification for Entitlements (SAVE) programs under section 1137 of the Social Security Act. The benefit determination and approval under this subsection shall be the responsibility of the Exchange-participating health plans in which the individual enrolls and attempts to utilize the credit.

(c) **EFFECTIVE DATE.**—The amendment made by this section shall apply to taxable years beginning after December 31, 2009.

SEC. 305. ADJUSTMENTS.

Notwithstanding any other provision of law, the Secretary of the Treasury shall adjust the growth of tax credits provided for under this amendments made by this title at such levels as appropriate so that this Act will remain budget neutral.

TITLE IV—FAIRNESS FOR EVERY AMERICAN PATIENT

Subtitle A—Medicaid Modernization

SEC. 401. MEDICAID MODERNIZATION.

(a) **IN GENERAL.**—Effective January 1, 2011, title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) is amended to read as follows:

“TITLE XIX—GRANTS TO STATES FOR MEDICAL ASSISTANCE PROGRAMS

“TABLE OF CONTENTS OF TITLE

“Sec. 1900. References to pre-modernized Medicaid provisions; continuity for commonwealths and territories.

“PART A—GRANTS TO STATES FOR ACUTE CARE FOR INDIVIDUALS WITH DISABILITIES AND CERTAIN LOW-INCOME INDIVIDUALS

“Sec. 1901. Purpose; Appropriation.

“Sec. 1902. Payments to States for acute care medical assistance.

“Sec. 1903. Definitions of eligible individuals and acute care medical assistance.

“Sec. 1904. State plan requirements for acute care medical assistance.

“Sec. 1905. Definitions.

“Sec. 1906. Enrollment of individuals under group health plans and other arrangements.

“Sec. 1907. Drug rebates.

“Sec. 1908. Managed care.

“Sec. 1909. Annual reports.

“PART B—GRANTS TO STATES FOR LONG-TERM CARE SERVICES AND SUPPORTS

“Sec. 1911. Purpose.

“Sec. 1912. State plan.

“Sec. 1913. State allotments.

“Sec. 1914. Use of grants.

“Sec. 1915. Administrative provisions.

“Sec. 1916. Definition of long-term care services and supports.

“Sec. 1917. Provision requirements for long-term care services and supports, including option for self-directed services and supports.

“Sec. 1918. Treatment of income and resources for certain institutionalized spouses.

“Sec. 1919. Annual reports.

“PART C—GRANTS TO STATES FOR SURVEY AND CERTIFICATION OF MEDICAL FACILITIES AND OTHER REQUIREMENTS

“Sec. 1931. Authorization of appropriations.

“Sec. 1932. Application of certain requirements under pre-modernized Medicaid.

“PART D—GRANTS TO STATES FOR PROGRAM INTEGRITY

“Sec. 1941. Authorization of appropriations.

“Sec. 1942. Application of certain requirements under pre-modernized Medicaid.

“PART E—GRANTS TO STATES FOR ADMINISTRATION

“Sec. 1951. Authorization of appropriations; payments to states.

“Sec. 1952. Cost-sharing protections.

“Sec. 1953. Application of certain requirements under pre-modernized Medicaid.

“PART F—OTHER PROVISIONS

“Sec. 1961. Application of certain requirements under pre-modernized Medicaid.

“SEC. 1900. REFERENCES TO PRE-MODERNIZED MEDICAID PROVISIONS; CONTINUITY FOR COMMONWEALTHS AND TERRITORIES.

“(a) **IN GENERAL.**—In this title, if a reference to this title or to a provision of this title is prefaced by the term ‘old’, such reference is to this title or a provision of this title as in effect on December 31, 2010.

“(b) **REGULATIONS.**—The Secretary shall promulgate regulations to bring requirements imposed under an old provision of this title that applies under this title after December 31, 2010, into conformity with the policies embodied in this title as in effect on and after January 1, 2011.

“(c) **CONTINUITY FOR COMMONWEALTHS AND TERRITORIES.**—In the case of Puerto Rico, the United States Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa, this title as in effect on and after January 1, 2011, shall not apply to such commonwealths and territories, and old title XIX shall apply to a Medicaid program operated by such commonwealths or territories on and after that date.

“PART A—GRANTS TO STATES FOR ACUTE CARE FOR INDIVIDUALS WITH DISABILITIES AND CERTAIN LOW-INCOME INDIVIDUALS

“SEC. 1901. PURPOSE; APPROPRIATION.

“(a) **PURPOSE.**—It is the purpose of this part to enable each State, as far as practicable under the conditions in the State, to provide acute care medical assistance to eligible individuals described in section 1903 whose income and resources are insufficient to meet the costs of necessary medical services, and (2) rehabilitation and other services to help such individuals attain or retain capability for independence or self-care.

“(b) **APPROPRIATION.**—For the purpose of making payments to States under this part, there is appropriated out of any money in the Treasury not otherwise appropriated, such sums as are necessary for fiscal year 2011 and each fiscal year thereafter.

“SEC. 1902. PAYMENTS TO STATES FOR ACUTE CARE MEDICAL ASSISTANCE.

“(a) **IN GENERAL.**—From the amounts appropriated under section 1901 for a fiscal year, the Secretary shall pay to each State which has a plan approved under this part, for each quarter, beginning with the quarter commencing January 1, 2011, an amount equal to the Federal medical assistance percentage (as defined in section 1905(b)) of the total amount expended during such quarter as acute care medical assistance under the State plan under this part.

“(b) **ADMINISTRATIVE EXPENSES.**—Each State with a plan approved under this part shall receive a payment determined in accordance with part E for administrative expenses incurred in carrying out the plan under this part and part B (if the State has a plan approved under that part).

“SEC. 1903. DEFINITIONS OF ELIGIBLE INDIVIDUALS AND ACUTE CARE MEDICAL ASSISTANCE.

“(a) **ELIGIBLE INDIVIDUALS.**—

“(1) **IN GENERAL.**—In this part, the term ‘eligible individual’ means an individual—

“(A) who is—

“(i) a blind or disabled individual; or

“(ii) an individual described in paragraph (2); and

“(B) who the State determines satisfies—

“(i) the income and resources eligibility requirements established by the State under the State plan under this part; and

“(ii) such other requirements for assistance as are imposed under this title, including documentation of citizenship or status as a qualified alien under title IV of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.

“(2) **INDIVIDUALS DESCRIBED.**—For purposes of paragraph (1)(A)(ii), the following individuals are described in this paragraph:

“(A) A child in foster care under the responsibility of the State.

“(B) A low-income woman with breast or cervical cancer described in old section 1902(aa).

“(C) Certain TB-infected individuals described in old section 1902(z)(1).

“(3) **GRANDFATHERED INDIVIDUALS.**—An individual shall be an eligible individual under the State plan under this part if—

“(A) the individual is described in paragraph (1)(A);

“(B) the individual satisfies the documentation requirements referred to in paragraph (1)(B)(ii); and

“(C) the State would have provided medical assistance under the State plan under old title XIX to the individual, but only so long as the individual continues to satisfy such old eligibility requirements.

“(4) **CONCURRENT ELIGIBILITY FOR PART B.**—An eligible individual under this part may be eligible under part B, but only if the individual satisfies the eligibility requirements of part B in addition to satisfying the requirements for eligibility under this part.

“(5) **PRESUMPTIVE ELIGIBILITY FOR CERTAIN BREAST OR CERVICAL CANCER PATIENTS.**—Old section 1920B (relating to presumptive eligibility for certain breast or cervical cancer patients) shall apply under this part.

“(b) **BENEFITS.**—Subject to paragraph (3), in this part, the term ‘acute care medical assistance’ means the following:

“(1) **MANDATORY BENEFITS.**—The care and services listed in paragraphs (1) through (5), (17), and (21) of old section 1905(a) (but, in the case of paragraph (4)(A) of such section, without regard to any limitation based on age or services in an institution for mental diseases).

“(2) **OPTIONAL BENEFITS.**—Any care or services listed in a paragraph of old section 1905(a) (other than paragraph (16)).

“(3) **EXCEPTIONS.**—

“(A) **CERTAIN SERVICES LIMITED TO PART B.**—Services described in paragraphs (15), (22), (23), (24), and (26) of old section 1905(a) shall only be provided under the State plan under part B.

“(B) **LIMIT ON PROVISION OF LONG-TERM CARE SERVICES AND SUPPORTS.**—A care or service that the Secretary determines is a long-term care service and support (including nursing facility services described in old section 1905(a)(4)(A)) shall not be provided to an individual under the State plan under this part for more than 30 days within any 12-month period.

“(C) **EXCLUSIONS.**—Such term shall not include any payments with respect to care or services for any individual who is an inmate

of a public institution or a patient in an institution for mental diseases (regardless of age).

"SEC. 1904. STATE PLAN REQUIREMENTS FOR ACUTE CARE MEDICAL ASSISTANCE.

"(a) IN GENERAL.—In order to receive payments under this part, a State shall have an approved State plan for acute care medical assistance. For purposes of this part, such assistance includes payments for preventive care, primary care, diagnosis and treatment of acute and chronic health conditions, emergency care, diagnosis and treatment of mental illnesses and related conditions, and rehabilitation and other services to help eligible individuals attain or retain capability for independence or self-care. A State medical assistance plan shall include a description, consistent with the requirements of this part of—

"(1) eligibility standards, including income and asset standards;

"(2) benefits, including the amount, duration, and scope of covered items and services;

"(3) strategies for improving access and quality of care; and

"(4) methods of service delivery.

"(b) PUBLIC AVAILABILITY OF STATE PLAN.—The State shall make available to the public the State plan under this part and any amendments submitted by the State to the plan.

"(c) AMOUNT, DURATION, AND SCOPE.—The State plan shall provide that the acute care medical assistance made available to any eligible individual shall not be less in amount, duration, or scope than the acute care medical assistance made available to any other eligible individual.

"(d) APPLICATION OF CERTAIN PRE-MODERNIZED MEDICAID REQUIREMENTS.—

"(1) OLD STATE PLAN REQUIREMENTS.—The following provisions of old section 1902 shall apply to the State plans under this part:

"(A) Old section 1902(a)(10)(C) (relating to certain eligibility and other requirements).

"(B) Old section 1902(a)(10)(D) (relating to home health services).

"(C) Old section 1902(a)(10)(G) (relating to nonapplication of certain supplemental security income eligibility criteria).

"(D) The subclauses in the flush matter following old section 1902(a)(10)(G) (relating to the provision of certain services) other than subclauses (V), (VII), (VIII), and (IX).

"(E) Old section 1902(a)(17) (relating to reasonable standards for determining eligibility).

"(F) Old section 1902(a)(19) (relating to eligibility safeguards).

"(G) Old section 1902(a)(34) (relating to eligibility beginning with the third month prior to the month of application).

"(H) Subparagraphs (A), (B), and (C) of old section 1902(a)(43) (relating to early and periodic screening, diagnostic, and treatment services).

"(I) Old section 1902(a)(46)(A) (relating to compliance with section 1137 requirements).

"(J) The fourth and sixth sentences of old section 1902(a) (relating to eligibility for certain individuals).

"(2) OTHER OLD TITLE XIX REQUIREMENTS.—

"(A) Old section 1902(e)(3) (relating to optional eligibility for certain disabled individuals).

"(B) Old section 1902(e)(9) (relating to optional respiratory care services).

"(C) Old section 1902(f) (relating to eligibility of certain aged, blind, or disabled individuals).

"(D) Old section 1902(m) (relating to eligibility of certain aged or disabled individuals), other than paragraph (4).

"(E) Old section 1902(o) (relating to disregard of certain supplemental security income benefits).

"(F) Old section 1902(v) (relating to eligibility determinations of blind or disabled individuals).

"(e) OTHER REQUIREMENTS.—The State plan under this part shall—

"(1) comply with the requirements of the other parts of this title; and

"(2) provide that the State will make the contributions specified under section 340A-1(e) of the Public Health Service Act.

"SEC. 1905. DEFINITIONS.

"(a) IN GENERAL.—The definitions specified in this section shall apply for purposes of this part and, to the extent applicable and consistent with the policy embodied in such part, parts B, C, D, E, and F.

"(b) FEDERAL MEDICAL ASSISTANCE PERCENTAGE.—The term 'Federal medical assistance percentage' for any State shall be 100 percent less the State percentage; and the State percentage shall be that percentage which bears the same ratio to 45 percent as the square of the per capita income of such State bears to the square of the per capita income of the continental United States (including Alaska) and Hawaii, except that the Federal medical assistance percentage shall in no case be less than 50 percent or more than 83 percent. The Federal medical assistance percentage for any State shall be determined and promulgated in accordance with the provisions of section 1101(a)(8)(B).

"(c) APPLICATION OF CERTAIN PRE-MODERNIZED MEDICAID PROVISIONS.—The following old provisions shall apply under this part:

"(1) OLD SECTION 1905 PROVISIONS.—The following provisions of old section 1905:

"(A) Old section 1905(d) (relating to the definition of an intermediate care facility for the mentally retarded).

"(B) Old section 1905(e) (relating to the definition of physicians services).

"(C) Old section 1905(f) (relating to the definition of nursing facility services).

"(D) Old section 1905(g) (relating to the provision of chiropractors' services).

"(E) Old section 1905(j) (relating to State supplementary payments).

"(F) Old section 1905(k) (relating to supplemental security income benefits payable pursuant to section 211 of Public Law 93-66).

"(G) Old section 1905(l)(1) (relating to rural health clinic services).

"(H) Old section 1905(o) (relating to hospice care).

"(I) Old section 1905(q) (relating to the definition of a qualified severely impaired individual).

"(J) Old section 1905(r) (relating to the definition of early and periodic screening, diagnostic, and treatment services).

"(K) Old section 1905(s) (relating to the definition of a qualified disabled and working individual).

"(L) Old section 1905(t) (relating to the definition of primary care case management services).

"(M) Old section 1905(v) (relating to the definition of an employed individual with a medically improved disability).

"(N) Paragraphs (1) and (3) of old section 1905(w) (relating to the definition of an independent foster care adolescent).

"(O) Old section 1905(x) (relating to strategies, treatment, and services for individuals with Sickle Cell Disease).

"(2) OTHER OLD PROVISIONS.—

"(A) Old section 1903(m) (relating to the definition of a medicaid managed care organization).

"SEC. 1906. ENROLLMENT OF INDIVIDUALS UNDER GROUP HEALTH PLANS AND OTHER ARRANGEMENTS.

"The following old provisions shall apply under this part:

"(1) Old section 1906 (relating to enrollment of individuals under group health plans).

"(2) Old section 1902(a)(70) (relating to State option to establish a non-emergency medical transportation brokerage program).

"(3) Paragraphs (2) and (11) of old section 1902(e) (relating to eligibility for individuals enrolled with a group health plan or under a managed care arrangement during a minimum enrollment period).

"SEC. 1907. DRUG REBATES.

"Old sections 1902(a)(54) and 1927 (relating to payment for covered outpatient drugs and rebates) shall apply under this part.

"SEC. 1908. MANAGED CARE.

"The following old provisions shall apply under this part:

"(1) Old section 1932 (relating to managed care), other than subsection (a)(2) of such section.

"(2) Old section 1903(k) (relating to technical and actuarial assistance for States).

"SEC. 1909. ANNUAL REPORTS.

"(a) IN GENERAL.—Each State that receives payments under this part shall submit an annual report to the Secretary, in such form and manner as the Secretary shall specify.

"(b) APPLICATION OF OLD EPSDT REPORTING REQUIREMENTS.—Each annual report shall include the information required to be reported under old section 1902(a)(43)(D)(iv).

"PART B—GRANTS TO STATES FOR LONG-TERM CARE SERVICES AND SUPPORTS

"SEC. 1911. PURPOSE.

"(a) IN GENERAL.—The purpose of this part is to increase the flexibility of States in operating a system of long-term care services and supports designed to—

"(1) provide assistance to needy families so that individuals with disabilities and low-income senior citizens may be served and supported in their own homes and communities;

"(2) emphasize the independence and dignity of the person served by public programs;

"(3) end the institutional bias that existed under the Medicaid program prior to January 1, 2011;

"(4) provide stable and predictable funding for States as they rebalance their long-term care systems from institutions to communities;

"(5) provide flexibility to States to adopt new and innovative service delivery methods; and

"(6) promote independence and support activities that will enable individuals to return or maintain ties to the community, including through employment.

"(b) NO INDIVIDUAL ENTITLEMENT.—No individual determined eligible for long-term care services and supports under this part shall be entitled to a specific service or type of delivery of service.

"SEC. 1912. STATE PLAN.

"(a) IN GENERAL.—In order to receive payments under this part, a State must have an approved State plan for long-term care services and supports. A State long term care services and supports plan shall include a description, consistent with the requirements of this part, of—

"(1) income and assets eligibility standards and spousal impoverishment protections consistent with subsection (b);

"(2) the standardized assessments tools used to determine eligibility for specific long-term care services and supports;

“(3) the person-centered plans used to provide such services and supports;

“(4) the proposed uses of funding, if applicable, to provide targeted methods to meet individual level of support needs including tiering (preventive, emergency, low, medium, high); and

“(5) the long-term care services and supports to be available under the plan based on individual assessment of need in accordance with sections 1916 and 1917.

“(b) MINIMUM ELIGIBILITY STANDARDS.—

“(1) POPULATIONS COVERED.—The State plan shall specify the disabled and elderly populations who are eligible for long-term care services and supports.

“(2) NEEDS-BASED CRITERIA.—The plan shall include a description of the needs-based criteria the State will use to assess an individual's need for specific services and supports available under the State plan.

“(3) OTHER ELIGIBILITY REQUIREMENTS.—

“(A) INCOME AND ASSETS.—A State may use different income and asset standards and methodologies for determining eligibility than those used for determining eligibility for acute care medical assistance under part A. A State may not make eligibility standards related to income, asset, and spousal impoverishment protection more restrictive than the Federal minimum requirements of December 31, 2008.

“(B) APPLICATION OF SPOUSAL IMPOVERISHMENT PROTECTIONS.—The State plan shall provide that the State shall comply with the requirements of section 1918 (relating to spousal impoverishment protections).

“(C) STATEWIDENESS.—The State plan shall provide that, except with respect to methods used for determining homestead exemptions, the income and asset standards and methodologies shall be in effect in all political subdivisions of the State.

“(4) TRANSITION ASSISTANCE.—The State plan shall specify how the State will provide transition assistance for individuals who, on December 31, 2010, are enrolled under the State plan under old title XIX (or under a waiver of that plan) and receiving long-term care services or supports on that date. The State shall provide such assistance to individuals who are and are not likely to be determined eligible for long-term care services and supports under the State plan under this part, as in effect on January 1, 2011 (or the first day on which the State plan is in effect under this part).

“(c) PAYMENT METHODOLOGIES TO PROVIDERS.—

“(1) IN GENERAL.—The State plan shall describe the methodologies used to determine payments to providers. Such methodologies—

“(A) may be varied to assist in transitioning from facilities-based to community-based care; and

“(B) shall not be subject to Secretarial approval.

“(2) TRANSPARENCY.—The State plan shall provide that the State shall make publicly available—

“(A) the payment methodologies applicable under the plan; and

“(B) the name of any provider that receives \$1,000,000 or more in any 12-month period and the actual amount paid to the provider during that period.

“(d) COORDINATION OF EFFORT WITH OTHER RELATED PUBLIC AND PRIVATE PROGRAMS.—The plan shall include a description of the State's efforts to coordinate the delivery of services and supports under the plan with other related public and private programs that serve individuals with disabilities or aged populations that need or may be at risk of needing long term care.

“(e) PUBLIC AVAILABILITY OF STATE PLAN.—The State shall make available to the public the State plan under this part and any amendments submitted by the State to the plan.

“(f) APPLICATION OF OLD TITLE XIX REQUIREMENTS.—The following old title XIX provisions shall apply to a State plan under this part:

“(1) Subsections (a)(50) and (q) of old section 1902 (relating to a monthly personal needs allowance for certain institutionalized individuals and couples).

“(2) Old section 1902(a)(67) (relating to payment for certain services furnished to a PACE program eligible individual).

“(3) Paragraph (1) of old section 1902(r) (relating to the post-eligibility treatment of income for certain individuals) and paragraph (2) of such section (relating to methodologies for determining income and resource eligibility for individuals, but only with respect to individuals who are eligible under this part on or after January 1, 2011).

“(4) Old section 1905(i) (relating to the definition of an institution for mental diseases).

“(g) OTHER REQUIREMENTS OF OTHER PARTS.—The State plan under this part shall—

“(1) comply with the requirements of the other parts of this title; and

“(2) provide that the State will make the contributions specified under section 340A-1(e) of the Public Health Service Act.

“SEC. 1913. STATE ALLOTMENTS.

“(a) APPROPRIATION.—For the purpose of providing allotments to States under this section, there is appropriated out of any money in the Treasury not otherwise appropriated—

“(1) for fiscal year 2011, \$65,274,560,000;

“(2) for fiscal year 2012, \$67,885,540,000;

“(3) for fiscal year 2013, \$70,600,964,100;

“(4) for fiscal year 2014, \$73,425,000,000;

“(5) for fiscal year 2015, \$76,362,000,000;

“(6) for fiscal year 2016, \$79,416,480,000;

“(7) for fiscal year 2017, \$82,593,140,000;

“(8) for fiscal year 2018, \$85,896,870,000; and

“(9) for fiscal year 2019, \$89,332,743,000.

“(b) ALLOTMENTS TO 50 STATES AND THE DISTRICT OF COLUMBIA.—

“(1) FISCAL YEAR 2011 ALLOTMENTS.—Subject to subsection (e), the Secretary shall allot to each State with a long term care plan approved under this title an amount in fiscal year 2011 equal to the Federal expenditures made by the State for long-term care as defined in section 1916 in fiscal year 2008, increased by 8 percent.

“(2) SUBSEQUENT FISCAL YEAR ALLOTMENTS.—For fiscal year 2012 and each subsequent fiscal year through fiscal year 2019, the allotment for a State under this section is equal to the allotment for the State determined for the preceding fiscal year, increased by 4 percent.

“(c) LIMITATION.—

“(1) IN GENERAL.—Except as provided in paragraph (2), no other Federal funds are available under this title for expenditures incurred for long-term care services and supports after December 31, 2010, except as provided under a State plan approved under this part.

“(2) EXCEPTION.—

“(A) IN GENERAL.—If a State does not have an approved State plan by October 1, 2010, the Secretary may make payments equal to 85 percent of the State's estimated quarterly allotment until June 30, 2011.

“(B) FULL FUNDING.—A State shall receive 100 percent of its allotment for fiscal year 2011 if the State has a plan approved under this part by June 30, 2011.

“(d) MAINTENANCE OF EFFORT.—In order to qualify for the grant payable under this section, the State must demonstrate in each fiscal year that it made long-term care service and supports expenditures (including funding from local government sources) equal to the amount of not less than 95 percent of the nonfederal share amount spent in fiscal year 2009 under the State plan under old title XIX on long term care services and supports (as defined in section 1916). Expenditures not made under this part shall not be recognized by the Secretary for purposes of this requirement.

“(e) GRANTS REDUCED IF INSUFFICIENT APPROPRIATIONS.—

“(1) IN GENERAL.—If the amount appropriated for fiscal year 2011 under subsection (a)(1) is less than the amount necessary to fund each State's allotment for that fiscal year, the Secretary shall reduce the allotment for each State for that fiscal year based on the applicable percentage determined for the State under paragraph (2).

“(2) APPLICABLE PERCENTAGE.—For purposes of paragraph (1), the applicable percentage determined with respect to a State is as follows:

“If the ratio of the State's non-institutional spending to total long-term care spending for fiscal year 2009 is:

	The applicable percentage is:
50 percent or greater	100
at least 46, but less than 50 percent	99
at least 40, but less than 46 percent	98
at least 36, but less than 40	97
at least 30, but less than 36	96
less than 30 percent	95.

“(f) ADMINISTRATIVE EXPENSES.—

“(1) IN GENERAL.—Each State with a plan approved under this part shall receive a payment determined in accordance with amounts appropriated for part E for adminis-

trative expenses incurred in carrying out the plan under this part and part A.

“(2) ASSESSMENT-RELATED COSTS.—Costs attributable to providing an individualized needs-based assessment for purposes of iden-

tifying the long-term care services and supports to be provided under the State plan to an individual shall be considered a long-term care service and support and shall not be treated as an administrative expense.

"SEC. 1914. USE OF GRANTS.

"(a) IN GENERAL.—A State shall use funds for long-term care services and supports as defined in section 1916.

"(b) SELF-DIRECTION.—A State shall offer individuals the opportunity to self-direct their long-term care services and supports.

"SEC. 1915. ADMINISTRATIVE PROVISIONS.

"(a) FUNDING ON A QUARTERLY BASIS.—The Secretary shall make payments to States in equal amounts of a State's annual allotment on a quarterly basis. Each quarterly payment shall remain available for use by the State for twelve succeeding fiscal year quarters.

"(b) PUBLICATION.—The Secretary shall publish each State's allotment—

"(1) for fiscal year 2011 not later than December 15, 2009; and

"(2) for each subsequent fiscal year, not later than December 15 of the calendar year preceding the calendar year in which the fiscal year begins.

"SEC. 1916. DEFINITION OF LONG-TERM CARE SERVICES AND SUPPORTS.

"(a) DEFINITION.—

"(1) IN GENERAL.—Subject to subsection (e), in this part, the term 'long-term care services and supports' means any of the services or supports specified in paragraphs (2) or (3) that may be provided in a nursing facility, an institution, a home, or other setting.

"(2) SERVICES AND SUPPORTS DESCRIBED.—For purposes of paragraph (1), the services and supports described in this paragraph include assistive technology, adaptive equipment, remote monitoring equipment, case management for the aged, case management for individuals with disabilities, nursing home services, long-term rehabilitative services necessary to restore functional abilities, services provided in intermediate care facilities for people with disabilities, habilitation services (including adult day care programs), community treatment teams for individuals with mental illness, home health services, services provided in an institution for mental disease, a Program of All-Inclusive Care for the Elderly (PACE), personal care (including personal assistance services), recovery support including peer counseling, supportive employment, training skills necessary to assist the individual in achieving or maintaining independence, training of family members including foster parents in supportive and behavioral modification skills, ongoing and periodic training to maintain life skills, transitional care including room and board not to exceed 60 days within a 12-month period.

"(3) INCLUSION OF CERTAIN BENEFITS UNDER OLD TITLE XIX.—Such services and supports may include any of the following services:

"(A) Old section 1905(a)(15) (relating to services in an intermediate care facility for the mentally retarded).

"(B) Services described in subsections (a)(16) and (h) of old section 1905, but without regard to any restriction on such services on the basis of age (relating to inpatient psychiatric hospital services).

"(C) Old section 1905(a)(22) (relating to home and community care (to the extent allowed and as defined in old section 1929) for functionally disabled elderly individuals).

"(D) Old section 1905(a)(23) (relating to community supported living arrangements services (to the extent allowed and as defined in old section 1930)).

"(E) Subject to subsection (e), old section 1905(a)(24) but without regard to any restriction on furnishing services to patients or residents of facilities or institutions (relating to personal care services).

"(F) Old sections 1905(a)(26) and 1934 (relating to services furnished under a PACE program under old section 1934 to PACE program eligible individuals enrolled under the program under such old section).

"(G) Old section 1915(c)(5) (relating to the definition of habilitation services).

"(4) LIMITATION.—Long-term care services and supports cannot be used for services and administrative costs provided through the foster care (with the exception of training of foster care parents), child welfare, adult protective services, juvenile justice, public guardianship, or correctional systems.

"(b) REHABILITATIVE CARE.—For purposes of rehabilitation due to acute care medical needs, a State may claim rehabilitative services provided in an institutional setting, nursing home, or as part of home health expenditures as acute care benefits under the State plan under part A rather than under the State plan under this part for a cumulative period of 30 days within a 12-month period if such care is directly related to the onset of an acute care need. A State shall demonstrate the services were provided as a direct result of an acute care need.

"(c) MANAGED CARE.—If a State provides long-term care services and supports through managed care, the State shall submit a methodology for determining the level of expenditures attributed to long term care for approval by the Secretary.

"(d) APPLICATION OF PART A DEFINITIONS.—A definition specified in section 1905 shall apply to the same term used in this part, unless the Secretary determines that the application of such definition would be inconsistent with the purpose of this part.

"(e) EXCLUSION.—No payments shall be made under the State plan under this part with respect to long-term care supports and services provided for any individual who is an inmate of a public institution. Nothing in the preceding sentence shall be construed as precluding the provision of long-term care services and supports under the State plan under this part to an individual who is a patient in an institution for mental diseases.

"SEC. 1917. PROVISION REQUIREMENTS FOR LONG-TERM CARE SERVICES AND SUPPORT, INCLUDING OPTION FOR SELF-DIRECTED SERVICES AND SUPPORTS.

"(a) REQUIREMENTS FOR THE PROVISION OF LONG-TERM CARE SERVICES AND SUPPORTS.—

"(1) IN GENERAL.—Subject to the succeeding provisions of this subsection, a State may provide through a State plan amendment for the provision of long-term care services and supports for individuals eligible under the State plan under this part, subject to the following requirements:

"(A) NEEDS-BASED CRITERIA FOR ELIGIBILITY FOR, AND RECEIPT OF, LONG-TERM CARE SERVICES AND SUPPORTS.—The State establishes needs-based criteria for determining an individual's eligibility under the State plan for medical assistance for such long-term care services and supports, and if the individual is eligible for such services and supports, the specific services and supports that will be available under the State plan to the individual.

"(B) CRITERIA FOR INSTITUTIONALIZED VERSUS NON-INSTITUTIONALIZED SERVICES.—In establishing needs-based criteria, the State may establish criteria for determining eligibility for, and receipt of, services and supports provided in a facility or institution that are more stringent than the criteria established for eligibility and receipt of services and supports in a non-facility or non-institutionalized setting.

"(C) AUTHORITY TO LIMIT NUMBER OF ELIGIBLE INDIVIDUALS.—A State may limit the

number of individuals who are eligible for such services and supports and may establish waiting lists for the receipt of such services and supports.

"(D) CRITERIA BASED ON INDIVIDUAL ASSESSMENT.—

"(i) IN GENERAL.—The criteria established by the State shall require an assessment of an individual's support needs and capabilities, and may take into account the inability of the individual to perform 2 or more activities of daily living (as defined in section 7702B(c)(2)(B) of the Internal Revenue Code of 1986) or the need for significant assistance to perform such activities, and such other risk factors as the State determines to be appropriate.

"(ii) ADJUSTMENT AUTHORITY.—The State plan amendment provides the State with the option to modify the criteria established under subparagraph (A) (without having to obtain prior approval from the Secretary) in the event that the enrollment of individuals eligible for services exceeds the projected enrollment, but only if—

"(I) the State provides at least 60 days notice to the Secretary and the public of the proposed modification;

"(II) the State deems an individual receiving long-term care services and supports on the basis of the most recent version of the criteria in effect prior to the effective date of the modification to be eligible for such services and supports for a period of at least 12 months beginning on the date the individual first received medical assistance for such services and supports; and

"(III) after the effective date of such modification, the State, at a minimum, applies the criteria for determining whether an individual requires the level of care provided in a facility or institutionalized setting which applied under the State plan immediately prior to the application of the modified criteria.

"(E) INDEPENDENT EVALUATION AND ASSESSMENT.—

"(i) ELIGIBILITY DETERMINATION.—The State uses an independent evaluation for making the determinations described in subparagraph (A).

"(ii) ASSESSMENT.—In the case of an individual who is determined to be eligible for long-term care services and supports, the State uses an independent assessment, based on the needs of the individual to—

"(I) determine a necessary level of services and supports to be provided, consistent with an individual's physical and mental capacity;

"(II) prevent the provision of unnecessary or inappropriate care; and

"(III) establish an individualized care plan for the individual in accordance with subparagraph (G).

"(F) ASSESSMENT.—The independent assessment required under subparagraph (E)(ii) shall include the following:

"(i) An objective evaluation of an individual's inability to perform 2 or more activities of daily living (as defined in section 7702B(c)(2)(B) of the Internal Revenue Code of 1986) or the need for significant assistance to perform such activities.

"(ii) A face-to-face evaluation of the individual by an individual trained in the assessment and evaluation of individuals whose physical or mental conditions trigger a potential need for long-term care services and supports.

"(iii) Where appropriate, consultation with the individual's family, spouse, guardian, or other responsible individual.

“(iv) Consultation with appropriate treating and consulting health and support professionals caring for the individual.

“(v) An examination of the individual’s relevant history, medical records, and care and support needs, guided by best practices and research on effective strategies that result in improved health and quality of life outcomes.

“(vi) An evaluation of the ability of the individual or the individual’s representative to self-direct the purchase of, or control the receipt of, such services and supports if the individual so elects.

“(G) INDIVIDUALIZED CARE PLAN.—

“(i) IN GENERAL.—In the case of an individual who is determined to be eligible for long-term care services and supports, the State uses the independent assessment required under subparagraph (E)(ii) to establish a written individualized care plan for the individual.

“(ii) PLAN REQUIREMENTS.—The State ensures that the individualized care plan for an individual—

“(I) is developed—

“(aa) in consultation with the individual, the individual’s treating physician, health care or support professional, or other appropriate individuals, as defined by the State, and, where appropriate the individual’s family, caregiver, or representative; and

“(bb) taking into account the extent of, and need for, any family or other supports for the individual;

“(II) identifies the long-term care services and supports to be furnished to the individual (or, if the individual elects to self-direct the purchase of, or control the receipt of, such services and supports, funded for the individual); and

“(III) is reviewed at least annually and as needed when there is a significant change in the individual’s circumstances.

“(iii) STATE REQUIREMENT TO OFFER ELECTION FOR SELF-DIRECTED SERVICES AND SUPPORTS.—

“(I) INDIVIDUAL CHOICE.—The State shall allow an individual or the individual’s representative the opportunity to elect to receive self-directed long-term care services and supports in a manner which gives them the most control over such services and supports consistent with the individual’s abilities and the requirements of subclauses (II) and (III).

“(II) SELF-DIRECTED.—The term ‘self-directed’ means, with respect to the long-term care services and supports offered under the State plan amendment, such services and supports for the individual which are planned and purchased under the direction and control of such individual or the individual’s authorized representative, including the amount, duration, scope, provider, and location of such services and supports, under the State plan consistent with the following requirements:

“(aa) ASSESSMENT.—There is an assessment of the needs, capabilities, and preferences of the individual with respect to such services and supports.

“(bb) SERVICE PLAN.—Based on such assessment, there is developed jointly with such individual or the individual’s authorized representative a plan for such services and supports for such individual that is approved by the State and that satisfies the requirements of subclause (III).

“(III) PLAN REQUIREMENTS.—For purposes of subclause (II)(bb), the requirements of this subclause are that the plan—

“(aa) specifies those services and supports which the individual or the individual’s au-

thorized representative would be responsible for directing;

“(bb) identifies the methods by which the individual or the individual’s authorized representative will select, manage, and dismiss providers of such services and supports;

“(cc) specifies the role of family members and others whose participation is sought by the individual or the individual’s authorized representative with respect to such services and supports;

“(dd) is developed through a person-centered process that is directed by the individual or the individual’s authorized representative, builds upon the individual’s capacity to engage in activities that promote community life and that respects the individual’s preferences, choices, and abilities, and involves families, friends, and professionals as desired or required by the individual or the individual’s authorized representative;

“(ee) includes appropriate risk management techniques that recognize the roles and sharing of responsibilities in obtaining services and supports in a self-directed manner and assure the appropriateness of such plan based upon the resources and capabilities of the individual or the individual’s authorized representative; and

“(ff) may include an individualized budget which identifies the dollar value of the services and supports under the control and direction of the individual or the individual’s authorized representative.

“(IV) BUDGET PROCESS.—With respect to individualized budgets described in subclause (III)(ff), the State plan amendment—

“(aa) describes the method for calculating the dollar values in such budgets based on reliable costs and service utilization;

“(bb) defines a process for making adjustments in such dollar values to reflect changes in individual assessments and service plans; and

“(cc) provides a procedure to evaluate expenditures under such budgets.

“(H) QUALITY ASSURANCE; CONFLICT OF INTEREST STANDARDS.—

“(i) QUALITY ASSURANCE.—The State ensures that the provision of long-term care services and supports meets Federal and State guidelines for quality assurance.

“(ii) CONFLICT OF INTEREST STANDARDS.—The State establishes standards for the conduct of the independent evaluation and the independent assessment to safeguard against conflicts of interest.

“(I) REDETERMINATIONS AND APPEALS.—The State allows for at least annual redeterminations of eligibility, and appeals in accordance with the frequency of, and manner in which, redeterminations and appeals of eligibility are made under the State plan.

“(J) PRESUMPTIVE ELIGIBILITY FOR ASSESSMENT.—The State, at its option, elects to provide for a period of presumptive eligibility (not to exceed a period of 60 days) only for those individuals that the State has reason to believe may be eligible for long-term care services and supports. Such presumptive eligibility shall be limited to medical assistance for carrying out the independent evaluation and assessment under subparagraph (E) to determine an individual’s eligibility for such services and if the individual is so eligible, the specific long-term care services and supports that the individual will receive.

“(2) DEFINITION OF INDIVIDUAL’S REPRESENTATIVE.—In this section, the term ‘individual’s representative’ means, with respect to an individual, a parent, a family member, or a guardian of the individual, an advocate for the individual, or any other individual who is authorized to represent the individual.

“(b) SELF-DIRECTED PERSONAL ASSISTANCE SERVICES.—If a State includes personal care or personal assistance services in the long-term care services and supports available under the State plan, the State shall comply with the requirements of old section 1915(j) in the case of an individual who elects to self-direct the receipt of such care or services.

“SEC. 1918. TREATMENT OF INCOME AND RESOURCES FOR CERTAIN INSTITUTIONALIZED SPOUSES.

“Old section 1924 (relating to treatment of income and resources for certain institutionalized spouses), other than paragraphs (2) and (4)(A) of subsection (a) of such section, shall apply under this part.

“SEC. 1919. ANNUAL REPORTS.

“(a) IN GENERAL.—Each State that receives payments under this part shall submit an annual report to the Secretary, in such form and manner as the Secretary shall specify.

“(b) REQUIREMENTS.—The report shall include the following with respect to the most recent fiscal year ended:

“(1) The number of individuals served under the plan.

“(2) The number of individuals served by tier (preventive, emergency, low, medium, and high needs).

“(3) The number of individuals known to the State on waiting list for services (if any) and type of disability (physical, developmental, mental health) or aged.

“(4) Expenditures by service category.

“PART C—GRANTS TO STATES FOR SURVEY AND CERTIFICATION OF MEDICAL FACILITIES AND OTHER REQUIREMENTS

“SEC. 1931. AUTHORIZATION OF APPROPRIATIONS.

“For the purpose of carrying out Federal activities and providing grants to States for expenses necessary to carry out this part, there is authorized to be appropriated—

“(1) for fiscal year 2011, \$300,000,000; and

“(2) for each succeeding fiscal year, the amount authorized under this section for the preceding fiscal year, increased by 5 percent.

“SEC. 1932. APPLICATION OF CERTAIN REQUIREMENTS UNDER PRE-MODERNIZED MEDICAID.

“The following old provisions shall apply under this part:

“(1) Old section 1902(a)(9) (relating to health standards and applicable requirements for laboratory services).

“(2) Old section 1902(a)(28) (relating to nursing facilities and nursing facility services).

“(3) Old sections 1902(a)(29) and 1908 (relating to a State program for the licensing of administrators of nursing homes).

“(4) Old section 1902(a)(33)(B) (relating to licensing health institutions).

“(5) Old section 1902(d) (relating to medical or utilization review functions).

“(6) Old section 1902(i) (relating to intermediate care facilities for the mentally retarded).

“(7) Old section 1902(y) (relating to psychiatric hospitals).

“(8) Paragraphs (2) and (6) of old section 1903(g) (relating to the Secretarial requirement to conduct sample onsite surveys of private and public institutions and recertifications for the need for certain services).

“(9) Old section 1903(q)(4)(B) (relating to the definition of a board and care facility).

“(10) Old section 1910 (relating to certification and approval of rural health clinics and intermediate care facilities for the mentally retarded).

“(11) Old section 1911 (relating to Indian Health Service facilities).

“(12) Old section 1913 (relating to hospital providers of nursing facility services).

“(13) Old section 1919 (relating to requirements for nursing facilities).

“PART D—GRANTS TO STATES FOR PROGRAM INTEGRITY

“SEC. 1941. AUTHORIZATION OF APPROPRIATIONS.

“(a) IN GENERAL.—For the purpose of carrying out Federal activities under this part and providing grants to States for expenses necessary to carry out this part, there is authorized to be appropriated—

“(1) for fiscal year 2011, \$100,000,000; and

“(2) for each succeeding fiscal year, the amount authorized under this section for the preceding fiscal year, increased by 5 percent.

“(b) AVAILABILITY; AUTHORITY FOR USE OF FUNDS.—

“(1) AVAILABILITY.—Amounts appropriated pursuant to subsection (a) shall remain available until expended.

“(2) AUTHORITY FOR USE OF FUNDS FOR TRANSPORTATION AND TRAVEL EXPENSES FOR ATTENDEES AT EDUCATION, TRAINING, OR CONSULTATIVE ACTIVITIES.—

“(A) IN GENERAL.—The Secretary may use amounts appropriated pursuant to subsection (a) to pay for transportation and the travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business, of individuals described in subsection (b)(4) who attend education, training, or consultative activities conducted under the authority of that subsection.

“(B) PUBLIC DISCLOSURE.—The Secretary shall make available on a website of the Centers for Medicare & Medicaid Services that is accessible to the public—

“(i) the total amount of funds expended for each conference conducted under the authority of subsection (b)(4); and

“(ii) the amount of funds expended for each such conference that were for transportation and for travel expenses.

“(c) ANNUAL REPORT.—Not later than 180 days after the end of each fiscal year, the Secretary shall submit a report to Congress which identifies—

“(1) the use of funds appropriated pursuant to subsection (a); and

“(2) the effectiveness of the use of such funds.

“SEC. 1942. APPLICATION OF CERTAIN REQUIREMENTS UNDER PRE-MODERNIZED MEDICAID.

“The following old provisions shall apply under this part:

“(1) Old subsections (a)(25) (other than subparagraph (E)) and (g) of section 1902 and section 1903(o) (relating to third party liability).

“(2) Old section 1902(a)(30)(B) (relating to hospital, intermediate care facility for the mentally retarded, or hospital for mental diseases admission screening and review requirements).

“(3) Old section 1902(a)(32) (relating to certain payment requirements).

“(4) Old section 1902(a)(35) (relating to disclosing entities under section 1124).

“(5) Old section 1902(a)(37) and the fifth sentence (relating to claims payment procedures).

“(6) Old section 1902(a)(44) (relating to payment for inpatient hospital services, services in an intermediate care facility for the mentally retarded, or inpatient mental hospital services).

“(7) Old sections 1902(a)(45) and 1912 (relating to assignment of rights of payment).

“(8) Old sections 1902(a)(49) and 1921 (relating to information and access to information

concerning sanctions taken by State licensing authorities against health care practitioners and providers).

“(9) Old sections 1902(a)(61) and 1903(q) (relating to requirements for a medicaid fraud and abuse control unit).

“(10) Old section 1902(a)(64) (relating to reports from beneficiaries and others and data compilation requirements concerning alleged instances of waste, fraud, and abuse).

“(11) Old section 1902(a)(65) (relating to provider number and surety bond requirement for suppliers of durable medical equipment).

“(12) Old section 1902(a)(68) (relating to requirements for certain entities).

“(13) Old sections 1902(a)(69) and 1936 (relating to the Medicaid Integrity Program) other than paragraphs (1), (2)(A), and (3) of old section 1936(e).

“(14) Old section 1902(a)(70)(B)(iv) (relating to prohibitions on referrals and conflict of interest for certain brokers of non-emergency medical transportation).

“(15) Old sections 1902(a)(71) and 1940 (relating to a required asset verification program).

“(16) Old section 1902(p) (relating to exclusion of certain individuals or entities).

“(17) Old section 1902(x) (relating to unique identifiers for physicians).

“(18) Old section 1903(p) (relating to interstate collection of rights of support).

“(19) Old section 1903(r)(2) (relating to requirements for mechanized claims processing and information retrieval systems).

“(20) Old section 1903(u) (relating to erroneous excess payments), other than clause (v) of paragraph (1)(D).

“(21) Old section 1903(v) and the seventh sentence of old section 1902(a) (relating to limitations on payments for services furnished to aliens), other than subparagraphs (A) and (B) of paragraph (4).

“(22) Old section 1903(x) (relating to citizenship documentation).

“(23) Old section 1909 (relating to State false claims act requirements for increased State share of recoveries).

“(24) Old section 1914 (relating to withholding of Federal share of payments for certain Medicare providers).

“(25) Old section 1917 (relating to liens, adjustments and recoveries, and transfers of assets).

“(26) Old section 1922 (relating to correction and reduction plans for intermediate care facilities for the mentally retarded).

“PART E—GRANTS TO STATES FOR ADMINISTRATION

“SEC. 1951. AUTHORIZATION OF APPROPRIATIONS; PAYMENTS TO STATES.

“(a) IN GENERAL.—For the purpose of providing grants to States for administrative expenses necessary to carry out parts A and B, there is authorized to be appropriated—

“(1) for fiscal year 2011, \$7,000,000,000; and

“(2) for each succeeding fiscal year, the amount authorized under this subsection for the preceding fiscal year, increased by 3 percent.

“(b) PAYMENTS TO STATES.—

“(1) IN GENERAL.—From the amount appropriated pursuant to subsection (a) for a fiscal year, the Secretary shall pay each State with approved plans under parts A and B for the fiscal year an amount equal to the product of the amount appropriated for the fiscal year and the ratio of the total amount of payments made to the State under paragraphs (2) through (7) of section 1903(a) for fiscal year 2008 (as such section was in effect for that fiscal year) to the total amount of such payments made to all States for such fiscal year.

“(2) PRO RATA ADJUSTMENT.—The Secretary shall make pro rata adjustments to the amounts determined under paragraph (1) for a fiscal year as necessary so as to not exceed the amount appropriated pursuant to subsection (a) for the fiscal year.

“SEC. 1952. COST-SHARING PROTECTIONS.

“(a) IN GENERAL.—A State may impose cost-sharing for individuals provided acute care medical assistance under a State plan under part A or long-term care services and supports under a State plan under part B consistent with the following:

“(1) The State may (in a uniform manner) require payment of monthly premiums or other cost-sharing set on a sliding scale based on family income.

“(2) A premium or other cost-sharing requirement imposed under paragraph (1) may only apply to the extent that, in the case of an individual whose family income—

“(A) exceeds 150 percent of the poverty line, the aggregate annual amount of such premium and other cost-sharing charges imposed under the plan does not exceed 5 percent of the individual's annual income; and

“(B) exceeds 250 percent of the poverty line, the aggregate annual amount of such premium and other cost-sharing charges do not exceed 7.5 percent of the individual's annual income.

“(3) A State shall not require prepayment of any premium or cost-sharing imposed pursuant to paragraph (1) and shall not terminate eligibility of an individual under the State plan on the basis of failure to pay any such premium or cost-sharing until such failure continues for a period of at least 60 days from the date on which the premium or cost-sharing became past due. The State may waive payment of any such premium or cost-sharing in any case where the State determines that requiring such payment would create an undue hardship.

“(b) APPLICATION TO INSTITUTIONALIZED INDIVIDUALS.—A State may impose cost-sharing consistent with subsection (a) to individuals who are patients in, or residents of, a medical institution or nursing facility except that rules relating to the post-eligibility treatment of income (including a minimum monthly personal needs allowance) applicable to institutionalized individuals under old title XIX shall apply in the same manner to individuals eligible for long-term care services and supports under a State plan under part B.

“(c) POVERTY LINE DEFINED.—In this section, the term ‘poverty line’ has the meaning given such term in section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)), including any revision required by such section.

“SEC. 1953. APPLICATION OF CERTAIN REQUIREMENTS UNDER PRE-MODERNIZED MEDICAID.

“The following old provisions shall apply to the State plans under this title:

“(1) OLD STATE PLAN REQUIREMENTS.—

“(A) Old section 1902(a)(1) (relating to the requirement for plans to be in effect in all political subdivisions of the State).

“(B) Old section 1902(a)(2) (relating to State financial participation).

“(C) Old section 1902(a)(3) (relating to opportunity for a fair hearing).

“(D) Old section 1902(a)(4) (relating to administration).

“(E) Old section 1902(a)(5) (relating to designation of a single State agency).

“(F) Old section 1902(a)(6) (relating to reporting requirements).

“(G) Old section 1902(a)(7) (relating to restrictions on the use or disclosure of information).

“(H) Old section 1902(a)(8) (relating to applications for assistance).

“(I) Old section 1902(a)(11) (relating to cooperative agreements with other State agencies).

“(J) Old section 1902(a)(12) (relating to terminations of blindness).

“(K) Old section 1902(a)(13) (relating to determination of rates of payment for certain services), other than clause (iv) of subparagraph (A).

“(L) Subsections (a)(15) and (bb) of old section 1902(a) (relating to payment for services provided by rural health clinics and federally qualified health centers).

“(M) Old section 1902(a)(16) (relating to furnishing services to individuals when absent from the State).

“(N) Old section 1902(a)(22) (relating to certain administrative provisions).

“(O) Paragraphs (23) and (25)(D) of old section 1902(a) (relating to any willing provider requirements).

“(P) Old section 1902(a)(24) (relating to consultative services by other agencies).

“(Q) Old section 1902(a)(26) (relating to review of need for inpatient mental hospital services and written plan of care requirements).

“(R) Old section 1902(a)(27) (relating to provider record keeping requirements).

“(S) Old section 1902(a)(30)(A) (relating to utilization review).

“(T) Old section 1902(a)(31) (relating to written plan of care for services and review for intermediate care facility for the mentally retarded services).

“(U) Old section 1902(a)(33)(A) (relating to quality review requirements).

“(V) Old section 1902(a)(36) (relating to public availability of facility surveys).

“(W) Old section 1902(a)(38) (relating to the provision of information described in section 1128(b)(9) by certain entities).

“(X) Old section 1902(a)(39) (relating to the exclusion of certain entities).

“(Y) Old section 1902(a)(40) (relating to requirement for uniform reporting systems).

“(Z) Old section 1902(a)(41) (relating to notice to State medical licensing boards).

“(AA) Old section 1902(a)(42) (relating to certain audit requirements).

“(BB) Old section 1902(a)(48) (relating to eligibility cards).

“(CC) Old section 1902(a)(55) (relating to the receipt and initial processing of applications, but only to the extent such section is consistent with the policy embodied in the State plans under parts A and B).

“(DD) Subsections (a)(56) and (s) of old section 1902 (relating to adjusted payments for certain inpatient hospital services).

“(EE) Old section 1902(a)(59) (relating to maintenance of list of participating physicians).

“(FF) The second sentence of old section 1902 (relating to designation of certain State agencies).

“(GG) Old section 1902(b) (relating to limitations on approval of plans).

“(HH) Old section 1902(j) (relating to application of requirements to American Samoa and the Northern Mariana Islands).

“(2) OTHER OLD TITLE XIX REQUIREMENTS.—

“(A) Old section 1903(b)(4) (relating to limitations on payments to enrollment brokers).

“(B) Old section 1903(c) (relating to furnishing of services included in a program or plan under part B or C of the Individuals with Disabilities Education Act).

“(C) Old section 1903(d) (relating to payments).

“(D) Old section 1903(e) (relating to costs with respect to certain hospital services).

“(E) Old section 1903(i) (relating to limitations on payments).

“(F) Old section 1903(r) (relating to requirements for mechanized claims processing and information retrieval systems).

“(G) Subsections (b)(5) and (w) of old section 1903 (relating to limitations on payments related to provider taxes).

“(H) Old section 1904 (relating to operation of State plans).

“(I) Old sections 1902(a)(60) and 1908A (relating to medical child support).

“(J) Paragraphs (32)(D) and (62) of old section 1902(a) and section 1928 (relating to program for distribution of pediatric vaccines).

“PART F—OTHER PROVISIONS

“SEC. 1961. APPLICATION OF CERTAIN REQUIREMENTS UNDER PRE-MODERNIZED MEDICAID.

“The following old provisions shall apply under this part:

“(1) The third sentence of old section 1902 (relating to nonapplication of certain old provisions to a religious nonmedical health care institution).

“(2) Old section 1918 (relating to application of provisions of title II relating to subpoenas).

“(3) Old section 1939 (relating to references to laws directly affecting the Medicaid program.”.

(b) REPEAL OF TITLE XXI.—Effective January 1, 2011, title XXI of the Social Security Act (42 U.S.C. 1397aa et seq.) is repealed.

SEC. 402. OUTREACH.

(a) AUTHORIZATION OF APPROPRIATIONS.—The following amounts are authorized to be appropriated to the Secretary of Health and Human Services:

(1) For fiscal year 2009, \$100,000,000 for the design and implementation of a public outreach campaign to inform the public about the changes to the programs under such titles that take effect on January 1, 2011, as a result of the amendment made by section 401.

(2) For each of fiscal years 2010 and 2011, \$200,000,000 to carry out such public outreach campaign.

(3) For fiscal year 2012, \$50,000,000 to carry out such public outreach campaign.

(b) AVAILABILITY.—Funds appropriated under subsection (a) shall remain available for expenditure through September 30, 2012.

(c) AUTHORITY FOR USE OF FUNDS.—The Secretary may use funds made available under paragraphs (2) and (3) of subsection (a) to award grants to, or enter into contracts with, public or private entities, including States, local governments, schools, churches, and community groups.

SEC. 403. TRANSITION RULES; MISCELLANEOUS PROVISIONS.

(a) IN GENERAL.—

(1) Not later than June 30, 2010, a State that is one of the 50 States or the District of Columbia shall inform all individuals enrolled in a State plan under title XIX or XXI of the Social Security Act on such date (and any new enrollees after such date) of the changes to the programs under such titles that take effect on January 1, 2011, as a result of the amendment made by section 401.

(2) No State that is one of the 50 States or the District of Columbia shall approve any applications for medical assistance or child health assistance under a State plan under title XIX or XXI (as in effect for fiscal year 2010) after December 31, 2010.

(b) SUBMISSION OF LEGISLATIVE PROPOSAL FOR TECHNICAL AND CONFORMING AMENDMENTS.—Not later than 6 months after the date of enactment of this Act, the Secretary of Health and Human Services shall submit

to Congress a legislative proposal for such technical and conforming amendments as are necessary to carry out the amendments made by this Act.

Subtitle B—Supplemental Health Care Assistance for Low-Income Families

SEC. 411. SUPPLEMENTAL HEALTH CARE ASSISTANCE FOR LOW-INCOME FAMILIES.

Part D of title III of the Public Health Service Act (42 U.S.C. 254b et seq.) is amended by adding at the end the following:

“Subpart XI—Health Care Assistance to Low-Income Families

“SEC. 340A-1. FINANCIAL ASSISTANCE TO LOW-INCOME FAMILIES.

“(a) IN GENERAL.—The Secretary shall supplement the costs of private health insurance for eligible low-income families through the distribution of supplemental debit cards to eligible families, which may be used to pay for costs associated with health care for the members of such eligible families and provide direct support to such families in accessing health care.

“(b) ELIGIBILITY.—

“(1) ELIGIBLE FAMILIES.—To be eligible for financial assistance under this section—

“(A) a family shall—

“(i) consist of 2 or more individuals living together who are related by marriage, birth, adoption, or guardianship;

“(ii) have a gross income that does not exceed 200 percent of the poverty line, as applicable to a family of the size involved; and

“(iii) include at least 1 individual who is a dependent under the age of 19; and

“(B) no member of the family shall be covered by private health insurance.

“(2) DETERMINATION OF GROSS INCOME.—The gross income of a family shall be determined by taking the sum of the income of each family member who is at least age 21 but not older than age 65, except that the income of any member of the family who qualifies for coverage under Medicaid Part A or B shall not be counted.

“(3) LIMITATION ON INDIVIDUAL ELIGIBILITY; ASSISTANCE.—

“(A) IN GENERAL.—No individual who is a member of an eligible family under paragraph (1) is eligible to qualify separately for financial assistance under this section.

“(B) ALIENS.—The Secretary shall ensure that financial assistance under this section is not provided for costs associated with health care for any member of an eligible family who is an alien individual who is not a lawful permanent resident of the United States.

“(c) SUPPLEMENTAL DEBIT CARD FOR HEALTH CARE EXPENDITURES.—

“(1) IN GENERAL.—The Secretary shall issue to each eligible family that enrolls in the program in accordance with subsection (f) a supplemental debit card with a dollar-amount value, in accordance with subsection (d), that may be used to pay for qualifying health care expenses.

“(2) USE OF THE DEBIT CARD.—

“(A) QUALIFYING HEALTH CARE EXPENSES.—A supplemental debit card issued under this section may be used by members of the eligible family to pay for—

“(i) the purchase of health care insurance for any member of the family;

“(ii) cost sharing expenses related to health care, including deductibles, copayments, and coinsurance, for any member of the family; and

“(iii) the direct purchase of health care services and supplies for any member of the family.

“(B) GEOGRAPHIC RANGE.—Each supplemental debit card may be used to pay for

qualifying health care expenses incurred anywhere in the 50 States or the District of Columbia.

“(C) LIMITATIONS.—No supplemental debit card shall be used to make a payment for any cost—

“(i) incurred prior to the determination of the family’s eligibility for assistance under this section; or

“(ii) that is not a health-related expense.

“(3) ROLLOVER OF UNUSED AMOUNTS.—Not more than one-quarter of the annual dollar amount of a supplemental debit card that is unexpended at the end of each 12-month period may rollover—

“(A) to the family’s supplemental debit card for expenditure during the subsequent 12-month period, provided that the family to which the supplemental debit card was issued in the previous 12-month period is eligible to receive a supplemental debit card in the subsequent 12-month period; or

“(B) to the family’s health savings account (as defined in section 223(g)(2) of the Internal Revenue Code of 1986).

“(4) MONTHLY STATEMENTS.—The Secretary shall issue a monthly statement to each family to which a supplemental debit card has been issued under this section, which shall state each payment made with the family’s supplemental debit card during the month covered by the statement, the dollar amount of each such payment, and the provider to which each such payment was made.

“(d) AMOUNT OF FINANCIAL ASSISTANCE.—

“(1) AMOUNTS FOR CALENDAR YEAR 2011.—Subject to paragraph (5), the amount of financial assistance available to each eligible family during the calendar year 2011 shall be determined as follows:

“(A) Each family whose annual income does not exceed 100 percent of the poverty level, as applicable to a family of the size involved, shall receive \$5,000.

“(B) Each family whose annual income exceeds 100 percent, but does not exceed 200 percent, of the poverty level, as applicable to a family of the size involved, shall receive an amount as follows:

“(i) For families whose annual income exceeds 100 percent but does not exceed 120 percent, of the poverty level, \$4,000.

“(ii) For families whose annual income exceeds 120 percent but does not exceed 140 percent, of the poverty level, \$3,500.

“(iii) For families whose annual income exceeds 140 percent but does not exceed 160 percent, of the poverty level, \$3,000.

“(iv) For families whose annual income exceeds 160 percent but does not exceed 180 percent, of the poverty level, \$2,500.

“(v) For families whose annual income exceeds 180 percent but does not exceed 200 percent, of the poverty level, \$2,000.

“(2) ADDITIONAL AMOUNTS.—In addition to the amounts under paragraph (1), subject to paragraph (5), the following amounts shall be added to the supplemental debit cards of qualifying families:

“(A) For each pregnancy during which a pregnant woman’s family is eligible for assistance under this section, an additional amount of \$1,000 shall be added to the family’s supplemental debit card, except that no family shall receive such additional \$1,000 for any pregnancy for which the family received such amount in the previous 12-month period.

“(B) For each member of an eligible family who is less than 1 year old on any day within the calendar year in which the family is eligible for assistance, an additional amount of \$500 shall be added to the family’s supplemental debit card.

“(3) COST OF LIVING ADJUSTMENTS.—In the case of any taxable year beginning in a calendar year after 2011, each dollar amount contained in paragraphs (1) and (2) shall be increased in the same manner as the dollar amounts specified in section 25E(b)(3) of the Internal Revenue Code of 1986 are increased by the blended cost-of-living adjustment determined under subsection (k)(2) of section 25E of the Internal Revenue Code for the taxable year involved.

“(4) STATE OPTION TO INCREASE AMOUNTS.—At the option of each State, amounts in excess of the annual dollar amounts under paragraphs (1) and (2) may be provided through the supplemental debit card to eligible families in that State, but no Federal funds shall be paid to any State for any amount provided in excess of such annual dollar amount.

“(5) RISK ADJUSTMENT.—The Secretary may adjust the amount of financial assistance available to an eligible family for a calendar year under this section based on age, health indicators, and other factors that represent distinct patterns of health care services utilization and costs.

“(e) CONTRIBUTIONS OF STATES.—

“(1) IN GENERAL.—As a condition for receiving Federal funds under Part A or Part B of Medicaid, each State shall contribute 50 percent of the total amount expended under the supplemental debit card program by the participating families that reside within the State during the time that the family resides in that State. For purposes of this section, the residency of a family is determined by the residency the legally responsible head of the household.

“(2) PAYMENTS FROM STATES.—

“(A) BILLING NOTIFICATION.—

“(i) TIMING.—On June 30th and December 31st of each year, the Secretary shall send written notification to each State of that State’s 50 percent share of expenses, as described in paragraph (1), for the 6-month period ending on the last day of the month previous to such notification.

“(ii) CONTENTS.—Each such notification to a State shall clearly state—

“(I) the payment amount due from the State;

“(II) the name of each individual for whom payment was made through the supplemental debit card program;

“(III) the health care provider to whom each payment was made;

“(IV) the amount of each payment; and

“(V) any other information, as the Secretary requires.

“(B) PAYMENTS.—Each State shall make a payment to the Secretary, in the amount billed, not later than 30 days after the billing notification date, in accordance with subparagraph (A)(i).

“(C) PENALTIES.—If a State fails to pay to the Secretary an amount required under subparagraph (B), interest shall accrue on such amount at the rate provided under old section 1903(d)(5) of the Social Security Act. The amount so owed and applicable interest shall be immediately offset against amounts otherwise payable to the State under this section, in accordance with the Federal Claims Collection Act of 1996 and applicable regulations.

“(f) ENROLLMENT.—

“(1) IN GENERAL.—The Secretary shall establish procedures and times for enrollment in the supplemental debit card program. Open enrollment shall be available not less than 4 times per calendar year.

“(2) TRANSITION OF INDIVIDUALS ENROLLED IN MEDICAID OR THE STATE CHILDREN’S HEALTH INSURANCE PROGRAM.—

“(A) INFORMATION FROM THE STATES.—Each State shall—

“(i) not later than June 30, 2010, inform all individuals then enrolled in Medicaid or the State Children’s Health Insurance Program (SCHIP), of the changes in effect beginning on January 1, 2011; and

“(ii) not later than October 31, 2010, redetermine the eligibility of each individual enrolled in Medicaid or SCHIP, other than those individuals who qualify for Medicaid or SCHIP as disabled, elderly, or a special population, for the supplemental debit card program, according to the eligibility criteria under subsection (b).

“(B) AUTOMATIC ENROLLMENT.—The Secretary shall provide for the automatic enrollment in the supplemental debit card program of all individuals who are enrolled in Medicaid or SCHIP and who have been redetermined by a State under subparagraph (A) to be eligible for Medicaid or SCHIP. Any individual who is determined by a State not to qualify for the supplemental debit card program may retain coverage under Medicaid or SCHIP until June 30, 2011.

“(3) ASSISTANCE WITH QUALIFIED HEALTH INSURANCE CREDIT.—Each State shall, to the extent practicable, provide individuals residing within the State with information regarding the qualified health insurance credit described in section 25E of the Internal Revenue Code of 1986, including information regarding eligibility for, and how to claim, such credit.

“(g) ADMINISTRATION.—

“(1) NATIONAL SYSTEM.—The Secretary may enter into contracts or agreements with a State, a consortium of States, or a private entity, including a bank, enrollment broker, or similar entity, to establish and maintain a unified national system to support the processes and transactions necessary to administer this section.

“(2) AUTOMATED SYSTEM.—The Secretary shall establish an automated means, such as an electronic benefit transfer system, by which the benefits under this section shall be transferred to eligible families.

“(3) VERIFICATION OF APPLICANT INFORMATION.—The Secretary may verify information provided by applicants with the appropriate Federal, State, and local agencies, including the Internal Revenue Service, the Social Security Administration, the Department of Labor, and child support enforcement agencies.

“(4) CHOICE COUNSELING.—The Secretary may enter into contracts or agreements with a State, a consortium of a State, or a private entity, including an enrollment broker or community organization or other organization, to educate eligible families about their options and to assist in their enrollment in the supplemental debit card plan.

“(5) APPEALS.—The Secretary shall establish an independent appeals process, to be administered by an entity separate from the entity that makes initial eligibility determinations, which shall be available to individuals who are denied benefits under the supplemental debit card program.

“(6) RESOLUTION OF ERRORS.—The Secretary shall provide for a reconciliation process with the States to resolve any errors and adjudicate disputes due to incomplete or false information in a family’s application or in the billing process described in subsection (e).

“(7) PENALTIES FOR FALSE INFORMATION.—Any person who provides false information to qualify for the supplemental debit card program shall pay a penalty in the amount of 110 percent of the amount of assistance

paid on behalf of such person and all members of such person's family.

“(h) IMPLEMENTATION PLAN.—Not later than 6 months after the date of enactment of this section, the Secretary shall submit to Congress a plan for implementing this program during fiscal years 2009–2012.

“(i) AUTHORIZATION OF APPROPRIATIONS.—

“(1) ADMINISTRATION OF THE SUPPLEMENTAL DEBIT CARD PROGRAM.—To administer the program under this section, there are authorized to be appropriated—

“(A) for fiscal year 2009, \$300,000,000, for the design of a unified, national system of conducting the supplemental debit card program;

“(B) for fiscal year 2010, \$1,000,000,000 for start-up costs, including, contracting, hiring and training employees, and testing the program; and

“(C) for fiscal year 2011 and each subsequent fiscal year, \$3,000,000,000.

“(2) AUTHORIZATION OF BENEFITS UNDER THE SUPPLEMENTAL DEBIT CARD PROGRAM.—To provide the supplemental debit card benefits described in this section, there are authorized to be appropriated—

“(A) for fiscal year 2011, \$24,020,000,000;

“(B) for fiscal year 2012, \$25,220,000,000;

“(C) for fiscal year 2013, \$26,480,000,000;

“(D) for fiscal year 2014, \$27,810,000,000; and

“(E) for fiscal year 2015, \$29,200,000,000.”.

TITLE V—FIXING MEDICARE FOR AMERICAN SENIORS

Subtitle A—Increasing Programmatic Efficiency, Economy, and Accountability

SEC. 501. ELIMINATING INEFFICIENCIES AND INCREASING CHOICE IN MEDICARE ADVANTAGE.

Part C of title XVIII of the Social Security Act is amended by adding at the end the following new section:

“PROTECTING MEDICARE BENEFITS FOR SENIORS

“SEC. 1860C–2. (a) COMPETITIVE BIDDING.—

“(1) IN GENERAL.—In order to promote competition among Medicare Advantage plans and to increase the quality of care furnished under such plans, the Secretary shall establish and implement a competitive bidding mechanism under this part.

“(2) MECHANISM TO BEGIN IN 2011.—The mechanism established under paragraph (1) shall apply to all MA organizations and plans beginning in 2011.

“(3) NO EFFECT ON PART D BENEFITS.—The mechanism established under paragraph (1) shall not affect the provisions of this part relating to benefits under part D, including the bidding mechanism used for benefits under such part.

“(b) RULES FOR COMPETITIVE BIDDING MECHANISM.—Notwithstanding any other provision of this part, the following rules shall apply under the competitive bidding mechanism established under subsection (a).

“(1) BENCHMARK.—Benchmark amounts for an area for a year shall be established solely through the competitive bids of MA plans. The benchmark amount for each area for a year shall be the average bid of the plans in that area for that year. In establishing the benchmark for an area for a year under the preceding sentence, the Secretary shall exclude the highest and lowest bid for that area and year. The benchmark amount for an area for a year may not exceed the benchmark amount for that area and year that would have applied if this section had not been enacted.

“(2) BIDS.—The MA plan bid shall reflect the per capita payments that the MA plan will accept for providing a benefit package that is actuarially equivalent to 106 percent

of the value of the original Medicare fee-for-service program option. MA plan bid submissions shall include data on plan average provider network contract rates compared to the rates under the original Medicare fee-for-service program option for the top 5 most common claim submissions per provider type.

“(3) RISK ADJUSTMENT.—The benchmark under paragraph (1) and the MA plan bid shall be risk adjusted using the risk adjustment requirements under this part.

“(4) BENEFICIARY PREMIUMS.—The MA monthly basic beneficiary premium for a beneficiary who enrolls in an MA plan whose plan bid is at or below the benchmark shall be zero and the beneficiary shall receive the full difference (if any) between the bid and the benchmark in the form of additional benefits or as a rebate on their premiums under this title. The MA monthly basic beneficiary premium for a beneficiary who enrolls in an MA plan whose plan bid is above the benchmark shall be equal to the amount by which the bid exceeds the benchmark.

“(5) BENCHMARK AMOUNTS FOR RURAL COUNTIES.—The Secretary may adjust the benchmark amount established under paragraph (1) for any rural county (as identified by the Secretary after consultation with the Secretary of Commerce) to encourage plan participation in such county.

“(6) EXISTING REQUIREMENTS.—Requirements relating to licensure, quality, and beneficiary protections that would otherwise apply under this part shall apply under the competitive bidding mechanism established under subsection (a).

“(c) WAIVER.—In order to implement the competitive bidding mechanism under established subsection (a), the Secretary may waive or modify requirements under this part.”.

SEC. 502. MEDICARE ACCOUNTABLE CARE ORGANIZATION DEMONSTRATION PROGRAM.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—In order to promote innovative care coordination and delivery that is cost-effective, the Secretary of Health and Human Services (in this section referred to as the “Secretary”) shall conduct a demonstration program under the Medicare program under which—

(A) groups of providers meeting certain criteria may work together to manage and coordinate care for Medicare fee-for-service beneficiaries through an Accountable Care Organization (in this section referred to as an “ACO”); and

(B) providers in participating ACOs are eligible for bonuses based on performance.

(2) MEDICARE FEE-FOR-SERVICE BENEFICIARY DEFINED.—In this section, the term “Medicare fee-for-service beneficiary” means an individual who is enrolled in the original Medicare fee-for-service program under parts A and B of title XVIII of the Social Security Act and not enrolled in an MA plan under part C of such title.

(b) ELIGIBLE ACOS.—

(1) IN GENERAL.—Subject to paragraph (2), the following provider groups are eligible to participate as ACOs under the demonstration program under this section:

(A) Physicians in group practice arrangements.

(B) Networks of individual physician practices.

(C) Partnerships or joint venture arrangements between hospitals and physicians.

(D) Partnerships or joint ventures, which may include pharmacists providing medication therapy management.

(E) Hospitals employing physicians.

(F) Integrated delivery systems.

(G) Community-based coalitions of providers.

(2) REQUIREMENTS.—An ACO shall meet the following requirements:

(A) The ACO shall have a formal legal structure that would allow the organization to receive and distribute bonuses to participating providers.

(B) The ACO shall include the primary care providers of at least 5,000 Medicare fee-for-service beneficiaries.

(C) The ACO shall be willing to become accountable for the overall care of the Medicare fee-for-service beneficiaries.

(D) The ACO shall provide the Secretary with a list of primary care and specialist physicians participating in the ACO to support the beneficiary assignment, implementation of performance measures, and the determination of bonus payments under the demonstration program.

(E) The ACO shall have in place contracts with a core group of key specialist physicians, a leadership and management structure, and processes to promote evidence-based medicine and to coordinate care.

(c) ASSIGNMENT OF MEDICARE FEE-FOR-SERVICE BENEFICIARIES.—

(1) IN GENERAL.—Under the demonstration program under this section, each Medicare fee-for-service Medicare beneficiary shall be automatically assigned to a primary care provider. Such assignment shall be based on the physician from whom the beneficiary received the most primary care in the preceding year.

(2) BENEFICIARIES MAY CONTINUE TO SEE PROVIDERS OUTSIDE OF THE ACO.—Under the demonstration program under this section, a Medicare fee-for-service Medicare beneficiary may continue to see providers in and outside of the ACO to which they have been assigned.

(d) BONUS PAYMENTS.—

(1) IN GENERAL.—Under the demonstration program, Medicare payments shall continue to be made to providers under the original Medicare fee-for-service program in the same manner as they would otherwise be made except that a participating ACO is eligible for bonuses if—

(A) it meets certain quality performance measures; and

(B) spending for their Medicare fee-for-service beneficiaries meets the requirement under paragraph (3).

(2) QUALITY.—Under the demonstration program under this section, providers meet the requirement under paragraph (1)(A) if they generally follow consensus-based guidelines established by non-government professional medical societies. Patient satisfaction and risk-adjusted outcomes shall be determined through an independent entity with medical expertise.

(3) REQUIREMENT RELATING TO SPENDING.—

(A) IN GENERAL.—An ACO shall only be eligible to receive a bonus payment if the average Medicare expenditures under the ACO for Medicare fee-for-service beneficiaries over a two-year period is at least 2 percent below the average benchmark for the corresponding two-year period. The benchmark for each ACO shall be set using the most recent three years of total per-beneficiary spending for Medicare fee-for-service beneficiaries assigned to the ACO. Such benchmark shall be updated by the projected rate of growth in national per capita spending for the original Medicare fee-for-service program, as projected (using the most recent three years of data) by the Chief Actuary of

the Centers for Medicare & Medicaid Services.

(4) **AMOUNT OF BONUS PAYMENTS.**—The amount of the bonus payment to a participating ACO shall be one-half of the percentage point difference between the two-year average of their patients' Medicare expenditures and 98 percent of the two-year average benchmark. The bonus amount, in dollars, shall be equal to the bonus share multiplied by the benchmark for the most recent year.

(5) **LIMITATION.**—Bonus payments may only be made to an ACO if the primary care provider to which the Medicare fee-for-service beneficiary has been assigned under subsection (c) elects to participate in such ACO.

(e) **WAIVER AUTHORITY.**—The Secretary may waive such requirements of titles XI and XVIII of the Social Security Act (42 U.S.C. 1301 et seq.; 1395 et seq.) as may be appropriate for the purpose of carrying out the demonstration program under this section.

(f) **REPORT.**—Upon completion of the demonstration program under this section, the Secretary shall submit to Congress a report on the program together with such recommendations as the Secretary determines appropriate.

SEC. 503. REDUCING GOVERNMENT HANDOUTS TO WEALTHIER SENIORS.

(a) **ELIMINATION OF ANNUAL INDEXING OF INCOME THRESHOLDS FOR REDUCED PART B PREMIUM SUBSIDIES.**—

(1) **IN GENERAL.**—Paragraph (5) of section 1839(i) of the Social Security Act (42 U.S.C. 1395i(i)) is repealed.

(2) **EFFECTIVE DATE.**—The repeal made by paragraph (1) shall apply to premiums for months beginning after December 2010.

(b) **INCOME-RELATED REDUCTION IN PART D PREMIUM SUBSIDY.**—

(1) **INCOME-RELATED REDUCTION IN PART D PREMIUM SUBSIDY.**—

(A) **IN GENERAL.**—Section 1860D-13(a) of the Social Security Act (42 U.S.C. 1395w-113(a)) is amended by adding at the end the following new paragraph:

“(7) **REDUCTION IN PREMIUM SUBSIDY BASED ON INCOME.**—

“(A) **IN GENERAL.**—In the case of an individual whose modified adjusted gross income exceeds the threshold amount applicable under paragraph (2) of section 1839(i) (including application of paragraph (5) of such section) for the calendar year, the monthly amount of the premium subsidy applicable to the premium under this section for a month after December 2010 shall be reduced (and the monthly beneficiary premium shall be increased) by the monthly adjustment amount specified in subparagraph (B).

“(B) **MONTHLY ADJUSTMENT AMOUNT.**—The monthly adjustment amount specified in this subparagraph for an individual for a month in a year is equal to the product of—

“(i) the quotient obtained by dividing—

“(I) the applicable percentage determined under paragraph (3)(C) of section 1839(i) (including application of paragraph (5) of such section) for the individual for the calendar year reduced by 25.5 percent; by

“(II) 25.5 percent; and

“(ii) the base beneficiary premium (as computed under paragraph (2)).

“(C) **MODIFIED ADJUSTED GROSS INCOME.**—For purposes of this paragraph, the term ‘modified adjusted gross income’ has the meaning given such term in subparagraph (A) of section 1839(i)(4), determined for the taxable year applicable under subparagraphs (B) and (C) of such section.

“(D) **DETERMINATION BY COMMISSIONER OF SOCIAL SECURITY.**—The Commissioner of Social Security shall make any determination

necessary to carry out the income-related reduction in premium subsidy under this paragraph.

“(E) **PROCEDURES TO ASSURE CORRECT INCOME-RELATED REDUCTION IN PREMIUM SUBSIDY.**—

“(i) **DISCLOSURE OF BASE BENEFICIARY PREMIUM.**—Not later than September 15 of each year beginning with 2010, the Secretary shall disclose to the Commissioner of Social Security the amount of the base beneficiary premium (as computed under paragraph (2)) for the purpose of carrying out the income-related reduction in premium subsidy under this paragraph with respect to the following year.

“(ii) **ADDITIONAL DISCLOSURE.**—Not later than October 15 of each year beginning with 2010, the Secretary shall disclose to the Commissioner of Social Security the following information for the purpose of carrying out the income-related reduction in premium subsidy under this paragraph with respect to the following year:

“(I) The modified adjusted gross income threshold applicable under paragraph (2) of section 1839(i) (including application of paragraph (5) of such section).

“(II) The applicable percentage determined under paragraph (3)(C) of section 1839(i) (including application of paragraph (5) of such section).

“(III) The monthly adjustment amount specified in subparagraph (B).

“(IV) Any other information the Commissioner of Social Security determines necessary to carry out the income-related reduction in premium subsidy under this paragraph.

“(F) **RULE OF CONSTRUCTION.**—The formula used to determine the monthly adjustment amount specified under subparagraph (B) shall only be used for the purpose of determining such monthly adjustment amount under such subparagraph.”.

(B) **COLLECTION OF MONTHLY ADJUSTMENT AMOUNT.**—Section 1860D-13(c) of the Social Security Act (42 U.S.C. 1395w-113(c)) is amended—

(i) in paragraph (1), by striking “(2) and (3)” and inserting “(2), (3), and (4)”;

(ii) by adding at the end the following new paragraph:

“(4) **COLLECTION OF MONTHLY ADJUSTMENT AMOUNT.**—

“(A) **IN GENERAL.**—Notwithstanding any provision of this subsection or section 1854(d)(2), subject to subparagraph (B), the amount of the income-related reduction in premium subsidy for an individual for a month (as determined under subsection (a)(7)) shall be paid through withholding from benefit payments in the manner provided under section 1840.

“(B) **AGREEMENTS.**—In the case where the monthly benefit payments of an individual that are withheld under subparagraph (A) are insufficient to pay the amount described in such subparagraph, the Commissioner of Social Security shall enter into agreements with the Secretary, the Director of the Office of Personnel Management, and the Railroad Retirement Board as necessary in order to allow other agencies to collect the amount described in subparagraph (A) that was not withheld under such subparagraph.”.

(2) **CONFORMING AMENDMENTS.**—

(A) **MEDICARE.**—Part D of title XVIII of the Social Security Act (42 U.S.C. 1395w-101 et seq.) is amended—

(i) in section 1860D-13(a)(1)—

(I) by redesignating subparagraph (F) as subparagraph (G);

(II) in subparagraph (G), as redesignated by subparagraph (A), by striking “(D) and (E)” and inserting “(D), (E), and (F)”;

(III) by inserting after subparagraph (E) the following new subparagraph:

“(F) **INCREASE BASED ON INCOME.**—The monthly beneficiary premium shall be increased pursuant to paragraph (7).”; and

(ii) in section 1860D-15(a)(1)(B), by striking “paragraph (1)(B)” and inserting “paragraphs (1)(B) and (1)(F)”.

(B) **INTERNAL REVENUE CODE.**—Section 6103(l)(20) of the Internal Revenue Code of 1986 (relating to disclosure of return information to carry out Medicare part B premium subsidy adjustment) is amended—

(i) in the heading, by striking “PART B PREMIUM SUBSIDY ADJUSTMENT” and inserting “PARTS B AND D PREMIUM SUBSIDY ADJUSTMENTS”;

(ii) in subparagraph (A)—

(I) in the matter preceding clause (i), by inserting “or 1860D-13(a)(7)” after “1839(i)”;

(II) in clause (vii), by inserting after “subsection (i) of such section” the following: “or under section 1860D-13(a)(7) of such Act”;

(iii) in subparagraph (B)—

(I) by inserting “or such section 1860D-13(a)(7)” before the period at the end;

(II) as amended by clause (i), by inserting “or for the purpose of resolving tax payer appeals with respect to any such premium adjustment” before the period at the end; and

(III) by adding at the end the following new sentence: “Officers, employees, and contractors of the Social Security Administration may disclose such return information to officers, employees, and contractors of the Department of Health and Human Services, the Office of Personnel Management, the Railroad Retirement Board, the Department of Justice, and the courts of the United States to the extent necessary to carry out the purposes described in the preceding sentence.”;

(iv) by adding at the end the following new subparagraph:

“(C) **TIMING OF DISCLOSURE.**—Return information shall be disclosed to officers, employees, and contractors of the Social Security Administration under subparagraph (A) not later than the date that is 90 days prior to the date on which the taxpayer first becomes entitled to benefits under part A of title XVIII of the Social Security Act or eligible to enroll for benefits under part B of such title.”.

SEC. 504. REWARDING PREVENTION.

Section 1839 of the Social Security Act (42 U.S.C. 1395r) is amended—

(1) in subsection (a)(2), by striking “and (i)” and inserting “(i), and (j)”;

(2) by adding at the end the following new subsection:

“(j)(1) With respect to the monthly premium amount for months after December 2010, the Secretary may adjust (under procedures established by the Secretary) the amount of such premium for an individual based on whether or not the individual participates in certain healthy behaviors, such as weight management, exercise, nutrition counseling, refraining from tobacco use, designating a health home, and other behaviors determined appropriate by the Secretary.

“(2) In making the adjustments under paragraph (1) for a month, the Secretary shall ensure that the total amount of premiums to be paid under this part for the month is equal to the total amount of premiums that would have been paid under this part for the month if no such adjustments had been made, as estimated by the Secretary.”.

SEC. 505. PROMOTING HEALTHCARE PROVIDER TRANSPARENCY.

(a) **TRANSPARENCY.**—Title XVIII of the Social Security Act is amended by adding at the end the following new section:

“PRICE TRANSPARENCY REQUIREMENTS

“SEC. 1899. (a) **PRE-TREATMENT DISCLOSURE.**—A provider of services (as defined in section 1861(u)) and a supplier (as defined in section 1861(d)) shall provide to each individual (regardless of whether or not the individual is a beneficiary under this title) who is scheduled to receive a treatment (or to begin a course of treatment) that is not for an emergency medical condition the estimated price that the provider of services or supplier will charge for the treatment (or course of treatment). Such price shall be determined at the time of scheduling.

“(b) **POST-TREATMENT DISCLOSURE.**—A provider of services (as so defined) and a supplier (as so defined) shall include with any bill that includes the charges for a treatment with respect to an individual (regardless of whether or not the individual is a beneficiary under this title), an itemized list of component charges for such treatment, including charges for drugs and medical equipment involved, as determined at the time of billing. With respect to each item included on such list, the provider of services or supplier shall include the price charged for the item.”

(b) **EFFECTIVE DATE.**—The amendment made by subsection (a) shall apply to providers of services and suppliers on and after January 1, 2011.

SEC. 506. AVAILABILITY OF MEDICARE AND MEDICAID CLAIMS AND PATIENT ENCOUNTER DATA.

(a) **PUBLIC AVAILABILITY.**—Not later than 1 year after the date of enactment of this Act (and annually thereafter), the Secretary of Health and Human Services (in this section referred to as the “Secretary”), shall make available to the public (including through an Internet website) data on claims and patient encounters under titles XVIII and XIX of the Social Security Act during the preceding calendar year. Such data shall be appropriately disaggregated and patient deidentified, as determined necessary by the Secretary in order to comply with the Federal regulations (concerning the privacy of individually identifiable health information) promulgated under section 264(c) of the Health Insurance Portability and Accountability Act of 1996.

(b) **PROVISION OF DATA TO STATE EXCHANGES AND HEALTH INSURANCE ISSUERS UNDER THE STATE EXCHANGE.**—The Secretary shall submit such data directly to a State Exchange under title II and health insurance issuers under such Exchange (in a form and manner determined appropriate by the Secretary).

(c) **MATCHING OF DATA.**—The Secretary shall ensure that the total amount of claims under such titles during the preceding year for which data is made available under subsection (a) is equal to the reported outlays from the Federal government and the States under such titles during the preceding years.

Subtitle B—Reducing Fraud and Abuse**SEC. 511. REQUIRING THE SECRETARY OF HEALTH AND HUMAN SERVICES TO CHANGE THE MEDICARE BENEFICIARY IDENTIFIER USED TO IDENTIFY MEDICARE BENEFICIARIES UNDER THE MEDICARE PROGRAM.**

(a) **PROCEDURES.**—

(1) **IN GENERAL.**—Not later than 1 year after the date of enactment of this Act, in order to protect beneficiaries from identity theft, the

Secretary of Health and Human Services (in this section referred to as the “Secretary”) shall establish and implement procedures to change the Medicare beneficiary identifier used to identify individuals entitled to benefits under part A of title XVIII of the Social Security Act or enrolled under part B of such title so that such an individual's social security account number is not used. Such procedures shall provide that the new Medicare beneficiary identifier includes biometric identification protections.

(2) **MAINTAINING EXISTING HICN STRUCTURE.**—In order to minimize the impact of the change under paragraph (1) on systems that communicate with Medicare beneficiary eligibility systems, the procedures under paragraph (1) shall provide that the new Medicare beneficiary identifier maintain the existing Health Insurance Claim Number structure.

(3) **PROTECTION AGAINST FRAUD.**—The procedures under paragraph (1) shall provide for a process for changing the Medicare beneficiary identifier for an individual to a different identifier in the case of the discovery of fraud, including identity theft.

(4) **PHASE-IN AUTHORITY.**—

(A) **IN GENERAL.**—Subject to subparagraphs (B) and (C), the Secretary may phase in the change under paragraph (1) in such manner as the Secretary determines appropriate.

(B) **LIMIT.**—The phase-in period under subparagraph (A) shall not exceed 10 years.

(C) **NEWLY ENTITLED AND ENROLLED INDIVIDUALS.**—The Secretary shall ensure that the change under paragraph (1) is implemented not later than January 1, 2010, with respect to any individual who first becomes entitled to benefits under part A of title XVIII of the Social Security Act or enrolled under part B of such title on or after such date.

(b) **EDUCATION AND OUTREACH.**—The Secretary shall establish a program of education and outreach for individuals entitled to, or enrolled for, benefits under part A of title XVIII of the Social Security Act or enrolled under part B of such title, providers of services (as defined in subsection (u) of section 1861 of such Act (42 U.S.C. 1395x)), and suppliers (as defined in subsection (d) of such section) on the change under paragraph (1).

(c) **DATA MATCHING.**—

(1) **ACCESS TO CERTAIN INFORMATION.**—Section 205(r) of the Social Security Act (42 U.S.C. 405(r)) is amended by adding at the end the following new paragraph:

“(9)(A) The Commissioner of Social Security shall, upon the request of the Secretary—

“(i) enter into an agreement with the Secretary for the purpose of matching data in the system of records of the Commissioner with data in the system of records of the Secretary, so long as the requirements of subparagraphs (A) and (B) of paragraph (3) are met, in order to determine—

“(I) whether a beneficiary under the program under title XVIII, XIX, or XXI is dead, imprisoned, or otherwise not eligible for benefits under such program; and

“(II) whether a provider of services or a supplier under the program under title XVIII, XIX, or XXI is dead, imprisoned, or otherwise not eligible to furnish or receive payment for furnishing items and services under such program; and

“(ii) include in such agreement safeguards to assure the maintenance of the confidentiality of any information disclosed and procedures to permit the Secretary to use such information for the purpose described in clause (i).

“(B) Information provided pursuant to an agreement under this paragraph shall be pro-

vided at such time, in such place, and in such manner as the Commissioner determines appropriate.

“(C) Information provided pursuant to an agreement under this paragraph shall include information regarding whether—

“(i) the name (including the first name and any family name or surname), the date of birth (including the month, day, and year), and social security number of an individual provided to the Commissioner match the information contained in the Commissioner's records, and

“(ii) such individual is shown on the records of the Commissioner as being deceased.”

(2) **INVESTIGATION BASED ON CERTAIN INFORMATION.**—Title XI of the Social Security Act (42 U.S.C. 1301 et seq.) is amended by inserting after section 1128F the following new section:

“SEC. 1128G. ACCESS TO CERTAIN DATA AND INVESTIGATION OF CLAIMS INVOLVING INDIVIDUALS WHO ARE NOT ELIGIBLE FOR BENEFITS OR ARE NOT ELIGIBLE PROVIDERS OF SERVICES OR SUPPLIERS.

“(a) **DATA AGREEMENT.**—The Secretary shall enter into an agreement with the Commissioner of Social Security pursuant to section 205(r)(9).

“(b) **INVESTIGATION OF CLAIMS INVOLVING CERTAIN INDIVIDUALS WHO ARE NOT ELIGIBLE FOR BENEFITS OR ARE NOT ELIGIBLE PROVIDERS OF SERVICES OR SUPPLIERS.**—

“(1) **IN GENERAL.**—The Secretary shall, in the case where a provider of services or a supplier under the program under title XVIII, XIX, or XXI submits a claim for payment for items or services furnished to an individual who the Secretary determines, as a result of information provided pursuant to such agreement, is not eligible for benefits under such program, or where the Secretary determines, as a result of such information, that such provider of services or supplier is not eligible to furnish or receive payment for furnishing such items or services, conduct an investigation with respect to the provider of services or supplier. If the Secretary determines further action is appropriate, the Secretary shall refer the investigation to the Inspector General of the Department of Health and Human Services as soon as practicable.

“(2) **ASSESSMENT OF IMPLEMENTATION AND EFFECTIVENESS BY THE OIG.**—The Inspector General of the Department of Health and Human Services shall test the implementation of the provisions of this section (including the implementation of the agreement under section 205(r)(9)) and conduct such period assessments of such implementation as the Inspector General determines necessary to determine the effectiveness of such implementation.”

(d) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated such sums as may be necessary to carry out this section.

SEC. 512. USE OF TECHNOLOGY FOR REAL-TIME DATA REVIEW.

Title XVIII of the Social Security Act, as amended by this Act, is amended by adding at the end the following new section:

“USE OF TECHNOLOGY FOR REAL-TIME DATA REVIEW

“SEC. 1899A. (a) **IN GENERAL.**—The Secretary shall establish procedures for the use of technology (including front-end, pre-payment technology similar to that used by hedge funds, investment funds, and banks) to provide real-time data analysis of claims for payment under this title to identify and investigate unusual billing or order practices

under this title that could indicate fraud or abuse.

“(b) **COMPETITIVE BIDDING.**—The procedures established under subsection (a) shall ensure that the implementation of such technology is conducted through a competitive bidding process.”.

SEC. 513. DETECTION OF MEDICARE FRAUD AND ABUSE.

(a) **IN GENERAL.**—Section 1893 of the Social Security Act (42 U.S.C. 1395ddd) is amended—

(1) in subsection (b), by adding at the end the following new paragraph:

“(7) Implementation of fraud and abuse detection methods under subsection (i).”;

(2) in subsection (c), by adding at the end of the flush matter following paragraph (4), the following new sentence “In the case of an activity described in subsection (b)(8), an entity shall only be eligible to enter into a contract under the Program to carry out the activity if the entity is selected through a competitive bidding process in accordance with subsection (i)(3).”; and

(3) by adding at the end the following new subsection:

“(i) **DETECTION OF MEDICARE FRAUD AND ABUSE.**—

“(1) **ESTABLISHMENT OF SYSTEM TO IDENTIFY COUNTIES MOST VULNERABLE TO FRAUD.**—Not later than 6 months after the date of enactment of this subsection, the Secretary shall establish a system to identify the 50 counties most vulnerable to fraud with respect to items and services furnished by providers of services (other than hospitals and critical access hospitals) and suppliers based on the degree of county-specific reimbursement and analysis of payment trends under this title. The Secretary shall designate the counties identified under the preceding sentence as ‘high risk areas’.

“(2) **FRAUD AND ABUSE DETECTION.**—

“(A) **INITIAL IMPLEMENTATION.**—The Secretary shall establish procedures for the implementation of fraud and abuse detection methods under this title with respect to items and services furnished by such providers of services and suppliers in high risk areas designated under paragraph (1) (and, beginning not later than 18 months after the date of enactment of this subsection, with respect to items and services furnished by such providers of services and suppliers in areas not so designated) including the following:

“(i) Data analysis to establish prepayment claim edits designed to target the claims for payment under this title for such items and services that are most likely to be fraudulent.

“(ii) Prepayment benefit integrity reviews for claims for payment under this title for such items and services that are suspended as a result of such edits.

“(B) **REQUIREMENT FOR PARTICIPATION.**—In no case may a provider of services or supplier who does not meet the requirements under subparagraph (A) participate in the program under this title.

“(C) **EXPANDED IMPLEMENTATION.**—Not later than 24 months after the date of enactment of this subsection, the Secretary shall establish procedures for the implementation of such fraud and abuse detection methods under this title with respect to items and services furnished by all providers of services and suppliers, including those not in high risk areas designated under paragraph (1).

“(3) **COMPETITIVE BIDDING.**—In selecting entities to carry out this subsection, the Secretary shall use a competitive bidding process.

“(4) **REPORT TO CONGRESS.**—The Secretary shall submit to Congress an annual report on

the effectiveness of activities conducted under this subsection, including a description of any savings to the program under this title as a result of such activities and the overall administrative cost of such activities and a determination as to the amount of funding needed to carry out this subsection for subsequent fiscal years, together with recommendations for such legislation and administrative action as the Secretary determines appropriate.”.

(b) **AUTHORIZATION OF APPROPRIATIONS.**—To carry out the amendments made by this section, there are authorized to be appropriated—

(1) such sums as may be necessary, not to exceed \$50,000,000, for each of fiscal years 2010 through 2014; and

(2) such sums as may be necessary, not to exceed an amount the Secretary determines appropriate in the most recent report submitted to Congress under section 1893(j)(4) of the Social Security Act, as added by subsection (a), for each subsequent fiscal year.

SEC. 514. EDITS ON 855S MEDICARE ENROLLMENT APPLICATION AND EXEMPTION OF PHARMACISTS FROM SURETY BOND REQUIREMENT.

(a) **EDITS ON 855S MEDICARE ENROLLMENT APPLICATION.**—Section 1834(a) of the Social Security Act (42 U.S.C. 1395m(a)) is amended by adding at the end the following new paragraphs:

“(22) **CONFIRMATION WITH NATIONAL SUPPLIER CLEARINGHOUSE PRIOR TO PAYMENT.**—

“(A) **IN GENERAL.**—Not later than 1 year after the date of enactment of this paragraph, the Secretary shall establish procedures to require carriers, prior to paying a claim for payment for durable medical equipment, prosthetics, orthotics, and supplies under this title, to confirm with the National Supplier Clearinghouse—

“(i) that the National Provider Identifier of the physician or practitioner prescribing or ordering the item or service is valid and active;

“(ii) that the Medicare identification number of the supplier is valid and active; and

“(iii) that the item or service for which the claim for payment is submitted was properly identified on the CMS-855S Medicare enrollment application.

“(B) **ONLINE DATABASE FOR IMPLEMENTATION.**—Not later than 18 months after the date of enactment of this paragraph, the Secretary shall establish an online database similar to that used for the National Provider Identifier to enable providers of services, accreditors, carriers, and the National Supplier Clearinghouse to view information on specialties and the types of items and services each supplier has indicated on the CMS-855S Medicare enrollment application submitted by the supplier.

“(C) **NOTIFICATION OF CLAIM DENIAL AND RESUBMISSION.**—In the case where a claim for payment for durable medical equipment, prosthetics, orthotics, and supplies under this title is denied because the item or service furnished does not correctly match up with the information on file with the National Supplier Clearinghouse—

“(i) the National Supplier Clearinghouse shall—

“(I) provide the supplier written notification of the reason for such denial; and

“(II) allow the supplier 60 days to provide the National Supplier Clearinghouse with appropriate certification, licensing, or accreditation; and

“(ii) the Secretary shall waive applicable requirements relating to the time frame for the submission of claims for payment under this title in order to permit the resubmission

of such claim if payment of such claim would otherwise be allowed under this title.

“(D) **IMPROVEMENTS TO MEDICARE ENROLLMENT APPLICATION.**—The Secretary shall establish procedures under which a prospective supplier of durable medical equipment, prosthetics, orthotics, and supplies under this title shall certify, as part of the CMS-855S Medicare enrollment application submitted by such supplier, under penalty of perjury, that the information provided by the supplier on such application is accurate to the best of the supplier's knowledge.

“(23) **TERMINATION OF PARTICIPATION FOR SUBMISSION OF FRAUDULENT CLAIMS.**—If the Secretary finds that a supplier of durable medical equipment, prosthetics, orthotics, and supplies under this title has submitted fraudulent claims for payment under this title, the Secretary shall terminate the suppliers participation under this title. Not later than 1 year after the date of enactment of this paragraph, the Secretary shall establish a process under which a supplier whose participation has been terminated under the preceding sentence may appeal such termination and such appeal shall be resolved not later than 60 days after the date on which the appeal was made.”.

(b) **EXEMPTION OF PHARMACISTS FROM SURETY BOND REQUIREMENT.**—Section 1834(a)(16) of the Social Security Act (42 U.S.C. 1395m(a)(16)) is amended, in the second sentence, by inserting “and shall waive such requirement in the case of a pharmacist” before the period at the end.

SEC. 515. GAO STUDY AND REPORT ON EFFECTIVENESS OF SURETY BOND REQUIREMENTS FOR SUPPLIERS OF DURABLE MEDICAL EQUIPMENT IN COMBATING FRAUD.

(a) **STUDY.**—The Comptroller General of the United States shall conduct a study on the effectiveness of the surety bond requirement under section 1834(a)(16) of the Social Security Act (42 U.S.C. 1395m(a)(16)) in combating fraud.

(b) **REPORT.**—Not later than 1 year after the date of enactment of this Act, the Comptroller General shall submit to Congress a report containing the results of the study conducted under subsection (a), together with recommendations for such legislation and administrative action as the Comptroller General determines appropriate.

TITLE VI—ENDING LAWSUIT ABUSE

SEC. 601. STATE GRANTS TO CREATE HEALTH COURT SOLUTIONS.

Part P of title III of the Public Health Service Act (42 U.S.C. 280g et seq.) is amended by adding at the end the following:

“SEC. 399R. STATE GRANTS TO CREATE HEALTH COURT SOLUTIONS.

“(a) **IN GENERAL.**—The Secretary may award grants to States for the development, implementation, and evaluation of alternatives to current tort litigation that comply with this section, for the resolution of disputes concerning injuries allegedly caused by health care providers or health care organizations.

“(b) **CONDITIONS FOR DEMONSTRATION GRANTS.**—

“(1) **APPLICATION.**—To be eligible to receive a grant under this section, a State shall submit to the Secretary an application at such time, in such manner, and containing such information as may be required by the Secretary. A grant shall be awarded under this section on such terms and conditions as the Secretary determines appropriate.

“(2) **STATE REQUIREMENTS.**—To be eligible to receive a grant under this section, a State shall—

“(A) develop and implement an alternative to current tort litigation for resolving disputes over injuries allegedly caused by health care providers or health care organizations based on one or more of the models described in subsection (d); and

“(B) implement policies that provide for a reduction in health care errors through the collection and analysis by organizations that engage in voluntary efforts to improve patient safety and the quality of health care delivery, of patient safety data related to disputes resolved under the alternatives under subparagraph (A).

“(3) DEMONSTRATION OF EFFECTIVENESS.—To be eligible to receive a grant under subsection (a), a State shall demonstrate how the proposed alternative to be implemented under paragraph (2)(A) will—

“(A) make the medical liability system of the State more reliable through the prompt and fair resolution of disputes;

“(B) encourage the early disclosure of health care errors;

“(C) enhance patient safety; and

“(D) maintain access to medical liability insurance.

“(4) SOURCES OF COMPENSATION.—To be eligible to receive a grant under subsection (a), a State shall identify the sources from, and methods by which, compensation would be paid for medical liability claims resolved under the proposed alternative to current tort litigation implemented under paragraph (2)(A). Funding methods shall, to the extent practicable, provide financial incentives for activities that improve patient safety.

“(5) SCOPE.—

“(A) IN GENERAL.—To be eligible to receive a grant under subsection (a), a State shall utilize the proposed alternative identified under paragraph (2)(A) for the resolution of all types of disputes concerning injuries allegedly caused by health care providers or health care organizations.

“(B) CURRENT STATE EFFORTS TO ESTABLISH ALTERNATIVE TO TORT LITIGATION.—

“(i) IN GENERAL.—Nothing in this section shall be construed to limit the efforts that any State has made prior to the date of enactment of this section to establish any alternative to tort litigation.

“(ii) ALTERNATIVE FOR PRACTICE AREAS OR INJURIES.—In the case of a State that has established an alternative to tort litigation for a certain area of health care practice or a category of injuries, the alternative selected as provided for in this section shall supplement not replace or invalidate such established alternative unless the State intends otherwise.

“(6) NOTIFICATION OF PATIENTS.—To be eligible to receive a grant under subsection (a), the State shall demonstrate how patients will be notified when they are receiving health care services that fall within the scope of the alternative selected under this section by the State to current tort litigation.

“(c) REPRESENTATION BY COUNSEL.—A State that receives a grant under this section may not preclude any party to a dispute that falls within the jurisdiction of the alternative to current tort litigation that is implemented under the grant from obtaining legal representation at any point during the consideration of the claim under such alternative.

“(d) MODELS.—

“(1) IN GENERAL.—The models in this section are the following:

“(2) EXPERT PANEL REVIEW AND EARLY OFFER GUIDELINES.—

“(A) IN GENERAL.—A State may use amounts received under a grant under this

section to develop and implement an expert panel and early offer review system that meets the requirements of this paragraph.

“(B) ESTABLISHMENT OF PANEL.—Under the system under this paragraph, the State shall establish an expert panel to review any disputes concerning injuries allegedly caused by health care providers or health care organizations according to the guidelines described in this paragraph.

“(C) COMPOSITION.—

“(i) IN GENERAL.—An expert panel under this paragraph shall be composed of 3 medical experts (either physicians or health care professionals) and 3 attorneys to be appointed by the head of the State agency responsible for health.

“(ii) LICENSURE AND EXPERTISE.—Each physician or health care professional appointed to an expert panel under clause (i) shall—

“(I) be appropriately credentialed or licensed in the State in which the dispute takes place to deliver health care services; and

“(II) typically treat the condition, make the diagnosis, or provide the type of treatment that is under review.

“(iii) INDEPENDENCE.—

“(I) IN GENERAL.—Subject to subclause (II), each individual appointed to an expert panel under this paragraph shall—

“(aa) not have a material familial, financial, or professional relationship with a party involved in the dispute reviewed by the panel; and

“(bb) not otherwise have a conflict of interest with such a party.

“(II) EXCEPTION.—Nothing in subclause (I) shall be construed to prohibit an individual who has staff privileges at an institution where the treatment involved in the dispute was provided from serving as a member of an expert panel merely on the basis of such affiliation, if the affiliation is disclosed to the parties and neither party objects.

“(iv) PRACTICING HEALTH CARE PROFESSIONAL IN SAME FIELD.—

“(I) IN GENERAL.—In a dispute before an expert panel that involves treatment, or the provision of items or services—

“(aa) by a physician, the medical experts on the expert panel shall be practicing physicians (allopathic or osteopathic) of the same or similar specialty as a physician who typically treats the condition, makes the diagnosis, or provides the type of treatment under review; or

“(bb) by a health care professional other than a physician, at least two medical experts on the expert panel shall be practicing physicians (allopathic or osteopathic) of the same or similar specialty as the health care professional who typically treats the condition, makes the diagnosis, or provides the type of treatment under review, and, if determined appropriate by the State agency, the third medical expert shall be a practicing health care professional (other than such a physician) of such a same or similar specialty.

“(II) PRACTICING DEFINED.—In this paragraph, the term ‘practicing’ means, with respect to an individual who is a physician or other health care professional, that the individual provides health care services to individual patients on average at least 2 days a week.

“(v) PEDIATRIC EXPERTISE.—In the case of dispute relating to a child, at least 1 medical expert on the expert panel shall have expertise described in clause (iv)(I) in pediatrics.

“(D) DETERMINATION.—After a review, an expert panel shall make a determination as to the liability of the parties involved and

compensation based on a schedule of compensation that is developed by the panel. Such a schedule shall at least include—

“(i) payment for the net economic loss incurred by the patient, on a periodic basis, reduced by any payments received by the patient under—

“(I) any health or accident insurance;

“(II) any wage or salary continuation plan; or

“(III) any disability income insurance;

“(ii) payment for the non-economic damages incurred by the patient, if appropriate for the injury, based on a defined payment schedule developed by the State, in consultation with relevant experts and with the Secretary;

“(iii) reasonable attorney’s fees; and

“(iv) regular updates of the schedule under clause (ii) as necessary.

“(E) ACCEPTANCE.—If the parties to a dispute who come before an expert panel under this paragraph accept the determination of the expert panel concerning liability and compensation, such compensation shall be paid to the claimant and the claimant shall agree to forgo any further action against the health care providers or health care organizations involved.

“(F) FAILURE TO ACCEPT.—If any party decides not to accept the expert panel’s determination under this paragraph, the State may choose whether to allow the panel to review the determination de novo, with deference, or to provide an opportunity for parties to reject the determination of the panel.

“(G) REVIEW BY STATE COURT AFTER EXHAUSTION OF ADMINISTRATIVE REMEDIES.—

“(i) RIGHT TO FILE.—If the State elects not to permit the expert panel under this paragraph to conduct its own reviews of determinations, or if the State elects to permit such reviews but a party is not satisfied with the final decision of the panel after such a review, the party shall have the right to file a claim relating to the injury involved in a State court of competent jurisdiction.

“(ii) FORFEIT OF AWARDS.—Any party filing an action in a State court under clause (i) shall forfeit any compensation award made under subparagraph (C).

“(iii) ADMISSIBILITY.—The determinations of the expert panel pursuant to a review under subparagraph (C) shall be admissible into evidence in any State court proceeding under this subparagraph.

“(3) ADMINISTRATIVE HEALTH CARE TRIBUNALS.—

“(A) IN GENERAL.—A State may use amounts received under a grant under this section to develop and implement an administrative health care tribunal system under which the parties involved shall have the right to request a hearing to review any dispute concerning injuries allegedly caused by health care providers or health care organizations before an administrative health care tribunal established by the State involved.

“(B) REQUIREMENTS.—In establishing an administrative health care tribunal under this paragraph, a State shall—

“(i) ensure that such tribunals are presided over by special judges with health care expertise who meet applicable State standards for judges and who agree to preside over such court voluntarily;

“(ii) provide authority to such judges to make binding rulings, rendered in written decisions, on standards of care, causation, compensation, and related issues with reliance on independent expert witnesses commissioned by the tribunal;

“(iii) establish a legal standard for the tribunal that shall be the same as the standard

that would apply in the State court of competent jurisdiction which would otherwise handle the claim; and

“(iv) provide for an appeals process to allow for review of decisions by State courts.

“(C) DETERMINATION.—After a tribunal conducts a review under this paragraph, the tribunal shall make a determination as to the liability of the parties involved and the amount of compensation that should be paid based on a schedule of compensation developed by the tribunal. Such a schedule shall at a minimum include—

“(i) payment for the net economic loss incurred by the patient, on a periodic basis, reduced by any payments received by the patient under—

“(I) any health or accident insurance;

“(II) any wage or salary continuation plan; or

“(III) any disability income insurance;

“(ii) payment for the non-economic damages incurred by the patient, if appropriate for the injury, based on a defined payment schedule developed by the State in consultation with relevant experts and with the Secretary;

“(iii) reasonable attorney’s fees; and

“(iv) regular updates of the schedule under clause (i) as necessary.

“(D) REVIEW BY STATE COURT AFTER EXHAUSTION OF ADMINISTRATIVE REMEDIES.—

“(i) RIGHT TO FILE.—Nothing in this paragraph shall be construed to prohibit any individual who is not satisfied with the determinations of a tribunal under this paragraph, from filing a claim for the injury involved in a State court of competent jurisdiction.

“(ii) FORFEIT OF AWARD.—Any party filing an action in a State court under clause (i) shall forfeit any compensation award made under subparagraph (C).

“(iii) ADMISSIBILITY.—The determinations of the tribunal under subparagraph (C) shall be admissible into evidence in any State court proceeding under this subparagraph.

“(4) EXPERT PANEL REVIEW AND ADMINISTRATIVE HEALTH CARE TRIBUNAL COMBINATION MODEL.—

“(A) IN GENERAL.—A State may use amounts received under a grant under this section to develop and implement an expert panel review and administrative health care tribunal combination system to review any dispute concerning injuries allegedly caused by health care providers or health care organizations. Under such system, a dispute concerning injuries allegedly caused by health care providers or health care organizations shall proceed through the procedures described in this subparagraph prior to the submission of such dispute to a State court.

“(B) GENERAL PROCEDURE.—

“(i) ESTABLISHMENT OF EXPERT PANEL.—Prior to submitting any dispute described in subparagraph (A) to an administrative health care tribunal under the system established under this paragraph, the State shall establish an expert panel (in accordance with subparagraph (C)) to review the allegations involved in such dispute.

“(ii) REFERRAL TO TRIBUNAL.—If either party to a dispute described in clause (i) fails to accept the determination of the expert panel, the dispute shall then be referred to an administrative health care tribunal (in accordance with subparagraph (D)).

“(C) EXPERT REVIEW PANEL.—

“(i) IN GENERAL.—The provisions of paragraph (2) shall apply with respect to the establishment and operation of an expert review panel under this subparagraph, except that the subparagraphs (F) and (G) of such paragraph shall not apply.

“(ii) FAILURE TO ACCEPT DETERMINATION OF PANEL.—If any party to a dispute before an expert panel under this subparagraph refuses to accept the panel’s determination, the dispute shall be referred to an administrative health care tribunal under subparagraph (D).

“(D) ADMINISTRATIVE HEALTH CARE TRIBUNALS.—

“(i) IN GENERAL.—Upon the failure of any party to accept the determination of an expert panel under subparagraph (C), the parties shall request a hearing concerning the liability or compensation involved by an administrative health care tribunal established by the State involved under this subparagraph.

“(ii) REQUIREMENTS.—The provisions of paragraph (3) shall apply with respect to the establishment and operation of an administrative health care tribunal under this subparagraph.

“(iii) FORFEIT OF AWARDS.—Any party proceeding to the second step-administrative health care tribunal under this model shall forfeit any compensation awarded by the expert panel.

“(iv) ADMISSIBILITY.—The determinations of the expert panel under subparagraph (C) shall be admissible into evidence in any administrative health care tribunal proceeding under this subparagraph.

“(E) RIGHT TO FILE.—Nothing in this paragraph shall be construed to prohibit any individual who is not satisfied with the determination of the tribunal (after having proceeded through both the expert panel under subparagraph (C) and the tribunal under subparagraph (D)) from filing a claim for the injury involved in a State court of competent jurisdiction.

“(F) ADMISSIBILITY.—The determinations of both the expert panel and the tribunal under this paragraph shall be admissible into evidence in any State court proceeding under this paragraph.

“(G) FORFEIT OF AWARDS.—Any party filing an action in State court under subparagraph (E) shall forfeit any compensation award made by both the expert panel and the administrative health care tribunal under this paragraph.

“(e) DEFINITIONS.—In this section:

“(1) CURRENT TORT LITIGATION.—The term ‘current tort litigation’ means the tort litigation system existing in the State on the date on which the State submits an application under subsection (b)(1), for the resolution of disputes concerning injuries allegedly caused by health care providers or health care organizations.

“(2) HEALTH CARE ORGANIZATION.—The term ‘health care organization’ means any individual or entity that is obligated to provide, pay for, or administer health benefits under any health plan.

“(3) NET ECONOMIC LOSS.—The term ‘net economic loss’ means—

“(A) reasonable expenses incurred for products, services and accommodations needed for health care, training and other remedial treatment and care of an injured individual;

“(B) reasonable and appropriate expenses for rehabilitation treatment and occupational training;

“(C) 100 percent of the loss of income from work that an injured individual would have performed if not injured, reduced by any income from substitute work actually performed; and

“(D) reasonable expenses incurred in obtaining ordinary and necessary services to replace services an injured individual would have performed for the benefit of the individual or the family of such individual if the individual had not been injured.

“(4) NON-ECONOMIC DAMAGES.—The term ‘non-economic damages’ means losses for physical and emotional pain, suffering, inconvenience, physical impairment, mental anguish, disfigurement, loss of enjoyment of life, loss of society and companionship, loss of consortium (other than loss of domestic service), injury to reputation, and all other non-pecuniary losses of any kind or nature, to the extent permitted under State law.

“(f) FUNDING.—

“(1) ONE-TIME INCREASE IN MEDICAID PAYMENT.—In the case of a State awarded a grant to carry out this section, the total amount of the Federal payment determined for the State under section 1913 of the Social Security Act (as amended by section 401) for fiscal year 2011 (in addition to the any increase applicable for that fiscal year under section 203(b) but determined without regard to any such increase) shall be increased by an amount equal to 1 percent of the total amount of payments made to the State for fiscal year 2010 under section 1903(a) of the Social Security Act (42 U.S.C. 1396b(a)) for purposes of carrying out a grant awarded under this section. Amounts paid to a State pursuant to this subsection shall remain available until expended.

“(2) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated for any fiscal year such sums as may be necessary for purposes of making payments to States pursuant to paragraph (1).”

TITLE VII—PROMOTING HEALTH INFORMATION TECHNOLOGY

Subtitle A—Assisting the Development of Health Information Technology

SEC. 701. PURPOSE.

It is the purpose of this subtitle to promote the utilization of health record banking by improving the coordination of health information through an infrastructure for the secure and authorized exchange and use of healthcare information.

SEC. 702. HEALTH RECORD BANKING.

(a) ESTABLISHMENT.—Not later than 1 year after the date of enactment of this Act, the Secretary of Health and Human Services shall promulgate regulations to provide for the certification and auditing of the banking of electronic medical records.

(b) GENERAL RIGHTS.—An individual who has a health record contained in a health record bank shall maintain ownership over the health record and shall have the right to review the contents of the record.

SEC. 703. APPLICATION OF FEDERAL AND STATE SECURITY AND CONFIDENTIALITY STANDARDS.

(a) IN GENERAL.—Current Federal security and confidentiality standards and State security and confidentiality laws shall apply to this subtitle until such time as Congress acts to amend such standards.

(b) DEFINITIONS.—In this section:

(1) CURRENT FEDERAL SECURITY AND CONFIDENTIALITY STANDARDS.—The term “current Federal security and confidentiality standards” means the Federal privacy standards established pursuant to section 264(c) of the Health Insurance Portability and Accountability Act of 1996 (42 U.S.C. 1320d-2 note) and security standards established under section 1173(d) of the Social Security Act (42 U.S.C. 1320d-2(d)).

(2) STATE SECURITY AND CONFIDENTIALITY LAWS.—The term “State security and confidentiality laws” means State laws and regulations relating to the privacy and confidentiality of individually identifiable health information or to the security of such information.

(3) STATE.—The term “State” has the meaning given such term for purposes of title XI of the Social Security Act, as provided under section 1101(a) of such Act (42 U.S.C. 1301(a)).

Subtitle B—Removing Barriers to the Use of Health Information Technology to Better Coordinate Health Care

SEC. 711. SAFE HARBORS TO ANTICKBACK CIVIL PENALTIES AND CRIMINAL PENALTIES FOR PROVISION OF HEALTH INFORMATION TECHNOLOGY AND TRAINING SERVICES.

(a) FOR CIVIL PENALTIES.—Section 1128A of the Social Security Act (42 U.S.C. 1320a–7a) is amended—

(1) in subsection (b), by adding at the end the following new paragraph:

“(4) For purposes of this subsection, inducements to reduce or limit services described in paragraph (1) shall not include the practical or other advantages resulting from health information technology or related installation, maintenance, support, or training services.”; and

(2) in subsection (i), by adding at the end the following new paragraph:

“(8) The term ‘health information technology’ means hardware, software, license, right, intellectual property, equipment, or other information technology (including new versions, upgrades, and connectivity) designed or provided primarily for the electronic creation, maintenance, or exchange of health information to better coordinate care or improve health care quality, efficiency, or research.”.

(b) FOR CRIMINAL PENALTIES.—Section 1128B of such Act (42 U.S.C. 1320a–7b) is amended—

(1) in subsection (b)(3)—

(A) in subparagraph (G), by striking “and” at the end;

(B) in the subparagraph (H) added by section 237(d) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Public Law 108–173; 117 Stat. 2213)—

(i) by moving such subparagraph 2 ems to the left; and

(ii) by striking the period at the end and inserting a semicolon;

(C) in the subparagraph (H) added by section 431(a) of such Act (117 Stat. 2287)—

(i) by redesignating such subparagraph as subparagraph (I);

(ii) by moving such subparagraph 2 ems to the left; and

(iii) by striking the period at the end and inserting “; and”; and

(D) by adding at the end the following new subparagraph:

“(J) any nonmonetary remuneration (in the form of health information technology, as defined in section 1128A(i)(8), or related installation, maintenance, support or training services) made to a person by a specified entity (as defined in subsection (g)) if—

“(i) the provision of such remuneration is without an agreement between the parties or legal condition that—

“(I) limits or restricts the use of the health information technology to services provided by the physician to individuals receiving services at the specified entity;

“(II) limits or restricts the use of the health information technology in conjunction with other health information technology; or

“(III) conditions the provision of such remuneration on the referral of patients or business to the specified entity;

“(ii) such remuneration is arranged for in a written agreement that is signed by the parties involved (or their representatives)

and that specifies the remuneration solicited or received (or offered or paid) and states that the provision of such remuneration is made for the primary purpose of better coordination of care or improvement of health quality, efficiency, or research; and

“(iii) the specified entity providing the remuneration (or a representative of such entity) has not taken any action to disable any basic feature of any hardware or software component of such remuneration that would permit interoperability.”; and

(2) by adding at the end the following new subsection:

“(g) SPECIFIED ENTITY DEFINED.—For purposes of subsection (b)(3)(J), the term ‘specified entity’ means an entity that is a hospital, group practice, prescription drug plan sponsor, a Medicare Advantage organization, or any other such entity specified by the Secretary, considering the goals and objectives of this section, as well as the goals to better coordinate the delivery of health care and to promote the adoption and use of health information technology.”.

(c) EFFECTIVE DATE AND EFFECT ON STATE LAWS.—

(1) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall take effect on the date that is 120 days after the date of the enactment of this Act.

(2) PREEMPTION OF STATE LAWS.—No State (as defined in section 1101(a) of the Social Security Act (42 U.S.C. 1301(a))) for purposes of title XI of such Act) shall have in effect a State law that imposes a criminal or civil penalty for a transaction described in section 1128A(b)(4) or section 1128B(b)(3)(J) of such Act, as added by subsections (a)(1) and (b), respectively, if the conditions described in the respective provision, with respect to such transaction, are met.

(d) STUDY AND REPORT TO ASSESS EFFECT OF SAFE HARBORS ON HEALTH SYSTEM.—

(1) IN GENERAL.—The Secretary of Health and Human Services shall conduct a study to determine the impact of each of the safe harbors described in paragraph (3). In particular, the study shall examine the following:

(A) The effectiveness of each safe harbor in increasing the adoption of health information technology.

(B) The types of health information technology provided under each safe harbor.

(C) The extent to which the financial or other business relationships between providers under each safe harbor have changed as a result of the safe harbor in a way that adversely affects or benefits the health care system or choices available to consumers.

(D) The impact of the adoption of health information technology on health care quality, cost, and access under each safe harbor.

(2) REPORT.—Not later than 3 years after the effective date described in subsection (c)(1), the Secretary of Health and Human Services shall submit to Congress a report on the study under paragraph (1).

(3) SAFE HARBORS DESCRIBED.—For purposes of paragraphs (1) and (2), the safe harbors described in this paragraph are—

(A) the safe harbor under section 1128A(b)(4) of such Act (42 U.S.C. 1320a–7a(b)(4)), as added by subsection (a)(1); and

(B) the safe harbor under section 1128B(b)(3)(J) of such Act (42 U.S.C. 1320a–7b(b)(3)(J)), as added by subsection (b).

SEC. 712. EXCEPTION TO LIMITATION ON CERTAIN PHYSICIAN REFERRALS (UNDER STARK) FOR PROVISION OF HEALTH INFORMATION TECHNOLOGY AND TRAINING SERVICES TO HEALTH CARE PROFESSIONALS.

(a) IN GENERAL.—Section 1877(b) of the Social Security Act (42 U.S.C. 1395nn(b)) is

amended by adding at the end the following new paragraph:

“(6) INFORMATION TECHNOLOGY AND TRAINING SERVICES.—

“(A) IN GENERAL.—Any nonmonetary remuneration (in the form of health information technology or related installation, maintenance, support or training services) made by a specified entity to a physician if—

“(i) the provision of such remuneration is without an agreement between the parties or legal condition that—

“(I) limits or restricts the use of the health information technology to services provided by the physician to individuals receiving services at the specified entity;

“(II) limits or restricts the use of the health information technology in conjunction with other health information technology; or

“(III) conditions the provision of such remuneration on the referral of patients or business to the specified entity;

“(ii) such remuneration is arranged for in a written agreement that is signed by the parties involved (or their representatives) and that specifies the remuneration made and states that the provision of such remuneration is made for the primary purpose of better coordination of care or improvement of health quality, efficiency, or research; and

“(iii) the specified entity (or a representative of such entity) has not taken any action to disable any basic feature of any hardware or software component of such remuneration that would permit interoperability.

“(B) HEALTH INFORMATION TECHNOLOGY DEFINED.—For purposes of this paragraph, the term ‘health information technology’ means hardware, software, license, right, intellectual property, equipment, or other information technology (including new versions, upgrades, and connectivity) designed or provided primarily for the electronic creation, maintenance, or exchange of health information to better coordinate care or improve health care quality, efficiency, or research.

“(C) SPECIFIED ENTITY DEFINED.—For purposes of this paragraph, the term ‘specified entity’ means an entity that is a hospital, group practice, prescription drug plan sponsor, a Medicare Advantage organization, or any other such entity specified by the Secretary, considering the goals and objectives of this section, as well as the goals to better coordinate the delivery of health care and to promote the adoption and use of health information technology.”.

(b) EFFECTIVE DATE; EFFECT ON STATE LAWS.—

(1) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the date that is 120 days after the date of the enactment of this Act.

(2) PREEMPTION OF STATE LAWS.—No State (as defined in section 1101(a) of the Social Security Act (42 U.S.C. 1301(a))) for purposes of title XI of such Act) shall have in effect a State law that imposes a criminal or civil penalty for a transaction described in section 1877(b)(6) of such Act, as added by subsection (a), if the conditions described in such section, with respect to such transaction, are met.

(c) STUDY AND REPORT TO ASSESS EFFECT OF EXCEPTION ON HEALTH SYSTEM.—

(1) IN GENERAL.—The Secretary of Health and Human Services shall conduct a study to determine the impact of the exception under section 1877(b)(6) of such Act (42 U.S.C. 1395nn(b)(6)), as added by subsection (a). In particular, the study shall examine the following:

(A) The effectiveness of the exception in increasing the adoption of health information technology.

(B) The types of health information technology provided under the exception.

(C) The extent to which the financial or other business relationships between providers under the exception have changed as a result of the exception in a way that adversely affects or benefits the health care system or choices available to consumers.

(D) The impact of the adoption of health information technology on health care quality, cost, and access under the exception.

(2) REPORT.—Not later than 3 years after the effective date described in subsection (b)(1), the Secretary of Health and Human Services shall submit to Congress a report on the study under paragraph (1).

SEC. 713. RULES OF CONSTRUCTION REGARDING USE OF CONSORTIA.

(a) APPLICATION TO SAFE HARBOR FROM CRIMINAL PENALTIES.—Section 1128B(b)(3) of the Social Security Act (42 U.S.C. 1320a-7b(b)(3)) is amended by adding after and below subparagraph (J), as added by section 711(b)(1), the following: “For purposes of subparagraph (J), nothing in such subparagraph shall be construed as preventing a specified entity, consistent with the specific requirements of such subparagraph, from forming a consortium composed of health care providers, payers, employers, and other interested entities to collectively purchase and donate health information technology, or from offering health care providers a choice of health information technology products in order to take into account the varying needs of such providers receiving such products.”.

(b) APPLICATION TO STARK EXCEPTION.—Paragraph (6) of section 1877(b) of the Social Security Act (42 U.S.C. 1395nn(b)), as added by section 712(a), is amended by adding at the end the following new subparagraph:

“(D) RULE OF CONSTRUCTION.—For purposes of subparagraph (A), nothing in such subparagraph shall be construed as preventing a specified entity, consistent with the specific requirements of such subparagraph, from—

“(i) forming a consortium composed of health care providers, payers, employers, and other interested entities to collectively purchase and donate health information technology; or

“(ii) offering health care providers a choice of health information technology products in order to take into account the varying needs of such providers receiving such products.”.

TITLE VIII—HEALTH CARE SERVICES COMMISSION

Subtitle A—Establishment and General Duties

SEC. 801. ESTABLISHMENT.

(a) IN GENERAL.—There is hereby established a Health Care Services Commission (in this title, referred to as the “Commission”) to be composed of 5 commissioners (in this title referred to as the “Commissioners”) to be appointed by the President by and with the advice and consent of the Senate. Not more than 3 of such Commissioners shall be members of the same political party, and in making appointments members of different political parties shall be appointed alternately as nearly as may be practicable. No Commissioner shall engage in any other business, vocation, or employment than that of serving as Commissioner. Each Commissioner shall hold office for a term of 5 years and until a successor is appointed and has qualified, except that—

(1) such Commissioner shall not so continue to serve beyond the expiration of the

next session of Congress subsequent to the expiration of said fixed term of office;

(2) any Commissioner appointed to fill a vacancy occurring prior to the expiration of the term for which a predecessor was appointed shall be appointed for the remainder of such term; and

(3) the terms of office of the Commissioners first taking office after the date of the enactment of this Act shall expire as designated by the President at the time of nomination, 1 at the end of 1 year, 1 at the end of 2 years, 1 at the end of 3 years, 1 at the end of 4 years, and 1 at the end of 5 years, after the date of the enactment of this Act.

(b) PURPOSE.—The purpose of the Commission is to enhance the quality, appropriateness, and effectiveness of health care services, and access to such services, through the establishment of a broad base of scientific research and through the promotion of improvements in clinical practice and in the organization, financing, and delivery of health care services.

(c) APPOINTMENT OF CHAIRMAN.—The President shall, from among the Commissioners appointed under subsection (a), designate an individual to serve as the Chairman of the Commission.

SEC. 802. GENERAL AUTHORITIES AND DUTIES.

(a) IN GENERAL.—In carrying out section 801(b), the Commissioners shall conduct and support research, demonstration projects, evaluations, training, guideline development, and the dissemination of information, on health care services and on systems for the delivery of such services, including activities with respect to—

(1) the effectiveness, efficiency, and quality of health care services;

(2) the outcomes of health care services and procedures;

(3) clinical practice, including primary care and practice-oriented research;

(4) health care technologies, facilities, and equipment;

(5) health care costs, productivity, and market forces;

(6) health promotion and disease prevention;

(7) health statistics and epidemiology; and

(8) medical liability.

(b) REQUIREMENTS WITH RESPECT TO RURAL AREAS AND UNDERSERVED POPULATIONS.—In carrying out subsection (a), the Commissioners shall undertake and support research, demonstration projects, and evaluations with respect to—

(1) the delivery of health care services in rural areas (including frontier areas); and

(2) the health of low-income groups, minority groups, and the elderly.

SEC. 803. DISSEMINATION.

(a) IN GENERAL.—The Commissioners shall—

(1) promptly publish, make available, and otherwise disseminate, in a form understandable and on as broad a basis as practicable so as to maximize its use, the results of research, demonstration projects, and evaluations conducted or supported under this title and the guidelines, standards, and review criteria developed under this title;

(2) promptly make available to the public data developed in such research, demonstration projects, and evaluations; and

(3) as appropriate, provide technical assistance to State and local government and health agencies and conduct liaison activities to such agencies to foster dissemination.

(b) PROHIBITION AGAINST RESTRICTIONS.—Except as provided in subsection (c), the Commissioners may not restrict the publication or dissemination of data from, or the re-

sults of, projects conducted or supported under this title.

(c) LIMITATION ON USE OF CERTAIN INFORMATION.—No information, if an establishment or person supplying the information or described in it is identifiable, obtained in the course of activities undertaken or supported under this title may be used for any purpose other than the purpose for which it was supplied unless such establishment or person has consented (as determined under regulations of the Secretary) to its use for such other purpose. Such information may not be published or released in other form if the person who supplied the information or who is described in it is identifiable unless such person has consented (as determined under regulations of the Secretary) to its publication or release in other form.

(d) CERTAIN INTERAGENCY AGREEMENT.—The Commissioners and the Director of the National Library of Medicine shall enter into an agreement providing for the implementation of subsection (a)(1).

Subtitle B—Forum for Quality and Effectiveness in Health Care

SEC. 811. ESTABLISHMENT OF OFFICE.

There is established within the Commission an office to be known as the Office of the Forum for Quality and Effectiveness in Health Care. The office shall be headed by a director (referred to in this title as the “Director”) who shall be appointed by the Commissioners.

SEC. 812. MEMBERSHIP.

(a) IN GENERAL.—The Office of the Forum for Quality and Effectiveness in Health Care shall be composed of 15 individuals nominated by private sector health care organizations and appointed by the Commission and shall include representation from at least the following:

- (1) Health insurance industry.
- (2) Health care provider groups.
- (3) Non-profit organizations.
- (4) Rural health organizations.

(b) TERMS.—

(1) IN GENERAL.—Except as provided in paragraph (2), members of the Office of the Forum for Quality and Effectiveness in Health Care shall serve for a term of 5 years.

(2) STAGGERED ROTATION.—Of the members first appointed to the Office of the Forum for Quality and Effectiveness in Health Care, the Commission shall appoint 5 members to serve for a term of 2 years, 5 members to serve for a term of 3 years, and 5 members to serve for a term of 4 years.

(c) TREATMENT OF OTHER EMPLOYMENT.—Each member of the Office of the Forum for Quality and Effectiveness in Health Care shall serve the Office independently from any other position of employment.

SEC. 813. DUTIES.

(a) ESTABLISHMENT OF FORUM PROGRAM.—The Commissioners, acting through the Director, shall establish a program to be known as the Forum for Quality and Effectiveness in Health Care. For the purpose of promoting transparency in price, quality, appropriateness, and effectiveness of health care, the Director, using the process set forth in section 814, shall arrange for the development and periodic review and updating of standards of quality, performance measures, and medical review criteria through which health care providers and other appropriate entities may assess or review the provision of health care and assure the quality of such care.

(b) CERTAIN REQUIREMENTS.—Guidelines, standards, performance measures, and review criteria under subsection (a) shall—

(1) be based on the best available research and professional judgment regarding the effectiveness and appropriateness of health care services and procedures; and

(2) be presented in formats appropriate for use by physicians, health care practitioners, providers, medical educators, and medical review organizations and in formats appropriate for use by consumers of health care.

(c) **AUTHORITY FOR CONTRACTS.**—In carrying out this subtitle, the Director may enter into contracts with public or nonprofit private entities.

(d) **PUBLIC DISCLOSURE OF RECOMMENDATIONS.**—For each fiscal year beginning with 2010, the Director shall make publicly available the following:

(1) Quarterly reports for public comment that include proposed recommendations for guidelines, standards, performance measures, and review criteria under subsection (a) and any updates to such guidelines, standards, performance measures, and review criteria.

(2) After consideration of such comments, a final report that contains final recommendations for such guidelines, standards, performance measures, review criteria, and updates.

(e) **DATE CERTAIN FOR INITIAL GUIDELINES AND STANDARDS.**—The Commissioners, by not later than January 1, 2012, shall assure the development of an initial set of guidelines, standards, performance measures, and review criteria under subsection (a).

SEC. 814. ADOPTION AND ENFORCEMENT OF GUIDELINES AND STANDARDS.

(a) **ADOPTION OF RECOMMENDATIONS OF FORUM FOR QUALITY AND EFFECTIVENESS IN HEALTH CARE.**—For each fiscal year, the Commissioners shall adopt the recommendations made for such year in the final report under subsection (d)(2) of section 813 for guidelines, standards, performance measures, and review criteria described in subsection (a) of such section.

(b) **ENFORCEMENT AUTHORITY.**—The Commissioners, in consultation with the Secretary of Health and Human Services, have the authority to make recommendations to the Secretary to enforce compliance of health care providers with the guidelines, standards, performance measures, and review criteria adopted under subsection (a). Such recommendations may include the following, with respect to a health care provider who is not in compliance with such guidelines, standards, measures, and criteria:

(1) Exclusion from participation in Federal health care programs (as defined in section 1128B(f) of the Social Security Act (42 U.S.C. 1320a-7b(f))).

(2) Imposition of a civil money penalty on such provider.

SEC. 815. ADDITIONAL REQUIREMENTS.

(a) **PROGRAM AGENDA.**—The Commissioners shall provide for an agenda for the development of the guidelines, standards, performance measures, and review criteria described in section 813(a), including with respect to the standards, performance measures, and review criteria, identifying specific aspects of health care for which the standards, performance measures, and review criteria are to be developed and those that are to be given priority in the development of the standards, performance measures, and review criteria.

Subtitle C—General Provisions

SEC. 821. CERTAIN ADMINISTRATIVE AUTHORITIES.

The Commissioners, in carrying out this title, may accept voluntary and uncompensated services.

SEC. 822. FUNDING.

For the purpose of carrying out this title, there are authorized to be appropriated such sums as may be necessary for fiscal years 2010 through 2014.

SEC. 823. DEFINITIONS.

For purposes of this title:

(1) The term “Commissioners” means the Commissioners of the Health Care Services Commission.

(2) The term “Commission” means the Health Care Services Commission.

(3) The term “Director” means the Director of the Office of the Forum for Quality and Effectiveness in Health Care.

(4) The term “Secretary” means the Secretary of Health and Human Services.

Subtitle D—Terminations and Transition

SEC. 831. TERMINATION OF AGENCY FOR HEALTHCARE RESEARCH AND QUALITY.

As of the date of the enactment of this Act, the Agency for Healthcare Research and Quality is terminated, and title IX of the Public Health Service Act is repealed.

SEC. 832. TRANSITION.

All orders, grants, contracts, privileges, and other determinations or actions of the Agency for Healthcare Research and Quality that are effective as of the date before the date of the enactment of this Act, shall be transferred to the Secretary and shall continue in effect according to their terms unless changed pursuant to law.

Subtitle E—Independent Health Record Trust

This subtitle may be cited as the “Independent Health Record Trust Act of 2009”.

SEC. 842. PURPOSE.

It is the purpose of this subtitle to provide for the establishment of a nationwide health information technology network that—

(1) improves health care quality, reduces medical errors, increases the efficiency of care, and advances the delivery of appropriate, evidence-based health care services;

(2) promotes wellness, disease prevention, and the management of chronic illnesses by increasing the availability and transparency of information related to the health care needs of an individual;

(3) ensures that appropriate information necessary to make medical decisions is available in a usable form at the time and in the location that the medical service involved is provided;

(4) produces greater value for health care expenditures by reducing health care costs that result from inefficiency, medical errors, inappropriate care, and incomplete information;

(5) promotes a more effective marketplace, greater competition, greater systems analysis, increased choice, enhanced quality, and improved outcomes in health care services;

(6) improves the coordination of information and the provision of such services through an effective infrastructure for the secure and authorized exchange and use of health information; and

(7) ensures that the health information privacy, security, and confidentiality of individually identifiable health information is protected.

SEC. 843. DEFINITIONS.

In this subtitle:

(1) **ACCESS.**—The term “access” means, with respect to an electronic health record, entering information into such account as well as retrieving information from such account.

(2) **ACCOUNT.**—The term “account” means an electronic health record of an individual

contained in an independent health record trust.

(3) **AFFIRMATIVE CONSENT.**—The term “affirmative consent” means, with respect to an electronic health record of an individual contained in an IHRT, express consent given by the individual for the use of such record in response to a clear and conspicuous request for such consent or at the individual’s own initiative.

(4) **AUTHORIZED EHR DATA USER.**—The term “authorized EHR data user” means, with respect to an electronic health record of an IHRT participant contained as part of an IHRT, any entity (other than the participant) authorized (in the form of affirmative consent) by the participant to access the electronic health record.

(5) **CONFIDENTIALITY.**—The term “confidentiality” means, with respect to individually identifiable health information of an individual, the obligation of those who receive such information to respect the health information privacy of the individual.

(6) **ELECTRONIC HEALTH RECORD.**—The term “electronic health record” means a longitudinal collection of information concerning a single individual, including medical records and personal health information, that is stored electronically.

(7) **HEALTH INFORMATION PRIVACY.**—The term “health information privacy” means, with respect to individually identifiable health information of an individual, the right of such individual to control the acquisition, uses, or disclosures of such information.

(8) **HEALTH PLAN.**—The term “health plan” means a group health plan (as defined in section 2208(1) of the Public Health Service Act (42 U.S.C. 300bb-8(1))) as well as a plan that offers health insurance coverage in the individual market.

(9) **HIPAA PRIVACY REGULATIONS.**—The term “HIPAA privacy regulations” means the regulations promulgated under section 264(c) of the Health Insurance Portability and Accountability Act of 1996 (42 U.S.C. 1320d-2 note).

(10) **INDEPENDENT HEALTH RECORD TRUST; IHRT.**—The terms “independent health record trust” and “IHRT” mean a legal arrangement under the administration of an IHRT operator that meets the requirements of this subtitle with respect to electronic health records of individuals participating in the trust or IHRT.

(11) **IHRT OPERATOR.**—The term “IHRT operator” means, with respect to an IHRT, the organization that is responsible for the administration and operation of the IHRT in accordance with this subtitle.

(12) **IHRT PARTICIPANT.**—The term “IHRT participant” means, with respect to an IHRT, an individual who has a participation agreement in effect with respect to the maintenance of the individual’s electronic health record by the IHRT.

(13) **INDIVIDUALLY IDENTIFIABLE HEALTH INFORMATION.**—The term “individually identifiable health information” has the meaning given such term in section 1171(6) of the Social Security Act (42 U.S.C. 1320d(6)).

(14) **SECURITY.**—The term “security” means, with respect to individually identifiable health information of an individual, the physical, technological, or administrative safeguards or tools used to protect such information from unwarranted access or disclosure.

SEC. 844. ESTABLISHMENT, CERTIFICATION, AND MEMBERSHIP OF INDEPENDENT HEALTH RECORD TRUSTS.

(a) **ESTABLISHMENT.**—Not later than one year after the date of the enactment of this

Act, the Federal Trade Commission, in consultation with the National Committee on Vital and Health Statistics, shall prescribe standards for the establishment, certification, operation, and interoperability of IHRTs to carry out the purposes described in section 842 in accordance with the provisions of this subtitle.

(b) CERTIFICATION.—

(1) CERTIFICATION BY FTC.—The Federal Trade Commission shall provide for the certification of IHRTs. No IHRT may be certified unless the IHRT is determined to meet the standards for certification established under subsection (a).

(2) DECERTIFICATION.—The Federal Trade Commission shall establish a process for the revocation of certification of an IHRT under this section in the case that the IHRT violates the standards established under subsection (a).

(c) MEMBERSHIP.—

(1) IN GENERAL.—To be eligible to be a participant in an IHRT, an individual shall—

(A) submit to the IHRT information as required by the IHRT to establish an electronic health record with the IHRT; and

(B) enter into a privacy protection agreement described in section 846(b)(1) with the IHRT.

The process to determine eligibility of an individual under this subsection shall allow for the establishment by such individual of an electronic health record as expeditiously as possible if such individual is determined so eligible.

(2) NO LIMITATION ON MEMBERSHIP.—Nothing in this subsection shall be construed to permit an IHRT to restrict membership, including on the basis of health condition.

SEC. 845. DUTIES OF IHRT TO IHRT PARTICIPANTS.

(a) FIDUCIARY DUTY OF IHRT; PENALTIES FOR VIOLATIONS OF FIDUCIARY DUTY.—

(1) FIDUCIARY DUTY.—With respect to the electronic health record of an IHRT participant maintained by an IHRT, the IHRT shall have a fiduciary duty to act for the benefit and in the interests of such participant and of the IHRT as a whole. Such duty shall include obtaining the affirmative consent of such participant prior to the release of information in such participant's electronic health record in accordance with the requirements of this subtitle.

(2) PENALTIES.—If the IHRT knowingly or recklessly breaches the fiduciary duty described in paragraph (1), the IHRT shall be subject to the following penalties:

(A) Loss of certification of the IHRT.

(B) A fine that is not in excess of \$50,000.

(C) A term of imprisonment for the individuals involved of not more than 5 years.

(b) ELECTRONIC HEALTH RECORD DEEMED TO BE HELD IN TRUST BY IHRT.—With respect to an individual, an electronic health record maintained by an IHRT shall be deemed to be held in trust by the IHRT for the benefit of the individual and the IHRT shall have no legal or equitable interest in such electronic health record.

SEC. 846. AVAILABILITY AND USE OF INFORMATION FROM RECORDS IN IHRT CONSISTENT WITH PRIVACY PROTECTIONS AND AGREEMENTS.

(a) PROTECTED ELECTRONIC HEALTH RECORDS USE AND ACCESS.—

(1) GENERAL RIGHTS REGARDING USES OF INFORMATION.—

(A) IN GENERAL.—With respect to the electronic health record of an IHRT participant maintained by an IHRT, subject to paragraph (2)(C), primary uses and secondary uses (described in subparagraphs (B) and (C),

respectively) of information within such record (other than by such participant) shall be permitted only upon the authorization of such use, prior to such use, by such participant.

(B) PRIMARY USES.—For purposes of subparagraph (A) and with respect to an electronic health record of an individual, a primary use is a use for purposes of the individual's self-care or care by health care professionals.

(C) SECONDARY USES.—For purposes of subparagraph (B) and with respect to an electronic health record of an individual, a secondary use is any use not described in subparagraph (B) and includes a use for purposes of public health research or other related activities. Additional authorization is required for a secondary use extending beyond the original purpose of the secondary use authorized by the IHRT participant involved. Nothing in this paragraph shall be construed as requiring authorization for every secondary use that is within the authorized original purpose.

(2) RULES FOR PRIMARY USE OF RECORDS FOR HEALTH CARE PURPOSES.—With respect to the electronic health record of an IHRT participant (or specified parts of such electronic health record) maintained by an IHRT standards for access to such record shall provide for the following:

(A) ACCESS BY IHRT PARTICIPANTS TO THEIR ELECTRONIC HEALTH RECORDS.—

(i) OWNERSHIP.—The participant maintains ownership over the entire electronic health record (and all portions of such record) and shall have the right to electronically access and review the contents of the entire record (and any portion of such record) at any time, in accordance with this subparagraph.

(ii) ADDITION OF PERSONAL INFORMATION.—The participant may add personal health information to the health record of that participant, except that such participant shall not alter information that is entered into the electronic health record by any authorized EHR data user. Such participant shall have the right to propose an amendment to information that is entered by an authorized EHR data user pursuant to standards prescribed by the Federal Trade Commission for purposes of amending such information.

(iii) IDENTIFICATION OF INFORMATION ENTERED BY PARTICIPANT.—Any additions or amendments made by the participant to the health record shall be identified and disclosed within such record as being made by such participant.

(B) ACCESS BY ENTITIES OTHER THAN IHRT PARTICIPANT.—

(i) AUTHORIZED ACCESS ONLY.—Except as provided under subparagraph (C) and paragraph (4), access to the electronic health record (or any portion of the record)—

(I) may be made only by authorized EHR data users and only to such portions of the record as specified by the participant; and

(II) may be limited by the participant for purposes of entering information into such record, retrieving information from such record, or both.

(ii) IDENTIFICATION OF ENTITY THAT ENTERS INFORMATION.—Any information that is added by an authorized EHR data user to the health record shall be identified and disclosed within such record as being made by such user.

(iii) SATISFACTION OF HIPAA PRIVACY REGULATIONS.—In the case of a record of a covered entity (as defined for purposes of HIPAA privacy regulations), with respect to an individual, if such individual is an IHRT participant with an independent health record trust

and such covered entity is an authorized EHR data user, the requirement under the HIPAA privacy regulations for such entity to provide the record to the participant shall be deemed met if such entity, without charge to the IHRT or the participant—

(I) forwards to the trust an appropriately formatted electronic copy of the record (and updates to such records) for inclusion in the electronic health record of the participant maintained by the trust;

(II) enters such record into the electronic health record of the participant so maintained; or

(III) otherwise makes such record available for electronic access by the IHRT or the individual in a manner that permits such record to be included in the account of the individual contained in the IHRT.

(iv) NOTIFICATION OF SENSITIVE INFORMATION.—Any information, with respect to the participant, that is sensitive information, as specified by the Federal Trade Commission, shall not be forwarded or entered by an authorized EHR data user into the electronic health record of the participant maintained by the trust unless the user certifies that the participant has been notified of such information.

(C) DEEMED AUTHORIZATION FOR ACCESS FOR EMERGENCY HEALTH CARE.—

(i) FINDINGS.—Congress finds that—

(I) given the size and nature of visits to emergency departments in the United States, readily available health information could make the difference between life and death; and

(II) because of the case mix and volume of patients treated, emergency departments are well positioned to provide information for public health surveillance, community risk assessment, research, education, training, quality improvement, and other uses.

(ii) USE OF INFORMATION.—With respect to the electronic health record of an IHRT participant (or specified parts of such electronic health record) maintained by an IHRT, the participant shall be deemed as providing authorization (in the form of affirmative consent) for health care providers to access, in connection with providing emergency care services to the participant, a limited, authenticated information set concerning the participant for emergency response purposes, unless the participant specifies that such information set (or any portion of such information set) may not be so accessed. Such limited information set may include information—

(I) patient identification data, as determined appropriate by the participant;

(II) provider identification that includes the use of unique provider identifiers;

(III) payment information;

(IV) information related to the individual's vitals, allergies, and medication history;

(V) information related to existing chronic problems and active clinical conditions of the participant; and

(VI) information concerning physical examinations, procedures, results, and diagnosis data.

(3) RULES FOR SECONDARY USES OF RECORDS FOR RESEARCH AND OTHER PURPOSES.—

(A) IN GENERAL.—With respect to the electronic health record of an IHRT participant (or specified parts of such electronic health record) maintained by an IHRT, the IHRT may sell such record (or specified parts of such record) only if—

(i) the transfer is authorized by the participant pursuant to an agreement between the participant and the IHRT and is in accordance with the privacy protection agreement

described in subsection (b)(1) entered into between such participant and such IHRT;

(ii) such agreement includes parameters with respect to the disclosure of information involved and a process for the authorization of the further disclosure of information in such record;

(iii) the information involved is to be used for research or other activities only as provided for in the agreement;

(iv) the recipient of the information provides assurances that the information will not be further transferred or reused in violation of such agreement; and

(v) the transfer otherwise meets the requirements and standards prescribed by the Federal Trade Commission.

(B) TREATMENT OF PUBLIC HEALTH REPORTING.—Nothing in this paragraph shall be construed as prohibiting or limiting the use of health care information of an individual, including an individual who is an IHRT participant, for public health reporting (or other research) purposes prior to the inclusion of such information in an electronic health record maintained by an IHRT.

(4) LAW ENFORCEMENT CLARIFICATION.—Nothing in this subtitle shall prevent an IHRT from disclosing information contained in an electronic health record maintained by the IHRT when required for purposes of a lawful investigation or official proceeding inquiring into a violation of, or failure to comply with, any criminal or civil statute or any regulation, rule, or order issued pursuant to such a statute.

(5) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to require a health care provider that does not utilize electronic methods or appropriate levels of health information technology on the date of the enactment of this Act to adopt such electronic methods or technology as a requirement for participation or compliance under this subtitle.

(b) PRIVACY PROTECTION AGREEMENT; TREATMENT OF STATE PRIVACY AND SECURITY LAWS.—

(1) PRIVACY PROTECTION AGREEMENT.—A privacy protection agreement described in this subsection is an agreement, with respect to an electronic health record of an IHRT participant to be maintained by an independent health record trust, between the participant and the trust—

(A) that is consistent with the standards described in subsection (a)(2);

(B) under which the participant specifies the portions of the record that may be accessed, under what circumstances such portions may be accessed, any authorizations for indicated authorized EHR data users to access information contained in the record, and the purposes for which the information (or portions of the information) in the record may be used;

(C) which provides a process for the authorization of the transfer of information contained in the record to a third party, including for the sale of such information for purposes of research, by an authorized EHR data user and reuse of such information by such third party, including a provision requiring that such transfer and reuse is not in violation of any privacy or transfer restrictions placed by the participant on the independent health record of such participant; and

(D) under which the trust provides assurances that the trust will not transfer, disclose, or provide access to the record (or any portion of the record) in violation of the parameters established in the agreement or to any person or entity who has not agreed to

use and transfer such record (or portion of such record) in accordance with such agreement.

(2) TREATMENT OF STATE LAWS.—

(A) IN GENERAL.—Except as provided under subparagraph (B), the provisions of a privacy protection agreement entered into between an IHRT and an IHRT participant shall preempt any provision of State law (or any State regulation) relating to the privacy and confidentiality of individually identifiable health information or to the security of such health information.

(B) EXCEPTION FOR PRIVILEGED INFORMATION.—The provisions of a privacy protection agreement shall not preempt any provision of State law (or any State regulation) that recognizes privileged communications between physicians, health care practitioners, and patients of such physicians or health care practitioners, respectively.

(C) STATE DEFINED.—For purposes of this section, the term “State” has the meaning given such term when used in title XI of the Social Security Act, as provided under section 1101(a) of such Act (42 U.S.C. 1301(a)).

SEC. 847. VOLUNTARY NATURE OF TRUST PARTICIPATION AND INFORMATION SHARING.

(a) IN GENERAL.—Participation in an independent health record trust, or authorizing access to information from such a trust, is voluntary. No employer, health insurance issuer, group health plan, health care provider, or other person may require, as a condition of employment, issuance of a health insurance policy, coverage under a group health plan, the provision of health care services, payment for such services, or otherwise, that an individual participate in, or authorize access to information from, an independent health record trust.

(b) ENFORCEMENT.—The penalties provided for in subsection (a) of section 1177 of the Social Security Act (42 U.S.C. 1320d-6) shall apply to a violation of subsection (a) in the same manner as such penalties apply to a person in violation of subsection (a) of such section.

SEC. 848. FINANCING OF ACTIVITIES.

(a) IN GENERAL.—Except as provided in subsection (b), an IHRT may generate revenue to pay for the operations of the IHRT through—

(1) charging IHRT participants account fees for use of the trust;

(2) charging authorized EHR data users for accessing electronic health records maintained in the trust;

(3) the sale of information contained in the trust (as provided for in section 846(a)(3)(A)); and

(4) any other activity determined appropriate by the Federal Trade Commission.

(b) PROHIBITION AGAINST ACCESS FEES FOR HEALTH CARE PROVIDERS.—For purposes of providing incentives to health care providers to access information maintained in an IHRT, as authorized by the IHRT participants involved, the IHRT may not charge a fee for services specified by the IHRT. Such services shall include the transmittal of information from a health care provider to be included in an independent electronic health record maintained by the IHRT (or permitting such provider to input such information into the record), including the transmission of or access to information described in section 846(a)(2)(C)(ii) by appropriate emergency responders.

(c) REQUIRED DISCLOSURES.—The sources and amounts of revenue derived under subsection (a) for the operations of an IHRT shall be fully disclosed to each IHRT participant of such IHRT and to the public.

(d) TREATMENT OF INCOME.—For purposes of the Internal Revenue Code of 1986, any revenue described in subsection (a) shall not be included in gross income of any IHRT, IHRT participant, or authorized EHR data user.

SEC. 849. REGULATORY OVERSIGHT.

(a) IN GENERAL.—In carrying out this subtitle, the Federal Trade Commission shall promulgate regulations for independent health record trusts.

(b) ESTABLISHMENT OF INTERAGENCY STEERING COMMITTEE.—

(1) IN GENERAL.—The Secretary of Health and Human Services shall establish an Interagency Steering Committee in accordance with this subsection.

(2) CHAIRPERSON.—The Secretary of Health and Human Services shall serve as the chairperson of the Interagency Steering Committee.

(3) MEMBERSHIP.—The members of the Interagency Steering Committee shall consist of the Attorney General, the Chairperson of the Federal Trade Commission, the Chairperson for the National Committee for Vital and Health Statistics, a representative of the Federal Reserve, and other Federal officials determined appropriate by the Secretary of Health and Human Services.

(4) DUTIES.—The Interagency Steering Committee shall coordinate the implementation of this title, including the implementation of policies described in subsection (d) based upon the recommendations provided under such subsection, and regulations promulgated under this subtitle.

(c) FEDERAL ADVISORY COMMITTEE.—

(1) IN GENERAL.—The National Committee for Vital and Health Statistics shall serve as an advisory committee for the IHRTs. The membership of such advisory committee shall include a representative from the Federal Trade Commission and the chairperson of the Interagency Steering Committee. Not less than 60 percent of such membership shall consist of representatives of non-government entities, at least one of whom shall be a representative from an organization representing health care consumers.

(2) DUTIES.—The National Committee for Vital and Health Statistics shall issue periodic reports and review policies concerning IHRTs based on each of the following factors:

(A) Privacy and security policies.

(B) Economic progress.

(C) Interoperability standards.

(d) POLICIES RECOMMENDED BY FEDERAL TRADE COMMISSION.—The Federal Trade Commission, in consultation with the National Committee for Vital and Health Statistics, shall recommend policies to—

(1) provide assistance to encourage the growth of independent health record trusts;

(2) track economic progress as it pertains to operators of independent health records trusts and individuals receiving nontaxable income with respect to accounts;

(3) conduct public education activities regarding the creation and usage of the independent health records trusts;

(4) establish standards for the interoperability of health information technology to ensure that information contained in such record may be shared between the trust involved, the participant, and authorized EHR data users, including for the standardized collection and transmission of individual health records (or portions of such records) to authorized EHR data users through a common interface and for the portability of such records among independent health record trusts; and

(5) carry out any other activities determined appropriate by the Federal Trade Commission.

(e) **REGULATIONS PROMULGATED BY FEDERAL TRADE COMMISSION.**—The Federal Trade Commission shall promulgate regulations based on, at a minimum, the following factors:

(1) Requiring that an IHRT participant, who has an electronic health record that is maintained by an IHRT, be notified of a security breach with respect to such record, and any corrective action taken on behalf of the participant.

(2) Requiring that information sent to, or received from, an IHRT that has been designated as high-risk should be authenticated through the use of methods such as the periodic changing of passwords, the use of biometrics, the use of tokens or other technology as determined appropriate by the council.

(3) Requiring a delay in releasing sensitive health care test results and other similar information to patients directly in order to give physicians time to contact the patient.

(4) Recommendations for entities operating IHRTs, including requiring analysis of the potential risk of health transaction security breaches based on set criteria.

(5) The conduct of audits of IHRTs to ensure that they are in compliance with the requirements and standards established under this subtitle.

(6) Disclosure to IHRT participants of the means by which such trusts are financed, including revenue from the sale of patient data.

(7) Prevention of certification of an entity seeking independent health record trust certification based on—

(A) the potential for conflicts between the interests of such entity and the security of the health information involved; and

(B) the involvement of the entity in any activity that is contrary to the best interests of a patient.

(8) Prevention of the use of revenue sources that are contrary to a patient's interests.

(9) Public disclosure of audits in a manner similar to financial audits required for publicly traded stock companies.

(10) Requiring notification to a participating entity that the information contained in such record may not be representative of the complete or accurate electronic health record of such account holder.

(f) **COMPLIANCE REPORT.**—Not later than 1 year after the date of the enactment of this Act, and annually thereafter, the Commission shall submit to the Committee on Health, Education, Labor, and Pensions and the Committee on Finance of the Senate and the Committee on Energy and Commerce and the Committee on Ways and Means of the House of Representatives, a report on compliance by and progress of independent health record trusts with this subtitle. Such report shall describe the following:

(1) The number of complaints submitted about independent health record trusts, which shall be divided by complaints related to security breaches, and complaints not related to security breaches, and may include other categories as the Interagency Steering Committee established under subsection (b) determines appropriate.

(2) The number of enforcement actions undertaken by the Commission against independent health record trusts in response to complaints under paragraph (1), which shall be divided by enforcement actions related to security breaches and enforcement actions not related to security breaches and may include other categories as the Interagency Steering Committee established under subsection (b) determines appropriate.

(3) The economic progress of the individual owner or institution operator as achieved through independent health record trust usage and existing barriers to such usage.

(4) The progress in security auditing as provided for by the Interagency Steering Committee council under subsection (b).

(5) The other core responsibilities of the Commission as described in subsection (a).

(g) **INTERAGENCY MEMORANDUM OF UNDERSTANDING.**—The Interagency Steering Committee shall ensure, through the execution of an interagency memorandum of understanding, that—

(1) regulations, rulings, and interpretations issued by Federal officials relating to the same matter over which 2 or more such officials have responsibility under this subtitle are administered so as to have the same effect at all times; and

(2) the memorandum provides for the coordination of policies related to enforcing the same requirements through such officials in order to have coordinated enforcement strategy that avoids duplication of enforcement efforts and assigns priorities in enforcement.

TITLE IX—MISCELLANEOUS

SEC. 901. HEALTH CARE CHOICE FOR VETERANS.

Beginning not later than 2 years after the date of the enactment of this Act, the Secretary of Veterans Affairs may—

(1) permit veterans, and survivors and dependents of veterans, who are eligible for health care and services under the laws administered by the Secretary to receive such care and services through such non-Department of Veterans Affairs providers and facilities as the Secretary may approve for purposes of this section; and

(2) pursuant to such procedures as the Secretary of Veteran Affairs shall prescribe for purposes of this section, make payments to such providers and facilities for the provision of such care and services to veterans, and such survivors and dependents, at such rates as the Secretary may specify in such procedures and in such manner so that the Secretary ensures that the aggregate payments made by the Secretary to such providers and facilities do not exceed the aggregate amounts which the Secretary would have paid for such care and services if this section had not been enacted.

SEC. 902. HEALTH CARE CHOICE FOR INDIANS.

(a) **IN GENERAL.**—Beginning not later than 2 years after the date of enactment of this Act, the Secretary of Health and Human Services shall—

(1) permit Indians who are eligible for health care and services under a health care program operated or financed by the Indian Health Service or by an Indian Tribe, Tribal Organization, or Urban Indian Organization (and any such other individuals who are so eligible as the Secretary may specify), to receive such care and services through such non-Indian Health Service, Indian Tribe, Tribal Organization, or Urban Indian Organization providers and facilities as the Secretary shall approve for purposes of this section; and

(2) pursuant to such procedures as the Secretary of Health and Human Services shall prescribe for purposes of this section, make payments to such providers and facilities for the provision of such care and services to Indians and individuals described in paragraph (1), at such rates as the Secretary shall specify in such procedures and in such manner so that the Secretary ensures that the aggregate payments made by the Secretary to such providers and facilities do not exceed the aggregate amounts which the Secretary

would have paid for such care and services if this section had not been enacted.

(b) **DEFINITIONS.**—In this section, the terms “Indian”, “Indian Health Program”, “Indian Tribe”, “Tribal Organization”, and “Urban Indian Organization” have the meanings given those terms in section 4 of the Indian Health Care Improvement Act.

SEC. 903. TERMINATION OF FEDERAL COORDINATING COUNCIL FOR COMPARATIVE EFFECTIVENESS RESEARCH.

The Federal Coordinating Council for Comparative Effectiveness Research is hereby terminated and section 804 of the American Recovery and Reinvestment Act of 2009 establishing and funding such Council is hereby repealed.

SEC. 904. HHS AND GAO JOINT STUDY AND REPORT ON COSTS OF THE 5 MEDICAL CONDITIONS THAT HAVE THE GREATEST IMPACT.

(a) **STUDY.**—The Secretary of Health and Human Services (in this section referred to as the “Secretary”) and the Comptroller General of the United States (in this section referred to as the “Comptroller General”) shall jointly conduct a study on the costs of the top 5 medical conditions facing the public which have the greatest impact in terms of morbidity, mortality, and financial cost. Such study shall include—

(1) current estimates as well as a “generational score” to capture the financial cost and health toll certain medical conditions will inflict on the baby boomer generation and on other individuals; and

(2) a careful review of certain medical conditions, including heart disease, obesity, diabetes, stroke, cancer, Alzheimers, and other medical conditions the Secretary and Comptroller General determine appropriate.

(b) **REPORT.**—Not later than 1 year after the date of enactment of this Act, the Secretary and the Comptroller General shall jointly submit to Congress a report containing the results of the study conducted under subsection (a), together with recommendations for such legislation and administrative action as the Secretary and the Comptroller General determine appropriate.

(c) **TARGETING OF PREVENTION AND WELLNESS EFFORTS.**—The Secretary shall target prevention and wellness efforts conducted under the provisions of and amendments made by this Act in order to combat medical conditions identified in the report submitted under subsection (b), including such medical conditions identified as the top 5 medical conditions facing the public which have the greatest impact in terms of morbidity, mortality, and financial cost as of or after the date of enactment of this Act.

SEC. 905. CONSCIENCE PROTECTION.

(a) **IN GENERAL.**—None of the funds made available in this Act (or an amendment made by this Act) may be made available to a Federal agency or program, or to a State or local government, if such agency, program, or government subjects any institutional or individual health care entity to discrimination on the basis that the health care entity does not provide, pay for, provide coverage of, or refer for abortions.

(b) **HEALTH CARE ENTITY.**—In this section, the term “health care entity” shall include an individual physician or other health care professional, a hospital, a provider-sponsored organization, a health maintenance organization, a health insurance plan, or any other kind of health care facility, organization, or plan.

SEC. 906. NONDISCRIMINATION ON ABORTION AND RESPECT FOR RIGHTS OF CONSCIENCE.

(a) **NONDISCRIMINATION.**—A Federal agency or program, and any State or local government, or institutional health care entity that receives Federal financial assistance under this Act (or an amendment made by this Act), shall not—

(1) subject any individual or institutional health care entity to discrimination; or

(2) require any health care entity that is established or regulated under this Act (or an amendment made by this Act) to subject any individual or institutional health care entity to discrimination;

on the basis that such health care entity does not provide, pay for, provide coverage of, or refer for abortions.

(b) **DEFINITION.**—In this section, the term “health care entity” includes an individual physician or other health care professional, a hospital, a provider-sponsored organization, a health maintenance organization, a health insurance plan, a plan sponsor, a health insurance issuer, a qualified health plan or issuer offering such a plan, or any other kind of health care facility, organization, or plan.

(c) **ADMINISTRATION.**—The Office for Civil Rights of the Department of Health and Human Services is designated to receive complaints of discrimination based on this section, and coordinate the investigation of such complaints.

SEC. 907. PROHIBITION ON GOVERNMENT ENTITIES USING COMPARATIVE EFFECTIVENESS RESEARCH FOR CERTAIN PURPOSES.

Comparative effectiveness research and clinical effectiveness research shall not be used by any government entity for payment, coverage, or treatment decisions based on costs. Nothing in the preceding sentence shall limit a physician or other health care provider from using reports and recommendations of a government entity when making decisions about the best treatment for an individual patient in an individual circumstance.

SEC. 908. SOLVENCY OF MEDICARE PROGRAM.

Any savings achieved under the Medicare program pursuant to the measures developed and implemented by the Secretary of Health and Human Services under this Act (or an amendment made by this Act) shall be reinvested into the Federal Hospital Insurance Trust Fund, as established under section 1817 of the Social Security Act (42 U.S.C. 1395i), or the Federal Supplementary Medical Insurance Trust Fund, as established under section 1841 of such Act (42 U.S.C. 1395t).

SEC. 909. TO ENSURE PATIENTS RECEIVE DOCTOR RECOMMENDATIONS FOR PREVENTIVE HEALTH SERVICES, INCLUDING MAMMOGRAMS AND CERVICAL CANCER SCREENING, WITHOUT INTERFERENCE FROM GOVERNMENT OR INSURANCE COMPANY.

(a) **IN GENERAL.**—Notwithstanding any other provision of law, the Secretary of Health and Human Services shall not use any recommendation made by the United States Preventive Services Task Force to deny coverage of an item or service by a group health plan or health insurance issuer offering group or individual health insurance coverage or under a Federal health care program (as defined in section 1128B(f) of the Social Security Act (42 U.S.C. 1320a-7b(f))) or private insurance.

(b) **DETERMINATIONS OF BENEFITS COVERAGE.**—A group health plan and a health insurance issuer offering group or individual health insurance coverage shall, in determining which preventive items and services to provide coverage for under the plan or coverage, consult the medical guidelines and recommendations of relevant professional medical organizations of relevant medical practice areas (such as the American Society of Clinical Oncology, the American College of Surgeons, the American College of Radiation Oncology, the American College of Obstetricians and Gynecologists, and other similar organizations), including guidelines and recommendations relating to the coverage of women's preventive services (such as mammograms and cervical cancer screenings).

SEC. 910. ENSURING THAT GOVERNMENT HEALTH CARE RATIONING DOES NOT HARM, INJURE, OR DENY MEDICALLY NECESSARY CARE.

Notwithstanding any other provision of law—

(1) no individual may be denied health care based on age or life expectancy by any Federal health program; and

(2) no entity of the Federal Government may develop Quality-Adjusted Life Year measures or other similarly designed government formulas based on an individual's social utility for limiting access to necessary medical treatment.

SEC. 911. IDENTIFICATION OF FEDERAL GOVERNMENT HEALTH CARE RATIONING.

(a) **IN GENERAL.**—The Comptroller General of the United States shall conduct, and submit to Congress a report describing the results of, a study that compares, with regard to the programs described in subsection (b)—

(1) any restrictions or limitations regarding access to health care providers (including the percentage of health care providers willing or permitted to care for patients insured by each program);

(2) any restrictions, denials, or rationing relating to the provision of health care, including medical procedures, tests (including mammograms and cervical cancer screenings), and prescription drug formularies;

(3) average wait times to see a primary care doctor;

(4) average wait times for medically necessary surgeries and medical procedures; and

(5) the estimated waste, fraud, and abuse (including improper payments) in each program.

(b) **PROGRAMS.**—The programs referred to in subsection (a) are—

- (1) Medicare;
- (2) Medicaid;
- (3) the Indian Health Service;
- (4) the Department of Veterans Affairs; and
- (5) the Federal Employee Health Benefits Program.

SEC. 912. USING HEALTH CARE PROFESSIONALS TO REDUCE FRAUD.

(a) **IN GENERAL.**—The Secretary of Health and Human Services (referred to in this section as the “Secretary”) shall establish a demonstration project that uses practicing health care professionals to conduct undercover investigations of other health care professionals.

(b) **DEMONSTRATION PROJECT.**—

(1) **IN GENERAL.**—The Secretary, in coordination with the Office of the Inspector Gen-

eral of the Department of Health and Human Services (referred to in this section as the “Inspector General”), shall establish a demonstration project in which the Secretary enters into contracts with practicing health care professionals to conduct investigations of health care providers that receive reimbursements through any Federal public health care program.

(2) **SCOPE.**—The Secretary shall conduct the demonstration project under this section in States or regions that have—

(A) above-average rates of Medicare fraud; or

(B) any level of Medicaid fraud.

(c) **ELIGIBILITY.**—To be eligible to receive a contract under subsection (b)(1), a health care professional shall—

(1) be a licensed and practicing medical professional who holds an advanced medical degree from an accredited American university or college and has experience within the health care industry; and

(2) submit to the Secretary such information, at such time, and in such manner, as the Secretary may require.

(d) **ACTIVITIES.**—Each health care professional awarded a contract under subsection (b)(1) shall assist the Secretary and the Inspector General in conducting random audits of the practices of health care providers that receive reimbursements through any Federal public health care program. Such audits may include—

(1) statistically random visits to the practices of such health care providers;

(2) attempts to purchase pharmaceutical products illegally from such health care providers;

(3) purchasing durable medical equipment from such health care providers;

(4) hospital visits; and

(5) other activities, as the Secretary determines appropriate.

(e) **FOLLOW-UP BY THE INSPECTOR GENERAL.**—The Inspector General shall follow up on any notable findings of the investigations conducted under subsection (d) in order to report fraudulent practices and refer individual cases to the appropriate State and local authorities.

(f) **LIMITATION.**—The Secretary shall not contract with a health care professional if, due to physical proximity or a personal, familial, proprietary, or monetary relationship with such health care professional to individuals that such professional would be investigating, a conflict of interest could be inferred.

(g) **FUNDING.**—To carry out this section, the Secretary and the Inspector General are each authorized to reserve, from amounts appropriated to the Department of Health and Human Services and the Office of the Inspector General of the Department of Health and Human Services, respectively, \$500,000 for each of fiscal years 2010 through 2014.

ADJOURNMENT UNTIL 1 P.M.
TOMORROW

The PRESIDING OFFICER. Under the previous order, the Senate stands adjourned until 1 p.m. tomorrow.

There upon the Senate, at 5:34 p.m., adjourned until Sunday, December 20, 2009, at 1 p.m.

EXTENSIONS OF REMARKS

ON THE RETIREMENT OF SENATOR
JERAHMIEL "JERRY"
GRAFSTEIN OF CANADA

HON. ALCEE L. HASTINGS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 19, 2009

Mr. HASTINGS of Florida. Madam Speaker, as Co-Chairman of the US Commission on Security and Cooperation in Europe (the Helsinki Commission), and a former President of the OSCE Parliamentary Assembly, it is bitter-sweet that I rise today to honor the retirement of one of this nation's closest friends north of our border. Senator Jerahmiel "Jerry" Grafstein of Canada is well known to many in this House. To me, he has been a mentor, friend, and colleague for the past 15 years or so. Senator Grafstein ends his service to the Canadian Senate this month. The distinguished Chairman of the Helsinki Commission, my very good friend BEN CARDIN of Maryland, recently gave an eloquent tribute on the Senate floor to Jerry Grafstein. Rather than try to be redundant to what Chairman CARDIN has already said, I thought to honor Senator Grafstein by sharing with this House his insightful final speech in the Senate of Canada. I hope my colleagues will read it and learn from it for years to come. Let me finally say to Sen. Grafstein that I thank him for his service to his country, his friendship to our country, and his tireless work on behalf of humanity. I look forward to seeing him in Washington or the great State of Florida sometime very soon.

SENATE OF CANADA, DECEMBER 9, 2009

HON. JERAHMIEL S. GRAFSTEIN: Honourable senators, thank you for those most generous words. My late father would have been surprised. My late mother would have said, "Not nearly enough." Honourable senators, I have always been curious about the words, "maiden speech." By custom, it designates the first speech a parliamentarian makes when a parliamentarian enters a house of Parliament. What do we call a farewell speech in Parliament when we are no longer a maiden? I leave that to honourable senators' imagination.

It has been over 25 years since I was first summoned to the Senate by Mr. Trudeau. When he called to appoint me, he said, "We need you in the Senate; take your time, Jerry, to think about it." I told the Prime Minister I did not need any time, that I accepted. "This is the greatest honour anyone has ever bestowed on me," I told him. "However, Prime Minister, I do have one question." Mr. Trudeau laughed. "What is your question, Jerry?" he asked. I asked, "What did you mean when you said, 'We need you in the Senate'?"

Mr. Trudeau laughed again and I heard the phone drop. A second later he apologized and said he did not mean to laugh. He said, "Jerry, you are the very first person I have ever appointed who asked me why." "Well,

Prime Minister, why?" I repeated. "Why am I needed in the Senate?" He responded so graciously, and he said these words—I made notes at the time: "You have provided me with great ideas. Now I want you to use the Senate as a platform to share those ideas with the Canadian public."

Honourable senators, I have tried. Sometimes I succeeded. Many times I failed. However, I have been motivated by three pieces of advice that Mr. Pearson gave me when I first entered politics and I sat beside him. He told me these three things: Aim high, work hard, and be fair. Some time before my appointment, Mr. Trudeau told me at a meeting, "Jerry, you have great ideas, but you have not overcome one problem that you have." "What is that?" I said. "I do not have any problems."

"Yes, you do," he said. "Each time you advocate a great idea, automatically and spontaneously, a coalition of 'antis' spring up to fight any good idea. Your job as a politician is to navigate around that coalition and get to the other side." Then he said these words that I have never forgotten: "Never give up."

Honourable senators, each day when I awake at the Chateau Laurier, I say a short Hebrew prayer: *Modeh ani Lefanecha*—Thank God who has awakened my soul to live another day. I walk a hundred steps from the Chateau Laurier across the historic bridge over the Rideau Canal and look up to the statue of my great political hero, as Senator Munson mentioned, Sir Wilfrid Laurier, and give him a morning salute. Then I take another hundred steps, past the East Block, and the most beautiful building in Canada looms into sight. What a sight it is.

I see the Parliament buildings, the Peace Tower and, on top of it, the Canadian flag flying. I remember the courage of Mr. Pearson, who introduced the flag in the face of great division in this country. I swear every morning that I will do my very best that day for the privilege of serving in the Senate and here in Parliament. Honourable senators, I have served under eight Prime Ministers and twelve leaders in the Senate. I want to thank all of my colleagues, but especially the current deputy leaders, Senator Tardif and Senator Comeau, who have the most complex jobs in the Senate. I want to say how much I admire both of them.

Hon. Senators: Hear, hear.

Senator Grafstein: Of course, I salute my own leader, the graceful Senator Cowan, and the Leader of the Government in the Senate, Senator LeBreton, both of whom lead us here so very ably. Thank you so much. May I thank the reporters who have reproduced—do not be shocked—almost 5 million words of my speeches, resolutions, comments and reports. I would be remiss if I did not mention the researchers of the Library of Parliament who have responded to my needs. To Mark Audcent and to the legislative staff who drafted my bills, motions and resolutions with skill and professionalism, I thank you.

For the many courtesies offered to me by the Speaker, his predecessors, by the Deputy Speaker, and to all the table officers, my sincere appreciation for your patience and advice. I have learned much from all of you. Of course my special appreciation goes to my

executive assistant, who is sitting up in the gallery, Mary de Toro, who leads my mighty staff of one, the wisest woman on Parliament Hill who has kept me from making disastrous mistakes.

My first decision when I came to the Senate was what name and what designation I should use as senator. I chose my first given name, Jerahmiel, although people have called me Jerry. People have been curious about why that name and not my customary name, Jerry. Jerahmiel is mentioned only once in the Bible. He was the son of the last King of Israel. The name means "the mercy of God." It is meant to remind the holders of that name to remember that they are here to help the less fortunate. My other designation as senator is Metro Toronto, to remind me of the great city of Toronto and the regional base of the key of my responsibilities here.

What lessons have I learned in the Senate? Honourable senators, I will not predict the future. I have always worked hard in the past and in the present. In the process, I became a much better criminal lawyer, a substantial constitutional lawyer, as my friend Senator Nolin has become, and an expert international lawyer. The future, honourable senators, I leave to you.

The precious gift that the Fathers of Confederation bestowed on the Senate and senators was independence and the freedom to make choices. That is what Sir John A. Macdonald and the Fathers of Confederation gave each and every one of us. Most of my choices I shared with my party and my leader, and sometimes I disagreed and did as Mr. Trudeau advised, spoke my mind to the discomfort at times of my leaders and my colleagues on this side.

I have served on all the committees of the Senate, and I have been kicked off several committees several times when I did so, and I do not regret it. I always believed that the Senate acts best when it is true to its mandate as a chamber of second sober thought. The Senate has always made mistakes when there has been a rush to judgment. "Principles and pragmatism," so said Lloyd George, "march best when they march together."

This chamber, following the teachings of the great Blackstone, is a chamber dedicated to checks and balances. To check and balance the executive and the other house of Parliament is our constitutional mandate. Hence, we should not place our trust blindly in government. Governments do what they do and do what they want and do what they must. It can be best summed up in Psalm 146: "Put not your trust in princes." We are here to speak truth to power. That is our constitutional duty.

I recall my maiden speech when I advocated an apology to Canadians of Japanese descent. Mr. Trudeau, who had just appointed me, disagreed. He argued that we cannot correct the past but can only improve the future. I disagreed with him on the facts. Citizens of Japanese origin had been deprived of their rights and property during the war, and there was no evidence whatsoever provided to me or to the Prime Minister at the time to call in or question their loyalty to Canada. I advocated for an apology, and ultimately it was given by Brian Mulroney, and I respect him for that.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

I recall the extradition bill, as Senator Joyal pointed out, passed by a Liberal government in haste, with barely a debate in the other place. Under that bill, the Liberal Attorney General of Canada of the day would have had the power to extradite Canadians to a state that practiced capital punishment even though Parliament had abolished capital punishment under Mr. Trudeau after a fantastic and unbelievable fight across the country. The government wanted that bill. They wanted it then. They urged it was important because of pending decisions.

I disagreed, and so did my colleague Senator Joyal. Together, with other colleagues in this chamber, we kept that debate going for several months, but finally we succumbed to our leadership and to government pressure. Senator Joyal and I decided to make our arguments in the Senate at third reading as if we were arguing before the Supreme Court of Canada because we felt that that bill would be ultimately challenged and would be shown to be unconstitutional. We sent the Senate Hansard, a public document, to all the judges of the Supreme Court, and we were so pleased over a year later when the Supreme Court of Canada upheld our major arguments.

I remember another important debate on a resolution introduced in the other place declaring Quebec "a distinct society." The government introduced that resolution here shortly after the referendum. I angered my colleagues on this side, I angered the Prime Minister, I angered the leader of the Senate, my great friend Allan MacEachen, and other colleagues on this side, when I refused to support that resolution. I gave the shortest speech I have ever given in the Senate, and I repeat it here now: Canada is a distinct society. All the rest is commentary.

While Quebecers are different, so are Newfoundlanders, so are Acadians, so are hundreds and hundreds of Aboriginal tribes and many other groups in Canada. Honourable senators, I believed then and I believe now in one Canada, bilingual and multicultural—one Canada.

One of my most stimulating periods was as chairman of the Standing Senate Committee on Banking, Trade and Commerce with Senator Angus as my congenial deputy chairman. Together, with a total consensus of all members on both sides, we did a number of important, sharp and pointed studies dealing with consumer protection of the financial securities sector, the volunteer and charitable sector, the demographic time bomb, stemming the flow of illicit money to Canada and others.

Hopefully the work we commenced on hedge funds and derivatives, started well before the last financial meltdown, and the work on reducing interprovincial trade barriers to make Canada one dynamic competitive marketplace will be completed by others in the Senate. Being a Canadian senator offers unique opportunities to travel and to participate in international affairs. One of my most satisfying experiences has been as co-chairman of the Canada-U.S. Inter-Parliamentary Group. I was elected to that office by members of Parliament in both houses for eight successive terms and served for over 16 years in that position.

The Canada-U.S. Inter-Parliamentary Group was founded in 1959 and recently celebrated its fiftieth anniversary. During my term in office, with the support of colleagues on all sides, bipartisan, we transformed that organization from one annual meeting with the Americans to an active, vigorous advocacy group meeting with state legislators,

governors in every corner of America, in addition to regular meetings on Capitol Hill in Washington with congressmen and senators to advocate one thing, Canada's interest. We learned that all politics is local, and so we have to work at the local level in the United States, and hence our meeting with state officials and governors. All problems in the United States affecting Canada start at the local level and, if detected early enough, can be diluted if not resolved.

After each meeting, honourable senators, as I will do later today, we tabled a complete report of our activities to the Senate to ensure that the senators who were interested could benefit from our experience. We were not there to represent ourselves. We were there to represent Canada, and that is why we tabled these reports. I want to thank my current co-chair in the house, Gord Brown, and my current American co-chairs, Senator Amy Klobuchar of Minnesota and Congressman James Oberstar of Minnesota, who is the only member of our group who has served the Canada-U.S. Inter-Parliamentary Group longer than I.

When I first came to the Senate, I was able to travel to a number of international organizations consistent with my work on the Standing Senate Committee on Foreign Affairs and International Trade, where I and my colleague Senator Stollery have been the longest serving members. I decided that I would focus my activities where Canada and the United States both had a vote, the Organization for Security and Co-operation in Europe, Parliamentary Assembly, which flowed out of the Helsinki Accord in 1974, currently with 56 member states from Vladivostok to Vancouver.

There I became an active member on the executive and served as an elected member for 15 years. This organization is the largest parliamentary assembly dedicated to human rights, economic rights and democratic rights in the world. I became a witness to history serving as one of the heads of election monitoring in Russia, Ukraine during the Orange Revolution, Georgia during the Rose Revolution and on the Independence Referendum for Montenegro and many others. Senator Di Nino has also served on a number of those committees with great skill and expertise.

I learned how precious democracy is and how important democracy building is for the future of the world. I worked closely with elected presidents of the assembly, and I want to pay special tribute to two recent presidents: Congressmen Alcee Hastings of Florida and João Soares, the head of the Portuguese Delegation and current Vice-President of the OSCE Parliamentary Assembly, who have done outstanding work travelling the length and breadth of the OSCE space. We have become great personal friends.

A sparkplug in this organization, which is headquartered in Copenhagen, is Spencer Oliver, the long-serving Secretary General, who is the most brilliant and knowledgeable American I have ever met, with a deep and penetrating insight into foreign affairs. He has become one of my closest friends in public life. While at the OSCE PA, I served as leader of the Liberal group there, and I finally resigned this year after 12 years. They elected me as Liberal Leader Emeritus Perpetual, a title I will cherish all my life. I do not kid myself: I achieved these offices overseas because I was Canadian, because the world respects Canada and Canadians who represent Canada.

I think the Senate should have a brief explanation, particularly those senators who

have been mildly critical of the numerous OSCE resolutions combating anti-Semitism on the Order Paper that I tabled and that are still on the Order Paper. Why those many resolutions? After the Berlin Wall came down in 1989—and I was in Germany before and after the wall came down—I thought I would finally close my dossier on anti-Semitism. There was hope for a new world order. But it was not to be. The UN had passed an invidious resolution equating Zionism with racism.

Anti-Semitism was on the rise not only across the face of the earth and around the globe, not only across Europe, but also in South America and in Canada. In 1994, a diligent congressman from New Jersey, Chris Smith, approached me to work on a resolution to combat anti-Semitism and to present it to the OSCE parliamentary assembly annual meeting. I agreed. We were joined by Congressman Steny Hoyer, now the majority leader of the Congress and one of the most powerful men in the United States, a good friend; Congressman Alcee Hastings; Congressman Ben Cardin, now a senator from Maryland; Gert Weisskirchen of the German Parliament and parliamentarians from Italy, France, Austria, Ukraine, Poland and others.

That first resolution was passed by a bare majority. Thereafter, across the face of Europe, in Copenhagen, twice in Berlin, Oporto, Cordoba, Rotterdam, Edinburgh, Vienna, London, Rome, St. Petersburg, Kazakhstan, Madrid, Washington and so forth, we continued the thrust of those resolutions, parliamentary, ministerial and side meetings.

There were two chilly experiences. I spoke on these resolutions in the Berlin Reichstag at the very podium where Hitler had declared the Nuremberg Laws in 1933. I spoke in the Hofberg Palace at the very same place in Vienna where Hitler announced the Anschluss between Germany and Austria in 1938 that most historians agree ignited World War II. This work continued, meeting after meeting, and finally, honourable senators, I brought one of these resolutions to the Senate in 2002. It was passed in 2004 and was referred to the Standing Senate Committee on Human Rights. That committee held meetings for a day or so, and then, without explanation, decided not to complete its work.

It is the first time I can recall that a resolution passed by the Senate was not followed by a committee of the Senate. I urged members of the committee to complete their work, but without success. I decided to put down resolution after resolution on the Order Paper until there could be some closure and conclusion to this matter. I was pleased some years ago that the UN would use those very resolutions to hold a one-day conference on anti-Semitism, the first of its kind at the UN. I was delighted when the British Parliament did a landmark study on this topic several years ago and published it. I am pleased that, finally, parliamentarians on the other side, under the leadership of Mario Silva and Scott Reid, are holding hearings on combating anti-Semitism. I live in hope that the Senate will consider its findings and add its considerable expertise and credit to its recommendations.

I have learned two things about this topic, "anti-Semitism," the oldest of all prejudices. First, that discrimination starts with Jews, but never ends with Jews, as one great Danish Prime Minister once said. Second, what to do? Education is the answer. The Nobel Prize winner Elie Wiesel said these words at the Berlin conference: "You can teach a child to love or you can teach a child to hate." So education is an answer. A word

about Senator Di Nino: I admire very much his work with respect to human rights not only at the OSCE but also with respect to the Dalai Lama. He has been a great and compatible companion at the OSCE, and he will continue to do great and important work over there. My congratulations to him.

Senators, I am coming to the close, but before I end, I would like to say a word about the current atmosphere in the Senate that I dislike. While I am as partisan—as everyone knows—as any senator, and will vigorously attack on behalf of my party and on behalf of my principles, I also believe in political companionship and congeniality that rises above partisan politics. I do not enjoy those who downgrade the Senate, the institution we are all privileged and summoned to serve. I have made good friends on both sides of the aisle here and in the other place. I take my leave of this hallowed hall with no regrets. I tried my best, and if I failed, I have failed trying to do my best.

Honourable senators opposite will forgive me if I remind them that my great parliamentary hero was and is Sir Winston Churchill, whose printed works and speeches I have read avidly. When Britain was in the most desperate straits in the early part of World War II, he gave this advice to his colleagues, and this is my advice to my colleagues on this side: KBO, keep buggering on. As for my colleagues on the other side, I recall that Sir Winston Churchill in his dotage confessed that he had always been a Liberal. Good advice.

If I have succeeded, I owe it to my late father and the great mentors I have encountered in politics: Mr. Pearson, Mr. Trudeau, Mr. Turner, Mr. Chrétien and Mr. Martin, and, of course, Keith Davey, our former col-

league, who taught us all on this side to love the Liberal Party. I will not say goodbye, but au revoir. On January 2, I start my third act. Regretfully, you have not heard the last of me yet. To my wife who might feel trepidation on my return to Toronto: Do not worry. I have lots of new projects that will keep me eternally occupied. All the very best to all of you, Godspeed and thank you so much.

IN HONOR AND REMEMBRANCE OF
LEO A. DIEGIDIO

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 19, 2009

Mr. KUCINICH. Madam Speaker, I rise today in honor and remembrance of Leo A. “Lal” DiEgidio; devoted husband, father, grandfather, great-grandfather, great-great grandfather and dear friend to many. His generosity, concern for others and gift for singing uplifted countless people throughout our community.

Mr. DiEgidio’s life was centered on family, faith, hard work and his love of song. For more than forty years, he lifted the spirits of people of all ages with his beautiful singing voice. Mr. DiEgidio volunteered his time and talents by visiting nursing homes and singing for residents and staff. During many of these visits, he sang with another local celebrity singer, Rocco Scotti. Mr. DiEgidio directed the

choir at Gunning Park Golden Age Center in Cleveland, and was a founding member of the Choir at Holy Name Church, where he sang for nearly eighty years. Mr. DiEgidio often sang duets with the late Father John Dalton, whose favorite was “Danny boy.” Mr. DiEgidio was also known for his powerful versions of “The Star Spangled Banner” and “God Bless America.”

Mr. DiEgidio lived his life with a spirit of generosity, a compassion for others, and a joy of living. His quick smile easily drew others to him. He was a devoted husband to the late Harriette, and was a devoted father to the late Leo, Ronald and Lalene. Together, Lal and Harriette worked hard to provide a wonderful and loving home for their family. In 1951, he established Lal’s Cleaners and Tailors on Garfield Boulevard in the heart of Garfield Heights, Ohio. Now owned by his grandson, the business continues. Mr. DiEgidio was active in the Italian-American community of Garfield Heights. He was a longtime member of the Knights of Columbus Council and the Solon Italian-American Club.

Madam Speaker and colleagues, please join me in honor and remembrance of Leo A. “Lal” DiEgidio, whose joyous spirit and love for others will exist forever within the hearts and memories of those who loved and knew him best—his family and friends. His life, framed by his gift of song, compassion for others, devotion to family and commitment to community, will be always celebrated and remembered.

SENATE—Sunday, December 20, 2009

The Senate met at 1 p.m. and was called to order by the Honorable JEANNE SHAHEEN, a Senator from the State of New Hampshire.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Most merciful God, the fountain of wisdom and goodness, on this snowy weekend, guide our lawmakers with Your insights. When confused thoughts emerge, clarify and straighten them with Your wisdom. Bring their desires and powers into conformity to Your will. May their lives be as lighted windows amid the encircling gloom. Lord, save them from a cynical pessimism by reminding them that these challenging times are in Your Hands. Strengthen their resolve to press on with focused attention on the duties of this day.

Bless also the many unseen workers who support our Senators with sacrificial and faithful labors. Lord, reward them for their diligence and patriotism.

We pray in Your merciful Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable JEANNE SHAHEEN led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The bill clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 20, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JEANNE SHAHEEN, a Senator from the State of New Hampshire, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mrs. SHAHEEN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Madam President, following leader remarks, the Senate will resume consideration of the health care legislation, with the time until 1:30 p.m. equally divided and controlled between the two leaders or their designees. Beginning at 1:30 p.m., and until 11:30 p.m. tonight, the time will be controlled in alternating hours, with the Republicans controlling the first hour.

At 11:30 p.m., the Senate will recess until 12:01 a.m., with the time until 1 a.m. equally divided and controlled between the leaders or their designees, with the majority leader controlling the final 10 minutes and the Republican leader controlling the 10 minutes prior to that.

At 1 a.m., tomorrow, the Senate will vote on the motion to invoke cloture on the managers' amendment to the health care bill.

Madam President, the time I have until 1:30 p.m., I designate to the majority whip, the senior Senator from Illinois.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

SERVICE MEMBERS HOME OWNERSHIP TAX ACT OF 2009

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of H.R. 3590, which the clerk will report.

The bill clerk read as follows:

A bill (H.R. 3590) to amend the Internal Revenue Code of 1986 to modify the first-time home buyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

Pending:

Reid amendment No. 2786, in the nature of a substitute.

Reid amendment No. 3276 (to amendment No. 2786), of a perfecting nature.

Reid amendment No. 3277 (to amendment No. 3276), to change the enactment date.

Reid amendment No. 3278 (to the language proposed to be stricken by amendment No. 2786), to change the enactment date.

Reid amendment No. 3279 (to amendment No. 3278), to change the enactment date.

Reid motion to commit the bill to the Committee on Finance, with instructions to report back forthwith, with Reid amendment No. 3280, to change the enactment date.

Reid amendment No. 3281 (to the instructions (amendment No. 3280) of the motion to commit), to change the enactment date.

Reid amendment No. 3282 (to amendment No. 3281), to change the enactment date.

The ACTING PRESIDENT pro tempore. Under the previous order, the

time until 1:30 p.m. shall be equally divided and controlled between the two leaders or their designees.

The Senator from Illinois.

Mr. DURBIN. Madam President, I thank the majority leader for designating that I should control half the time between now and 1:30.

I would like to, first, thank all the people who are here, the staff and the pages. This has been a tough session for many but tougher for many of them than some Members of the Senate because many times they have had to wait until the very last Senator of either political party has finished for the day before they go home. I was reflecting on that yesterday afternoon in the midst of one of the toughest, historic snowstorms in Washington, DC; that hundreds of staff people were waiting at their post, doing their jobs on a Saturday, in the middle of a snowstorm, when virtually every business around Washington was closing down. I wish to thank them and the pages on both sides of the aisle for their patience and commitment to this great country and this great institution.

Why are we here on Sunday? Why were we here on Saturday? Why are we going to take a vote at 1 in the morning on Monday? Good questions, and I am not sure there are satisfying answers. But there are answers. We are here because we are trying to finish health care reform. It has been a project that has been underway for almost a year now, since the President challenged us to do something, and a lot of effort has been expended on both sides of the aisle. But I will say I can speak for our side of the aisle.

Senator MAX BAUCUS came to me more than a year ago and sat down in my office to talk about health care reform. He was preparing for this battle as chairman of the Senate Finance Committee and knew he would play a central role, gathering the opinions of members of his committee and Members of the Senate.

Efforts were underway with Senator Kennedy from his remote location in Massachusetts, recuperating from surgery and from cancer therapy, trying to keep his committee on track toward health care reform. He turned over that mantle to Senator CHRISTOPHER DODD of Connecticut, who did an admirable job with the Senate Health, Education, Labor, and Pensions Committee.

They prepared for and had hearings. They entertained hundreds of amendments. In fact, I believe there were over 160 amendments that were proposed by the Republicans, and many of

them were adopted in the HELP Committee.

Senator COBURN of Oklahoma filed 212 amendments during the HELP Committee markup. He offered 38 amendments to the bill. Nineteen of his amendments—half of them—were agreed to. Of those that were offered, 15 were not agreed to—all by rollcall vote. So 13 amendments offered by the Senator from Oklahoma were included in the bill that is before us today.

He has questioned whether the current procedure gives him an opportunity to offer amendments. The fact is, we are now on our 21st day of considering health care reform. Exactly 4 amendments have been offered by the Republican side of the aisle, 4 substantive amendments to change provisions in this bill of 2,000 pages—in 21 days, 4 amendments. They offered six motions to stop the debate, send the bill back to committee. They were generic motions. They did not ask for specific changes. They just take on an issue in the bill and say: Send it back to the committee and tell them to solve this problem and then bring it back to the floor at a later time. Well, that is kind of a procedural and, if I might say, political statement more than a substantive statement about a provision in the bill.

So exactly four amendments have been offered by the Republican side of the aisle that deal with substance. Some of their efforts have been in protection of the health insurance industry, particularly a program called Medicare Advantage, which was created by private health insurance companies to prove to government they could provide Medicare more cheaply.

Some did but most did not, and now we are paying up to \$17 billion a year subsidizing private health insurance companies that told us at the start: We will save you money. It turns out they are costing us money—a lot of money—and many of us think it is wasteful. We would rather have that money spent on basic Medicare, making certain there is solvency in Medicare and a good, strong future.

So when you look at the state of the situation, we are now on a cloture motion to bring a close to the debate on health care reform, after almost 3 weeks and four Republican amendments—only four were offered. There never was a Republican substitute, no Republican proposal for health care reform. We have been told this might exist. We have never seen it. Of the four amendments they offered, not one was this substitute that was going to deal with the health care system. It is a promise that has not been kept. They kept saying: It is coming. Pretty soon we are just going to put this thing right in the RECORD. Well, it never happened. In 3 weeks, it never happened.

It is hard work to prepare a substitute. The reason this took so long

and has dragged on for so long is we had to take every page of this and turn it over to the Congressional Budget Office. They sit there with their economists, pore over it and say: Well, is it going to add to the deficit or reduce the deficit? Is it going to reduce health care costs? What is the impact? It takes them some time to do that. The Republicans know if they are going to have a substitute, it will have to go through the same rigorous appraisal, and they have not done that, I think because it is hard. In fact, from their political point of view, it might be impossible to try to solve the problems facing health care in America without taking the path we have taken.

What does this bill do? The basics are obvious. First,—and this is all backed up by the Congressional Budget Office—it will reduce the cost of health care. It will make it more affordable. A health care policy for a family of four offered by an employer, on average, cost \$6,000 10 years ago. Today, it costs \$12,000 a year. It has doubled in 10 years, and in 8 years it will double again to \$24,000. We have to slow this down or it will reach a point where more and more people will be uninsured, fewer businesses will offer health insurance, and more individuals will find themselves unable to afford the basic protections they need for themselves and their families.

So the Congressional Budget Office tells us we reduce the growth in the cost of health care, and that is a good thing. They came through with a dramatic revelation yesterday when they said this bill will reduce our deficit as well. If the cost of health care goes down, the cost of health care programs offered by government goes down. They tell us in 10 years we will save \$130 billion from the deficit. That is a dramatic savings—the largest in history. But then the news got better. They said, in the second 10 years, instead of saving \$650 billion from our debt and deficit, it could reach double that amount: \$1.3 trillion in savings in the second 10 years.

I would say to those who give speeches day after day about our deficit, I invite you—in fact, I challenge you to come up with a bill that does this, that gives us actual savings of \$130 billion in 10 years and \$1.3 trillion in the next 10 years. It is hard to do. It may be impossible for some to come up with such a bill.

This bill also will extend the coverage of health insurance so 94 percent of Americans will have coverage. Madam President, 30 million Americans today who have no health insurance will have health insurance under this bill. Half of them are poor enough that they will receive Medicaid; the other half will qualify for the insurance exchanges and other tax credits to help them pay their premiums so they can have and afford health insurance.

Ninety-four percent of Americans—we have never, ever achieved a level of insured Americans that reached that number. Thirty million Americans will be receiving health insurance at the end of the day.

This bill will start giving consumers across America protections they need against abuses from health insurance companies. One of the things near and dear to my heart about this amendment, which has been criticized by some, is this amendment, which was offered yesterday, has been on the Internet, for those who are interested to read it, for 24 hours, and will continue to be available.

This amendment says that as soon as this is signed, health insurance companies across America cannot deny coverage to children, those under the age of 18, because of a preexisting condition. That means if your son or daughter is diagnosed with diabetes, juvenile diabetes, and you find it difficult to get health insurance today because of that preexisting condition, they will no longer be able to discriminate against your child and your family because of this bill. That is one thing. There are many others.

This whole notion of health insurance companies waiting until you get sick and cut you off when you need them the most, that comes to an end, under this amendment, in 6 months. So over and over again, we give consumers across America a chance to have the coverage they paid for when they need it the most. We used to call it the Patients' Bill of Rights, and it used to be bipartisan. It was Senator Kennedy and Senator MCCAIN who brought it to us, and it failed because the health insurance companies were so politically powerful. But we have got them this time. If we can pass this bill, we finally have the protections the American people so desperately need.

There are other provisions in the bill. Right from the beginning, we provide more help to small businesses. These are businesses with 50, 25 employees and an average payroll of \$50,000 an employee to \$25,000 an employee or less. For each of those businesses, we say: We are going to help you buy health insurance for the owners of the business as well as for the employees. Those are the folks who are struggling and losing coverage, people such as the realtors in your hometown. Did you know one out of four realtors in America has no health insurance. I did not know it until they came to see me. Well, this gives them a hand. It gives them a tax break as a small business to provide health insurance for their people.

I am going to reserve the remainder of my time. I will tell you, we are here today. We are burning the hours off the clock to vote at 1 a.m. in the morning. It would be more humane to the people who work here, to the Members of the Senate and their families, for us to

reach a gentlemanly and gentlewomanly agreement that we will have this vote at a more reasonable time. If we have the 60 votes, which I think we have the commitments for, then we can decide how to move forward.

We have had a long, arduous, and sometimes taxing debate leading to this moment. I think it is time for a vote. The sooner we can reach that vote, the sooner the American people will know that we will either succeed or fail in bringing stability and security when it comes to their health insurance, making that health insurance more affordable, extending the reach and protection of health insurance to record levels of Americans, making sure we have health insurance reform as part of this, and at the same time, at the very same time reducing our deficit.

I reserve the remainder of our time.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. DURBIN. Madam President, how much time do I have remaining?

The ACTING PRESIDENT pro tempore. There is 1 minute 50 seconds.

Mr. DURBIN. Madam President, I wish to suggest the absence of a quorum and ask unanimous consent that the time under the quorum be allotted equally to both sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant bill clerk (Sara Schwartzman) proceeded to call the roll.

Mr. CHAMBLISS. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CHAMBLISS. Is it correct, Madam President, the minority side has the hour from 1:30 to 2:30?

The ACTING PRESIDENT pro tempore. That is correct. Under the previous order, the time until 11:30 p.m. shall be controlled in alternative 1-hour blocks with the Republicans controlling the first hour.

Mr. CHAMBLISS. I, then, Madam President, ask unanimous consent Senators CORNYN, GRAHAM, ISAKSON, and myself be allowed to have a colloquy during this first hour, from 1:30 to 2:30.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CHAMBLISS. Madam President, here we are on our 21st legislative day, less than 4 weeks, on the most major piece of health care legislation ever proposed in the history of our great country. That is less than weeks that we have been on this bill that seeks to change the way health care is delivered in America and also seeks to change the way individuals have access both to health care itself as well as to insur-

ance. During this period of time—and we are headed, I might say, too, toward passage of this bill in the Senate over the next couple of days.

I do not remember, in my 15 years in the Congress, both in the House and in the Senate, any major piece of legislation such as this being debated and ultimately brought to a final vote within such a short period of time. I have been involved in farm bills that have been on the Senate floor for longer than this—any number of other pieces of legislation that we deal with on a regular basis that have been on the Senate floor for longer than that period of time.

I heard the assistant majority leader a little earlier talking about the fact that we have had the opportunity to amend this bill. The fact is, the Republicans have been offered the opportunity to introduce 10 amendments to this massive piece of legislation for debate on the floor. We have a number of other amendments that have been filed. The four of us here today have significant amendments that we filed that now we are not going to have the opportunity to call up. It is extremely unusual for such a massive change in American policy being debated and voted upon without not only bipartisan support but without bipartisan participation from the standpoint of giving us the opportunity to file amendments, to have those amendments debated and voted upon.

The assistant majority leader also referenced amendments by Senator COBURN. I am not going to speak for him. He will be on the floor of the Senate later today to certainly speak well for himself. But the fact is, he and other Members of the HELP Committee offered any number of amendments, as well as Members of the Finance Committee offered any number of amendments, that were voted down in the HELP Committee and in the Finance Committee on a pure partisan vote.

It was the opportunity for meaningful participation by Republicans, who have some pretty good ideas about health care, to participate in the development of this bill, and it simply did not happen.

Let me say what Republicans are for. There have been comments on this floor that there has been no substitute bill offered. The fact is, Senator BURR and Senator COBURN, who will be on the floor a little bit later, have spent hours on the floor of this Senate talking about their proposed bill that is not going to see the light of day. It has never been allowed to come up in committee, and it is not going to be allowed to come up on the floor of the Senate because the majority leader has done what we call fill the tree. That is the Washington speak way of saying that all amendments are now cut off. There will be no more additional

amendments debated and brought up for a vote. But that is just one of four separate plans that have been filed and laid on the table, not just for the last 72 hours but for the last several months. They have been available to look at online. There are any number of cosponsors to the bipartisan Wyden-Bennett bill. There is also the Gregg bill. There is the Coburn-Burr bill. There are any number of alternate proposals out there that the majority has simply decided: We do not think those bills are worth even debating on the Senate floor, so they have not allowed those bills to come up.

But what are Republicans for? We have said this over and over. Let me just say, No. 1, we are for meaningful, affordable access to health insurance by every single American. We can do it in a way that does not raise taxes. We are for providing coverage for all Americans, including those who have had preexisting conditions. We can do it in a way that does not raise taxes.

We are for trending down the cost curve; when it comes to health care reform, if we do not turn that cost curve downward, then we have failed the American people. Frankly, the independent Congressional Budget Office has said health care cost under the Reid proposal is going to not only continue to go up but it is likely—not only will it continue on its current curve, but it is going to go up and not down.

The way you can ensure that cost curve turns down, just two Republican proposals that we think have an awful lot of merit but are not going to be considered and certainly are not going to be included—are not included in the managers' amendment that has now been filed—one of those is tort reform. Physicians all across the country have been crying for this for years. But, more so, health agencies and individuals who have to pay health care bills have been crying for this for years. We can do it in a way that will allow every aggrieved individual who is injured as a result of negligent health care being delivered to have their day in court. Yet we need to provide some means of the elimination of the frivolous lawsuits that go so much toward physicians having to call for tests that they might not otherwise need; and also to prevent the spiraling costs, on the delivery side, of health care because of the high cost of malpractice insurance as well as other measures.

The other way we can trend that curve down is to provide preventive incentives to individuals across America to live healthier lives. There is example after example that we have talked about on the floor of the Senate—from health care providers, employers who have provided incentives in their program, their health insurance program, that have in fact lowered costs. We can do that. There are proposals to do that, but they are not included in the managers' package.

Insurance reform—Republicans have been very strong about the fact that, as a part of overall health care reform, we need to reform the insurance industry, rein in some measures that have caused the cost of health insurance that is provided by employers to, again, not only level off but ultimately trend downward.

How do we do that, and what ideas have been proposed? We have proposed the sale of insurance policies across State lines. There is a provision in the underlying bill that does that. I am very pleased to see that included.

Another thing we can do is to allow for what is called associated health plans that Republicans have been promoting for years. Every time it has come up for a vote in this body, the Democrats have opposed allowing individuals across State lines to group together and spread the risk of health insurance coverage. It would go a long way toward reducing the cost of health insurance premiums. But, unfortunately, we have not been allowed to move forward with that proposal.

Let me mention a couple of things, before I turn to my friend from Texas, with respect to the changes in the Reid amendment that was filed yesterday. Again, there have been a number of individuals who have come to the floor since that amendment was filed yesterday to talk about the fact that it is online, and as we look through it more and more we are finding more and more about it, that is true. But it certainly does not meet the test of giving us 72 hours before we vote on it.

The number of pages in the bill now, the base bill plus the Reid amendment plus the Indian health bill, which is now included by reference, totals 2,733 pages. The gross Medicare cuts—and these are not slowing the growth of Medicare. These are direct Medicare cuts that are being used to finance the underlying health care bill—now totaling \$470.70 billion. The gross tax increases in the Reid amendment now total \$518.5 billion. CBO says the gross cost of the insurance coverage expansion is \$23 billion higher under the Reid amendment than it was under the base bill. Federal revenues or Federal taxes increase by almost \$26 billion under the managers' package.

All told, the amendment reduces the deficit by \$2 billion—going from \$130 to \$132 billion. But, boy, is that ever a figleaf. We are going to talk about the CLASS Act that provides for that increase in the deficit.

The Federal cost curve, according to CBO, still goes up. I alluded to that a little bit earlier.

There is a slight increase in additional coverage—but still under the Reid amendment there will be 23 million Americans left uninsured. That is not what we have heard from the other side of the aisle from day one about making sure that every single American was covered.

Despite the fact the Democrats have said changes in the managers' package would improve the delivery system, CBO also says it is likely that the amendment would have little impact on premiums.

As we move toward the cloture votes on this bill over the next couple of days, I think it is important for the American people to get some understanding of the fact that the deals that have been made, the deals that have been cut to get the Democrats to 60 votes on this bill do not do what has been said over and over by folks on the other side of the aisle.

I would now like to ask my friend from Texas how it impacts Texas, the managers' amendment, as well as the underlying bill and other comments he has relative to the bill.

The ACTING PRESIDENT pro tempore. The Senator from Texas is recognized.

Mr. CORNYN. Madam President, I look forward to engaging with both the Senator from Georgia and the Senator from South Carolina, Mr. GRAHAM. I have been in the Senate now for 7 years, which is not all that long compared to the length of service of a number of Senators. I was and have been proud to represent the 24 million citizens of the State of Texas here in the Senate and the seat that was first held by Sam Houston in 1846.

Sometimes the Senate is referred to as the world's greatest deliberative body. I think that description is a description that inspires schoolchildren and lovers of this great democracy of ours to admire and respect this body. But I have to tell you, I think the world's greatest deliberative body might not apply to this particular piece of legislation. It might, rather, be called the world's biggest railroad because of the railroading of the legislation that was revealed here only yesterday by Senator REID, cooked up behind closed doors with a variety of interest groups negotiating deals on the side, deals that are unknown.

We know some of those pertain to hospitals, some to the pharmaceutical companies. Then I heard one of our other Senators from North Carolina yesterday say we should call this "The Price Is Right" because we know a number of Senators held out for various inducements, financial inducements, to encourage them to get to the 60 votes.

So we do not know what kind of deals have been cut behind closed doors, what kind of deals individual Senators may have made. But the American people need to know what is in this legislation and how it will affect them.

Unfortunately, notwithstanding the fact that the President of the United States said, You know what, when I am elected President, we are going to have negotiations around a big table and televise it on C-SPAN, good luck. So much for that broken promise.

We know other Senators who expressed the same concerns the Senator from Georgia did about having at least 72 hours by posting this on the Internet so the American people can read it and so we can consult with our constituents—the hospitals, the small businesses, the doctors—to say how does this affect you?

We had eight Democratic Senators on October 6, 2009, who said they wanted the CBO scores and they wanted them posted 72 hours ahead of time before the first vote. So much for that. We know that is going to be thrown out the door as well.

That demand, I suppose, was made more for public relations rather than any real desire to find out what is in the bill and share it with the American people because we know legislative language will be available only 40 hours before the first vote at 1 a.m. this morning, literally in the middle of the night. The Congressional Budget Office score is available only 37 hours before the first vote.

What we are talking about is this legislation. The Senator from Georgia said 2,700 pages, I believe, when you consider all of the legislation we are going to be asked to vote on the first time on a cloture vote at 1 in the morning, about 12 hours from now. We have been feverishly reviewing this language to find out what is in it. Frankly, what we find out is that it makes things worse rather than better in a number of key respects.

For example, we know that America spends near double what any other industrialized Nation does on health care. One of the stated goals, one which the Democrats and Republicans both agree on, is that this reform ought to control those costs rather than make it worse. I have an amendment, amendment No. 2806, designed to ensure that health care reform achieves the goal we all support.

We know that private insurance premiums have more than doubled in the last 10 years for American families. The Congressional Budget Office estimates that taxpayer spending on government health programs will rise to 12 percent of our economy by 2050. That will be a debt of \$322,000 for the unfunded liabilities of Medicare alone. This bill does not make things better. It makes things worse, according to the Obama administration Chief Actuary.

I have an amendment which would apply the truth test to the Obama administration's own independent Actuary, based on the evidence the Reid bill would increase health care costs for the Nation, for American families, for American taxpayers. This amendment leaves it up to the Office of the Actuary of the Centers for Medicare and Medicaid Services. If that office finds the Reid bill does lower health costs as advertised, the bill would then proceed

to go into effect. But if, in fact, it does not, then it will not.

Advocates of the Reid health bill continue to promise it lowers health care costs, but this amendment will apply the truth test to the Obama administration's own independent Actuary.

I see the distinguished majority whip on the floor. I am glad he is here because he may have something to say about this.

I ask unanimous consent that the pending amendment be set aside and that I be allowed to call up amendment No. 2806.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. DURBIN. Reserving the right to object.

The ACTING PRESIDENT pro tempore. The Senator from Illinois.

Mr. DURBIN. Madam President, this is the 21st day of debate. There have been four substantive amendments offered by the Republican side. They have had ample opportunity to call for this—

Mr. CORNYN. I call for the regular order.

The ACTING PRESIDENT pro tempore. Regular order has been called for. Does the Senator object?

Mr. DURBIN. I object.

The ACTING PRESIDENT pro tempore. Objection has been heard.

Mr. CORNYN. Madam President, I ask my colleagues to comment on some of the other broken promises. The President made a solemn pledge that he would sign a universal health care bill. This bill, as I understand it, still leaves 15 million people without insurance coverage. He says the costs will be cut by up to \$2,500 a year. The reality is the average premiums would increase by \$2,100.

I ask perhaps our distinguished colleagues from South Carolina and Georgia to comment on the promises that the President has made with regard to transparency, the promises he has made with regard to premiums going down rather than up, the promises he has made with regard to Medicare—promises it appears this bill will not allow him to keep.

Mr. GRAHAM. Everything the 2008 campaign was about has basically been discredited and discarded in this whole health care debate. I thought it was change we could believe in. I thought there was going to be a new way of doing business in Washington, and God knows there needs to be. I thought we were going to negotiate the health care bill on C-SPAN and everybody would have a seat at the table, including the drug companies. I thought we were going to allow reimportation of prescription drugs to allow American consumers to purchase drugs dramatically cheaper.

Not only have we not had any negotiations on C-SPAN, you couldn't find the room where the negotiations were

going on. The old way of doing business looks good compared to this process. There was a negotiation going on on the biggest proposal we will probably ever vote on, one-sixth of the economy, between two people: the Senate majority leader and the Senator from Nebraska.

The second in command on the Democratic side told Senator McCain: I am just as in the dark as you are. We have gone to a promise of being on C-SPAN to everybody was in the dark. I don't know how that plays. I hope it plays poorly because at the end of the day, what we are doing here is absolutely unconscionable. When you thought it couldn't get any worse in Washington, when you thought your government had reached a low point, well, it has gotten worse. I will be talking about the 60th vote here soon, how they got that 60th vote. And if that is OK with the American people, which I do not believe it will be, if that is OK with our body, then our best days are behind us as a country.

Mr. CORNYN. May I ask the Senator from South Carolina about this other promise? Does he recall the President saying in July of 2009, if you like what you have, you can keep it? Is the Senator aware of the fact that according to the Congressional Budget Office, between 8 and 9 million people who would have been covered by employment-based plans under the current law would not have an offer of such coverage under this bill if passed, and seniors, because of the cuts to Medicare, particularly Medicare Advantage, will actually have their benefits cut? How do you reconcile those promises with what we see in this monstrosity of a bill?

Mr. GRAHAM. They cannot be reconciled. I hope American seniors are paying attention. We are going to take \$470 billion out of Medicare in the next decade and use that money to create new government programs. If you are senior citizens out there, the doctors and hospitals you go to—and it is hard to find Medicare doctors right now; a lot of doctors are reluctant to take Medicare patients because the reimbursement rates are so low. Rural hospitals are on their knees because the Medicare rates are so low. Take \$470 billion out of the system and see what happens to the provider community.

What does it mean to seniors? It means your chance of finding the doctor or hospital to take care of you as a Medicare patient is going down, not up. What does it mean to Medicare? It is due to go bankrupt by 2017. By taking money out of the system, not reforming Medicare, but using it as another purpose has accelerated the problems of Medicare. Not only has that promise been broken, we have done something no other Congress has ever done to Medicare—take money out of it and give it to somebody else. That is not

right. We were within inches of expanding Medicare to people from 55 to 64 which would put the system at risk.

My point is simply this. We started this debate as a way to reform health care, and a lot of us agree on many things. It wound up being what does the Democratic Party need to do to pass a bill. Nobody cares what is in this bill anymore. All the objections about the CLASS Act and about fiscal responsibility and about the public options being in or out have given way to get this thing done before Christmas.

This is not about health care reform. It is about one political party feeling as though they have to pass a bill no matter what is in it. And that is sad.

Mr. CORNYN. I wonder if my colleagues will comment. I have one last chart I want to share with them and anybody who might be watching on this Sunday afternoon shortly before Christmas.

Every public opinion poll I have seen says the American people do not want us to pass this bill. So one has to wonder: All of us have to run for election in our States. Obviously, to win an election, you have to get a majority of voters. But 56 percent of U.S. voters in the country say they do not want this bill to pass. And yet this thing seems as though it is on an unstoppable path toward passage because 60 Senators, apparently defying the will of their constituents, seem determined to pass the bill.

Can my colleagues explain to me what they think is going on here?

Mr. CHAMBLISS. I think it is obvious it is pure arrogance on the part of the folks on the other side of the aisle. The American people do not want it, but they are saying Washington knows better than the people back home know. That is pretty clear.

I know my colleague from Georgia is like me, when we go back home, we get stopped in the airport, in the grocery store, on the streets, all around different parts of Georgia. People are not happy about what is going on up here with respect to this bill. I wish to ask him about his comments with respect to where we are.

Mr. ISAKSON. Like the Senators from Texas and South Carolina and my senior Senator from Georgia, we all represent the people who vote for us. And in reference to Senator Cornyn's question about popularity, about the way people feel about this legislation, I ask unanimous consent to have printed in the RECORD two letters—one from the Medical Association of Georgia and one from a consolidated group of medical associations representing 92,000 physicians.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MAG IN GROUP REPRESENTING 92,000 DOCTORS
OPPOSING SENATE HEALTH BILL

ATLANTA.—The Medical Association of Georgia (MAG) is part of a group of state and

national specialty medical societies that represents more than 92,000 practicing physicians from across the U.S. that sent a letter to U.S. Senators today urging them to oppose the "Patient Protection and Affordable Care Act" (H.R. 3590) because it clears the way for government-controlled medical care.

MAG President Gary C. Richter, M.D., says, "We believe that this bill would create a staggering volume of new federal regulatory requirements for medicine, that it isn't sustainable from a budget standpoint, that a 'public' or 'community' health insurance option may lead to a single-payer system, that the measure lacks meaningful tort reform and actually discourages proven reforms like limiting attorney fees and malpractice caps, and that the bill does not fix the Medicare Sustainable Growth Rate, or SGR, formula."

In the letter, the physician groups ask Senate leaders to "draft a more targeted bill that will reform the country's flawed system for financing health care, while preserving the best health care in the world." The letter states, "We are therefore united in our resolve to achieve health system reform that empowers patients and preserves the practice of medicine—without creating a huge government bureaucracy."

The letter also highlights some of the bill's more "problematic provisions," stressing that it undermines the patient-physician relationship. The correspondence points out that the bill does not provide for the right to privately contract—a "touchstone of American freedom and liberty"—and it stresses that "patients should have the right to choose their doctor and enter into agreements for fees and services without penalty." The letter urges lawmakers to develop legislation that "allows patients and physicians to take a more direct role in their health care decisions," and it points out that decisions surrounding medical care isn't an appropriate role for the government or other third party payers.

Along with MAG, signatories include the Medical Association of the State of Alabama, the Medical Society of Delaware, the Medical Society of the District of Columbia, the Florida Medical Association, the Kansas Medical Society, the Louisiana State Medical Society, the Missouri State Medical Association, the Nebraska Medical Association, the Medical Society of New Jersey, the Medical Society of South Carolina, the American Academy of Cosmetic Surgery, the American Academy of Facial Plastic and Reconstructive Surgery, the American Association of Neurological Surgeons, the American Society of Breast Surgeons, the American Society of General Surgeons, and the Congress of Neurological Surgeons. Three past presidents of the American Medical Association—Donald J. Palmisano, M.D., William G. Plested III, M.D., and Daniel H. Johnson Jr., M.D.—also signed the letter.

DECEMBER 7, 2009.

Hon. HARRY REID,
Majority Leader, U.S. Senate,
Washington, DC.

DEAR SENATOR REID: The undersigned state and national specialty medical societies are writing you on behalf of more than 92,000 physicians in opposition to passage of the "Patient Protection and Affordable Care Act" (H.R. 3590) and to urge you to draft a more targeted bill that will reform the country's flawed system for financing healthcare, while preserving the best healthcare in the world. While continuance of the status quo is not acceptable, the shifting to the federal

government of so much control over medical decisions is not justified. We are therefore united in our resolve to achieve health system reform that empowers patients and preserves the practice of medicine—without creating a huge government bureaucracy.

H.R. 3590 creates a number of problematic provisions, including:

The bill undermines the patient-physician relationship and empowers the federal government with even greater authority. Under the bill, (1) employers would be required to provide health insurance or face financial penalties; (2) health insurance packages with government prescribed benefits will be mandatory; (3) doctors would be forced to participate in the flawed Physician Quality Reporting Initiative (PQRI) or face penalties for nonparticipation; and (4) physicians would have to comply with extensive new reporting requirements related to quality improvement, case management, care coordination, chronic disease management, and use of health information technology.

The bill is unsustainable from a financial standpoint. It significantly expands Medicaid eligibility, shifting healthcare costs to physicians who are paid below the cost of delivering care and to the states that are already operating under severe budget constraints. It also postpones the start of subsidies for the uninsured long after the government levies new user fees and new taxes to cover expanded coverage and benefits. This "back-loading" of new spending makes the long-term costs appear deceptively low.

The government run community health insurance option eventually will lead to a single-payer, government run healthcare system. Despite the state opt-out provision, the community health insurance option contains the same liabilities (i.e. government-run healthcare) as the public option that was passed by the House of Representatives. Such a system will ultimately limit patient choice and put the government between the doctor and the patient, interfering with patient care decisions.

Largely unchecked by Congress or the courts, the federal government would have unprecedented authority to change the Medicare program through the new Independent Medicare Advisory Board and the new Center for Medicare & Medicaid Innovation. Specifically, these entities could arbitrarily reduce payments to physicians for valuable, life-saving care for elderly patients, reducing treatment options in a dramatic way.

The bill is devoid of real medical liability reform measures that reduce costs in proven demonstrable ways. Instead, it contains a "Sense of the Senate" encouraging states to develop and test alternatives to the current civil litigation system as a way of addressing the medical liability problem. Given the fact that costs remain a significant concern, Congress should enact reasonable measures to reduce costs. The Congressional Budget Office (CBO) recently confirmed that enacting a comprehensive set of tort reforms will save the federal government \$54 billion over 10 years. These savings could help offset increased health insurance premiums (which, according to the CBO, are expected to increase under the bill) or other costs of the bill.

The temporary one-year SGR "patch" to replace the 21.2 percent payment cut in 2010 with a 0.5 percent payment increase fails to address the serious underlying problems with the current Medicare physician payment system and compounds the accumulated SGR debt, causing payment cuts of nearly 25 percent in 2011. The CBO has confirmed that a

significant reduction in physicians' Medicare payments will reduce beneficiaries' access to services.

The excise tax on elective cosmetic medical procedures in the bill will not produce the revenue projected. Experience at the state level has demonstrated that this is a failed policy. In addition, this provision is arbitrary, difficult to administer, unfairly puts the physician in the role of tax collector, and raises serious patient confidentiality issues. Physicians strongly oppose the use of provider taxes or fees of any kind to fund healthcare programs or to finance health system reform.

Our concerns about this legislation also extend to what is not in the bill. The right to privately contract is a touchstone of American freedom and liberty. Patients should have the right to choose their doctor and enter into agreements for the fees for those services without penalty. Current Medicare patients are denied that right. By guaranteeing all patients the right to privately contract with their physicians, without penalty, patients will have greater access to physicians and the government will have budget certainty. Nothing in the Patient Protection and Affordable Care Act addresses these fundamental tenets, which we believe are essential components of real health system reform.

Senator Reid, we are at a critical moment in history. America's physicians deliver the best medical care in the world, yet the systems that have been developed to finance the delivery of that care to patients have failed. With congressional action upon us, we are at a crossroads. One path accepts as "necessary" a substantial increase in federal government control over how medical care is delivered and financed. We believe the better path is one that allows patients and physicians to take a more direct role in their healthcare decisions. By encouraging patients to own their health insurance policies and by allowing them to freely exercise their right to privately contract with the physician of their choice, healthcare decisions will be made by patients and physicians and not by the government or other third party payers.

We urge you to slow down, take a step back, and change the direction of current reform efforts so we get it right for our patients and our profession. We have a prescription for reform that will work for all Americans, and we are happy to share these solutions with you to improve our nation's healthcare system.

Thank you for considering our views.

Sincerely,

Medical Association of the State of Alabama; Medical Society of Delaware; Medical Society of the District of Columbia; Florida Medical Association; Medical Association of Georgia; Kansas Medical Society; Louisiana State Medical Society; Missouri State Medical Association; Nebraska Medical Association; Medical Society of New Jersey; South Carolina Medical Association; American Academy of Cosmetic Surgery; American Academy of Facial Plastic and Reconstructive Surgery; American Association of Neurological Surgeons; American Society of Breast Surgeons; American Society of General Surgeons; Congress of Neurological Surgeons.

Past Presidents of the American Medical Association: Daniel H. Johnson, Jr., MD, AMA President 1996-1997; Donald J. Palmisano, MD, JD, FACS, AMA

President 2003–2004; William G. Plested III, MD, FACS, AMA President 2006–2007.

Mr. ISAKSON. I want to tell my colleagues what these letters say. The first one is to me from Gary Richter, the president of the Medical Association of Georgia. He writes in great detail about the difficulties and problems they have with this legislation, beginning with the stonewall against tort reform by only putting in a demonstration project.

The Senator from Texas is aware of what tort reform can do because his State has made a great improvement in medical malpractice costs because of tort reform, and we in Georgia have tried to experience the same type of thing.

There are many other reasons in here as well. The interesting thing about the letter from the 92,000 physicians represented by their medical associations is they talk not only about what is in the bill but what is not in the bill. I want to read, if I may, one paragraph to demonstrate that point:

Our concerns about this legislation also extend to what is not in the bill. The right to privately contract is a touchstone of American freedom and liberty. Patients should have the right to choose their doctor and enter into agreements for the fees for those services without penalty. Current Medicare patients are denied that right. By guaranteeing all patients the right to privately contract with their physicians, without penalty, patients will have greater access to physicians and the government will have budget certainty. Nothing in the Patient Protection and Affordable Care Act addresses these fundamental tenets, which we believe are essential components of real health system reform.

That is a pretty strong statement from 92,000 American physicians about this particular piece of legislation.

To follow up on the point made by the distinguished Senator from South Carolina, I have a vested interest. I just got my Medicare card. December 1 I became Medicare eligible. When you talk about cutting \$470 billion, it gets personal. It gets personal with all those other seniors.

Think about this. Seniors in America have paid their entire lives, at least since 1966 when it was created. They have paid a tax and their employers have paid a payroll tax to go into a trust fund to pay for their health care after they are 65 years old.

We are now basically saying, I say to the Senator from South Carolina, we are taking \$470 billion of the tax money you have paid over years of work and we are going to put it in a plan to pay for somebody else's health care. That is basically what it does, and that is patently wrong.

One other thing I want to mention that is critical to me. We are all professionals at what we do. We all argue from our point of view. I understand that and respect that. But something was said earlier today which draws me

to have a flashback to make the point about how much we tried on this side to contribute to improvements in health care and better access for all.

The very distinguished majority whip said he talked with realtors and that three in four realtors were uninsured and this would help. The reason they are uninsured is they are not able to form risk groups together associated and affiliated as a like practice. Because of the IRS Code, which this does not amend, a company's employer, who has independent contractors working for them, cannot by law provide them with medical insurance.

In 2006 on the floor of the Senate, 57 Republicans and Democrats offered and voted for the associated health care bill or the small business access to health reform—57 out of 100. We needed 60 like this bill needs to get to cloture. That bill would have allowed associated professions to join together, compete for insurance nationwide, form risk pools that are large enough to mediate and ameliorate high rates and have a more competitive rate.

He was correct in his statement that three in four do not have health insurance. I was in that business. I know. The reason they do not is because they have to buy on the spot market because they cannot have a group plan. When they buy on the spot market, we are talking about \$1,500, \$1,800, \$2,000 a month, which is unaffordable and unsustainable. But this bill does nothing to address that situation which is one of the largest holes in the uninsured problem.

In fact, when you see the estimates, those who are still left uninsured, a great many of them are going to end up being just those kinds of people— independent contractors that the tax laws prohibit from associating and affiliating with others. And I was proud to be part of that 57, along with the other three distinguished Senators on the floor and a number of Democrats.

There have been lots of efforts made by people on both sides to get us better access and affordable health care. But, unfortunately, they have been blocked all over this philosophic argument of whether health care is going to be government provided or competitive in the private sector. Unfortunately, the ship of state is moving toward the government provision with this legislation, which is one of the reasons I oppose it.

I turn it back to the distinguished senior Senator from Georgia.

Mr. CHAMBLISS. I rise to pose a question to the Senator, and I would ask my colleagues to comment with respect to their States.

The Senator served in the State legislature for many years, and is very familiar with our SCHIP program, which is called PeachCare, and he is also familiar with the rising Medicaid costs that we have seen in our State. What this bill does, in seeking to reach out,

as I understand, is to expand the eligibility for Medicaid. We are all for Medicare, but this raises the eligibility level for Medicaid from 100 percent of the poverty level to 150 percent of the poverty level. That will have a huge impact on every single State that is now going through very difficult financial times.

We in Georgia have had a \$3 billion shortfall this past year that had to be plugged. I saw the other day in the press where we have almost another \$2 billion our legislature is going to have to deal with next month in reducing services around our State. Every State is having that same experience. Yet what this bill does is to put a mandate on States to increase the amount of money that States put into Medicaid. I know the Senator is very familiar with that, and I would ask him to comment.

Mr. ISAKSON. I appreciate the Senator bringing it up. It is what is known in the trade as an unfunded mandate, but I will put some meat on that bone.

This year the State of Georgia had a budget of about \$17 billion, and the Medicaid portion—just the Medicaid portion in Georgia—was over \$2 billion. So it is approaching, or getting close to, 16, 17, or 18 percent of the entire budget. If this bill passes raising the eligibility from 100 percent to 150 percent, then in 2017—which is the trigger date on this Medicaid provision—Georgia would go from \$2.15 billion to over \$3¼ billion in its share of Medicaid, and this at a time of declining revenues and greater pressure. That is a recipe for disaster.

Our State, like 43 other States in the United States, can't borrow money. We have to have a balanced budget. If the Federal Government mandates that we spend \$3 billion, we have to cut it out of someplace else in our State, such as education or our prisons or the park system or somewhere else.

But it is ironic that Senator CHAMBLISS asked me that question because this morning, as I was preparing to come over, I had the television on, and Arnold Schwarzenegger, Governor of California, was being interviewed. He endorsed this provision originally, but he raised the question that the provisions in this amendment will raise by \$3 billion the cost of Medicaid, just in the State of California—a State that had a \$60 billion shortfall last year, and next year, he estimates, will have a \$20 billion shortfall. If we continue in Washington to mandate funding and don't put our money behind it, we are pushing our States to the brink of bankruptcy, where a number of them already are. It is not fair to say we are covering more people when we are bankrupting our States. We are not covering anybody if we are pushing the cost off on someone else.

So I appreciate the senior Senator from Georgia raising that point, and I associate myself with Governor

Schwarzenegger and his remarks this morning about urging us not to force unfunded mandates on our States.

The Senator from Texas.

Mr. CORNYN. If I can respond to the senior and junior Senators from Georgia on this point, my State population is 24 million. Over a 10-year period of time, this is a \$20 billion unfunded mandate—\$20 billion. Of course, we know—or at least we read and hear from some in the press—that not all States are going to be treated the same. That was, in fact, an inducement on the part of some Senators to vote for the bill—to be one of the 60 votes—because they were either going to get a sweetener, in terms of being held harmless for at least a portion of that, or in the case of Nebraska, I guess all of it.

That strikes me as fundamentally unfair, but it also demonstrates the flaw in the way this bill has been negotiated. In order to try to get to the 60 votes, there has basically been a pay-to-play sort of approach to this, and it is just repulsive to me, frankly. Certainly, a lot of my constituents would wonder: What kind of games are going on there?

I know the Senator from South Carolina has some thoughts about that.

Mr. GRAHAM. Well, this started out as a noble effort to reform health care because it needs reforming. The inflationary cost of the government is unsustainable. Medicare and Medicaid, as the Senators from Georgia indicated, are becoming huge problems that are unsustainable. Medicare is \$36 trillion underfunded.

Now, what does that mean? It means that over the next 75 years, there is a \$36 trillion shortfall of money to pay the benefits that have been promised, and that has to be dealt with.

What we are doing to Medicare makes the problem worse, not better. Medicaid is the largest expense in my State. It is a matching program. So listen to this—if you are out there on a Sunday with nothing else to do but listen to me. If you don't live in Nebraska, here is what is coming your way. Your State will be required to cover more people under Medicaid because the eligibility goes up to 133 percent above poverty, which is an increase over the current system. So throughout the Nation, there are going to be thousands more people enrolled in Medicaid, and every State, except one, is going to have to come up with matching money.

I have 12 percent unemployment in South Carolina. My State is on its knees. I have a 31-percent African American population in South Carolina. Yet how did the majority get the 60th vote on this bill? It was the weekend before Christmas, and they were one vote short—here is what they did to get that one vote. They had a deal cooked up that no one knew about but the two people talking. There was no

input from anybody other than the majority leader and the Senator from Nebraska. After that meeting was over, they came up with a 380-page amendment to a 2,000-page bill. They filed it yesterday, and we made them read it. We heard it for the first time yesterday. Then the majority leader filled up the tree so that there is no ability by any Republican or Democrat to amend their work product.

This is a transparent new way of doing business: you cook up a deal in a back room—that is essentially sleazy, in my view—to allow one State, in order to get that vote, be held harmless for Medicare enrollees, and the rest of us have to go home and hear our constituents say: Why can't you in South Carolina and Georgia get that deal? What kind of Senator are you?

Well, I will tell you; this is the kind of Senators we are. We are not going to do that. We are not going to put the whole Nation at risk and take a broken system and make it worse just to get a vote. No way in hell.

On abortion, you are either for it or against it or you are indifferent. You can be whatever you are on abortion and be just as good an American as I am. I am pro-life and proud of it. Most of us in America, whether you are pro-choice or pro-life, don't want our Federal taxpayer dollars to be used to pay for abortions. For 32 years, the Hyde amendment has been the law of the land, preventing taxpayer dollars to be used for abortion. In this health care reform, guess what. That is exactly what is going to happen. There is a brave Democrat in the Congress—Bart Stupak, from a blue State—who stood up to his Democratic leadership and said: I will not vote for a bill that allows Federal taxpayer dollars in the form of subsidies to be used to fund abortion because I find that morally offensive, and I think most Americans agree with me. He brought the House to its knees, saying: You will not pass this bill to use federally funded Federal dollars to fund abortion.

What did he get out of it? Nothing. Not one thing for Wisconsin. He got out of that deal the pride of knowing that he stood up for the unborn.

So the bill comes to the Senate, and Senator NELSON from Nebraska tries to introduce the Stupak language that would be an absolute bar from using taxpayer dollars to fund abortion. He lost that amendment. He said he could not vote for a bill that would allow taxpayer dollars to be used to fund abortion. But then he gets in a room with Senator REID, and he comes up with a compromise and he claims it solves the problem. The problem is, his claim is not accepted by all those who follow this. The compromise he has achieved on abortion is a miserable failure.

Congressman STUPAK says it is unacceptable. The National Right to Life

Committee says it is unacceptable. The Nebraska Right to Life Committee says it is unacceptable. The Council of Catholic Bishops says it is unacceptable. There is not one pro-life group in this country that believes Senator NELSON has protected the rights of the unborn. So how, in good conscience, do you vote for a bill when that was the big issue?

At the end of the day—one last thought—this bill would make an Enron accountant blush. They are talking about how it lowers the deficit by \$132 billion. But they do not tell you that the \$247 billion doctor fix is not in the bill. What am I saying? Over the next 10 years, doctors, under the 1997 balanced budget agreement, will have \$247 billion taken out of their practices unless Congress acts.

Since 1997, Congress, every year, has stepped to the plate and forgiven that cut, which is double digits. Everybody knows we are going to do that. But when it came to health care reform, they left out the doctor fix because if you include it, it no longer is revenue neutral. It no longer does what they say.

They say this bill cuts the deficit by \$132 billion, but if you include the \$247 billion, it runs up the deficit in the first 10 years, and in the second 10 years it adds \$2 trillion to the deficit.

Long story short, this is what Enron did. People went to jail for doing this in the private sector. They took the liabilities of the company and they hid them, making their balance sheet look better than it actually was. So when you hear this reduces the deficit by \$132 billion, they took out a liability that they know we are going to fund, just to cook the books.

If this is going to be OK for the country, then we have no hope as a Nation of ever solving any hard problem. And I would like to say to my colleagues: I know you want to be home. I know everybody on the other side wants to be home. I know you want to find ways to solve hard problems. Troops in Afghanistan want to be home, too. At least they are away from home for a noble purpose. We are here trying to stop a legislative process that, if it becomes legitimate—if this becomes the OK way of doing business, giving one Senator a deal you will not give anybody else and putting the whole country at risk just to get one vote—then I hope the American people will rise up in righteous indignation and throw us all out because nobody should be representing the country this way.

Mr. CHAMBLISS. The Senator from South Carolina raises the point about this bill being revenue neutral and it actually decreases the deficit. How do they achieve that? They achieve that through some truly Enron accounting, as the Senator from South Carolina just said. But here is what happens: There is a certain amount of money

that is projected by CBO to be generated in insurance premiums being paid by young individuals across this country under what is called the CLASS Act. The CLASS Act is a new health care-generated program, a new entitlement program that is included in this bill that is going to provide long-term care benefits for young, healthy Americans who, ultimately, are going to become invalid and need that long-term care.

Well, the fallacy in the numbers game that is being played is that CBO is saying it is true there will be a projection that we are going to save—the projection they are using says we are going to generate premiums from these young people who are not going to be entitled to the benefits under this bill for 20, 30, 40 years from now. But even CBO recognizes that when these benefits begin being paid out, there is going to be an entitlement created that is going to blow the budget of this particular new program all the way out the top.

In fact, the chairman of the Budget Committee, a Democrat from North Dakota whom I admire and respect so much, has even said this particular provision in this bill is a Ponzi scheme. It is something Bernie Madoff would love. Yet here they are with straight faces on the other side of the aisle coming in and saying we are really going to reduce the deficit by passing this provision called the CLASS Act. It is beyond me how anybody, with a straight face, can say that is actually a fact.

Mr. ISAKSON. Will the Senator yield?

Mr. CHAMBLISS. Absolutely.

Mr. ISAKSON. Isn't it true that is what is wrong with Social Security today? We have spent it for years and years rather than putting it in a trust fund, and now the baby boomers are going: The money is not there? Isn't that the same thing?

Mr. CHAMBLISS. The Senator is exactly right, and exactly the same situation with Medicare.

Mr. ISAKSON. Just a question on a followup on the fiscal part the Senator from South Carolina brought up. It is also still true that the taxes on this bill begin in 11 days—January 1, 2010—but the benefits begin on January 1, 2014, and in that score of the first 10 years of cost, you have years of program that are not costing anything while you are raising revenues. So it is a ruse and a masking of the actual fiscal effect on the United States of America.

Mr. CHAMBLISS. The only way Senator REID could get the score that he kept going back and forth with the Congressional Budget Office on was to make sure the taxes started immediately. And they will. He has increased taxes by \$26 billion to come up with a proposal that he says is revenue neutral. That is an additional \$26 bil-

lion. So it makes it a total of \$518.5 billion in new taxes that are going to be paid by hard-working, tax-paying Americans, and no benefits under this bill are going to start accruing until the year 2014.

Mr. CORNYN. Will my friend yield for a question?

Mr. CHAMBLISS. Absolutely.

Mr. CORNYN. I ask the senior Senator from Georgia, does he remember this statement by President Obama? He said he will not sign a plan that adds one dime to our deficits, either now or in the future, period. Yet David Broder, perhaps one of the most respected journalists here in Washington, DC, who has been around a long time, said he has talked to all the experts and everybody he has talked to said these bills as they stand are “budget-busters.” Of course, I am sure the Senator also remembers a Washington Post-ABC poll that said 66 percent of those who responded to the poll think this bill will make the deficit worse, not better.

In other words, we have a credibility problem between what is being promised here by the President and presumably by the proponents of this bill and the American people because they simply do not buy it. They do not believe it. Maybe that is why that earlier number from the Rasmussen poll said a majority of Americans do not want us to pass this bill but, rather, want us to start over and take a step-by-step or incremental approach.

Mr. CHAMBLISS. There is just no question but that the American people understand this. They get it. When we talk about cutting Medicare by \$450 billion, do they really not think the quality of care under Medicare is going to be diminished? Of course it is. Do the American people really think we are not going to have an increase in the deficit when we are going to have almost a trillion-dollar bill in real, live dollars that is going to be passed by this body in the next couple of days, in all probability? Surely the American people get that. They know this is going to increase the cost of health care and it is going to increase the deficit. That is why they are opposed to this.

Mr. GRAHAM. Will the Senator yield for another question?

Mr. CHAMBLISS. Sure.

Mr. GRAHAM. Let's talk about the CLASS Act a little bit more. It is a new program that doesn't exist today where the Federal Government, as I understand it, will be offering long-term health care insurance to the American people. It is a voluntary program at first, just like everything else around here. Guess who is going to sign up. It is called adverse selection. The sickest people in the country are going to sign up.

Under the bill as it is written, it is just like what Senator ISAKSON said

about the underlying bill. You collect taxes for 10 years; you pay out benefits for 6. That is the way you get the money to make the numbers come out right.

Guess what happens in this CLASS Act, the new program no one has heard much about. You start collecting premiums in 2011, but you don't pay any benefits until 2016. Guess what happens. That generates \$73 billion of money to be used to say to the American people that this bill is paid for. But when you ask the CBO about what happens after 2016, they say that by 2029, I think it is, the whole thing falls apart because the only people in the program are the sickest folks because it is a voluntary program, and at the end of the day, you have created a new entitlement, and everybody in this body is going to be rushing to subsidize premiums and get more people into this system. It will be another entitlement that grows, and CBO says it will be a death blow to our fiscal soundness.

I ask the Senator from Georgia, when Senator CONRAD, whom we all respect, said this is a giant Ponzi scheme that Bernie Madoff would have been proud of, do you think that is what he meant? You collect premiums and you make it look as if you have money you really do not have and you put off paying out benefits. And at the end of the day, would the Senator agree with me—I have a letter from October 23, 2009, from Senators CONRAD, LANDRIEU, LINCOLN, WARNER, LIEBERMAN, BAYH, and NELSON to the majority leader saying: Please take the CLASS Act out of the bill.

Would the Senator agree that the CLASS Act is still in the bill and that anybody who votes to send this off to the President to become law has become a coconspirator to the giant Ponzi scheme?

Mr. CHAMBLISS. I don't think there is any question about that. The Senator is exactly right. It is what we in Washington call fuzzy math—utilization of money from one pocket to pay for something on the other side. At the end of the day, it just does not add up. The Senator from North Dakota was exactly right, it is a huge Ponzi scheme.

I ask unanimous consent to have printed in the RECORD the letter dated October 23, 2009, just referenced by the Senator from South Carolina.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,

Washington, DC, October 23, 2009.

Hon. HARRY REID,
Majority Leader, The Capitol,
Washington, DC.

DEAR LEADER REID: We write regarding the merger of the Finance and HELP Committee health reform bills. We know you face a great many difficult decisions now, one of which is whether to include provisions from the HELP Committee bill known as the CLASS Act in the merged bill.

We urge you not to include these provisions in the Senate's merged bill, nor to use the savings as an offset for other health items in the merger.

While the goals of the CLASS Act are laudable—finding a way to provide long term care insurance to individuals—the effect of including this legislation in the merged Senate bill would not be fiscally responsible for several reasons.

CBO currently estimates the CLASS Act would reduce the deficit by \$73 billion over ten years. But nearly all the savings result from the fact that the initial payout of benefits wouldn't begin until 2016 even though the program begins collecting premiums in 2011. It is also clear that the legislation increases the deficit in decades following the first ten years. CBO has confirmed that the legislation stand-alone would face a long-term deficit point of order in the Senate.

Some have argued that the program is actuarially sound. But this is the case because premiums are collected and placed in a trust fund, which begins earning interest, and because the HHS Secretary is instructed to increase premiums to maintain actuarial solvency. We have grave concerns that the real effect of the provisions would be to create a new federal entitlement program with large, long-term spending increases that far exceed revenues. This is especially the case if savings from the first decade of the program are spent on other health reform priorities.

Slowing the growth of health care costs should be a top priority as we move forward with health reform. Inclusion of the CLASS Act would reduce the amount of long-term cost savings that would otherwise occur in the merged bill. The CLASS Act bends the health care cost curve in the wrong direction and should not be used to help pay for other health provisions that will become more expensive over time and increase deficits.

Thank you for your consideration. We hope that fiscally responsible measures to improve access to long-term care can be considered in the future.

Sincerely,

KENT CONRAD.
MARY L. LANDRIEU.
BLANCHE L. LINCOLN.
MARK R. WARNER.
JOSEPH I. LIEBERMAN.
EVAN BAYH.
BEN NELSON.

U.S. Senators.

Mr. CORNYN. I am wondering if the Senator would yield for a question since we have a unanimous consent for a colloquy.

The Senator was talking about this a little earlier, but one of the things that has not been adequately discussed and because of the way this bill has been railroaded and we have been denied an opportunity to offer amendments and we will be voting on the bill on Christmas Eve, as it is currently scheduled, I want to ask about the impact on businesses. You were in the real estate business and employed a number of people in your company. You had to meet a payroll and make sure you ended up in the black and not in the red.

One of the things the National Federation of Independent Business said was that this bill will actually increase health care costs for businesses and the cost of doing business. I can't imagine

anything worse that we could be doing during a recession, during a time when unemployment is at 10 percent, than making it more expensive to do business and thus keep people on your payroll. Won't that be the impact of this, with higher taxes, with increased health care costs going to employers, that it is actually going to make the unemployment problem worse rather than better?

Mr. ISAKSON. I think the Senator from Texas is exactly right. I will be the first to tell you, I am in the process of reading the 400-some-odd page managers' amendment. I haven't read all of it yet. It does take out the public option, which, by the way, that was originally in. It still may reappear at some date in the future. That was a real killer. That raised tremendous costs. In fact, it made it more beneficial for a company not to provide insurance and pay the fine and put people in the government option. That is not in the bill now, I understand that.

But let me tell you what is in the bill. What is in the bill are a number of taxes on small businesses that produce medical devices and medical treatments. You know as well as I do that when the government raises your taxes, you have to raise your price to the consumer. What does that mean? It is not lowering the cost of health care. It is, through the tax mechanism, raising the cost of health care, either to the insurance company that is in the exchange or to Medicaid or to Medicare or to the individual person in terms of their copayments.

You cannot hide the fact that when you are raising those types of revenues—\$514 billion; \$50 billion a year over 10 years—that money is going to ultimately be paid by the consumer of health care. It may be paid by the company on its tax return, but it is a pass-through cost that they are going to pass through to their consumer, which in turn is going to put more pressure on whoever insures that consumer, if, in fact, they are insured. So anytime the government raises taxes, it raises the cost of living for the American people. That is just a common, well-known fact. The Senator is exactly correct.

Mr. CHAMBLISS. We have talked a little bit about the negotiations that took place behind closed doors over the last few days. It is unfortunate that we have gotten to the point in this body and on this particular piece of legislation where the issue of abortion has injected itself into meaningful and affordable health care reform measures. But that is, in fact, what has happened. Similar to my friend from South Carolina, I am pro-life. We all are. I am very proud to be and have a strong voting record on that. The law of the land for well over 30 years has been that no Federal funds should be used to fund abortions. It makes no difference whether you are in one part of the

country or the other; that is the law. That is the way it ought to be. It ought not to be changed.

We have had any number of votes on abortion issues over the years. In every instance, we have failed to pass a law that would provide for the use of Federal funds for abortions. That is changing. Irrespective of what the Senator from Nebraska thinks he negotiated, that has changed.

I have three letters I will include for the RECORD. One is pretty interesting because it is from a group of African-American ministers in my home State. This group is headed by Bishop Wellington Boone. He wrote me a letter yesterday. Here is part of what he says:

We cannot emphasize enough that abortion is not health care.

He is absolutely right.

There is also a letter from Cindy O'Keary, executive director of the HOPE Center in Woodstock, GA, who is appalled at the discussions and the fact that we now are going to be using Federal money to fund abortions, and also a letter from Sadie Fields, State chairman of the Georgia Christian Alliance, imploring us not to pass any kind of bill that sets the precedent of providing Federal funds for the use of abortion.

I ask unanimous consent to have all three letters printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WELLINGTON BOONE MINISTRIES,

Norcross, GA, December 19, 2009.

Senator SAXBY CHAMBLISS,
*Russell Senate Office Building,
Washington, DC.*

DEAR SENATOR CHAMBLISS: We would like to take the time to thank you for your service to our country and to the citizens of Georgia. We thank you and your colleagues in the Senate who have stood against the terrible healthcare bill which mocks reform and increases taxes, debt and federal power while decreasing the freedom that Georgians value so highly. All of these concerns, however, pale in comparison to fact that the Senate version of the bill opens the door for the federal funding of abortion.

Those of us who have stood for life over the years have long known that the abortion lobby would never be satisfied with the mere legalization of abortion: they want it to be paid for by taxpayers. Many of your nominally pro-life colleagues have proven that their support of human life has a price: the Manager's amendment does nothing to prevent federal funds from paying for abortion in the federally subsidized healthcare exchanges. The charade that this is some sort of compromise is insulting not only to pro-life activists, but to the overwhelming majority of Americans who don't believe that taxpayer money should pay for abortions.

Who will be aborted with this federal money? In Georgia, 56% of all abortions are performed on black women and nationwide blacks have lost 35% of their population to abortion since *Roe v. Wade*. The Senate also opened the door for the federal funding of abortion among the indigenous peoples of this country by excluding the Hyde amendment from the reauthorization of the Indian

Health Service. Perhaps your colleagues in the Senate are not satisfied with how few American Indians there are left.

We cannot emphasize enough that abortion is NOT healthcare. It seems some members of the Senate want to take a practice that was supposed to be "safe, legal and rare" and make it "common, legal and subsidized." To overturn longstanding policy restricting the federal funding of the destruction of American lives while calling it "healthcare" is nothing short of evil.

We remain strongly opposed to the use of our tax dollars to fund abortion. We ask you, as our Senator, not to let your colleagues forget the line they are crossing if they vote for cloture. Only time will tell if they can escape judgment for their vote in their home states. But there is one Judgment not one of us can escape. Your colleagues who have not yet turned their backs on that Judge would do well to remember this as they cast their votes.

BISHOP WELLINGTON
BOONE,
Fellowship of International Churches.
DR. CREFLO DOLLAR,
Creflo Dollar Ministries.
DR. ALVEDA KING,
King for America.
MR. DAN BECKER,
Georgia Right to Life.

From: Cindy O'Leary [cindyhopecenter@bellsouth.net].

Sent: Saturday, December 19, 2009, 4:48 p.m.

To: Harman, Charlie (Chambliss).

Subject: Senate Discussion and Vote on Health Care Legislation.

SENATOR CHAMBLISS, As a registered nurse and the executive director for a pregnancy resource center that helps women and men explore alternatives to abortion as they seek solutions to what are often unexpected or unplanned pregnancies, I am gravely concerned about the potential impact of government-subsidized abortions, not only for the unborn, but for their parents who may feel overwhelmingly swayed by economic factors to make the most devastatingly wrong decision of their lives.

I want to thank you for standing strong tomorrow on the floor of the Senate in expressing the views of your constituents and, according to the recent CNN poll which revealed that six out of ten Americans are opposed to federal funding of abortion, we the people of the United States, as you promote a NO vote on the current health care legislation before the Senate. The only conscientious YES vote will come later for legislation that explicitly excludes the use of federal funds for abortion.

It is my understanding that the so-called "compromise" language included in Senator Reid's Manager's Amendment would actually ensure that, for the first time EVER, federal funds would be made available for the payment of elective abortions. It is also my understanding that the Manager's Amendment rejects other "compromise" proposals on abortion that would have codified the House-approved "Weldon Amendment" which prohibits government bodies from discriminating against health care providers. Such compromises included an "individual" opt-out from abortion coverage, which the Manager's Amendment does not. The Manager's Amendment rejects even the most broadly accepted agreements on this issue.

Thank you for your courageous support for life and for fighting against allowing the

government of the people and for the people to pick up the tab for abortions in America.

CINDY O'LEARY, BSN,
Executive Director, The HOPE Center.

GEORGIA CHRISTIAN ALLIANCE,
December 19, 2009.

Hon. SAXBY CHAMBLISS,
U.S. Senate, Washington, DC.

DEAR SENATOR CHAMBLISS: The Georgia Christian Alliance and its 65,000-plus supporters in Georgia strongly object to the language contained in the newest version of the Democrat's Health Care Reform bill that ensures, for the first time ever, federal tax dollars will pay for elective abortions.

If this bill passes, millions of pro-life Americans who believe that abortion is biblically and morally wrong will be forced to fund an act that takes an innocent human life. A Gallup Poll conducted in May 2009 finds 51% of Americans identifying themselves as "pro life" on the issue of abortion and 42% identifying themselves as "pro choice." This is the first time a majority of U.S. adults have identified themselves as pro-life since Gallup began asking this question in 1995.

For weeks, Democrat Senators and Representatives have ensured pro-life Americans they would never vote for a bill that contained federal funding for abortion. It would seem they sold their pro-life position for a bowl of porridge. We are deeply disappointed that they have gone back on their word, and ask you and your colleagues in the U.S. Senate to stand strong for innocent life as this bill moves forward in any Senate vote and in any subsequent conference committee.

Sincerely,

SADIE FIELDS,
State Chairman.

Mr. CHAMBLISS. Madam President, in closing, let me say, the Senator from South Carolina said it strongly and he is right: We have reached a new day in this body. We have had deals cut behind closed doors that are going to provide benefits for individual Senators and their States—whether Vermont, New Hampshire, Nebraska, Florida, or wherever—and that are going to require those of us who didn't have the opportunity to participate in the discussions and negotiations on this bill to represent to our citizens that they are going to have to pay more for services than everybody all across America gets. There is nothing right about that. There is nothing fair about it.

I daresay, I have some relatives who live in Nebraska. They have to be embarrassed and ashamed about this. They are going to be getting a huge benefit simply because the Democrats needed 60 votes to pass the health care bill.

Mr. GRAHAM. One last thought, if I may. The Senator mentioned the people in Nebraska. I know there are good, hard-working people all over the country, particularly in Nebraska. A lot has been said about Nebraska. I hope the people in Nebraska will be heard. This is not over. They may get 60 votes in the next couple days, but this is not over. We are going into the fourth quarter, and the most valuable player on our team is the American people.

Speak up, speak out. If you don't like what is going on, if you don't like the phony baloney accounting, if you are upset about your taxpayer dollars being used to fund abortions, speak up. If you think there is a better way of doing business, let us know about it. There is a long way to go. It has to go back to the House. The House has a say. One Senator indicated the House better take it or leave it. That is not good government. That is not the way it works. Three of us have been in the House. I want you to know this is far from over. Public opinion matters to us all. To the American people who are concerned about this being a done deal, it is not. You can change the outcome. I hope you will get involved. At the end of the day, it is your country we are talking about.

The ACTING PRESIDENT pro tempore. The Senator from Montana.

Mr. BAUCUS. Madam President, it has been more than a month since the majority leader moved to proceed to the health care bill before us today. This bill will provide real reform for our Nation's flawed health care system. This bill is the product of years of hard work, study, and deliberation in both the Finance Committee and the HELP Committee—and I mean years—all transparent, all aboveboard, all out in the open. In fact, in the Finance Committee, we initiated a new requirement that all amendments to the bill would have to be posted in advance on the Internet so everybody could know what they were, the same with the bill itself. The mark was on the Internet for a couple 3 days before we even went to markup. It is unprecedented how open and transparent the process has been. The same is true in the HELP Committee.

The culmination of these efforts has been the weeks of debate on this bill in the Senate. These provisions have been in the public domain for a long time. It is true there could be minor changes here and there, but most of this has been in the public domain for a long time. We have considered numerous amendments. We have engaged in a full and healthy discussion. The bill before us is fully paid for. It is important to keep reminding colleagues over and over again: This is fully paid for. Don't take my word for it. That is what the CBO said. The American people trust and realize, according to the Congressional Budget Office, a nonpartisan organization, that this bill is fully paid for. It does not add one thin dime to the deficit. You are going to hear others who don't have their own proposals just want to be negative, want to try to shoot holes in this, try to say it adds to the deficit. That is their opinion. That is not the opinion of the CBO. CBO says it does not add one thin dime.

This bill will also reduce the Federal deficit in the short term and over the long term. It reduces the Federal deficit. We are so very concerned about

deficits. We in the Congress are and the country is. We have to begin as soon as we can to start getting those deficits down and the national debt lowered. This health care reform bill not only provides health insurance coverage and reforms the insurance industry dramatically, it also takes the steps of lowering the deficit and lowering the long-term debt.

Let me quote from the Congressional Budget Office letter of yesterday:

CBO and [Joint Committee on Taxation] estimate that, on balance, the direct spending and revenue effects of enacting the Patient Protection and Affordable Care Act incorporating the managers' amendment would yield a net reduction in federal deficits of \$132 billion over the [10-year] period.

A net reduction of \$132 billion. That is even better than the merged bill was just before we included the managers' amendment. That was a \$130 reduction in the national deficit. With the managers' amendment, according to the CBO, there is a net reduction in the Federal deficit of \$132 billion over the 10-year period. What about later? Often people say: Gee, I hear you, Senator, you are taking care of things in the short term, but you are enacting legislation that will have an adverse long-term effect. That is what you guys do back there.

You hear that often. Let me disclose what the Congressional Budget Office says about that. This legislation will reduce the deficit markedly in the out-years. Here is what the CBO says in a letter released today:

All told, the [Congressional Budget Office] expects that the legislation, if enacted, would reduce federal budget deficits over the decade after 2019 relative to those projected under current law—with a total effect during that decade that is in the broad range [of] between one-quarter and one-half percent of GDP.

What are they saying? They are saying that in the second 10 years, the deficit will be reduced between one-quarter and one-half percent of GDP. That is between \$630 billion and \$1.3 trillion. That is real money. We are going to reduce the Federal deficit by this legislation alone. Let's take the between \$630 billion and \$1.3 trillion—roughly, \$1 trillion in the next decade. That is important. That is significant. That is a good start.

The legislation before us will extend insurance coverage to more than 30 million Americans. Think of that, 30 million Americans who today do not have insurance will get health insurance. That is so important. I have forgotten the exact figure, but I remember there was a Harvard study that concluded that 45,000 Americans die every year because they have no health insurance. Obviously, people without health insurance die earlier, at an earlier age. Just for the sake of their own health, it is good those people get health insurance, let alone the benefit to hospitals by reducing uncompensated care.

This legislation will increase insurance coverage to more than 30 million Americans. I have just been passed a note that people have a 40-percent higher chance of dying without health insurance. We are saying to those folks, those 31 million Americans, we are going to figure out a way so you have health insurance so you do not have that 40-percent higher risk of death.

Here is what CBO says about coverage:

By 2019, the CBO and [Joint Committee on Taxation] estimate that the number of non-elderly people who are uninsured will be reduced by about 31 million.

CBO goes on to say:

Under the legislation, the share of legal nonelderly residents with insurance coverage would rise from 83 percent currently to about 94 percent.

That is 94 percent of the folks in our country, excluding seniors, because they have insurance under Medicare, excluding them and excluding the unauthorized, the total number of Americans who have health insurance will rise from the current number of 83 percent to about 94 percent.

This legislation will drive down premium costs for virtually all of us. It will drive down premium costs for virtually all. In an earlier letter, the CBO indicated premiums would go down for roughly 93 percent of Americans under the underlying bill. Premiums would go down about 93 percent for Americans. I was going to put a table in the record, but our rules don't allow us to put tables in, so I summarized. The conclusion of that summary is 93 percent of Americans will experience lower premiums—not dramatic for some folks but nevertheless down, and down is better than not down.

Insurance costs would go down significantly for those receiving tax credits in the new insurance exchanges. It will protect consumers from harmful insurance company practices. This is so important. As you know, no longer will insurance companies be able to deny coverage for those with pre-existing conditions. It is an outrage how much insurance companies deny coverage based on preexisting conditions. We all hear stories many times, if not from direct family members, from friends of family who run into this. It is so common, especially in the individual market as people buy insurance for themselves. Insurance companies deny coverage, deny giving health insurance to somebody because of a preexisting condition. It is wrong.

No longer will insurance companies be able to drop coverage for those who are sick. That is very important too. Companies often rescind willy-nilly. They found something in the background of the person, you didn't tell us about that so we are rescinding your policy. That is not right. That is just not right. We prevent that from happening in this legislation.

It will also improve choice and competition in the insurance market. We talk a lot about choice and competition. This legislation provides more choice in choosing policies and more competition in the insurance market. It will also create a true marketplace where plans compete on cost and quality rather than on their ability to cherry-pick the healthiest among us.

It will represent the largest tax cut for American families that Congress has passed since 2001. This legislation includes the largest tax cut for American families that Congress has passed since that tax cut bill in 2001, the largest. It is the tax credits people will receive to help them buy insurance. That totals up, I think, to \$440 billion. I have forgotten the exact figures. But this is the largest tax cut for American families since 2001. It will provide billions of dollars in tax credits to help families, workers, and small businesses to buy quality, affordable health care insurance. The managers' amendment makes this good bill even better. It will provide even more consumer protections against harmful insurance industry practices.

For example, it will hold companies accountable for excessive premium rate increases. It will require them to spend more on consumer benefits and less on administrative costs and profits. That is new. That is even better consumer protection compared with the underlying bill. It will restrict the ability of health plans to impose annual limits on benefits. That is new, restricting the ability of health plans to impose annual limits on benefits. It is wrong if you have an insurance policy that, lo and behold, the company says: We didn't know you were going to be that sick so we stopped the benefits you can get, annually and also lifetime. We do both. We restrict the ability of health plans to impose not only annual limits but also lifetime limits on benefits.

This managers' package will ensure that companies cannot discriminate against children with preexisting conditions and do so right away, beginning with plans that become effective mid-year next year. The preexisting condition restriction would ordinarily not take effect for a couple years, but for children the preexisting condition prohibition will take effect right away. There are other provisions to help people between now and 2014. There is high-risk pooling, for example, lots of different provisions in this bill which will help people get good benefits and protection very quickly.

This legislation will provide tax credits to even more small businesses. The managers' amendment will provide even more tax credits than the underlying bill. These benefits will now be available right away, in 2010. It is also a concern when will the tax credits for small business go into effect—shouldn't

they go into effect earlier. Under this managers' amendment, these benefits will be available in 2010.

This will also provide more health insurance choices through a new multistate option. That option offers consumers the same health insurance Congress has today—no small matter. It will extend extra funding for the Children's Health Insurance Program for 2 additional years. We are all very concerned about kids' health care. The children's health care program has done a pretty good job. This has been extended, under the managers' amendment, for an additional 2 years. It will do even more to control rising health care costs and reward even more providers for providing quality care to seniors through the Medicare Program. It will invest \$10 billion in community health centers. They are so important, community health centers, for folks who need help right away and don't have insurance, just need the care right away. Especially in rural communities, it will provide access to critical care where often that care is most needed.

These are the reforms which Americans have been waiting for, for decades. Americans are waiting for these changes. They are waiting for these reforms and have been for a long time. Decades may be an understatement. Our health insurance system just doesn't do what it should for Americans, the people we represent. Finally, we are taking a very significant first step to providing those reforms. These are reforms American families, workers, and businesses desperately need. They are reforms on which our economic stability depends. That is no small matter either. If we get our insurance costs under control, that is more economic stability for everyone. It is not just for families who don't know what the insurance company is or is not going to do, it is for small businesses that don't know whether premiums will be up or by how much next year. Why? It is more economic stability for families and small businesses and soon more economic stability for budgets, State budgets, our Federal budget.

We need to get a little more control over all the excessive costs that are going up, and also the volatility, the yo-yo effect that premiums have and out-of-pocket cost impositions have on people. This will help them very significantly.

So by and large, to be honest—I know this sounds a little naive, perhaps—I do not know why this bill does not get an overwhelming endorsement. This is a big vote on both sides of the aisle. Then we can, next year, keep going from there; add new provisions that need to be added, correct mistakes that probably this legislation is going to have, but work together because most Americans want us to work together

back here. They do not like us being partisan or political.

I must say, this place is getting a little more partisan over the last couple years than it was earlier. It is not what the American people want. They want us to do our job, do what is right. This bill clearly is in the bounds of reasonableness of what is right and what is the right thing to do to get control of our health care system.

Again, I hope we can get this passed by a large margin. It will pass. But I would like it passed by a large margin.

Madam President, I now yield 20 minutes to the Senator from Rhode Island, Mr. WHITEHOUSE.

The ACTING PRESIDENT pro tempore. The Senator from Rhode Island.

Mr. WHITEHOUSE. Madam President, I thank Chairman BAUCUS.

As we are here in the Senate today, Washington rests under a blanket of snow, reminding us here of the Christmas spirit across the Nation, the spirit that is bringing families happily together for the holidays. Unfortunately, a different spirit has descended on this Senate. The spirit that has descended on the Senate is one described by Chief Justice John Marshall back in the Burr trial: "those malignant and vindictive passions which . . . rage in the bosoms of contending parties struggling for power."

Two-time Pulitzer Prize winner Richard Hofstadter captured some examples in his famous essay, "The Paranoid Style in American Politics." The malignant and vindictive passions often arise, he points out, when an aggrieved minority believes that "America has been largely taken away from them and their kind, though they are determined to try to repossess it and to prevent the final destructive act of subversion."

Does that sound familiar in this health care debate? Forty years ago, he wrote that. Hofstadter continued, those aggrieved fear what he described as "the now familiar sustained conspiracy"—familiar then, 40 years ago; persistent now—whose supposed purpose, Hofstadter described, is "to undermine free capitalism, to bring the economy under the direction of the federal government, and to pave the way for socialism. . . ." Again, familiar words here today.

More than 50 years ago, he wrote of the dangers of an aggrieved rightwing minority, with the power to create what he called "a political climate in which the rational pursuit of our well-being and safety would become impossible"—"a political [environment] in which the rational pursuit of our well-being and safety would become impossible."

The malignant and vindictive passions that have descended on the Senate are busily creating just such a political climate. Far from appealing to the better angels of our nature, too

many colleagues are embarked on a desperate no-holds-barred mission of propaganda, falsehood, obstruction, and fear.

History cautions us of the excesses to which these malignant, vindictive passions can ultimately lead: tumbrels have rolled through taunting crowds; broken glass has sparkled in darkened streets; "strange fruit" has hung from southern trees; even this great institution of government that we share has cowered before a tail gunner waving secret lists.

Those malignant moments rightly earned what Lord Acton called "the undying penalty which history has the power to inflict on wrong." But history also reminds us that in the heat of those vindictive passions, some people earnestly believed they were justified. Such is the human capacity for intoxication by those malignant and vindictive political passions Chief Justice Marshall described. I ask my colleagues to consider what judgment history will inflict on this current spirit that has descended on the Senate.

Let's look at what current observers are saying as a possible early indicator of the judgment history will inflict. Recently, the editor of the Manchester Journal Inquirer editorial page wrote of the current GOP, which he called this "once great and now mostly shameful party," that it "has gone crazy," is "more and more dominated by the lunatic fringe," and has "poisoned itself with hate." He concluded, they "no longer want to govern. They want to emote."

A well-regarded Philadelphia columnist recently wrote of the "conservative paranoia" and "lunacy" on the Republican right. The respected Maureen Dowd, in her eulogy for her friend, William Safire, lamented the "vile and vitriol of today's howling pack of conservative pundits."

A Washington Post writer with a quarter century of experience observing government, married to a Bush administration official, noted about the House health care bill, "the appalling amount of misinformation being peddled by its opponents"; she called it a "flood of sheer factual misstatements about the health-care bill," and noted that "[t]he falsehood-peddling began at the top. . . ."

The respected head of the Mayo Clinic described recent health care antics as "scare tactics" and "mud."

Congress itself is not immune. Many of us felt President Bush was less than truthful, yet not one of us yelled out "You lie!" at a President during a joint session of Congress. Through panics and depressions, through world wars and civil wars, no one ever has—never—until President Obama delivered his first address. And this September, 179 Republicans in the House voted to support their heckler comrade. Here in the Senate, this month,

one of our Republican colleagues regretted, "Why didn't I say that?"

A Nobel prize-winning economist recently concluded thus:

The takeover of the Republican Party by the irrational right is no laughing matter. Something unprecedented is happening here—and it's very bad for America.

History's current verdict is not promising.

How are these unprecedented passions manifest in the Senate? Well, several ways.

First, through a campaign of obstruction and delay affecting every single aspect of the Senate's business. We have crossed the mark of over 100 filibusters and acts of procedural obstruction in less than 1 year. Never since the founding of the Republic—not even in the bitter sentiments preceding the Civil War—was such a thing ever seen in this body. It is unprecedented.

Second, through a campaign of falsehood: about death panels, and cuts to Medicare benefits, and benefits for illegal aliens, and bureaucrats to be parachuted in between you and your doctor. Our colleagues terrify the public with this parade of imagined horrors. They whip up concerns and anxiety about "socialized medicine" and careening deficits, and then they tell us: The public is concerned about the bill. Really?

Third, we see it in bad behavior. We see it in the long hours of reading by the clerks our Republican colleagues have forced. We see it in Christmases and holidays ruined by the Republicans for our loyal and professional Senate employees.

It is fine for me. It is fine for the Presiding Officer. We signed up for this job. But why ruin it for all the employees condemned by the Republicans to be here?

We see it in simple agreements for Senators to speak broken. We see it, tragically, in gentle and distinguished Members, true noblemen of the Senate, who have built reputations of honor and trustworthiness over decades being forced to break their word, and double-cross their dearest friends and colleagues. We see it in public attacks in the press by Senators against the parliamentary staff.

The parliamentary staff is non-partisan; they are professional employees of the Senate who cannot answer back. Attacking them is worse than kicking a man when he is down. Attacking them is kicking a man who is forbidden to hit back. It is dishonorable.

The lowest of the low was the Republican vote against funding and supporting our troops in the field in a time of war. As a device to stall health care, they tried to stop the appropriation of funds for our soldiers. There is no excuse for that. From that there is no return. Every single Republican Member was willing to vote against cloture on

funding our troops, and they admitted it was a tactic to obstruct health care reform.

The Secretary of Defense warned us all that a "no" vote would immediately create a "serious disruption in the worldwide activities of the Department of Defense." And yet every one of them was willing to vote "no." Almost all of them did vote "no." Some stayed away, but that is the same as "no" when you need 60 "yes" votes to proceed. Voting "no" and hiding from the vote are the same result. And for those of us here on the floor to see it, it was clear: The three who voted "yes" did not cast their "yes" votes until all 60 Democratic votes had been tallied and it was clear that the result was a foregone conclusion.

And why? Why all this discord and discourtesy, all this unprecedented, destructive action? All to break the momentum of our new, young President. They are desperate to break this President. They have ardent supporters who are nearly hysterical at the very election of President Barack Obama: the "birthers," the fanatics, the people running around in rightwing militias and Aryan support groups. It is unbearable to them that President Barack Obama should exist. That is one powerful reason.

It is not the only one. The insurance industry, one of the most powerful lobbies in politics, is another reason. The bad behavior you see on the Senate floor is the last thrashing throes of the health insurance industry as it watches its business model die. You who are watching and listening know this business model if you or a loved one has been sick: the business model that will not insure you if they think you will get sick or if you have a preexisting condition; the business model that, if you are insured and you do get sick, job one is to find loopholes to throw you off your coverage and abandon you alone to your illness; the business model, when they cannot find that loophole, that they will try to interfere with or deny you the care your doctor has ordered; and the business model that, when all else fails, and they cannot avoid you or abandon you or deny you, they stiff the doctor and the hospital and deny and delay their payments for as long as possible—or perhaps tell the hospital to collect from you first, and maybe they will reimburse you.

Good riddance to that business model. We know it all too well. It deserves a stake through its cold and greedy heart, but some of our colleagues here are fighting to the death to keep it alive.

But the biggest reason for these desperate acts by our colleagues is that we are gathering momentum, and we are gathering strength, and we are working toward our goal of passing this legislation. And when we do—when we do—

the lying time is over. The American public will see what actually comes to pass when we pass this bill as our new law. The American public will see firsthand the difference between what is and what they were told.

(Mr. FRANKEN assumed the chair.)

Facts, as the Presiding Officer has often said, are stubborn things. It is one thing to propagandize and scare people about the unknown. It is much tougher to propagandize and scare people when they are seeing and feeling and touching something different.

When it turns out there are no death panels, when there is no bureaucrat between you and your doctor, when the ways your health care changes seem like a good deal to you, and a pretty smart idea—when the American public sees the discrepancy between what is and what they were told by the Republicans—there will be a reckoning.

There will come a day of judgment about who was telling the truth. Our colleagues are behaving in this way—unprecedented, malignant, and vindictive—because they are desperate to avoid that day of judgment. Frantic and desperate now and willing to do strange and unprecedented things, willing to do anything—even to throw our troops at war—in the way of that day of reckoning.

If they can cause this bill to fail, the truth will never stand up as a living reproach to the lies that have been told, and on through history our colleagues could claim they defeated a terrible monstrosity. But when the bill passes and this program actually comes to life and it is friendly, when it shelters 33 million Americans, regular American people, in the new security of health insurance, when it growls down the most disgraceful abuses of the insurance industry, when it offers better care, electronic health records, new community health centers, new opportunities to negotiate fair and square in a public market, and when it brings down the deficit and steers Medicare toward a safe harbor—all of which it does—Americans will then know, beyond any capacity of spin or propaganda to dissuade them, that they were lied to. And they will remember. There will come a day of judgment, and our Republican friends know that. That is why they are terrified.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I yield 15 minutes to the Senator from Oregon.

The PRESIDING OFFICER. The Senator from Oregon is recognized.

Mr. WYDEN. Mr. President, I thank you, and I thank the chair for his courtesy as well.

At this time of the year, millions of Americans are out in the stores doing their holiday shopping. That is because we Americans enjoy our free markets and our free enterprise system. Whether it is for a holiday or we are shopping

for a car or food or a house, we Americans believe we ought to have quality choices in our marketplace, and Americans, our people, ought to be rewarded when they shop wisely.

The American economy works this way for just about everything except health care. Today, American health care is mostly a competition-free zone. Insurance companies enjoy extraordinary privileges as monopolies. Insurers are exempt from the antitrust laws, and in scores of American towns, our people can only get their health care under the heel of just one health insurance company.

Today's health insurance market is essentially dysfunctional, and for most Americans, they have no way to hold the insurance companies accountable. It has been that way since the middle of the last century, since the days of wage and price controls. For literally 60-plus years, American consumers have not been in the position to be able to hold the insurance companies accountable and to get the value for their dollar that they get in every other part of our economy.

Changing this broken health care marketplace is the heart of real health reform. The legislation we will vote on tonight—and, I might add, the chairman of the Finance Committee is on the floor, and this essentially began with his white paper when we started working on it in the Finance Committee—the legislation we are going to vote on tonight, in my view, starts the long march to empowering consumers, to turning the tables on the insurance lobby, and to getting more value for our health care dollar. This can be done through a part of the health reform debate that got some discussion in the Finance Committee and then, because people liked it and didn't know much about it, has since essentially gotten lost in the discussion; that is, the health insurance exchanges.

For folks listening at home today, an exchange is going to be like a farmers market. Various types of health plans are going to be marketed through the exchange, and for the first time—this was an area in which Chairman BAUCUS and I had a great interest in the committee—it is going to be possible for folks to make apples-to-apples comparisons of these various health plans.

There are requirements in the bill that keep the low-quality products out of the exchange. Chairman BAUCUS and I got interested in the need for consumer protection particularly early on in programs, back in the days after Medicare got established when seniors were buying 15 or so private policies to supplement their Medicare and most of them weren't worth the paper they were written on. So with these exchanges as they are designed, that is not going to happen. People are going to get value for their dollar on day one.

There are also some important consumer protection requirements, and I

particularly wish to commend the Presiding Officer of the Senate, whose work I have been following. These consumer protection requirements will ensure that now when a consumer pays a dollar in a premium, they are going to get a lot more back in benefits for their dollar. This protection is called a loss ratio. People are going to hear a lot about that concept. It is new, but it essentially means the insurance companies can't walk off with their premium dollar, use it on administrative expenses, use it on salaries, but will instead return it to the public and the consumer in the form of benefits and premiums. I commend the Presiding Officer, the Senator from Minnesota, for ensuring this was all put in place. In my view, these ideas ought to appeal to both Democrats and Republicans—these market-oriented consumer protection principles—simply because they are just common sense.

So should section 10108 of Senator REID's managers' amendment on which the majority leader, Chairman BAUCUS, and I worked very closely. It is entitled "Free Choice Vouchers." This section creates something that has never existed before: a concrete way for middle-income Americans who cannot afford their health care to actually push back against the insurance lobby and force insurance companies to compete for the business of covering those middle-class folks in the insurance exchanges. Unlike today, where if a hard-working, middle-class American can't afford just the one health insurance policy available to him and, thus, is out of luck, with this new provision, there will be a different health care marketplace, with free enterprise choices that can actually drive down costs for the middle class while ensuring those choices are of good quality.

So the big hurdle, it seems to me, in setting up a new health care marketplace, which began with Chairman BAUCUS's white paper in the Senate Finance Committee, is getting these exchanges and getting these vouchers in place.

We are going to be able to build on it. In my view, I think we will have additional opportunities to build on these ideas before the legislation goes to the President. For example, Senator COLLINS, our Republican colleague from Maine, Senator BAYH, and I have written bipartisan legislation that has been endorsed by the influential National Federation of Independent Business and we are working to include that proposal in this legislation. This bipartisan proposal would permit employers who are in the insurance exchange and who voluntarily choose to do so—let me emphasize that this is a matter of a voluntary choice by employers—if they choose to do so, they could give their workers a voucher so that those workers could shop for their coverage. What this means is for millions of em-

ployers and employees, the amendment would provide the opportunity to have a choice of American health care plans.

These are unquestionably challenging days for American employers and workers trying to be as competitive as possible in tough global markets. For employers who want more ways to help their workers and the employers' bottom line and for workers who would like more take-home pay and lower health expenses, this bipartisan amendment can be a lifeline. We hope our colleagues of both parties will agree and join our effort, and this can be part of the legislation that ultimately will go to the President.

Let me close with this. My great hope is that long after 24/7 cable TV has moved on to other topics, Democrats and Republicans here in the Senate can figure out a new strategy for working together, a bipartisan strategy that will let us, together, tap the full potential of real health care reform. That potential is for holding down costs, getting more value for our health care dollar, and, finally, achieving quality, affordable health coverage for all Americans.

I offer this thought because I have long felt both parties have valid views on this topic. I believe our party is absolutely right in saying you cannot fix American health care unless all Americans get good-quality, affordable coverage. If you don't do that, too often uninsured folks will shift their bills to insured folks, there won't be enough prevention, and you won't be in a position to get the most value for the health care dollar.

I continue to believe our colleagues on the other side of the aisle have valid points as well. They make valid points about the role of marketplace forces, the role of competition, the role of choice.

There has to be a way in the days ahead—one of the things that has pleased me is Chairman BAUCUS has said we are going to have a lot of oversight hearings and a lot of work in the days ahead to actually implement this. None of us think we can create a new health care marketplace where there hasn't been one for 70 years in a matter of minutes. So I am very pleased Chairman BAUCUS has indicated we will be doing a lot of the painstaking oversight work in the days ahead to actually implement this transformation in American health care, and I think the chairman knows I will be his partner in those efforts to get this implemented.

So after a year of tough financial hardships, let's find a way to bring to this Senate floor bipartisanship, common sense, and the good will that is public service at its best.

I close by saying that I look forward to working with the chairman of the Finance Committee, who I know shares these views as well.

With that, Mr. President, I yield the floor.

Mr. BAUCUS. Mr. President, I wish to thank the Senator from Oregon for many reasons, one of which is his kind words, which are really appreciated but, much more important than that, his long dedication to health care reform. He even worked for the Gray Panthers way back before he came here. I remember the name RON WYDEN, Gray Panthers, a good number of years ago. Then, lo and behold, both Houses of Congress together—we worked together on reforming Medigap coverage. It was an outrage. Today we talk about medical loss ratios of maybe 80 percent, 85 percent, up to 90 percent, and so forth. I can remember back when it was an outrage, the degree to which Medigap insurance coverage had medical loss ratios of not 80 percent, not 70 percent, not 60 percent; it would be below 50 percent. Insurance companies were selling insurance to seniors trying to cover that gap between what Medicare would and would not cover, and just tragically low, embarrassingly low, outrageously low medical loss ratios.

Senator WYDEN and I got together and got legislation passed to reform the Medigap market—to make Medigap insurance plans more fair. They were ripping seniors off, there was no doubt about it, and we got that changed.

Now, on health care reform, an ardent advocate of more competition, more choice in our health care system—it is clear we need more competition. It is clear we need more choice. On the competition side, in many of our States we find there is only one or two insurance companies that dominate the entire State. That is very true around our country. There is just not the competition there should be.

In addition, there is not the choice. A lot of employees would like to have more choice among insurance companies in their kinds of policies, and so on and so forth. We have a system where most employees are tied to their employer; it is pretty much insurance coverage the employer offers.

If we were starting from scratch maybe 20, 30, 40, 60, maybe 80 years ago, we may not have had such an employer-based system as we have today. Our current Tax Code also tends to encourage excessive insurance coverage because of our employer-based system.

Anyway, I am digressing. Senator WYDEN got us thinking a lot earlier about the problems that caused, and, frankly, I think he is right. I think a lot of Americans think he is right. You can only take things a step at a time here, and we are probably not going nearly as far as the Senator from Oregon wishes to go. But I thank him. He is there, he is dogged, and he works hard on behalf of seniors. He is an advocate of American consumers, respected by health insurance companies, not letting the companies take advantage of citizens. I thank the Senator for that.

I do not see any Senators on the floor on our side. If there were, it would be a good time for them to speak. Pending the arrival of the Democratic Senators, let me say a few things about small business.

Clearly, one of the goals of health care reform is to ensure that employees of small businesses have good, quality, affordable health care options. We all know that is clear. I have talked to small businesspeople.

I will never forget a conversation I had with a logger who has four or five or six people working for him. It was about 2 or 3 years ago. I asked him if he had health insurance. He said, yes, for his family—his wife and himself.

I asked: How about your employees? He said, no; he didn't. You could tell he wanted to, and he wasn't just blowing smoke. He clearly wanted to provide insurance for his employees, but it just pained him because it was too expensive.

We all hear stories like that; they are legion. I can remember talking to another small businessman in my State of Montana, a contractor, who has 5, 6, 8, 10, people working for him. He is just beside himself because the insurance company told him his premiums are going to go up 40 percent next year.

He said: Max, I can't deal with that.

I asked: Why are they going up 40 percent?

He said: Well, they found a pre-existing condition with respect to one of my employees. He said: Max, I was beside myself. I can't afford a 40-percent increase. They said it would only be a 20-percent increase if I let him go. But he has been with me 15, 20 years and is one of my best employees. I can't let him go.

He found another carrier and kept his employee. So he did find another insurance carrier, but he had to pay about a 20-percent increase in premiums. He was able to keep his employee, but that is just wrong. It is so hard for small businesses to provide health insurance to their employees. I know it is a trite thing to say, but most jobs in our country are created by small businessmen. That is where most of the jobs are, and it is where most of the creativity is. That is, in many cases, where the greatest need is to help encourage entrepreneurship, American ingenuity, and where a small businessperson can do a good job with the service he is providing.

Last year, 62 percent of small businesses did offer health insurance to their employees. Compare that with other companies that have, say, 200 employees. Among all companies in America that have 200 or more employees, 99 percent of them have offered their employees health insurance. Contrast 62 percent of small businesses offer health insurance and 99 percent of businesses with more than 200 employees offer health insurance.

Among the very small businesses in our country it is lower, lower than 69 percent. Now it is only 49 percent—a very small number of employees—that have health insurance through their small business employer. There are clearly very significant reasons for that. There are barriers that prevent small businesses from finding affordable health insurance options. What are they?

Small businesspeople tell us the main reason—at least one of them—is that the premiums are just too high. I mentioned an example of the contractor I talked with in my State, who said they are going to charge a 40-percent increase in premiums as further evidence that premiums are too high. It is understandable that is one of the main reasons small businesses can't get health insurance.

In the past 10 years, premiums have risen 82 percent for single workers and 93 percent for families employed by small business—virtually doubled premiums in the last 10 years if you are a single person and work for a very small business. That is not true for big business.

As health care costs rise, small businesses are forced to make workers pay a greater portion of these expensive premiums. In 2008, for example, employees at small businesses that did provide health insurance paid more than twice what they paid just 8 years earlier—twice as much.

The low rate of offering and higher cost-sharing responsibilities for employees in small businesses often limit the ability of small businesses to attract and retain employees.

That is why the health care bill before us includes many provisions to make quality coverage for small business more affordable not only for the businesspeople but for their employees. Before the managers' amendment, the bill did include \$24 billion in tax credits to help small businesses and charitable organizations purchase health insurance for their employees.

The managers' amendment dedicates additional billions to providing tax credits to small businesses to make health insurance more affordable. The Congressional Budget Office and the Joint Committee on Taxation, which I know is near and dear to the heart of the Presiding Officer—after all, they are an independent arbiter. They can tell us with objectivity what this legislation is or is not—they estimate that the tax credit for small businesses will provide \$40 billion in tax relief to small businesses over their first 10 years.

In addition, we start the tax credits a year early; that is, we start them in 2010. In the earlier bill, it was 2011. In the managers' amendment, we start in 2010, right away. This means that in just over a week, after the legislation is passed and signed into law, eligible small businesses will be able to receive

tax credits to help them buy health insurance for their employees. This expansion of the tax credits means eligible small businesses will now be able to receive up to 6 years of tax credits. So now starting in 2010, eligible small businesses will receive tax credits worth up to 35 percent of the employer's contribution to employee health insurance plans—35 percent.

Then in 2014, it is even better. Eligible small businesses will receive tax credits worth up to 50 percent of the employer's contribution to employee health insurance plans purchased in health insurance exchanges. The employer would get 50 percent of the cost of the health insurance, that would be available for credit; that is, the employer can credit 50 percent, subtract from his income taxes 50 percent of the cost of insurance.

What do you have to do to qualify? Businesses must cover at least 50 percent of employee premium costs. If you cover half the employee costs, you get to subtract your half from your income taxes. The value tax credit is based on the size of the business and the average wage paid to its employees.

The managers' amendment strengthens the assistance to small businesses by expanding the small business tax credit. In the managers' amendment, the tax credit will be available to small businesses with fewer than 25 employees and less than \$50,000 average annual wages. And the full value of the tax credit is now available to small businesses with 10 or fewer employees and \$25,000 or less in average annual wages. It moved up from \$20,000 to \$25,000 so more small businesses can qualify and take advantage of that tax credit. By expanding the wage thresholds, which I just described, more small businesses will be able to claim the tax credits. And tax credits will phase out more slowly as wages increase. This was a high priority for small businesses. We recognized that and responded to it.

The small business tax credit will help make insurance affordable for many small businesses. In 2011, 4.2 million Americans will be covered by quality, affordable health coverage; 4.2 million Americans will be able to take advantage of this. On average, small businesses across the country would receive a new tax credit of about \$4,900 to help them purchase insurance. That is per employee, \$4,900 to help them purchase insurance for their employees.

The CBO estimates that the small business tax credit will help lower insurance costs by 8 to 11 percent for the employees of small businesses receiving the credit. Let me say that again. CBO estimates that the small business credit will help lower insurance costs by 8 to 11 percent for the employees of small businesses who receive their credit. Without the small business tax credit, many people would have to buy insurance through the exchange on

their own without the benefit of a contribution from their employer.

One of the reasons many small businesses are currently unable to afford health insurance is because small businesses lack the buying power larger companies have to negotiate affordable group rates. The Senate bill creates small business insurance exchanges, known as SHOP exchanges, where small businesses can band together and pool their risks, which will enhance their choice and buying power. These State-based exchanges will be a critical tool to help small businesses with fewer than 100 employees shop for health insurance plans and determine their eligibility for tax credits to buy health insurance. Small businesses that prosper and grow beyond 100 employees would be allowed to continue shopping through the exchanges—pooling. The insurance plans sold in SHOP exchanges would be subject to the same transparency requirements and consumer protections, so small businesses can feel confident they are purchasing high-quality plans that will provide quality, affordable coverage for their workers.

The legislation also institutes reforms in the insurance market that will protect individuals and small businesses purchasing plans both inside and outside these SHOP exchanges. These reforms will stop insurance companies from denying coverage based on a person's preexisting health condition or increasing a person's health insurance premiums based on health status or on gender and occupation—a practice that just has to be stopped.

These new regulations are essential to helping small businesses keep health care costs predictable from year to year. That is one of the big problems. Small businesses face this sea of chaos, of volatility, uncertainty, unpredictability in knowing what their insurance costs will or will not be. That is why insurance companies cherry-pick and take advantage for themselves to maximize their profits, but it has the opposite effect on small businesses. This will help, frankly, to buy a lot more certainty that we desperately need.

The changes in the managers' amendment will go the extra step and ensure this bill provides small businesses with the help they so desperately need. Passing health care reform is critical to small businesses. Without reform—this is no small matter; I am not blowing smoke here—without reform, many small businesses will be forced to drop their health insurance coverage they may already have because they can no longer afford it. They cannot afford the increase in premiums. This will leave many employees to fend for themselves in the individual market. We know without this bill passing how unfair the individual market is to people.

Many of the provisions in this bill were designed with small businesses in

mind. The bill gives small businesses access to a reformed marketplace where they will have improved buying power to negotiate rates. And the Senate bill provides tax credits to help small businesses buy health insurance for their employees.

Data from CBO tells us that these reforms will make coverage more affordable for millions of small business employees. The small business tax credit will help reduce health care costs for small businesses and their employees. As a result of the larger health reform proposals in the bill, there will be an increase in the percentage of small firms that offer health insurance coverage.

We must act to help small businesses access to quality, affordable health care options for their employees. Too many small businesses around the country are waiting.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. BARRASSO. Mr. President, I just heard my colleague from Montana talk about jobs that are going to be lost, and the jobs are going to be lost if this bill passes.

There was an article in the Wall Street Journal that quoted the Federation of Independent Business, a wonderful organization that works so well with small businesses in this country. Their prediction is that if this passes—if this passes—the mandates in this bill will mandate that employers provide health care. This is going to cost 1.6 million jobs by 2013.

Then I got an e-mail from a friend in Dubois, WY, who says that if this bill passes, he knows he is going to lay off workers—quite to the contrary of what my colleague from Montana says when he says it is going to help keep people working.

At a time when the country is experiencing 10 percent unemployment, at a time when the people's No. 1 concern is jobs and the economy of this country, we are now embarking on an additional spending spree when our national debt is at the highest levels ever.

I disagree with my colleague from Montana. I think, contrary to what he suggested—he said: I am not just blowing smoke—I believe we will lose jobs if this passes.

Mr. BAUCUS. Will the Senator yield for one brief minute?

Mr. BARRASSO. When I am finished with our comments on this side.

Mr. BAUCUS. I thank the Senator.

Mr. BARRASSO. I also heard the majority whip come to the floor and say the Republicans have only offered four amendments. I offered 19 amendments. So I ask unanimous consent that the pending amendment be set aside and that I be allowed to call up my amendment No. 3148 to protect individuals facing skyrocketing premiums.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. Reserving the right to object.

Mr. BARRASSO. The purpose of this amendment is—

Mr. BAUCUS. Reserving the right to object, and I will object, we have been—

Mr. BARRASSO. Regular order.

The PRESIDING OFFICER. Is there objection to the request?

Mr. BAUCUS. I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Wyoming.

Mr. BARRASSO. So we have a 383-page amendment brought to the floor, read on the floor yesterday. I worked my way through it, along with my staff—383 pages. And the majority whip comes to the floor and says the Republicans have not offered amendments. I just tried to offer one, unsuccessfully, and it has been objected to.

So I ask unanimous consent that the pending amendment be set aside and that I be allowed to call up amendment No. 3153 to protect young, healthy persons from increased insurance premiums.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. Mr. President, clearly this is a stunt. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BARRASSO. Mr. President, I ask unanimous consent that the pending—and these are—I just heard the comments—these are amendments that are aimed to keep the President's words that we will get insurance premiums under control, people will notice their premiums go down, that we will make it better for people, easier for people. The Democrats ought to accept all these amendments because they are intended to do just that.

I ask unanimous consent that the pending amendment be set aside and that I be allowed to call up amendment No. 3146. This amendment deals with individual mandate penalties and creates personal accounts for young people who are penalized and they have to pay a fee and a fine if they do not obey the individual mandate, and that would go into an account for them so they could use that money to buy their own health insurance.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. Reserving the right to object, this is the fourth time today Senators on the other side—

Mr. BARRASSO. Regular order.

Mr. COBURN. Regular order.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BARRASSO. Mr. President, I understand this is going to improve Medicare. I heard the chairman of the Finance Committee say this is going to

make Medicare stronger. I believe Medicare patients ought to have the freedom to contract and the right to privately contract for medical services with the physician of their choice.

If, as the chairman of the Finance Committee has now recommended in his statement, it doesn't work out the way it is suggested—I ask unanimous consent that the pending amendment be set aside and I be allowed to call up amendment No. 2984, Medicare patient freedom to contract.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. For the fifth time, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BARRASSO. Mr. President, that is why I am not surprised when I read polls that say negatives abound in polls about this bill, written in secret, brought to us just a little over 24 hours ago with a 383-page amendment, one that is now not going to be allowed to have any amendments offered.

I just offered four different amendments aimed to strengthen the health care system of the country. Each time, the chairman of the Finance Committee is not even interested in hearing what the amendments are about.

The people of Wyoming say: Don't cut my Medicare, don't raise my taxes, don't make things worse for me, especially in these economic times. This is a bill that is going to cut people's Medicare by \$500 billion, it is going to raise their taxes, and it is going to make things worse for the people of Wyoming and this country. That is why the front page of a local newspaper has a story, "Doctor Shortage Will Worsen." Great concerns.

Even the Actuary of Medicare and Medicaid says that if all of this goes through—and this is before we had the 383 new pages—if all of this goes through, one in five hospitals is going to have significant problems within the next 10 years and one in five doctors' offices may have to close. That is why this health bill is scary.

For anyone who has not had an opportunity to read Dr. COBURN's, Senator COBURN's article in the Wall Street Journal, an editorial, Thursday, December 17, I recommend the editorial to them. It is titled "The Health Bill Is Scary."

I ask unanimous consent to have this editorial printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal]

THE HEALTH BILL IS SCARY

(By Tom Coburn)

I recently suggested that seniors will die sooner if Congress actually implements the Medicare cuts in the healthcare bill put forward by Senate Majority Leader Harry Reid. My colleagues who defend the bill—none of whom have practiced medicine—predictably

dismissed my concern as a scare tactic. They are wrong. Every American, not just seniors, should know that the rationing provisions in the Reid bill will not only reduce their quality of life, but their life spans as well.

My 25 years as a practicing physician have shown me what happens when government attempts to practice medicine: Doctors respond to government coercion instead of patient cues, and patients die prematurely. Even if the public option is eliminated from the bill, these onerous rationing provisions will remain intact.

For instance, the Reid bill (in sections 3403 and 2021) explicitly empowers Medicare to deny treatment based on cost. An Independent Medicare Advisory Board created by the bill—composed of permanent, unelected and, therefore, unaccountable members—will greatly expand the rationing practices that already occur in the program. Medicare, for example, has limited cancer patients' access to Epogen, a costly but vital drug that stimulates red blood cell production. It has limited the use of virtual, and safer, colonoscopies due to cost concerns. And Medicare refuses medical claims at twice the rate of the largest private insurers.

Section 6301 of the Reid bill creates new comparative effectiveness research (CER) programs. CER panels have been used as rationing commissions in other countries such as the U.K., where 15,000 cancer patients die prematurely every year according to the National Cancer Intelligence Network. CER panels here could effectively dictate coverage options and ration care for plans that participate in the state insurance exchanges created by the bill.

Additionally, the Reid bill depends on the recommendations of the U.S. Preventive Services Task Force in no fewer than 14 places. This task force was responsible for advising women under 50 to not undergo annual mammograms. The administration claims the task force recommendations do not carry the force of law, but the Reid bill itself contradicts them in section 2713. The bill explicitly states, on page 17, that health insurance plans "shall provide coverage for" services approved by the task force. This chilling provision represents the government stepping between doctors and patients. When the government asserts the power to provide care, it also asserts the power to deny care.

If the bill expands Medicaid eligibility to 133% of the poverty level, that too will lead to rationing. Because Washington bureaucrats have created a system that underpays doctors, 40% of doctors already restrict access to Medicaid patients, and therefore ration care.

Medicaid demonstrates, tragically in some cases, that access to a government program does not guarantee access to health care. In Maryland, 17,000 Medicaid patients are currently on a waiting list for medical services, and as many as 250 may have died while awaiting care, according to state auditors. Kansas, the home state of Health and Human Services Secretary Kathleen Sebelius, faces a Medicaid backlog of more than 15,000 applicants.

Other unintended consequences of the Reid bill could wreak havoc on patients' lives. What happens, for instance, when savvy consumers commanded to buy insurance realize the penalty is the de facto premium? It won't take long for younger, healthier Americans to realize it's cheaper to pay a \$750 tax for coverage instead of, say, \$5,000 in annual premiums when coverage can't be denied if you get sick.

OMB Budget Director Peter Orszag's belief that mandatory health insurance will become a "cultural norm" is bureaucratic naïveté that will produce skyrocketing premiums and reduced care for everyone. My state's own insurance commissioner, a Democrat, recently confirmed this concern to me in a letter noting that "the result will be higher insurance rates due to a higher percentage of insured being higher risk/expense individuals."

But the most fundamental flaw of the Reid bill is best captured by the story of one my patients I'll call Sheila. When Sheila came to me at the age of 33 with a lump in her breast, traditional tests like a mammogram under the standard of care indicated she had a cyst and nothing more. Because I knew her medical history, I wasn't convinced. I aspirated the cyst and discovered she had a highly malignant form of breast cancer. Sheila fought a heroic battle against breast cancer and enjoyed 12 good years with her family before succumbing to the disease.

If I had been practicing under the Reid bill, the government would have likely told me I couldn't have done the test that discovered Sheila's cancer because it wasn't approved under CER. Under the Reid bill, Sheila may have lived another year instead of 12, and her daughters would have missed a decade with their mom.

The bottom line is that under the Reid bill the majority of America's patients might be fine. But some will be like Sheila—patients whose it lives hang in the balance and require the care of a doctor who understands the science and art of medicine, and can make decisions without government interference.

The American people are opposing this bill in greater numbers every day because the facts of the bill—not any tactic—are cause for serious concern.

Mr. BARRASSO. Mr. President, here you have it. We have a bill that is going to be voted on at 1 in the morning on a Monday morning. Why? Because the people who are proposing the bill are scared to let the American people know what is in it. That is why public opinion has soured on this proposal to the point that it is at the lowest level ever, with just 32 percent of Americans in favor, just less than one in three. Less than one in three Americans supports what is being proposed.

I believe each one of my amendments would have raised the level of support, would have made this better for American taxpayers, for American citizens, for American patients, for the patients who depend on our health care system, for the providers who give the care, and for the people who pay for it.

I see my colleague from North Carolina ready to rise. I am so happy to be joined on the Senate floor by these two wonderful colleagues who have a great bill of their own that has gotten very little hearing, very little opportunity, certainly no opportunity for a vote on the Senate floor.

As my Senate colleague from North Carolina gets his microphone ready to go, I will say that to be held to a false deadline of Christmas Day on something as important as a bill that is going to impact the health of every person in this country, impact one-

sixth of the economy of the United States—it is much more important that we get it right than that it gets rushed through with speed and secrecy, with not being able to offer amendments when a 383-page amendment by Senator REID is dropped on the table yesterday and a vote is going to be held at 1 in the morning on a Monday morning.

It is astonishing that we do not have bipartisan support, people working together to find solutions. It is astonishing when you have a body such as this of 100 Members, 2 of whom are physicians with 50 years of experience practicing medicine, working with the system, fighting against insurance companies and fighting against the government, two physicians who know that you do not want anybody between you and your physician, you do not want a government bureaucrat, you do not want an insurance bureaucrat, you do not want anyone. But what we are looking at is the worst of all possible worlds.

I ask my colleague from North Carolina if he has some additional thoughts.

Mr. BURR. I do, Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. BURR. Mr. President, I look around this Chamber, and I see the busts of many Vice Presidents who have served as the leaders of this Chamber. It makes me wonder what would they think of the process in which we are currently engaged, individuals who, in a time of history of our country, took so seriously what went on in this Chamber and the effects it had on the American people.

I look at the process we are going through right now and see the way we have trivialized this process—votes in the middle of the night. Twenty-four hours ago, there was not a managers' amendment. There was not a score. Then yesterday morning we got a managers' amendment, 380-some pages, and we got a score. Today we get a notice from the Congressional Budget Office saying that in their score, they made a \$½ trillion error, a \$500 billion, ½ trillion error in the projection they sent to Congress. In 24 hours, \$½ trillion.

Why doesn't this seem to bother those who are the authors of the bill? It is because it is not their money. It is the American people's money. That is the only way you could rationalize how you could be in Washington talking about spending \$2.5 trillion at best to stop waste, fraud, and abuse, because, let's face it, Republicans and Democrats agree: There is no health care reform in here. There is a coverage expansion, but there is no health care reform.

Democrats have walked to the floor and said that we lie. I am not lying. Show me the health care reform. Show me where you have drastically

changed, transformed health care. If you transform health care, then you wouldn't have to steal \$464 billion from Medicare.

Mr. BAUCUS. Will the Senator yield so I can show him?

Mr. BURR. Regular order, Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. BAUCUS. He doesn't—

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. BURR. I appreciate that, Mr. President.

We have gone through this, and we are refused the ability to offer amendments. We are refused the opportunity to sit in the back room where the legislation was constructed. It is shared with us when they are ready. But they use everybody's money. Tell me how it is fair to the American people.

When Nebraska gets a sweetheart deal under Medicaid, and Massachusetts and Vermont, in the managers' amendment, when Nebraska is told: We are going to expand Medicaid and we are going to hold you harmless in perpetuity, you will not have to pay, tell me how that is fair to the taxpayers of Virginia, tell me how it is fair to the taxpayers of Ohio, tell me how it is fair to the taxpayers of North Carolina that they are going to pay for what Nebraskans should be obligated to pay. I believe, knowing Nebraska, that the people of Nebraska would want to pay their fair share. But, no, to buy a vote, they have been given a deal.

This bill is still \$2.5 trillion. It still steals \$464 billion from Medicare. It still puts a tremendous unfunded mandate on every State in this country with the exception of the State of Nebraska. There are a number of States that have a grace period for some period of time, whatever it took to get their comfort level of their vote, but for every other State, at some point they are going to be obligated to pick up that difference.

We cover 31 million Americans who were not covered—that is a wonderful thing—and 15 million of them are dumped into Medicaid, the worst health care delivery system that exists in this country, a health care system that only has the opportunity today to see 60 percent of the available doctors because the other 40 percent will not see them.

Oh, by the way, what did the Chief Actuary of the Centers for Medicare and Medicaid Services say?

The Reid bill is especially likely to result in providers being unwilling—

Unwilling—

to treat Medicare and Medicaid patients, meaning that a significant portion of the increased demand for Medicaid services would be difficult to meet.

The Chief Actuary went on to say:

The CMS actuary noted that the Medicare cuts in the bill could jeopardize Medicare beneficiaries' access to care.

I just heard the Senator from Rhode Island basically come out and say that was a fabricated thing on the part of somebody on this side of the aisle. I am quoting the Chief Actuary, the President's chief health care budgetary person. The Actuary said it "could jeopardize Medicare beneficiaries' access to care." He goes on to say that he finds that roughly 20 percent of all Part A providers—hospitals, nursing homes, et cetera—would become unprofitable within the next 10 years as a result of these cuts. Hospitals will close, nursing homes will close. This isn't fabrication. This is the Chief Actuary of the Centers for Medicare & Medicaid Services, who is part of this administration. The CMS's Actuary found that further reductions in Medicare growth, through the actions of the independent Medicare advisory board—this is the advisory board that is being set up to make determinations about coverage in the future—which advocates have pointed to as a central linchpin to reducing health care spending, may be difficult to achieve in practice.

In other words, we are making claims that aren't right, it is the authors of the bill who are making claims that are not accurate, according to the Chief Actuary.

I yield to the minority leader.

Mr. MCCONNELL. I say to my friend from North Carolina, if that were not bad enough—and it may have been referenced here on the floor before I came out—we have an announcement from the Congressional Budget Office just today. The Senator from North Carolina may have referred to this. On the Director's blog today—the Director of the Congressional Budget Office—is the headline: "Correction Regarding the Longer-Term Effects of the Manager's Amendment to the Patient Protection and Affordable Care Act."

CBO has discovered an error in the cost estimate released yesterday—yesterday—related to the long-term budgetary effect of the manager's amendment. They go on to say they were about $\frac{1}{2}$ trillion off in looking at the long-term effects beyond the 10-year window, which further illustrates why we ought not to be rushing this thing through, and we ought to have further opportunity to discover what other problems there are, in addition to the ones the Senator from North Carolina has outlined with regard to special treatment for some States which all the rest of our States have to pay for.

Mr. BURR. The minority leader makes a great point. If we waited another day to vote, we might save another $\frac{1}{2}$ trillion. That is probably in the best interest of the American taxpayer.

I will wrap up, Mr. President, because I know Dr. COBURN wants to speak. Let me say this. I said earlier this still steals \$464 billion from Medicare. It also still raises taxes and fees to the

tune of \$519 billion. Many of those taxes and fees, by the way, are going to impact people well below the \$200,000 threshold the President promised he would never touch.

We have just learned in the managers' amendment that we have dropped the doctor fix. They should be comforted in knowing that they have a 2-month extension, but the 1-year extension was dropped in the managers' amendment. Dropped. Why? Because they had to pay for what they were doling out to get extra votes.

I ask unanimous consent at this time, Mr. President, to set aside the pending amendment, and I wish to call up amendment 3134, which is a 3-year doctor fix of the SGR and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. For the sixth time we are engaged in this stunt, so I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BURR. Well, Mr. President, my hope is no other Member from the other side will come to the floor and say that Republicans haven't come up with substantive amendments to this bill.

Dr. COBURN and I participated in 56½ hours in the HELP Committee. We offered numerous amendments. Some technical amendments were accepted. The amendments that meant anything were rejected along party lines. We have filed a comprehensive health care reform bill—the first one introduced in Congress—in May of this year, I believe. Still, Members from the other side come to the floor and say Republicans haven't offered anything. We were the first. They may not have liked it, but we were the first.

You know what, it doesn't cost this much and it doesn't raise taxes. I think Dr. COBURN will later talk about that bill a little.

I was glad to see that politics comes from all sides. In the managers' amendment we dropped the tax on botox. Hollywood spoke out about this tax on one of their health care tools. And what did we replace it with? We have now put a 10-percent tax on tanning salons. How in the hell does that affect health care? Explain that to me. Are we going to tax everything in this country? I can make a tremendous case that the 10-percent tanning salon tax gets exactly the person that the President said he wasn't going to affect, people who make under \$200,000—or are we income testing the tanning tax, too?

Mr. COBURN. Would the Senator yield for a question?

Mr. BURR. I yield to the Senator from Oklahoma.

Mr. COBURN. If we are going to tax tanning salons, why don't we tax anybody who goes to the beach? Because true sunlight is much worse for your skin than a tanning salon. So if the in-

tention was to prevent disease, why wouldn't we tax it where most of the disease occurs? Or how about kids' sports in the summer. Let's tax kids' baseball. Or swimming. Let's tax all the swimming pools because we have exposure to UV light.

This shows the precariousness and the silliness of a large portion of this, and I yield back.

Mr. BURR. The Senator makes a great point, and I am sure we have loaded the chairman of the Finance Committee with additional good ideas he can go back and think on. I am sure before it is over, we will fine parents who don't put suntan lotion on their children—especially if it doesn't meet high enough SPF to block everything the Sun might produce.

This is out of control. This is not the way to write a bill that affects one-sixth of the U.S. economy. I mean it is bad enough it is done behind closed doors, in a back room, with only a few people there, but when the No. 2 Democrat can walk on the floor and say: I haven't seen it, either—well, if the No. 2 Democrat hasn't seen it, how many people were there? How many people had input into this? Was it just Leader REID and Senator NELSON? Was it the Presiding Officer from Minnesota? Nobody knows. Nobody knows. The truth is, and what we do know is that the American people don't like the process, and more importantly the American people don't like the bill.

The chairman of the Finance Committee and others have said: But once it is out there and they get a taste of this, they are going to like it then. Well, let me remind my colleagues: It is too late. The Chief Actuary already told us: Hospitals are going to close, nursing homes are going to close, doctors are going to quit practicing medicine. They will quit seeing Medicare and Medicaid beneficiaries. How do you repair that after you have done the damage? Are we willing to risk that for the future of this country and generations yet to come?

Boy, we have a few hours—8 or 10 hours—before we vote. I hope people get some sense. I hope they pull back from this. Let's leave for Christmas. Let's think about this. Let's go home and talk to people. Let's listen to people in this country. If we do, we might come back, get a new piece of paper, take some of the things in this bill and take some of the things we have talked about on this side of the aisle, take some of the things the American people have talked about, and find a way for 100 percent of the doctors, nurses, and hospitals to survive; find a way for 100 percent of the American people to have coverage, and not the 31 million covered in this bill, leaving 24 million outside the scope of coverage.

You see, when we set out we had three objectives: One was to cover all the American people. We flunked. Another was to invest in prevention,

wellness, and chronic disease management. The doctor and I both say we haven't come anywhere close to doing that. The third and most important was to make sure it is fiscally sustainable. CBO, CMS, wherever you want to go, the only way this is fiscally sustainable is if the independent Medicare advisory board continues to cut reimbursements, the scope of coverage, to meet how much we are willing to spend on health care to say it is affordable.

I don't believe that is reform. I believe that is legislation that picks winners and losers, and that is not the role of the Senate of the United States.

I yield to the good doctor.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. COBURN. I want to raise an issue. It was raised in the Finance Committee markup; it was raised in the health care markup. I have behind me the Medicare cuts, and I understand they have been slightly reduced in home health—in the rebuild—but we are going to cut Medicare. We are not going to cut it significantly in the fraud—\$2 billion. That is where the real waste is.

The Senator from Rhode Island came down here and said we are trying to scare people, but when we offered the opportunity for the chairman of the committee to prohibit rationing of health care in this country, both the chairman and the Senator from Rhode Island voted against it. It was simple, straightforward, saying no matter what we do in health care, we are not going to do what other countries have done, and that is ration health care. Straight up-and-down votes—party-line votes—against it.

In fact, we are going to ration health care. That is what this bill does. The way we are going to control cost is through the mechanisms outlined in this bill that are going to allow government bureaucrats to decide what you can get treated for, when you can get treated for it, and where you can get treated for it. The rebuttal to that is: In Medicare, it is already illegal for them to ration care, so we don't need a prohibition. The fact is Medicare is rationing right now. They are rationing virtual colonoscopies, they are rationing bone densitometry, they are rationing Epogen, they are rationing Neupogen—two key drugs to maintain survival during the treatment of chemotherapy. They are practicing medicine.

So when given the opportunity to vote and put an absolute prohibition on the rationing of health care, what did the chairman of the Finance Committee do? He voted against that. Because what he recognizes is the ultimate plan. And the answer to Senator BURR's question is: This will collapse. It is not going to be sustainable. The Medicare cuts won't be made by us. We will put it off on a commission and say:

Oh, we had to do it, and the result of that will be rationing.

The other result will be what the Senator from Vermont actually wants, which is a single-payer, government-run system. That is why he is intellectually honest. He brought it to the floor and said this is how I think we ought to solve health care. We ought to have the government run it, and we ought to have the government make the decisions. He was honest about it. That is where this bill is going. So if you are a Medicare patient, you should be concerned. If you are a Medicare Advantage patient, you should be concerned.

I have had criticism leveled at me because I do what the chairman of the Finance Committee suggests—I make competitive bidding for Medicare Advantage. But there is a big difference. Mine has no cuts in benefits. They cut benefits 50 percent, in terms of the Medicare Advantage differential.

There are three things you can do to fix health care in this country: You can incentivize prevention and the treatment of chronic disease based on outcome; you can create transparency so that purchasers in the market can actually make a judgment about value and quality; and you can assist those who are on the lower rungs of the economic ladder to get the same kind of care we get. Those are the three things you can do.

I readily admit we don't have a great competitive model in the insurance industry. I want to change that. We had Senator WYDEN come to the floor and say that he loves the free enterprise spirit, yet we want to put an artificial fix in terms of the insurance company, in terms of what you have to have for a return. What if an insurance company came up with 20 percent greater efficiency in terms of outcomes and benefits? They still have to spend that money? In the name of the free enterprise system we are going to kill free enterprise? As a practicing physician, I bristle at the way I run into insurance companies. There is no question about it. We need to fix that.

The point Senator BURR was making is this says it is this way or the high way, when the option we offered—the Patients' Choice Act—cuts taxes, doesn't raise taxes; expands exactly to the level or beyond of this bill and it does at in a faster rate. It extends the life of Medicare. It gives Medicaid patients the same kind of care we get. But it was defeated in committee on a party-line vote. It was filed as an amendment here but not accepted. We had 10 amendments voted on from our side on 2,400 pages of legislation—10 amendments. So it is not about being bipartisan, it is about you have to take this or leave it.

What the American people ought to pray for is that somebody can't make the vote tonight. That is what they

should be praying for, so that we can actually get the middle—not me, not mine. I understand I am way over here. But we ought to get the middle of America and the middle of the Senate a bill that can run through this country and actually do what we say we all want to do. There is a large difference of opinion, and it is not rhetoric that is unfounded, as Senator BURR outlined, and as Dr. BARRASSO outlined with an estimate by NFIB of 1.6 million jobs lost. That may be old data, because who knows what the data is now. We haven't had a chance to look at it, because 30 hours after the bill is introduced for cloture and the cloture motion is filed, we are going to vote on it. I am not sure this is a great way to run the country.

What is in the bill? There are zero guarantees that taxpayers won't finance abortion.

There are zero prohibitions on the rationing of health care—zero. There is not one shred of evidence that we are not going to ultimately ration health care under this bill. We are. And the only reason you would vote against a rationing amendment is because you intend to see rationing carried out.

There are zero Senators required to enroll in either Medicaid or a government-run option, either through OPM or Medicaid.

There are now 10 new taxes created. There are 71 new government programs created. There are 1,697 times that the Secretary of HHS is going to write the regulations, and based on CRS calculations there are between 15,000 and 20,000 new Federal employees who are going to be required to carry out this legislation.

There are 3,607 times, before we got the Reid amendment, that the legislation says the word "shall." "Shall" is a very important word because the word "shall" takes away your options. There is no option when the word "shall" is used. The word "shall" also says whoever is directing the "shall" obviously has more wisdom, more knowledge, more experience than the person the "shall" is applied to.

What we have said is, in all our wisdom, in all our many years of practicing medicine and being involved in the care of patients, that 3,607 times we are going to tell the American people what to do.

One of the big "shall also's" that I do not think will ever hold scrutiny before the Supreme Court is, you shall buy an insurance policy. That doesn't fit anywhere in the Constitution that I read. If you do the legal research on it, as my staff lawyers from the Judiciary Committee have done, it is highly unlikely that will ever hold up. So the whole premise of a large portion of the taxes collected in this bill will be out the window.

It also will totally change, through adverse selection, all of the insurance

premiums in this country because, if you do not have an individual mandate making people buy insurance, the costs relative to the illness and the age, even though we have compressed the ratios, will rise exorbitantly.

There are still going to be 24 million people left without health insurance in this country. There is a \$10 billion cost just for the IRS implementation of this bill. There is at least \$25 billion in mandates placed on the States, unfunded mandates. Actually it is much higher now. There is \$28 billion-plus in new taxes on employers. There is \$100 billion, by conservative estimates, in fraud and Medicare and Medicaid a year, and this bill goes after \$2 billion over 10 years. So we are going to go after \$2 billion out of \$1 trillion—not \$200 billion, not \$20 billion—we are going after \$2 billion.

There is \$118 billion in cuts to Medicare Advantage but only for those people who do not live in the State of Florida and a couple of other places. If you happen to live in Oklahoma, citizens under the Medicare Advantage are going to lose.

This is now over \$500 billion in new taxes on Americans. There is a quarter of a trillion dollars not in this in expense that everybody knows is an expense. We are going to restore the SGR. We are going to fix that. And that quarter of a trillion dollars is based on no increase in physicians over the next 10 years. How many in this body think we are not going to increase the pay of physicians in Medicare under the next 10 years? The assumptions in the CBO report that accompanied the Reid amendment, if you read what they said, they said it is highly unlikely. So that is a quarter of a trillion dollars even though it was not in their numbers.

It also said if, in fact, the cuts came through, which they thought highly unlikely that they would, and if they didn't, then the fiscal numbers associated with the bill are out the window. The final number everybody ought to be paying attention to is \$12.1 trillion; \$12.1 trillion is what our kids owe outside of owing ourselves—\$1.1 trillion. That is going to double in the next 10 years.

Anybody with a lick of common sense who looked at the numbers on this bill would say: Washington, your accounting programs aren't any different from Enron. The same fate of those who created the Enron scam ought to apply to the Congress of the United States. The very fact we are not considering an SGR fix is evidence of that. At least you have to add a quarter of a trillion dollars every 10 years to this bill just to keep doctors even. And don't forget the fact that 34 million new Americans over the next 10 years are going to enter Medicare—are going to enter Medicare.

What are the alternatives? I will not offer other amendments and make the

chairman object to them because I know his answer. He calls it a stunt. It is not a stunt when you do not have vigorous amendments offered on the Senate floor. It is not a stunt. The stunt is not allowing amendments to be offered. To allow only 10 of our amendments to be offered on this bill is beneath the dignity of the Senate—on the biggest bill in the last 100 years in this Congress, the only bill in the last 100 years that is going to affect every American in a personal way but also in a fiscal way, a financial way.

There was an amendment to be offered, a conscience protection for physicians. We didn't get a vote on it. Should we force physicians in this country to perform abortions or should we have a vote on whether, if they have a conscience protection, they ought to be exempted from that? Should that not be a part of health care reform? We are not going to get a vote on that.

How about an amendment to reduce the waste, fraud, and abuse in Medicare and Medicaid Programs and protecting Medicare benefits? And increasing the fraud and waste from \$2 billion to \$100 billion over the next 10 years, that is just 10 percent of what is there. We are not going to get a vote on that. It is not going to be available. The American people are not going to get to hear the debate on that. They are not going to make up their mind. Why? You don't want them to hear the debate on it. If you truly wanted to have a debate on fraud we would have a debate on fraud, and we would have an amendment saying put your stamp down, or are you for the people who are defrauding? Or are you for the status quo? We are for the status quo. We are for the well-connected.

The amendment on rationing that I talked about—or an amendment to limit the bureaucratic increase associated with this bill, which is an amendment I offered, we are not going to get a debate on that. That is a very straightforward amendment. It just says we are not going to increase the number of bureaucrats to implement this bill. We are going to drive efficiency in HHS; that is where this is going to. We are going to say: You can't get a net increase in bureaucrats so get more efficient. Since we are running \$1.4 trillion or \$1.5 trillion deficits, that is something that everybody else in the country would be doing, but we are not going to do that. We are not going to allow an opportunity for a vote or debate on that. We are not going to have that opportunity.

I have heard the majority mention several times that we didn't have anything to offer. We offered the Patients' Choice Act. CBO said it cut long-term costs on Medicaid, that it saved money on Medicare. They said it saved \$1 trillion over the first 10 years for the State and the estimates. Because we couldn't get the commitment that was

made to us by the chairman of the HELP Committee that he would score the bill, the bill didn't ever get scored by CBO—but an outside score says it saves at least \$70 billion the first 10 years and far in excess of that afterwards. It covers more people than this bill, saves personal choice, doesn't put somebody between you and your doctor.

I heard the Senator from Rhode Island say we were lying about that happening. It is happening today, both from insurance companies and Medicare and Medicaid. So if we really wanted to reform health care we would be attacking that. Instead, we are going to make it worse.

Let me tell you how we are going to make it worse. We are going to use cost comparative effectiveness, which is exactly what the U.S. Task Force on Prevention Services did. They used cost comparative effectiveness, and when they looked at breast cancer, they said it is not cost effective to screen women before the age of 50. You know what. They are right. It is not cost effective. But it certainly is clinically effective, especially if your wife is the one who is 40 and has breast cancer and it was found by a mammogram.

You see, judgment goes out the window. What do we do? We reversed that finding, one of the first things we did as we started the debate.

Are we going to do that every time the U.S. Preventive Services Task Force issues a ruling that is cost effective but not clinically effective? Are we going to do that every time the cost comparative effectiveness panel says: You will do this, and the American people say: That isn't right, the American Cancer Society says: That isn't right. Every time we get one of those rulings will we have to pass a piece of legislation to change it?

The purpose of the three panels is well intended. The Medicare Payment Advisory Commission is well intended. Help us cut costs. But the only way you go for cost is through prevention and management of chronic disease. You are not going to cut costs any other way because 75 percent of everything we spend is on five chronic diseases. So unless you attack the real problem, the real disease, with our health care system, you are not going to solve it.

The lack of art in medicine will become readily apparent in 2015, 2016, and 2017. We will see bureaucratic decisions in between a patient and their provider. That is not a scare tactic. That is absolute fact. We have it now with Medicare. It is there. If I have a woman who is 55 years of age today and I order bone density testing on her and find she has severe osteoporosis, I put her on medicine but am forbidden by Medicare to do the followup exam that is clinically necessary to see if the medicine is working, and not only that,

under Medicare rules, she can't even use her own money to buy that test. So 2 years later, we do the test, and we haven't corrected her disease. Now we change medicines to try to find out, but we can't find out again. So she ultimately falls and breaks her hip. There is a 20-percent mortality rate from falling and breaking one's hip. But those are the rules we are operating under now, right now, that you want to expand.

Government isn't ever compassionate. It is never compassionate. People are compassionate. Thought has to be in the middle of the practice of medicine, not distant thought, near thought. The very fact that an insurance company tells the doctors what they can and cannot do is no worse than what we are getting ready to do with the rest of government-run health care. We didn't fix that problem. We didn't address that problem with this. We didn't guarantee that you could walk with your feet. We said: Here is how much money you can earn, but we didn't address that.

I will give two examples. Two people I have taken care of for over 15 years, both had no clinical indications that they had anything wrong. I contacted the insurance company. I thought they needed an MRI of the brain. Both of them were denied. I got friends who are radiologists to do their MRI. They both had brain tumors. One is still alive. What we are setting up isn't any different than what you have a complaint and gripe about now with the insurance industry. You didn't fix that in this bill. There is no health care reform in this bill. There is health coverage expansion, but there is no reform.

One of those people is still alive, but had we followed either Medicare guidelines, cost comparative effectiveness panel guidelines, which would have forbidden doing an MRI, that one person out of the two would be dead today. So as we sit here and look at our health care system, my biggest worry is, I will be in Medicare. I will get rationed. I know that. The way we are going about it, that is what is going to happen. We are going to ration care. We will not vote to not ration it. You know it is going to be rationed or you would have voted for the amendment in committee that provided a prohibition.

But my real concern is not my generation. My real concern is those who will follow us with \$12.1 trillion worth of debt and the fact that every one of those is 25 years of age and younger today. Twenty years from now, they will be responsible for \$1 million of both debt and unfunded liabilities for which we will have to collect, on average, \$70,000 a year just to pay the interest on what we are sending them. Before they pay the rest of their income taxes, before they pay payroll taxes, before they pay unemployment taxes, before they send their kids to school,

before they buy health insurance, before they buy a home, before they buy transportation, the real worry that should be in front of this country, which is the No. 1 issue on the public's mind, is: How do we get out of this financial mess? That is the No. 1 issue on people's minds. It is not health care.

I have no hopes of convincing my colleagues that through 25 years of practicing medicine, dealing with Medicare, dealing with Medicaid, that that is of any value to you. Because we are hell-bent on passing a health care bill and dealing to make sure we can and creating inequities throughout this country and dividing our country.

We heard the Senator from Rhode Island characterize us as liars, birthers, supporters of the Aryan nation. That is what I heard. I sat and listened to it. I think he doth protest too much, for he knows that is not true. There is nobody on our side of the aisle who cares any less than anybody on the other side of the aisle about fixing health care. The rub is, you believe the government is the most powerful thing and the best way to do it. We don't agree with that. We actually believe in the American people. We actually believe in the entrepreneurial spirit of the average American making good decisions for themselves every day, doing things we never do, which is prioritizing where their money is going to go and how they are going to spend it and working like heck to advance the cause of their own family, their own freedom, and their own liberty. You don't believe that because, if you did, you would never put this kind of bill on the floor. This bill limits liberty. This bill says you shall.

Think of the first big step in this bill. In the United States, you no longer have the ability to not buy health insurance. If you have $\$1\frac{1}{2}$ million in the bank and you want to put that at risk and say: I don't want to, you either have to pay a fine, a tax, or you have to buy health insurance. So where is the liberty and where is the commerce clause in that and where does that tie in with individual liberty and individual responsibility? We say: If you don't want to be responsible, then we will make you responsible. We don't say: You have to suffer the consequences of your lack of responsibility.

What built this country was people figuring out if you don't act responsibly, it is going to cost you. We are going to put a block on that and say: You don't have to act responsibly. You don't have to act in your own best economic interest. Don't worry. We will take care of it.

Jefferson warned of that. One of the Founders of this country warned us against doing the very thing we are doing today. If you read the Federalist Papers, you will see what Madison wrote about the welfare clause and the

commerce clause. He said, whenever the Senate starts to think about claiming it means something different than it does, here is what we want you to know. It doesn't. It is very limited in scope.

I said yesterday in a press conference that this country is at the point of a crisis of confidence such as we have not seen in hundreds of years. It is true. Whether you are a very liberal individual or a very conservative individual, you don't have any confidence in us. The reason you don't is because we don't act in the country's best interest. We act in our political best interest. Republicans are equally guilty. We look at partisan issues rather than principled issues. What we miss in all that is the best right thing for the country. We are missing it with this bill. We are missing the best right thing for the country.

Mr. CORKER. Will the Senator yield?

Mr. COBURN. I am happy to yield.

Mr. CORKER. I was listening to the Senator from Oklahoma. I know he cares deeply about his patients and continues to treat patients as he serves in the Senate. What he has done is pointed out the fact that there will be much interruption, changes in the physicians' and patients' relationship. But the big picture is what the Senator is concerned about, too; that is, the tremendous indebtedness this country has by the fact that—the good chairman of the Finance Committee is here today listening patiently, and I know this has to be painful to him—half the reform we are talking about is actually putting people in Medicaid, a program that 40 percent of physicians will not see and 50 percent of specialists will not see.

Mr. COBURN. And the outcomes are poor.

Mr. CORKER. Last weekend, the New York Times talked about many physicians prescribing antipsychotic drugs to young people because they don't want to deal with them on Medicaid. So half this reform is people going into this type of program and half the money is coming from Medicare, which is insolvent.

We have spent all this time, all kinds of bipartisan meetings. I know you spoke about the issue of partisanship. I know the good chairman is here. We, early on, said we wanted to join in health care reform. We just didn't want to take money from Medicare, which was an insolvent program, to fund it. What was the major building block of this program? Taking \$464 billion from Medicare to fund reform. We were, in essence, blocked out on the front end saying something we thought was the wrong type of principle to build upon.

Mr. COBURN. Mr. President, if, in fact, we got rid of 50 percent of the fraud in Medicare and Medicaid, we would generate \$600 billion every 10 years, more than offsetting the cuts that have been outlined in this bill.

Mr. CORKER. So if I understand correctly, of the new patients going into Medicaid, 50 percent of the money comes from an insolvent program. We are not dealing with the doc fix. Much of the savings they have talked about is just like the doc fix that back in 1997, the AMA, both sides of the aisle agreed to do something to save money for Medicare. As the Senator knows now, the Reid amendment takes out all the doc fix, now with a \$285 billion gap over the next 10 years to deal with physicians. It is another example of how we don't have the courage. We put in place cuts. We are not going to do that. We know what damage that will cause to patients. In this particular case, we should not do that. But the fact is many of these cuts that have been discussed will never take place. They will never take place. At the end of the day, I come back to the very thing you talked about; that is, we have \$12 trillion in debt, \$38.6 trillion in unfunded liabilities for Medicare alone, and here we are passing a bill that is using up the resources we might otherwise use to make it solvent.

Instead of doing that, we are leveraging a whole new entitlement. I heard some of the pundits this morning parroting some of the things I have heard from my friends on the other side of the aisle. Let's pass this bill. We know it is not very good, but we will fix it as we move along.

What I fear is the way we are going to fix it, we are going to fix it by adding tremendous debt on future generations. My guess is over the next very short period—2 or 3 months—the other side of the aisle is going to come right back up here with a huge, several hundred billion dollar unpaid bill to deal with one of these issues we have been talking about. That is the way business is done here.

Mr. COBURN. The Senator raises a good question. How long have we known and how long has Medicare been in trouble that we haven't fixed it? We will not fix it. We will do exactly what the Senator says, what we always do, what we have done since I have been in this body. We put the credit card into the machine and say: Transfer this to your grandkids. We take no pain ourselves. What is lacking in our country today is moral character to lead on the basis of sacrifice. It should start with us as Senators in this body.

Mr. President, I understand our time has expired.

The PRESIDING OFFICER. The minority's time has expired.

Mr. COBURN. Mr. President, I thank the Chair, and I look forward to hearing the remarks in the cloakroom of the chairman of the Finance Committee.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, just a couple, three points here, and I see the Senator from Ohio wishes to speak.

Several times during this afternoon, Senators on the other side of the aisle, in my judgment, put on a little demonstration of trying to offer amendments. They repeatedly asked consent to suspend the normal working of the cloture rule to offer amendments. Earlier, I note for the RECORD, they slow-walked the process when an amendment was in order. They wanted the whole amendment read. And now they are trying to offer amendments, again, to slow down the process. This is clearly a tactic to slow the process. It is not part of the regular order. That is clearly what is going on here. Those were not, despite the protestations to the contrary, serious amendments.

Normally, when a Senator offers a unanimous consent request, they allow the other side to speak briefly on the subject, at least on the reservation of the right to object. That was not allowed here. My colleagues did not allow me that courtesy earlier today, to comment with a reservation of the right to object. So I want to take a moment now to explain what they are really up to. I could not because they would not give me the courtesy to say any words during the reservation. That is why I made that statement.

I heard one Senator from the other side of the aisle complain that the majority is holding tonight's vote at 1 a.m. in the morning on the cloture motion. Let me set the record straight. The majority would be happy to have this vote earlier. We would be happy to have this vote maybe in 10 or 15 minutes from now. We would be happy to have this vote at a decent time. It does not have to be at 1 a.m. tomorrow. It is the other side which is insisting that vote be at 1 a.m. in the morning. So it is they who are insisting on enforcing the letter of the Senate rules. It is their right, but it is also they who are insisting on delay.

I also want to put to bed some of the assertions that they claim this bill does not do real health care reform. Let me mention a few health care reform provisions in this bill.

Mr. President, I do not know if you or any of my colleagues have read this second article in the New Yorker magazine by Atul Gawande. The first article talks about two towns in Texas, basically. The second is basically looking to see whether this bill does reform health care and whether it does cut down health care costs. It is an article I highly recommend to all of my colleagues in a recent issue of the New Yorker magazine.

But, basically, Dr. Gawande concludes this bill includes all of the constructive provisions health care economists, stakeholders, and people who have studied this issue suggest should be part of health care reform. That is his conclusion anyway. I am happy he said that because we worked mightily to make sure we have all the provisions

we can here to help constrain health care costs.

What are they? Well, one—although some may disagree with the policy—is an excise tax on high-cost plans, so-called Cadillac plans. It is a bit debatable. Last night I saw a TV ad where a group was advocating passage of this bill: But just not my high-cost plan. Pass the bill, but just not my high-cost plan. I understand the tenor and import of that TV ad, but the main point is, we do have to begin to limit to some degree the excessive cost of some plans, and I think we are very fair and modest here in proposing an excise tax on those high-cost plans. The trick is to set the level at the proper level, not too high, not too low. I think this bill does that.

In addition, all the delivery system reforms this bill enacts with respect to Medicare are so important to improving quality and reducing excess costs. We all know through history that when we reform Medicare and make changes in Medicare, the private sector follows. So the private commercial market will follow whatever Congress does with respect to Medicare; and that is, make good, positive changes. Why? Because Medicare is such a large provider of care, it tends to have a real effect on what other providers do.

What are some of those? Well, basically, we start to change the way we pay doctors and hospitals; that is, we start to pay on the basis of value rather than volume, that is quality rather than quantity. The paradox of that is, when people stop to think about it, we are going to both cut down costs and increase value at the same time because we will be focused on quality. When you focus on quality—not just quantity, not the whole volume of services, but, rather, focus on quality—you are going to get better quality, but your costs are going to go down because you are not reimbursing things such as excessive MRIs, excessive CAT scans, excessive high-cost procedures that do not, in many cases, get to the quality of health care but, rather, are very expensive, and Medicare pays for them. So we are moving more toward reimbursing based on quality and value than quantity.

What else is reform of the health care industry? One is bundled payments and the shared-savings program, which we refer to as accountable care organizations. This allows hospitals and groups to get together to cut down costs. We have bundling in here, which is another idea that moves along the same lines. I might add, too, the CMS Innovation Center and the Independent Payment Advisory Board suggest some of these.

The bill makes it easier for employers to offer workplace wellness programs. We give employers greater flexibility to offer premium discounts for workers who are committed to leading healthier lifestyles. There is a lot

of emphasis here on wellness and lifestyles. We give incentives to employers to have wellness programs and preventive programs, which will help, obviously, the worker, but, in addition to that, cut down costs.

There are other provisions here. This bill keeps getting stronger. The so-called freshmen package, led by Senator WARNER, will give the Secretary additional authority to expand delivery system reforms. It expands the scope of the Medicare board to the private sector.

There are many other provisions in here.

The Nation's employers, through the leadership of the BRT, played an important role in developing that package.

And the manager's amendment included a provision that will provide greater access to Medicare data to measure performance.

It is no exaggeration to say that this bill will revolutionize health care.

But don't take my word for it. The 23 economists who wrote to the President agree.

Mr. President, I ask unanimous consent that letter from these economists be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STANFORD UNIVERSITY,
CENTER FOR HEALTH POLICY,
Stanford, CA, November 17, 2009.

President BARACK OBAMA,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: On behalf of my colleagues, a group of distinguished economists, I am pleased to transmit this letter regarding essential components of health reform legislation.

Sincerely yours,

Alan M. Garber, M.D., Ph.D.

Henry J. Kaiser, Jr., Professor, Professor of Medicine, Professor of Economics, Health Research and Policy, and of Economics in the Graduate School of Business (courtesy), Director, Center for Primary Care and Outcomes Research and Center for Health Policy Stanford University.

NOVEMBER 17, 2009.

President BARACK OBAMA,
The White House,
Washington, DC.

DEAR MR. PRESIDENT, As the full Senate prepares to debate comprehensive health reform legislation, we write as economists to stress the potential benefits of health reform for our nation's fiscal health, and the importance of those features of the bill that can help keep health care costs under control. Four elements of the legislation are critical: (1) deficit neutrality, (2) an excise tax on high-cost insurance plans, (3) an independent Medicare commission, and (4) delivery system reforms.

Including these four elements in the reform legislation—as the Senate Finance Committee bill does and as we hope the bill brought to the Senate floor will do—will reduce long-term deficits, improve the quality of care, and put the nation on a firm fiscal footing. It will help transform the health care system from delivering too much care,

to a system that consistently delivers higher-quality, high-value care. The projected increases in federal budget deficits, along with concerns about the value of the health care that Americans receive, make it particularly important to enact fiscally responsible and quality-improving health reform now.

In developing our analysis and recommendation, we received input and suggestions from Administration officials, including the Office of Management and Budget and others, as well as from economists who disagree with the Administration's views.

The four key measures are:

Deficit neutrality. Fiscally responsible health reform requires budget neutrality or deficit reduction over the coming years. The Congressional Budget Office (CBO) must project that the bill be at least deficit neutral over the 10-year budget window, and deficit reducing thereafter. Covering tens of millions of currently uninsured people will increase spending, but the draft health reform legislation contains offsetting savings sufficient to cover those costs and the seeds of further reforms that will lower the growth of spending. Deficit neutrality over the first decade means that, even during the start-up period, the legislation will not add to our deficits. After the first decade, the legislation should reduce deficits.

Excise tax on high-cost insurance plans. The Senate Finance Committee's bill includes an excise tax on high-cost health insurance plans. Like any tax, the excise tax will raise federal revenues, but it has additional advantages for the health care system that are essential. The excise tax will help curtail the growth of private health insurance premiums by creating incentives to limit the costs of plans to a tax-free amount. In addition, as employers and health plans redesign their benefits to reduce health care premiums, cash wages will increase. Analysis of the Senate Finance Committee's proposal suggests that the excise tax on high-cost insurance plans would increase workers' take-home pay by more than \$300 billion over the next decade. This provision offers the most promising approach to reducing private-sector health care costs while also giving a much needed raise to the tens of millions of Americans who receive insurance through their employers.

Medicare Commission. Rising Medicare expenditures pose one of the most difficult fiscal challenges facing the federal government. Medicare is technically complex and the benefits it underwrites are of critical importance to tens of millions of seniors and Americans with disabilities. We believe that a commission of medical experts should be empowered to suggest changes in Medicare to improve the quality and value of services. In particular, such a commission should be charged with developing and suggesting to Congress plans to extend the solvency of the Medicare program and improve the quality of care delivered to Medicare beneficiaries. Creating such a commission will make sure that reforming the health care system does not end with this legislation, but continues in future decades, with new efforts to improve quality and contain costs.

Delivery system reforms. Successful reform should improve the care that individual patients receive by rewarding health care professionals for providing better care, not just more care. Studies have shown that hundreds of billions of dollars are spent on care that does nothing to improve health outcomes. This is largely a consequence of the distorted incentives associated with paying for volume rather than quality. Health

care reform must take steps to change the way providers care for patients, to reward care that is better coordinated and meets the needs of each patient. In particular, the legislation should include additional funding for research into what tests and treatments work and which ones do not. It must also provide incentives for physicians and hospitals to focus on quality, such as bundled payments and accountable care organizations, as well as penalties for unnecessary readmissions and health-facility acquired infections. Aggressive pilot projects should be rapidly introduced and evaluated, with the best strategies adopted quickly throughout the health care system.

As economists, we believe that it is important to enact health reform, and it is essential that health reform include these four features that will lower health care costs and help reduce deficits over the long term. Reform legislation that embodies these four elements can go a long way toward delivering better health care, and better value, to Americans.

Sincerely,

Dr. Henry Aaron, The Brookings Institution.

Dr. Kenneth Arrow, Stanford University, Nobel Laureate in Economics.

Dr. Alan Auerbach, University of California, Berkeley.

Dr. Katherine Baicker, Harvard University.

Dr. Alan Blinder, Princeton University.

Dr. David Cutler, Harvard University.

Dr. Angus Deaton, Princeton University.

Dr. J. Bradford DeLong, University of California, Berkeley.

Dr. Peter Diamond, Massachusetts Institute of Technology.

Dr. Victor Fuchs, Stanford University.

Dr. Alan Garber, Stanford University.

Dr. Jonathan Gruber, Massachusetts Institute of Technology.

Dr. Mark McClellan, The Brookings Institution.

Dr. Daniel McFadden, University of California, Berkeley, Nobel Laureate in Economics.

Dr. David Meltzer, University of Chicago.

Dr. Joseph Newhouse, Harvard University.

Dr. Uwe Reinhardt, Princeton University.

Dr. Robert Reischauer, The Urban Institute.

Dr. Alice Rivlin, The Brookings Institution.

Dr. Meredith Rosenthal, Harvard University.

Dr. John Shoven, Stanford University.

Dr. Jonathan Skinner, Dartmouth College.

Dr. Laura D'Andrea Tyson, University of California, Berkeley.

Mr. BAUCUS. The CMS Actuary agrees that this bill bends the cost curve. The folks at the Commonwealth Fund say the bill will save families \$2,000 per year.

Mr. President, I ask unanimous consent that an excerpt from Dr. Gawande's article from the New Yorker be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXCERPT FROM GAWANDE ARTICLE IN NEW YORKER

There are hundreds of pages of these programs, almost all of which appear in the House bill as well. But the Senate reform package goes a few U.S.D.A.-like steps further. It creates a center to generate innovations in paying for and organizing care. It

creates an independent Medicare advisory commission, which would sort through all the pilot results and make recommendations that would automatically take effect unless Congress blocks them. It also takes a decisive step in changing how insurance companies deal with the costs of health care. In the nineteen-eighties, H.M.O.s tried to control costs by directly overruling doctors' recommendations (through requiring pre-authorization and denying payment); the backlash taught them that it was far easier to avoid sicker patients and pass along cost increases to employers. Both the House and the Senate bills prevent insurance companies from excluding patients. But the Senate plan also imposes an excise tax on the most expensive, "Cadillac" insurance plans. This pushes private insurers to make the same efforts that public insurers will make to test incentives and programs that encourage clinicians to keep costs down.

Mr. BAUCUS. Mr. President, the Senator from Oklahoma at one point questioned the constitutionality of the mandate to buy health insurance. I might say, we thoroughly studied this issue. I believe there is ample authority for Congress to enact such a provision under the Commerce Clause, and also under the congressional authority to tax and spend for the general welfare provided for in the Constitution.

I might also add, Prof. Mark Hall of Wake Forest University has done an excellent survey article on this subject. Mr. President, I ask unanimous consent that the conclusion of Professor Hall's article, found at www.oneillinstitute.org, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LEGAL SOLUTIONS IN HEALTH REFORM—THE CONSTITUTIONALITY OF MANDATES TO PURCHASE HEALTH INSURANCE

(By Mark A. Hall, JD)

EXECUTIVE SUMMARY

Prepared by the O'Neill Institute

INTRODUCTION

Health insurance mandates have been a component of many recent health care reform proposals. Because a federal requirement that individuals transfer money to a private party is unprecedented, a number of legal issues must be examined. This paper analyzes whether Congress can legislate a health insurance mandate and the potential legal challenges that might arise, given such a mandate. The analysis of legal challenges to health insurance mandates applies to federal individual mandates, but can also apply to a federal mandate requiring employers to purchase health insurance for their employees. There are no Constitutional barriers for Congress to legislate a health insurance mandate as long as the mandate is properly designed and executed, as discussed below. This paper also considers the likelihood of any change in the current judicial approach to these legal questions.

POTENTIAL SOLUTIONS

Congress's Authority to Regulate Commerce: The federal government has the authority to legislate a health insurance mandate under the Commerce Clause of the United States Constitution. A federal mandate to purchase health insurance is well

within the breadth of Congress' power to regulate interstate commerce. Congress can avoid legal challenges related to the 10th Amendment and states' rights by preempting state insurance laws and implementing the mandate on a federal level. If Congress wants states to implement a federal mandate, it has the following two options:

Conditional Spending: Congress may condition federal funding, such as that for Medicaid or public health, on state compliance with federal initiatives.

Conditional Preemption: Congress may allow states to opt out of complying with direct federal regulation as long as states implement a similar regulation that meets federal requirements.

Congress's Authority to Tax and Spend for the General Welfare: Congress also has the authority to legislate a health insurance mandate under its Constitutional authority to tax and spend. There are no plausible Tenth Amendment and states' rights issues arising from Congress's taxing and spending power. However, Congress' taxation power cannot be used in a way that burdens a fundamental right recognized in the Constitution's Bill of Rights and judicial interpretations by the U.S. Supreme Court. Since there is no fundamental right to be uninsured, no fundamental rights challenge exists.

Other Relevant Constitutional Rights: Challenges under the First and Fifth Amendments relating to individual rights may arise, but are unlikely to succeed. The federal government should include an exemption on religious grounds to a health insurance mandate as an added measure of protection from legal challenges based on religious freedom. In the alternative, the federal government can simply exempt a federal insurance mandate from existing federal legislation protecting religious freedom.

Considerations: To avoid a heightened level of scrutiny in any judicial review, the federal government should articulate its substantive rationale for mandating health insurance during the legislative process.

LEGAL ISSUES & APPLICABLE LAW

Commerce Clause: Congress has the power to regulate interstate commerce, including local matters that substantially affect interstate commerce. Health care and health insurance both affects and is distributed through interstate commerce, giving Congress the power to legislate an insurance mandate using its Commerce Clause powers.

Taxing and Spending Power: Congress has the power to tax and spend for the general welfare. It can use its taxing power to implement a "pay or play" model to tax individuals that did not purchase insurance or provide tax benefits to those that do purchase insurance. Congress can also use its spending powers to influence state action. The taxing power of the federal government can be limited if a tax intentionally and directly burdens the exercise of a fundamental right.

Federalism: The 10th Amendment and principle of state sovereignty in the Constitution prohibit the federal government from commanding the states to implement federal law or policies that would interfere with state sovereignty. This is referred to as the "anti-commandeering" principle. A federal employer mandate covering state and local government workers appears consistent with existing Constitutional decisions but still might be susceptible to challenge under the Tenth Amendment.

Individual Rights: The First and Fifth Amendment contain provisions that may have some bearing on a health insurance mandate.

Free Exercise of Religion: The First Amendment's Free Exercise Clause protects the free exercise of religion. In addition, the Religious Freedom Restoration Act (RFRA) prevents the federal government from enacting a law that substantially burdens an individual's exercise of religion, unless the government has a compelling interest.

Due Process and Takings Clauses: The Fifth Amendment includes two relevant provisions. The Due Process Clause guarantees that no person shall be deprived of life, liberty, or property without due process of law. The Takings Clause states that the government may not take an individual's property without just compensation.

CONCLUSION

The Constitution permits Congress to legislate a health insurance mandate. Congress can use its Commerce Clause powers or its taxing and spending powers to create such a mandate. Congress can impose a tax on those that do not purchase insurance, or provide tax benefits to those that do purchase insurance. If Congress would like the states to implement an insurance mandate, it can avoid conflicts with the anti-commandeering principle by either preempting state insurance laws or by conditioning federal funds on state compliance. A federal employer mandate for state and local government workers may be subject to a challenge; however, such a challenge is unlikely to be successful. Individual rights challenges under the First Amendment's Free Exercise Clause or RFRA are unlikely to succeed, although a federal insurance mandate should include a statement that RFRA does not apply or provide for a religious exemption. Fifth Amendment Due Process and Takings Clause challenges are also unlikely to be successful. The legal analysis presented is likely to endure, as the Supreme Court's current position and approach to interpreting relevant constitutional issues appear to be stable.

Mr. BAUCUS. I might also say, Mr. President, the Senator from Oklahoma said the independent Medicare advisory board would ration care. In fact, he even accused us in the Congress—myself included—of voting against a prohibition on rationing. But, I might say, I am not for rationing care in the sense that the Senator from Oklahoma talked about. I do not think anybody in this Congress is. We have to find a system that starts to control costs in a fair way, that increases quality but also cuts costs. That is the underlying premise of the delivery system reforms in this bill. But do not just take my word for it. Right here in the bill, on page 1004, the bill says, with regard to the advisory board:

The proposal shall not include any recommendation to ration health care.

I chuckle a little bit when I say that because the Senator from Oklahoma is very concerned about using the word "shall." If he does not like "shall," then I suppose he means the board would have discretion. But we say "shall not include any recommendation to ration health care." That is on page 1004 of the bill. It is right there in black and white letters. Read the bill. The prohibition against rationing of health care is right there.

Mr. President, I see the Senator from Ohio, who wishes to speak.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. BROWN. Mr. President, I thank the Finance chairman for his leadership.

I have sat here listening. I was watching the debate in the last hour from my office, and then I came over in the last 20 minutes or half hour and watched from here. I am incredulous when I hear my colleagues on the other side of the aisle talk about "saving Medicare." This is the same group of people, with only one exception on the whole Republican side of the aisle, in 2003, who rammed through the Medicare privatization bill that was written by the drug companies and the insurance companies for the drug companies and the insurance companies.

Two things: One, they never paid for it. There was no discussion, no interest, no move to pay for their bill at all. Then they criticize that our bill is costing too much and running up the debt, when the Congressional Budget Office—which everyone knows is fair—they complain about the Congressional Budget Office. It is like at a sporting event. The losing team complains about the ref.

The other side, because they are losing, complains about the Congressional Budget Office. We know it plays fair. We cite it. We must. We do. It helps us move forward and helps us figure things out. But they did not even try to pay for their Medicare privatization bill because the drug companies and the insurance companies would not have gotten their way so much if they tried to pay for it. But the second thing is, their bill shortened the life expectancy of Medicare.

Our bill increases the life expectancy of Medicare for 10 years. And they have the gall to come to the floor and say our bill does not treat Medicare right, that our bill is going to ruin Medicare, that our bill whatever.

If you are a senior citizen in our country, understand what this bill does for Medicare. This bill guarantees benefits, No. 1. No. 2, this bill lengthens the life of Medicare for several years, as I said. No. 3, this bill helps with the cost of prescription drugs by closing that doughnut hole my friends on the other side of the aisle created back in 2003 with President Bush because the drug companies wanted it that way and the insurance companies wanted it that way.

Last, this bill provides all kinds of services to seniors they were not getting before—mammograms, colonoscopies—for free because we want—not that we want to do a giveaway but we want seniors to be healthy and live longer and have healthier lives. We know that is good for our country. It is good for them. It is good for our families. I am incredulous when I hear them talk about Medicare.

The second thing I am incredulous about when I hear them, that is pretty

unbelievable, is how they talk about partisanship. In the Health, Education, Labor, Pensions Committee, which Senator COBURN sits on and Senator BURR sits on—two of the people who were talking earlier—and the Presiding Officer sits on, we accepted 160 amendments. I voted for almost all of them. They made sense. Some were minor; some were more major. That gave this bill a bipartisan flavor to it.

But now they say the bill is too partisan and we were not listening, they say we are rushing it through—whatever they say. But the reason, even with those 160 Republican amendments, they do not want to pass it is twofold. One is people such as Senator DEMINT said: This is the President's Waterloo. If we can defeat this, we can end his presidency. So part of their opposition is strict win-at-any-cost partisanship.

The other reason is, even though there are 160 Republican amendments, on the big questions of the day, it is a philosophical difference. Go back to 1965. Very few Republicans supported Medicare. On the key vote in the House of Representatives, only 10 out of 160 or 170 Republicans supported Medicare. Over here, in those days, there were a few sort of "Rockefeller Republicans" who supported it. But, by and large, the mainstream Republican party, at least in Congress, opposed Medicare.

So just like they opposed Medicare because it was a big question, they are opposing this bill because it is a big philosophical question. That is fine they disagree with us, but do not accuse us of partisanship when, one, many of them want President Obama to fail. That is a strategy. It is a political strategy. But, second, do not accuse us of partisanship when 160 Republican amendments were in this bill in my committee, and in Senator BAUCUS's committee many amendments were accepted that were Republican amendments.

Then to say we have to slow this down because it has gone too fast, these negotiations have been going on for months. In the Finance Committee, the Gang of 6 started in mid-June officially, and it began before that.

I want to put a human face on this. When they say, let's not move too fast, do you know why I want to move, why I want to get this done by Christmas? We do not deserve to have Christmas with our families until we finish this. Do you know why? Because every day in my State—in Defiance and in Williwick and in Warren and in Steubenville—every day in my State, 390 Ohioans—lose health insurance.

Do you know what else? One thousand people every single week in this country die because they did not have insurance. So 390 people in my State alone—probably 350 in Michigan; probably 250 in Minnesota—every single day are losing their health insurance, and

in this country 1,000 people a week are dying because they do not have health insurance. A woman with breast cancer is 40 percent more likely to die if she is uninsured than if she is insured—40 percent more likely to die if she is uninsured than if she is insured.

So when I see my friends stall and stall, and they have all kinds of reasons—they have the clerk read the bill, they try to talk too long—whatever it is, however they are stalling in so many different ways, they should think about those 390 Ohioans who lose their insurance every day, think about the 1,000 people a week who die because they don't have insurance, and think of the woman with breast cancer without insurance who just has more trouble fighting back.

To further put a human face on this, I wish to share some letters from people in Ohio who have written me. These are people who understand how important it is because it is important to their personal lives, their families, their loved ones, themselves, that we take care of this bill by Christmas.

Sandra from Franklin County writes:

In December 2008, my partner lost her job. In July of this year she started working part-time in the evening, which didn't offer insurance. In October she found full-time work. We are grateful she is now employed. The job has no coverage. While she was unemployed, it hurt us financially. We are behind on some bills. But we can't afford health insurance for her now. It's a similar story with a friend of mine. He lost his job last year. After looking for a job, he decided to go back to school. He finally found a job and is happy for that. But he also doesn't get insurance.

Maria from Montgomery County writes:

I work in a school and come in contact daily with struggling families who can't afford basic medical care for their families. Please help. We want an America that sees health care as a right for all.

Today, I was on "Face the Nation" with Senator LANDRIEU and Senator ALEXANDER. A woman I was talking to works there part time as a contractor. She has a contracting relationship with them. She helps prepare people before they go on the air. She is not employed by CBS; she is an independent contractor. She has her small business. She has insurance and she pays a whole lot of money for it, and she said: Five years from now, I am going to be on Medicare. I look forward to having the stability and predictability of real health insurance. That is why this is so very important.

Robertta from Greene County down in Xenia, between Dayton and Columbus:

I am a senior citizen who feels uncomfortable using my fabulous Medicare benefits when others—parents, ill people, the unemployed—don't have any health care at all. Please pass health care reform for all who need and are without medical care.

Robertta, who is on Medicare, knows and understands, No. 1, how important Medicare is to her. She also knows she

is going to get more from this bill, including free screenings for mammograms, a free physical every year, and the cost of prescription drugs will be less because we are closing the doughnut hole. She knows this bill—unlike when the Republicans tried to privatize Medicare in 2003—actually lengthens the life of Medicare.

Mr. DURBIN. Mr. President, would the Senator yield for a question? I am going to be speaking at the end of this hour that has been allocated to our side, and I don't want to interrupt the Senator from Ohio but for one reason. I don't know if the Senator from Ohio heard or is aware of a statement made earlier today by our colleague from Oklahoma, Senator COBURN, who came to the floor and said:

What the American people ought to pray is that somebody can't make the vote tonight. That is what they ought to pray.

I have been trying to reach Senator COBURN because he is on a committee on which I serve and I work with him. This statement troubles me. I am trying to reach him to come back to the floor and explain exactly what he meant about a Senator not being able to make the vote tonight.

I don't know if the Senator from Ohio is familiar with this statement, but I am reaching out to Senator COBURN. I will be on the floor in the next 45 minutes, and I hope he will join me.

I thank the Senator from Ohio for yielding.

Mr. BROWN. I did not see that quote, but I watched what happened here 2 nights ago when we were trying to pass the Defense appropriations bill to make sure our troops were funded in Afghanistan, Iraq, and stateside and in Europe and everywhere else—Korea, everywhere. The Republicans wanted to kill that even though it would mean no funding, it would mean military layoffs, it would mean we wouldn't be able to get the things and supplies we need for the troops, because they said: We want to kill health care reform. I don't understand the desperation—except maybe I do because everything about this debate is protecting the insurance companies. I guess that is more important to them than anything else. So I will be interested too. I appreciate the assistant majority leader's comments on why Senator COBURN said that.

Let me close with one last letter.

Valerie from Cuyahoga County, which is in northeast Ohio:

I thank the Lord that my husband has a job with health benefits. If he didn't have it, I would be knee deep in medical bills. I know how important insurance is. I could never imagine not being able to go to the doctor. I have had many surgeries and had my fair share of doctors' visits. Could you imagine yourself without medical insurance or not being able to go to the doctor?

She says:

I bet most Senators and Congressmen never had to worry about that. But many

Americans have that worry and it is a scary, scary feeling. The time is now to pass health reform.

I know my colleagues have good health insurance. Of course they do. That is a good thing. But I also know many of my colleagues don't spend much time talking to people who don't.

Most people in our—if you are a Congressman or a Senator making \$170,000 a year, most people you see and socialize with probably are pretty upscale, probably have insurance. Most of us don't spend nearly enough time—I know the Presiding Officer does this in Duluth and Rochester and all over Minnesota. I know the Senator from Colorado, who worked on a lot of these issues with me in the House, when he goes to Boulder and when he goes home to Denver, he talks to people who don't have insurance.

I just wish more of my colleagues who oppose this bill would meet some of the 390 people in my State or in their States who lose their insurance every day. I wish they would talk to a woman who has breast cancer without insurance, knowing she is more likely to die. I wish they would talk to some of those people whose family members die because they don't have insurance. Because most of us dress like this and most of us hang around with people who dress like this and generally we have good insurance, I think we are a little out of touch. I hope we can pass this bill, go back home, and meet some of these people for whom this is going to matter because I think it will make a difference in how we all look at this.

I thank the Presiding Officer, and I yield the floor.

Mr. BAUCUS. Mr. President, I yield 10 minutes to the Senator from Colorado, Mr. UDALL.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. UDALL of Colorado. Mr. President, I thank the Senator from Montana for yielding. I thank him for his tremendous leadership on this important fight here on the floor of the Senate.

First, I commend my colleagues for strapping on their snow gear. The Presiding Officer comes from the State of Minnesota, where this kind of a storm we have had over the last few days is not that unusual a development. I like a good 16-inch dusting from time to time. We all know what an important issue reforming our health care system is, and braving the elements is a small price to pay.

I have come to the floor a lot over the past few months to discuss the challenges that are facing us as we work toward fixing our broken health care system. One overarching theme I continue to emphasize is just how important this is to putting our economy back on track.

We have a bloated \$12 trillion Federal debt which is being fed daily by grow-

ing health care costs. Every day, employers, small and large, are laying off workers and slashing benefits for their employees. Great American businesses, especially in our manufacturing sector, have nearly collapsed because of the rising costs of providing health care for their workers.

Those Americans who have coverage lack the peace of mind in knowing that their insurance will be there just when they need it. This lack of stability and peace of mind is a fundamental problem with the status quo today because it takes away one of the things valued most by Americans: their freedom. Today, they are reluctant to move to a new job, to advance their education, or start a small business for fear they won't be able to provide health care for their families.

As we struggle to mend our economy, we can't afford to tell people to stay put. We know from history that encouraging the entrepreneurial spirit of Americans is the key to promoting small business, creating jobs, and driving our economic recovery. Small businesses have accounted for 65 percent of all new jobs created in the past 15 years, but today anyone who owns or has ever tried to start their own business can attest to why rising health care costs is such a major problem in this country.

Take, for example, the story of a gentleman who just recently contacted me from Denver. I will pick up on the theme the Senator from Ohio was touching upon. If we listened to the people in our States, there would be no question that this reform is necessary. Dave is a small business owner. Last year, he saw his insurance premiums skyrocket 27 percent for his employees. When he questioned this unbelievable increase, his insurance company said all he needed to do to save money was just stop offering coverage to his employees. Just let them buy their own insurance, his insurance company told him. When he looked into that, when he checked it out, he found out that nearly half of his workforce would be ineligible for coverage because of pre-existing conditions and that those who could obtain coverage were priced out and couldn't even afford it.

I hear this story time and time again—small business owners who want to do the right thing but end up facing annual double-digit increases in their costs. This is so troubling in this economic time because small businesses pay on average 18 percent more than large employers for the same level of coverage.

The status quo—and the Presiding Officer has been articulate and eloquent and involved in this fight—as he knows, is unacceptable, and we can't kick the can down the road any longer. The good news is the legislation we are

considering contains essential provisions aimed at helping small businesses, individuals, and American families across our country. Let me touch on a few of the important provisions that are in this final package.

Health insurers will be organized into well-regulated marketplaces and finally forced to compete. This would then involve a creation of a more transparent process for individuals and small businesses, so, for the first time, you can actually compare insurance plans side by side.

The legislation helps individuals pay for these newfound health insurance options. More than half of the cost of reform goes to financing tax credits to put money back in the pockets of middle-class families to help them purchase a health plan. As Chairman BAUCUS has pointed out, these tax credits represent the biggest tax cut since 2001.

In addition, starting in 2010, many small businesses will also qualify for new tax credits worth up to 50 percent of the cost of providing health insurance to their employees.

Also in this bill—I can't emphasize this enough—Americans will no longer go bankrupt because of health care costs. We are the only developed country in the world where citizens go bankrupt because they have health care costs they can't afford.

Insurers will be prohibited from denying access to health care because of preexisting conditions, limiting coverage because of age or gender, or dropping the insurance someone has already paid for simply because they get sick.

Regardless of what we hear from our friends on the other side of the aisle, this legislation saves money, it strengthens Medicare, it reduces the deficit, and it puts us on a path to finally addressing our growing national debt. In fact, noted MIT economist Jon Gruber estimates this bill will save small businesses 25 percent, or about \$65 billion per year, on health insurance. That translates into \$30 billion in take-home pay and an estimated 80,000 saved jobs.

While the bill before us makes important improvements, I would also like to say a few words about the package of amendments offered by the distinguished majority leader. I took some time, as I think we all did over the last snowy 24 hours, to familiarize myself with the changes, and I wish to touch on some of the most promising revisions that have been made.

I wish to first note my appreciation for including the freshman package. These amendments were offered by myself and the freshman class, of which the Presiding Officer is a member, and they have attracted bipartisan support. They boast the endorsements of business, labor, and consumer groups. The provisions inject more cost containment in the bill, cut down on regu-

latory and bureaucratic redtape, and push even more aggressively toward a reformed health care system.

I am particularly pleased to see a provision I worked on that would expand the scope of a new board designed to strengthen Medicare. The amendment would task this board not only to monitor Medicare but to look for ways to improve the entire health care system as a whole. I believe the independent payment advisory board is one of the best cost-containment tools in the bill, and I want to acknowledge Senator ROCKEFELLER for his work in developing the idea, as well as Leader REID for putting even more bite into the authority of this important panel of experts.

Second, I wish to express how proud I am that Majority Leader REID put so much emphasis in the managers' amendment on improving health care in rural America. The difficulty of accessing health care in rural communities is a unique struggle I have been increasingly concerned about, especially as I have traveled around Colorado's rural areas in the past several months. I am glad to see the inclusion of an amendment I authored to establish a rural physician pipeline training program designed to help bolster our rural health care workforce. Many of my colleagues joined me in offering this important amendment which has the potential to recruit and train more doctors to practice in rural areas.

In addition, I also authored an amendment that would establish an explicitly rural element to the community transformation grant program which is aimed at helping prevent and reduce chronic disease in communities across the country.

My amendment would ensure that rural areas are getting their share of this critical prevention and wellness funding, and I was very proud to see this important change included as well.

As I begin to close, I wish to say that although this bill has been strengthened significantly by the majority leader's efforts, it is not perfect. But I do not think anyone expects Congress to craft a perfect piece of legislation. We could never send the President a bill that fixes all the problems in our health care system or exactly reflects the priorities of every single Member of Congress, including myself. But what I am confident of is, this legislation can establish a sturdy foundation upon which we will build, improve, and strengthen access to health care in America.

Will there be mistakes made along the way? I do not doubt it. But as a lifelong mountain climber, I know from experience that the stumbles you experience along the way are a necessary part of reaching any mountain-top. Providing insurance and quality care for all our citizens is a once-in-a-lifetime opportunity to improve the

health and well-being of every American. These are the goals of our health insurance reform and, over the next few days, I look forward to passing a bill which modernizes our health care delivery system, increases much needed choice and competition in the health insurance industry, and helps put our economy back on track, while improving the financial security of middle-class working families.

I yield the floor.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I yield 10 minutes to the senior Senator from Michigan.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. LEVIN. Mr. President, first, let me thank the Senator from Montana for the extraordinary work he has put in on this bill for so long, so many months, so many years. Thanks also go, of course, to the Democratic leader, our majority leader; Senator DODD; and others who have worked so hard to get us here.

We are in a pivotal moment in the long fight to reform our health care system. Everyone should, by now, be well aware of the history—how Presidents of both parties have tried and failed to achieve reform and how, after months of painstaking review, we have arrived at this instant, closer than ever to health care reform.

It would be impossible to fashion legislation on an issue so massive and so complex on which all could agree in every detail. Those seeking perfection will have to look outside this Chamber or, for that matter, in any piece of complex legislation.

But when they look outside the walls of this Capitol, Senators will also find problems that dwarf the imperfections in this bill. They will find a broken health care system, one in which we pay vastly more than other wealthy nations for care that is, in many cases, demonstrably inferior. They will find Americans struggling to afford the health care coverage they have and employers struggling to provide insurance to their employees. They will find manufacturers struggling under a costly health care burden, from which their international competitors were long ago freed. They will find employee and employer alike plagued by never-ending uncertainty about the cost and availability of health insurance, an instability that haunts families and hinders job creation. They will find costs rising so fast they threaten to swallow the rest of the Federal budget and sink family budgets. They will find astonishing amounts of money spent, not on better care or innovative treatments but on overhead and bureaucracy. They will find millions of Americans with no coverage at all—a tragedy for the uninsured and a source of inefficiency and expense that make health care more expensive for all of us.

So the choice before us now is whether any imperfections we might see in this bill outweigh the mountain of evidence that our current system is in dire need of repair. It is between moving forward on a significant repair of a broken system or quashing yet another attempt to reform health care in surrender to the status quo and to the rhetoric of distortion and fear.

To me, this choice is clear: We cannot wait any longer for health care reform. The people of my State cannot wait. The people of this Nation cannot wait. Now is the time for all those years of frustrated effort, all the research and analysis, all the debate and discussion, for us to reform a broken system. We must vote for cloture on the managers' amendment before us and continue to vote for cloture on the endless filibusters that confront us because we cannot wait.

We cannot wait any longer to reform this system because its costs are out of control. In 1990, this Nation, 12.3 percent of its gross domestic product on health care. That is \$1 in \$8. By 2018, the Centers for Medicare and Medicaid Services, CMS, estimates that figure will increase to 20 percent, and \$1 in every \$5 will go to health care. CMS estimates that after spending about \$6,000 per capita on health care in 2003, we will spend more than \$13,000 per capita in 2018, more than doubling our per-person expenditures in 15 years.

This translates directly into unsustainable costs for the American people. According to the Kaiser Family Foundation, thousands fewer of our businesses are offering insurance than a decade ago, a clear sign they can no longer sustain cost increases of 6 percent or more, year after year. If we do nothing, these costs will continue to rise at a rate which will swallow the budgets of families, businesses, and government.

We cannot wait any longer because, even for those fortunate enough to have insurance where they work, they are increasingly unsure it will be there when they need it most. Every Member of this body has heard from constituents who thought they had solid health insurance, only to find out their insurer had wriggled out of paying for desperately needed care or found a convenient preexisting condition that voided their coverage or capped their coverage, so they faced a crushing choice between treatments they had to have and costs they could not afford. Even in cases where families have health insurance, medical emergencies can leave debilitating costs in their wake. According to a study in the *American Journal of Medicine*, 62 percent of all bankruptcies filed in the United States in 2007 involved medical costs; and even more compelling, three-quarters of those bankruptcies involved people who had health insurance when they got sick. There can be

no more clear sign of the need to act than the fact that having health insurance is no insurance against bankruptcy from medical costs.

We cannot wait any longer because so much of the enormous cost at the heart of this health care crisis is money spent on that having little or nothing to do with quality care. For example, for those who purchase insurance in the individual market, roughly 30 percent of the costs they pay will stem from the insurance company's administrative expenses—on bureaucracy, not medicine. A 2003 study published in the *New England Journal of Medicine* found that, in 1999, Americans spent over \$1,000 per capita on health care administration costs—more than \$1,000 for every man, woman, and child in this Nation spent on paperwork and redtape. Electronic medical records, which make administration more efficient and improve the quality of care, are still not in use for most patients.

Finally, we cannot wait any longer because the inefficiencies of our system are crushing us and our budgets and, even more pointedly, because so many lives are at stake. One hundred forty thousand Americans have lost their lives since 2000 because they lacked health insurance. We cannot afford to walk down this road any longer. We must change direction. This bill will do it in a positive way.

An analysis by the Urban Institute, using methodology developed by the Institute of Medicine, determined that since 2000, nearly 140,000 Americans have lost their lives because they lacked health insurance. Other studies show that breast cancer patients, stroke victims and other patients are, as common sense suggests, far more likely to die from their conditions if they lack adequate health insurance. These are rigorous studies that bring us to an inescapable conclusion: If we fail to act, Americans will continue to lose their lives when they need not, simply because they don't have adequate health insurance, or any health insurance at all.

For these reasons and many others, it is long past time to reform our system. The question we must then answer is, will we come closer to a health care system worthy of this Nation if we pass this bill?

I believe we will. The legislation before us will reform the insurance system in powerful ways, protecting patients from the host of abuses they now so often face. We will begin to control spiraling costs in many ways, and establish research centers to find new ways to improve care and lower costs. We will create powerful incentives to reduce administrative burdens and costs. And we will bring millions of Americans into the health care system, reducing the number of uninsured, and reducing what is both a burden of inef-

iciency on the system and a moral blemish on our Nation.

We are out of time and out of excuses. Now we must choose. Choose between beginning to reform on the one hand and continuing the status quo on the other. Our individual problems with this bill cannot be allowed to overshadow the much larger problems with our health care system. Near the end of this long path toward health care reform, we cannot turn back. The Senate needs to move forward.

Again, I thank my good friend from Montana and the other leaders who have made it possible for us to get to this point.

The PRESIDING OFFICER (Mr. UDALL of Colorado). The Senator from Montana is recognized.

Mr. BAUCUS. I yield 10 minutes to the Senator from Illinois.

Mr. DURBIN. Mr. President, I thank my colleague. I wish to renew my invitation to Senator COBURN to please come to the floor but do it soon before my time expires. I called his office to make sure he knew I was trying to reach him. I have spoken on the floor to alert the Republican side that I wished to ask him to explain a statement he made on the floor earlier today. The statement of Senator COBURN of Oklahoma said:

What the American people ought to pray is that somebody can't make the vote tonight. That's what they ought to pray.

I am troubled by this statement. I want to give the Senator from Oklahoma an opportunity to explain it because the simple reality is, I don't think we should be wishing misfortune on any of our Senate colleagues on either side of the aisle. I don't know if this was an innocent statement or something he now wants to clarify. But as stated, it troubles me.

It troubles me because I am afraid it reflects the situation we find ourselves in too often in the Senate, where people are literally invoking God's name in prayer for political purposes—in this case, to wish misfortune on one of our colleagues who would not be able to make our 1 a.m. scheduled rollcall. I do not wish misfortune on any of our colleagues.

Mr. BAUCUS. Will my colleague yield on that point?

Mr. DURBIN. I am happy to yield.

Mr. BAUCUS. I wish to ask my colleague, who knows the Senate procedures so very well, why are we having a 1 a.m. vote? Isn't it possible it could be a different time?

Mr. DURBIN. I thank the Senator because he is exactly right. Under the usual business of the Senate, we agree that we will do something more thoughtful and humane and a vote at an earlier time. Senator REID has approached Senator MCCONNELL and said we have one of our Senators, Senator BYRD of West Virginia, with significant health problems, who was been brought

to the floor now early in the morning, late at night, and in a wheelchair. He looks better than ever, I might add. He is being asked to show up at 1 in the morning because we could not reach what is usual comity and gentlemanly accord on scheduling a vote.

It is unfortunate because now we face this 1 a.m. vote and with no cooperation on the other side to even change the vote for a very humane reason.

Mr. BAUCUS. The requests on this side for a vote at a reasonable hour—now it is 10 after 5 say maybe 5, 6, 7, 8 eight clock—a reasonable time, instead of 1 a.m., have been rejected by the other side?

Mr. DURBIN. Unfortunately, the Senator from Montana is correct. What the Senator from Oklahoma says is:

What the American people ought to pray is that somebody can't make the vote tonight. That's what they ought to pray.

I do not think it is appropriate to be invoking prayer to wish misfortune on a colleague. I want him to clarify that. I have invited him. I tried to reach out to him. He is my friend and I have worked with him. But this statement goes too far.

The simple reality is this. We are becoming more coarse and more divided. It is understandable we would disagree on political issues. That happens all the time. But, unfortunately, we have allowed that political disagreement to spill over into our personal relationships and friendships and that does hurt this institution.

We rely on one another on both sides of the aisle so much. I would say from the start that Senator REID has offered the Republican side of the aisle accommodations and asked we try to do things that might help the families and individuals in the Senate, and we have not had any luck to date.

Hope springs eternal. I hope Senator COBURN can make it to the floor to explain his statement. Earlier this week, there was a prayercast involving several Senators—I did not hear it; I only heard references to it—where they were actually in a group praying for the defeat of this legislation on health care reform. It is their right to do that.

I can recall as a high school football player saying a prayer my team would win a football game. I don't know if God had any time to worry about my little football game. But when it reaches a point where we are praying, asking people to pray that Senators won't be able to answer a rollcall, I think it has crossed the line. I hope my friend and colleague from Oklahoma will come and explain exactly what he meant.

I wish the bill before us were different. I wish it had a strong public option. I wish it offered Medicare to people 55 years and older. I wish it eliminated the McCarran-Ferguson anti-trust exemption for health insurance companies. Unfortunately, it does not do those things.

My disappointment over those elements should not lead me to conclude this bill is wanting or bad. The opposite is true. We have to look to the positive side of what this legislation will do.

This health care reform will extend the reach of health insurance coverage to 30 million more Americans. I see on the floor this evening my colleague from Arizona. He and I were on a television show early this morning. I am sure we got great ratings because the public can't wait to hear us, but during the course of that television show, the Senator from Arizona expressed concern that 20 million Americans would not be covered by our bill.

Interesting, isn't it? Today 50 million Americans are not insured; 50 million Americans are uninsured. This bill will provide insurance for 30 million more, meaning 94 percent of Americans will have coverage, the highest percentage in the history of our country. The Senator from Arizona says it does not go far enough to include more people.

We have waited patiently now for 21 days during the course of this debate on health care reform for the Republican plan for reforming health care. It has never been produced. Promised but never produced. I think the reason is obvious. It does not exist. Several times they have said on the floor: We have a plan, and they will wave a bill at us. When the Republicans had a chance over a 3-week period of time to offer their substitute, they never did. In fact, in over 20 days of active debate on the floor, there were exactly four Republican amendments on health care reform. Four in 20 days, 1 every 5 days. At that rate, how long would the Republicans have us stay on the floor waiting for the next amendment?

That is the reality. They offered six motions to stop the debate, remove the bill from the floor, and send it back to committee. Of course, when it came to actual substantive amendments changing sections of the bill, they would not do it. So the Republicans have come up empty. They are running on empty when it comes to health care reform which means this task of writing a bill is either beyond their pay grade or beyond their will and they like the system as it exists.

I do not. Fifty million uninsured Americans is unacceptable in this country. I think we have to reach a point where we move forward with 30 million now and then find ways to bring in the additional 20 million. Remember, when Social Security was enacted into law, with the resistance of the Republicans—they resisted it saying it is too much government—the safety net extended to widows. We extended in years that followed Social Security protection to dependents, survivors, and the disabled and we added a cost-of-living adjustment.

It was not the end of Social Security in the 1930s. In the years that followed,

we built on the original bill and we will build on this original model of health care reform. The same thing is true under Medicare. Medicare as originally offered did not cover disabled people. It did not provide home health care, therapy, or prescription drugs. Over the years, we added those benefits.

I believe this is an important starting point. I also think it is important we provide insurance protection for Americans. When it comes right down to it, too many people are denied the therapies, the surgeries, the medications their doctors recommend because some clerk in an office at a health insurance company is instructed to just say no, and they say no repeatedly.

We also make sure that patients are first, even with our additional amendment guaranteeing the right of people to pick their doctor and keep their doctor. It is a patient-first approach that we are using on this bill.

We hold the health insurance companies accountable and say if they turn around and gouge the patients before they want to be part of the insurance exchange, they can be disqualified. We saw what happened with credit card reform. When the banks had their way after the passage of credit card reform and during the period before it went into law, they ran up the interest rates on credit cards. I got letters in the mail from American Express and others saying: Incidentally, because of the new Federal law, we are going to raise your interest rate on your credit card over 20 percent. We know some of these merchants, given enough time, will capitalize on that time and try to exploit that system. Our bill is going to go after them.

The medical loss ratio is an important part in the bill. I am sure the health insurance companies are not going to be happy with it. It says: Stop taking those premium dollars and turning them into administrative expenses, advertising, bonuses for CEOs' high-paid salaries. Take the money and pay for medical services for the people you insure. If you do not, if you take too much of this money for profiteering, you are going to have to rebate it to your customers. It is changing the balance, giving customers a chance when it comes to health insurance—something that is long overdue.

We extend the health care safety net in this bill. Mr. President, 1.8 million people in my home State of Illinois will have access to affordable health insurance. I have met them. They are hard-working people, small businesses, part-time employees, unemployed people—none of them has health insurance. Again, 1.8 million in my State of almost 13 million are going to have the chance to be covered.

We will have 10,000 more community health centers.

I cannot tell you what an exciting idea this is. If you visit a community

health center in Arizona or Illinois, you know what I am talking about. This is a clinic in a neighborhood, usually, or small town where people can literally walk through the front door and get access to primary care physicians who will help them through their medical difficulties. They do not have to wait until they are so bad they end up in an emergency room where costs are dramatically higher. They have a doctor, a nurse, a medical professional, a dentist right there in their community. We estimate this bill will add 10,000 more community health clinics across the United States. That is going to be a dramatic change.

It also will create the opportunity for 20,000 more primary care physicians across America. If there is anything more we need, it is family care, internists who can deal with the medical needs of people before they are referred to a specialist or before their situation has deteriorated.

This bill is going to provide for all people under 133 percent of poverty—that is about \$29,000 for a family of four—the security of knowing they are under Medicaid protection without health insurance costs, without health insurance premiums. We will say to those working poor people: You are going to have health insurance. We also believe that progress is going to take some time.

I recall that Senator Teddy Kennedy, who I wish were here for this great battle for which he prepared for four decades, said in his book “True Compass” toward the end that real reform is never over. It is not. This is a beginning. It is an important beginning. It establishes important principles.

I say to the critics, we don’t expect every aspect of this bill to work perfectly. It is an imperfect product made by mere humans trying to do their best. But some of the things in this bill are going to dramatically change health care in America for the better. We are going to find ways to deliver quality care to people in a cost-effective way. We are going to change parts of our system today which, unfortunately, under this current system are out of control. The costs are out of control.

Moving coverage to an additional 30 million people, 94 percent of Americans under coverage, something no other bill from either side of the aisle has proposed, reducing our deficit—incidentally, we now have a CBO statement which makes it clear that the budget savings in the second 10 years—the first 10 years is \$130 billion; the second 10 years is up to \$1.3 trillion. They qualified it, but it still is the most dramatic deficit reduction bill in the history of the United States. There has never been a bill that has come before us that reduces our deficit so dramatically.

It reduces it because it works. It brings down the cost of health care. As

far as Medicare is concerned, this bill will add at least 9 years of life to Medicare. Medicare, which is going to face serious financial problems in about 7 or 8 years, has a new lease on life with this bill of 9 or 10 years.

To say this saves Medicare and puts it on sound footing is a fact that has been confirmed by the Congressional Budget Office, all the speeches on the floor notwithstanding.

This bill is also going to move us forward in the whole area of looking at ways to deal with medical negligence and medical malpractice. We provide incentives and grants to States to find ways, without penalizing the true victims of medical malpractice, to reduce the incidence of lawsuits, to reduce defensive medicine. That is a conscientious and thoughtful way to approach this.

I would say, if I were to ask anyone to offer a prayer—and I don’t do that very often—I would say a prayer for the 50 million uninsured Americans, folks who go to bed without peace of mind that they have health insurance for themselves and their families. I would say a prayer for those turned down by health insurance companies when their doctor says they need a certain therapy or a certain medication or a certain surgery. Those are the people I think of. I pray good fortune for them. I do not pray for misfortune for anyone in the Senate—not for any of my colleagues, not for any of my political opponents. I do not think that is appropriate use of prayer to do that.

I am sorry, as I bring this to an end, that the Senator from Oklahoma has not been able to come to the floor. I have tried now on several occasions through the cloakroom and other ways to invite him to come and explain his remarks. I am troubled when he says the American people ought to pray that somebody can’t make the vote tonight. I pray for everybody. I don’t pray for misfortune for anyone in the Senate. Let’s have the vote. Let’s have all 100 Senators here voting their conscience, voting their heart.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I will be a bit presumptuous here that I can speak for most Senators and probably most of the American people. One thing in life that is so difficult to deal with is when you are working with somebody, irrespective of a situation, and trying to resolve an issue, a problem, and the person you are talking to or working with is not dealing in good faith. When each side is dealing in good faith, then each side will begin to recognize the merits of the other person’s point of view and each person tends to recognize the deficiencies and faults of his own point of view. It is a good-faith exchange.

Not very many things in life are black and white and not many issues

are black and white. Most of them are some shade of gray. I may think that even though my issues—I am not white and the other guy is black, I like to think my shade of gray is more light than his shade of gray. That is not relevant. What works is when both sides talk to each other and try to make an accommodation.

I think I can safely say most Americans think our health care system needs some repair. It is too costly. There are too many cases when the insurance industry cherry-picks and takes advantage of people. It is not the right thing to do.

Also, we have to find a different way to pay for doctors and hospitals, reimbursing on basic quality, not quantity. Almost all doctors agree we should move in that direction.

A few minutes earlier, one Senator got up and said CBO has made this huge error, a $\frac{1}{2}$ trillion error. He goes on and on about this $\frac{1}{2}$ trillion error. To be honest, if we are going to deal in good faith, we should mention the pluses and the minuses, and let the Senators and the public figure out where all this nets out.

CBO has made many statements, most of which I think the Democratic side has relied on, and CBO has made statements that the Republican side has relied on. It is not black and white. It is a shade of gray.

In this case, it is true that CBO sent a letter, I think it was today—in fact, I have it here with me—that said they made a $\frac{1}{2}$ trillion error in the second 10 years. What was the error? I don’t remember the exact figure, but essentially I think CBO said this legislation will reduce the debt in the last 10 years by I think it was $\frac{1}{2}$ percent of GDP which comes out to about \$1.3 trillion to the good. It reduces the debt by \$1.3 trillion.

CBO in a letter to us came back and said they made a mistake. This legislation does reduce the Federal budget deficits over the subsequent 10 years but not by as much. A $\frac{1}{2}$ percent GDP should have been between a $\frac{1}{4}$ percent GDP and $\frac{1}{2}$ percent GDP.

Half the story is CBO said they made an error of $\frac{1}{2}$ percent GDP. But the full story is, still, nevertheless, the Congressional Budget Office says:

All told, CBO expects that the legislation, if enacted, would reduce federal budget deficits over the decade over 2019 relative to those projected under current law—with the total effect during that decade that is in a broad range between one-quarter and one-half percent of GDP.

Essentially, they are saying: We made a mistake at CBO, but still this is going to reduce deficits between \$615 billion and, say, \$1.3 trillion. That is the full story.

I hope when we debate here that we give both sides of the story. That way we can work more toward common ground what is right. Nobody is totally

right. Each of us is here serving in good faith. We want to do what is best for our people in our home States, and we are trying. Different States have different points of view. We are going to get better solutions in health care reform if we talk to each other in good faith and give the whole story, not just part of it.

The PRESIDING OFFICER. The Republican whip.

Mr. KYL. Mr. President, I appreciate the comments my colleague from Montana made. I think the point my colleague earlier was trying to make was that we just got the bill yesterday and have not gotten a full CBO or final CBO score; that the correction simply revealed the fact there is a lot there to digest, and we ought to have more time to understand exactly how the inter-related pieces of the bill work, how all the CBO scoring relates, and so on. When CBO can make about a \$600 billion error, as I understand, that is a big error. So there is probably more and a lot we don't understand. It would be helpful if we had more time to understand this and how it all works, and that was the point my colleague was making, I believe.

But I do appreciate my colleague pointing out it is better we work in good faith and, for the most part, I certainly recall the long conversations the ranking Republican, Senator GRASSLEY, and the chairman of the committee had. I know they worked in good faith, and it would be best if we did that. It is to that end I wish to speak to some comments a colleague made earlier today.

I don't know whether it is frustration or maybe just the lens through which partisans view things and their opponents, unfortunately, that spawned the remarks earlier today from one of our Democratic colleagues, but in either event, his characterization of his Republican colleagues, I think, requires response.

He began by talking about the malignant and vindictive passions that have descended on the Senate. Here is what he said, and I am quoting:

... too many colleagues are embarked on a desperate, "no holds barred" mission of propaganda, obstruction and fear. History cautions us of the excesses to which these malignant, vindictive passions can ultimately lead. Tumbrils have rolled through taunting crowds, broken glass has sparked in darkened streets, strange fruit has hung from southern trees.

I couldn't believe my ears, these references to Kristallnacht, one of the first and most vicious attacks on the Jews by the Nazis, and hanging of Blacks. The majority leader's remarks last week, comparing the Republicans' position on health care to the proslavery movement, remain largely ignored as the clumsy, offhand remarks of a partisan, but the references earlier today appeared not to be off-the-cuff mistakes but prepared text, delib-

erately delivered by one of the brighter minds of the Senate.

Our colleague went on to acknowledge, and I quote again:

... that in the heat of those vindictive passions, some people earnestly believed they were justified. Such is the human capacity for intoxication by those malignant and vindictive political passions.

Well, yes, Republican Senators do believe our position is justified—in fact, correct. There are honorable people on both sides of the aisle who obviously have to agree to disagree. But our colleague attributes no good motive to Republicans, whose passions are simply "malignant and vindictive." He adduces evidence to support his claim. First, an unnamed editor of the *Manchester Inquirer* who wrote that the GOP "has gone crazy" and an unnamed economist who believes our party has been taken over by the "irrational right." A Philadelphia columnist talked about "lunacy on the Republican right."

Further quoting now: "... it has gone crazy, is more and more dominated by the lunatic fringe and has poisoned itself with hate."

I wonder if my colleagues believe our position is animated by hatred. Why else would we oppose this legislation? Well, he answers that question too. It is because, he says, first of all:

... to break the momentum of our new young President. They are desperate to break this President. They have ardent supporters who are nearly hysterical at the very election of President Barack Obama—the birthers, the fanatics, the people running around in right-wing militias and Aryan support groups. It is unbearable to them that President Barack Obama should exist. That is one powerful reason. It is not the only one.

Well, talk about vindictive passions. Does my colleague believe that is why I oppose the legislation—or my colleague JOHN MCCAIN? I hate to disappoint some folks, but I don't care about the political fortunes of the President, at least not right now. I may about 3 years from now. I don't like this bill. That is why I oppose it.

My colleague says there is another reason. He says it is the "insurance industry," which he proceeded to demonize. I am not one to defend the insurance industry, but it is strange to see it so demonized by my colleague, whose party brags of getting another 30 million people insured by what? The insurance industry. Why subject these folks to such awful torture? But the real irony is, the legislation which we oppose, the insurance industry supported. It made a deal with the Obama administration and key Senate Democrats: You mandate that every American has to buy one of our policies, and we will support your bill. There was a deal all right, but it was between the insurance industry and key Democrats. The insurance industry obviously didn't dictate the Republican position, which largely opposes the individual mandate.

Well, finally, our colleague also accused Republicans of engaging in something else. He said we were engaged in a:

... campaign of falsehood about death panels and cuts to Medicare benefits and benefits for illegal aliens and bureaucrats to be parachuted in between you and your doctor.

He went on to state:

Our colleagues terrify the public with this parade of imagined horrors. They whip up concerns and anxiety ... then they tell us the public is concerned about the bill.

So the reason the public is opposed to the bill is because of the power of Republican Senators to terrify our constituents about imagined horrors. Let us look at the examples given.

I don't know of any Republican Senator who has characterized the health care rationing as coming from death panels. I heard that phrase in another context. We have tried to discuss the provisions of the bill we believe do result in rationing. The chairman of the committee and I have had a lot of debate on this subject. I wish Senator ROBERTS and I could offer a couple of the amendments we wanted to offer to make sure there is no rationing in the bill. I think it is a real problem and should be debated on its merits.

The benefits for illegal aliens, I suspect he was referring there to the House debate, but it is still the case that there are completely inadequate provisions in the bill to verify eligibility for benefits. You can even apply by telephone, so just about anybody could apply for some of the benefits.

Third, the matter of Medicare benefits. I don't think we are terrorizing our constituents about Medicare benefits, unless they understand the facts, and the facts are that Medicare benefits are going to be cut. The Congressional Budget Office says the Medicare Advantage benefits are going to be reduced from a monthly actuarial value of \$135 down to \$49 a month. That is CBO saying there is going to be reduction in the benefits for those who have the private Medicare Advantage policies. That includes dental, vision, hearing, vision care, fitness, and a variety of other programs.

We have had a semantic debate in this Chamber between those who say: Well, the fundamental benefits of the Medicare law are not specifically eliminated or reduced in the legislative language of the bill. That is true. But what is also true is, the additional benefits in Medicare Advantage are being reduced. That is unassailable. It is also true—and CMS, for example, refers to this—that enrollment is going to be reduced because of these reductions in benefits. They talk about the lower benchmarks, and they say when it is fully phased in, enrollment in Medicare Advantage plans would decrease by about 33 percent. So this is not some kind of fantasy. This is taken from the Congressional Budget Office and from the CMS Actuary.

Finally, in addition to the Medicare Advantage, the Actuary says simulations by the Office of the Actuary suggest that roughly 20 percent of party providers; that is, hospitals, nursing homes, home health care, would be unprofitable within the 10-year projection period as a result of productivity adjustments. That means they would go out of business. Obviously, senior care is going to be affected by this legislation, and we believe negatively so. That is an honest debate to have, and it is one which we would like to have.

But, finally, my colleague turned the world upside down by arguing the only reason we are here the week before Christmas is because of Republican bad behavior; that we ruined the holidays for the professional staff because we followed the procedures of the Senate that require the reading of the bill.

It is true that requirement is usually waived, but then we usually have plenty of time to know what is in a bill. Usually, a bill works its way through committee and both parties know what is in it. We both help to write the bill. It is transparent. It is usually printed long before it comes to the Senate floor so we know what is in it. The reason it was read was so our staff would, in fact, have time to read it, to advise us—because we didn't all have time to read it ourselves—and to advise the public, our constituents, of what is in it. Again, we received it yesterday and we are voting on it tonight. That is very little time to know everything that is in there.

The more we learn about what is in there, the angrier a lot of people get. The special deals for one State, for example, are simply wrong. That is why you take time to see what is in it. The majority of the public, according to opinion polls, want us to take more time to understand what is in this bill.

A final point on this. I have to say, the majority leader dictates the schedule of the Senate. All Senators are pretty much equal, but the majority leader has two things he can do and only he can do. He has the right of first recognition, and he has the right to set the schedule. By the schedule, I mean when he files a cloture motion, which is what brings this bill to the floor or this amendment to the floor. When he files the cloture motion, that is what determines when the vote will be. He determines when to bring the Senate back in session. Under the rules, an hour after he brings us back in session, the cloture motion ripens and we have a vote.

He can set that time at any time. He can say tomorrow morning, at 9 a.m., the Senate will come back in session and we will vote at 10 a.m. The leader could do that. That is his right, and he is the only one who has the right to do that. But instead, he says we will come in at 1 minute past midnight tonight. Therefore, the vote will be 1 minute

past 1 a.m. tomorrow morning. It is his right to do that.

We didn't do that; he did that. He is the only one who has the right to set that schedule. If he wanted to set a schedule that was a little more convenient for all the Members—including our dear friend, the Senator from West Virginia, who is ill and indeed does have to get out of a bed to come in a wheelchair to this Chamber—the majority leader has it within his power to say we will do it at a more convenient time.

Why would he do it in this way? Because he has deliberately decided—and all majority leaders have not done quite this but have done similar things—to set a recess and then work us up against the recess so we will have an incentive to finish. It is usually a pretty good incentive. Certainly, going home for Christmas is a big incentive. So the majority leader figures, if he can schedule this bill and the various votes in such a way that we end up voting on it on Christmas Eve, that maybe then we will hurry up and try to do it because, as one Democratic staffer is quoted as saying: "We need to hurry up and pass this bill because the longer it hangs around the harder it will be"—meaning to pass it. That is true. The more the public finds out about it, the less they like it.

So the majority leader is trying to get it done as quickly as he can, and "as quickly as he can" means scheduling us for a vote 1 hour after we come in. Since there has to be an intervening day—and today is the intervening day—tonight, at 1 minute after midnight, we will reconvene for the next day and then have the vote at 1 a.m. It is purely the majority leader's decision to do it that way. Republicans have nothing to do with it.

If I had my way, we would vote at 10 o'clock in the morning. But that is not the way it is going to be. So please don't say it is Republican bad behavior that results in having to vote on this bill late at night. The process is determined by the majority leader.

I guess I am going to conclude by saying I don't believe this bill can be sold on its merits, and I think that is another reason why we have to hurry up and do it—before the public figures out what is in it. The public opposes this bill not for the reasons imagined by my colleague but because it will cut Medicare benefits, it will increase insurance premiums—not cause them to go down—it will raise taxes, put the government in charge of too much, it will cost trillions of dollars, and it will result in the delay and denial of care. That is why the majority of Americans want us to start over and address the problems on a step-by-step basis.

I was amused by my counterpart, the Democratic whip, saying Republicans have only offered four amendments. I think it was seven but say it is four. Guess who determines how many

amendments we get to offer? The majority leader. He sets that schedule as well. He says now it is our turn to offer an amendment. Then it is your turn. The way he managed the schedule, we only got to file either four or seven amendments. We have 200 amendments pending. We would love to get as many of these pending and voted on as possible. Believe me, it is not Republicans who don't want to vote on our amendments. The majority leader, again, has set the schedule.

This is why we oppose the bill. It is why we don't like the process. We respect what our constituents are telling us. We believe this bill will be bad for them, and it will be bad for our country. Our Democratic colleagues have a different position. Neither their position nor ours is malignant, nor should they be expressed vindictively.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, we have all been waiting for many weeks while the Democratic leadership worked behind closed doors, out of public view, to write this new health care reform bill, and this process, of course, is very much contrary to what the President promised during the campaign—that negotiations on the health care reform bill would even be on C-SPAN so everybody in the country could see it. So now a very secretly put together bill is out for our consideration with just a few days to consider it.

Last week, they were considering expanding Medicare to people between 55 and 64 years of age—also, increasing Medicare to cover people up to 150 percent of poverty—and thirdly, having a government-run plan run by the Office of Personnel Management.

Now we have something entirely different. We have the Reid amendment, and it is chock full of special deals. It does nothing to fix the fatal flaws in the 2,074-page bill we started with, and now we have a bill that is probably 400 pages longer than 2,074 pages.

What kind of changes does this new amendment make to the original Reid amendment? Well, one tax disappears—it was a tax on cosmetic surgery—and in its place we have a new tax, a tax on tanning bed services. The dial on the Medicare payroll tax is turned up. So the first-time marriage penalty in a Medicare tax—one that hits about half the two-earner couples—is enhanced. Well over 1 million couples get to look forward to that tax hit—can you believe it?—just for being married. So the old marriage penalty is back. The dial on the insurance fee is also turned up in the back end of the bill.

But with respect to a few favored insurance companies, the fee is turned off. The very limited small business tax credit is expanded—over \$½ trillion in new taxes, according to the official congressional scorekeepers. What kind

of tax changes stay the same? Basically, the managers' amendment in the underlying Reid amendment still imposes new taxes—new taxes on everything from tanning beds to insurance companies to wages to heart valves to drugs and even more.

Contrary to what has been said on the Senate floor this very day, the tax burden still rests on many middle-class folks. As has been said, there is a sizable subsidy that 12 million tax-filing families and individuals receive. We do not dispute that. But what the other side does not want to acknowledge is this: There are 42 million tax-filing, middle-class families and individuals who will pay higher taxes under this 2,000-plus page bill. For every middle-class, tax-filing family who receives an insurance subsidy, three middle-class families will pay higher taxes.

I ask unanimous consent to have printed in the RECORD a copy of a corrected version of an article from Congressional Daily, dated December 18, of this year.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From CongressDaily AM, Dec. 18, 2009]

LABOR CITES JCT ANALYSIS TO ARGUE
AGAINST CADILLAC TAX

(By Peter Cohn)

Labor officials Thursday unveiled new ammunition in their fight against a proposal to tax high-cost health insurance plans in the Senate health bill, citing a congressional analysis that found more than 22 million households earning less than \$200,000 would see a tax increase by 2019.

That figure could rise a bit as the Joint Committee on Taxation did not distribute information on tax returns for married couples earning up to \$250,000, which is the threshold set by President Obama when he pledged not to tax the middle class. The tax issue could be the most intractable difference between Senate and House-passed legislation—which instead relies on a millionaires' surtax—as Democratic leaders struggle to cobble together a bill that can pass in both chambers next year. Communications Workers of America President Larry Cohen, whose group released the JCT figures, said they demonstrate “irrefutably that the excise tax—which will result in reduced coverage and increased costs for our middle class families—is the opposite of reform.”

Most House Democrats and union officials are adamant that the final version does not break Obama's pledge and tax those households earning less than \$250,000. Obama at one point appeared to endorse the House bill's surtax, which is the single-biggest revenue source in either bill at \$460.5 billion. There are major problems with that tax in the Senate, however, not least because it is not indexed for inflation. It also could affect about one-third of all income earned by small business owners that file individual tax returns, according to JCT.

“This is going to be a major problem, no question about it,” said a senior Democratic aide. “The White House is going to have to weigh in and provide some direction.”

There have been some mixed signals. The president in a July press conference said the House surtax “meets my principle” of not

burdening “families who are already having a tough time.” In a speech to Congress after Labor Day, however, Obama endorsed the Senate excise tax as a “modest change that could help hold down the cost of health care for all of us in the long run.”

The 40 percent excise tax in the Senate bill would affect employer-sponsored coverage worth more than \$8,500 for single workers and \$23,000 for family plans beginning in 2013. Those figures would rise with inflation, plus 1 percent each year, with higher beginning thresholds for older workers and those in high-risk professions. Certain high-cost states would be granted additional room before the tax kicks in.

In a White House blog post Wednesday, National Economic Council Deputy Director Jason Furman said the Senate bill would not hike taxes on the middle class and actually would provide a net tax cut.

He noted JCT estimates that only 3 percent of health premiums would be affected in 2013, a figure that rises to 8 percent by 2019, as well as the higher wages that would accompany a decrease in costly health benefits.

One school of thought holds that whatever bill is able to muster 60 Senate votes will form the basis for the final legislation, and House Speaker Pelosi will have to deliver the votes in her chamber. Another says 188 House Democrats that oppose the Senate tax—a broad cross-section led by second-term Rep. Joe Courtney of Connecticut, who requested the new JCT data, and Rep. Sander Levin of Michigan—won't allow the House to be steamrolled.

“How did they get into this mess?” one labor official asked. “They've set this thing up terribly, and they have a huge problem in their Caucus.”

The senior Democratic aide said another Senate provision, an increase in the Medicare payroll tax for those earning above the \$200,000 and \$250,000 thresholds, could meet the House test. Another idea, promoted by Sen. Debbie Stabenow, D-Mich., would apply the Medicare tax to unearned income such as capital gains and dividends and also has some cache in the House.

But those proposals also have the disadvantage of being prime revenue sources to help shore up Medicare's finances over the long haul, which could be negated if used up to help expand healthcare benefits to younger workers.

House moderates at one point considered a plan authored by the centrist Democratic think tank Third Way to tax “excess medical inflation,” or healthcare premiums that are rising much faster than overall economic growth. Sen. Thomas Carper, D-Del., an honorary Third Way co-chairman, has pitched the idea in his chamber as well. He continues to argue it could be a fallback position; other sources on and off Capitol Hill suggested the train has already left the station and it was too late to inject a new and untested idea into the mix.

What is striking is the amount of agreement between unions and Republicans on the Senate's excise tax, however. Republicans, including Sen. John McCain, R-Ariz., have long held that taxing employer-provided health coverage is the best way to keep costs down and raise revenues. But in opposing the overall health bill, they have latched on to the fact that the excise tax and other taxes in the bill would hit those middle-class workers Obama wants to protect.

According to JCT data analyzed by Senate Finance Committee Republicans, the number of households earning less than \$200,000 that

would be hit with a tax increase number closer to 42 million in 2019, or about 25 percent of all tax filers under that threshold.

They looked not only at the excise tax but also a scaled-back itemized deduction for medical expenses for those with costs not covered by insurance, and those affected by the Medicare tax that have losses bringing their income under the thresholds.

The numbers factor in those who receive premium tax credits and subsidies to offset the cost of buying health coverage in the bill. Most of those hit with net tax increases earn between \$50,000 and \$200,000 annually. Of those households earning under \$75,000, roughly 12 million would come out ahead, JCT found, including many who earn too little to pay taxes.

Mr. GRASSLEY. This new compromise does not fix any of the core problems in this original 2,074-page Reid bill. It is still that long of a bill. It is still a \$2.5 trillion massive bill as far as costs are concerned. The Reid amendment actually adds 400 more pages.

These closed-door negotiations did not produce a better product. Quite the opposite. It still taxes middle-class families, seniors, and veterans. Millions of people still will not be able to keep what they have, as the President promised in the last campaign. A lot of people who were hoping to pay less as a result of the word “reform” will still end up paying more.

I am not just talking about the young and the healthy. It still imposes higher premiums for prescription drug coverage on seniors and the disabled. It still permanently cuts all annual Medicare provider payment updates based on productivity gains outside of health care. These cuts still go into effect, even if it means providers will get a negative payment update, and these permanent cuts still threaten Medicare access to care.

The bill still cuts \$120 billion from Medicare Advantage, cuts that will reduce Medicare benefits for 11 million beneficiaries, contrary to what the President told us in his speech in September—that nobody is going to get cut in Medicare. This bill still creates a new body of unelected officials with broad authority to make further cuts in Medicare beyond the \$40-some billion that are in this bill.

This bill still unwisely makes the board permanent. This bill still requires this board to continue making even more cuts in Medicare and to do that forever into the future.

The damage this group of unelected people could do to Medicare is unknown, but we certainly do know how impossible it will be to undo any damage that unelected board does, if Congress decides we ought to undo it. That is because whatever cuts they make we have to offset, and stirring up that money is very difficult for offsets.

This bill passes a \$26 billion unfunded mandate on to the States because the Reid amendment even made this problem worse by adding \$1 billion to that

unfunded mandate for States under Medicaid. These increased costs will cause States to raise taxes, maybe cut education, maybe cut transportation, and maybe cut law enforcement. But it is still money the States have to dig up.

This bill still has the CLASS Act in it, even though the administration's own Health and Human Services Chief Actuary says it runs the risk—a great risk—of being unsustainable.

It still has a special carve-out for committee and leadership staff from having to use the health insurance exchanges. This is a cute move on the part of somebody in these closed-door offices. I got an amendment through the Senate Finance Committee on a unanimous basis that, if the people of this country have to use the exchange, employees and Congressmen on Capitol Hill ought to use it. But, no; when you get to the secrecy behind doors, just the Congressmen and their permanent staffs but not the thousands of people who serve on leadership staff or committee staff, they still got the deal they have today. So they are not going to know what the American people are going through by using the exchange.

This bill still has special deals for brand-name drug makers that will reduce access to generic drugs, making drug costs even higher for everyone. What this process has shown is that there is a clear and significant philosophical difference between this side of the aisle versus that side of the aisle. Those differences are still there, and the lines between us on this specific piece of legislation become brighter still, even though maybe on 90 percent of the legislation going before this body, there is bipartisan cooperation. But on this one, restructuring one-sixth of the economy, health care being a life-or-death issue for 306 million Americans, this is different from anything this body has tried before. On something such as this, maybe there is a legitimate reason for having differences.

Republicans tried to reduce the overall cost. They said no. They increased the spending in the bill. Republicans tried to reduce the pervasive role of government. They said no, and they increased the role of government. Republicans tried to make it harder for illegal immigrants to get benefits. They said no, and that still has not been fixed. Republicans tried to guarantee that Federal funding for abortions would not be allowed under this bill. That has been the Federal policy since 1976. That has even had bipartisan support ever since the Hyde amendment was put in place that year. But they said no. They wouldn't agree to apply that policy. That still has not been fixed. Republicans tried to allow alternatives to the individual mandate and the harsh penalties associated with it. They said no. They have subjected even

more people to the mandate, and they have raised penalties. Republicans tried to raise medical malpractice reform. They said no. Real lawsuit reform is still not in this bill.

We have watched while the other side has expanded government coverage. Since this process began, the other side has been working hard to move millions of people from private coverage to government-subsidized coverage. The bill creates new government programs that cover families making close to \$100,000 a year. When we hear about that in rural America, in the Midwest part of the United States, they think we have gone bananas in this body by subsidizing families making \$100,000.

At the end of the day, after raising billions in new taxes, cutting about $\frac{3}{2}$ trillion from Medicare, imposing stiff new penalties for people who don't buy insurance and increasing costs for those who do, still 23 million people will not have health insurance. I don't think this is what the American people had in mind when we promised to fix health care.

The Reid bill imposes a \$2.5 trillion tab on Americans. It kills jobs with taxes and fees that go into effect 4 years before the benefits of the bill take hold. It kills jobs with that employer mandate. It imposes $\frac{3}{2}$ trillion in higher taxes on premiums, on medical devices, on prescription drugs, and yet more. It jeopardizes access to care with massive Medicare cuts. It imposes higher costs. It raises premiums. It bends the cost curve in the wrong way because people would expect you to bend inflation down, but this bill takes it up. This is not what people have in mind when they think about health care reform.

We have been hearing repeatedly from the majority whip from Illinois that the Republican side has offered only four amendments. I found this to be rather astonishing. The majority whip should know, because they are filed at the desk, that Republicans have put forth 214 amendments. In addition to striking some of the bad ideas in the Reid bill, these amendments also contain Republican proposals that are improvements over the Reid bill. But in this rush to get it done, the majority has decided they don't want to consider any more of the 440 amendments filed at the desk.

Let's be clear. We keep them so people can have access to them anytime they want to, the 440 amendments that have been filed, that we are accused of not offering any suggestions or improvements. Right here in these three binders, any one of the amendments you want, it is there.

Since this happens to be the case, I would like to take them up on their interest in considering additional amendments. The majority leader and my friend, the Senator from Montana, have both said they want this bill to

fill the doughnut hole in the Medicare Part D Program. I share my colleagues' desire to provide even more protection than seniors get under Medicare. I filed an amendment that is in this binder, amendment No. 3182, that would use the savings from medical liability reform, which happens to be about the second or third thing that always comes up at my town meetings that the people in this country feel we ought to be working on if we are going to make real the word "reform." It would put that \$50 billion into savings toward eliminating the doughnut hole. The amendment puts the needs of 27 million seniors ahead of the needs of trial lawyers. I can't speak for my colleagues, but that seems like a pretty easy decision.

To my good friend from Montana, I only have one unanimous consent request. I ask unanimous consent to set aside the pending amendment in order to offer amendment No. 3182, which is at the desk.

THE PRESIDING OFFICER. Is there objection?

MR. BAUCUS. Mr. President, reserving the right to object, the doughnut hole will be filled. I have made that promise. Senator REID has made that promise. The White House made that promise. When the bill is presented on the President's desk, the doughnut hole will be filled but not in the way suggested by my friend from Iowa. He is one of my best friends in the Senate, and it is with regret that I must object.

THE PRESIDING OFFICER. Objection is heard.

MR. GRASSLEY. I find it disappointing that we would miss the opportunity to forgo \$50 billion in savings that could make prescription drugs more affordable for 27 million seniors. Even though my friend has just said they are filling the doughnut hole, I would quickly say it is being filled in a way that the big pharmaceutical companies are going to make sure they are selling prescription drugs, prescribed drugs, for a long period of time and not have the savings that ought to come from using generics to a greater extent. This \$50 billion—actually \$54 billion—that CBO says we would save with medical malpractice reform would be a better way of filling that doughnut hole.

I have a parliamentary inquiry of the Chair.

THE PRESIDING OFFICER. The Senator will state his inquiry.

MR. GRASSLEY. I want to make a parliamentary inquiry about the pending managers' amendment. My inquiry will be whether the pending amendment, which everyone agrees is critical to the health care reform legislation before us, complies with Senate rule XLIV.

Senate rule XLIV was adopted as part of major ethics and government reform legislation. It was passed in

2007. Its title was the "Honest Leadership and Open Government Act." The Democratic leadership made it the first bill introduced when they took over the majority in 2007. It enjoyed broad bipartisan support. I wish the reform had been tougher. The part of the legislation that became Senate rule XLIV dealt with the transparency of earmarks. They are technically defined as "limited tax benefits" and "congressionally directed spending items."

Rule XLIV applies to floor amendments such as the pending managers' amendment. Rule XLIV requires the sponsor of the amendment—in this case, Senator REID—to provide a list of these narrow provisions. Senator REID has not provided the list. We received the several-hundred-page amendment yesterday morning. Republican staff have performed a preliminary review. That review finds that some items might—I repeat, might—be limited tax benefits. There are press reports about narrowly crafted exceptions to the insurance fee.

I ask unanimous consent to have printed in the RECORD a copy of the Dow Jones article dated December 19, 2009.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From Dow Jones Newswires]

SENATOR NELSON WINS TAX CARVE-OUT FOR
MUTUAL OF OMAHA IN HEALTH BILL

(By Martin Vaughan)

WASHINGTON (Dow Jones)—Insurance giant Mutual of Omaha will see less of a hit from a \$10 billion-a-year industry-wide tax on health insurance providers, under the terms of a deal worked out between Senate Democratic leaders and Sen. Ben Nelson (D., Neb.).

Under revised Senate health legislation unveiled Saturday by Senate Majority Leader Harry Reid (D., Nev.), the tax on insurers will begin in 2011 at \$2 billion a year, eventually rising to \$10 billion annually. The tax is to be divided up based on each company's market share.

Senate aides who reviewed the legislation said provisions in the revised bill are specifically crafted to protect Nebraska insurers, including Mutual of Omaha.

The tax carve-out appears to be one of several concessions Nelson won from Democratic leaders before agreeing to add his vote, the final one needed to secure passage in the Senate, to the healthcare measure.

"The biggest issue for us was abortion," said Jake Thompson, a Nelson spokesman. "But Sen. Nelson also wanted to ensure that Nebraskans won't face increased premiums as a result of a fee that was going to be imposed."

Nelson inserted a provision that will carve out supplemental Medicare insurance from that tax. That provision will benefit Mutual of Omaha, but also other insurers that offer so-called Medigap policies, Thompson said.

Nelson also won support for a provision ensuring that Nebraska won't have to foot any costs for new Medicaid enrollees. That is important because the Senate bill expands Medicaid eligibility, potentially increasing costs for many states under a cost-sharing system with the federal government.

Most other states will be required to pick up between 5% and 18% of coverage costs for

new Medicaid enrollees, with the federal government picking up the remainder.

The revised bill introduced by Reid also carves out non-profit insurers that meet certain criteria, especially in Nebraska and Michigan, from the new industry-wide tax.

"Several states had unique circumstances, and [Reid] thought it was appropriate to provide a narrow exemption from the fee for a couple of states that had unique circumstances," a Senate Democratic aide said in a conference call with reporters.

"Nebraska also had circumstances that necessitated the relief," the aide said, without elaborating.

"This legislation is good for our country and good for Nebraska," Nelson said in announcing his support for the healthcare bill Saturday.

One provision in the bill is narrowly tailored to apply to Blue Cross/Blue Shield of Nebraska, Nelson's spokesman said. It says that a company that is a mutual insurance company and had a market share in a state of between 40% and 60% in 2008 would be exempt from the tax.

Senate transparency rules enacted after Democrats took over the chamber in 2006 discourage narrowly crafted tax breaks, also called tax earmarks. Senators are required when offering amendments that include such provisions to publish a list in the Congressional Record, and the amendments could be subject to procedural objections.

The Senate GOP aide said that carving one insurance provider out of the tax could put it at a distinct advantage with respect to competitors. The Joint Tax Committee has estimated that the tax could result in increased premiums to consumers of between 1% and 1.5%.

"If one company is protected from that fee, you're talking about a significant pricing differential," the aide said.

Mr. GRASSLEY. Likewise, single State Medicaid provisions might be determined to be congressionally directed spending items. Under rule XLIV, the determinations are not made by the minority staff.

In order to ensure transparency of narrow provisions, the burden is on the sponsor to provide the list.

This is my parliamentary inquiry: Does rule XLIV of the Standing Rules of the Senate require that if a Senator proposes an amendment containing congressionally directed spending or a limited tax benefit, that the sponsor of those provisions and the names of the Senators requesting them be printed in the RECORD?

The PRESIDING OFFICER. Paragraph 4(a) of rule XLIV requires that a Senator proposing an amendment containing a congressionally directed spending item ensure as soon as practicable that a list of such items be printed in the CONGRESSIONAL RECORD.

Mr. GRASSLEY. Has the majority leader provided a list of these special deals and of the Members requesting them for the RECORD as required by the Senate rules?

The PRESIDING OFFICER. The Chair is not aware of whether that has occurred at this time.

Mr. GRASSLEY. So what is the situation as far as the rule being provided, as long as the Senate has not been made aware of this?

The PRESIDING OFFICER. This part of rule XLIV simply requires that the Senator mentioned make a good-faith effort to comply with paragraph 4(a). It does not impose a condition that would precede the amendment, that it could not be heard.

Mr. GRASSLEY. I yield the floor.

The PRESIDING OFFICER. The minority whip.

Mr. KYL. Mr. President, a lot of attention has been paid to the position of the senior Senator from Nebraska on this legislation. Page 98 of the amendment provides that the State of Nebraska is carved out from being responsible for paying for additional Medicaid patients added under the bill. It is the only State explicitly carved out from this requirement.

I address this as well to the chairman of the committee.

I ask unanimous consent that the pending amendment be set aside and it be in order to offer an amendment to extend to all States the same benefit that provides 100 percent Federal funding to the State of Nebraska for their expanded Medicaid Program. This would give the same treatment to other States that currently only Nebraska would enjoy under this bill. If the bill is a good thing for all States, then it seems to me it should be applied equally to all States.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Wyoming is recognized.

Mr. ENZI. Mr. President, since that was the broader context of that intent and there are other States that are hurting as well, I ask unanimous consent that the pending amendment be set aside in order to offer an amendment to the extent that Colorado and Montana and Virginia would get the same benefit that provides 100 percent Federal funding to the State of Nebraska forever for their expanded Medicaid Program, which would give the same treatment to these other States that I have mentioned that currently only Nebraska would enjoy under the bill.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. Mr. President, reserving the right to object, as enticing as that might sound, I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Alabama is recognized.

Mr. SESSIONS. Mr. President, following up on that, I happened to see Governor Schwarzenegger on television today. He said he had initially been inclined to support this legislation until he realized what it would do to his Medicaid budget in California—it would cost them \$3 billion and they do

not have that \$3 billion. Indeed, they didn't have the money necessary to meet their current obligations under Medicare.

Therefore, I ask unanimous consent that the pending amendment be set aside and it be in order to offer an amendment to extend to the State of California the same benefit that provides 100 percent Federal funding to the State of Nebraska for their expanded Medicaid Program. This would give the same treatment to California as Nebraska would obtain.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Alabama.

Mr. SESSIONS. Mr. President, I think I would be remiss if I did not ask unanimous consent that the amendment be set aside and that these provisions be extended to my State of Alabama which is also in a serious condition financially and whose Governor has expressed unequivocal opposition to the burdens on the State Medicaid Program that passing this legislation would impose. I ask unanimous consent that the same benefit that provides 100 percent Federal funding to the State of Nebraska for their expanded Medicaid Program apply to the State of Alabama.

The PRESIDING OFFICER. Is there objection?

Mr. BAUCUS. I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Alabama.

Mr. SESSIONS. Mr. President, why are we here voting tonight at 1 a.m. and probably voting all the way to Christmas Eve? I think the answer fundamentally is on the health care matter, that after much talk about a bipartisan health reform effort and some work toward that end, the President and the Democratic leadership in the Congress decided they had the majorities in the House and the Senate and that they would use those majorities to pass the legislation that they wanted without Republican input. I know that has happened on occasion around this Senate, but I don't believe it has ever happened on a matter of such significance.

These major kinds of policy matters have historically been bipartisan or had substantial bipartisan support. We are talking about health care, involving every American. We are talking about raiding, not strengthening, Medicare, a program that is already in deep trouble. We are talking about a major governmental intervention into one-sixth of the American economy. These are pretty big issues.

Even more significantly, our Democratic colleagues are concerned about the American people, who, by consistent majorities, reject this plan.

They are fearful of them. So they want to move this bill forward now, sooner, faster, quicker, with less discussion and less debate. Instead of working together to improve a broken health care system, the decision has been reached to railroad this bill through before Christmas.

They say the President promised reform. He was elected and so they will just ram it through no matter what the American people, for that matter, think.

Just for example, a recent CNN poll—I do not think that is a rightwing entity—61 percent oppose the Senate bill, only 36 percent support it. Just a little more than one-third support and over 60 percent oppose. Those are lower numbers than President Bush received for his plan to reform Social Security.

So, why do they do this? Well, because they think they know better than you do, because they want to make history. And if you object—as the Senator from Rhode Island said this morning—you and the rabble disagree with us, why, you are mean-spirited, coldhearted, and fearful—as to whatever those words were—you are just like those great unwashed whom you represent. So I think there is an unusual amount of disdain here for any political and substantive disagreement about this incredibly important legislation and I think a disdain for the concerns of the American people, as represented in rallies, in tea parties, and in polling data.

Is this all just illogical fear? Are these people totally irresponsible to worry about the future financial condition of their children?

A colleague of mine showed me this great cartoon that showed a man standing beside Santa Claus, and Santa said: What would you like? I think the man was President Obama. And he said: Health care. And there was also a little boy, sitting on Santa's lap, and he said: What do I get? And Santa said: You get the bill.

Well, the people know this is a significant issue for the future direction of our country, and I think they are saying that this what not what they intended during the last campaign. I remember this defining moment—do you not?—when Joe the plumber accosted President Obama, and they discussed redistributing the wealth around. And what an effort there was to suggest that President Obama did not really believe in that idea, but that he believed in freedom and individual responsibility and was not going to tax the average person, and those kinds of things. So the campaign survived that little dust-up.

But I think the American people are saying: Fool me once—during the campaign—shame on you. Fool me twice, shame on me. They are not happy with this bill. Polls show the tea parties are more popular than the Republican or

Democratic Parties. So I think this use of raw power—the idea that we must get this bill done before Christmas, and we will pay any price necessary to get the votes to do it—is not good.

I am amazed that people would criticize those of us who do not agree with this legislation—and I am prepared to talk at some length about the substantive reasons about it—that we are somehow obstructionist because we would like to have more than 1 day, really, to consider a 383-page amendment and see what all was placed in it.

So my colleagues have been saying the people are misinformed and they have been subjected to lies and misinformation. Well, just a few days ago, I heard the President declare that if you do not pass this legislation, your insurance premiums are going to go up, which is not untrue. But what he did not convey—and I think most people understand already, however—is that even if the bill passes, premiums will go up some, double digits more than they would have gone up if the bill had not passed. A few people will see a modest—less than 1 percent, maybe some over 1 percent—reduction in the rate of increase in their insurance premium, but a lot of people are going to see double-digit increases in their premium, particularly the people who are not in group plans. Those are the ones for whom insurance premiums are the most unfair and who are getting rooked the most by insurance. We ought to be taking care of this problem because they are not in group plans and they are not in companies that subsidize it. They do not work for the government that subsidizes their health care.

But the President has the bully pulpit. He lectured the whole Congress. He hauled us out and talked about it in a joint address to Congress. He got \$150 million from the big PhRMA drug companies to advertise in support of this bill, as it has been reported. Robert Reich, a great liberal, Secretary of Labor under President Clinton, scathingly condemned that deal that PhRMA made with the White House over the doughnut hole and their contribution for advertising.

I will just have to say, the majority has found no price too high, no depth too low in order to get that 60th vote so they can go forward. And we have got to get it done now, pass this managers' amendment that the majority leader has plopped down—the one that was written in secret and we just saw yesterday morning at about 10 o'clock.

Well, I will just say, how should we judge the overall merits of the bill? How should we decide whether to vote for it or against it? I would say that one good way is to judge it by its own promises, to judge it by what the American people have been told the bill will do, how much it will cost, and those kinds of things.

Well, there are some facts and some fictions here. We just need to be frank about it.

Fiction No. 1: We have been told that the total cost of the legislation is \$871 billion. That is a lot of money, \$871 billion. But what are the facts? When the new programs created by this bill are fully implemented, the bill will actually cost, over the first 10 years of full implementation, \$2.5 trillion—three times as much.

Now, who is giving the best numbers here? Since we know most of the benefits do not start until 5 years from now, they score the first 10 years of the budget, the cost of the bill, and say it costs \$871 billion. But if you take it from the first 10 years of the bill, as we would normally score a piece of legislation, it is \$2.5 trillion—\$2,500 billion. That is a stunning difference. It just shows what a massive piece of legislation this bill is.

According to the bill, Medicaid will be expanded up to 133 percent of the poverty level, but that will not happen until 2014. The insurance subsidies funded by the bill do not begin until 2014. So this is how they manipulated the numbers. So they say \$871 billion. Not so. In fact, the managers' amendment increases Federal spending on health care to \$200 billion rather than \$160 billion projected under the original bill that came forward.

So we currently spend one-sixth of our GDP on health care. How much more can we afford to pay? And wasn't the original intent to rein in health care spending, to reduce the percentage of GDP going to health care?

Mr. President, how much time is left on this side?

The PRESIDING OFFICER. The Senator from Alabama has 6 minutes remaining.

Mr. SESSIONS. The business community as well as many others are expressing concern about the fact that this bill would not actually rein in health care spending. I thought the goal and I think most Americans thought the goal of the legislation was to figure ways to contain the growing cost of health care in America without reducing our quality and the magnificent care so many Americans receive. But it does not do that. In fact, the numbers show, independent accounts show that the percentage of our national wealth, our GDP, that will go to health care once this bill is passed—if it is—will be greater than if it is not passed. We should wrestle with those issues and do better.

What about another fiction? The President had promised—you have heard him—along with other leaders on this floor: This bill will not add one dime to the Nation's surging debt. But by any fair analysis, the bill increases both spending and debt.

First, I just have to say, when you pass 70 new government programs, ex-

pand Medicaid, and create millions of dollars in new subsidies, how can that not increase spending? But the bill is structured in a way so that its spending is covered by its new \$519 billion in taxes. Well, if you raise taxes enough, you can make anything come out to a balance. They call some of these taxes fees, but they are still taxes and increased cost in the system. They include a \$6 billion annual tax on the insurance industry as a whole. For the people we want to reduce premiums, we raise taxes on them \$6 billion. It includes a \$2.3 billion annual tax on the pharmaceutical industry. We would like to see less cost for drugs, not more. It includes taxes on medical device companies, \$28 billion on employers that do not provide enough coverage according to the new standards and a 40-percent tax on plans that provide too much coverage, and \$43 billion in total taxes raised through penalties on employers and individual mandates. All in all, you are taxed if you sell insurance, taxed if you buy it at the wrong level, and taxed if you do not buy it at all. Yet, contrary to promises, the bill does not lower individual family premiums, and for many, their out-of-pocket costs will increase. So this is not the kind of reform we were promised.

But one more thing. Always a part of health care reform was the acknowledged necessity to do something about the reductions in payments, reimbursements to doctors. This bill proposes cutting physicians' pay 21 percent. That is what it does—they ignore a \$250 billion cost, and act as though they can use that money for the bill's new programs. But doctors were promised from the beginning that their payment reimbursements would be fixed. They cannot sustain a 21-percent reduction in pay. Doctors will quit doing Medicare work all over the country if that occurs.

Mr. ENSIGN. Will the Senator yield?

Mr. SESSIONS. I will be glad to yield.

Mr. ENSIGN. So let me ask the Senator, from what I understand about the so-called doctors fix, there is around a \$250 billion cost to that. In this bill, there is no fix to that, from what I understand. Is that correct?

Mr. SESSIONS. That is correct.

Mr. ENSIGN. So the bill is either dishonest as far as the deficit is concerned because if you put the doctors fix in there, this thing actually hurts the deficit, or we are actually seriously hurting doctors because this bill will require a lot more doctors in the country to take care of those new people who will now have health insurance in the country. Is that correct?

Mr. SESSIONS. Exactly correct. What we are doing, I think you can say fairly—boil it down to this—we are raising taxes over \$500 billion, we are cutting Medicare nearly \$500 billion—

so, around \$1 trillion total. And we are using none of that money to fix the doctor payment deficit we know has to be fixed. Instead that money is going to new programs. We cannot cut the doctors 21 percent. Congress has filled that money in every year for nearly 10 years now, and we have to fill it in in the future. Any good health care reform would do what it promised to do from the beginning, which was to eliminate this cut.

One proposal has been to do it simply by adding, throwing it to the debt.

Mr. ENSIGN. Will the Senator yield further?

Mr. SESSIONS. I will be pleased to.

Mr. ENSIGN. So would the Senator describe this almost as a shell game?

Mr. SESSIONS. Absolutely.

Mr. ENSIGN. The doctors fix would be the pea. Where are they hiding the pea? Because we know this is going to be fixed. It is always fixed. Every year, we fix the doctors' pay. And yet, to hide the true costs of the bill, then, the doctors' fix is really the pea in that little shell game and they are just hiding it. Is that correct?

Mr. SESSIONS. Exactly. The President looked the American people in the eye and he said: This legislation will not add one dime to the national debt.

The PRESIDING OFFICER. This block of the minority's time has expired.

Mr. SESSIONS. Mr. President, if I could ask for 30 seconds to finish.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. How much time did he ask for, Mr. President?

The PRESIDING OFFICER. The Senator asked for 30 seconds.

Mr. HARKIN. No objection.

Mr. SESSIONS. So the President promised to end the doctors coming to Washington every year to try to make sure they don't get cut 21 percent, but he has not done it. This bill's promises simply do not add up. This bill, when you assume the doctor fix, clearly adds to the debt. It must be added as part of the reform. There are a number of reasons to oppose the legislation, and I urge my colleagues to do so.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. I understand now the Democratic side has 1 hour, from 6:30 to 7:30?

The PRESIDING OFFICER. The Senator from Iowa is correct.

Mr. HARKIN. Mr. President, I yield myself the time from 6:30 to 7.

Mr. President, I was in my office a little bit ago, and I was watching the comments made by the distinguished minority whip, the Senator from Arizona, Mr. KYL. He went on at some length about how this vote at 1 a.m. we are going to be taking is tough on some Members. He mentioned specifically our distinguished colleague, Senator

ROBERT BYRD, who is not up and about at those hours, and they would have to drag him out of bed and bring him down here for this vote. Senator KYL felt very sorry for Senator BYRD that we would do that at 1 a.m.

He said the majority leader has the power to put this vote back. We could do it at 9 a.m. in the morning. Well, he is absolutely right; we could do it at 9 a.m. in the morning. But because of the intransigence of the Republican side, because they are not willing to let us have these votes without expending the 30 hours under the rules—under the rules—the cloture motions have been filed and, of course, the Republicans, which is their right, can burn up 30 hours.

Well, after the first vote at 1 a.m., the clock starts ticking on the next 30 hours for the underlying substitute. And then after that 30 hours, there is the underlying bill itself, and that gets 30 hours. So if the Republicans really want, they can burn up 90 hours. I ask, to what end? To what end? We have the 60 votes. No one doubts that. There are 60 votes now to pass this bill. So to drag this out and to cause people to come in at 1 a.m. in the morning is not on the Democratic side, it is on the Republican side.

So when I heard the distinguished Senator from Arizona pleading to put the vote off, I thought to myself: Well, if that is what the Republicans would like to do, there is a simple way to do that. You simply move the vote we are going to have at 1 a.m. to 9 a.m. tomorrow morning, and then you have the intervening hours from 1 a.m. to 9 a.m. count toward the 30 hours for the next vote. It is simple, very simple.

So I took that to heart, and I asked our staff to type up a unanimous consent request, and we have given a copy to the other side. So that is what my unanimous consent will do. It will ask that the vote occur at 9 a.m. tomorrow morning, but that the intervening hours from 1 to 9 would count toward the 30 hours for the underlying substitute.

So, Mr. President, I ask unanimous consent that the cloture vote scheduled to occur at 1 a.m. Monday, December 21, occur at 9 a.m. Monday, December 21; and that if cloture is invoked, the postcloture time be considered to have begun at 1 a.m.

The PRESIDING OFFICER. Is there objection?

Mr. ENZI. Mr. President, reserving the right to object, we are not the party that spent 8 weeks putting this together to delay everything. We are not the party that spent all the time putting this amendment together that we are trying to do without any input from the Republicans. We are trying to have time to both review this and let America know what is happening. We know the Democrats have kept people from going home now for 3 weeks so

they wouldn't have to listen to the voters at home who are really upset with this bill.

So we would agree to the request to set the vote at 9 a.m. if the Senator will modify and strike the retroactive cloture time. We want the time.

Mr. HARKIN. My initial request stands, Mr. President.

The PRESIDING OFFICER. Is there objection?

Mr. ENZI. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. HARKIN. So, Mr. President, here we go again. There they go again. You know, they want to delay, delay, delay, delay; obfuscate, obfuscate, obfuscate, and try to kill this bill by delaying it ad infinitum. They would be happy to delay this through Christmas, through the New Year, and January and February. Why? They would be happy to delay this bill for 10 years or more because they don't want it to happen. That is really what is going on.

I say to my good friend from Wyoming—and he is my good friend; he is a great Senator—I thought—we did—in our committee, we got the bill through open and aboveboard. I think the reason we are here at this time is because we Democrats bent over backwards to accommodate the minority. We did in our committee, and I can say that Senator BAUCUS went the extra mile—no, he went the extra 10 miles. He went the extra 100 miles on the Finance Committee to involve and to get the minority side involved. In the end, only one Republican would vote for it, and we know who that was, the Senator from Maine.

We could have emulated the Republicans. We could have emulated what they did when they were in the majority in 2001. I was here. I remember it well. When they came up with this crazy tax package that cut taxes for the wealthiest in our country, stole the surplus we had built up under President Clinton by the year 2000 where we were looking at surpluses on into the future, and they came up with all of these big tax cuts for the wealthy, guess what they did. They didn't involve us at all. They did reconciliation where they only needed 51 votes. Under reconciliation, under the rules of the Senate, as the Presiding Officer knows, there is no filibuster. You cannot filibuster a reconciliation bill under the rules.

So if they had done their tax bill in 2001 like we are doing this, we could have delayed. We could have had some input into that, but they said no. They just went right to reconciliation. We could have done that with this bill. We could have done that with this bill.

I remember having discussions with members of our caucus and others saying: No, no. And the President, President Obama, wanted to do this as bipartisanly as possible to involve the

minority in a constructive process. So that is what we decided to do, to do it in a very constructive, open process. What it has gotten us is total—total—obfuscation and delay and trying to kill the bill by the minority. But we will persevere. We started this open process, and we are going to finish this open process. The die is cast.

We have a vote at 1 a.m. I wish it could be 9 a.m., but you just heard the Republicans object to that because I just asked that the intervening hours be counted toward the next 30 hours, and they wouldn't even do that. So the reason we are here is not because of the Democrats. We are here because the Republicans simply don't want this bill to pass.

That is really the reason.

So we are going to vote. We are going to vote at 1 a.m. On the face of it, it is really a technical, procedural vote, but it is something more than that. With that vote at 1 a.m. on the managers' package, on cloture on the managers' package, we will have reached a pivotal point at 1 a.m., a pivotal point in a decade-long quest to pass comprehensive health care reform. We have reached a crossroads, a kind of a point in time just as the Senate did in 1935 when we passed Social Security, or in 1965 when we passed the Medicare bill. Each of those bills was a giant step forward for the American people, but each was bitterly opposed in this body by defenders of the status quo, the Republicans.

In each case, Senate opponents waged a strident campaign of fear, warning that the passage of the legislation would lead to socialism. Senator Robert Taft from Ohio kept calling it socialism. We are going to "Sovietize" America. You can read it in our history books. But in the end, a critical mass of Senators rose to the historic occasion. Senators ignored the dark warnings and the demagoguery. They voted their hopes and not their fears. As we know now, in retrospect they passed laws that transformed America in profoundly positive ways.

The Senate has arrived at another one of those rare historic moments. This time, we are attempting to pass comprehensive health care reform, a goal that has alluded Congresses and Presidents going back to the administration of Roosevelt. People think I am talking about Franklin Roosevelt. No. I am talking about the administration of Theodore Roosevelt.

Once again, advocates of reform faced bitter opposition, including the filibuster we are seeing now and that has been going on for weeks by defenders of intense interests in the status quo. Once again, each Member of this body must make a choice: fear or hope; stick with the broken status quo or embrace bold change with all of its uncertainties.

The other side is saying what about this? What is going to happen here? I

keep talking about this bill we are passing. It is not like the Ten Commandments carved in stone. It is a bill. It is a law. Laws change as times and conditions change, as we get different information. So there are uncertainties in the future. The future is uncertain. But we can lay down a good start toward bringing people into a health insurance system and stopping some of the most horrible practices of the health insurance industry, moving us toward more of a health care system rather than a sick care system.

So, yes, there are uncertainties, but we know one thing: The certainty of the status quo leads to too many people not having any kind of health care whatsoever. It leads to people dying younger than they should because they don't go in for their checkups and their screenings, children and others.

We know the other side made clear sometime ago they wanted to obstruct and delay and filibuster and kill this bill. As far as my friends on the other side of the aisle are concerned, this floor debate is not about offering amendments to improve the bill. It is really not about allowing more time to fully read it and understand the bill. That is nonsense. It is not about playing a constructive role to pass a better bill. All the other side wants to do is kill this bill. Period.

All this yakking that is going on—I was home this afternoon and I turned on C-SPAN and I was listening to the debate. And I thought, you know, people are at home. They are getting ready for Christmas. The trees are up. People are feeling good. Here we are going back and forth, back and forth, back and forth, but people have tuned this out.

They really have. It is Christmastime and people have tuned this out. Yet we are here.

We are here for a good reason. We are here because we are determined to pass meaningful health care reform for America, and we need to do it before Christmas.

Well, again, in the defense of the broken system and the status quo, the Republicans joined at the hip with the health insurance companies. They use the same talking points, the same distortions, the same bogus, cooked-up studies, the same outrageous stories about death panels and pulling the plug on grandma. We have heard all that from the other side, week after week, month after month. Every step, as I said, we on this side have acted in good faith. We did not go the reconciliation route. In our futile quest for bipartisanship, we have repeatedly given the Republicans more time.

In the Senate HELP Committee, under the great leadership of Senator DODD, we spent nearly 3 weeks marking up the bill. No amendments were denied. Republicans could offer any amendment they wanted. It took 13

days, a total of 54 hours of meetings. We went out of our way to accommodate our Republican colleagues. We accepted 161 of their amendments, either by vote or just by accepting them. After all that time, all that goodwill on our side, accepting 161 of their amendments, every Republican on the committee voted against the bill.

Now, every time I have told this story in Iowa or wherever I have been, people shake their heads. They say: What? They offered 161 amendments? Surely, they would have been kind of happy with that. They might have voted for the bill. They don't understand that. Every single Republican voted against it after all of those amendments.

In the Finance Committee, deliberation on the bill stretched out for months solely to accommodate the wishes of the Republican members of the committee. Yet after all that time, despite the fact that Senator BAUCUS had bent over backwards to pursue bipartisanship and to accommodate the minority's requests—he acted in good faith at every step of the way—all but one Republican on the committee voted against the bill.

Now, today, Republican Senators say they are opposing the cloture motion because they need more time. They say we are rushing things, rushing things, there is a big rush going on. Good grief. This bill has been on the Senate floor for 21 days. We have been deliberating about health care reform for almost the entire year. Congresses and Presidents, as I have said, have been trying to get this done since Theodore Roosevelt.

So Republican colleagues say: Slow down. You are moving too fast. Well, that is absurd and disingenuous. We have to ask ourselves: Are our Republican friends going to be more constructive, more willing to act in good faith after the Christmas or New Year's break? Of course not. Their aim, understand, is not to improve the bill or to even understand it; it is to kill health care reform. Period. That is all it is. They just want to kill it.

Now, because they don't have enough votes to kill it outright, they have opted for a course of delay and obstruction and filibustering. But let's be clear. They are not only delaying and obstructing the Senate; they are delaying and obstructing the millions of Americans who desperately need the reforms in this bill. They are delaying and obstructing the 31 million Americans who will finally get health coverage. They are delaying and obstructing the underinsured, millions of Americans who know they are just one serious illness away from bankruptcy and financial catastrophe. They are delaying and obstructing millions of Americans with preexisting conditions who can't get insurance. They are delaying and obstructing women in this country

who face systematic discrimination by health insurance companies. They are delaying and obstructing Americans who fear if they get cancer or heart disease, their health insurance company will cancel their coverage.

Let's be clear. Again, Republicans are not only trying to kill health care reform, in doing so they are killing the hope for millions of Americans who are desperate for reform of the current broken system. Too many Americans are literally dying because they do not have health coverage and proper access to a doctor.

All told, nearly 45,000 Americans die each year because they lack meaningful health insurance. A Johns Hopkins study found that children without health insurance who are hospitalized are 60 percent more likely to die than those with insurance. Why? It is obvious. Kids without health insurance are much less likely to get preventive care or to be taken to a doctor in the early stages of their illness—60 percent more. Think about that. Children without health insurance who are hospitalized are 60 percent more likely to die than children who have health insurance. So that is the real cost of delay and obstruction on the floor of the Senate. This is our job. We are here. We are going to finish this job. But it is a tragic human cost. And these victims can be found in every one of our cities, our farms, our rural communities.

I refuse to allow any obstacle to stand in the way of the Senate addressing the needs of these Americans. I have, along with my friends on this side, opposed the Republicans' filibuster. Likewise, I have been willing to disappoint many whose views I respect by agreeing to painful compromises in order to keep this bill on track. I agreed to those compromises not because I lacked passion or fight—I think my colleagues who know me know well enough that I can fight—I did so because of the harsh but unavoidable reality that because of the Republicans' obstructionism, we need 60 votes to pass this bill, and the only path to securing 60 votes was by making necessary compromises. But I add, that is also the way our predecessors in this body were able to get the votes to pass Social Security and Medicare, both of which had big gaps in coverage when they were first enacted. What they did is they passed bills that were sort of a half a loaf. Then they came back for the remainder of the loaf in the following years.

Despite these compromises, make no mistake, this remains a profoundly progressive bill. One analyst put it this way:

This legislation will be the most important social policy achievement since the Great Society.

That is exactly why the rightwing in this country is pulling out the stops to kill it. This bill will usher in three

huge reforms. First, this bill will be the biggest expansion of health coverage since the creation of Medicare. Some 31 million Americans who do not have coverage now will get it, thanks to this bill. This is a monumental achievement. We do this by expanding Medicaid and by providing subsidies to low-income, modest-income families.

In addition, if you are a small business owner, this bill will offer tax credits of 35 percent of employer contributions toward premiums in order to make it more affordable for small businesses and their employees to have health insurance. That 35 percent will go up to 50 percent. But the 35 percent starts next year. That is why I have said many times in my State of Iowa, and around it, that actually the biggest winners under this bill, aside from the totally uninsured, are small businesses and the self-employed. Small businesses and the self-employed are the big winners in this bill.

What is more, our bill will end the discriminatory practice of jacking up premiums for businesses because an employee is older or has a preexisting condition. They will not be able to do that anymore.

Through these new health insurance exchanges, small businesses and people currently without access to affordable coverage will be able to shop and choose from a menu of quality health plans, much in the same way Members of Congress do.

This bill does much more than extend health coverage. The second great reform in this bill is an array of provisions cracking down on pervasive, outrageous abuses by the health insurance companies, abuses that currently leave most Americans just one serious illness away from financial catastrophe.

Right now, the health insurance industry in this country is extraordinarily profitable. But these profits come at a staggering human cost. Think about it. When Americans get a diagnosis, let's say, of cancer or some other grave illness, they fear two things: First, they fear the illness and, second, they fear the health insurance company. They wonder, is my company going to authorize treatment and pay the bills or will I have to go to war to prevent it from sticking me or rescinding my policy?

I always tell people: Look at your policy. Is there a rescission clause in there? I have had so many people say: What is a rescission clause? It is a little clause in there, probably in the fine print, and it says that when your policy is up for renewal, the insurance company can terminate you. They do not have to renew your policy. This is what happens. Someone gets a very serious long-term illness such as cancer or heart disease. When their policy is up for renewal, the insurance company says, no, they will not renew your policy. Now you are out in the cold with a

preexisting condition. Now you can't get insurance anywhere. This bill will end that practice.

Health insurance companies now employ whole armies of claim adjusters just to deny requests. In fact, the health insurance companies give bonuses—they reward people for denying claims, saying no to policyholders. In the State of California, the largest insurers deny one out of every five requests for medical claims, even when recommended by the patient's doctor. One large insurer, PacifiCare, denies medical claims nearly 40 percent of the time. Think about that. That is almost one out of two. CIGNA denies claims 33 percent of the time. So if you get a terrible illness and you are insured by PacifiCare, good luck in getting them to pay for your medical treatment.

Republican Senators give us all the scare talk about a government bureaucrat standing between you and your doctor. Right now, we have corporate bureaucrats standing between you and your doctor, and they earn good evaluations and bonuses and money for denying you coverage.

I can remember a town meeting I had in Mason City in August, one of those famous town meetings. Toward the end of it—it was OK. There was a lot of contention there, people voicing their concerns, as they ought to do, as they have a right to do. But at the end, there was a man sitting down in the front. I thought, this will be my last one. I called on him. He stood up and he said: You know, I have been a doctor here for over 40 years in Mason City—40 years.

He said: I can say honestly during those 40 years, I have never once had a government bureaucrat come between me and my patients on Medicare or Medicaid. He said: However, I can't tell you how many times during those 40 years I have had insurance bureaucrats come between me and my patients.

This is a doctor, practicing for 40 years, and never once did he have a government bureaucrat come between him and his patients.

Nearly 62 percent of bankruptcies in the United States are linked to medical bills. And here is the kicker: Nearly 80 percent of those are people who had health insurance.

When is the last time you ever heard of a health insurance executive claiming bankruptcy? I would like to find one someplace.

The American people have lived in fear and under the heavy hand of these health insurance companies long enough. But help is on the way.

Let me mention a few of the ways this bill immediately cracks down on abuses by the health insurance industry. First, if you are uninsured with a preexisting condition, the bill would give you access to affordable coverage without discrimination. Our bill immediately bans those rescissions I talked

about where the insurance company can rescind your policy. We stop that right away.

We prohibit insurers from imposing lifetime limits on benefits, and we impose and restrict the use of annual limits.

Our bill ends discrimination against women. As I said, currently they pay as much as 48 percent more for the same coverage a man has.

Our bill requires insurers right away, next year, to let children stay on their family's policy until they are age 26. Those are a few of the things.

But there is a third area in this bill I have championed for many years, and in many ways I think it may be the most profound part of the bill, and that is a whole array of provisions promoting wellness and prevention, turning America into a general wellness society.

To this end, at the clinical level, the bill requires reimbursement for proven, cost-effective preventive services such as cancer screenings, nutrition counseling, and smoking cessation programs. This means health professionals will be able to offer these services to you before you get diabetes or cancer or emphysema.

For essential screenings and annual physicals, there are no copays, no deductibles. We encourage people to do this so they will not have to pay a copay or deductible.

Our bill makes major new investments in community wellness and public health, and we help businesses both large and small create workplace wellness programs for their employees.

One thing I do not think has been mentioned before, our bill requires large chain restaurants to post basic nutritional information right on the menu so consumers, when they are going out to eat, can make healthy choices.

What we are trying to do is change the paradigm from our current sick care system to a true health care system—one that keeps people out of the hospital in the first place. Our aim is to recreate America as a wellness society focused on healthful lifestyles, good nutrition, physical activity, and preventing the chronic diseases that take such a toll.

As a proud progressive, I make no bones about my enthusiasm for the three great reforms in this bill—vastly expanding coverage, cracking down on the abuses by the health insurance companies, and making robust investments in wellness and disease prevention.

Today we are closer than we have ever been to making Senator Ted Kennedy's dream of universal health insurance a reality. This bill has many authors. We have all been involved in it. But in a very real sense, this is Senator Kennedy's bill.

I urge Senators, when the vote occurs at 1 a.m., to vote their hopes, not their

fears. Seize the moment. Let's move ahead. Let's vote for cloture. At long last, let's give every American access to the quality, affordable health care they need and they deserve.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Ms. STABENOW. Mr. President, before my friend from Iowa, the distinguished Chair of the HELP Committee, leaves the floor, I thank him for his wonderful leadership and friendship in so many capacities and passion for what we are doing now. We are all here together knowing that in the process of legislating, you don't always get every idea you want. But you come together and you work for something that is good for the American people, and that is what we have done. I thank him very much for all of his leadership.

I wish to take a few moments to talk about how we actually got to this point on a Sunday evening—we are voting at 1 o'clock in the morning—and, frankly, what has been happening all year. I want to take a few minutes to talk about what has happened this entire year, the first year of President Obama's presidency, our first year in the majority, and then to speak a little bit as well about the very important legislation that is in front of us.

I do think it is important that we take a moment to recognize and address a very unfortunate milestone, look back on the year on what we have accomplished in spite of that milestone.

In April, the media celebrated President Obama's first 100 days in office. But here in the Senate, we can measure our progress by something else—not 100 days, but 100 objections from the minority party. Actually, 101 as of yesterday; objections, filibusters, delays, stalling tactics designed to stop us from helping the American people who are hurting in these tough economic times. That is more true in my State than any other place in this country. Our people, the great people of Michigan, have been hurting longer, have been hurting much more deeply than other places in the country because of the major economic transition, as well as the recession in which we are involved.

There is good news because while the Republicans were stalling and wasting time, we were working hard doing what the people of America sent us to do. I want to talk about what we have done in spite of the stalling. But I also want to take a brief moment to explain something hard to explain about Senate rules because people look at us and say: They objected, but why does that matter? Why does that matter?

Mr. President, as you know, when there is an objection, in order to overcome it—and it is called a filibuster—it involves invoking motions called cloture and it takes time. It plain takes

time. So 101 times we have not been able to move forward because of an objection or we have had to go through this long process we are involved in right now.

I think it is important to briefly explain it because when Republicans object, as they are now, as they have been on so many occasions, our leader has to file what is called a cloture motion, and then you wait 2 days. You cannot do other business for those 2 days. We have done that over and over, wasting time while people in my State want us to be focused on jobs, on lowering their health care costs, on making sure we are doing the things that matter to them every day. But we stop and we wait 2 days. Then we vote on stopping the filibuster. Then we wait 30 hours, which is what we are doing right now. Then we vote on whether to proceed to the item. There are filibusters again. Then we file a cloture motion on the amendments or the bill. We wait 2 more days. Then we vote on closing a filibuster, and then we wait 30 hours, and then we vote on the amendment, which we will do tonight, and then we have to wait another 30 hours. In this case, another 30 hours.

It does matter when we say there have been 101 objections that have either stopped us or forced this process. It does matter. It matters because it has slowed down the ability to move to get things done.

The good news is that we have gotten things done anyway. We have gotten things done anyway because we are focused and committed to getting things done. We know the American people have waited too long. The last 8 years were about taking us in the wrong direction, with things that did not help most people, that put us in a huge deficit hole, that did not address health care or health care costs or jobs, or policies that made it worse.

We know that even though there have been 101 objections so far this year—and there will be more; there will be more—we are going to get things done for the American people.

It is amazing the stalling actually happened on the very first day of the 111th Congress on January 6 when Republicans objected to moving forward with an important public lands bill, something we had been trying to do for some time to protect and preserve our national parks, forests, and wilderness areas. But we passed that important bill anyway over their objections and three different filibusters, as the chart showed. Three different times we had to wait, wait 2 days, wait 30 hours, wait 2 days, wait 30 hours. But we passed it.

Since then, nearly every single week we have been in session, every single week but 4 out of 41 weeks, we have had to go through this process or have had objections. They have found something to object to or something to filibuster.

As I said, yesterday they objected for the 101st time, this time with a fili-

buster against providing affordable health insurance for over 30 million Americans. They have misused longstanding Senate rules and traditions to stall everything that might give this President and this Congress a victory.

I think it hurts all of us when the Senate breaks down as it has. Everybody is hurt by that—to stall everything that would help get Americans back to work or that would help 15.4 million Americans who are looking for work, and now to stop us, as I said, from extending health insurance coverage to over 30 million Americans. Their objections are about policy. They are about politics.

Earlier this year, objection 74, they stalled the unemployment bill, and their delaying tactics caused nearly 200,000 Americans to lose their unemployment benefits a couple of months before Christmas. They objected to the bill twice. They filibustered not once but three times before they voted unanimously. They voted unanimously for the bill. Why would you filibuster something three times and then vote for it unanimously? Not because you are concerned about the policy. The only explanation is that Republicans were trying to waste time—time that cost 200,000 Americans their unemployment benefits; the difference between paying the mortgage, keeping the heat on, putting food on the table, and possibly trying to keep health care going with a COBRA payment or in some other fashion.

Objection 4 was the Republican filibuster of the Lilly Ledbetter Fair Pay Act to make sure women get equal pay for equal work. Republicans filibustered and held up that bill, but we pushed forward. We passed it. We passed a very important equal pay for equal work bill in spite of it.

Objection 6 was to the American Recovery and Reinvestment Act which has been absolutely critical to creating jobs, keeping our economy out of a depression. They filibustered that bill three times as well. But we overcame the objections, passed the Recovery Act, and made critical investments in transportation, in our schools, in our police officers, and in clean energy technology and manufacturing.

And, yes, we are seeing the difference in Michigan right now. Mr. President, \$2 billion was part of the Recovery Act. I am pleased to say we have received a large part of that in Michigan to develop new battery technology manufacturing. We have at least six different firms that have announced and begun to develop manufacturing facilities for advanced battery development. Those manufacturing facilities are going to put thousands of people back to work. That was in the Recovery Act that was filibustered three times.

Objection 20 was to Senator Kennedy's Serve America Act, which we passed despite their filibuster, to help

young people give back to their country through voluntarism and community service.

Objection 24 was to the Fraud Enforcement Recovery Act which cracked down on predatory lending and abuses by banks and mortgage companies. That bill was held up for nearly a month. But we passed it, giving real relief to millions of American homeowners.

We passed the credit card bill, Republican objection 32.

We passed the Helping Families Save Their Homes Act, Republican objection 33.

We gave the FDA the authority, finally, to regulate tobacco to help keep kids from smoking. That was Republican objection 38.

We passed the Travel Promotion Act which will help stimulate the suffering tourism industry across the country. That was objection 45.

We passed a true funding bill to make sure our soldiers in Iraq and Afghanistan had the support they needed despite having to file cloture to stop a filibuster—objection 47.

We passed the Defense authorization bill that included a pay raise for our troops and other help for our military and their families despite repeated filibusters and objections. And these were objections 54, 56, 57, and 58. Can you imagine? This was a Defense bill.

We passed the veterans health care bill, despite Republican stalling, to help caregivers of disabled veterans, women veterans, rural health improvements for veterans, mental health care for veterans, and support for homeless veterans. This was Republican objection 89.

Objection 98 was another filibuster against those pay raises for our troops just 9 days before Christmas.

Despite all of those objections, 101, we have been doing what we were sent here to do. We have focused on actions to help create jobs and strengthen our economy and focus on the things that families struggle with and care about every day to make people's lives better, not just a few, not just investment bankers on Wall Street, not just the wealthy folks who got the tax cuts in the last 8 years, but middle-class families every day who are trying to figure out: What about them? What about us? That is what we have been focused on.

We passed an extension of the Children's Health Insurance Program to provide health and dental care to nearly 10 million children. We passed legislation to reform government contracting and protect taxpayer dollars. We passed legislation to invest in health care, energy, and education. We passed the cash for clunkers bill, as you know, that I was proud to lead in the Senate that moved over 650,000 fuel-efficient cars off dealer lots and brought thousands of laid-off manufacturing workers back to work.

We passed legislation to support the growth of small businesses and to extend the first-time home buyers tax credit. And now, just a few days before Christmas, we are working to pass this critical, historic health insurance reform legislation. We are committed to getting it done.

Republican colleagues can object 100 times or 1,000 times, but we are not wavering in our commitment to do the right thing. Even though inaccuracies abound, even though misinformation has been said over and over about what this bill would do, we are committed to overcoming what has been the tidal wave of opposition from the special interests who control the status quo, who like it the way it is right now. We are determined to get beyond that and do the right thing for American families. Whether our Republican colleagues work with us or not—and we sincerely hope they do, and we have spent a tremendous amount of time this year reaching out to get bipartisan support—whether they stall or object, our job is to do everything we can to move America forward, and that will continue to be our focus.

As the distinguished Presiding Officer knows because we both sit on the Finance Committee, we have spent months reaching out with committees, with processes to get bipartisan support. But, as my dad used to say, it takes two to tango. It takes both sides to want to work together. Unfortunately, it appears the strategy that was put in place back at the beginning of the year, the very first day of session, with the very first filibuster, was just to stop us from being able to move America forward, to stop this great new President, to stop the majority in the Congress. But we have moved forward despite that.

I think often of what we could do if we hadn't had to deal with 101 filibusters, what we could have done in creating a clean energy bill, which would create more jobs in my great State, or dealing with other critical issues we need to deal with and we will deal with. As we slog through filibuster after filibuster in the coming year, we will do that. But now we have the opportunity in front of us to pass historic health insurance reform that, frankly, people have talked about for 100 years.

This legislation is not perfect, but nothing ever is when you start. It is a great framework, however, for putting in place the value, the principle that every American should be able to have affordable health insurance and that we are going to tackle the explosion of costs that have hit businesses large and small, that have hit taxpayers, and to bring those costs down over time. That is what we are involved in right now, and we are going to get it done.

We could have voted much earlier, rather than keeping our staff here until 1 a.m., and we will vote again

after we run the next 30 hours, which will be, I believe, Tuesday morning. We could vote and be done with the final passage at that point. We know where the votes are. We have the votes to pass this. But it appears we will be here until Christmas Eve. Mr. President, I do not mind for myself. I, of course, want to be home with my family, as I know you do. But I think about my brother, who drives for UPS, and I know he will be working on Christmas Eve, as a lot of Americans will be working on Christmas Eve. And if we need to be here until Christmas Eve to do something that will positively affect every American, I am willing to do that. I am willing to do that if that is what we need to do.

Let me take a moment to talk about the bill in front of us. The bill in front of us literally saves lives, saves money, and saves Medicare, and I am very proud that in the managers' amendment, the amendment we will be voting on at 1 a.m. today, we have made it even better.

I am very pleased to have helped to lead a section related to small business tax cuts. Along with our chair of the Small Business Committee, Senator LANDRIEU, and another strong advocate, Senator LINCOLN, we have been working on provisions that will make sure there are small business tax cuts that start immediately—next year—after the bill passes, \$40 billion in tax cuts in total to help small businesses afford health insurance for themselves and their workers.

In our amendment, we also provide even tougher insurance reforms.

In the underlying bill, we lay out a whole health care bill of rights. I remember coming here in the year 2000, and the Patients' Bill of Rights was the major thing we were trying to get done. We were in the minority, the Democratic minority, but we were working hard to do that. It was my first opportunity to work with Senator Kennedy. We believed strongly that we needed to take insurance company bureaucrats out of the middle—from between doctors and patients. That is in this bill. Those kinds of reforms are in this bill and only one of many things that are in this bill.

We have toughened it up so that if insurance companies, between now and when the new group insurance pool takes effect, are raising their rates too high, spending too much on profit and administration, then taxpayers, ratepayers, will get a refund. And we hope that will put pressure on them not to continue to raise rates or try to do what the credit card companies have done before the bill takes effect—raise their rates. So we have put new protections in and other protections as well to make sure that the majority—the vast majority—of every dollar a family puts into premiums actually goes for their medical care rather than for profits and administration.

In total, we have \$430 billion in tax cuts to create affordability for families and for individuals, to help them afford health insurance. With that, overall, this is a tax reduction—this bill is—for the American people, and it is a reduction for taxpayers because it lowers the deficit in the first 10 years and on into the future.

I am going to take just a moment to give a sense of what is in the bill as it relates to new coverage and the benefits.

We know the majority of us have health insurance already. In Michigan, it is about 60 percent of the people, and in other places it is 50 or 55 percent. But we have what is called an employer-based health insurance system. So we have started from the basis that people should be able to keep what they have, and we have built on that. The majority of people have either employer-based insurance or they have Medicare or Medicaid or veterans services or other public services. So we started from the basis that we want to make current health insurance more secure, more stable. The insurance reforms we are putting in place for those plans that take effect—or new plans after this takes effect—will include the elimination of preexisting conditions, the elimination of what is called rescissions—the ability to drop someone if they have gotten sick—and the elimination of discrimination.

One of the things I was surprised to learn about, in terms of how extensive it is, as we went through this process is that women are paying, on average, 50 percent more than men for the same coverage in the individual insurance market or maybe even less coverage. Because a woman is in her childbearing years or perhaps has been pregnant and may be viewed as having a preexisting condition, some women might not be able to find health insurance.

So those who have insurance today, as they attempt to get new plans, will be able to take advantage of all of the insurance protections—our health care insurance bill of rights—in the bill. And this is very important.

Also, people with insurance today will actually, over time—and it will take some time for this to happen—but as others who do not have insurance now are able to afford health insurance and become able to get health care, there will be fewer people using emergency rooms. There will be fewer people needing other kinds of services that actually end up coming back, in terms of cost, to all of us who have insurance today because when someone walks into the emergency room sicker than they otherwise would be if they had seen a doctor, they get treated, as they should, but then the hospital has to make up the cost, so they put it on people who have insurance today. That is estimated to be about \$1,100 in hidden costs for individuals. So we are

going to see those kinds of costs come down and other changes and efficiencies and quality that will help people with insurance today. So coupled with the insurance reforms, we will see more stability and more quality for people who have insurance today.

The major area of new coverage is in what is called the insurance exchange. For the 15 to 20 percent of the people who can't find affordable insurance today—and most of them, as our Presiding Officer knows, are small businesses or people who are self-employed or people who have lost their jobs and then lose their insurance—we set up a new group pool, which is a way for people to use the same leverage a big business does or the Federal Government does, just as the insurance policy for Members of Congress uses a pool. Then everyone can choose the insurance coverage they want within that pool and get a better deal. That is what we are setting up in the insurance exchange, with helpful tax cuts for families and for businesses and individuals to help them afford health insurance.

We are also giving a choice to States. For lower income working people, a State may choose to provide a basic health insurance plan rather than people getting a tax cut to go into the exchange. They can set up their own basic health insurance plan and bring down costs as well through the State.

For young workers—and this is one of the things I wish had been around a couple of years ago—we will be allowing parents who have their children on their insurance policies—after the effective date of the act, they will be able to keep their children on their insurance policies until the age of 26. That will give young people a chance to get a start in that first job knowing they have insurance until they are 26. And there are a number of other provisions in the bill for young people as well.

We are making Medicaid a true safety net for low-income people up to 133 percent of poverty. We are truly going to be able to say: If you lose your job, you won't have to lose your insurance. What an important thing to be able to say in terms of taking away that fear of losing your job and having nowhere to turn.

Improving Medicare. We are going to stop what have been overpayments to for-profit insurance companies and put that money back into closing the gap in prescription drug coverage under Medicare. It has been called the doughnut hole. We are going to close that. We are going to provide preventive care for seniors without out-of-pocket costs and lengthen the Medicare trust fund so that it is stronger for a longer period of time.

I am very proud to have worked with Senator KERRY to develop a way to provide support and help for companies that pay for the health insurance of

early retirees, to lower their costs so that, in fact, we will be able to help those who have retired, voluntarily or involuntarily, so they will have the insurance they need until they can qualify for Medicare.

Let me close by saying this legislation is very much about saving lives. Forty-five thousand people lose their lives every year because they can't find health insurance they can afford. That is 45,000 families who will have one less person at the dinner table over the holidays because of lack of health insurance. Surely we can do better than that in our great country.

We will be saving money for small businesses, for families, for taxpayers, and bringing down the deficit—beginning to turn those costs downward rather than keeping them going upward in such an uncontrollable way.

Saving Medicare. We will be making sure Medicare is stronger out into the future and that our seniors have more help paying for their prescription drugs and preventative services as well.

When you get through all of it, we know it is hard to change the status quo because those who benefit from the current system don't want it changed.

The PRESIDING OFFICER (Mr. WYDEN). The Senator's time has expired.

Ms. STABENOW. But we do.

I thank the Presiding Officer.

The PRESIDING OFFICER. The Democratic block of time has expired. The Senator from Utah, Mr. HATCH, is recognized.

Mr. HATCH. Mr. President, after weeks of closed-door clandestine negotiations, Senator REID finally emerged with a 383 page manager's amendment yesterday to the 2,074 page, \$2.5 trillion tax-and-spend Washington takeover of our health care system.

Despite all the promises of ushering a new era of accountability and transparency in Washington by the President and the Democratic Party, the Reid amendment represents everything that Americans hate about Washington right now Chicago-style backroom buy-offs at the expense of American taxpayers.

At yesterday's press conference, when Democrats were asked about the Nebraska earmark for Medicaid funding, the majority leader simply replied, "A number of States are treated differently than other States. That's what legislation is all about. That's compromise."

So in addition to the Medicare Advantage deal to grandfather only Florida's seniors and the \$300 million giveaway known as the Louisiana Purchase, we now know what the Democrats' version of compromise really looks like. In the Reid amendment, released yesterday, Vermont gets a 2.2-percent increase for 6 years in its Medicaid Federal match rate while Massachusetts gets a 0.5 percent increase for

3 years for its entire program. But the deal for the State of Nebraska takes the cake. Now we all know that any one Congress can't bind future Congresses but somehow Nebraska will receive a special carve out that would have the Federal Government pay for every dollar of its Medicaid expansion. The total cost of these Medicaid special deals—\$1.2 billion.

So the next logical question is pretty straightforward—who will pay for these special deals? Well, the answer is simple. Every other State in the Union, including Utah, which are collectively facing \$200 billion in deficits and are cutting jobs and education services to survive; our States will now pay to support these special deals for Nebraska, Massachusetts and Vermont.

According to the Congressional Budget Office, the Medicaid expansion in the Reid bill creates a \$26 billion unfunded mandate on our cash-strapped States. Coincidentally, only one State avoids this unfunded mandate—Nebraska.

Let me now focus my attention on over a \$½ trillion worth of new taxes, fees, and penalties on individuals, families, and businesses imposed by the Reid bill. The new fees begin in 2010, while the major coverage provisions do not start until 2014. Almost \$57 billion in new taxes are collected before any American sees the major benefits of this bill, which are largely delayed until 2014. It is no wonder why this budget gimmickry creates an illusion of this bill reducing our national deficit.

Based on data from the Joint Committee on Taxation—the nonpartisan congressional scorekeeper—this bill would break President Obama's campaign promise by increasing taxes on 42 million individuals and families making less than \$250,000 a year. This is even after taking into account the government subsidies provided to low- and certain middle-income individuals and families.

The Reid bill not only increases payroll taxes by nearly \$87 billion but also imposes \$28 billion in new taxes on employers who do not provide government approved health plans. These new taxes will ultimately be paid by American workers in the form of reduced wages and lost jobs.

According to a recent study of similar proposals by the Heritage Foundation, these new job killing taxes will place approximately 5.2 million low income workers at risk of losing their jobs or having their hours reduced and an additional 10.2 million workers could see lower wages and reduced benefits.

So with nearly \$½ trillion in Medicare cuts and more than \$½ trillion in new taxes, does the Reid bill actually do anything to control our Nation's skyrocketing health care costs? The answer, according to the Congressional

Budget Office, is no. In fact, it will actually increase our national health care spending. I quote: "Under the legislation, Federal outlays for health care would increase during the 2010–2019 period, as would the Federal budgetary commitment to health care. The net increase would be about \$200 billion over that 10-year period." So what is the bottom-line? More taxes, more spending and bigger government.

Let me take a moment to talk about the so-called abortion compromise in this bill. The language to prevent taxpayer dollars from being used to fund elective abortions in the Reid amendment is completely unacceptable. The new abortion provisions are significantly weaker than the amendment I introduced with Senator BEN NELSON to ensure that the Hyde amendment, which prohibits Federal dollars from paying for elective abortions, also applies to any new Federal health programs created by Congress. The Hyde amendment has been public law since 1976.

The Nelson-Hatch-Casey amendment, which is almost identical to the Stupak amendment that was included in the House-passed health reform bill in early November by a vote of 240 to 194; it is important to note that 64 of those Congressmen voting for the amendment were Democrats. Let me repeat that—the Stupak amendment was supported by 64 House Democrats. And, despite that vote and the support of seven Senate Democrats, the majority decided not to include this language in the Reid bill or the Reid managers' amendment. I find that absolutely outrageous.

Moreover, the Reid conscience protections are much weaker than those included in the House passed health reform bill. The House bill included the Hyde-Weldon conscience protections that have been included in the HHS appropriations bills since 2004; the Reid health reform legislation does not. The Hyde-Weldon language ensures that strong conscience protections are in place for medical providers who oppose abortion. These strong protections, which are currently Federal law, should also apply to the new programs created through the Reid managers' package.

The so-called abortion compromise does not stop there. The Reid amendment also creates a state opt-out charade. As noted by Cardinal Daniel DiNardo, the Archbishop of Galveston-Houston and the Chairman of the U.S. Catholic Conference of Bishops' Committee on Pro-Life Activities, allowing "individuals to 'opt-out' of abortion coverage actually underscores how radically the underlying Senate bill would change abortion policy. Excluding elective abortions from overall health plans is not a privilege that individuals should have to seek as the exception to the norm. In all other fed-

eral health programs, excluding abortion is the norm. And numerous opinion polls should that the great majority of Americans do not want abortion coverage."

Additionally, this provision does nothing to prevent one State's tax dollars from being used to fund abortions in other States. In other words, tax dollars from Nebraska or Utah could be paying for abortions in California or New York.

The Reid amendment also creates a new public option that will be run by the Office of Personnel Management, OPM, which, for the first time, creates a federally funded and managed plan that will cover elective abortions. Should this legislation be signed into law, the Federal Government will be funding elective abortions for the first time in over 30 years, against the will of the vast majority of Americans. For these reasons, I believe that the Senate health reform legislation is far inferior to the House passed bill when it comes to protecting the sanctity of life. It should come as no surprise to anyone that pro-life organizations from the U.S. Conference of Catholic Bishops to the National Right to Life Committee and the Family Research Council have expressed their strong opposition to this so-called compromise.

Finally, let me take a moment to talk about the individual mandate tax which has almost doubled from \$8 billion to \$15 billion in the Reid amendment. I have long argued that forcing Americans to either buy a Washington-defined level of coverage or face a tax penalty collected through the Internal Revenue Service is unconstitutional. The Constitution empowers Congress to do many things for the American people. Just as important, however, is that the Constitution also sets limits on our power. We cannot take advantage of the power without recognizing the limits.

We hear a lot about how Senators on this side of the aisle are supposedly defending the big, evil insurance companies while those on the other side of the aisle are the defenders of American families. This insurance mandate exposes such partisan hypocrisy. Let me ask one simple question: who would benefit the most from this unprecedented mandate to purchase insurance or face a penalty enforced by our friends at the Internal Revenue Service?

The answer is simple. There are two clear winners under this draconian policy and neither is the American family. The first winner is the Federal Government, which could easily use this authority to increase the penalty, or impose similar ones, to create new streams of revenue to fund more out of control spending. Second, the insurance companies are the most direct winners under this insurance mandate because it would force millions of

Americans who would not otherwise do so to become their customers. If you do not believe me, then just look at the stock prices of the insurance companies that have recently shot to their 52-week highs.

Right now, States are responsible for determining policies that best meet the particular demographic needs and challenges of their own residents. Massachusetts, for example, has decided to implement a health insurance mandate while Utah has decided not to do so. This bill would eliminate this State flexibility so that the Federal Government may impose yet another one-size-fits-all mandate on all 50 States and on every American. I cannot think of anything more at odds with the system of federalism that America's founders established—a system designed to limit government and protect liberty.

As I have said all year long, ensuring access to affordable and quality care for Americans is not a Republican or Democrat issue—it is an American issue. Unfortunately, the majority's arrogance of power has forced us down a path where ideology has trumped policy and big government has trumped American families.

Town hall after town hall and poll after poll tell us that Americans want us to step back, start over and reform our healthcare system in a step-by-step, fiscally responsible manner. This is a moment for courage and leadership. All we need is one Democrat to listen to a growing chorus of concerns from Americans across this great nation and stand up against this bill. I am going to do everything possible to make sure that the voice of Utahns and Americans everywhere is heard loud and clear in this Senate Chamber.

A vote to move this bill forward will be one of the most important votes this body has ever taken—a vote that is bigger than our parties or our ideologies; a vote that will fundamentally change the American landscape for generations to come and restructure one-sixth of our economy; a vote that will determine if we will give our future generations the same opportunities and the same sense of pride that has been our privilege. Make no mistake, our actions on this vote will not be without consequences. History and our future generations will judge us on this vote.

Despite the harsh realities of skyrocketing deficits and an exploding national debt, the majority's insatiable appetite to spend has not changed. Last weekend was a perfect example. At a time when we are already debating a \$2.5 trillion tax-and-spend Washington takeover of our health care system, the majority jammed through a \$1.1 trillion appropriations bill with a 12-percent year-over-year increase in Federal spending. But this is only the tip of the iceberg. There is already talk of raising our Nation's debt limit by al-

most \$2 trillion to accommodate Washington's out of control spending habits.

Enough is enough. It is time to stand up and do what is right and there is no better time to do it than to vote against moving forward on this health care bill. The time for courage is now.

The historic blizzard in Washington yesterday was a perfect symbol of anger and frustration brewing in the hearts of the American people against this bill. I urge the majority once again to listen to the voices of the American people. My Republican colleagues and I are united with the American people in our fight against this \$2.5 trillion tax-and-spend bill. There is still time to step back and start over.

One last thing. When you have one-sixth of the American economy involved, it deserves a bipartisan vote. To be honest, almost every major reform we have ever passed—in fact, every one I can think of—had a huge bipartisan vote. In this particular case, I don't know of one Republican who is going to vote for this. If you can't get 75 to 80 votes on something this important, this much of a reform, then we should start over and do it the right way.

I yield the floor.

The PRESIDING OFFICER. The Senator from Utah.

Mr. BENNETT. Mr. President, I have been interested in the conversation that has gone on this afternoon and this evening. I have heard, once again, the statement made on the floor about the number of people who die every year because they don't have insurance and how that is an absolutely essential reason why we have to pass this bill and indeed pass it now; we have to pass it before Christmas; we have to pass it immediately because there are tens of thousands of people who are dying because they don't have insurance; we have to pass this bill so it will provide insurance for them in January of 2014; we have to pass this bill because people are dying right now, but we are not going to have any of the things that will take care of them available for 4 years. So we can't take an extra week—we can't take an extra 10 days—because people are dying. But we can take an extra 4 years before we give them anything. I have had a very hard time understanding that logic. The mathematics do not add up for me. Delaying everything for 4 years—why?

We know why. The reason they are delaying the implementation of this bill for 4 years has nothing whatever to do with people's health or the fact that some people are dying. The reason the implementation date of this bill is delayed 4 years is entirely due to the computers in the Congressional Budget Office which say, if you started this program immediately, it would bankrupt the United States. It would blow the budget right out of the water. How

do we make it look as if this bill is budget neutral? The way we make it look as if the bill is budget neutral is tell the computers—which cannot think, they can only add—we will start the revenue in this bill, the taxes in this bill, the increased premiums in this bill right away. But we don't start spending on any of the things we are giving the people to save their lives for 4 years. So the computers will say: All right, you will accumulate revenue for 4 years and that will be a big pot of money. Then, in the remaining 6 years of the 10-year term, which is all the computers are allowed to look at, you will have enough money over a 10-year period to pay for 6 years' worth of benefits. I will grant that. Actually, it isn't 6 years' worth of benefits because the money coming in will not be enough. So in order to make it look even better, they will project. The computers—which don't think, just add—say: Yes, this is right. We will project taking roughly $\frac{1}{2}$ trillion out of Medicare and putting it into the same pot of money that is coming in, in the 4-year period, when nothing is going out.

But wait a minute. If we have 4 years of money coming in and nothing going out and we take $\frac{1}{2}$ trillion out of Medicare and put it in the same pot of money, the unthinking computers can add that very well. They can come up and say: You know, this is going to be revenue neutral. Anybody who thinks this is going to be revenue neutral does not understand reality, certainly does not understand history.

Let's look at the CBO record of projecting health care costs. I remember when the Congress passed Medicare. There were very firm costs associated with Medicare. It was going to cost so much. We look back on Medicare, it has cost 20 times what was projected. In the first year, it cost more than was projected. This is in constant dollars, not in inflation-adjusted dollars. In constant dollars, Medicare costs 20 times what we were told. I remember during the debate in 1994, Joe Califano, the father of Medicare, the member of the White House staff who wrote the bill, wrote an op-ed piece in the Washington Post. He said: Congress, pay attention to our experience with Medicare. He said: We put Medicare together, but we got the cost projections. We put the whole thing together. We knew within months after it had passed we were wrong. We knew within months the costs were going to go way out of sight. We went to the Congress and told them and at that point it was too late. This thing had taken root. It had its followers. It had people who were solidly behind it. It was too late to fix it. It has ended up costing us 20 times.

Let's look ahead and see what we are doing if we pass this bill. No. 1, we are doing nothing for people who need coverage for 4 years. But we are locking

into the Federal budget situation a brandnew entitlement. That is a word we use in Washington. Many of my constituents don't understand what it means. Let me do my very best to try to help people understand. First, as the word implies, the people who are receiving the money under an entitlement are entitled to it, whether we have the money to give it to them or not. They are entitled to it whether they need it or not. They are entitled to it whether it makes any sense for them to get it or not. It is an entitlement that they will receive this money.

When Medicare was passed, the only entitlement we had was Social Security. Now we have Social Security, Medicare, and Medicaid. Along with the other entitlements built into the Federal budget, how much of the Federal budget goes out in entitlements? If we look at the budget for 2010, here is the cautionary lesson. The budget in 2010 on which we voted—I didn't vote for it—listed the projections out of the Congressional Budget Office as to how much revenue the Federal Government was going to have in 2010. The answer was \$2.2 trillion. That is a lot of money. Then it said, next line, entitlement spending or mandatory spending, \$2.2 trillion, which meant that in 2010, with the economy on its back and the revenue coming down as a result, every single dime we received out of the economy in 2010 was already committed.

So people would say: Senator, why don't you balance the budget? I would say: How am I going to balance the budget? How am I going to balance the budget with every dime that is coming in already committed and going out as an entitlement and outside the appropriations process?

Vote against an earmark.

Pardon me. The entire government, all the Embassies overseas, the Defense Department, Transportation, Education, national parks, name it, whatever it is, every dime to keep the government going had to be borrowed, not because we didn't have any revenue. We had \$2.2 trillion worth of revenue which, by itself, would have covered the cost of keeping the government open. But we couldn't touch a single dime of that \$2.2 trillion because all of it was tied up with entitlements. So what are we doing in the face of that experience? We are creating a new entitlement to add to those we already have.

The realities of Federal budgeting are these, and they are not unlike the realities of running a business. I have run a business. I understand how the very best projections, the very best forecasts can go awry. You have a new product. You think it is going to do well and you forecast X millions of dollars in revenue from this new product. You look at what the product is going

to cost you and you forecast that cost and you put the two together and you say: All right, we will have X in revenue and we will have Y in costs. As a result, we are going to have Z in profit. So you go out and you build the product. You commit for the raw materials. You pay the people in your factory to produce it, and you put it on the shelves. Now you are at the mercy of the customer, because if the customer decides he doesn't like the product, your projections of the amount of revenue will not save you from the enormous loss that will come.

Yes, you are right on the Y you are spending, but you were wrong on the X you thought you would get in. Instead of having the Z you planned to have as profit, you have a huge loss on your hands. Conversely, I have this happen, too. I have done my forecasting. I have laid down the plan for how much of the product we are going to produce. I have done my forecasting of how many will sell, and the product went crazy. It jumped off the shelves. All of a sudden, I was stuck with empty shelves and had to scramble to produce more and more and more in order to meet demand.

In the Federal Government, we don't have a product but we have expenses, just the same as doing a manufacturing operation. We don't have sales, but we have taxes. Our taxes are dependent upon the viability of the economy. The one fundamental lesson we all should learn is this: We can accurately predict the expenditures that are going out, just like in the business I could predict what it would cost me to produce the product, but we cannot accurately predict the revenue that will come in, just like I can't accurately be sure what the sales will be. We did a spending pattern based on revenue when the economy was strong. Suddenly, the economy turned weak and the revenue dropped off to \$2.2 trillion. We were stuck.

Does this make any sense in the face of that reality? We can determine the spending, but we can't determine the revenue. Does it make any sense in the face of that reality to spend in increased spending in the form of another entitlement in the hope that the revenue will be there? The only way the majority leader is able to make this bill look as if the revenue will be there is with a series of budget gimmicks the likes of which I have never seen, some of which I have already discussed.

The first budget gimmick is to say the revenue will be there because we will have 10 years of it and only 6 years of expenditure. The revenue will be there because we will be able to find \$½ trillion worth of waste, fraud, and abuse in Medicare. I will stipulate there is probably \$½ trillion worth of waste, fraud, and abuse in Medicare over the period of time we are discussing in this bill. We have been looking for it for more than 10 years and

have been unable to find it. This bill, instead of trying to take a scalpel to Medicare and cut out the areas of waste, fraud, and abuse, uses a sledgehammer to smash Medicare and say we are going to knock \$½ trillion out of it and hope that in the process of doing so, we will hit the waste, fraud, and abuse without hitting anything else.

We have 4 years on the timetable laid down by the majority in which to get this right. The majority has decided that if, indeed, people are dying because they don't have health care, they can continue to die because they don't have health care for 4 more years. I think in the face of the smoke and mirrors we are seeing with respect to this budget, we can afford, during that 4-year period, at the front end of that 4-year period, to take a few more weeks to do this right. That is why I am here and that is why my Republican colleagues are here, not because we don't say there is a problem, not because we don't have any ideas as to how to deal with the problem, not because we don't want to join hands with our friends across the aisle to solve the problem but because we know this bill is the wrong solution. Our constituents are pleading with us. They know this bill is the wrong solution. Every poll shows that. They are pleading with us: Don't let it happen. Don't let it happen. No matter what you have to do, don't let it happen.

It may well be that all our efforts are in vain. It may be we are washed aside in a tide of 60 votes. But we will not be washed aside by complacency or the desire to get along because the stakes are too high.

I conclude with this one last analogy. There was another very large organization that handed out a large series of entitlements to people with whom it was connected. These entitlements were not directly involved with the business of that organization, but they got bigger and bigger and bigger, and, ultimately, this organization suddenly discovered it could not function because of the financial drain of the entitlements it faced. The organization is now owned by the Federal Government. It is called General Motors. They discovered they could no longer be a car company because they were buried by the kind of entitlements they had built into their own situation.

Let us take a lesson from General Motors. We do not want the Federal Government to go bankrupt the way that company did. If we do, there is no other organization to bail us out the way the U.S. Government ultimately felt forced to bail out General Motors. It is a cautionary tale we all need to heed.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. VITTER. Thank you, Mr. President.

I, too, rise to voice my very strong concerns about this latest version of

so-called comprehensive health care reform. I will speak of my strong concerns starting with the process we are in the midst of because I am still digesting the particulars of this latest megabill.

As you know, it was divulged yesterday, a 383-page amendment to the underlying bill. The amendment references another bill which is 286 pages. The underlying bill is 2,074 pages. It makes for the seventh—count them—the seventh version of so-called comprehensive health care reform, Obamacare for short, in a few weeks. That grand total would be 2,733 pages. So, certainly, I am still digesting this latest version. My staff is helping me, but I wish to rise to begin to express my concerns.

The first concern is what I just referenced, this process we are in the midst of. When I went around Louisiana and when I continue to go around Louisiana—have townhall meetings—of course, health care comes up first and often. The themes I hear over and over are: This is too important to rush. This is too important to have some arbitrary deadline, whether it was last summer or Christmas. We need to get it right, not have arbitrary deadlines, and we need to know what we are voting for or against. That is what I hear about the right process to use over and over and over.

Well, unfortunately, clearly, this process we are in the midst of does not honor those wishes of Louisiana citizens, of American citizens. Before this latest megahealth care bill was unveiled yesterday, everyone it seems—including Members of the majority party who, at least, were involved in the negotiations, unlike Republicans—was in the dark.

Let me mention a few statements Democratic Senators made over the last week or so before yesterday's unveiling.

Senator DURBIN, in the leadership, said:

I would say to the Senator from Arizona, that I'm in the dark almost as much as he is. And I'm in the leadership.

Senator SCHUMER of New York, also in the leadership:

I can't say what there is, because we're not allowed to talk about what's submitted to CBO.

Senator BAYH of Indiana:

We're all being urged to vote for something and we don't know the details of what's in it.

Senator BILL NELSON of Florida:

I don't know what the deal is.

My colleague, Senator LANDRIEU, of Louisiana:

There's no specific compromise. There were discussions. . . . Until the package that was sent is scored, we really don't even know what's in it.

Senator CASEY of Pennsylvania:

Any big agreement is progress . . . even if we do not know any of the details.

Senator FEINSTEIN of California referred to a meeting on the majority side recently:

There was no explanation. It was sort of go team, go.

Senator BEN NELSON of Nebraska, talking about a similar majority meeting:

General concepts, but nothing very specific at all.

Then, at least yesterday, this new megabill—this 383-page amendment, referencing another 286-page bill, attached to an underlying 2,074-page bill—was unveiled. That finally happened yesterday morning.

Well, that is some progress. But I am afraid it is not progress enough. It is not time enough, considering we are set to vote on this new megabill in just a few hours, starting at 1 a.m. tomorrow morning.

Listening to American citizens all over the country, several Senators, including myself, have advocated we need at least 72 hours of final bill text on the Internet before we take any votes about this sort of major legislation. We need at least 72 hours of the official Congressional Budget Office cost estimate being on the Internet before we start any of those votes. I have certainly advocated that. Many of my colleagues on the Republican side have advocated that, listening, responding to American citizens who say: No arbitrary deadlines. Know what you are voting on. Get it right.

Perhaps even more importantly than my advocating it or other Republicans advocating it, at least eight Democrats have specifically demanded the same thing. In fact, on October 6 of this year, eight Democrats wrote a very clear, strongly worded letter to the majority leader, Senator REID, and they demanded exactly the same thing: 72 hours of final legislative language on the Internet before any vote on the matter, a full Congressional Budget Office cost estimate on the Internet for at least 72 hours before any vote on the matter. I applaud these Senators for demanding that: Senator LINCOLN, Senator LANDRIEU, Senator MCCASKILL, Senator PRYOR, Senator BAYH, Senator LIEBERMAN, Senator BEN NELSON, and Senator WEBB.

But, again, this process we are in the midst of certainly does not honor that minimal demand. We are set to vote on this in just a few hours. When we do, we will have only had the final legislative language for about 40 hours. We will have only had the full Congressional Budget Office cost estimate for about 37 hours. That is 56 percent or less of this minimum timeframe that so many of us, including eight Democrats, have demanded.

Again, this rush to judgment, this rush to beat an arbitrary Christmas deadline, is clearly ignoring the common sense of the American people, the common sense I heard in my dozens of

townhalls all across Louisiana: no arbitrary deadlines. Know what you are voting on. Get it right. Do not rush to judgment.

I have strong concerns about this process. Where are the 72 hours? Where is the opportunity for Members and the American people to know what is in this latest version of a megabill on so-called comprehensive health care reform? Where is the 72 hours' notice of a Congressional Budget Office cost estimate?

Given that rush to judgment and arbitrary timeline, I am rushing to digest this latest version of the bill. But certainly, already, I have other very strong substantive concerns. I will be coming back to the floor within the next few days to more precisely outline those concerns as I digest more of the details of this latest megabill. But let me mention at least six of the big Louisiana-based questions I am focused on in terms of this latest megabill, this latest so-called comprehensive health care reform or Obamacare.

No. 1 is the impact on the Louisiana State budget. There has been a lot of discussion about that because of the particular language included in the bill pertaining to Louisiana that apparently gives Louisiana a \$300 million benefit. The problem, from the Louisiana perspective, is in the Medicaid system, and that \$300 million is directly related to Medicaid. In Medicaid, there is a much greater additional burden put on all States, including Louisiana. In Louisiana's case, apparently, that is going to far surpass \$300 million.

So I am concerned about the overall, the net, impact on the Louisiana State budget, particularly because of the dramatic expansion of Medicaid. Medicaid is the health care program for the poor. It is dramatically expanded in the bill. Every State—except perhaps Nebraska because of special language put in for Nebraska—every State pays a match for both existing Medicaid and Medicaid expansion. That is going to put a big extra burden on the Louisiana State budget, and that big extra burden is apparently going to be much more than the \$300 million of benefit that has been so widely talked about. I am looking, right now, at the details of that.

My second big Louisiana-based concern has to do with the Louisiana seniors—Louisiana seniors who have paid into Medicare, the health care system for retirees, for years and have assumed it would be there for them, as they paid in, as they followed the rules every step of the way. I know from the study I have done already that this new, latest version of the megabill, so-called comprehensive health care reform, involves a \$464.6 billion cut to Medicare. That is going to impact every Louisiana senior, and it is going

to impact tens of thousands of Louisiana seniors on Medicare Advantage particularly onerously.

My third big Louisiana-based concern is the Louisiana taxpayer because this bill contains massive tax increases to pay for all these new entitlements. Apparently, the total figure of tax increases in the bill is \$518 billion—over \$½ trillion—more tax increases than in any of the six previous megabills, the six previous versions of Obamacare. A lot of these taxes are clearly going on individuals who earn less than \$200,000 per year, families who earn less than \$250,000 per year. A lot of Louisiana taxpayers are going to be hit. That is a big concern.

Fourth, I am concerned about Louisianians who have health care now and who pay premiums because those premiums, by all accounts, by all independent estimates, are going to go up because of the taxes and fees and other burdens in this bill.

Fifth, what about Louisiana small businesses, businesses that are struggling right now in a serious recession, the most serious recession since the Great Depression? We are in the midst of an extremely serious recession, and we are putting new mandates, new burdens, and new taxes on Louisiana small business. By all accounts, that is going to cost jobs, pure and simple, as we are in the midst of a very serious recession. I am concerned about that impact on Louisiana small business.

Sixth, and finally, Louisiana defenders of life. I am very proud to say Louisiana is one of the most pro-life States in the Nation—very strong values which hold up life and the defense of life in all its forms. Apparently—it is clear to me—this bill has taxpayer funding of abortion, the first time ever in Federal legislation, breaking tradition from the Hyde amendment, which has been the law since early 1977.

I am very concerned about that radical, truly radical departure from the past.

So in closing, let me say I hope we can adopt a different process, one that reflects the common sense of the American people and Louisianans when they say no arbitrary deadlines, no rush to judgment, and know what you are voting on. Also, I hope we will adopt a different approach that doesn't involve all of the downside I have mentioned, those six major categories.

I am still digesting this latest megabill. I will return to the Senate floor in the next few days to talk more and in more detail about those concerns I have laid out. But I hope all of my colleagues, Democrats and Republicans, look hard at those and similar concerns, look hard at the process and resolve to not just do this quick, not just do it before Christmas by some arbitrary deadline, but to do it right and to honor the American people in our work.

Thank you, Mr. President. I yield the floor.

The PRESIDING OFFICER. The Senator from Florida.

Mr. LEMIEUX. Mr. President, I am new to this Chamber, and as I have sat here today and listened to my distinguished colleagues speak about this bill, watching some of my other colleagues on television in my office this evening, I can't help but think how fortunate I am to be here, to be a part of this process. It makes me think back also to the Founders who put together this great constitutional system of democracy that we have in this country, with the three branches of government, and here in the Senate, the sober and reflective legislative body that thinks through the great issues of the day to make sure we get them right for the American people.

In listening to this great debate, I wonder what they would think about what we are doing here. Putting aside the substance, what would they think of the procedure? Because I am new to this Chamber, I think I still have fresh eyes as to what is normal as compared to perhaps what is a little bit departed from normal. Would they think it was within their intentions as the Founders that we would be coming here to vote at 1 o'clock in the morning? Would they think it would be within their intention of how things would work in the Senate that we would get an amendment to the bill that is 400 pages long, we would get it yesterday and would have just a little time to consider it before we try to vote on it? Would it be what they intended, that we would press this vote up against Christmas, and we would try to get it done quickly while most of the people in our country are off with their families and preparing for the holidays? Would that be what they intended, the process of this great deliberative body, arguably, it is often said, the greatest debating institution in the world? Is that the way they would want us to achieve policy that is going to affect one-sixth of our economy? I don't think so. In fact, I don't think the American people think so either.

That is why they are so bewildered as to what we are doing here in the Senate and why we are, as my friend and colleague from Louisiana said, rushing to judgment; why we must get this done before Christmas. If it is such a good bill, why do we have to get it done so quickly? If it is such a good bill, why can't we take some more time to evaluate it? If it is such a good bill, why can't we offer more amendments to it?

So I am sure the American people, if they are home watching this—and they are probably watching Sunday night football—but if they are watching this, they would say: Of course, my Senator from Florida or the Senators from the other States can now offer amend-

ments to try to improve the bill. But that is not the case because the leader of the Democratic Party, the majority leader, has done something called filling the tree.

Now, look, I am new here, too, so this is all new to me, but it is a process by which no other amendments are allowed. So if we want to change the bill, if we have ideas to improve it, that is not allowed. Is that what the American people want from us? Is that what our Founders intended? I don't think so.

So we have this new amendment. It is 400-some pages long. I guess it is the amendment to fix the problems that were in the bill, or at least to get 60 votes. And what do we know about this amendment? What does it do, for example, to Medicare cuts? We know the previous bill before the Senate cut nearly \$½ trillion out of health care for seniors. What does this amendment do? Well, it still cuts health care for seniors. It actually cuts a little bit more, but it is still around that same number: \$½ trillion.

We know also that it raises taxes. Does it raise taxes \$½ trillion as the previous measure did? Yes, it does. In fact, it raises taxes a little more. Now it is \$518 billion.

Well, what about the question that is the most pressing on the minds of most Americans, the very reason we are here, according to the President of the United States, which is to impact the cost of health insurance for most Americans. What does it do about that? Does the amendment do something about that? We know the underlying bill does nothing to impact the cost of health insurance for most Americans. We are here about to change one-sixth of the U.S. economy, and this bill does nothing to impact the cost of health insurance for folks who already have health insurance in this country. That is not me saying it; that is the Congressional Budget Office.

If you are one of the 170 million Americans who already have health insurance, this bill is not going to lower your costs. In fact, for some Americans, it is going to increase your costs over the next 10 years.

Well, does this amendment fix it? No. So we are still in the same situation—cutting \$½ trillion out of health care for seniors, raising taxes by \$½ trillion, with nothing in it for most Americans in terms of the cost of their health insurance.

How is this going to affect the American people? Well, if you have Medicare, if you are a senior who has been paying into it, it is going to affect you.

My friends on the other side of the aisle will say: Look, the nearly \$½ trillion that we are going to take out of Medicare is just waste, fraud, and abuse. We will get that money out. Well, the Congressional Budget Office says the measures that are in the bill will take out \$1½ billion worth of

waste, fraud, and abuse, not \$500 billion. So where is the rest going to come from? It is going to be decreased benefits. It is going to be decreased access to doctors.

We know right now in Medicare, nearly 24 percent of medical health care providers—your doctors, for example—will not take Medicare anymore, 24 percent, one in four of them. In Medicaid it is 40 percent.

What is going to happen when you reduce the amount of money you are paying into Medicare? You are going to reduce the amount of money that is being paid to providers, which means providers are not going to see their patients. If the doctor is not in, it is not health care reform.

This really impacts my State of Florida. We have the highest number of seniors per capita, 3 million seniors, on Medicare, and they are going to be impacted.

I wish to read from a letter that was sent to me by Mr. Richard Mullaney. I received it at the end of November. It says:

Dear Senator LeMieux. I thought you might like to see this letter I received from my cardiologist.

It attaches that letter from the Palm Beach Cardiovascular Clinic in Jupiter, FL, down in southeast Florida.

I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PALM BEACH CARDIOVASCULAR CLINIC,
Jupiter, FL.

AN OPEN LETTER TO OUR PATIENTS: The 2010 Medicare Fee Schedule mandates that on January 1, 2010 severe cuts in cardiology physician fees will begin. This cut is being phased in over four years because the government used flawed data to make their calculations. In addition, there are Congressionally mandated cuts of more than 20 percent to all Medicare physician fees, regardless of specialty. The result of these combined government policies are that our practice is facing payment cuts ranging from 25 to almost 50 percent.

Such drastic reduction in fees are going to seriously hamper our ability to continue to see you, our patients, as we do today. We feel the need to warn you that these reductions will translate into much longer waiting periods for you to schedule an appointment or a procedure with your doctor, longer telephone response times to you, and not having the convenience of in-office Nuclear and Echo diagnostic testing available to you. Making sure you have the best quality of care will always be our number one priority. Caring for people is why we all dedicated our lives to heart patients. In the very near future—it is going to be a difficult climate to operate in our current manner.

We have built our office facility and trained our staff to best take care of each patient. We believe that the care you receive is critical to your quality of life. Wish these cuts we may not be able to provide some of the services that patients have come to depend on and in the long run; if the current policies are not changed, we may be forced to close our doors.

As a cardiovascular patient we urge you to contact our lawmakers (see attached for their information) about the impact of our changing practice on you. The law is clear—we face cuts unless Congress acts. In advance we thank you for understanding our changing environment.

Sincerely,

GABRIEL E. BREUER.
CHAUNCEY W. CRANDALL
IV.
AUGUSTO E. VILLA.
AGUSTIN A. VARGAS.
GONZALO J. LOVEDAY.
BURTON H. GREENBERG.
SIDNEY M. RICHMAN.

Mr. LEMIEUX. Mr. President, it is an open letter to patients, and it is signed by some seven doctors who are in this cardiovascular clinic practice. I will read portions of it. It says:

Drastic reduction in fees are going to seriously hamper our ability to continue to see you, our patients, as we do today. We feel the need to warn you that these reductions will translate into much longer waiting periods for you to schedule an appointment or a procedure with your doctor, longer telephone response times to you, and not having the convenience of in-office Nuclear and Echo diagnostic testing available to you.

The letter goes on to say:

With these cuts we may not be able to provide some of the services that patients have come to depend on and in the long run, if the current policies are not changed, it may force us to close our doors.

So these are doctors, real doctors, and this is a letter from their real patient saying: If these cuts to reimbursements to doctors and providers aren't addressed, then we are going to have an inability for doctors to perform health care.

Those are real-world problems that are going to occur if this bill is passed.

So this is no great shakes for seniors. This isn't health care improvement for seniors. Those that we already have on a government entitlement program, those who have already paid into the program are going to have a cut in their benefits. That is exactly what the Chief Actuary, we found out last week from the Center for Medicare and Medicaid Services, said. He said it is plausible, even probable, that there will be shortages for Medicare and Medicaid beneficiaries because there is not going to be doctors who are available to see them.

Let's talk about the taxes: \$518 billion in tax increases. What is that going to do to the cost of health care? We are going to tax medicine. We are going to tax lifesaving devices. Those taxes, of course, will be passed along to you, the consumer. So for you, your cost of health care will go up, taxes on health insurance of almost \$60 billion; taxes on medical devices, \$19 billion; taxes on medicine, \$22 billion. If you don't have health insurance now and you don't get it, you will be taxed. If you are a small business and you don't provide health insurance to your employees, you will be taxed.

I had a telephone townhall meeting this week, and I talked to a gentleman from central Florida who had been laid off from his job at a restaurant. He said to me: The reason I got laid off is because the restaurant couldn't afford the health care benefits. So when health care benefits went up, the restaurant raised its prices for its food, people stopped coming to the restaurant, and the restaurant went out of business. Then there wasn't health care for any of the employees.

You can't get blood from a stone. While the benefits of this plan as laid out by my Democratic colleagues may sound great—33 million more Americans who are going to have some kind of health insurance—you have to look at the details. How are you going to pay for it, and what is the effect going to be? When you raid nearly \$½ trillion out of Medicare, you are going to decline the quality of health care for our seniors. When you raise taxes by \$½ trillion, you are going to pass those costs along to consumers who already have health insurance, and their prices are going to go up. You are going to pass them along to small businesses that would not be able to afford them, that will let people go.

We have 11.5 percent unemployment in Florida. When small businesses can't afford this, they are going to let people go or, like that restaurant, close their doors. That is not good for a country that is fighting through the worst recession since the Great Depression.

Now we find out there are a bunch of special deals in this bill. We find out that the Senator from Nebraska has been able to get a special fix for his State.

See, another thing this bill does is it puts a big unfunded mandate on the States. What do I mean by that? An unfunded mandate is a requirement that the States must fulfill that they don't get paid for. This time it comes in the form of Medicaid, which is health care for the poor. Medicaid, under this proposal, is going to be increased. We are going to put 15 million more Americans into Medicaid.

If you think Medicare recipients are having a tough time finding a doctor, in Medicaid, 40 percent of health care providers will not take it; 50 percent of specialists will not take it. Now we are going to put 15 million more Americans into it.

What it does to the States, in a State such as Florida, it is going to cost us in 10 years nearly \$1 billion to accept this unfunded mandate. The Senator from Nebraska apparently got a fix for this so his State would not have to pay the \$1 billion. Well, Florida would like that same fix. If it is good for Nebraska, it is good for Florida. I am sure Iowa would like that fix as well. I am sure all the States would.

So I ask unanimous consent that the pending amendment be set aside and it

be in order to offer an amendment to extend to the State of Florida the same benefits that provide 100 percent Federal funding to the State of Nebraska for their expanded Medicaid Program.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. Objection.

Mr. LEMIEUX. For the folks who are watching at home, the reason my distinguished colleague from Iowa objected to this is because this deal would not go through if they provide it for every State. So some States are going to get it better and some States are going to get less, and that is not fair. But that is the process that has put this bill together, to cobble together 60 votes.

So at the end of the day—may I ask how much time I have remaining?

The PRESIDING OFFICER. Fifteen seconds.

Mr. LEMIEUX. At the end of the day, I have 15 seconds left. I will be back to the floor to speak about this again. But this is not a good bill for America, and that is why my colleagues on this side of the aisle have been debating and showing our objections so the American people can understand.

I yield the floor.

The PRESIDING OFFICER. The Republicans' block of time has expired.

The Senator from Massachusetts.

Mr. KIRK. Mr. President, I rise to, first, commend my distinguished colleagues, Majority Leader HARRY REID of Nevada, Senators BEN NELSON of Nebraska, BARBARA BOXER of California, BOB CASEY of Pennsylvania, and CHUCK SCHUMER of New York for the principled and practical compromise they reached on the difficult issue of abortion. Their work allows the U.S. Senate to now march with our House colleagues toward the forward edge of history and the enactment of The Patient Protection and Affordable Care Act, and I congratulate them for that important contribution.

I would also like to commend my colleague, the assistant majority leader, DICK DURBIN of Illinois, for bringing to the Senate's attention during yesterday's debate an op-ed that appeared in the Washington Post this morning written by our dear friend Victoria Reggie Kennedy entitled "The Moment Ted Kennedy Would Not Want to Lose."

Vicki Kennedy was Senator Kennedy's partner in all things, including his final efforts to move health reform forward even as he valiantly fought his own battle with cancer.

In more than 17 years of marriage, Ted and Vicki were inseparable, bonded by the love of friends, family and most obviously by their love for one another. Vicki displayed inspirational grace in leading us all in our grief and in the memorable celebration of his life on the occasion of Senator Kennedy's death.

And today, she continues as his partner paying tribute to Ted's legacy by respectfully urging his colleagues to move forward on the health reform he would have wanted.

I feel certain that Vicki's voice and his will make us more determined than ever to complete Ted's work for the American people. We thank you, Vicki.

Mr. President, I would now like to respond to an argument made in another op-ed in Thursday's Washington Post and in an interview on "Meet the Press" this morning by my friend, and a former Democratic Party chairman, Howard Dean.

Chairman Dean said in his opinion piece: "If I were a Senator, I would not vote for the current health-care bill," because it does not bring "real reform."

With all due respect, before anyone swallows Howard's faulty prescription, as they say in the field of health care, "It's time for a second opinion!"

As a former national chairman of the Democratic Party myself, I'll take my equal time to offer my opinion and say I am a U.S. Senator, and I will vote for the current health care bill precisely because it does bring "real reform."

Is it all the reform for which our friend and colleague Ted Kennedy, "the Father of Modern Health Care Reform", fought so valiantly and tirelessly throughout his legislative career? No.

Is it all the reform for which I and many of my distinguished colleagues advocated so passionately here on the floor of this Chamber throughout this intense debate? No.

But, is it a quantum leap forward that will bring "real reform" to a broken, discriminatory, bankrupting, deficit-busting health care system that will only get worse without immediate action and passage of this legislation?

The answer is clearly: Yes.

One of the reasons history will record that Ted Kennedy was the greatest legislator of our time was that he respected the need and the art of compromise.

And he would argue that a choice between a solid, sound, significant and long overdue start at "real reform" of our health care system and the choice of leaving American families to continue to fall behind because we refused to seize the historic moment before us—is the easiest choice and, perhaps, the most historic vote we may ever cast as U.S. Senators.

Does anyone in this Chamber—or in Massachusetts—or anywhere else for that matter, doubt Ted Kennedy's commitment to legitimate, credible, real reform of our system in order to make affordable, quality health care accessible to the greatest number of Americans? The answer is clearly: No.

Is this a bill of "real reform" that Ted Kennedy would champion and vote for? Absolutely, yes!

Ted Kennedy knew real reform when he saw it, and so do I.

Here are the real health care reform measures of this Senate bill, many of which Senator Kennedy helped to craft. Think about this.

It will save money and save lives; expand coverage and bring over 30 million uninsured Americans into the community of the insured; It will control costs and lower premiums; stimulate competitive choices so consumers can choose the best policy at the most affordable price; relieve the costly health care burden on the small businesses of America through tax credits; provide a discount to countless seniors like my own sister Maud, who are squeezed by the cost of prescription drugs under Medicare D's so-called doughnut hole.

The real reforms in this bill will strengthen Medicare and Medicaid; reduce the deficit by hundreds of billions of dollars; attack waste, fraud and abuses; eliminate lifetime limits on needed care; reward wellness and preventive practices; increase transparency and insurance company accountability; promote flexibility, innovation and best business practices; reward the quality and value of care instead of the quantity and volume of procedures.

This bill will eliminate unjust discrimination against women or those afflicted with preexisting conditions; it will provide the elderly and disabled a voluntary choice to self-fund a plan that will provide financial security to purchase long-term services when they are needed most; it will require insurance companies to cover children and dependents up to age 26; and prohibit insurance companies from dropping coverage for Americans who get sick—the very reason they buy health insurance in the first place!

In these and many other ways, this Senate bill is real reform—for a senior citizen who cannot afford the drugs she needs; for the 31 million people who will now have the health insurance they deserve; for families who worry that hospital bills will wipe out their life savings; and for a system that presently fails to serve the needs of the American people, this is real reform.

For those well-meaning progressives who say they oppose this bill because it does not go far enough and to my colleagues on the other side of the aisle who want to defeat this bill and start over, I say they are both mistaken.

We need to win this fight now and we need to win this fight together! Will there be more to do after its enactment?

Mark my words. There will always be more to do. But this historic piece of legislation will be a giant step forward toward a health care system that truly begins to serve the needs of the American people.

President Kennedy offered two profound observations that have helped

me keep things in perspective throughout my life, and they have particular application at this moment in our time. He once said:

Wisdom requires the long view.

And on another occasion, he said:

Democracy is never a final achievement; it is a call to an untiring effort.

John Kennedy's words apply so well to the work of health care reform before us this evening and to the legislation that will pass this Senate within the next several days.

We are all called upon to exercise our wisdom and to take the long view of history. We must understand that passage of this legislation will not be a final achievement. It will be a compelling first call to an untiring effort to continue with our responsibility to do what the American people deserve—provide affordable, accessible, quality health care for them as a matter of right.

I am old enough to recall the Civil Rights Act of 1960, and the Civil Rights Act of 1964, and the Civil Rights Act of 1968. With the passage of each of those laws, there was always more to do. But each began the march of progress toward equality under our laws. And each created a responsibility to assure that our country's laws more aptly reflected our national character and our principle of equal justice.

The same is true of this moment in our national history. The bill before this Senate is not perfect, nor will it be the final product. But make no mistake, it is real reform, and it will provide enormous benefits to America's workers, America's seniors, and America's families.

I urge my Republican colleagues not to be held hostage by the raw and divisive politics of the moment, not to be the captives of those who may threaten with some meaningless political litmus-test score cards, but to step back and to think about the positive difference these reforms will make in the lives of the millions of American families you represent—and, finally, to reflect wisely upon the long view of history and decide that this is the moment to join the majority of this U.S. Senate in moving toward history's enlightened edge by voting for this landmark legislation.

I yield the floor.

The PRESIDING OFFICER. Who seeks time? The Senator from Connecticut.

Mr. DODD. Mr. President, before he leaves the floor, let me commend our colleague from Massachusetts, PAUL KIRK, who has only been with us a brief amount of time under circumstances he has said on numerous occasions over the last several weeks he would much prefer to have avoided. I commend him.

Many of my colleagues know that PAUL KIRK is no stranger to this institution, having worked as a member of the staff in Senator Kennedy's office

for many years. He has had a distinguished career in his own right in Boston. We welcome him here under those very sad circumstances. But his remarks this evening are evidence of the value he has placed in coming to this Chamber and filling a gap here and articulating a view our colleague from Massachusetts would be expressing were he here these days and tonight.

Said so well, if it has not been printed in the RECORD, I ask unanimous consent to have printed in the RECORD an editorial piece written by Senator Kennedy's wife Vicki Kennedy.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 20, 2009]

THE MOMENT TED KENNEDY WOULD NOT WANT TO LOSE

(By Victoria Reggie Kennedy)

My late husband, Ted Kennedy, was passionate about health-care reform. It was the cause of his life. He believed that health care for all our citizens was a fundamental right, not a privilege, and that this year the stars—and competing interests—were finally aligned to allow our nation to move forward with fundamental reform. He believed that health-care reform was essential to the financial stability of our nation's working families and of our economy as a whole.

Still, Ted knew that accomplishing reform would be difficult. If it were easy, he told me, it would have been done a long time ago. He predicted that as the Senate got closer to a vote, compromises would be necessary, coalitions would falter and many ardent supporters of reform would want to walk away. He hoped that they wouldn't do so. He knew from experience, he told me, that this kind of opportunity to enact health-care reform wouldn't arise again for a generation.

In the early 1970s, Ted worked with the Nixon administration to find consensus on health-care reform. Those efforts broke down in part because the compromise wasn't ideologically pure enough for some constituency groups. More than 20 years passed before there was another real opportunity for reform, years during which human suffering only increased. Even with the committed leadership of then-President Bill Clinton and his wife, reform was thwarted in the 1990s. As Ted wrote in his memoir, he was deeply disappointed that the Clinton health-care bill did not come to a vote in the full Senate. He believed that senators should have gone on the record, up or down.

Ted often said that we can't let the perfect be the enemy of the good. He also said that it was better to get half a loaf than no loaf at all, especially with so many lives at stake. That's why, even as he never stopped fighting for comprehensive health-care reform, he also championed incremental but effective reforms such as a Patients' Bill of Rights, the Children's Health Insurance Program and COBRA continuation of health coverage.

The bill before the Senate, while imperfect, would achieve many of the goals Ted fought for during the 40 years he championed access to quality, affordable health care for all Americans. If this bill passes:

Insurance protections like the ones Ted fought for his entire life would become law.

Thirty million Americans who do not have coverage would finally be able to afford it. Ninety-four percent of Americans would be

insured. Americans would finally be able to live without fear that a single illness could send them into financial ruin.

Insurance companies would no longer be able to deny people the coverage they need because of a preexisting illness or condition. They would not be able to drop coverage when people get sick. And there would be a limit on how much they can force Americans to pay out of their own pockets when they do get sick.

Small-business owners would no longer have to fear being forced to lay off workers or shut their doors because of exorbitant insurance rates. Medicare would be strengthened for the millions of seniors who count on it.

And by eliminating waste and inefficiency in our health-care system, this bill would bring down the deficit over time.

Health care would finally be a right, and not a privilege, for the citizens of this country. While my husband believed in a robust public option as an effective way to lower costs and increase competition, he also believed in not losing sight of the forest for the trees. As long as he wasn't compromising his principles or values, he looked for a way forward.

As President Obama noted to Congress this fall, for Ted, health-care reform was not a matter of ideology or politics. It was not about left or right, Democrat or Republican. It was a passion born from the experience of his own life, the experience of our family and the experiences of the millions of Americans across this country who considered him their senator, too.

The bill before Congress will finally deliver on the urgent needs of all Americans. It would make their lives better and do so much good for this country. That, in the end, must be the test of reform. That was always the test for Ted Kennedy. He's not here to urge us not to let this chance slip through our fingers. So I humbly ask his colleagues to finish the work of his life, the work of generations, to allow the vote to go forward and to pass health-care reform now. As Ted always said, when it's finally done, the people will wonder what took so long.

Mr. DODD. Mr. President, she said it very well, as Senator KIRK has, that this is far from a perfect bill. We all know that. It is far from a finished product in terms of health care. The Presiding Officer spent a good part of his career as well working on this issue and would be the first to acknowledge as well that we have a lot more work to be done.

Congresses long after all of us who serve in this Chamber are gone will be grappling with the issue of how we can better deliver health care services, create greater access, and reduce the cost of health care while extending quality of life for our fellow citizens and removing the fear so many families feel when they discover that a loved one—a child, particularly—is suffering from some illness or disease that requires attention and yet to be informed that the costs of providing that attention, that care is so prohibitive that they cannot afford to do it and wondering why they, because they lack the economic circumstances, cannot take as good care of their children as someone with access to greater economic power can.

That is what we are trying to achieve, to create that availability. I don't know anybody who disagrees with the statement that health care in America ought to be a right, not a privilege. And if it is a right—then, just as other rights are extended to every citizen regardless of their economic circumstances, their ethnicity, their background, their gender, certainly this right ought to be no different in that regard and available to all of our fellow citizens regardless of their financial circumstances. That is what we are starting to do here. It does not achieve that goal perfectly, but it puts us on that path to achieving that equity, that ability for families and individuals to take care of themselves and their families when afflicted by a medical crisis or medical problem.

Having been deeply involved in this issue now for not quite a year but almost a year, since it became very difficult for my friend and colleague from Massachusetts to conduct the kind of daily and hourly efforts he would have been involved in but for his health condition, we have come to a moment now to decide whether we go forward, whether we accept the responsibility as being Members of this body to do the best we can when trying to design something written by 100 people, not to mention 435 in the other body, not to mention an administration and all of their interests, not to mention all of the stakeholders who are involved in health care, which is so voluminous that it would be impossible, even in the time remaining this evening, to mention everyone who has a stake in the outcome of this discussion.

Taking all of those elements and trying to bring them together to fashion an ideal or set of ideas to go forward has defied, as I have said on so many occasions in this Chamber over the past number of months, has defied every administration and every Congress since this first challenge was posed by—well, going back to the days of Theodore Roosevelt but more recently since the time of Harry Truman. Every Congress, Republican and Democratic, every President, Democratic and Republican, has at least thought about doing this. Some have actually tried. President Nixon actually tried. President Clinton actually tried to come forward. Those who remember those days, for a variety of reasons, some that seem more clear today than the hour they were being debated, those efforts failed. We are now that third administration, that third effort that has come this far, if you will.

My hope is that this evening and in the ensuing few days, we will complete our task in this body and continue the effort by working with the House of Representatives to fashion a final product for the signature of the President of the United States to allow us to begin what will be a long journey to

make sure that right of health care is available to all of our citizens.

Many of us here may never see the benefits of that just because of life expectancy, I suppose. But to know you are leaving a health care system in place for the coming generation where they can look back on these wintry days in the Senate and be reminded that there was a Congress at the outset of the 21st century willing to face up to the challenges, with all of the accusations, all of the barbs, all of the ad hominem arguments hurled at people, and make an effort to correct a wrong, to right a wrong, to make a difference and improve the quality of life for all of our fellow citizens—that is something I hope coming generations will recognize as a result of the efforts we have made here.

Let me take a few minutes to wrap up this part of the debate with my views as to where we stand at this hour.

When this body began the process of writing health care reform over a year ago, we knew it would represent a mammoth undertaking, and we knew it would get more difficult as we got closer to the goal line, as every major effort I have been involved in for three decades here has certainly evidenced. As you get closer to the goal line of major undertakings, it gets harder and harder to cross that finish line.

This issue involves one-sixth of our economy, affects 100 percent of our fellow citizens, and has been the center of American public policy debate since before many of us were even born.

Our path has been long and winding and has been difficult. It has been illuminated by a torch lit long ago in the days of Harry Truman and those who even preceded him and sustained for decades by very good people—Democrats, Republicans, and others—who believe that in a nation founded on freedom and sustained by unimaginable prosperity, no one—no one—in our country ought to have to go to sleep on a night such as this feeling that if they get sick or a loved one does, they will go broke or, worse, be unable to afford the care they or that loved one needs to get well.

As I said so many times before, the person who carried this torch as long and proudly as anyone since this debate began so many years ago is not here with us tonight, but he is here in spirit and good conscience. I speak, of course, of our colleague from Massachusetts, Ted Kennedy. He never expected that he or we would cure all our ills in one fell swoop, in one massive bill that would, once and for all, right this problem of health care. Progress, he would argue, is hard, and the simple mathematics of the Senate make it harder all the time.

I know our Republican leadership has basically advised their fellow members of their caucus not to vote for this bill

no matter what is in it. I regret that. I think it is a sad moment but one with which we have to grapple. We cannot quit because of that political conclusion. We have to move forward. In fact, they went so far as to write a playbook for how to disrupt, delay, and obstruct progress on this issue. I know they do not like the bill and many parts of it. I also know many of them like many parts of this bill, and they acknowledge that when they talk about greater access, cost reductions, and the quality of health care. As one who conducted the hearings and the markup on health care over the last year, I heard over and over that members of that committee, Republicans and Democrats, speak of the very same goals we all seek with health care reform. I know, as a matter of fact, that many of them wrote major provisions of this bill. This bill is not devoid of the involvement and participation of members of the minority party this evening as we come close to voting on a final choice. But I regret it has come to that. I think our best efforts do emerge when we work together as citizens of this great country, regardless of the political labels we bear.

My hope will be in the coming days that those doors may open and participation may, in fact, flow and we will end up with a product coming back from conference that is even stronger than the one we are being asked to make a decision on this evening.

Someday we will look back on this moment in our Nation's history, and many of those not part of this decision will wish they stood in the arena instead of lobbing rhetorical grenades and cheap shots at a bill that deserves so much better. There is still time for my colleagues to stand and do what is right. I hope they will before the process is over.

As it is, our caucus had to work at finding compromise language we could all stand behind, and we have tried to do that over these days. The resulting bill is not one that any one of us would have written on our own given that opportunity. And that goes for me as well, as I know it does the Presiding Officer. We have fought for a strong public option in our committee. I fought to have it included in the bill the majority leader brought to the floor, and I would have happily been fighting for it even today given that opportunity. But as I have said, it is always easier to envision the legislation you want than to pass the legislation we can get.

Our country badly needs this legislation, even as imperfect as it may be in some aspects. The preferred outcome of our Republican friends we have in the Senate—deadlock within our caucus and a resulting failure to pass a reform bill—will result in more family bankruptcies, more deficits, and, sadly, more deaths that could have been prevented if everyone had access to decent

health care. We do not have to let that happen. In fact, we will not let that happen. We have to be better than that.

Yesterday, the majority leader offered a managers' amendment to the original Patient Protection and Affordable Care Act which we have been debating since prior to Thanksgiving.

It toughens accountability policies for insurance companies, requiring them to spend more on health care and less on administrative costs and profits, holding them accountable for jacking up premiums, and prohibiting them from excluding coverage of preexisting conditions for children, effective immediately.

It provides American families with more health care choices, guaranteeing that in addition to a variety of private sector options, families can choose from at least two national plans similar to the ones we receive right here in the Senate, one of which will be a not-for-profit plan.

It strengthens affordability provisions in the bill, starting a tax credit for small businesses in 2010, giving families more information to shop for better deals, and helping to spread cost-saving innovations across the country.

It builds on the bill's protections for seniors, children, rural communities, and other vulnerable populations.

It preserves the bill's core commitments that no American should go broke because they get sick and no American should die because they cannot afford the care they need to get well.

After more than a year of legislating and more than 60 years of hard work on the part of advocates across the Nation, we have an unprecedented opportunity, both later this evening as well as the remaining days of this week. We are standing on the floor of the Senate with a chance to pass legislation that puts our focus on preventing disease, not just treating it, a bill that insures those 31 million of our fellow citizens who today lack any health insurance at all, a bill that guarantees every American access to quality health care at a lower cost.

Senator Ted Kennedy always believed we would someday have this chance, and I think he knew this year might be the best and for our generation the last chance. These opportunities do not come around very often. We fought for reform in the 1970s and failed. We fought for health care reform in the 1990s and failed as well. If we fail this time, if we let partisanship triumph over progress, if we lose sight of the goal in the face of political gamesmanship, we who stand here today may never get that other chance.

We came here to make this country a better place. I believe every person who serves here believes they came to the Senate to make our country a stronger and a better place. We have before us a

bill that saves lives, lowers costs, and frees tens of millions of our fellow Americans from the fear that grips them, as I address this Chamber on this evening. Let's do our jobs. Let's pass this bill. Let's make America stronger and a better place because this Congress and this administration rose to the challenge to grapple with a magnificent issue that deserves our attention and our support.

I urge our colleagues to support this bill.

I yield the floor.

The PRESIDING OFFICER (Mr. KIRK). The Senator from Illinois.

Mr. DURBIN. Mr. President, let me first acknowledge the Senator from Connecticut, who played a critical role in not only the inspiration but the preparation of this important landmark legislation. Senator DODD has been given some tough assignments in his career. He has been handed some of the toughest, and this was one. His Health, Education, Labor, and Pensions Committee met, I understand, 54 hours, if I am not mistaken. I think that is what he said earlier on the floor. It considered hundreds of amendments with the notion that we could create a better, more effective health care system in America. I have yet to hear anyone criticize his chairing that committee. He was evenhanded and fair. He entertained and accepted some 150 or 160 Republican amendments to this bill in an effort to try to build some bipartisan support for it. He went the extra mile with extra hearings. His committee was weary at the end, but he proved that his experience in the Senate had taught him valuable lessons about what it took to be respectful to the other side of an issue. He was not rewarded with a final vote in committee. Not a single Republican Senator would vote for the bill. It was not for any lack of effort on the part of Senator DODD.

When this bill passes—and this bill will pass—he deserves special credit for it, and I am going to be one of the first to applaud him. He included a provision in this bill near and dear to me on congenital heart research that will save lives and will spare suffering to families across America. I will forever be indebted to him for it.

In just 4 hours, in the early morning hours of Monday, December 21, 2009, one of the most significant votes in the history of the Senate will take place. It is hard for us in the midst of this debate, after all that has come before us and all that is likely to follow, to properly put this in historical context. For those of us who were honored by the people of our State to be here at this moment in history, it is humbling to know we will be called on to cast a vote that can change a nation.

It has happened here before but only rarely. It happened 75 years ago when other Senators, in a much different

era, battling through the worst depression in our Nation's modern history, were called on by a President in a wheelchair to rally and stand for the elderly of America. He asked to create Social Security, an insurance plan primarily for widows. President Franklin Roosevelt came to this Senate in this Chamber asking each and every one of the Senators to be mindful of the plight of our parents and grandparents in that time.

I can recall, in my family, it was not uncommon for grandparents to end up living in the same home as their children because after they reached the point where they could no longer work for a variety of reasons—physical, retirement, whatever it happened to be—their savings were meager and the chance of living independently was limited. So their children took them in in that spare bedroom, made them part of the family and welcomed, but understood that was the only way mom and dad were going to have the dignity they deserved in life.

Franklin Roosevelt had a different vision. He thought if workers throughout their worklife paid a little bit of money each week into a fund, they could be ensured there would be a check waiting for them at retirement that would allow them independence and dignity. He prevailed, and Senators stood up in that era of the 1930s and gave him the votes that were needed to change our Nation when it came to the way we treat the elderly.

Those on the other side of the aisle—Republicans—were skeptical. They were fearful of government; fearful of a new program. They argued we were headed down a path we would regret—echoes of many arguments we are hearing today in opposition to health care reform. When their time came later, even as recently as a few years ago, they tried to dramatically change and rewrite the Social Security Program. They called for privatizing it, saying we would be much better off if the Social Security trust fund were actually in the stock market. Thank goodness the wisdom of America rejected that idea. Within months of the suggestion, it was proven to be totally false, as life savings were lost with the recession that we now are enduring.

It is an indication of the bravery of a President, the courage of a Senate, and the fact that they rejected the pleas of those who would say: "Do nothing. Don't touch it. Leave that problem alone."

It was about 45 years ago when another great President had another great idea, and that idea was to create Medicare, and with the creation of Medicare to say to those same elderly: It isn't enough to give you a check to get by each month. We want to make sure you have access to doctors and hospitals when you need it. Lyndon

Baines Johnson, the master of the Senate, then President, managed to engineer the passage of that legislation against critics who once again said: It is too much government. It is a program that will cost too much money. It is not needed. We shouldn't do it.

Their counsel was rejected. Medicare was created. It wasn't the Medicare we know today. It didn't reach the disabled. It didn't provide some of the basic services that many seniors now desperately need, and it didn't cover prescription drugs, but it was a start. It was a critical decision made to move forward. The same Republican Party that objected to the creation of Medicare has been critical of the program ever since. They have argued that it is wasteful, that it is doomed, that it should be allowed to wither on the vine. That was actually a quote from a leading Republican not that long ago.

They suggested there was a better way—let's privatize Medicare. They love the notion of privatizing. Get government out of the picture. They came up with this theory, with the health insurance industry, of something called Medicare Advantage. This was where those flinty-eyed entrepreneurs would teach government a lesson. They would offer the benefits of Medicare and show how to do it at a lower cost. Well, we accepted their challenge and gave them their opportunity, and what we found was: They failed. Oh, some succeeded, but by and large when the final count took place, those private insurance companies couldn't help but have the urge to maximize profits at the expense of Medicare. So now we spend about \$17 billion a year out of Medicare subsidizing private health insurance under the so-called Medicare Advantage Program. The experiment has failed.

The basic idea of Medicare was proven right. It gave to our seniors something that we had promised and hoped we could deliver—longer healthier lives. It also triggered the creation of a medical health establishment across America—the building of hospitals and medical schools and more medical professionals than our Nation had ever seen—because of Medicare, because of a President, Lyndon Baines Johnson, and his courage, and because of a Senate that could rise to the challenge of passing it, despite the critics.

Well, in the early hours of Monday, December 21, 2009, our generation of the United States Senate will face our rendezvous with destiny, our opportunity to change this Nation, to make such a significant change in the way health care is delivered in America that we can say to future generations: We had our moment, and we seized it. To think that we will—with the passage of this bill in perhaps just a few days in the Senate, and a few weeks on Capitol Hill—enlarge the percentage of Americans with the security of health insurance from 83 percent to 94 per-

cent—the highest percentage of Americans ever insured in the history of our Nation. Of 50 million uninsured Americans today, 30 million of those people will finally be able to rest at night knowing they are covered; that they have health insurance.

It will be Judy, a worker in Marion, IL, at a hotel, making \$8 an hour, working 30 hours a week, \$12,000 in annual wages. She is a diabetic. She has never had health insurance in her life. She goes to work every day. She is 60 years old. She will have health insurance because of this bill. She will be covered by Medicaid, and she won't have to pay for it because Judy's wages are at the low end of workers in America.

I said to her: If you had health insurance, Judy, what would you do?

She said: Senator, I have a few lumps I have been worried about a long time, and I can't afford to go to the doctor. I would go to the doctor.

Thank God she can. Thank God for a lot of others—those who have lost their jobs, who are unemployed, who have exhausted their savings, who stand to lose their homes—who will at least have the peace of mind they will have health insurance. That is going to come too.

If you have a child with a health problem, as many people do, something they call a preexisting condition, this bill will tell the health insurance companies immediately: You can no longer discriminate against that child. You can't turn down the family or that child for coverage. As someone who has been through that experience, I can't tell you what that means, to know that you have that kind of coverage; that your child, with that health care challenge, can go to the doctor they need to see and the hospital they need to be in.

When my wife and I were first married and had our first baby, I was in law school, and we had no health insurance. When our baby had a problem, I had to go to Children's Hospital here in Washington and sit in a room filled with people who had no health insurance. I took a number, and we waited for a doctor. Every time we went, it was a different one. I felt like I had let my family down. At a time when my family needed health insurance, I had not delivered. I know that feeling personally, and I know what it must mean to 50 million Americans who face it today. For 30 million of those Americans, this bill will give them the peace of mind that they have health insurance.

It also says to companies across America, we are going to change the terms of this relationship between health insurance companies and the people they insure. We are going to finally step in on the side of the consumers of America—the families of America, the ones that are so often

turned down because of preexisting conditions, turned down because companies canceled their insurance when they started running into high medical bills. For the first time, these people will have legal rights created by this bill to stand up and be covered and to be confident at the end of the day that they will have the coverage they paid for their whole life.

It is an amazing thing we are considering. In the middle of it, with all these speeches and all the press releases and all the charts and all the time, it is sometimes difficult to focus on the historical impact of what we are about to do at 1 a.m. on December 21, 2009. But if we do this, and do it right; if 60 Senators step forward, as I think they will—commitments have been made—we will make history. It will be reported across America that for the first time in memory, the United States Senate has voted for comprehensive health care reform.

The critics will still be there, and they will say the same thing they did about Social Security and the same thing they did about Medicare: It is too much government. It is not going to work. We shouldn't do it.

Thank God, that counsel was rejected in the 1930s and the 1960s, and it should be rejected on December 21, 2009. We need to stand together for people who otherwise have no voice—the uninsured, many of whom have low-wage jobs, or maybe no jobs at all, and their children, who really can't afford the best lobbyist in Washington. It is time for us to lobby for them.

I know there are a lot of critics of this plan. We have heard them. They have talked about Medicare and what this will do to this bill. But we know what the professionals have told us. This comprehensive health care reform legislation will add 9 or 10 years of solvency to Medicare, put Medicare on sound financial footing. And that is exactly what we should do.

The bill has a bonus. The bonus is that, at a time when we are facing deficits and debt, which have to be taken seriously, this bill charts a path for us to start retiring that debt. The Congressional Budget Office says that over the first 10 years, \$130 billion in debt will be relieved by this bill; then in the second decade of this bill's existence and changes, we are going to find up to \$1.3 trillion in deficit reduction.

There has never been a bill considered on the floor of the Senate that has had that kind of impact on our Nation's debt. It is going to change life not only for uninsured families but even those with insurance. For some, it will give the luxury that we have as Members of Congress.

I think we are the luckiest people on Earth when it comes to health insurance. We team up with 8 million Federal employees and their families, and each year we have an open enrollment.

If we don't like the way we are treated by our health insurance company in the previous year, we can go shopping, just like you would shop for a car or a refrigerator, and pick the right one for your family. We pick the right health insurance for our families. Every American should have that luxury, and we move toward creating that in this legislation.

It was several years ago that I teamed up with Senator BLANCHE LINCOLN of Arkansas and Senator OLYMPIA SNOWE of Maine. We tried to create a program for small businesses in America called the SHOP Act. This program would give those small businesses the same shopping opportunities for health insurance as Members of Congress and Federal employees. I came up with an unlikely ally in the National Federation of Independent Businesses. They decided they wanted to join us.

When their lobbyist called and said he wanted to meet with me, I said: I can't wait to meet you. His organization had done everything in their power to defeat me in every election I had been in, and I wanted to see what he looked like.

He came in and sat down and said: We have to do something about health insurance for small business. We ended up creating an unlikely but powerful alliance of the National Federation of Independent Businesses, the realtors, the Service Employees International Union, Families USA—from both sides of the political spectrum—standing behind the SHOP bill.

The SHOP bill, with some changes, is now part of health care reform. It is an idea that has been endorsed, and it is one that I think is going to make a big difference for individuals. The bill also contains help for small businesses to pay for the premiums. Critics on the other side of the aisle say: Oh, the taxes go up, but the benefits don't start for years. They have missed it because initially we are going to be offering tax assistance to small businesses with 50 employees or fewer. Those who have an average payroll of \$50,000 a worker are going to get a helping hand to buy health insurance not only for their workers but for the owner of the company.

I have seen this in my own life. I have friends who run a small business who have lost their health insurance because one employee's wife had a very sick baby. That is exactly what happened to my friend. They went out shopping for insurance on the open market and it was brutal. My friends were in their early sixties, and they couldn't buy insurance. Everything they could buy was loaded with exclusions and deductibles and copays.

Well, we are going to make sure that businesses have a helping hand with a tax credit, and that helping hand is going to allow them to buy good insurance that covers their employees.

Those on the other side talk about the tax increases in this bill. Let's be very blunt what they are. There is a .9 percent payroll tax increase for individuals making over \$200,000 a year and families making over \$250,000 a year. What it means is this: Roughly \$2,000 a year for families making over \$250,000 will have to be paid to make sure that Medicare is solvent and that this program is funded. That may affect some Members of Congress, with their spouses working. But I don't think it is unfair. It is a tax we should be willing to pay to solve major problems in this country.

There will be taxes on high-end health insurance policies, and it is a very controversial provision with some of my friends in organized labor. But I hope we have hit the right number of \$23,000 and I hope our escalator clause to try to keep up with inflation is a reasonable one. If it is not, we will revisit it. The only law ever written that didn't need amendment might have been the Ten Commandments, and I don't think this bill, as good as it is, will rise to that level. We are prepared to return to it if we need to, to make sure it works and works well, and we have the time to do that.

This is critical. I also know this bill is going to change—you will be able to see the change across America with the construction of community health clinics. One of our great Senators here, BERNIE SANDERS of Vermont, has been a clarion voice on behalf of community health clinics. He knows, as we all do, that these clinics, placed in cities and towns across America, are a lifeline to low-income people so that they have primary care at a fraction of the cost of a visit to an emergency room—good care. I have seen it. I have visited the Erie Clinic in Chicago, Alia Clinic in Chicago. These are good, clean, modern clinics, with people dedicated to health care and dentistry who are helping these people.

We envision 10,000 more community health clinics as a result of this bill, at least, and thousands of primary care physicians to be there to help. That will mean we will be creating, across America, a network of care and peace of mind for people who otherwise have few places, if any, to turn.

I think the day will come soon when this bill, after it is passed, will become evident to America in terms of what we set out to do and what we achieved. If history serves, as it has in the past, many of today's critics will not dwell on the fact that they voted no, but rather say I had some problems with it. I guess it worked out OK. They may be afraid to acknowledge that now. I think ultimately they will have to.

This is clearly an idea whose time has come, and it has come because we have a President with the courage, the political courage, to step up and make sure that we not back away. As Frank-

lin Roosevelt did in Social Security, as Lyndon Johnson did with Medicare, Barack Obama, with health care reform, has challenged this Congress not to ignore a problem that has haunted the Presidencies of seven great men who have previously served in that office.

We need to do our historic duty in the early morning hours so that Americans across this Nation can wake up to the stories on the news that, finally, hope is on the way.

I said the other night when I was talking about this—Senator DODD put Vicki Kennedy's Washington Post column in the RECORD, and I am glad he did so—that this has been called many things. It has an official name. I am going to call it "Kennedy Care." I hope some others will too, because we do it because of the inspiration of a great friend, a great Senator, and a great statesman, Edward Kennedy, who I am sorry cannot be here to enjoy this historic moment. But he led us to this moment. As he said in one of his last columns he wrote about health care: We are almost there. In four hours, we will be there.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. HARKIN. Mr. President, first, I commend Senator DURBIN for his great leadership—he is our assistant majority leader—and for all of his handiwork on this bill. He has been one of our strongest proponents for making coverage more affordable for small businesses. He just spoke about that.

In fact, under the managers' amendment, we have expanded, even more than what we did in the original bill, credits for small businesses. These credits now start in 2010. They start next year. They are available to more small business firms than we had in the original bill—all of that, thanks to the hard work and intervention by Senator DURBIN.

I might note we have a provision also in the managers' amendment relating to cardiac care, congenital heart disease. I know Senator DURBIN had a personal tragedy in his own family because of that. So we now have a new program to track the epidemiology of congenital heart disease; it is section 10411, in case anyone is taking notes. It expands on research at NIH on congenital heart disease. We are grateful to Senator DURBIN for including that.

Basically, of all the things we have for consumer protection, consumers of America have no more dogged champion here in the Congress than Senator DURBIN of Illinois. No matter what it is we are passing here, Senator DURBIN always looks to see how consumers are affected. He has done that also on this health care bill, by making sure that consumers have better protections and health care is more affordable. I personally thank Senator DURBIN for all of his hard work on this bill.

As Senator DURBIN said, and as our leader, Senator DODD, said, in about 4 hours—a little less than 4 hours now—the historic vote will take place in the Senate. It will be the defining vote of my Senate career. That has been about 25 years, I guess, I have been here. It will probably be the defining vote for all of us during our tenure here in the Senate. It will be the cloture vote on the managers' package. From that we move forward.

I hope after that cloture vote, and after we take that cloture vote, the minority side would see fit, then, since we have the 60 votes, after we have crossed that hurdle, that perhaps they would be willing to close up the debate a little bit sooner than ending on Christmas Eve. But if that is their desire—I mean, they have the rules. We will abide by the rules. If the Republicans want to exercise every single right they have under the rules, they can keep us here until Christmas Eve. There is no doubt about it. But to what end, I ask? To what end?

We are going to have the vote at 1 o'clock that is going to require the 60 votes. Then why stay here until Christmas Eve to do what they know we are going to do, and that is to have the 60 votes on the managers' amendment, on the substitute, and on the underlying bill? I hope our Republican leader and others on the other side would perhaps see that it is not in the best interest of the Chamber, it is not in the best interests of the country.

I know one of the Senators on the other side was talking about waste today. I am thinking, you know, this is kind of a waste, that we are here yakking about this and doing it up until Christmas Eve, when we could collapse all these votes and get it done tomorrow. We could actually be done here tomorrow with this whole bill if the Republicans would see fit. Like I say, it is up to them. They can keep us here if they want to. But the managers' amendment we are going to vote on at 1 o'clock—again, I keep hearing all day today from the Republicans that they have not had a chance to read it, we are rushing it, and it just came out the other day. The Republicans had it read word for word. The few times I came on the floor during the reading, I didn't see many Republicans over there listening to it. You have to wonder, did they all go home and read it? They made the clerk read it. Why didn't they sit here and listen to it? They would have found out what was in it if they were so interested.

Anyway, this is all gamesmanship around here right now. People of America understand that, too. They know we are going to pass health reform, and the first vote is going to be at 1 a.m. this morning. I heard the Senator from Arizona earlier today talking about why should we have it at 1? Why can't we have it at 9 a.m. in the morning? He

said the majority leader, Senator REID, has the power. He could move it to 9 a.m. in the morning and we would not have to bring people here at 1 a.m. He referred to the Senator from West Virginia, Senator BYRD, by name—elderly, frail, but he shows up here to vote. But dragging him out of bed at 1 in the morning to come here? He said, Why don't we do it at 9 in the morning?

I thought that was a pretty good idea. When I got to the floor a couple of hours ago, I asked unanimous consent at that time that we have the vote at 9 a.m. but that the hours from 1 to 9 be counted for purposes of the 30 hours. The Republicans objected. So much for their concern for the Senator from West Virginia.

We are on the cusp. We are going to expand small business credits. We are going to reduce administrative costs. We are requiring insurance companies to spend 80 to 85 percent of their income on health care—on health care, not fancy corporate offices, not high, expensive CEO salaries of millions of dollars a year, not fancy jets, but 80 to 85 percent must be spent on health care and paying medical claims.

As Senator DURBIN said, we make major investments in community health centers—10,000 more community health centers in America. We are investing in the National Health Service Corps to get more young people to serve in the National Health Service Corps. We have new protections for patients, access to a primary care provider of their choice, and an important provision championed by the Senator from Maryland—I think Senator CARDIN—to provide access for women in their choice of an OB-GYN. In other words, they get to pick who their OB-GYN is, not their primary care provider, not the health insurance company, not anyone else. The individual woman can pick her own OB-GYN.

The amendment we have before us immediately allows children to stay on their parents' health insurance until they are age 26. The managers' amendment also prohibits insurance companies from imposing preexisting conditions on children up through the age of 18 right away, next year. Think about that. Think about what that means to a family who has a child who maybe was born with a defect—something that is chronic. The insurance companies tend to exclude them. Our bill says that beginning next year they cannot do that anymore to children. That is a big deal for so many families in this country who have kids who have been afflicted with a birth defect or maybe something happened, maybe they had an accident, maybe they had an illness early in life that has turned chronic. This is a very big deal for those families.

Last, for someone like me who represents a lot of rural areas and small towns, we have increased, in the man-

agers' amendment, more workforce. We are going to have more people for rural and underserved communities. We will increase the funding in the training programs for rural health providers, so small towns and rural areas of the country have a big boost in the managers' amendment.

We are going to put more money and more loan repayments for people who want to serve in underserved areas, in rural areas, to make sure they do not have to go someplace where they get a lot of money to pay back their debts for medical school. We are going to be providing some of those payments if they serve in a rural area, an underserved area.

I know we have now another hour to listen to the Republicans tell us why we ought to put this off for another century or so, I suppose. The people of America know the time has come now. We are committed to this. At 1 a.m., we will have the 60 votes, and we will get this passed before Christmas. It will be one of the best Christmas presents this Congress has ever given the American people.

I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. ENZI. Mr. President, the reason I wasn't on the floor for a large part of yesterday is I was wading through this amendment and also the CBO score and also the Joint Tax score. Then I had to talk to experts who could interpret what is in there. The American people don't have that privilege. They have to rely on the stuff they are hearing on the floor. I can tell you, they are pretty upset. I get letters and calls from all over the country saying: Stop this bill any way you can. Make them get it right. I have to tell you, some of those from other States, they are saying: My Senator is not listening to me. I am counting on you.

I rise to speak on the issue of the health care reform. I rise with a great sense of disappointment as I reflect on the debate that might have been. From the very start, I have said we need to reform our health care system. Everyone agrees we need real changes that will allow every American to purchase high-quality, affordable health insurance. Not a single one of my Senate colleagues on either side of the aisle supports the status quo. The argument that Republicans support the status quo is simply false. We understand the current system fails too many Americans. We want to support reforms that will provide real insurance options to all Americans and help lower the cost of that insurance. I have said from the start of this year—and, frankly, throughout my 13 years in the Senate—that true reform should be developed on a bipartisan basis so the legislation will incorporate the best ideas from both sides and will have the broad support of the American people. That

should be a prerequisite to any proposal that will affect nearly 20 percent of our Nation's economy and the health care of every single American.

Unfortunately, that was not the process followed in developing this bill. Instead, we have the Reid bill, which was developed in secret without the input of a single Republican. This morning an adviser to President Obama was asked about the partisan nature of this bill and the overwhelming opposition of the American people. His response spoke volumes of what is wrong with Washington today. He essentially responded that the American people don't understand what is in this bill and that once it is implemented, they will come to support it. In plain English, the White House is saying: Washington knows best. That attitude is part of the reason why support for Congress is at a historic low and why public support for this bill is so weak.

Instead of having a bill that will provide greater choices and reduce costs, we have a bill that will do the opposite. The Reid bill will deny consumers the ability to make choices and instead substitute the judgment of government bureaucrats who will decide what kinds of insurance you will be allowed to purchase. The bill also fails to address the most important issue for the majority of Americans. It fails to do anything to help reduce the cost of health care. President Obama promised the American people that health care reform would reduce health care costs. Yet this bill fails to deliver on the President's promise.

According to the President's own independent Medicare Actuary, this bill will actually increase how much we spend on health care. According to Rick Foster, the person from the administration who keeps track of all Medicare and Medicaid spending, the bill increases health care costs \$234 billion more than if we did nothing. That is a huge cost.

In addition to increasing total costs, the Reid bill will increase our national debt and threaten the health care provided to millions of Medicare beneficiaries. Some of my Democratic colleagues are going to come down to the floor and argue that the Reid bill will reduce the deficit and extend the solvency of the Medicare Program. They have been doing that for days. They will even cite the Congressional Budget Office to support their arguments. I hope every American hears those arguments and remembers a few inconvenient truths my Democratic colleagues are going to forget to mention. The way my colleagues on the other side of the aisle were able to force CBO to conclude that the Reid bill will not increase the deficit was by requiring them to use budget gimmicks and assumptions that would make Bernie Madoff blush.

Every time you hear one of my Democratic colleagues argue that the

bill reduces the deficit, you should ask that Senator if he believes that Medicare will cut physician payments by 21 percent in March. That is right. While the Reid bill cuts over \$470 billion from the Medicare Program, it will also require that every doctor treating Medicare patients have his or her payments cut by 21 percent in just 2 months. That is what CBO had to assume when they did their estimate. If you believe Congress will never allow this to happen—and we never have—you cannot believe this bill will actually reduce the deficit. The truth is Congress has never allowed that level of cut. Senate Democrats, however, chose to ignore this reality and relied on the promise of a cut to make their bill add up. You should also ask my Democratic colleagues if they believe that Medicare payments to doctors will be cut more than 45 percent over the next decade.

Again, that is what the Reid bill required CBO to assume. If you don't think that will happen, then you cannot believe this bill reduces the deficit.

You should also ask my Democratic colleagues if they think that within a decade one out of every five hospitals, nursing homes, and home health agencies will be operating at a loss because of the unsustainable payment cuts in this bill. We just got a revised CBO estimate that says there was a little error there, and so there will be less savings by \$600 billion. According to the administration's Actuary, Rick Foster, that is exactly what is going to happen if the Reid bill is enacted. He said if these policies have to be modified, such changes would likely result in smaller actual savings. This means this bill will not reduce the deficit.

Finally, you should ask anyone arguing that this bill reduces the deficit whether they believe Medicare patients will not be able to get the care they need. Again, the administration's own Actuary says payment cuts in the Reid bill could jeopardize access to care for beneficiaries. I do not know if my colleagues believe these things will happen. Taking note of these facts pushes up the total cost of the bill well over \$1 trillion and destroys any pretense of budget balance. Unless all the things CBO was required to assume actually happen, this bill will actually increase the deficit.

Health care reform has to be truly paid for. Why? Because the Federal Government has maxed out its credit cards. Our out-of-control spending is now even driving down the value of our money. As the government borrows more money to finance even more spending, the devalued dollar will drive up the cost of goods. Oil is a good example. Take a country such as Saudi Arabia, which is already raising prices for their oil to compensate for the lower value of our dollars. This means every American will end up paying more for a gallon of gas because of our

failure to address growing deficits. If we are going to enact real health reform, we need to use honest accounting and not budget gimmicks and fake assumptions that we all know will not happen.

We should pay for expenses such as fixing doctors' Medicare payments, and we should not delay the start of spending 4 years after the start of the new taxes just to make the bill look good over 10 years.

The problem for the President and my Democratic colleagues is their bill is being sold on the strength of accounting tricks that make it appear that it will not add to the deficit. In case they have not noticed, they are not fooling the American people. It showed up in August. It showed up every time since then. That is why we are not getting to go home on weekends. We don't want the Democrats to hear from the people at home who are upset about this.

In a recent poll, 68 percent of Americans said they believe the Democrats' health reform bill will increase the deficit. They are right. The American people understand that if the Reid bill is enacted, deficits will increase. They are right. The same is true for the claims that the Reid bill will extend the solvency of the Medicare Program or reduce beneficiary premiums. That can only happen if you make all the assumptions I previously described. If you don't believe those things will actually happen, then this bill will do nothing to extend Medicare or lower premiums.

Besides driving up the deficit, the Reid bill will also eliminate more than 1 million jobs. The mandate that employers offer health insurance or pay a penalty will be a massive new job-killing tax. Our national unemployment rate is at 10 percent. The majority leader is attempting to cut off debate on a bill and force its passage before Christmas, again, because he doesn't want the people to hear what is happening, but we are going to see that that does happen—that will force employers to eliminate jobs and reduce wages. Businesses do not deny health care to their employees because they are cruel or mean-spirited. They do it because they can't afford it.

Most businesses that do not provide coverage do so because they cannot afford health insurance. They can't afford it for their employees or for their own families. They have looked at the cost and figured out they cannot pay for health care and still stay in business. The Reid bill fails to do anything to actually lower the cost of health insurance, which might mean these businesses could actually afford health insurance. Instead, it will place a new tax on these businesses, which the CBO has said will lead to these businesses reducing wages for their workers and

eliminating jobs. That is why the National Federation of Independent Business, which represents small business across America, estimated the Reid bill would cause 1.6 million jobs to be eliminated. That is why they said the Reid bill will create a reality that is worse than the status quo for small business.

The worst thing about the Reid bill is not how it will increase the deficit or kill 1 million American jobs. The worst thing about the Reid bill is it will reduce the quality of health care we all receive. No longer will you and your employer be able to choose the health insurance that best meets your needs. The government will tell you what kind of insurance you have to buy, and if you don't, you are told the government will place a fine on you. Under the Reid bill, the government will tell your health plan which types of doctors they have to contract with, irrespective of whether that is a doctor you want or need to see. The Reid bill also traps 15 million Americans in the worst health care program in America. Approximately half the people who get the promised health care coverage under the Reid bill will get it through the broken Medicaid Program.

States already use price fixing to limit how much they have to pay doctors under the Medicaid Program. That is why as many as 40 percent of all doctors will not see Medicaid patients. I have said, if you can't see a doctor, you don't have health care. Yet that is exactly what the Reid bill will do: Promise 15 million people coverage but trap them in a system where we know they will not be able to get the care they need.

If anyone doubts what effect the Reid bill will have, they only need to look at Massachusetts. The Massachusetts plan was the model for many of the reforms in this bill. The problems they are encountering give us a good indication of what will happen to us all if the Reid bill is enacted.

To make the Massachusetts reforms work, they now have a 10-member commission trying to impose a global payment system. Under this system, doctors and hospitals will be forced to join large networks and be paid at a set rate for each patient. This is the same kind of government control we already see with Medicaid. The results of these changes are equally predictable. Fewer doctors will be willing to see people at the exact time when the number of people seeking care is increasing.

These are just some of the more serious problems with this bill. Because many of my colleagues want to be able to discuss the problems with this bill, I have limited my remarks for now. Because the bill was drafted behind closed doors and thrust upon the American people without time to consider all the ramifications, I am sure we will find more problems with the legislation after this rushed vote.

Over the next few days, I plan to lay out specific and concrete alternatives to how we could do better. I have been doing that for a long time, but they have not been accepted. Republicans have many ideas on how to make this bill better, including several that have bipartisan support. However, if Senator REID is successful in cutting off debate, we will never get the chance to discuss any of these ideas.

Health care reform is too important for too many Americans to be rammed through the Senate with little or no debate on the weekend before Christmas. It appears my colleagues understand how deeply unpopular this bill is with the American people, and they want to force it through when they believe most Americans are not paying attention. I wish to assure my Democratic colleagues that the American people are watching, and the voices of August will only grow louder. They will remember the vote to cut off debate on this bill for a long time because they understand what it will mean for their health care and the future of this country. The person with whom I served in the Wyoming Legislature sent me a little note and said: If it is broken, don't break it more. That is what we are doing.

I have some articles I wish to include in the RECORD. One is by Howard Dean that suggests this reform falls short. Of course, he is the former chairman of the Democratic National Committee. Another is an editorial by Matthew Dowd, a political analyst for ABC News, who talks about the danger of success and where the polls are on this and says:

If this legislation passes, Democrats will be held accountable for any failures or problems in the system. So if any Americans' insurance premiums rise, they will blame the Democrats. If patients have to wait in line at emergency rooms, it will be seen as the Democrats' fault. If health care costs don't drop, the Democrats will face the wrath of the electorate.

I also have an editorial by E.J. Dionne, Jr., about Democratic fratricide and an article by George Will, where he says "More talk, less support." The more we talk, the less support there is for this bill.

Finally, I have an editorial by David Broder, of December 18, 2009.

I ask unanimous consent to have these articles printed in the RECORD.

There being no objection the material was ordered to be printed in the RECORD as follows:

[From the Washington Post, Dec. 17, 2009]

REFORM THAT FALLS SHORT

(By Howard Dean)

If I were a senator, I would not vote for the current health-care bill. Any measure that expands private insurers' monopoly over health care and transfers millions of taxpayer dollars to private corporations is not real health-care reform. Real reform would insert competition into insurance markets, force insurers to cut unnecessary adminis-

trative expenses and spend health-care dollars caring for people. Real reform would significantly lower costs, improve the delivery of health care and give all Americans a meaningful choice of coverage. The current Senate bill accomplishes none of these.

Real health-care reform is supposed to eliminate discrimination based on pre-existing conditions. But the legislation allows insurance companies to charge older Americans up to three times as much as younger Americans, pricing them out of coverage. The bill was supposed to give Americans choices about what kind of system they wanted to enroll in. Instead, it fines Americans if they do not sign up with an insurance company, which may take up to 30 percent of your premium dollars an spend it on CEO salaries—in the range of \$20 million a year—and on return on equity for the company's shareholders. Few Americans will see any benefit until 2014, by which time premiums are likely to have doubled. In short, the winners in this bill are insurance companies; the American taxpayer is about to be fleeced with a bailout in a situation that dwarfs even what happened at AIG.

From the very beginning of this debate, progressives have argued that a public option or a Medicare buy-in would restore competition and hold the private health insurance industry accountable. Progressives understood that a public plan would give Americans real choices about what kind of system they wanted to be in and how they wanted to spend their money. Yet Washington has decided, once again, that the American people cannot be trusted to choose for themselves. Your money goes to insurers, whether or not you want it to.

To be clear, I'm not giving up on health-care reform. The legislation does have some good points, such as expanding Medicaid and permanently increasing the federal government's contribution to it. It invests critical dollars in public health, wellness and prevention programs; extends the life of the Medicare trust fund; and allows young Americans to stay on their parents' health-care plans until they turn 27. Small businesses struggling with rising healthcare costs will receive a tax credit, and primary-care physicians will see increases in their Medicare and Medicaid reimbursement rates.

Improvements can still be made in the Senate, and I hope that Senate Democrats will work on this bill as it moves to conference. If lawmakers are interested in ensuring that government affordability credits are spent on health-care benefits rather than insurers' salaries, they need to require state-based exchanges, which act as prudent purchasers and select only the most efficient insurers. Sen. John Kerry (D-Mass.) offered this amendment during the Finance Committee markup, and Democrats should include it in the final legislation. A stripped-down version of the current bill that included these provisions would be worth passing.

In Washington, when major bills ear final passage, an inside-the-Beltway mentality takes hold. Any bill becomes a victory. Clear thinking is thrown out the window for political calculus. In the heat of battle, decisions are being made that set an irreversible course for how future health reform is done. The result is legislation that has been crafted to votes, not to reform health care.

I have worked for health-care reform all my political life. In my home state of Vermont, we have accomplished universal health care for children younger than 18 and real insurance reform—which not only bans

discrimination against preexisting conditions but also prevents insurers from charging outrageous sums for policies as away of keeping out high-risk people. I know health reform when I see it, and there isn't much left in the Senate bill. I reluctantly conclude that, as it stands, this bill would do more harm than good to the future of America.

THE DANGER OF SUCCESS

(By Matthew Dowd)

President Obama needs an exit strategy. I am not referring to Afghanistan or Iraq (though there are quite a few similarities between the situation Obama is in on health-care reform and the political difficulties President George W. Bush faced on Iraq). Congressional Democrats and Obama are headed toward a "catastrophic success" politically if they pass health-care reform in its current legislative form. And catastrophic success was a term then-President Bush used on Iraq when he acknowledged the great initial victory but didn't take into account the long-term calamity and costs.

I am not seeking to argue the substance of health care and the merits or demerits of the bills, and will leave that to experts in policy and its effects. I am talking about the politics of the legislation and the effect it is likely to have on Obama and Democrats in Congress.

Unlike many other pundits and political experts in both parties, I think that passage of a bill by the Democrats at this point will be politically damaging to both the president and congressional Democrats. Conversely defeat of the legislation is much more likely to hurt Republicans in Congress.

The latest Post-ABC News poll shows the president's overall approval rating at a new low of 50 percent—about the rating President Bush had going into the November 2004 election, when Democrats said Bush was ripe for defeat.

There are many reasons for this drop in support for Obama. The stagnant economy is the biggest factor, but close behind is the fact that the administration is pushing health-reform efforts that have polarized the electorate, and that independent and swing voters have moved against in large measure.

As Wednesday's Post-ABC poll shows, a majority of Americans believe that if this bill passes, their healthcare costs will rise, the federal deficit will increase, the costs of the overall health-care system will climb, and their own care would be better if the system stays as is. Democrats (including former president Bill Clinton) claim that they need this bill to pass for political reasons. But let's examine that. At present, a majority of Americans are against the effort, the legislation lacks bipartisan support, the costs of the reforms are upfront, and the benefits won't kick in until after the 2012 elections. When has that ever been a formula for political success?

If this legislation passes, Democrats will be held accountable for any failures or problems in the system. So if Americans' insurance premiums rise, they will blame the Democrats. If patients have to wait in line at emergency rooms, it will be seen as the Democrats' fault. If health-care costs don't drop, the Democrats will face the wrath of the electorate.

Many Democrats, including people in the administration, blame poor marketing for their difficulties in passing health reform. They say they haven't gotten the message out. But advocates of reform have spent millions on advertising and lobbying this year. And Obama, who many say is the best orator

ever to occupy the White House, has pushed for this legislation constantly over the past six months. In that time, support for Obama's handling of health-care reform has dropped by more than a net of 30 points.

Yet before Republicans cheer that they may defeat this effort, they should beware what they wish for. A vast majority of Americans still believes that we need fundamental health-care reform. If the legislation fails, Democrats can blame Republicans by saying reform was in sight and the GOP blocked it without offering a real alternative to decrease costs and increase access.

The dominant issues today are the economy and jobs, and the public doesn't see either party making these a real priority. Further, polls show trust in government handling of domestic issues remains at historic lows. What most voters hear from Washington these days is squabbling over health reform involving a government role they don't trust and don't want.

My advice? Leaders in Washington ought to concentrate on what matters to Americans, not on what they think should matter to voters. Come up with a health-care bill that draws real bipartisan support. And before pushing a bigger role for government, begin to restore trust in the government's ability to do even small things. Democrats pushing so hard for success on health care could find themselves in a situation resembling President Bush's situation on Iraq. They could topple the statue and win the day, but lose politically over the coming months and years.

DEMOCRATIC FRATRICIDE

(By E.J. Dionne, Jr.)

Here's what Democrats need to ponder: Can they prosper in the absence of George W. Bush?

His presidency was a tonic for Democrats and led to a blossoming of political creativity on the center-left not seen since the 1930s. No tactic, no program, no leader ever did more to catalyze the party than the rage Bush inspired.

The whole effort was summarized nicely by the party's slogan in 2006, "A New Direction for America." There was no need to specify north or south, east or west, up or down. Compared with Bush, any alternative destination seemed appealing. And by becoming the apotheosis of the fresh and the new, Barack Obama emerged as the most attractive guide to this unknown promised land.

The consequence is that Democrats must govern in one of the most difficult periods in American history while managing a sprawling coalition and working through a political structure near the point of breakdown—largely because of the dilapidated state of that dysfunctional and undemocratic partisan hothouse, the United States Senate.

Especially if you take into account the scope of the problems confronted, Democrats could argue they are doing pretty well. It's no small thing to save the economy from collapse. Winding down two wars is no picnic.

But politically, the Democrats are in trouble. They are at one another's throats over healthcare legislation that should be seen as one of the party's greatest triumphs. They are being held hostage by political narcissists and narrow slivers of their coalition.

When Democrats make deals, they are accused of selling out. When they fail to make deals, they are accused of not reaching out. Moderates complain that their party has gone too far left. Progressives chortle bitterly at this, asking: What's left-wing about policies that shore up banks and protect drug companies?

Rural-state centrists insist on more fiscal discipline—as long as it doesn't affect farmers and small-town hospitals. Progressives ask why debt should be the priority when so much more needs to be done to relieve unemployment.

This is a recipe for political catastrophe. An increasingly bitter and negative Republican Party may not be able to win the midterm elections, but Democrats definitely can lose them.

Their fractiousness is dispiriting to their supporters, which set off this urgent warning bell in the latest Post-ABC News poll: For the first time in his presidency, more Americans strongly disapprove of Obama's performance in office (33 percent) than strongly approve (31 percent).

Putting aside margins of error and the fact that the Dec. 10-13 poll showed a sudden bump in Republican identification, that might be a statistical anomaly. The point is that the trend is perilous. In June, strong approvers of Obama outnumbered strong disapprovers 36 percent to 22 percent. Ardor and energy are switching sides.

There are no instant cures, but there is one thing that must be done fast: Democrats need to agree on a health bill and sell it with enthusiasm and conviction. Their own turmoil and back-stabbing are making what is a rather good plan look like a failure while convincing political independents that they are a feuding gang rather than a governing party.

They have to focus in 2010 on immediate job creation and long-term economic mobility while explaining how aggressive measures to boost the economy now go hand in hand with eventual deficit reduction.

Congressional moderates must understand that their fate is linked with the party's ability to govern, and grass-roots progressives have to be less on a hair trigger to shout betrayal. (I wish I knew what to do about Joe Lieberman.)

For his part, Obama has not appreciated until recently how closely he has been tied to Wall Street and the banks. He has been too reluctant to underscore how much of Washington's dysfunction has been pushed to new levels by the Republican Party's decision to grind the Senate to a halt. He has tried to make clear the size of the mess he inherited from Bush, but has not sold the country on the extent to which he has begun to clean it up.

Americans may not be sold on anything until unemployment starts dropping. Even then, Democrats will have a tough time making the sale if the process that produced the health-care bill comes to define the image of how they govern the country. Democrats have every right to blame Bush for the fix we're in. They can't blame him for the problems they're creating for themselves.

MORE TALK, LESS SUPPORT

(By George F. Will)

Rushing to lock the nation into expensive health-care and climate-change commitments, Democrats are in an understandable frenzy because public enthusiasm for both crusades has been inversely proportional to the time the public has had to think about them. And the president pushing this agenda has, with his incontinent hunger for attention, seen his job approval vary inversely with his ubiquity. Consider his busy December—so far.

His Dec. 1 Afghanistan speech to the nation was followed on Dec. 3 by his televised "jobs summit." His Dec. 8 televised economic speech at the Brookings Institution was

followed on Dec. 10 by his televised Nobel Peace Prize acceptance speech, which was remarkable for 38 uses of the pronoun "I."

And for disavowing a competence no one suspected him of. ("I do not bring with me today a definitive solution to the problems of war." Note the superfluous adjective) And for an unnecessary notification. ("Evil does exist in the world.") And for delayed utopianism. ("We will not eradicate violent conflict in our lifetimes." But in someone's.) And for solemnly announcing something undisputed. (There can be a just war.) And for intellectual apoplexy that should get speechwriters fired and editors hired. ("We do not have to think that human nature is perfect for us to still believe that the human condition can be perfected." If the human "condition" can attain perfection anyway, human nature cannot be significantly imperfect.)

Then on Dec. 13, he was on "60 Minutes" praising himself with another denigration of his predecessor, a.k.a. "the last eight years." (Blighted by "a triumphant sense about war.") When Attorney General Eric Holder announced last month that five suspected terrorists would be tried in federal courts, he said: "After eight years of delay. . . ." When the U.S. Preventive Services Task Force made the controversial recommendation that women should get fewer mammograms, Secretary of Health and Human Services Kathleen Sebelius said: This panel was appointed by the prior administration, by former President George Bush." In congressional testimony, Treasury Secretary Timothy Geithner almost deviated from the script. He said the Obama administration began after "almost a decade"—slight pause—"certainly eight years of basic neglect."

Abroad, the fruits of the president's policy of "engagement" have been meager: Witness Iran continuing its nuclear program and China being difficult about carbon emissions. Here is a history lesson for an administration that, considering itself the culmination of history, is interested only in the past eight years of it:

At a Vienna summit in June 1961, President John Kennedy, fresh from his Bay of Pigs fiasco, was unnerved by the brutal disdain of Soviet Premier Nikita Khrushchev, who considered Kennedy callow. Britain's Prime Minister Harold Macmillan astutely noted that Kennedy had "met a man who was impervious to his charm."

A person can be a novelty only once, and only briefly, and charm, like any commodity, when used uneconomically, becomes a wasting asset. All this is pertinent to the Senate health-care debate, now coming to a curious climax amid another glut of careless grandiosity.

Supporters of the Senate bill say it will insure the uninsured. The Congressional Budget Office says 24 million of the 46.3 million uninsured will remain so. Supporters say it will lower aggregate and individual health-care spending. The government's Centers for Medicare and Medicaid Services says the nation's health-care spending and insurance premium costs will increase.

Today there are more independents than Democrats, more independents than Republicans, and according to a recent Gallup poll, independents approval of the Democratic-controlled Congress (14 percent) is lower than Republicans' approval (17 percent). This is partly a function of the majority party's health-care monomania. Consider what happened recently in Kentucky.

There a Republican candidate succeeded in nationalizing a state Senate race. Hugely

outsent in a district in which Democrats have a lopsided registration advantage, the Republican, by 12 points, won a seat in Frankfort by running against Washington—against Nancy Pelosi, Harry Reid and their health-care legislation.

A CNN poll shows 36 percent of the public in favor of what the Democratic Senate is trying to do to health care, 61 percent opposed. It is clear what the public wants Congress to do: Take a mulligan and start over.

So Republicans can win in 2009 by stopping the bill or in 2010 by saying: Unpopular health-care legislation passed because of a 60-40 party-line decision to bring it to a Senate vote. Therefore each incumbent Democrat is responsible for everything in the law.

DISHING OUT SOME SHOCK ON DEBT

(By David Broder)

The 34 names are familiar to anyone who has followed economic policy in Washington for the past generation, one-third of them former chairmen or members of key committees of Congress, seven of them former comptroller generals of the United States, seven of them former directors of the Congressional Budget Office and one of them—Paul Volcker—the former chairman of the Federal Reserve System and now an adviser to President Barack Obama.

Both political parties are well represented in their number. But they came together this week as signatories of a nonpartisan manifesto, essentially a stark warning to the president and Congress and a plea for action on behalf of the next generation.

The United States, they unanimously said, is facing "a debt-driven crisis—something previously viewed as almost unfathomable in the world's largest economy."

Under the impact of the worst economic calamity since the Great Depression, the federal government ran a deficit of \$1.4 trillion this past year. The rescue effort was necessary, but in 2009 alone, the public debt grew 31 percent from \$5.8 trillion to \$7.6 trillion, rising from 41 percent to 53 percent of gross domestic product (GDP).

Unless strong remedial steps are taken, the debt is projected to rise to 85 percent of GDP by 2018 and 100 percent four years later. Barely a dozen years from now, these deeply experienced folks say, the American economy will likely be in ruins.

All of us have become accustomed to hearing lamentations about the changes in the annual budget deficits, the gap between federal revenues and spending in a particular year. But this commission deliberately shifted its focus from the deficit to the underlying debt.

The reason was explained to me by Alice Rivlin, formerly a director of both the Congressional Budget Office and the Office of Management and Budget. "Previously, when we were worried about deficits, we could take comfort in the fact that the debt was not very high relative to the economy," she said. "But now that debt has shot up. The cushion has gone. If the same thing (a severe recession) happened again, we wouldn't be able to borrow to deal with it."

In addition to robbing us of the flexibility to deal with future crises, the rapidly rising debt level could push up interest rates, threatening economic recovery, slow the growth of wages, depress living standards, make the United States even more dependent on foreign lenders and leave us vulnerable to a shock wave if those lenders lose confidence in our ability to repay the loans.

These experts—writing under the auspices of the Peter G. Peterson Foundation, The

Pew Charitable Trusts and The Committee for a Responsible Federal Budget—suggest a series of steps.

First, they want Obama in his State of the Union address to urge Congress to join in a pledge to stabilize the debt, at no higher than 60 percent of GDP, by 2018. This would require actions by both Congress and the administration to start reducing the projected annual deficits, which add to the debt. That would make debt-management an economic priority once the effects of the current severe recession have eased. To assure the pledge is kept, those who signed this report would ask Congress and the president to set up an enforcement mechanism that would automatically reduce spending or increase taxes when the debt target is missed in any year between 2012 and 2018.

This is stiff medicine, but the message of this report is that temporizing on this issue poses such perils to the nation's future that the risk is unacceptable.

When Congress this week ducked its responsibility again by deciding to enact a temporary, two-month increase in the debt ceiling, the need for a shock treatment like this report could not be plainer.

Mr. ENZI. I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mr. CORNYN. Mr. President, I thank the Senator from Wyoming for his important leadership. He is absolutely right. As much as we would all like to be home with our families, especially at this time of year, this battle to inform the American people about what is about to happen to them is too important for us to simply give up or acquiesce to what the Senator from Iowa seems to think is inevitable.

There is nothing inevitable about this. The only thing I think inevitable about it is, in light of the unpopularity of what is being jammed down the throats of the American people, there will be a day of accounting. We do not know when that day of accounting will be. Perhaps one of the first days of accounting will be election day 2010. I do not understand how people who are elected to represent their constituents can try to impose something that is so obviously unpopular with their constituents and expect somehow to be patted on the back and told: Well, you are right, you are smarter than we are. You do know better than we do what is better for our families and what we ought to be limited to when it comes to health care choices.

I think that is an upside down way of looking at the world. Maybe that is the reason why we have such disparate views of what we are engaged in here. Clearly, on the other side of the aisle, they believe that government is the answer. They believe government can do a lot better than the private sector in providing choices and providing cost controls. Well, the only way government can do that, of course, is by price controls, which we have seen happen in Medicare and Medicaid, which have not worked very well. Here we are 5 days before Christmas, and we are going to be having a vote tonight at 1 a.m. on a

2,733-page health care bill that we got yesterday morning. We do not know what is in the bill. We are still reading, and apparently the Congressional Budget Office is still trying to figure out the impact of the bill. They have already had to correct one mistake because they are being asked to rush to judgment on this bill that will affect one-sixth of our economy and all 300 million Americans.

But we do know this: We do know it will cut Medicare by \$470 billion. Medicare is paid for by employers and the workers into a trust fund, and that trust fund is going to be pilfered, robbed, in order to create a brandnew entitlement program that the beneficiaries of that entitlement program never paid for as did the beneficiaries of Medicare. That is one part of this. We also know it is going to increase taxes by \$518 billion.

We already know President Obama's promise as to people making less than \$250,000 a year will not be kept under this bill, and that this bill, according to the National Federation of Independent Business, will impact small businesses and their ability to create jobs and retain workers during one of the worst recessions we have had in this country.

Then, of course, we know this bill—without the phony accounting gimmicks, such as implementing a bill 4 years into a 10-year budget window—will actually fail in universal coverage. It will leave 23 million people uninsured, and it will cost roughly \$2.5 trillion, and it will increase the cost of premiums for people who already have insurance.

What is so disgusting about this process is, this exactly confirms the most cynical view that the American people have about Congress and Washington, DC. Rather than a change in that process—one that is more transparent, one in which everybody's views are considered, and where we try to come together in a bipartisan consensus for a solution—this is going to be passed strictly along party lines by a political party and by their leadership who apparently care more about chalking up a victory, albeit a Pyrrhic victory, rather than listening to their constituents. The American people want Washington to start over again. Fifty-six percent of voters in this most recent poll said they want us to stop this bill and start over.

We know this process is a product of deals struck behind closed doors with special interest groups and their lobbyists. The pharmaceutical industry got 24 Democrats to switch their votes on reimportation. What is that all about? To preserve a special deal cut behind closed doors? The insurance industry will get \$476 billion of tax money from this bill. Then other parts of the health care community are going to be exempted from cuts by the payment advi-

sory board because they cut their deal behind closed doors. We know this bill is being attempted to be jammed through when most people are spending time with their families because of the Christmas season.

Even the distinguished majority whip, last week, said: I am in the dark almost as much as other Senators are. He said: I am in leadership. So this bill has been written with a small group of people behind closed doors, including the Senator from Nebraska, who spent 13 hours—13 hours—on Friday behind closed doors with Democratic leadership and White House officials. In the meantime, we are left completely in the dark as to what is in this bill other than what we could glean in the limited time we have been given.

After the ill-fated stimulus bill passed in the first part of the year, I remember we got that bill about late Thursday night, and then we were asked to vote on it less than 24 hours later—less than 24 hours later. We—like that—spent \$1.1 trillion, including the interest, in this stimulus bill that was supposed to keep unemployment below 8 percent. Well, we know how well that worked with unemployment going as high as 10.2 percent and now at 10 percent. One thing the American people told us after that is, they want us—well, I almost hate to say it, it seems so simple and straightforward—they want us to read the bill. They want us to understand the bill. They want to be able to read it and understand it before they give their consent to our voting for it. They want to know what the impact is going to be on their coverage. Is it going to raise their taxes? Is it going to raise their premiums? Is it going to cut into their Medicare benefits? If you are a Medicare Advantage beneficiary, we know it will for 11 million Americans, including half a million in Texas.

Then there was this discussion, and I guess this is all for show too. This was not, obviously, a sincere effort where we had eight Democrats who wrote a letter on October 6 to the majority leader and said they want the bill 72 hours before the first vote. Well, guess what. This historic vote we are going to have at 1 in the morning will occur 40 hours, roughly, after we got the bill. So much for 72 hours. We know the CBO, the Congressional Budget Office, score, the cost, their estimate, even with the phony assumptions that are included in this bill, will only be available for 37 hours.

Then we find out there are other sweetheart deals which makes this begin to stink to high heaven—things such as special legislative language saying the State of Nebraska—the State of Nebraska—gets a special pass from new Medicaid mandates. Vermont and Massachusetts have special deals. Then there is a \$100 million earmark for an unknown hospital. Boy, I cannot

wait to find out what that is about. Those are just some of the sweetheart deals we know are in these bills, and I am sure there are more we will find out about.

This process has gone too fast and gone too far off track. It reminds me of what Rahm Emanuel, the President's Chief of Staff, said when they jammed through the stimulus bill earlier this year. He said: A crisis is a terrible thing to waste.

It is one thing if we were acting in response to a crisis in a responsible manner, but what this is going to do is make it even worse, as the Senator from Wyoming pointed out.

I think people listening—the 56 percent and growing number of Americans who are concerned about this deal—are wondering: Are the politicians in Washington more interested in jamming this through or getting it right?

Senator OLYMPIA SNOWE from Maine, a member of the Finance Committee—the one Republican to vote for the Finance Committee bill—said she will not vote for cloture on this bill at 1 this morning because this is simply an arbitrary deadline. Oh—and guess what—most of the provisions do not kick in for 4 years. So why are we doing this literally in the dead of night on a phony timetable?

We know according to experts, such as the dean of the Harvard Medical School—he said:

In discussions with dozens of health-care leaders and economists, I find near unanimity of opinion that, whatever its shape, the final legislation that will emerge from Congress will markedly accelerate national health-care spending rather than restrain it.

You do not have to go to Harvard to figure that out. Just go to Houston, TX. A small business owner in Houston wrote to me and said:

The proposed Health Care bill is going to have a negative impact on my business because the cost of employee health insurance will go up.

... I don't believe what some are saying that costs will go down. ... This bill does not make economic common sense.

Those are true words from a small business owner in Houston, TX, who I suspect has a greater understanding of what this bill will be than some of the so-called experts here inside the Beltway.

We know from the Congressional Budget Office, though, that the premiums for an average American family under this bill will go up \$2,100 a year for those purchasing insurance on their own in the so-called individual market.

An independent study talked about premiums in Texas specifically and said premiums in Texas, for those who purchase insurance on their own, will go up for 61 percent—61 percent—of Texans purchasing insurance on their own, that their premiums will go up under this bill. What in the world are we doing? Under the Reid bill, a family

of four in Houston would see their premiums more than double to \$1,352 a month.

I find it supremely ironic that perhaps the next vote we will have here on the Senate floor, after this health care bill, is going to be a vote to increase the statutory debt limit because Congress has maxed out its credit card. Currently our credit limit is \$12 trillion, and now that is not enough because of unwise and reckless spending such as that reflected here in this bill. I find that supremely ironic. But I suspect there are a lot of Americans who find it very sad and even scary.

We know in a time when people are struggling to keep their job, when businesses are struggling to keep their employees rather than have to lay them off and make the unemployment statistics even worse, when people are losing their home because they no longer have a job, this bill will be a job killer.

The only way this is going to be paid for—the pay-or-play mandates put on businesses—is for businesses to take some of the money they would have used to hire new employees and pay this new punitive tax being imposed by the Federal Government.

Businesses in Texas know this is true. The Lubbock Chamber of Commerce said:

An employer mandate would be a “job killer”, raising the costs of maintaining a workforce. . . .

. . . small businesses and our consumers will be the ones who suffer. . . .

Then there is this Medicaid expansion that Senator ENZI from Wyoming talked about. There is an unfunded mandate here because Texas did not get the sweetheart deal that Louisiana or Nebraska or Vermont or Massachusetts got—an unfunded mandate of \$21 billion over 10 years. So not only are people's Federal taxes going to go up, they are going to wreck the State budget too by pushing aside other priorities such as public education and the like—totally irresponsible.

Then there is a so-called Nelson amendment on abortion that was supposed to strike a “compromise.” Well, one of my other constituents, Cardinal Daniel DiNardo, who leads Texas' largest archdiocese and is chairman of the U.S. Conference of Catholic Bishops' Committee on Pro-Life Activities, said this:

[T]he legislation will be morally unacceptable “unless and until” it complies with longstanding current laws on abortion funding such as the Hyde amendment. . . .

. . . This legislation should not move forward in its current form. It should be opposed unless and until such serious concerns have been addressed.

I am staggered at what we are about to witness here, at the sheer irresponsibility of the way this is being done, with artificial deadlines, votes in the dead of night, bills cooked up behind closed doors as special deals jammed down the throats of the American people who do not want it.

I yield the floor.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. THUNE. Mr. President, I appreciate the comments of my colleague from Texas, and my colleague from Wyoming prior to that. Many have come down here, as our colleagues on our side have, day after day, time after time, and continue to point out what we believe is wrong with the approach that is being taken by the majority, and also pointing out where we would do things differently.

Remember, this is the first bill: 2,100 pages long; \$1.2 billion per page; \$6.8 million actually per word. Then yesterday, we got the managers' amendment: another 400 pages. You add yet another amendment that is going to go on this stack, and you are talking about 2,700 pages of bill language.

What I think is interesting—and I see a pattern emerging here almost every single day—it is like *deja vu* all over again. The other side comes down here and talks about the need for health care reform, which we all concede. We all believe we need to reform health care in this country. We all hear from our small businesses. We all hear from individuals and families who are having a difficult time keeping up with the high cost of health care. So that is something on which there is broad agreement on both sides. Yet that seems to be sort of the MO for the other side, to come down here and talk about how we need to do health care reform. We agree with that.

The other strategy is to come down here and attack Republicans for not having their own ideas. We have been trying to offer amendments to this bill forever. We had several amendments offered today. We asked consent to bring up amendments, to get them pending, to get them voted on. They were blocked by the other side. We have full alternatives to the current bill. Senator BURR and Senator COBURN have an alternative, a comprehensive alternative they would like to offer, being blocked by the other side.

So the recurring pattern that has emerged day after day in the debate in the Senate is Democrats come down here and talk about how bad the current system is and point out examples of those who are falling through the cracks in the current system. Exactly. We agree with that. We have acknowledged there is a problem. They come down here and attack Republicans for not having alternatives. In fact, the Senator from Rhode Island this afternoon essentially said that Republicans have been coming down here and telling lies.

What the Republicans have been doing day after day after day is coming down and talking about the bill and the impact the bill would have on health care delivery, the impact the bill would have on the economy, the

impact the bill would have on small businesses and their ability to create jobs. We have been talking about the Congressional Budget Office report that describes the cost of the bill and goes into great detail about how it will impact individual families as well as the overall cost of health care in this country. We have come down here day after day to talk about the CMS Actuary's report, the Center for Medicare Services, about the cost of the bill and how it would impact the cost of health care in this country. So we continue to come down here and talk about the bill.

The other side—the one thing they don't do is they don't come down here and talk about the bill. I don't hear Democrats coming down here and offering full-throated defenses for this bill, because the bill is indefensible. It is 2,700 pages, and it doesn't do anything to lower the cost of health care, according to the Congressional Budget Office.

So we come down here day after day and talk about the Congressional Budget Office report, come down here and talk about the CMS Actuary's report. They come down and talk about how bad the current system is, say this is going to fix it, but then when they are challenged on the CMS Actuary's report and the Congressional Budget Office report, they can't defend that.

What they should be doing instead of accusing the Republicans of telling lies and attacking Republicans is accusing the CMS Actuary and the Congressional Budget Office. They ought to be coming down and attacking them because all we are doing is pointing out the facts as they pertain to the current bill that is before the Senate, this 2,700 pages right here.

What I would like to point out are some of the promises that have been made by the President and by Democrats with regard to this bill.

The President made it very clear, when he was running for President:

I can make a firm pledge: Under my plan, no family making less than \$250,000 will see their taxes increase—not your income taxes, not your payroll taxes, not your capital gains taxes, not any of your taxes.

Yet the Joint Committee on Taxation analysis—by the way, that is another report, and maybe they ought to be coming down here and attacking that report rather than attacking Republicans who are quoting from the report. The Joint Committee on Taxation analysis shows those people earning less than \$200,000 a year will see a tax increase under the Reid bill. Even after you account for taxpayers who are going to receive the premium tax credit, 24 percent of tax returns under \$200,000 will, on average, see their taxes go up. There are 42 million Americans who are going to see higher taxes who make less than 200,000 a year. So the no tax increase for the middle class we would have to say is a broken promise.

The second thing they say is that it will lower health care costs. We all know—and the President said this as recently as June 23:

And I've said very clearly: If any bill arrives from Congress that is not controlling costs, that's not a bill I can support. It's going to have to control costs. It's going to have to be paid for.

So the Democrats have shifted the benchmarks about what that means and what impact it is going to have on America's health care premiums.

The President's first promise, going back to the campaign, was that the typical family's premiums would go down by \$2,500 per year—a \$2,500-per-year reduction, according to the President when he was campaigning—and that everybody would be covered. Well, we all know that even this bill, which is touted as expanding coverage—well, it does expand coverage. It puts 15 million more people on Medicaid; that is one way it expands coverage. But under this bill, there are still 23 million Americans who don't get health insurance coverage. So the President's promise that he was going to cover everybody, that he was going to lower health care costs, again, you would have to say it is a broken promise.

I want to show my colleagues how this would impact a typical family's insurance costs. If you are a family who is paying \$13,300 today and you are getting your insurance in the large employer market—in other words, if you work for a large employer, you get it in the large group market—and you are looking at the year 2016, you are going to be paying over \$20,000 a year for insurance. That doesn't lower health care costs; that increases health care costs.

What they will say is: Well, this is better than it would have been if we had done nothing. The honest truth is that if we do nothing, we still would have 5 percent to 6 percent increases year over year in the cost of health insurance for most Americans whether you get your insurance in the large group market or the small group market. You are still going to have a 5- to 6-percent increase in the cost of your health insurance if this bill is passed. You don't see any improvement. The best you can hope for is the status quo, which is year-over-year increases that are twice the rate of inflation. That is the impact on an average family. So the whole notion that this is going to lower health care costs just doesn't pass the truth test, according to the Congressional Budget Office.

The next promise that was made is that it would bend the cost curve down. What is interesting about that—and, of course, this was the President in the joint session of Congress on September 9 of this year:

The plan I am announcing tonight . . . will slow the growth of health care costs for our families, our businesses, and our government.

Well, according to the Congressional Budget Office, again—and if my colleagues want to attack us, let's have them attack the Congressional Budget Office, the CMS Actuary, the Joint Tax Committee, because everything I am saying tonight I am quoting from those reports. According to the Congressional Budget Office analysis of the Reid amendment, the cost curve bends up, not down. In fact, in the first 10 years, the net increase would be about \$200 billion a year in overall health care costs.

This is an outdated chart, I have to say, because this is the chart we used before this amendment was added. This is the managers' amendment, the 400-page amendment I alluded to earlier that was just added to the 2,100 page bill. In the 2,100 page bill, the Congressional Budget Office said the cost of health care in this country is going to go up, not down, by \$160 billion.

So what is the cost of doing nothing? The blue line represents the cost of doing nothing. That is Federal health care spending today and what it is projected to be into the future if we do nothing. The red line, according to the Congressional Budget Office, represents what health care costs would do if the Reid bill passes. The ironic thing is that with the 400-page amendment that was added yesterday, this number gets bigger, not smaller.

I said this is an outdated chart. This only represents a \$160 billion increase in the cost of health care. According to CBO's analysis on the amendment, it increases the cost of health care by \$200 billion. The CMS Actuary came to a slightly different conclusion. They said health care costs would go up in the next 10 years by \$234 billion. So you have all the experts—the Congressional Budget Office, the CMS Actuary—all coming to the same conclusion; that is, health care costs go up, not down. So we would have to say that is yet another broken promise.

The other thing that has been said throughout the course of this debate is that you could keep the insurance you have. In his joint session of Congress address on September 9, the President said:

Nothing in our plan requires you to change what you have.

Well, interestingly enough, according, again, to the Congressional Budget Office, between 9 million and 10 million people who would be covered by an employment-based plan under current law would not have an offer of such coverage under the proposal, the Reid proposal. So we have 10 million people, according to CBO, who are going to lose their employer-based coverage, and you also have the 11 million people who get Medicare Advantage which is being cut. They aren't going to be able to keep what they have. You can argue that maybe their benefits are too rich today. That has been the argument

made by the other side. But you can't say they are going to be able to keep what they have. If you are going to cut \$118 billion out of Medicare Advantage, the 11 million people in this country who get Medicare Advantage are going to see their benefits cut. They are not going to be able to keep what they have.

In fact, the Senator from Pennsylvania, Mr. CASEY, said recently on these Medicare Advantage cuts:

We are not going to be able to say if you like what you have you can keep it, and that basic commitment that a lot of us around here have made will be called into question.

Eleven million people who get Medicare Advantage aren't going to be able to keep what they have, nor are the 10 million people, according to the CBO, who are going to lose their employer-based coverage if this plan passes—another broken promise.

No cuts to Medicare—we all know about that. We talked about that for about a week here and offered amendments to get rid of the Medicare cuts.

The President said when he was running for office:

I want to assure [you] we're not talking about cutting Medicare benefits.

He reiterated that in his State of the Union Address.

This bill, as we know, cuts \$470 billion out of Medicare in the first 10 years, and when it is fully implemented, it cuts over \$1 trillion out of Medicare. In the first 10 years, \$135 billion out of hospitals; \$120 billion, as I said earlier, out of Medicare Advantage; \$15 billion out of nursing homes; \$40 billion out of home health care; and \$7 billion out of hospice care—these are all Medicare cuts. These are all going to affect people in a very real way whether you get Medicare Advantage or whether you are a provider.

These are just the facts of this legislation. I am talking about the bill. I am talking about the bill, and I am talking about what the experts have said about the bill. So we would have to say, another broken promise.

The first of the last two here: open and transparent process.

We all know that when the President campaigned, he said:

We'll have the negotiations televised on C-SPAN so that people can see who is making arguments on behalf of their constituents and who is making arguments on behalf of the drug companies or the insurance companies. And so that approach I think is what is going to allow people to stay involved in this process.

That was what the President said when he was campaigning.

We all know this bill, almost in its entirety, has been written behind closed doors. We just saw this 400-page amendment yesterday. It was interesting; earlier—it was last week, I guess—in a discussion on the floor between Senator MCCAIN and Senator DURBIN, the No. 2

Democrat in the leadership on the Democratic side, said:

I would say to the Senator from Arizona that I am in the dark almost as much as he is and I am in the leadership.

Even some of the leaders on the other side—there are only three people, four people sitting in a room writing this bill, and what is the most offensive thing about this came out yesterday when we found out that the Senator from Nebraska had carved out a special sweetheart deal with a goody for his State that all the rest of the States get to pay for. He gets his Medicaid for his State paid for entirely by the Federal taxpayers, and no other State gets that particular arrangement. So the Federal taxpayers in every other State, in my State of South Dakota—Nebraska borders South Dakota. I think the people in our part of the country are going to say this really smells. This is the way they are doing business in Washington, DC? This is business as usual.

The final thing I will say is this: The argument was that it won't add a dime to the deficit. Well, here I give the Democrats a little bit of credit because they did raise taxes enough and cut Medicare enough that they could actually raise quite a bit of revenue. But saying it won't add a dime to the deficit assumes there isn't going to be any payment to physicians. The physicians' fee fix, which takes about \$250 billion, was completely cut out of here. They are going to have to fix that at some point. So we are not counting that.

We are counting \$72 billion from a program called the CLASS Act which the chairman of the Senate Budget Committee, the Democrat from North Dakota, KENT CONRAD, called a "Ponzi scheme of the first order," something Bernie Madoff would be proud of. The CBO says of the CLASS Act:

The program would add to future budget deficits in large and growing fashion.

Even the Washington Post has editorialized about this, and they came to the same conclusion:

The CLASS Act is a gimmick designed to pretend that health care is fully paid for.

It goes on to say:

The money that flows in during the 10-year budget window will flow back out again. These are not savings that can honestly be counted on the budget sheet of reform.

Then we all know we have 10 years of revenue coming in, with only 6 years of spending in the first 10 years. Phony budgeting, gimmicks—all of these things are used to mask the true size of the cost of this program: \$2.5 trillion over 10 years when it is fully implemented.

So if you do not use the gimmicks, if you do not use the CLASS Act, if you discount the doc fix and don't count that in there, sure, you can make it look like it doesn't add to the deficit, but the American people know better, and they have come to the conclusion this is going to add to the deficit. Even

David Broder, who is the Pulitzer Prize winner for his commentary, said:

While the CBO said that both the House-passed bill and the one Reid has drafted meet the test by being budget-neutral, every expert I have talked to says that the public has it right. These bills, as they stand, are budget-busters.

This is going to add to the deficit. These are all broken promises. That is why this bill needs to be voted down. We need to vote it down tonight. I am hoping there is a courageous Democrat or two who will join us and defeat this bad legislation and move forward to something we can pass that will meaningfully lower health care costs for the American people.

I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. BROWNBACK. Mr. President, I appreciate the chance to hear my colleague from South Dakota speak and talk about the bill. Statements he has made I am in agreement with. This is a huge bill the American public doesn't want. Gallup polling finds 61 percent of the American public oppose the Senate Democratic health care bill. In Kansas, I find widespread opposition—much higher than that. You can look at these numbers and quickly see why. Just one of the pieces of it—the Medicare cuts—will hurt Kansas. There is a 63.7-percent cut in Medicare Advantage. The benefits will affect more than 1 in 10 of Kansas Medicare beneficiaries. Those cuts are to the point that the program will no longer exist.

There is \$1.5 billion in cuts to Kansas hospitals—many of our rural hospitals operating on the margins, on the edge. They get cuts. There is \$239.8 million in cuts to home health agencies. This is going to put over 60 percent of them out of business in a 10-year timeframe. They don't like this. Great Christmas present.

There is an 11.8-percent cut in hospice payments. Hospice? Of all things to cut. It is a program that has been helpful to so many people late in life, and it is being cut. There is \$124.2 million in cuts to skilled nursing facilities. All of those are things being cut directly to Kansans, directly to people who benefit under current programs, and this is all to start a new entitlement program—cuts Medicare and raises taxes, neither of which we can afford. Medicare is already scheduled to go bankrupt, as we well know, so this is like writing a big fat check on an overdrawn bank account and saying we will come up with the money. It is not going to work. It is going to take money from Medicare. It is going to raise taxes in a weak economy. It is going to hurt overall.

One of the issues that has come down to be one of the final pieces of this that the Democrats have put forward is the issue of funding of abortion. We have had 30 years of agreement in this body

and in this Capitol that the Federal Government would not fund abortions other than in cases of rape, incest, and saving the life of the mother. That was it.

Thirty years ago, the Hyde amendment was put in place. It said we would not fund abortions. There was a big debate in the country about abortion, but there has been no debate about funding of abortion. We said we are not going to fund it. Taxpayers should not be funding abortions. If people want to do that, that is their choice on elective abortion. We are not going to fund it.

In this bill, we are going to break that amendment for the first time in 30 years.

What the President said in the joint session of Congress is no longer true. This will not be true if this passes in this bill. What the President said in the joint session of Congress:

One more misunderstanding I want to clear up.

I was listening.

Under our plan no Federal dollars will be used to fund abortions, and Federal conscience laws will remain in place.

I point out that he said "no Federal dollars" and "Federal conscience laws will remain in place." He said he wanted to clear up the misunderstanding. This is not the case.

We just got the managers' amendment recently, so this has been feverishly where we have had to go through what is actually in the managers' amendment. What you will find is that all the major pro-life groups are opposed to the managers' amendment because it does fund abortion. I will go through the specifics.

BART STUPAK a Democratic Member on the House side. He has been the lead guy on the House side to say we should continue with the Hyde language. There are disputes about abortions. There is not a dispute about the funding of it by taxpayer money. So BART STUPAK has led a group of Democratic Members on the issue overall and said we are going to pull it out. It is not in the House bill, but now it is in the Senate bill. He says:

Not acceptable . . . a dramatic shift in Federal policy that would allow the Federal Government to subsidize insurance policies with abortion coverage.

That is what BART STUPAK says about it. What do some of the other pro-life groups say about what is in the managers' amendment. These groups track this stuff. The U.S. Conference of Catholic Bishops, which wants a health care bill—I think they are a pretty fair reviewer of this because they want a health care bill to go through, but they are committed to life. They do not want taxpayer money to go to end a child's life. They are opposed to that—completely opposed to that on moral grounds, saying this is the highest moral order that has to be protected. Human life has to be protected, and

they say, of this legislation, the managers' amendment:

This legislation should not move forward in its current form. It should be opposed, unless and until such serious concerns have been addressed.

This is on the abortion language. Now let's look at the National Right to Life Committee. The National Right to Life Committee—they are the gold standard of review. They have been looking at this issue and tracking it since *Roe v. Wade* was passed. They are committed to life at all stages, in all places, believing that life is sacred; it is unique; it is beautiful; and it should be protected. What do they say about the managers' amendment? They say:

Light years removed from the Stupak-Pitts amendment that was approved in the House of Representatives on November 8 by a bipartisan vote of 240–194.

The new abortion language solves none of the fundamental abortion-related problems with the Senate bill, and it actually creates some new abortion-related problems.

Let's go through the specifics, because I think what we should do is go through the specifics of this bill and look at what are the specific areas of concern. Many of the abortion changes that Senator REID smuggled into his managers' bill behind closed doors make the bill worse than ever before. It violates the Hyde amendment and Hyde principles set in precedent through all other Federal administered health programs like Medicare and Medicaid. It preempts State laws and conflicts with some existing laws on abortion.

Third is the so-called firewall. There is a firewall provision between Federal and private funds. That is inconsistent with the Hyde and Stupak-Pitts amendment. The firewall language is not very fireproof. It is a mere accounting gimmick, where they put the money in one pocket and pay for abortions from the other. It is still money that goes through the Federal Government to the Federal Government to pay for abortions.

Fourth, it departs from the way the Federal Employee Health Benefit Program is governed with respect to private plans covering abortion, so it changes that.

Fifth, it allows executive branch officials to require private health plans to cover abortions simply by defining them as "preventive care."

We have debated this piece calling abortions preventive care in committee and on the Senate floor. Both times we have tried to take that out and say preventive care does not include abortions, and we have not been able to get that definition to the point where abortion can still be called preventive care. This is the Mikulski amendment, which mandates that all plans cover abortion by defining abortion as a preventive service. If you just define it as a preventive service, you can pay for it. But it is still being paid for then, and that is in this bill.

No. 6, it inserts text of the Indian health reauthorization bill. That passed last year and didn't get signed into law. It passed this body. That does not contain the Senate-passed Vitter amendment to permanently prohibit coverage of elective abortions in the federally funded Indian health programs.

And, No. 7, basic conscience protections, like the Weldon language, are not included in the Senate version. There are other problems, but these are just seven of the most egregious. I can't imagine that people across the country—certainly people across my State and other places, such as Virginia, Missouri, California, Wisconsin, or anyplace else would agree that the Federal Government should break with longstanding policy against federally funded abortions, but that is exactly what has happened and what is in this bill.

Abortion is not health care. Why is it even in this bill at all? The President himself said that at the joint session of Congress.

At the end of the day, the vote for cloture is an affirmative vote for the Federal funding of abortion. There is no way around that fact. Some people on the Democratic side, particularly Senator NELSON of Nebraska, with whom I have been working closely on this issue, want to keep abortion out of this bill. I believe there are huge flaws still in it. He has been fighting to keep abortion out of it. He said this:

Taxpayers shouldn't be required to pay for abortions.

That is his statement on the issue. He says it should not be in there. He worked to try to get this out. I think there are still enormous flaws and holes in this.

If we start the funding of abortions, the last time we did fund them, over 300,000 were paid for by the Federal Government in a 1-year period of time through Medicaid Programs; 300,000 annually were funded from 1973 to 1976. How many are we looking at now if we start down this road?

We need one Democrat in the Senate who will stand and say this is not taking care of the unborn. This is breaking the Hyde language that many on the other side have supported for years, saying they are pro-choice, but they don't think the Federal Government should fund abortions. This breaks the Hyde language in the six ways I mentioned and, seven, it does not provide for conscious clause protection so someone, maybe they are in a Catholic hospital and they do not agree with providing abortion services. They would be required to do things in certain circumstances—maybe that is not one of them—but certain circumstances to which they would not agree.

This is a big part of this debate, and it has certainly elevated it here. The

American public does not want the abortion language in the bill. Mr. President, 6 in 10, in a CNN survey, say they do not want it in this bill. In fact, one-quarter of House Democrats voted for the Stupak-Pitts amendment. That is the compromise that continued on the Hyde principle and said we will not fund this.

National Right to Life, I mentioned earlier, goes through some of the specifics on this language.

I will just say, where we are right now all seems so odd to me. We are in the final days of Advent season. We are here when we should be home with our families. I am missing a lot of the celebration of the Christmas season. This is the final days of Advent. Advent is the season of anticipating the birth of a child. It is a season of joy, a season of happiness. You are looking forward to the day of the birth of Christ, December 25. That is the season we are in right now. It is a season of joy. How sad we might see the end of lives of children in this bill, in this season of joy. It does not have to be that way. It should not be that way.

But now this is, I believe, the central issue in this health care debate. If this body passes this bill—and I do not think it should—it goes back to the House of Representatives, where Congressman STUPAK and a group of others have said they will not support the language if it has the abortion language.

The issue of funding abortion has now become a central issue in the health care debate. It should not be there. It is wrong. It is opposed by the American public. I ask my colleagues on the other side, please, please, please take this out. It does not belong here. It is not the thing to do. It is harmful. It is hurtful to the country, and it does not belong anywhere near the health care bill.

I yield the floor.

Mr. MCCAIN. Mr. President, much has been spoken about the need for Americans to access safe and affordable drugs and therapies. We know that the pharmaceutical industry has cut numerous deals to protect their interests and line their pockets at the expense of the taxpayers, including seniors and the uninsured. I don't think it is a secret that PhRMA cut a deal with the White House to block legislation allowing for the importation of safe and affordable prescription drugs from Canada and other approved countries. And it seems that PhRMA cut a deal to line their pockets by locking in more expensive brand drugs in the Medicare Part D doughnut hole. Finally, it appears that PhRMA made sure that their profitable biologic medicines are protected for 12 years from competition from FDA-licensed safe and affordable biosimilars.

This legislation has so many sweetheart deals that we probably haven't even found them all yet.

Today, I am filing an amendment that improves the biologic pathway in the bill. It creates a fair pathway for competitive biologics that balances incentives for innovation with patient access to safe and affordable biosimilar medicines.

It is a fact that the cost to discover biologic therapies can be astronomical. That, unfortunately, leads to some patients being unable to afford the needed therapies. Patients benefit from continued innovation but they also benefit from safe and affordable competitive biologics that may not occur under the proposal in the Reid bill. My amendment ensures that incentives to innovate remain in the law.

It is accepted that biologic therapies are different than chemical medicines. That is why there needs to be a unique structure for the approval and licensure of biosimilar medicines.

In creating a pathway to competitive biologics we need to strike a balance that provides patients greater access to more affordable, safe biologic therapies and ensures innovation continues to thrive.

Today, biologics have a monopoly for years and years. I am worried that the underlying legislation would allow biologics to game the system and block competition beyond the 12 years provided in the bill. Some have argued that brand biologic companies will be able to stack 12-year periods of exclusivity on top of each other. My amendment addresses this issue.

My amendment also addresses patient safety issues. FDA has very specific recommendations that I wanted to recognize in this pathway. Access to safe, competitive biologics is only as good as the therapies are safe. My amendment seeks to ensure the pathway for generic biologic therapies is as safe and effective as the original product.

Highlights of my amendment include 10 years of initial data exclusivity for the original product—a decade is enough. Reid—Hatch/Enzi/Hagan, has 12 years of data exclusivity. It also includes two extra years of data exclusivity if the manufacturer conducts additional research and finds new indications for the original medicine. My amendment also incentivizes additional innovation and encourages second generation therapies to come to market as soon as possible rather than companies waiting until the end of the initial exclusivity period to introduce new versions. Additionally, prescribing physician must authorize therapeutic appropriateness for a biosimilar and finally, the competitive biologic manufacturer is required to ensure the biosimilar medicine is safe and effective through clinical studies.

My goal in introducing this amendment is to ensure patient access to safe and competitive biosimilar medicines, to guarantee innovation thrives and to

bring down cost while ensuring safety and innovation.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. CARDIN. Mr. President, in a few hours, we in the Senate by our votes will be able to clear the way for the United States at long last to join every other industrial nation in the world and declare that health care is a right.

I thank our leader, Senator REID, for his extraordinary courage and leadership during these many weeks as we have been able to bring together the necessary votes to move this legislation forward.

I thank Senator BAUCUS, Senator DODD, and many of my colleagues who have worked on so many provisions that are in the managers' amendment and are in the underlying bill.

For 23 years, I have been in Congress, and for 23 years I have been supporting universal coverage. I believe every American should have access to affordable, quality health insurance and health care. By our votes later on this evening, we will have a chance to take a giant step forward in accomplishing that goal.

As I pointed out, the United States, although we spend more than any other nation in the world by far on health care, whether you want to do it in absolute dollars or on a per capita basis, we spend more than any other nation. Yet we are the only industrialized nation in the world that does not provide universal insurance and universal care.

Americans have to make a difficult choice. If someone happens to be walking on the ice tonight and does not have health insurance and they fall and hurt themselves, they have to make a decision whether their arm or leg hurts badly enough to go see a doctor or perhaps to have an x-ray to see whether a bone has been broken because they do not have the money to pay for that type of care.

Many people go without checkups because they cannot afford the cost of seeing a doctor today. They do not have insurance or their insurance does not cover what they need.

Many people who are on medications have to decide whether they can split their pills to make their dollars last a little bit longer because they literally are choosing between taking their medicines or having food on the table in the United States of America in 2009, the wealthiest nation in the world.

We have a chance to change that situation. One can argue this issue on many grounds, and I have. One can argue we need to bring down the growth rate of health care costs, and I certainly believe that or one can argue that we need to provide more people with health insurance or we need to take on the health insurance industry. But I think the most persuasive argument for passing this legislation is the

moral argument. It is the right thing to do. It is what America stands for.

I met with some students this week, and we were talking about the bill. These were high school students. They said it is the right thing to do, and they are right. This is the right thing for our Nation to do, to make sure everybody has access to affordable health care.

In Maryland, this takes on a special note because I know my colleagues have heard me talk frequently about Deamonte Driver, a 12-year-old who lived in Prince George's County, MD, just 7 miles from here. His mom tried to get him to a dentist because he had a toothache. They did not have insurance. No dentist would see him. After many efforts to try to get him to a dentist, he ultimately went to an emergency room. They operated on him because the tooth had become abscessed because of the delay in getting care. He needed emergency surgery. It went into his brain, and he lost his life because in the United States of America, we could not provide someone who was poor access to see a dentist. Tonight we can change that by our votes on this bill.

At long last, we have a chance to do something about that. In the last Congress, I introduced a bill that provided universal care by saying each of us has a personal responsibility to make sure we have health insurance. I did that because I think the first thing we need to do as a prerequisite to health care reform is to be sure everyone is covered, everyone is in the system.

This bill and the managers' amendment not only provides for universal coverage but makes it affordable for every person in this country.

We use the Congressional Budget Office as the objective scorekeeper. Everybody agrees to that—Democrats and Republicans. They are the professionals who tell us whether our numbers add up. The Congressional Budget Office tells us the bill with the managers' amendment will mean 31 million more Americans will have health coverage as a result of the enactment of this legislation. That will take our under 65 group from 83 percent coverage to 94 percent coverage, and for all Americans we will attain 98 percent. Sure, we want to get to 100 percent, but we are making a giant step forward for universal coverage.

The Congressional Budget Office tells us that for the overwhelming majority of Americans, they will either see no increase in their health insurance premiums from what it would otherwise be or they will see a decrease, a decline, a reduction in the cost of the health insurance premiums they would otherwise have to pay. For all Americans, they are going to have a better insurance product that is going to cover more. They are going to have less out-of-pocket costs than they would otherwise have. That is what the Congressional Budget Office tells us. Why

is that true? The legislation provides for prevention and wellness. It provides that preventive services will be required to be covered in your insurance plan.

We even do that for our government programs by providing an enhanced match for States that expand the Medicaid program for our poor to cover the preventive services. It covers oral health for our children as a required part of a required essential coverage package and provides additional help to help people through education and demonstration programs.

I could give many examples, but let me give one example from the point of view of trying to expand preventive services, and that is colon cancer. We know that if you have colon screenings, you actually can discover a polyp before it becomes cancerous. You can avoid cancer. The test costs a couple hundred dollars. If you do not have a test and you have cancer and need an operation, that costs tens of thousands of dollars.

Prevention and wellness works. It brings down the growth rate of health care costs. It saves us money. This bill invests billions in prevention and wellness directly and through required coverage in our private and public insurance programs.

We bring down the growth rate of health care costs by managing complex diseases. We know we spend most of our health care dollars because of major diseases. This bill helps us manage those diseases so people can get the care they need in a more cost-effective way.

The legislation invests in health information technology so we can reduce the administrative costs of health care. I was surprised to find that Maryland, similar to most States, if you go into an emergency room, it is very unlikely they will have your medical records. If they do not have your medical records because their information technology is not sophisticated enough to get those records, then surely they are going to do tests they would not otherwise have to do, which ends up costing us all more money.

By using health information technology, we can not only take better care of you, we can do it in a less costly way. By reducing the number of uninsured dramatically, we save money. How? Because someone who is uninsured who should see a doctor or go to a clinic instead goes to an emergency room which is much more expensive. By the way, they sometimes do not pay their bills.

Each of our families, if you live in Maryland and you have insurance, you pay an extra \$1,100 a year on your health insurance because you are paying for people who do not have health insurance and they access the system in a more costly way. This bill brings down the cost. You bring down the cost

of health care because of competition. We believe in competition, market forces. That is what made America great.

If you live in Maryland and you have private insurance, 71 percent of Marylanders are insured by two companies. That is not competitive. I have talked with more and more business owners who tell me they have no choice. There is one plan they can get. If they do not like that plan, there is no insurance they can get. That is not competition.

This bill brings competition by the exchanges that will invite more insurance companies to participate in our States and by the program that is in the managers' package that allows us, for the first time, to have plans available across State lines. That will be particularly helpful for a State such as Maryland, where many of our employers employ people who not only live in Maryland but live in Virginia, live in Pennsylvania, live in Delaware, live in West Virginia. That will certainly help us.

This legislation also reduces our Federal budget deficit. That is a challenge. Let me tell you why it is a challenge. There are two different issues. Reducing health care cost growth and reducing Federal spending are two different issues because to get everybody insured, which will help us bring down health care costs, we need to provide subsidies so people can afford their health insurance and provide businesses some help.

As more and more people become insured, they can use our tax advantages and pay less income taxes by using before-tax dollars rather than after-tax dollars. All that costs revenue to the Federal Treasury, so it is a challenge to bring this in without adding to the deficit, but we knew we had to do that. The Congressional Budget Office, again our objective scorekeeper, tells us that in the 10-year budget window, it will reduce the Federal budget by \$131 billion, but in the next 10 years, which all of us will admit is difficult to predict, they tell us we can reduce Federal spending by one-half percent of our GDP, which can translate to over \$1 trillion.

My point is, we are reducing the deficit while we are reducing the growth rate of health care costs.

The Congressional Budget Office does not score us for a lot of the results from our prevention programs. They cannot assume less people will get cancer and, therefore, the preventive services will save us money. I am convinced the dollar savings will be a lot greater than that for health care costs, for our economy, and for the taxpayers of this country.

This legislation protects consumers. That is why the consumer union supports moving this bill forward. The insurance reform that is in the underlying bill is well known. I tell you, the

people of Maryland want that. I am sure the people of Massachusetts also do.

The insurance reform says: Look, let's get rid of preexisting conditions. Let's not let insurance companies pick and choose whom they want to insure. They should insure everyone. The managers' package makes that available immediately for our children. We eliminate the lifetime caps, put restrictions on the annual caps. We make immediately available coverage for children under the age of 26 and provide a reinsurance program for those between 55 and 64.

We provide for an independent appeal from an insurance company's decision on coverage. Too many insurance companies have an internal mechanism to determine coverage which is stacked against the policyholder.

The managers' amendment provides for loss ratios. Loss ratios mean a certain amount of the insurance dollar must go back to pay benefits. We know a large amount is spent on advertising, spent on salaries, spent on profits. For the first time, the consumers will know how much of that is actually going to their benefits, and we start to put into law that a certain amount must be returned to the policyholders in benefits and important consumer protection information.

I am particularly pleased the Patients' Bill of Rights, an amendment I offered, is included in the managers' package. I thank the leader for including that.

In the Balanced Budget Act of 1997, a provision that I authored included a lot of the Patients' Bill of Rights in the Medicare and Medicaid Programs. President Clinton, in 1998, by executive order, extended it to all the government programs.

We passed that bill in the House and it passed in the Senate, but we never passed it in both bodies and sent it to the President the basic Bill of Rights for patients. We are making a giant step forward in the managers' package to cover those Bill of Rights. Let me give an example. Access to emergency care that I authored is now in this bill. There are insurance companies today that tell you, you have to get preauthorization before you can go to an emergency room. Think about that. You are having chest pains and sweating and you try to find your insurance card to call your insurance company? That is not what a doctor tells you to do. You go to an emergency room.

Suppose the closest emergency room is not in your network. Does that mean you will not get full coverage? Some insurance companies say that is the case. We put in the prudent layperson standard: If it is prudent to go to the emergency room to get care, the insurance company must cover your bill.

I cannot tell you the people I talked with on both sides—I had chest pains,

sweating, et cetera; I went to the emergency room, found out I did not have a heart attack and almost had one when my insurance company refused to pay the bill. I did what the doctor told me to do, and now they are not covering it. This provision will make sure that person's bill is covered.

Frankly, we have had people who delayed treatment who should have gone to an emergency room whose circumstances became much worse and some actually died. We cover access to emergency care in the managers' package, an important consumer protection.

We also allow you, as the subscriber, to determine whom you want your primary care provider to be. We give you protection as you make your decision as to whom your primary care provider will be. If you have a child, the pediatrician can be the primary care provider. If you are a woman, the OB-GYN can be your primary care provider. Many insurance companies deny you that today. That protection is in this bill for everyone.

I am also pleased to have joined Senator BROWN in a matter I worked very closely on when I was in the House for clinical trials. A lot of insurance companies today will not cover the cost of clinical trials, even though it might be the best care option available for an individual and, by the way, sometimes compromises the integrity of the clinical trial if they can't get a representative group to participate. Well, we provide protection in this bill to cover you for clinical trials that your insurance company has to cover.

So there is a lot in this bill for consumer protection—the bill of rights. Mr. President, there is a long list of organizations that support the patients' rights amendment that I offered, from the AARP, to the Consumers Union, Families USA, National Women's Law Center—all the different specialists. It is an important amendment, and I am glad to see it is in the managers' amendment.

I am proud of a major new effort that has been included in the managers' amendment. I want to talk about minority health for one moment, and I particularly want to thank a member of my staff, Priscilla Ross, who has been working on this issue for many years. She has pointed out to me the vulnerability of minority populations in America. Let me give a couple of examples.

The life expectancy for an African American is 5.3 years less than someone who is White. Minorities are two times more likely to have diabetes. African Americans have 33 percent higher death rates for heart disease than the White population. And the list goes on and on.

Access to care in the minority communities is much less than in the general communities at large. So we need-

ed to do something about this, and the amendment I offered, which is included in the managers' package, elevates minority health in our government agencies. It provides statutory authority for the Office of Minority Health at the Department of Health and Human Services. It codifies the network of minority health offices located within the Centers for Disease Control and Prevention, the Centers for Medicare and Medicaid Services, the Food and Drug Administration, the Substance Abuse and Mental Health Services Administration, and the Health Resources and Services Administration.

Mr. President, it elevates the Office of Minority Health at the National Institutes of Health from a center to an institute. That is making a commitment to attack this disparity that currently exists in health care in America.

Let me talk about one other issue in this bill that I am proud to work with Senator SANDERS on which involves the community health centers and primary care. Senator SANDERS was able to get \$10 billion in the managers' package so that we could dramatically expand access to care. You see, if you are a Latino in America, there is a 35-percent chance you have no dependable source of health care, compared to 15 percent in the White community. We need more federally qualified health centers. You can have universal health coverage, but if you don't have facilities, it will be difficult to get access to care. The community health center expansion will provide access in underserved areas. Maryland needs this help, and there is substantial investment in primary care in this legislation.

This bill will help. It will help those who have good insurance coverage today by protecting that coverage and making sure it is available tomorrow and stopping the erosion that is taking place today with insurance companies cutting back on what is covered and employers putting more of the cost on the employee. This legislation will help. It will help small business owners who today have very little choice as to what insurance plan they can get. They are paying 20 percent more, on average, than a large company pays for the same insurance protection. This will offer choice.

We also offer tax credits to help small businesses in order to make it easier for small businesses—which are the economic engine of America—to be able to provide health benefits for their employees. It will help individuals who cannot find insurance today by having large pools they can enter without being discriminated against by the way the actuaries work and will provide subsidies for low-wage workers so they can afford the coverage.

The bill will help our Medicare population by starting to close the doughnut hole on prescription drugs, making prescription medicines much more af-

fordable for our seniors, and providing preventative services, such as annual physicals so that seniors can stay healthy. And it provides sustainability to the Medicare Program.

Most importantly, this legislation reflects the values of our Nation—affordable, quality health care for all Americans. I am proud to support this legislation, the managers' package, and the underlying bill, and I urge my colleagues to be on the right side of history. I support moving forward with health care reform.

With that, Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. BEGICH. Mr. President, thank you for the opportunity to be here this evening. I thank Senator CARDIN for a great presentation on the real facts behind this bill.

You know, being from Alaska, we see a lot of storms. We saw a great blizzard here which brought a lot of snow. I see a lot of blizzards and storms in Alaska. But I have to be honest with you, I have never seen anything like the blizzard of misinformation I have seen in Washington regarding this bill.

Over the course of the next few minutes, I want to talk about the general bill and what it means for all Americans, including Alaskans, and then specifically about the effect on Alaska.

First, I want to walk through a couple of large issues. I know people watching are hearing this over and over while we are on this bill, and the details of it, but I think it is important that we repeat it enough for people to be reminded of the positive impacts the bill will have on America and my State of Alaska. It is not a perfect bill. There are pieces I would like to have improved, and I am sure everyone in this Chamber feels the same. But it is a step in the right direction—a significant step.

On the financial end, in the first 10 years, the bill reduces our deficit by \$130 billion. In the next 10 years, with the improvements in the managers' amendment and what it did for the deficit reduction, it is now \$1.2 trillion—a significant impact on the national debt.

People call my office and say: How does it reduce the debt? I remind them that between Medicare, Medicaid, the VA, Indian Health Services, and many other health care programs that we deliver, anything we do to improve the system will mean taxpayers will save money. So, again, \$130 billion in the first 10 years, and the next 10 years, \$1.2 trillion in deficit reduction.

The other issue—and again these are broad sweeps—is stronger medical loss ratios. This is important because this starts now, 2010, once this bill is passed, a few months after implementation. Health insurers will be required to spend more of their premiums—

which really are your premiums—on clinical services and quality activities, with less going to administration—advertising, profits, excessive pay packages. If they do not adhere to the new limits, they will have to pay rebates to the policyholders. These stricter limits will continue even after the exchange starts in 2011 and apply to all plans, including grandfathered plans. That is a significant benefit to the individual—the person who has to pay the premium.

Accountability for excess rate increases: The health insurer's participation in the exchange will depend on its performance. Insurers that jack up their premiums before the exchange begins will be excluded—a powerful incentive to keep premiums affordable.

There is an immediate ban on preexisting conditions for children under the age of 18. This is in the managers' package. To me, this is unbelievable. Many families struggle, and sometimes the parents will forego their health care in order to make sure their child is as healthy as possible. But when a child has a preexisting condition, just to get coverage for them is sometimes almost impossible. So this makes sure that no insurance company can ban or deny them access to health care with preexisting conditions.

Ensuring the needy have access to care: The use of annual limits on benefits will be tightly restricted, ensuring access to needed care. And those limits will be prohibited completely by 2014. Starting in 2010, new policies will eliminate the lifetime caps.

Also, on the broader scheme, there will be innovation. Medicare will be able to test new models. I can't tell you the number of times I have had a public hearing or a public meeting in Alaska, or I have had phone calls come in from people who have asked me: Can we do something different? How can we improve Medicare? This creates some new incentives to move forward on innovation within our Medicare system.

When you look at the small business end of it, the package improves, including starting the health insurance tax credit in 2010, with almost \$40 billion of tax credits. Tax savings to small business will be available.

Transparency: New requirements will ensure that insurers and health care providers report on their performance, allowing patients to make the best possible choice.

The next issue—multistate options. This is something during my campaign I talked a lot about—a program we all have in Congress, and so do almost 4 million Federal employees and their dependents. How do we replicate that to give a benefit to the taxpayers of this country, if they want to access something similar? Well, now we have the multistate option. Health insurance carriers will offer plans under the supervision of the Office of Personnel

Management, the same entity that oversees the health plans of Members of Congress and for Federal employees. At least one plan must be a nonprofit, and the plans will be available nationwide. This will truly promote competition and choice for individuals.

Another new idea, which Senator WYDEN had sponsored for many months and talked a lot about, is free choice vouchers, giving more choices to individuals with their money.

As mentioned earlier, the community health centers: It is estimated this bill will now be able to put in place almost 10,000 community health centers throughout this country, providing easy and affordable access for folks.

On the small business end, I want to again just broadly sweep on this. The credits will be available on a sliding scale to small businesses, those small businesses with fewer than 25 employees, and average annual wages of less than \$50,000. All small businesses will truly benefit, but if you are a small business with 50 or less employees, you will be exempt. If you want to provide insurance to your employees, and you are in a small group of 25 employees or under, there will be credits available for you.

The bill also clarifies part-time because we have so many part-time employees who work within the seasonal businesses in Alaska—retail, fishing, tourism. It makes sure that small businesses are not hampered by this legislation but enhanced. Again, 96 percent of the small businesses will be exempt from this law, unless they decide to provide health care, and then they can get some benefits through tax credits—up to \$40 billion available.

I am a member of a group of freshmen who came to Washington this cycle. We came with all kinds of ideas on how we wanted to change Washington in short order. We sat down with this bill in mind, and as a group of freshmen, we put together a cost containment package with many ideas—very technical in a lot of ways, but just in the broader sense, it creates administration simplification. It helps ensure we go after health care fraud. With regard to Medicare system upgrades, we make sure that as we develop new systems for Medicare and for the providers, we do some pay-for-performance testing, which will save individuals, save Medicare, and save the Medicare system over time.

The freshmen spent many weeks on the cost containment package we put together, and I want to give credit to Senator WARNER for leading the charge, though everyone participated to try to make a difference and bring cost containment to the issue of health care.

I want to go through a quick list on this broader perspective of the legislation and what happens now, because we hear always from the other side that so

many things are delayed way out; that they will not happen right away. Let me walk through several items that happen right away.

The Senate bill will make it illegal for insurance companies to drop coverage for Americans who are sick—basically, they call them rescissions—beginning 6 months after the date of enactment. Insurance companies will be barred from limiting the total benefits Americans can use over the course of a year—otherwise known as lifetime caps—beginning 6 months after the date of enactment. Affordable insurance coverage options will be made available for high-risk pools of Americans who have been uninsured and have been denied coverage because they have preexisting conditions, effective 90 days after enactment.

Early retirees between 55 and 64: I hear from a lot of them who are trying to figure out, as they are now retired and still have some coverage from their former employer, but it is expensive. What this does is set up a new program, and access to a program that will reduce their premiums beginning 90 days after enactment. Insurance companies will be required to start posting their overhead costs on a public Web site so consumers can better compare the deal they are getting effective July 1, 2010.

Insurance companies will have to start providing external review processes beginning 6 months after the date of enactment. Dependents will be able to receive coverage up to the age of 26 on their parents' policy, beginning 6 months after the date of enactment.

This is one again I hear so much when I am back home and from e-mails and letters, people wanting to keep their kids on their policy. Again, coverage up to the age of 26.

The insurance companies will be required to begin covering preventive services and immunization without copays on payments beginning 6 months after the date of enactment. Seniors will have access to dramatic discounts in the purchase of name brand prescription drugs in the Medicare Part D Program beginning July 1.

As I said earlier, children under age 18 cannot be denied for preexisting coverage.

There will be free preventive services for seniors—\$500 reduction in the doughnut hole for seniors.

Again, the issue with Medicare, I want to say, when we started this effort to reform health care, Medicare was in trouble and could be in serious trouble by 2017. This legislation adds 10 more years to Medicare.

To be specific to Alaska—and I will be brief on this but I think it is important—many of these issues I laid out are important to Alaska, but there are quite a few very specific. First, I remind folks what the impact is currently in Alaska—133,000 Alaskans do

not currently have insurance; 27,000 residents who now buy expensive individual premiums will now get affordable coverage. We double enrollment in Alaska's Kid Care, what we call here in Washington SCHIP, to more than 15,000 young people, ending the hidden tax on families. About \$119 million is spent on uncompensated care, averaging about \$1,900 per year. By creating a larger program as we are doing here, we can eliminate that cost.

I have heard over and over about Medicare Advantage. Let me tell you how that works for Alaskans. What we will be doing, we have 60,000 Medicare beneficiaries paying a price for excessive overpayments in higher premiums, even though 99 percent of our Alaskan seniors do not participate in Medicare Advantage.

What you hear when you hear about Medicare Advantage—and those who have it I am sure enjoy it—but in my State we are subsidizing that even though 99 percent of Alaska seniors do not take that program. So we pay an extra approximately \$90 to subsidize that program for those extra things they claim they have. The reality is that was supposed to be run by the private sector, saving money to Medicare. It is now costing us more, it is costing my State \$90 per Medicare family.

About 10,600 Alaskans hit the doughnut hole in Alaska through the Medicare drug coverage, which can cost some of our seniors up to \$4,000 additional a year. They will see a 50-percent reduction.

As I mentioned under early retirees on the national program, 7,300 Alaskans will be affected in a positive way; 8,600 Alaska small businesses could be helped by the small business tax credit. Again, Alaska is benefiting a great deal from this legislation.

Even more specific—and these are items I added specifically in the bill to focus on Alaska's specific issues. I thank Senator HARKIN on this next one, which is important. It is providing more primary care providers. It is a loan repayment program. I know he has been an advocate of getting more primary providers within the system—physicians, nurse practitioners, physicians assistants—from \$3,500 to \$5,000 for the National Health Service Corps in this country. It serves health professional shortage areas, including 77 in Alaska.

In part, because of this, and due to other major expansion, the Senate HELP Committee has estimated the bill will attract 24,000 new primary care providers. If you want to make a difference to the health care system, this is one critical piece. Again, Senator HARKIN, I know, has been an advocate for this for many years. To see us get to this state and be able to move this forward is significant. It will have a positive impact.

Another one which is a program that is a great benefit for hospitals in

Soldotna, Juneau, and Sitka, is an amendment which reauthorizes a Medicare project supporting hospitals in rural communities in smaller States, extending that for an additional 5 years, moving it from 10 States to 20 States and creating another 15 hospitals that can participate.

Alaska health care task force—specifically in this legislation, to deal with our Medicare provider issue in Alaska but also our TRICARE, making sure we deliver the right kind of hospital and medical care to our veterans.

More physicians assistants—we inserted specific language to make sure we allow loan repayments for physician assistant teaching faculty, to be also included in loan forgiveness. Last year we had 375 PAs who handled 1.2 million office visits in Alaska.

After 21 years, the Indian Health Service is now in this bill to be reauthorized. For 21 years it has not been reauthorized.

There are many great things in this legislation, from a broader perspective, as I mentioned earlier in my comments, but also very specific to Alaska.

Could it be better? Absolutely. But do we think we have a piece of legislation that is going to make an impact on people's lives? Yes, we do. If we want to keep it the same old business as usual, I guarantee, in 5 years or 10 years from now we will be in this hall, trying to figure out what to do at a bigger crisis.

This is the right decision. It will be an honor for me later this evening to make a vote in the affirmative to move past the cloture vote, getting on to voting for this bill.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. HARKIN. Mr. President, first I thank the Senator from Alaska for all of his hard work on this bill. I think it is fair to say the Senator from Alaska, a new Member of the Senate, I might add, has been very much involved in this bill and his focus has been on rural health and better health care for native Alaskans. As the Senator knows, the Indian Health Care Improvement Act, which also covers Native Alaskans, is included in this bill. I thank the Senator from Alaska for insisting on that and for being a strong supporter of making sure we do help primary care practitioners, both doctors but also nurse practitioners, physicians assistants, other health care and primary health care people who are going to serve in our small towns and rural communities. The Senator from Alaska has been one of our best leaders on making sure that we have this in the bill. I thank him for that very much.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. NELSON of Florida. Mr. President, I have been listening on C-SPAN 2, in addition to having the privilege of

being over here on the floor, to this debate that has been going on. The debate has been going on ever since the summer when we in the committee were fashioning this legislation. I must say that to hear one side of this debate, I would not recognize all of those hearings we had last summer and all the markup we did in the Finance Committee last September because what has been presented to the Senate, and what has been presented to the public through press conferences by the opposition to this bill in most cases simply is not correct.

I want to give a couple of examples here this evening. In attacking this, saying what dastardly things this is going to do for the country and how this is going to increase costs and raise taxes—each one of these things can be refuted. But it is a typical tactic that, when you want to attack something and tear it down, you go after a specific item instead in order to obfuscate, which then misses the point of the whole piece of legislation.

The point of the whole piece of legislation is to make health care available and affordable, in most cases through health insurance, in other cases through Medicare and Medicaid, and making it available, efficient, and affordable.

I want to give one specific example. It is a technical term in the insurance industry called the "medical loss ratio." It is the ratio in what an insurance company actually pays out in medical claims as opposed to what it pays for administrative expenses such as marketing, insurance agent commissions, underwriting, and an insurance company's profit. It is interesting that the term medical loss ratio tells you a lot about the insurance industry, because if you look at it only from their perspective, this percentage is their loss but in fact the percentage is the amount of the premium dollar that goes to actual medical care. What this amendment, this managers' amendment we are going to vote on in less than 2 hours right now says, is it causes a specific ratio so you are getting a high amount of return on the insurance premium dollar.

Let me give an example. This is an example of the medical loss ratio of a number of small employers—small employers, that is group policies—as well as policies in the individual market. This is where you have an employer who pays for your health insurance but it is a small employer, usually under 50 employees.

This is where you have policies that are given to individuals. The premiums usually are much higher if you are an individual buying insurance than if you are buying it in a group, by an employer-sponsored group.

These are specific examples in a particular year of the loss ratio. Interestingly, for Aetna, here, at 82 percent—

that is not actually a loss to Aetna. It is interesting they call it a loss. That is actually 82 cents of premium dollar, an insured policyholder's premium dollar, that actually goes to medical coverage. That is good.

United Health: 79; Humana, down at 77—77 cents of that \$1 are going to health care.

And the balance, 23 cents, is going to things such as administrative expenses, paying for insurance agents, commissions, paying for their profit. What does the bill do? The bill brings that up to 80 percent. And that is all policies, not just the new policies on the health insurance exchange. That is not just the policies insurance companies are going to write new for the small group. It is all those policies that are in existence.

Look at the individual. The experience isn't quite as good. As a matter of fact, here is a company, Coventry, that was only paying 66 cents on every premium dollar that was actually going to health care, and the rest of that, 34 cents, was going to profit and administrative expenses and executive salaries and bonuses and so forth. And lo and behold, what we are going to vote on tonight in less than 2 hours is going to have to be 80 cents on every dollar. If they don't make that 80 cents on every dollar, they are going to get penalized. We are putting some real teeth in this on insurance companies for the first time.

Look at the large group, the employer-sponsored insurance, the large group. These are five of the larger insurance companies. You can see they have a pretty good record thus far: WellPoint, 85, Humana, 82 cents on every dollar. They have a better record because they have a lot more individual lives over which they can spread the insurance risk, and so they can pay out more in health insurance for health care and take out less for administrative expenses. But in this bill tonight, in an hour and 45 minutes, we are going to raise that to 85 percent, 85 cents on every dollar.

Before I came to the Senate—and I have had the good fortune of serving the public for now going on over 35 years—I had the privilege of being elected to one of the toughest jobs I have ever had in a lifetime of public service, and that was the elected insurance commissioner of Florida. It is also the elected treasurer. That position has morphed into what is called the chief financial officer. It is a member of the Florida cabinet. For 6 years, I got to see what insurance companies will do. I can tell you, instead of 85 percent and 80 percent that we are going to require in this bill of every insurance premium dollar they pay out in medical care, I can tell you that some of the insurance companies I regulated back in the State of Florida were down in the sixties. A lot of that was going

into big-time administrative offices, all kinds of jets, all kinds of padded expense accounts. You can see what we are trying to do here with this bill tonight.

Let's ask, why do we have to have a ratio such as this and why is it important? It certainly is getting more medical care to the individual policyholder. But listen to this: A study that was done by the Senate Commerce Committee shows that the ratios are often below what is considered to be fair. Our Commerce Committee found that in the small business market, those with fewer than 50 employees, insurers spend only 79 cents out of every dollar on health care. That is in the Commerce Committee study. In the individual market, it is even worse. It is 74 cents. In the individual market, the insurer keeps more than a quarter of every individual premium dollar for overhead and profit.

We need to ensure that the policyholder's premiums and the Federal subsidies that are going into the purchase of private health insurance on the exchange are used for actual medical care and not for wasteful administrative spending and marketing and profits. If we don't do this kind of thing, regulating insurance companies, then they are going to take advantage. They are going to take the advantage of making more money at the expense of patient care.

I want to give an example. In spite of this recession, this economic recession we are in and the increasing unemployment over the past year, what has happened to the big insurance companies? They are posting big profits. They seem to be making more money by insuring fewer people. The only way you make more money with fewer customers is you get rid of your less profitable customers—in other words, the sick ones. That is called cherry-picking. You pick the good risks, which are the healthy ones, and you try to get rid of the sick ones.

Let me give some examples. In the second quarter of this year, 2009, the largest health insurance company, UnitedHealth Group, announced a 3-month profit of \$859 million in one quarter, and it more than doubled the profits from the previous year. UnitedHealth earned these record profits in spite of the fact that it was insuring 600,000 fewer people than it did a year ago.

Let me give another example. In the second quarter of this year, another large insurer, CIGNA, saw its profits jump 60 percent to \$435 million. CIGNA earned these healthy profits in spite of the fact that it is insuring 200,000 fewer people than a year ago.

Another example: In the second quarter of 2009, Humana saw its profits rise 34 percent to \$282 million. Humana earned those healthy profits in spite of the fact that it was insuring 100,000 fewer people than a year ago.

At the same time they are dropping beneficiaries, insurance companies are paying their CEOs record salaries. In 2008, Aetna's CEO earned over \$24 million. That is the equivalent of more than \$66,000 per day. If you want to know where some of that administrative padding that is not coming back to the policyholder in health care is going, there is a good example. Aetna's CEO earned over \$24 million in that 1 year, 2008.

This medical loss ratio we are building into this bill on which we will vote shortly builds on other insurance provisions in this legislation which include guaranteed issue, which include prohibiting cancellations, banning pre-existing conditions so that they can't terminate you or not insure you because they cook up some excuse, some flimsy excuse. I am not sure this has been brought out in this debate, but I think it is worthy of consideration by the Senate.

In my closing minutes, I want to now step back and look at the overall package. Why is this a good deal for America, and why is it going to pass with an extraordinary threshold of 60 votes tonight? Because we are not going to allow in this legislation excessive rate increases in the health insurance exchange that is created new, that is going to insure 31 million new people. A lot of those people are people who don't have insurance now. A company will be banned from that health insurance exchange if it starts jacking up its rates excessively. You talk about an insurance commissioner's dream, a regulator's dream—often your hands are tied and you are put into a straitjacket by the insurance laws of your State and you can't crack the whip on them. We are cracking the whip on them in this legislation.

There has been a lot of talk about the program on Medicare other than Medicare fee-for-service called Medicare Advantage and how it is going to be whacked. I can tell you, for my State of Florida, there are 950,000 senior citizens on Medicare Advantage, and it is not going to be whacked. There have been a lot of statements out here by people attributing it to Florida, that it was going to be cut. In this bill we are voting on tonight and whenever we go to final passage, it is not.

By the way, there was a statement made here and something that was entered into the RECORD, a letter from a cardiologist from Jupiter, FL, who was complaining about how cardiologists' fees are being squeezed and they may not be able in the future to take care of Medicare recipients. I happen to know about this. I have been trying to help the cardiologists. But it was stated out here on the floor of the Senate that it is this bill that is doing that. That has nothing to do with this legislation. That has to do with the administrative

functions of government in existing law, CMS, that, in my opinion, has used incomplete data to cut cardiologists, particularly that are needed in a State such as Florida where, in fact, so many senior citizens are needing the service in Medicare of cardiologists.

Here is another major thing in this bill. We are setting up a nationwide insurance plan that will be sold on these health insurance exchanges, and it will be operated by the Office of Personnel Management, the same office that governs the health insurance of Federal employees and Members of Congress.

There is a part in this bill on tort reform. It sets up State grants to test alternatives to litigation.

In my remaining minute, let's don't forget the 31 million more people who are going to come in insured and how this, over time, is going to bring down the cost of Medicare. It is not going to cut Medicare. It is going to save Medicare. It is going to do that with efficiencies such as electronic records and accountable care organizations and emphasis on primary care physicians.

To conclude, what else does the bill do? It lowers the deficit over the next 10 years by \$132 billion. In the second 10-year period, it is going to lower it by up to \$1.3 trillion. That is serious deficit reduction.

On that happy note, I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Let me thank Senator NELSON for his strong commitment to Medicare. I know of no Senator who fights harder for Medicare and for making prescription drugs more affordable to seniors than the Senator from Florida. He has contributed his great expertise as a former insurance commissioner to the provisions we have in this bill on cracking down on insurance company abuses, and he just went through some of them there. I thank my good friend Senator NELSON from Florida for all of his great input into this bill.

In a few minutes, the Senate will close its doors for a brief recess. When those doors reopen just after midnight, the Senate will reconvene for a historic purpose: to bring the promise of quality, affordable health care to millions of Americans. When those doors reopen, we who have the privilege of serving in this body will have the opportunity to vote for hope and opportunity and new help for working families who worry every day that their illness will cause them to go bankrupt.

Mr. President, I yield the floor.

AMENDMENTS SUBMITTED AND PROPOSED

SA 3284. Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue

Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table.

SA 3285. Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3286. Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3287. Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3288. Mr. REID submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3289. Mr. REID submitted an amendment intended to be proposed to amendment SA 3288 submitted by Mr. REID and intended to be proposed to the amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3290. Mr. REID submitted an amendment intended to be proposed by him to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3291. Mr. REID submitted an amendment intended to be proposed to amendment SA 3290 submitted by Mr. REID and intended to be proposed to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3292. Mr. REID submitted an amendment intended to be proposed by him to the bill H.R. 3590, supra; which was ordered to lie on the table.

SA 3293. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 3284. Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

TITLE —HEALTHY MOTHERS AND HEALTHY BABIES

SEC. 01. SHORT TITLE.

This title may be cited as the "Healthy Mothers and Healthy Babies Access to Care Act".

SEC. 02. FINDINGS AND PURPOSE.

(a) FINDINGS.—

(1) EFFECT ON WOMEN'S ACCESS TO HEALTH SERVICES.—Congress finds that—

(A) the current civil justice system is eroding women's access to obstetrical and gynecological services;

(B) the American College of Obstetricians and Gynecologists (ACOG) has identified nearly half of the States as having a medical liability insurance crisis that is threatening access to high-quality obstetrical and gynecological services;

(C) because of the high cost of medical liability insurance and the risk of being sued, one in seven obstetricians and gynecologists have stopped practicing obstetrics and one in five has decreased their number of high-risk obstetrics patients; and

(D) because of the lack of availability of obstetrical services, women—

(i) must travel longer distances and cross State lines to find a doctor;

(ii) have longer waiting periods (in some cases months) for appointments;

(iii) have shorter visits with their physicians once they get appointments;

(iv) have less access to maternal-fetal medicine specialists, physicians with the most experience and training in the care of women with high-risk pregnancies; and

(v) have fewer hospitals with maternity wards where they can deliver their child, potentially endangering the lives and health of the woman and her unborn child.

(2) EFFECT ON INTERSTATE COMMERCE.—Congress finds that the health care and insurance industries are industries affecting interstate commerce and the health care liability litigation systems existing throughout the United States are activities that affect interstate commerce by contributing to the high costs of health care and premiums for health care liability insurance purchased by health care system providers.

(3) EFFECT ON FEDERAL SPENDING.—Congress finds that the health care liability litigation systems existing throughout the United States have a significant effect on the amount, distribution, and use of Federal funds because of—

(A) the large number of individuals who receive health care benefits under programs operated or financed by the Federal Government;

(B) the large number of individuals who benefit because of the exclusion from Federal taxes of the amounts spent to provide them with health insurance benefits; and

(C) the large number of health care providers who provide items or services for which the Federal Government makes payments.

(b) PURPOSE.—It is the purpose of this title to implement reasonable, comprehensive, and effective health care liability reforms designed to—

(1) improve the availability of health care services in cases in which health care liability actions have been shown to be a factor in the decreased availability of services;

(2) reduce the incidence of "defensive medicine" and lower the cost of health care liability insurance, all of which contribute to the escalation of health care costs;

(3) ensure that persons with meritorious health care injury claims receive fair and adequate compensation, including reasonable noneconomic damages;

(4) improve the fairness and cost-effectiveness of our current health care liability system to resolve disputes over, and provide compensation for, health care liability by reducing uncertainty in the amount of compensation provided to injured individuals; and

(5) provide an increased sharing of information in the health care system which will reduce unintended injury and improve patient care.

SEC. 03. DEFINITIONS.

In this title:

(1) **ALTERNATIVE DISPUTE RESOLUTION SYSTEM; ADR.**—The term “alternative dispute resolution system” or “ADR” means a system that provides for the resolution of health care lawsuits in a manner other than through a civil action brought in a State or Federal court.

(2) **CLAIMANT.**—The term “claimant” means any person who brings a health care lawsuit, including a person who asserts or claims a right to legal or equitable contribution, indemnity or subrogation, arising out of a health care liability claim or action, and any person on whose behalf such a claim is asserted or such an action is brought, whether deceased, incompetent, or a minor.

(3) **COLLATERAL SOURCE BENEFITS.**—The term “collateral source benefits” means any amount paid or reasonably likely to be paid in the future to or on behalf of the claimant, or any service, product or other benefit provided or reasonably likely to be provided in the future to or on behalf of the claimant, as a result of the injury or wrongful death, pursuant to—

(A) any State or Federal health, sickness, income-disability, accident, or workers’ compensation law;

(B) any health, sickness, income-disability, or accident insurance that provides health benefits or income-disability coverage;

(C) any contract or agreement of any group, organization, partnership, or corporation to provide, pay for, or reimburse the cost of medical, hospital, dental, or income disability benefits; and

(D) any other publicly or privately funded program.

(4) **COMPENSATORY DAMAGES.**—The term “compensatory damages” means objectively verifiable monetary losses incurred as a result of the provision of, use of, or payment for (or failure to provide, use, or pay for) health care services or medical products, such as past and future medical expenses, loss of past and future earnings, cost of obtaining domestic services, loss of employment, and loss of business or employment opportunities, damages for physical and emotional pain, suffering, inconvenience, physical impairment, mental anguish, disfigurement, loss of enjoyment of life, loss of society and companionship, loss of consortium (other than loss of domestic service), hedonic damages, injury to reputation, and all other nonpecuniary losses of any kind or nature. Such term includes economic damages and noneconomic damages, as such terms are defined in this section.

(5) **CONTINGENT FEE.**—The term “contingent fee” includes all compensation to any person or persons which is payable only if a recovery is effected on behalf of one or more claimants.

(6) **ECONOMIC DAMAGES.**—The term “economic damages” means objectively verifiable monetary losses incurred as a result of the provision of, use of, or payment for (or failure to provide, use, or pay for) health care services or medical products, such as past and future medical expenses, loss of past and future earnings, cost of obtaining domestic services, loss of employment, and loss of business or employment opportunities.

(7) **HEALTH CARE GOODS OR SERVICES.**—The term “health care goods or services” means any obstetrical or gynecological goods or

services provided by a health care institution, provider, or by any individual working under the supervision of a health care provider, that relates to the diagnosis, prevention, care, or treatment of any obstetrical or gynecological-related human disease or impairment, or the assessment of the health of human beings.

(8) **HEALTH CARE INSTITUTION.**—The term “health care institution” means any entity licensed under Federal or State law to provide health care services (including but not limited to ambulatory surgical centers, assisted living facilities, emergency medical services providers, hospices, hospitals and hospital systems, nursing homes, or other entities licensed to provide such services).

(9) **HEALTH CARE LAWSUIT.**—The term “health care lawsuit” means any health care liability claim concerning the provision of obstetrical or gynecological goods or services affecting interstate commerce, or any health care liability action concerning the provision of (or the failure to provide) obstetrical or gynecological goods or services affecting interstate commerce, brought in a State or Federal court or pursuant to an alternative dispute resolution system, against a physician or other health care provider who delivers obstetrical or gynecological services or a health care institution (only with respect to obstetrical or gynecological services) regardless of the theory of liability on which the claim is based, or the number of claimants, plaintiffs, defendants, or other parties, or the number of claims or causes of action, in which the claimant alleges a health care liability claim.

(10) **HEALTH CARE LIABILITY ACTION.**—The term “health care liability action” means a civil action brought in a State or Federal Court or pursuant to an alternative dispute resolution system, against a health care provider who delivers obstetrical or gynecological services or a health care institution (only with respect to obstetrical or gynecological services) regardless of the theory of liability on which the claim is based, or the number of plaintiffs, defendants, or other parties, or the number of causes of action, in which the claimant alleges a health care liability claim.

(11) **HEALTH CARE LIABILITY CLAIM.**—The term “health care liability claim” means a demand by any person, whether or not pursuant to ADR, against a health care provider who delivers obstetrical or gynecological services or a health care institution (only with respect to obstetrical or gynecological services), including third-party claims, cross-claims, counter-claims, or contribution claims, which are based upon the provision of, use of, or payment for (or the failure to provide, use, or pay for) obstetrical or gynecological services, regardless of the theory of liability on which the claim is based, or the number of plaintiffs, defendants, or other parties, or the number of causes of action.

(12) **HEALTH CARE PROVIDER.**—

(A) **IN GENERAL.**—The term “health care provider” means any person (including but not limited to a physician (as defined by section 1861(r) of the Social Security Act (42 U.S.C. 1395x(r)), nurse, dentist, podiatrist, pharmacist, chiropractor, or optometrist) required by State or Federal law to be licensed, registered, or certified to provide health care services, and being either so licensed, registered, or certified, or exempted from such requirement by other statute or regulation.

(B) **TREATMENT OF CERTAIN PROFESSIONAL ASSOCIATIONS.**—For purposes of this title, a professional association that is organized

under State law by an individual physician or group of physicians, a partnership or limited liability partnership formed by a group of physicians, a nonprofit health corporation certified under State law, or a company formed by a group of physicians under State law shall be treated as a health care provider under subparagraph (A).

(13) **MALICIOUS INTENT TO INJURE.**—The term “malicious intent to injure” means intentionally causing or attempting to cause physical injury other than providing health care goods or services.

(14) **NONECONOMIC DAMAGES.**—The term “noneconomic damages” means damages for physical and emotional pain, suffering, inconvenience, physical impairment, mental anguish, disfigurement, loss of enjoyment of life, loss of society and companionship, loss of consortium (other than loss of domestic service), hedonic damages, injury to reputation, and all other nonpecuniary losses of any kind or nature.

(15) **OBSTETRICAL OR GYNECOLOGICAL SERVICES.**—The term “obstetrical or gynecological services” means services for prenatal care or labor and delivery, including the immediate postpartum period (as determined in accordance with the definition of postpartum used for purposes of title XIX of the Social Security Act (42 U.S.C. 1396 et seq.)).

(16) **PUNITIVE DAMAGES.**—The term “punitive damages” means damages awarded, for the purpose of punishment or deterrence, and not solely for compensatory purposes, against a health care provider who delivers obstetrical or gynecological services or a health care institution. Punitive damages are neither economic nor noneconomic damages.

(17) **RECOVERY.**—The term “recovery” means the net sum recovered after deducting any disbursements or costs incurred in connection with prosecution or settlement of the claim, including all costs paid or advanced by any person. Costs of health care incurred by the plaintiff and the attorneys’ office overhead costs or charges for legal services are not deductible disbursements or costs for such purpose.

(18) **STATE.**—The term “State” means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States, or any political subdivision thereof.

SEC. 04. ENCOURAGING SPEEDY RESOLUTION OF CLAIMS.

(a) **IN GENERAL.**—Except as otherwise provided for in this section, the time for the commencement of a health care lawsuit shall be 3 years after the date of manifestation of injury or 1 year after the claimant discovers, or through the use of reasonable diligence should have discovered, the injury, whichever occurs first.

(b) **GENERAL EXCEPTION.**—The time for the commencement of a health care lawsuit shall not exceed 3 years after the date of manifestation of injury unless the tolling of time was delayed as a result of—

(1) fraud;

(2) intentional concealment; or

(3) the presence of a foreign body, which has no therapeutic or diagnostic purpose or effect, in the person of the injured person.

(c) **MINORS.**—An action by a minor shall be commenced within 3 years from the date of the alleged manifestation of injury except that if such minor is under the full age of 6 years, such action shall be commenced within 3 years of the manifestation of injury, or

prior to the eighth birthday of the minor, whichever provides a longer period. Such time limitation shall be tolled for minors for any period during which a parent or guardian and a health care provider or health care institution have committed fraud or collusion in the failure to bring an action on behalf of the injured minor.

(d) **RULE 11 SANCTIONS.**—Whenever a Federal or State court determines (whether by motion of the parties or whether on the motion of the court) that there has been a violation of Rule 11 of the Federal Rules of Civil Procedure (or a similar violation of applicable State court rules) in a health care liability action to which this title applies, the court shall impose upon the attorneys, law firms, or pro se litigants that have violated Rule 11 or are responsible for the violation, an appropriate sanction, which shall include an order to pay the other party or parties for the reasonable expenses incurred as a direct result of the filing of the pleading, motion, or other paper that is the subject of the violation, including a reasonable attorneys' fee. Such sanction shall be sufficient to deter repetition of such conduct or comparable conduct by others similarly situated, and to compensate the party or parties injured by such conduct.

SEC. 05. COMPENSATING PATIENT INJURY.

(a) **UNLIMITED AMOUNT OF DAMAGES FOR ACTUAL ECONOMIC LOSSES IN HEALTH CARE LAWSUITS.**—In any health care lawsuit, nothing in this title shall limit the recovery by a claimant of the full amount of the available economic damages, notwithstanding the limitation contained in subsection (b).

(b) ADDITIONAL NONECONOMIC DAMAGES.—

(1) **HEALTH CARE PROVIDERS.**—In any health care lawsuit where final judgment is rendered against a health care provider, the amount of noneconomic damages recovered from the provider, if otherwise available under applicable Federal or State law, may be as much as \$250,000, regardless of the number of parties other than a health care institution against whom the action is brought or the number of separate claims or actions brought with respect to the same occurrence.

(2) HEALTH CARE INSTITUTIONS.—

(A) **SINGLE INSTITUTION.**—In any health care lawsuit where final judgment is rendered against a single health care institution, the amount of noneconomic damages recovered from the institution, if otherwise available under applicable Federal or State law, may be as much as \$250,000, regardless of the number of parties against whom the action is brought or the number of separate claims or actions brought with respect to the same occurrence.

(B) **MULTIPLE INSTITUTIONS.**—In any health care lawsuit where final judgment is rendered against more than one health care institution, the amount of noneconomic damages recovered from each institution, if otherwise available under applicable Federal or State law, may be as much as \$250,000, regardless of the number of parties against whom the action is brought or the number of separate claims or actions brought with respect to the same occurrence, except that the total amount recovered from all such institutions in such lawsuit shall not exceed \$500,000.

(c) **NO DISCOUNT OF AWARD FOR NONECONOMIC DAMAGES.**—In any health care lawsuit—

(1) an award for future noneconomic damages shall not be discounted to present value;

(2) the jury shall not be informed about the maximum award for noneconomic damages under subsection (b);

(3) an award for noneconomic damages in excess of the limitations provided for in subsection (b) shall be reduced either before the entry of judgment, or by amendment of the judgment after entry of judgment, and such reduction shall be made before accounting for any other reduction in damages required by law; and

(4) if separate awards are rendered for past and future noneconomic damages and the combined awards exceed the limitations provided for in subsection (b), the future noneconomic damages shall be reduced first.

(d) **FAIR SHARE RULE.**—In any health care lawsuit, each party shall be liable for that party's several share of any damages only and not for the share of any other person. Each party shall be liable only for the amount of damages allocated to such party in direct proportion to such party's percentage of responsibility. A separate judgment shall be rendered against each such party for the amount allocated to such party. For purposes of this section, the trier of fact shall determine the proportion of responsibility of each party for the claimant's harm.

SEC. 06. MAXIMIZING PATIENT RECOVERY.

(a) **COURT SUPERVISION OF SHARE OF DAMAGES ACTUALLY PAID TO CLAIMANTS.—**

(1) **IN GENERAL.**—In any health care lawsuit, the court shall supervise the arrangements for payment of damages to protect against conflicts of interest that may have the effect of reducing the amount of damages awarded that are actually paid to claimants.

(2) CONTINGENCY FEES.—

(A) **IN GENERAL.**—In any health care lawsuit in which the attorney for a party claims a financial stake in the outcome by virtue of a contingent fee, the court shall have the power to restrict the payment of a claimant's damage recovery to such attorney, and to redirect such damages to the claimant based upon the interests of justice and principles of equity.

(B) **LIMITATION.**—The total of all contingent fees for representing all claimants in a health care lawsuit shall not exceed the following limits:

(i) 40 percent of the first \$50,000 recovered by the claimant(s).

(ii) 33½ percent of the next \$50,000 recovered by the claimant(s).

(iii) 25 percent of the next \$500,000 recovered by the claimant(s).

(iv) 15 percent of any amount by which the recovery by the claimant(s) is in excess of \$600,000.

(b) APPLICABILITY.—

(1) **IN GENERAL.**—The limitations in subsection (a) shall apply whether the recovery is by judgment, settlement, mediation, arbitration, or any other form of alternative dispute resolution.

(2) **MINORS.**—In a health care lawsuit involving a minor or incompetent person, a court retains the authority to authorize or approve a fee that is less than the maximum permitted under this section.

(c) EXPERT WITNESSES.—

(1) **REQUIREMENT.**—No individual shall be qualified to testify as an expert witness concerning issues of negligence in any health care lawsuit against a defendant unless such individual—

(A) except as required under paragraph (2), is a health care professional who—

(i) is appropriately credentialed or licensed in 1 or more States to deliver health care services; and

(ii) typically treats the diagnosis or condition or provides the type of treatment under review; and

(B) can demonstrate by competent evidence that, as a result of training, education,

knowledge, and experience in the evaluation, diagnosis, and treatment of the disease or injury which is the subject matter of the lawsuit against the defendant, the individual was substantially familiar with applicable standards of care and practice as they relate to the act or omission which is the subject of the lawsuit on the date of the incident.

(2) **PHYSICIAN REVIEW.**—In a health care lawsuit, if the claim of the plaintiff involved treatment that is recommended or provided by a physician (allopathic or osteopathic), an individual shall not be qualified to be an expert witness under this subsection with respect to issues of negligence concerning such treatment unless such individual is a physician.

(3) **SPECIALTIES AND SUBSPECIALTIES.**—With respect to a lawsuit described in paragraph (1), a court shall not permit an expert in one medical specialty or subspecialty to testify against a defendant in another medical specialty or subspecialty unless, in addition to a showing of substantial familiarity in accordance with paragraph (1)(B), there is a showing that the standards of care and practice in the two specialty or subspecialty fields are similar.

(4) **LIMITATION.**—The limitations in this subsection shall not apply to expert witnesses testifying as to the degree or permanency of medical or physical impairment.

SEC. 07. ADDITIONAL HEALTH BENEFITS.

(a) **IN GENERAL.**—The amount of any damages received by a claimant in any health care lawsuit shall be reduced by the court by the amount of any collateral source benefits to which the claimant is entitled, less any insurance premiums or other payments made by the claimant (or by the spouse, parent, child, or legal guardian of the claimant) to obtain or secure such benefits.

(b) **PRESERVATION OF CURRENT LAW.**—Where a payor of collateral source benefits has a right of recovery by reimbursement or subrogation and such right is permitted under Federal or State law, subsection (a) shall not apply.

(c) **APPLICATION OF PROVISION.**—This section shall apply to any health care lawsuit that is settled or resolved by a fact finder.

SEC. 08. PUNITIVE DAMAGES.

(a) PUNITIVE DAMAGES PERMITTED.—

(1) **IN GENERAL.**—Punitive damages may, if otherwise available under applicable State or Federal law, be awarded against any person in a health care lawsuit only if it is proven by clear and convincing evidence that such person acted with malicious intent to injure the claimant, or that such person deliberately failed to avoid unnecessary injury that such person knew the claimant was substantially certain to suffer.

(2) **FILING OF LAWSUIT.**—No demand for punitive damages shall be included in a health care lawsuit as initially filed. A court may allow a claimant to file an amended pleading for punitive damages only upon a motion by the claimant and after a finding by the court, upon review of supporting and opposing affidavits or after a hearing, after weighing the evidence, that the claimant has established by a substantial probability that the claimant will prevail on the claim for punitive damages.

(3) **SEPARATE PROCEEDING.**—At the request of any party in a health care lawsuit, the trier of fact shall consider in a separate proceeding—

(A) whether punitive damages are to be awarded and the amount of such award; and

(B) the amount of punitive damages following a determination of punitive liability. If a separate proceeding is requested, evidence relevant only to the claim for punitive

damages, as determined by applicable State law, shall be inadmissible in any proceeding to determine whether compensatory damages are to be awarded.

(4) **LIMITATION WHERE NO COMPENSATORY DAMAGES ARE AWARDED.**—In any health care lawsuit where no judgment for compensatory damages is rendered against a person, no punitive damages may be awarded with respect to the claim in such lawsuit against such person.

(b) **DETERMINING AMOUNT OF PUNITIVE DAMAGES.**—

(1) **FACTORS CONSIDERED.**—In determining the amount of punitive damages under this section, the trier of fact shall consider only the following:

(A) the severity of the harm caused by the conduct of such party;

(B) the duration of the conduct or any concealment of it by such party;

(C) the profitability of the conduct to such party;

(D) the number of products sold or medical procedures rendered for compensation, as the case may be, by such party, of the kind causing the harm complained of by the claimant;

(E) any criminal penalties imposed on such party, as a result of the conduct complained of by the claimant; and

(F) the amount of any civil fines assessed against such party as a result of the conduct complained of by the claimant.

(2) **MAXIMUM AWARD.**—The amount of punitive damages awarded in a health care lawsuit may not exceed an amount equal to two times the amount of economic damages awarded in the lawsuit or \$250,000, whichever is greater. The jury shall not be informed of the limitation under the preceding sentence.

(c) **LIABILITY OF HEALTH CARE PROVIDERS.**—

(1) **IN GENERAL.**—A health care provider who prescribes, or who dispenses pursuant to a prescription, a drug, biological product, or medical device approved by the Food and Drug Administration, for an approved indication of the drug, biological product, or medical device, shall not be named as a party to a product liability lawsuit invoking such drug, biological product, or medical device and shall not be liable to a claimant in a class action lawsuit against the manufacturer, distributor, or product seller of such drug, biological product, or medical device.

(2) **MEDICAL PRODUCT.**—The term “medical product” means a drug or device intended for humans. The terms “drug” and “device” have the meanings given such terms in sections 201(g)(1) and 201(h) of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 321), respectively, including any component or raw material used therein, but excluding health care services.

SEC. 09. AUTHORIZATION OF PAYMENT OF FUTURE DAMAGES TO CLAIMANTS IN HEALTH CARE LAWSUITS.

(a) **IN GENERAL.**—In any health care lawsuit, if an award of future damages, without reduction to present value, equaling or exceeding \$50,000 is made against a party with sufficient insurance or other assets to fund a periodic payment of such a judgment, the court shall, at the request of any party, enter a judgment ordering that the future damages be paid by periodic payments. In any health care lawsuit, the court may be guided by the Uniform Periodic Payment of Judgments Act promulgated by the National Conference of Commissioners on Uniform State Laws.

(b) **APPLICABILITY.**—This section applies to all actions which have not been first set for trial or retrial before the effective date of this title.

SEC. 10. EFFECT ON OTHER LAWS.

(a) **GENERAL VACCINE INJURY.**—

(1) **IN GENERAL.**—To the extent that title XXI of the Public Health Service Act establishes a Federal rule of law applicable to a civil action brought for a vaccine-related injury or death—

(A) this title shall not affect the application of the rule of law to such an action; and

(B) any rule of law prescribed by this title in conflict with a rule of law of such title XXI shall not apply to such action.

(2) **EXCEPTION.**—If there is an aspect of a civil action brought for a vaccine-related injury or death to which a Federal rule of law under title XXI of the Public Health Service Act does not apply, then this title or otherwise applicable law (as determined under this title) will apply to such aspect of such action.

(b) **SMALLPOX VACCINE INJURY.**—

(1) **IN GENERAL.**—To the extent that part C of title II of the Public Health Service Act establishes a Federal rule of law applicable to a civil action brought for a smallpox vaccine-related injury or death—

(A) this title shall not affect the application of the rule of law to such an action; and

(B) any rule of law prescribed by this title in conflict with a rule of law of such part C shall not apply to such action.

(2) **EXCEPTION.**—If there is an aspect of a civil action brought for a smallpox vaccine-related injury or death to which a Federal rule of law under part C of title II of the Public Health Service Act does not apply, then this title or otherwise applicable law (as determined under this title) will apply to such aspect of such action.

(c) **OTHER FEDERAL LAW.**—Except as provided in this section, nothing in this title shall be deemed to affect any defense available, or any limitation on liability that applies to, a defendant in a health care lawsuit or action under any other provision of Federal law.

SEC. 11. STATE FLEXIBILITY AND PROTECTION OF STATES' RIGHTS.

(a) **HEALTH CARE LAWSUITS.**—The provisions governing health care lawsuits set forth in this title shall preempt, subject to subsections (b) and (c), State law to the extent that State law prevents the application of any provisions of law established by or under this title. The provisions governing health care lawsuits set forth in this title supersede chapter 171 of title 28, United States Code, to the extent that such chapter—

(1) provides for a greater amount of damages or contingent fees, a longer period in which a health care lawsuit may be commenced, or a reduced applicability or scope of periodic payment of future damages, than provided in this title; or

(2) prohibits the introduction of evidence regarding collateral source benefits.

(b) **PREEMPTION OF CERTAIN STATE LAWS.**—No provision of this title shall be construed to preempt any State law (whether effective before, on, or after the date of the enactment of this Act) that specifies a particular monetary amount of compensatory or punitive damages (or the total amount of damages) that may be awarded in a health care lawsuit, regardless of whether such monetary amount is greater or lesser than is provided for under this title, notwithstanding section 05(a).

(c) **PROTECTION OF STATE'S RIGHTS AND OTHER LAWS.**—

(1) **IN GENERAL.**—Any issue that is not governed by a provision of law established by or under this title (including the State standards of negligence) shall be governed by otherwise applicable Federal or State law.

(2) **RULE OF CONSTRUCTION.**—Nothing in this title shall be construed to—

(A) preempt or supersede any Federal or State law that imposes greater procedural or substantive protections for a health care provider or health care institution from liability, loss, or damages than those provided by this title;

(B) preempt or supercede any State law that permits and provides for the enforcement of any arbitration agreement related to a health care liability claim whether enacted prior to or after the date of enactment of this Act;

(C) create a cause of action that is not otherwise available under Federal or State law; or

(D) affect the scope of preemption of any other Federal law.

SEC. 12. APPLICABILITY; EFFECTIVE DATE.

This title shall apply to any health care lawsuit brought in a Federal or State court, or subject to an alternative dispute resolution system, that is initiated on or after the date of the enactment of this Act, except that any health care lawsuit arising from an injury occurring prior to the date of enactment of this Act shall be governed by the applicable statute of limitations provisions in effect at the time the injury occurred.

SA 3285. Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 80, line 22, strike “and”.

On page 80, after line 25, add the following:

“(i) adherence to or participation in reasonably designed programs of health promotion and disease prevention, if such programs exist; and”.

On page 81, line 4, insert before the period the following: “, except that group health plans and health insurance issuers offering group or individual health insurance coverage may establish premium discounts or rebates for modifying otherwise applicable copayments or deductibles in return for adherence to or participation in reasonably designed programs of health promotion or disease prevention”.

Beginning on page 84, strike line 15 and all that follows through line 3 on page 94, and insert the following:

“(j) **PROGRAMS OF HEALTH PROMOTION OR DISEASE PREVENTION.**—

“(1) **GENERAL PROVISIONS.**—

“(A) **GENERAL RULE.**—For purposes of subsection (b)(2)(B), a program of health promotion or disease prevention (referred to in this subsection as a ‘wellness program’) shall be a program that is designed to promote health or prevent disease that meets the applicable requirements of this subsection.

“(B) **NO CONDITIONS BASED ON HEALTH STATUS FACTOR.**—If none of the conditions for obtaining a premium discount or rebate or other reward for participation in a wellness program is based on an individual satisfying a standard that is related to a health status factor, such wellness program shall not violate this section if participation in the program is made available to all similarly situated individuals and the requirements of paragraph (2) are complied with.

“(C) CONDITIONS BASED ON HEALTH STATUS FACTOR.—If any of the conditions for obtaining a premium discount or rebate or other reward for participation in a wellness program is based on an individual satisfying a standard that is related to a health status factor, such wellness program shall not violate this section if the requirements of paragraph (3) are complied with.

“(2) WELLNESS PROGRAMS NOT SUBJECT TO REQUIREMENTS.—If none of the conditions for obtaining a premium discount or rebate or other reward under a wellness program as described in paragraph (1)(B) are based on an individual satisfying a standard that is related to a health status factor (or if such a wellness program does not provide such a reward), the wellness program shall not violate this section if participation in the program is made available to all similarly situated individuals. The following programs shall not have to comply with the requirements of paragraph (3) if participation in the program is made available to all similarly situated individuals:

“(A) A program that reimburses all or part of the cost for memberships in a fitness center.

“(B) A diagnostic testing program that provides a reward for participation and does not base any part of the reward on outcomes.

“(C) A program that encourages preventive care related to a health condition through the waiver of the copayment or deductible requirement under an individual or group health plan for the costs of certain items or services related to a health condition (such as prenatal care or well-baby visits).

“(D) A program that reimburses individuals for the costs of smoking cessation programs without regard to whether the individual quits smoking.

“(E) A program that provides a reward to individuals for attending a periodic health education seminar.

“(3) WELLNESS PROGRAMS SUBJECT TO REQUIREMENTS.—If any of the conditions for obtaining a premium discount, rebate, or reward under a wellness program as described in paragraph (1)(C) is based on an individual satisfying a standard that is related to a health status factor, the wellness program shall not violate this section if the following requirements are complied with:

“(A) The reward for the wellness program, together with the reward for other wellness programs with respect to the plan that requires satisfaction of a standard related to a health status factor, shall not exceed 30 percent of the cost of employee-only coverage under the plan. If, in addition to employees or individuals, any class of dependents (such as spouses or spouses and dependent children) may participate fully in the wellness program, such reward shall not exceed 30 percent of the cost of the coverage in which an employee or individual and any dependents are enrolled. For purposes of this paragraph, the cost of coverage shall be determined based on the total amount of employer and employee contributions for the benefit package under which the employee is (or the employee and any dependents are) receiving coverage. A reward may be in the form of a discount or rebate of a premium or contribution, a waiver of all or part of a cost-sharing mechanism (such as deductibles, copayments, or coinsurance), the absence of a surcharge, or the value of a benefit that would otherwise not be provided under the plan. The Secretaries of Labor, Health and Human Services, and the Treasury may increase the reward available under this subparagraph to up to 50 percent of the

cost of coverage if the Secretaries determine that such an increase is appropriate.

“(B) The wellness program shall be reasonably designed to promote health or prevent disease. A program complies with the preceding sentence if the program has a reasonable chance of improving the health of, or preventing disease in, participating individuals and it is not overly burdensome, is not a subterfuge for discriminating based on a health status factor, and is not highly suspect in the method chosen to promote health or prevent disease. The plan or issuer shall evaluate the program's reasonableness at least once per year.

“(C) The plan shall give individuals eligible for the program the opportunity to qualify for the reward under the program at least once each year.

“(D) The full reward under the wellness program shall be made available to all similarly situated individuals. For such purpose, among other things:

“(i) The reward is not available to all similarly situated individuals for a period unless the wellness program allows—

“(I) for a reasonable alternative standard (or waiver of the otherwise applicable standard) for obtaining the reward for any individual for whom, for that period, it is unreasonably difficult due to a medical condition to satisfy the otherwise applicable standard; and

“(II) for a reasonable alternative standard (or waiver of the otherwise applicable standard) for obtaining the reward for any individual for whom, for that period, it is medically inadvisable to attempt to satisfy the otherwise applicable standard.

“(ii) If reasonable under the circumstances, the plan or issuer may seek verification, such as a statement from an individual's physician, that a health status factor makes it unreasonably difficult or medically inadvisable for the individual to satisfy or attempt to satisfy the otherwise applicable standard.

“(E) The plan or issuer involved shall disclose in all plan materials describing the terms of the wellness program the availability of a reasonable alternative standard (or the possibility of waiver of the otherwise applicable standard) required under subparagraph (D). If plan materials disclose that such a program is available, without describing its terms, the disclosure under this subparagraph shall not be required.

“(K) EXISTING PROGRAMS.—Nothing in this section shall prohibit a program of health promotion or disease prevention that was established prior to the date of enactment of this section and applied with all applicable regulations, and that is operating on such date, from continuing to be carried out for as long as such regulations remain in effect.

“(1) REGULATIONS.—Nothing in this section shall be construed as prohibiting the Secretaries of Labor, Health and Human Services, or the Treasury from promulgating regulations in connection with this section.”.

SA 3286. Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

On page 114, beginning with line 17, strike all through page 116, line 6, and insert the following:

(e) CATASTROPHIC PLAN.—A health plan not providing a bronze, silver, gold, or platinum level of coverage shall be treated as meeting the requirements of subsection (d) with respect to any plan year if the plan provides—

(1) except as provided in paragraph (1), the essential health benefits determined under subsection (b), except that the plan provides no benefits for any plan year until the individual has incurred cost-sharing expenses in an amount equal to the annual limitation in effect under subsection (c)(1) for the plan year (except as provided for in section 2713); and

(2) coverage for at least three primary care visits.

On page 155, beginning with line 22, strike all through page 156, line 3, and insert the following:

(A) INDIVIDUALS ALLOWED TO ENROLL IN ANY PLAN.—A qualified individual may enroll in any qualified health plan.

On page 250, lines 7 through 10, strike “, except that such term shall not include a qualified health plan which is a catastrophic health plan described in section 1302(e) of such Act”.

SA 3287. Mr. GREGG submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . PREVENTING THE GAMING OF THE 10 YEAR BUDGET WINDOW.

Section 402 of the Congressional Budget Act of 1974 (52 U.S.C. 653) is amended—

(1) in paragraph (2), by striking “and” after the semicolon;

(2) in paragraph (3), by striking the period and insert “; and”;

(3) by inserting at the end the following:

“(4) for any provisions with delayed effective dates or phase-in periods, an estimate of the costs for the year that the provision first becomes fully effective and for each of the following 9 fiscal years.”.

SA 3288. Mr. REID submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following: The provisions of this section shall be effective upon enactment.

SA 3289. Mr. REID submitted an amendment intended to be proposed to amendment SA 3289 submitted by Mr. REID and intended to be proposed to the amendment SA 2786 proposed by

Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

In the amendment, strike “upon enactment” and insert “5 days after enactment”.

SA 3290. Mr. REID submitted an amendment intended to be proposed by him to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the language proposed to be stricken, insert the following:

This section shall become effective 4 days after enactment.

SA 3291. Mr. REID submitted an amendment intended to be proposed to amendment SA 3290 submitted by Mr. REID and intended to be proposed to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

In the amendment, strike “upon enactment” and insert “5 days after enactment”.

SA 3292. Mr. REID submitted an amendment intended to be proposed by him to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

This section shall become effective 5 days after enactment.

SA 3293. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 2786 proposed by Mr. REID (for himself, Mr. BAUCUS, Mr. DODD, and Mr. HARKIN) to the bill H.R. 3590, to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes; which was ordered to lie on the table; as follows:

Beginning on page 1859, strike line 6 and all that follows through line 5 on page 1906, and insert the following:

Subtitle A—Patient Access to Safe and Competitive Biologics

SEC. 7001. SHORT TITLE.

(a) IN GENERAL.—This subtitle may be cited as the “Patient Access to Safe and Competitive Biologics Act”.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that a biosimilars pathway balancing innovation and consumer interests should be established.

SEC. 7002. APPROVAL PATHWAY FOR BIOSIMILAR BIOLOGICAL PRODUCTS.

(a) LICENSURE OF BIOLOGICAL PRODUCTS AS BIOSIMILAR OR THERAPEUTICALLY EQUIVALENT.—Section 351 of the Public Health Service Act (42 U.S.C. 262) is amended—

(1) in subsection (a)(1)(A), by inserting “under this subsection or subsection (k)” after “biologics license”; and

(2) by adding at the end the following:

“(k) LICENSURE OF BIOLOGICAL PRODUCTS AS BIOSIMILAR OR THERAPEUTICALLY EQUIVALENT.—

“(1) IN GENERAL.—Any person may submit an application for licensure of a biological product under this subsection.

“(2) CONTENT.—

“(A) IN GENERAL.—

“(i) REQUIRED INFORMATION.—An application submitted under this subsection shall include information demonstrating that—

“(I) the biological product is biosimilar to a reference product based upon data derived from—

“(aa) analytical studies that demonstrate that the biological product is highly similar to the reference product notwithstanding minor differences in clinically inactive components;

“(bb) animal studies (including the assessment of toxicity); and

“(cc) a clinical study or studies (including the assessment of immunogenicity and pharmacokinetics or pharmacodynamics) conducted by the applicant that are sufficient to demonstrate safety, purity, and potency in 1 or more appropriate conditions of use for which the reference product is licensed and intended to be used and for which licensure is sought for the biological product;

“(II) the biological product and reference product utilize the same mechanism or mechanisms of action for the condition or conditions of use prescribed, recommended, or suggested in the proposed labeling, but only to the extent the mechanism or mechanisms of action are known for the reference product;

“(III) the condition or conditions of use prescribed, recommended, or suggested in the labeling proposed for the biological product have been previously approved for the reference product;

“(IV) the route of administration, the dosage form, and the strength of the biological product are the same as those of the reference product; and

“(V) the facility in which the biological product is manufactured, processed, packed, or held meets standards designed to assure that the biological product continues to be safe, pure, and potent.

“(ii) DETERMINATION BY SECRETARY.—The Secretary may determine, after public notice and comment, that an element described in item (aa) or (bb) of clause (i)(I) is unnecessary in an application submitted under this subsection.

“(iii) ADDITIONAL INFORMATION.—An application submitted under this subsection—

“(I) shall include publicly-available information regarding the Secretary’s previous determination that the reference product is safe, pure, and potent; and

“(II) may include any additional information in support of the application, including publicly-available information with respect to the reference product or another biological product.

“(B) THERAPEUTIC EQUIVALENCE.—If a sponsor submits an application (or supplement to

an application) under this subsection claiming that the biologics product is therapeutically equivalent to the reference product, such application (or supplement) shall include information demonstrating that the biological product meets the standards described in paragraph (4)(A).

“(3) EVALUATION BY SECRETARY.—Upon review of an application (or a supplement to an application) submitted under this subsection, the Secretary shall license the biological product under this subsection if—

“(A) the Secretary determines that the information submitted in the application (or the supplement) is sufficient to show that the biological product—

“(i) is biosimilar to the reference product; or

“(ii) meets the standards described in paragraph (4)(A), and therefore is therapeutically equivalent to the reference product; and

“(B) the applicant (or other appropriate person) consents to the inspection of the facility that is the subject of the application, in accordance with subsection (c).

“(4) SAFETY STANDARDS FOR DETERMINING THERAPEUTIC EQUIVALENCE.—

“(A) DETERMINATION BY THE SECRETARY.—Upon review of an application submitted under this subsection or any supplement to such application, the Secretary shall determine the biological product to have demonstrated therapeutic equivalence to the reference product if the Secretary determines that the information submitted in the application (or a supplement to such application) is sufficient to show that—

“(i) the biological product—

“(I) is biosimilar to the reference product; and

“(II) can be expected to produce the same clinical result as the reference product in any given patient; and

“(ii) for a biological product that is administered more than once to an individual, the risk in terms of safety or diminished efficacy of alternating or switching between use of the biological product and the reference product is not greater than the risk of using the reference product without such alternation or switch.

“(B) APPLICATION OF THERAPEUTIC EQUIVALENCE ONLY WITH PRESCRIPTION.—Notwithstanding any other provision of law, no biological product determined to be therapeutically equivalent to a reference product under subparagraph (A) shall be deemed to be therapeutically appropriate with respect to an individual unless so determined by a health care professional treating such individual.

“(5) GENERAL RULES.—

“(A) ONE REFERENCE PRODUCT PER APPLICATION.—A biological product, in an application submitted under this subsection, may not be evaluated against more than 1 reference product.

“(B) REVIEW.—An application submitted under this subsection shall be reviewed by the division within the Food and Drug Administration that is responsible for the review and approval of the application under which the reference product is licensed.

“(C) RISK EVALUATION AND MITIGATION STRATEGIES.—The authority of the Secretary with respect to risk evaluation and mitigation strategies under the Federal Food, Drug, and Cosmetic Act shall apply to biological products licensed under this subsection in the same manner as such authority applies to biological products licensed under subsection (a).

“(6) EXCLUSIVITY FOR FIRST THERAPEUTICALLY EQUIVALENT BIOLOGICAL PRODUCT.—Upon review of an application submitted

under this subsection relying on the same reference product for which a prior biological product has received a determination of therapeutic equivalence for any condition of use, the Secretary shall not make a determination under paragraph (4)(A) that the second or subsequent biological product is therapeutically equivalent for any condition of use until the earlier of—

“(A) 1 year after the first commercial marketing of the first biosimilar biological product to be approved as therapeutically equivalent for that reference product;

“(B) 18 months after—

“(i) a final court decision on all patents in suit in an action instituted under subsection (1)(6) against the applicant that submitted the application for the first approved therapeutically equivalent biosimilar biological product; or

“(ii) the dismissal with or without prejudice of an action instituted under subsection (1)(6) against the applicant that submitted the application for the first approved therapeutically equivalent biosimilar biological product; or

“(C)(i) 42 months after approval of the first therapeutically equivalent biosimilar biological product if the applicant that submitted such application has been sued under subsection (1)(6) and such litigation is still ongoing within such 42-month period; or

“(ii) 18 months after approval of the first therapeutically equivalent biosimilar biological product if the applicant that submitted such application has not been sued under subsection (1)(6).

For purposes of this paragraph, the term ‘final court decision’ means a final decision of a court from which no appeal (other than a petition to the United States Supreme Court for a writ of certiorari) has been or can be taken.

“(7) EXCLUSIVITY FOR REFERENCE PRODUCT.—

“(A) EFFECTIVE DATE OF BIOSIMILAR APPLICATION APPROVAL.—

“(i) IN GENERAL.—Except as provided in clause (ii) and (iii), approval of an application under this subsection may not be made effective by the Secretary until the date that is 10 years after the date on which the reference product was first licensed under subsection (a).

“(ii) EXTENSION OF EXCLUSIVITY.—The period of exclusivity described in clause (i) for a reference product shall be extended for an additional 2 years beyond the 10 years provided in such clause if the sponsor or manufacturer of the reference product submits a subsequent application for a change (not including a modification to the structure of the reference product) that results in a new indication for the reference product.

“(iii) SIGNIFICANT THERAPEUTIC ADVANCEMENT.—If a reference product represents a significant therapeutic advancement (including a modification that results in a new dosage form, new dosing regimen, or new route of administration of such biological product) of a biological product that was previously licensed under subsection (a) and that has the same sponsor or manufacturer as such reference product, then the period of exclusivity for such reference product shall be the number of years equal to the sum of—

“(I) the remaining period of exclusivity under clause (i) for biological product on which the reference product representing the significant therapeutic advancement was based, plus

“(II) 2 years.

“(iv) NO EXTENSION FOR SIGNIFICANT THERAPEUTIC ADVANCEMENT.—In no case may the

period of exclusivity under clause (iii) be extended.

“(B) FILING PERIOD.—An application under this subsection may not be submitted to the Secretary until the date that is 4 years after the date on which the reference product was first licensed under subsection (a).

“(C) FIRST LICENSURE.—The date on which the reference product was first licensed under subsection (a) does not include the date of approval of a supplement or of a subsequent application for a new indication, route of administration, dosage form, or strength for the previously licensed reference product.

“(8) GUIDANCE DOCUMENTS.—

“(A) IN GENERAL.—The Secretary may, after opportunity for public comment, issue guidance in accordance, except as provided in subparagraph (B)(i), with section 701(h) of the Federal Food, Drug, and Cosmetic Act with respect to the licensure of a biological product under this subsection. Any such guidance may be general or specific.

“(B) PUBLIC COMMENT.—

“(i) IN GENERAL.—The Secretary shall provide the public an opportunity to comment on any proposed guidance issued under subparagraph (A) before issuing final guidance.

“(ii) INPUT REGARDING MOST VALUABLE GUIDANCE.—The Secretary shall establish a process through which the public may provide the Secretary with input regarding priorities for issuing guidance.

“(C) NO REQUIREMENT FOR APPLICATION CONSIDERATION.—The issuance (or non-issuance) of guidance under subparagraph (A) shall not preclude the review of, or action on, an application submitted under this subsection.

“(D) REQUIREMENT FOR PRODUCT CLASS-SPECIFIC GUIDANCE.—If the Secretary issues product class-specific guidance under subparagraph (A), such guidance shall include a description of—

“(i) the criteria that the Secretary will use to determine whether a biological product is highly similar to a reference product in such product class; and

“(ii) the criteria, if available, that the Secretary will use to determine whether a biological product meets the standards described in paragraph (4)(A).

“(E) CERTAIN PRODUCT CLASSES.—

“(i) GUIDANCE.—The Secretary may indicate in a guidance document that the science and experience, as of the date of such guidance, with respect to a product or product class (not including any recombinant protein) does not allow approval of an application for a license as provided under this subsection for such product or product class.

“(ii) MODIFICATION OR REVERSAL.—The Secretary may issue a subsequent guidance document under subparagraph (A) to modify or reverse a guidance document under clause (i).

“(iii) NO EFFECT ON ABILITY TO DENY LICENSURE.—Clause (i) shall not be construed to require the Secretary to approve a product with respect to which the Secretary has not indicated in a guidance document that the science and experience, as described in clause (i), does not allow approval of such an application.

“(1) PATENTS.—

“(I) CONFIDENTIAL ACCESS TO SUBSECTION (K) APPLICATION.—

“(A) APPLICATION OF PARAGRAPH.—Unless otherwise agreed to by a person that submits an application under subsection (k) (referred to in this subsection as the ‘subsection (k) applicant’) and the sponsor of the application for the reference product (referred to in this subsection as the ‘reference product

sponsor’), the provisions of this paragraph shall apply to the exchange of information described in this subsection.

“(B) IN GENERAL.—

“(i) PROVISION OF CONFIDENTIAL INFORMATION.—When a subsection (k) applicant submits an application under subsection (k), such applicant shall provide to the persons described in clause (ii), subject to the terms of this paragraph, confidential access to the information required to be produced pursuant to paragraph (2) and any other information that the subsection (k) applicant determines, in its sole discretion, to be appropriate (referred to in this subsection as the ‘confidential information’).

“(ii) RECIPIENTS OF INFORMATION.—The persons described in this clause are the following:

“(I) OUTSIDE COUNSEL.—One or more attorneys designated by the reference product sponsor who are employees of an entity other than the reference product sponsor (referred to in this paragraph as the ‘outside counsel’), provided that such attorneys do not engage, formally or informally, in patent prosecution relevant or related to the reference product.

“(II) IN-HOUSE COUNSEL.—One attorney that represents the reference product sponsor who is an employee of the reference product sponsor, provided that such attorney does not engage, formally or informally, in patent prosecution relevant or related to the reference product.

“(iii) PATENT OWNER ACCESS.—A representative of the owner of a patent exclusively licensed to a reference product sponsor with respect to the reference product and who has retained a right to assert the patent or participate in litigation concerning the patent may be provided the confidential information, provided that the representative informs the reference product sponsor and the subsection (k) applicant of his or her agreement to be subject to the confidentiality provisions set forth in this paragraph, including those under clause (ii).

“(C) LIMITATION ON DISCLOSURE.—No person that receives confidential information pursuant to subparagraph (B) shall disclose any confidential information to any other person or entity, including the reference product sponsor employees, outside scientific consultants, or other outside counsel retained by the reference product sponsor, without the prior written consent of the subsection (k) applicant, which shall not be unreasonably withheld.

“(D) USE OF CONFIDENTIAL INFORMATION.—Confidential information shall be used for the sole and exclusive purpose of determining, with respect to each patent assigned to or exclusively licensed by the reference product sponsor, whether a claim of patent infringement could reasonably be asserted if the subsection (k) applicant engaged in the manufacture, use, offering for sale, sale, or importation into the United States of the biological product that is the subject of the application under subsection (k).

“(E) OWNERSHIP OF CONFIDENTIAL INFORMATION.—The confidential information disclosed under this paragraph is, and shall remain, the property of the subsection (k) applicant. By providing the confidential information pursuant to this paragraph, the subsection (k) applicant does not provide the reference product sponsor or the outside counsel any interest in or license to use the confidential information, for purposes other than those specified in subparagraph (D).

“(F) EFFECT OF INFRINGEMENT ACTION.—In the event that the reference product sponsor

files a patent infringement suit, the use of confidential information shall continue to be governed by the terms of this paragraph until such time as a court enters a protective order regarding the information. Upon entry of such order, the subsection (k) applicant may redesignate confidential information in accordance with the terms of that order. No confidential information shall be included in any publicly-available complaint or other pleading. In the event that the reference product sponsor does not file an infringement action by the date specified in paragraph (6), the reference product sponsor shall return or destroy all confidential information received under this paragraph, provided that if the reference product sponsor opts to destroy such information, it will confirm destruction in writing to the subsection (k) applicant.

“(G) RULE OF CONSTRUCTION.—Nothing in this paragraph shall be construed—

“(i) as an admission by the subsection (k) applicant regarding the validity, enforceability, or infringement of any patent; or

“(ii) as an agreement or admission by the subsection (k) applicant with respect to the competency, relevance, or materiality of any confidential information.

“(H) EFFECT OF VIOLATION.—The disclosure of any confidential information in violation of this paragraph shall be deemed to cause the subsection (k) applicant to suffer irreparable harm for which there is no adequate legal remedy and the court shall consider immediate injunctive relief to be an appropriate and necessary remedy for any violation or threatened violation of this paragraph.

“(2) SUBSECTION (k) APPLICATION INFORMATION.—Not later than 20 days after the Secretary notifies the subsection (k) applicant that the application has been accepted for review, the subsection (k) applicant—

“(A) shall provide to the reference product sponsor a copy of the application submitted to the Secretary under subsection (k), and such other information that describes the process or processes used to manufacture the biological product that is the subject of such application; and

“(B) may provide to the reference product sponsor additional information requested by or on behalf of the reference product sponsor.

“(3) LIST AND DESCRIPTION OF PATENTS.—

“(A) LIST BY REFERENCE PRODUCT SPONSOR.—Not later than 60 days after the receipt of the application and information under paragraph (2), the reference product sponsor shall provide to the subsection (k) applicant—

“(i) a list of patents for which the reference product sponsor believes a claim of patent infringement could reasonably be asserted by the reference product sponsor, or by a patent owner that has granted an exclusive license to the reference product sponsor with respect to the reference product, if a person not licensed by the reference product sponsor engaged in the making, using, offering to sell, selling, or importing into the United States of the biological product that is the subject of the subsection (k) application; and

“(ii) an identification of the patents on such list that the reference product sponsor would be prepared to license to the subsection (k) applicant.

“(B) LIST AND DESCRIPTION BY SUBSECTION (k) APPLICANT.—Not later than 60 days after receipt of the list under subparagraph (A), the subsection (k) applicant—

“(i) may provide to the reference product sponsor a list of patents to which the sub-

section (k) applicant believes a claim of patent infringement could reasonably be asserted by the reference product sponsor if a person not licensed by the reference product sponsor engaged in the making, using, offering to sell, selling, or importing into the United States of the biological product that is the subject of the subsection (k) application;

“(ii) shall provide to the reference product sponsor, with respect to each patent listed by the reference product sponsor under subparagraph (A) or listed by the subsection (k) applicant under clause (i)—

“(I) a detailed statement that describes, on a claim by claim basis, the factual and legal basis of the opinion of the subsection (k) applicant that such patent is invalid, unenforceable, or will not be infringed by the commercial marketing of the biological product that is the subject of the subsection (k) application; or

“(II) a statement that the subsection (k) applicant does not intend to begin commercial marketing of the biological product before the date that such patent expires; and

“(iii) shall provide to the reference product sponsor a response regarding each patent identified by the reference product sponsor under subparagraph (A)(ii).

“(C) DESCRIPTION BY REFERENCE PRODUCT SPONSOR.—Not later than 60 days after receipt of the list and statement under subparagraph (B), the reference product sponsor shall provide to the subsection (k) applicant a detailed statement that describes, with respect to each patent described in subparagraph (B)(ii)(I), on a claim by claim basis, the factual and legal basis of the opinion of the reference product sponsor that such patent will be infringed by the commercial marketing of the biological product that is the subject of the subsection (k) application and a response to the statement concerning validity and enforceability provided under subparagraph (B)(ii)(I).

“(4) PATENT RESOLUTION NEGOTIATIONS.—

“(A) IN GENERAL.—After receipt by the subsection (k) applicant of the statement under paragraph (3)(C), the reference product sponsor and the subsection (k) applicant shall engage in good faith negotiations to agree on which, if any, patents listed under paragraph (3) by the subsection (k) applicant or the reference product sponsor shall be the subject of an action for patent infringement under paragraph (6).

“(B) FAILURE TO REACH AGREEMENT.—If, within 15 days of beginning negotiations under subparagraph (A), the subsection (k) applicant and the reference product sponsor fail to agree on a final and complete list of which, if any, patents listed under paragraph (3) by the subsection (k) applicant or the reference product sponsor shall be the subject of an action for patent infringement under paragraph (6), the provisions of paragraph (5) shall apply to the parties.

“(5) PATENT RESOLUTION IF NO AGREEMENT.—

“(A) NUMBER OF PATENTS.—The subsection (k) applicant shall notify the reference product sponsor of the number of patents that such applicant will provide to the reference product sponsor under subparagraph (B)(i)(I).

“(B) EXCHANGE OF PATENT LISTS.—

“(i) IN GENERAL.—On a date agreed to by the subsection (k) applicant and the reference product sponsor, but in no case later than 5 days after the subsection (k) applicant notifies the reference product sponsor under subparagraph (A), the subsection (k) applicant and the reference product sponsor shall simultaneously exchange—

“(I) the list of patents that the subsection (k) applicant believes should be the subject of an action for patent infringement under paragraph (6); and

“(II) the list of patents, in accordance with clause (ii), that the reference product sponsor believes should be the subject of an action for patent infringement under paragraph (6).

“(ii) NUMBER OF PATENTS LISTED BY REFERENCE PRODUCT SPONSOR.—

“(I) IN GENERAL.—Subject to subclause (II), the number of patents listed by the reference product sponsor under clause (i)(II) may not exceed the number of patents listed by the subsection (k) applicant under clause (i)(I).

“(II) EXCEPTION.—If a subsection (k) applicant does not list any patent under clause (i)(I), the reference product sponsor may list 1 patent under clause (i)(II).

“(6) IMMEDIATE PATENT INFRINGEMENT ACTION.—

“(A) ACTION IF AGREEMENT ON PATENT LIST.—If the subsection (k) applicant and the reference product sponsor agree on patents as described in paragraph (4), not later than 30 days after such agreement, the reference product sponsor shall bring an action for patent infringement with respect to each such patent.

“(B) ACTION IF NO AGREEMENT ON PATENT LIST.—If the provisions of paragraph (5) apply to the parties as described in paragraph (4)(B), not later than 30 days after the exchange of lists under paragraph (5)(B), the reference product sponsor shall bring an action for patent infringement with respect to each patent that is included on such lists.

“(C) NOTIFICATION AND PUBLICATION OF COMPLAINT.—

“(i) NOTIFICATION TO SECRETARY.—Not later than 30 days after a complaint is served to a subsection (k) applicant in an action for patent infringement described under this paragraph, the subsection (k) applicant shall provide the Secretary with notice and a copy of such complaint.

“(ii) PUBLICATION BY SECRETARY.—The Secretary shall publish in the Federal Register notice of a complaint received under clause (i).

“(7) NEWLY ISSUED OR LICENSED PATENTS.—In the case of a patent that—

“(A) is issued to, or exclusively licensed by, the reference product sponsor after the date that the reference product sponsor provided the list to the subsection (k) applicant under paragraph (3)(A); and

“(B) the reference product sponsor reasonably believes that, due to the issuance of such patent, a claim of patent infringement could reasonably be asserted by the reference product sponsor if a person not licensed by the reference product sponsor engaged in the making, using, offering to sell, selling, or importing into the United States of the biological product that is the subject of the subsection (k) application,

not later than 30 days after such issuance or licensing, the reference product sponsor shall provide to the subsection (k) applicant a supplement to the list provided by the reference product sponsor under paragraph (3)(A) that includes such patent, not later than 30 days after such supplement is provided, the subsection (k) applicant shall provide a statement to the reference product sponsor in accordance with paragraph (3)(B), and such patent shall be subject to paragraph (8).

“(8) NOTICE OF COMMERCIAL MARKETING AND PRELIMINARY INJUNCTION.—

“(A) NOTICE OF COMMERCIAL MARKETING.—The subsection (k) applicant shall provide notice to the reference product sponsor not

later than 180 days before the date of the first commercial marketing of the biological product licensed under subsection (k).

“(B) PRELIMINARY INJUNCTION.—After receiving the notice under subparagraph (A) and before such date of the first commercial marketing of such biological product, the reference product sponsor may seek a preliminary injunction prohibiting the subsection (k) applicant from engaging in the commercial manufacture or sale of such biological product until the court decides the issue of patent validity, enforcement, and infringement with respect to any patent that is—

“(i) included in the list provided by the reference product sponsor under paragraph (3)(A) or in the list provided by the subsection (k) applicant under paragraph (3)(B); and

“(ii) not included, as applicable, on—

“(I) the list of patents described in paragraph (4); or

“(II) the lists of patents described in paragraph (5)(B).

“(C) REASONABLE COOPERATION.—If the reference product sponsor has sought a preliminary injunction under subparagraph (B), the reference product sponsor and the subsection (k) applicant shall reasonably cooperate to expedite such further discovery as is needed in connection with the preliminary injunction motion.

“(9) LIMITATION ON DECLARATORY JUDGMENT ACTION.—

“(A) SUBSECTION (k) APPLICATION PROVIDED.—If a subsection (k) applicant provides the application and information required under paragraph (2)(A), neither the reference product sponsor nor the subsection (k) applicant may, prior to the date notice is received under paragraph (8)(A), bring any action under section 2201 of title 28, United States Code, for a declaration of infringement, validity, or enforceability of any patent that is described in clauses (i) and (ii) of paragraph (8)(B).

“(B) SUBSEQUENT FAILURE TO ACT BY SUBSECTION (k) APPLICANT.—If a subsection (k) applicant fails to complete an action required of the subsection (k) applicant under paragraph (3)(B)(ii), paragraph (5), paragraph (6)(C)(i), paragraph (7), or paragraph (8)(A), the reference product sponsor, but not the subsection (k) applicant, may bring an action under section 2201 of title 28, United States Code, for a declaration of infringement, validity, or enforceability of any patent included in the list described in paragraph (3)(A), including as provided under paragraph (7).

“(C) SUBSECTION (k) APPLICATION NOT PROVIDED.—If a subsection (k) applicant fails to provide the application and information required under paragraph (2)(A), the reference product sponsor, but not the subsection (k) applicant, may bring an action under section 2201 of title 28, United States Code, for a declaration of infringement, validity, or enforceability of any patent that claims the biological product or a use of the biological product.”

(b) DEFINITIONS.—Section 351(i) of the Public Health Service Act (42 U.S.C. 262(i)) is amended—

(1) by striking “In this section, the term ‘biological product’ means” and inserting the following: “In this section:

“(1) The term ‘biological product’ means”;

(2) in paragraph (1), as so designated, by inserting “protein (except any chemically synthesized polypeptide),” after “allergenic product,”; and

(3) by adding at the end the following:

“(2) The term ‘biosimilar’ or ‘biosimilarity’, in reference to a biological product that is the subject of an application under subsection (k), means—

“(A) that the biological product is highly similar to the reference product notwithstanding minor differences in clinically inactive components; and

“(B) there are no clinically meaningful differences between the biological product and the reference product in terms of the safety, purity, and potency of the product.

“(3) The term ‘reference product’ means the single biological product licensed under subsection (a) against which a biological product is evaluated in an application submitted under subsection (k).

“(4) The term ‘therapeutically equivalent’ or ‘therapeutic equivalence’, in reference to a biological product, means that such product has been determined to meet the standards described in subsection (k)(4).”

(c) CONFORMING AMENDMENTS RELATING TO PATENTS.—

(1) PATENTS.—Section 271(e) of title 35, United States Code, is amended—

(A) in paragraph (2)—

(i) in subparagraph (A), by striking “or” at the end;

(ii) in subparagraph (B), by adding “or” at the end; and

(iii) by inserting after subparagraph (B) the following:

“(C)(i) with respect to a patent that is identified in the list of patents described in section 351(1)(3) of the Public Health Service Act (including as provided under section 351(1)(7) of such Act), an application seeking approval of a biological product, or

“(ii) if the applicant for the application fails to provide the application and information required under section 351(1)(2)(A) of such Act, an application seeking approval of a biological product for a patent that could be identified pursuant to section 351(1)(3)(A)(i) of such Act,”; and

(iv) in the matter following subparagraph (C) (as added by clause (iii)), by striking “or veterinary biological product” and inserting “, veterinary biological product, or biological product”;

(B) in paragraph (4)—

(i) in subparagraph (B), by—

(I) striking “or veterinary biological product” and inserting “, veterinary biological product, or biological product”; and

(II) striking “and” at the end;

(ii) in subparagraph (C), by—

(I) striking “or veterinary biological product” and inserting “, veterinary biological product, or biological product”; and

(II) striking the period and inserting “, and”;

(iii) by inserting after subparagraph (C) the following:

“(D) the court shall order a permanent injunction prohibiting any infringement of the patent by the biological product involved in the infringement until a date which is not earlier than the date of the expiration of the patent that has been infringed under paragraph (2)(C), provided the patent is the subject of a final court decision, as defined in section 351(k)(6) of the Public Health Service Act, in an action for infringement of the patent under section 351(1)(6) of such Act, and the biological product has not yet been approved because of section 351(k)(7) of such Act.”; and

(iv) in the matter following subparagraph (D) (as added by clause (iii)), by striking “and (C)” and inserting “(C), and (D)”;

(C) by adding at the end the following:

“(6)(A) Subparagraph (B) applies, in lieu of paragraph (4), in the case of a patent—

“(i) that is identified, as applicable, in the list of patents described in section 351(1)(4) of the Public Health Service Act or the lists of patents described in section 351(1)(5)(B) of such Act with respect to a biological product; and

“(ii) for which an action for infringement of the patent with respect to the biological product—

“(I) was brought after the expiration of the 30-day period described in subparagraph (A) or (B), as applicable, of section 351(1)(6) of such Act; or

“(II) was brought before the expiration of the 30-day period described in subclause (I), but which was dismissed without prejudice or was not prosecuted to judgment in good faith.

“(B) In an action for infringement of a patent described in subparagraph (A), the sole and exclusive remedy that may be granted by a court, upon a finding that the making, using, offering to sell, selling, or importation into the United States of the biological product that is the subject of the action infringing the patent, shall be a reasonable royalty.

“(C) The owner of a patent that should have been included in the list described in section 351(1)(3)(A) of the Public Health Service Act, including as provided under section 351(1)(7) of such Act for a biological product, but was not timely included in such list, may not bring an action under this section for infringement of the patent with respect to the biological product.”

(2) CONFORMING AMENDMENT UNDER TITLE 28.—Section 2201(b) of title 28, United States Code, is amended by inserting before the period the following: “, or section 351 of the Public Health Service Act”.

(d) CONFORMING AMENDMENTS UNDER THE FEDERAL FOOD, DRUG, AND COSMETIC ACT.—

(1) CONTENT AND REVIEW OF APPLICATIONS.—Section 505(b)(5)(B) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(b)(5)(B)) is amended by inserting before the period at the end of the first sentence the following: “or, with respect to an applicant for approval of a biological product under section 351(k) of the Public Health Service Act, any necessary clinical study or studies”.

(2) NEW ACTIVE INGREDIENT.—Section 505B of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355c) is amended by adding at the end the following:

“(n) NEW ACTIVE INGREDIENT.—

“(1) NON-THERAPEUTICALLY EQUIVALENT BIOSIMILAR BIOLOGICAL PRODUCT.—A biological product that is biosimilar to a reference product under section 351 of the Public Health Service Act, and that the Secretary has not determined to meet the standards described in subsection (k)(4) of such section for therapeutic equivalence with the reference product, shall be considered to have a new active ingredient under this section.

“(2) THERAPEUTICALLY EQUIVALENT BIOSIMILAR BIOLOGICAL PRODUCT.—A biological product that is therapeutically equivalent with a reference product under section 351 of the Public Health Service Act shall not be considered to have a new active ingredient under this section.”

(e) PRODUCTS PREVIOUSLY APPROVED UNDER SECTION 505.—

(1) REQUIREMENT TO FOLLOW SECTION 351.—Except as provided in paragraph (2), an application for a biological product shall be submitted under section 351 of the Public Health Service Act (42 U.S.C. 262) (as amended by this Act).

(2) EXCEPTION.—An application for a biological product may be submitted under section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) if—

(A) such biological product is in a product class for which a biological product in such product class is the subject of an application approved under such section 505 not later than the date of enactment of this Act; and

(B) such application—

(i) has been submitted to the Secretary of Health and Human Services (referred to in this subtitle as the “Secretary”) before the date of enactment of this Act; or

(ii) is submitted to the Secretary not later than the date that is 10 years after the date of enactment of this Act.

(3) LIMITATION.—Notwithstanding paragraph (2), an application for a biological product may not be submitted under section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) if there is another biological product approved under subsection (a) of section 351 of the Public Health Service Act that could be a reference product with respect to such application (within the meaning of such section 351) if such application were submitted under subsection (k) of such section 351.

(4) DEEMED APPROVED UNDER SECTION 351.—An approved application for a biological product under section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) shall be deemed to be a license for the biological product under such section 351 on the date that is 10 years after the date of enactment of this Act.

(5) DEFINITIONS.—For purposes of this subsection, the term “biological product” has the meaning given such term under section 351 of the Public Health Service Act (42 U.S.C. 262) (as amended by this Act).

(f) FOLLOW-ON BIOLOGICS USER FEES.—

(1) DEVELOPMENT OF USER FEES FOR BIOSIMILAR BIOLOGICAL PRODUCTS.—

(A) IN GENERAL.—Beginning not later than October 1, 2010, the Secretary shall develop recommendations to present to Congress with respect to the goals, and plans for meeting the goals, for the process for the review of biosimilar biological product applications submitted under section 351(k) of the Public Health Service Act (as added by this Act) for the first 5 fiscal years after fiscal year 2012. In developing such recommendations, the Secretary shall consult with—

(i) the Committee on Health, Education, Labor, and Pensions of the Senate;

(ii) the Committee on Energy and Commerce of the House of Representatives;

(iii) scientific and academic experts;

(iv) health care professionals;

(v) representatives of patient and consumer advocacy groups; and

(vi) the regulated industry.

(B) PUBLIC REVIEW OF RECOMMENDATIONS.—After negotiations with the regulated industry, the Secretary shall—

(i) present the recommendations developed under subparagraph (A) to the Congressional committees specified in such subparagraph;

(ii) publish such recommendations in the Federal Register;

(iii) provide for a period of 30 days for the public to provide written comments on such recommendations;

(iv) hold a meeting at which the public may present its views on such recommendations; and

(v) after consideration of such public views and comments, revise such recommendations as necessary.

(C) TRANSMITTAL OF RECOMMENDATIONS.—Not later than January 15, 2012, the Sec-

retary shall transmit to Congress the revised recommendations under subparagraph (B), a summary of the views and comments received under such subparagraph, and any changes made to the recommendations in response to such views and comments.

(2) ESTABLISHMENT OF USER FEE PROGRAM.—It is the sense of the Senate that, based on the recommendations transmitted to Congress by the Secretary pursuant to paragraph (1)(C), Congress should authorize a program, effective on October 1, 2012, for the collection of user fees relating to the submission of biosimilar biological product applications under section 351(k) of the Public Health Service Act (as added by this Act).

(3) TRANSITIONAL PROVISIONS FOR USER FEES FOR BIOSIMILAR BIOLOGICAL PRODUCTS.—

(A) APPLICATION OF THE PRESCRIPTION DRUG USER FEE PROVISIONS.—Section 735(1)(B) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 379g(1)(B)) is amended by striking “section 351” and inserting “subsection (a) or (k) of section 351”.

(B) EVALUATION OF COSTS OF REVIEWING BIOSIMILAR BIOLOGICAL PRODUCT APPLICATIONS.—During the period beginning on the date of enactment of this Act and ending on October 1, 2010, the Secretary shall collect and evaluate data regarding the costs of reviewing applications for biological products submitted under section 351(k) of the Public Health Service Act (as added by this Act) during such period.

(C) AUDIT.—

(i) IN GENERAL.—On the date that is 2 years after first receiving a user fee applicable to an application for a biological product under section 351(k) of the Public Health Service Act (as added by this Act), and on a biennial basis thereafter until October 1, 2013, the Secretary shall perform an audit of the costs of reviewing such applications under such section 351(k). Such an audit shall compare—

(I) the costs of reviewing such applications under such section 351(k) to the amount of the user fee applicable to such applications; and

(II)(aa) such ratio determined under subclause (I); to

(bb) the ratio of the costs of reviewing applications for biological products under section 351(a) of such Act (as amended by this Act) to the amount of the user fee applicable to such applications under such section 351(a).

(ii) ALTERATION OF USER FEE.—If the audit performed under clause (i) indicates that the ratios compared under subclause (II) of such clause differ by more than 5 percent, then the Secretary shall alter the user fee applicable to applications submitted under such section 351(k) to more appropriately account for the costs of reviewing such applications.

(iii) ACCOUNTING STANDARDS.—The Secretary shall perform an audit under clause (i) in conformance with the accounting principles, standards, and requirements prescribed by the Comptroller General of the United States under section 3511 of title 31, United States Code, to ensure the validity of any potential variability.

(4) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection such sums as may be necessary for each of fiscal years 2010 through 2012.

(g) PEDIATRIC STUDIES OF BIOLOGICAL PRODUCTS.—

(1) IN GENERAL.—Section 351 of the Public Health Service Act (42 U.S.C. 262) is amended by adding at the end the following:

“(m) PEDIATRIC STUDIES.—

“(1) APPLICATION OF CERTAIN PROVISIONS.—The provisions of subsections (a), (d), (e), (f),

(i), (j), (k), (l), (p), and (q) of section 505A of the Federal Food, Drug, and Cosmetic Act shall apply with respect to the extension of a period under paragraphs (2) and (3) to the same extent and in the same manner as such provisions apply with respect to the extension of a period under subsection (b) or (c) of section 505A of the Federal Food, Drug, and Cosmetic Act.

“(2) MARKET EXCLUSIVITY FOR NEW BIOLOGICAL PRODUCTS.—If, prior to approval of an application that is submitted under subsection (a), the Secretary determines that information relating to the use of a new biological product in the pediatric population may produce health benefits in that population, the Secretary makes a written request for pediatric studies (which shall include a timeframe for completing such studies), the applicant agrees to the request, such studies are completed using appropriate formulations for each age group for which the study is requested within any such timeframe, and the reports thereof are submitted and accepted in accordance with section 505A(d)(3) of the Federal Food, Drug, and Cosmetic Act—

“(A) the periods for such biological product referred to in subsection (k)(7)(B) are deemed to be 4 years and 6 months rather than 4 years and the date that is 6 months after the date described in subsection (k)(7)(A) rather than the date described in such subsection; and; and

“(B) if the biological product is designated under section 526 for a rare disease or condition, the period for such biological product referred to in section 527(a) is deemed to be 7 years and 6 months rather than 7 years.

“(3) MARKET EXCLUSIVITY FOR ALREADY-MARKETED BIOLOGICAL PRODUCTS.—If the Secretary determines that information relating to the use of a licensed biological product in the pediatric population may produce health benefits in that population and makes a written request to the holder of an approved application under subsection (a) for pediatric studies (which shall include a timeframe for completing such studies), the holder agrees to the request, such studies are completed using appropriate formulations for each age group for which the study is requested within any such timeframe, and the reports thereof are submitted and accepted in accordance with section 505A(d)(3) of the Federal Food, Drug, and Cosmetic Act—

“(A) the periods for such biological product referred to in subsection (k)(7)(B) are deemed to be 4 years and 6 months rather than 4 years and the date that is 6 months after the date described in subsection (k)(7)(A) rather than the date described in such subsection; and

“(B) if the biological product is designated under section 526 for a rare disease or condition, the period for such biological product referred to in section 527(a) is deemed to be 7 years and 6 months rather than 7 years.

“(4) EXCEPTION.—The Secretary shall not extend a period referred to in paragraph (2)(A), (2)(B), (3)(A), or (3)(B) if the determination under section 505A(d)(3) is made later than 9 months prior to the expiration of such period.”.

(2) STUDIES REGARDING PEDIATRIC RESEARCH.—

(A) PROGRAM FOR PEDIATRIC STUDY OF DRUGS.—Subsection (a)(1) of section 409I of the Public Health Service Act (42 U.S.C. 284m) is amended by inserting “, biological products,” after “including drugs”.

(B) INSTITUTE OF MEDICINE STUDY.—Section 505A(p) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355b(p)) is amended by

striking paragraphs (4) and (5) and inserting the following:

“(4) review and assess the number and importance of biological products for children that are being tested as a result of the amendments made by the Patient Access to Safe and Competitive Biologics Act and the importance for children, health care providers, parents, and others of labeling changes made as a result of such testing;

“(5) review and assess the number, importance, and prioritization of any biological products that are not being tested for pediatric use; and

“(6) offer recommendations for ensuring pediatric testing of biological products, including consideration of any incentives, such as those provided under this section or sec-

tion 351(m) of the Public Health Service Act.”.

(h) ORPHAN PRODUCTS.—If a reference product, as defined in section 351 of the Public Health Service Act (42 U.S.C. 262) (as amended by this Act) has been designated under section 526 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360bb) for a rare disease or condition, a biological product seeking approval for such disease or condition under subsection (k) of such section 351 as biosimilar or therapeutically equivalent to, such reference product may be licensed by the Secretary only after the expiration for such reference product of the later of—

(1) the 7-year period described in section 527(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360cc(a)); and

(2) the period of exclusivity described in subsection (k)(7)(A) of such section 351.

RECESS UNTIL 12:01 A.M.
TOMORROW

The PRESIDING OFFICER. The time of the Senator has expired.

Under the previous order, the Senate stands in recess until 12:01 a.m., Monday, December 21, 2009.

Thereupon, the Senate, at 11:31 p.m., recessed until Monday, December 21, 2009, at 12:01 a.m.

SENATE—Monday, December 21, 2009*(Legislative day of Sunday, December 20, 2009)*

The Senate met at 12:01 a.m., on the expiration of the recess, and was called to order by the Honorable MARK UDALL, a Senator from the State of Colorado.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Eternal God, help of the ages, as we labor a great while before day, give our lawmakers the wisdom to see the right and the courage to do it. Cause them to be men and women of integrity, so that our citizens can lead quiet and peaceful lives in all godliness and honesty. Remind our Senators that You have called them to be servants of the people during this challenging season, so that they must not succumb to pessimism and cynicism or grow weary in well doing. Gird them with fortitude. Illumine them with the light of truth, and make them more than conquerors in the faith that the kingdoms of this world are to become the one and radiant Kingdom of Your redeeming love.

Lord, please remind the many workers who support the legislative process that You see their diligence and will reward their faithful sacrifices.

We pray in Your great Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable MARK UDALL led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 21, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MARK UDALL, a Senator from the State of Colorado, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. UDALL of Colorado thereupon assumed the chair as Acting President pro tempore.

SERVICE MEMBERS HOME OWNER-SHIP TAX ACT OF 2009—Resumed**Pending:**

Reid amendment No. 2786, in the nature of a substitute.

Reid amendment No. 3276 (to amendment No. 2786), of a perfecting nature.

Reid amendment No. 3277 (to amendment No. 3276), to change the enactment date.

Reid amendment No. 3278 (to the language proposed to be stricken by amendment No. 2786), to change the enactment date.

Reid amendment No. 3279 (to amendment No. 3278), to change the enactment date.

Reid motion to commit the bill to the Committee on Finance, with instructions to report back forthwith, with Reid amendment No. 3280, to change the enactment date.

Reid amendment No. 3281 (to the instructions (amendment No. 3280) of the motion to commit), to change the enactment date.

Reid amendment No. 3282 (to amendment No. 3281), to change the enactment date.

The ACTING PRESIDENT pro tempore. Under the previous order, the time until 1 a.m. will be equally divided and controlled between the two leaders or their designees, with the majority leader controlling the final 10 minutes prior to 1 a.m., and the Republican leader controlling the 10 minutes immediately prior to that.

The Senator from Tennessee.

Mr. ALEXANDER. Mr. President, I intend to take 10 minutes of the Republican time. Will you please let me know when 1 minute remains?

The ACTING PRESIDENT pro tempore. The Senator will be notified.

Mr. ALEXANDER. Thank you, Mr. President.

Mr. President, there may be a number of Americans who are switching over from the Minnesota v. Carolina football game and they may be wondering what in the world is the U.S. Senate doing coming into session at midnight on a Sunday in the middle of a snowstorm and getting ready to vote at 1 a.m.? So let me try to explain that for a moment.

The reason is, the Democratic majority leader, who is the only one who can set our schedule, showed up yesterday with a 400-page amendment—yesterday. This amendment had been written in secret for the last 6 weeks. The assistant Democratic leader said, last week, on the floor, he had no idea what was in it. Of course, none of us on the Republican side knew what was in it. So almost no one here knew what was in it. It was presented to us. Then the Democratic leader said: Well, we are going to start voting on it, and we are going to pass it before Christmas.

This is an amendment to the health care bill, which when fully imple-

mented, will cost about \$2.5 trillion over 10 years, according to the Senate Budget Committee; which restructures a sixth of our economy; which affects 300 million people; which will raise taxes by about \$1 trillion when fully implemented over 10 years; and which will cut Medicare by about \$1 trillion when fully implemented over 10 years. It doesn't cut Medicare to make Medicare more solvent which, as we know, it is going to become insolvent, according to its trustees, by 2015, but to spend on a new entitlement.

It will also shift to the States a great many expenses, so much so that our Democratic Governor in Tennessee has said it is the mother of all unfunded mandates. The Governor of California says it is the last thing we need, take your time, get it right. But the Democratic leader and his colleagues insist that we need to bring this up in the middle of a snowstorm, write it in secret, vote on it in the middle of the night, and get it passed before Christmas Eve.

Why would they want to do that? Well, I think the answer is very clear. It is because they want to make sure they pass it before the American people find out what is in it. Because the American people, by nearly two to one, according to a CNN poll, do not like what they have heard about the health care bill. When they have to start explaining what is in it, they are afraid it will be worse, and it will never pass.

Republicans are not the only ones who believe we ought to stop and think about big issues before we deal with it. Eight Democratic Senators—Senators LINCOLN, BAYH, LANDRIEU, LIEBERMAN, MCCASKILL, NELSON, PRYOR, and WEBB—wrote Senator REID on October 6, saying to Senator REID:

As you know, Americans across our country have been actively engaged in the debate on health care reform. . . . Without a doubt, reforming health care in America is one of the most monumental and far-reaching undertakings considered by this body in decades. We believe the American public's participation in this process is critical to our overall success. . . .

I am quoting from the eight Democratic Senators. They go on to say they want to make sure the bill is on a Web site "for at least 72 hours" before we vote on it. This bill was given to us yesterday—400 pages of it—we had not seen before. Seventy-two hours would be Tuesday. So the minimum requirement, according to the eight Democratic Senators and all 40 Republican Senators, would be that we should not even think about voting on it until at

least Tuesday. And then one would think we would be amending it and debating it and considering it and thinking about it and trying to find out what it actually does.

According to the eight Democratic Senators:

By publicly posting the legislation and its [Congressional Budget Office] scores 72 hours before it is brought to a vote in the Senate and by publishing the text of amendments before they are debated, our constituents will have the opportunity to evaluate these policies. . . . As their democratically-elected representatives . . . it is our duty to listen . . . and to provide them with the chance to respond to proposals that will impact their lives.

Yet, we are presented with it in the middle of a snowstorm on Saturday, we are meeting at midnight, we are voting at 1 a.m. It is being demanded that it be passed, even though most of the provisions, as the Senator from Maine has said, do not even begin to take effect for 4 more years.

What is the rush? I think the rush is that our friends on the other side do not want to explain to 40 million seniors how you can cut \$1 trillion out of Medicare—it is exactly \$470 billion over the next 10 years, but when fully implemented \$1 trillion out of Medicare—and spend it on a new program without reducing Medicare services to 40 million seniors. The Director of the Congressional Budget Office has already said that for the 11 million seniors who are on Medicare Advantage that fully half their benefits will be affected.

I think our friends on the other side do not want the American people to understand why the \$578 billion in new taxes that are going to begin to be imposed next year—they are going to have a hard time explaining how that will create new jobs in America, at a time when we have 10 percent unemployed. New taxes?

They do not want the American people to find out the Director of the Congressional Budget Office said that if we put those new taxes on insurance providers, on medical devices, almost all of those taxes will be passed on to the consumers and, as a result, premiums will go up.

There are some very strong words that have been coming from the other side about Republicans saying this bill will actually increase the cost of health care. It is not Republicans who are saying that. Here is what David Brooks of the New York Times said in his analysis of the bill when he gave the reasons for it and the reasons against it this week and came to the conclusion that if he were a Senator he would vote against it. Mr. Brooks said:

The second reason to oppose this bill is that, according to the chief actuary for Medicare, it will cause national health care spending to increase faster.

That is right, we are going to raise taxes, cut Medicare, send a big bill to the States—all for what? “. . . accord-

ing to the chief actuary for Medicare, it will cause national health care spending to increase faster.” So if you are paying X for premiums, you are going to be paying more as a result of this bill.

Continuing, David Brooks said:

Health care spending is already zooming past 17 percent of [our gross domestic product] to 22 percent and beyond.

Then it is going to be hard to explain to the 9 million people who the Congressional Budget Office letter said would lose their employer insurance under this bill why that will happen. Of course, it will happen because under the bill as a whole, as employers look at the mandates and the costs, many will decide not to offer health insurance, and so those employees will find themselves either in Medicaid, the program for low-income Americans—into which 15 million more Americans are going; a program for which 50 percent of doctors will not see new Medicaid patients; it is like giving you a ticket to a bus when the bus only runs half the time—that is where many of these Americans will go, or they will go into the individual market, and the individual market will have higher premiums.

The other side says: Ah, but there will be subsidies for some of you. But the premiums are going to be higher, the health care costs are going to be higher.

The majority does not want to explain why this bill changes the bipartisan agreement not to have Federal funding for abortion that has been agreed to since 1977.

They do not want to take time for the American people to understand the CLASS Act, the long term insurance act, a new entitlement which sounds wonderful, but the Democratic chairman of the Budget Committee described it as a Ponzi scheme worthy of Bernie Madoff. That is because the amount of money that would be paid in, if a person pays a premium of \$2,880 per year for 5 years, would be \$14,000, and then they would have a \$1,500 monthly benefit for a long time after that.

It is obvious why the majority has cooked up this amendment in secret, has introduced it in the middle of a snowstorm, has scheduled the Senate to come in session at midnight, has scheduled a vote for 1 a.m., is insisting it be passed before Christmas, because they do not want the American people to know what is in it.

It is a deeply disappointing legislative result. But our friends on the Democratic side seem determined to pursue a political kamikaze mission toward a historic mistake, which will be bad for the Democrats, I am convinced, but, unfortunately, even much worse for our country.

Mr. President, I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Arizona is recognized.

Mr. MCCAIN. Mr. President, as we approach in less than an hour a very important vote—some have called it historic, some call it pivotal; it has been given various adjectives and adverbs—I think it might be appropriate to discuss for a minute or two how this all began.

It all began in the Presidential campaign. I do not like to spend much time recalling it. But health care was a big issue in the Presidential campaign. On October 8, 2008, less than a month before the election, then-Candidate Obama said, concerning health care reform:

I'm going to have all the negotiations around a big table. . . . What we'll do is we'll have the negotiations televised on C-SPAN, so that people can see who is making arguments on behalf of their constituents and who are making arguments on behalf of drug companies—

Keep that in mind: the drug companies—
or the insurance companies.

That was the statement made by then-Senator/Candidate Obama. What we have is a dramatic departure. There has never been a C-SPAN camera. There has never been a negotiation, a serious negotiation between Republicans and the other side. There has never been. I say that with the knowledge of someone who has negotiated many times across the aisle on many agreements. So don't stand and say there were serious negotiations between Republicans and Democrats. There never were.

But there were negotiations with the special interests, with PhRMA, the same ones the President said he was going to see who the American people were on the side of. Clearly, this administration and that side of the aisle was on the side of PhRMA because they got a sweetheart deal of about \$100 billion that would have been saved if we had been able to reimport prescription drugs. The AARP has a sweetheart deal. There is a provision in this deal for them, plans that Medigap insurance sold by AARP are exempt from tax on insurance companies. The AMA signed up because of the promise of a doc fix. Throughout we should have set up a tent out in front and put Persian rugs out in front of it. That is the way this has been conducted.

Of course, after the special interests were taken care of, then we had to take care of special Senators. One deal is called—we have new words in our lexicon now—the Louisiana purchase, the corn husker kickback. I have a new name: the Florida flimflam, the one that gives the Medicare Advantage members in Florida the benefit, but my constituents in Medicare Advantage don't get it.

So in answer to this, in answer to a question today, the majority leader said:

A number of States are treated differently than other States.

Really?

A number of States are treated differently than other States. That is what legislation is all about. That is compromise.

Where is that taught? Where is that taught?

A number of States are treated differently than other States. That is what legislation is all about. That is compromise.

My friends, that is not what the American people call governing. That is called exactly an opposite contradiction of what the President of the United States said, where he says:

We will have negotiations televised on C-SPAN so that people can see who is making arguments.

I see the leader from Illinois over there. Just a few days ago, I said: What is in the bill?

The Senator from Illinois said: I don't know. I am in the dark too. I can give him his own quote.

So here we are, as the Senator from Tennessee said, in the middle of the night, and here we are, my friends, about to pass a bill with 60 votes. Sixty votes represent 60 percent of this body, but I can assure my friends on the other side of the aisle it doesn't represent 60 percent of the American people. In fact, 61 percent of the American people, according to a CNN poll, say they want this stopped. They disapprove of it. I guarantee you, when you go against the majority opinion of the American people, you pay a heavy price, and you should.

I will tell my colleagues right now that when you—this will be, if it is passed—and we are not going to give up after this vote, believe me. For the first time in history, for the first time in history, there will be a major reform passed on a party-line basis. Every reform—and I have been part of them—has been passed on a bipartisan basis. This will be a strict party-line basis.

I was thinking today about this vote, and I was thinking about other times and other examples I have had of courage or lack of or the fact that in the face of odds, you have to stand for what you believe in. I thought about back when I first entered the U.S. Naval Academy at the young age of 17. One of the first things they told us about in our learning of naval traditions was about a battle that took place early in the Revolutionary War. An American ship run by a captain engaged a British ship, the mighty British Navy. The American ship was outgunned and was outmanned. As they came together in mortal combat, with dead and dying all around, the British captain said: Do you surrender? The captain, John Paul Jones, said: I have not yet begun to fight.

I tell the American people: We are going to go around this country. We

are going to the townhalls, we are going to the senior centers, we are going to the rotary clubs. We are going to carry this message: We will not do this. We will not commit generational theft on future generations of Americans. We will not give them another \$2½ trillion in debt. We will not give them an unfair policy where deals are done in back rooms, and we—all of us on this side of the aisle—will stand for the American people, and we have just begun to fight.

The ACTING PRESIDENT pro tempore. Who yields time?

The Senator from Iowa is recognized.

Mr. HARKIN. Mr. President, for the last several weeks, all we have heard from the other side is attack, attack, attack. All we have heard from the other side is no, no, no. They keep talking. I just heard the Senator from Arizona saying this is not a bipartisan bill. I have heard so much talk on the other side in the last several weeks about how this should be bipartisan. Well, let's look at that for a second.

As I see it, the Republicans have no bill of their own. Our bill has 60 Democrats, a supermajority, a supermajority. Well, I guess there is a bill over there. It is the Coburn-Burr bill. It has seven cosponsors. That is it. That is it. Nothing else. Not all the Republicans are supporting it. My friends on the other side are all over the place. They can't even agree among themselves what they want to do. They have no comprehensive bill as we have come up with.

So I keep hearing that we Democrats are not bipartisan, but whom do we deal with? Just the Senator from Arizona? Just the Senator from Tennessee? How about the Senator from Oklahoma or the Senator from South Carolina? So I am sorry. I feel sorry the Republicans are all split up. They have not done their own homework to pull their own Senators together for something positive. So what they have done is they pulled together to say no, to try to kill the reform bill we have worked so hard on all year.

We extended a hand. If we had wanted to ace out the Republicans, we would have followed their lead on what they did in 2001, when they rammed through that tax cut for the wealthy. They did it on reconciliation so we couldn't filibuster it, so we couldn't have any debate on it. That is what they did. We didn't do it that way.

President Obama said we want to hold out the olive branch. We want to work with Republicans, so that is what we tried to do. Under the leadership of Senator DODD on our committee, we had numerous meetings with Republicans. We had a markup session that lasted 13 days 54 hours. We accepted 161 of their amendments and, in the end, everyone on the Republican side voted against it.

Senator BAUCUS bent over backward, week after week. He not only went the

extra mile, he went the extra 100 miles to try to get Republicans to work with him on this bill. In the end, only one Republican would vote for the bill out of committee.

So that is what we have. I am sorry to say my friends on the other side are in total disarray. They have nothing they can agree on. Well, we have something we have agreed on. Sixty, a supermajority, have agreed on moving a bill forward, a pivotal point in our history, in a decades-long march toward comprehensive health reform. It has alluded Congresses and Presidents going back to Theodore Roosevelt.

My friends on the other side defend the status quo. They want us to vote our fears—fear, fear, fear. Everything you hear, it seems, on the other side is fear. Be afraid. Well, it is not going to work this time because what the American people want is not fear, they want hope. They want the hope they will have the health care they need when they have to have it at a price that is affordable. They want to have the peace of mind and security of knowing that their children, if they have a pre-existing condition, will be covered by health insurance. They want to have the peace of mind of knowing that if they lose a job, they don't lose their health insurance. The American people want the hope and the security of knowing that if they get ill, they will not be dropped by their insurance company. They want the hope and the security to know they aren't just one illness away from bankruptcy.

We are the only country in the world—the only one—where people can go bankrupt because they owe a medical bill. No other country would allow that to happen. We are the only one. This bill is going to stop that. People will not have to fear going bankrupt because someone in their family got a chronic illness or a disease that is going to cost a lot of money. The American people want us to move forward, and we are going to do it tonight at 1 o'clock. We are going to move forward. We are not going to vote fears, we are going to vote hope.

We are going to tell the American people we are going to do three big things. First of all, we are going to cover 94 percent of Americans with health insurance—94 percent. Thirty-one million people out there without health insurance are going to get health insurance.

Secondly, we are going to crack down on the abuses of the insurance companies. No more cancelling your policy just because you got sick. No more lifetime caps which basically cause more and more people to go into bankruptcy. No more of those lifetime caps. We are going to make sure your kids can stay on your policy until they are age 26. We are going to do away with all these preexisting condition clauses next year for children, up to age 18, and then for

everyone later on after we get the exchanges set up.

Insurance companies will not be able to rescind your policy or drop you because you got cancer or heart disease. If you are a person out there who has your own health insurance policy right now and you like it, you can keep it. But guess what this bill will do. It will lower your premiums, and it will improve your coverage if you want to keep your own health insurance that you have right now.

Every year, about 45,000 Americans die in this country because they have no health insurance. Johns Hopkins did a study and said that children who have no health insurance are 60 percent more likely to die because of hospitalizations than kids who have health insurance coverage. It is a moral disgrace. The health insurance policies of America, what we have right now is a moral disgrace. You can talk to people from other countries, our closest allies, our closest friends who share so many of our values, and when they find out about our health care system, they say: How can you put up with it? This is disgraceful. You are the leader of the free world. You are supposed to set the example. And what a terrible example we have set in health care, what a terrible example.

Well, we have finally arrived at one of the most significant moments in the history of the Senate, one of the most significant. Our former chairman, Senator Ted Kennedy, fought all his life for national health insurance, and years ago, back in the 1960s, said health care ought to be a right, not a privilege.

He said that over 40 years ago, almost 50 years ago, that health care should be a right and not a privilege. It was always his highest priority. It was his great dream of an America where quality, affordable health care is that right. He thought of it as a moral imperative—a moral imperative. A lot of times, we lose that. We hear a lot of debate about how much this is, who is going to lose this, all these scare tactics. We see all these numbers and all that kind of stuff. We forget the essence of it. It is a moral imperative. We are called upon to right a great injustice, a great wrong that has been put upon the American people for far too long. It is a moral imperative that confronts us now that we will vote on in half an hour. We are closer than we have ever been to making Ted Kennedy's dream a reality.

A lot of people have worked very hard on this bill. I mentioned Senator BAUCUS. I mentioned Senator DODD; Senator REID, our leader, the amount of hours he has spent and the days he has spent here without his family, without going home, being here all the time working; our assistant leader, Senator DURBIN. So many people have worked so hard on this bill. We have

had so much input. Everyone has had input on this bill. Our Republican friends have had input on this bill. They had it in our committee. As I said, we accepted 161 amendments. So I guess you can say this bill has a lot of authors. But there is really only one author of this bill—Senator Ted Kennedy. It is his bill because it does get us the start.

To my friends, I say this is not the end of health care reform, it is the beginning. But we must make this beginning in order to fulfill that dream and really make health care a right, not a privilege.

In half an hour, let's make history. The other side says fear. We say hope. The other side says no. We say yes. We say yes to progress, yes to people, yes to health care as an inalienable right of every American citizen.

I yield the floor.

Mr. CORNYN. Parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator from Texas is recognized.

Mr. CORNYN. Mr. President, earlier today Senator GRASSLEY raised a parliamentary inquiry on rule XLIV of the Standing Rules of the Senate. As my colleagues recall, this was a rule that the Senate passed pursuant to the Honest Leadership and Open Government Act of 2007. The question had to do with whether the managers' amendment we are getting ready to vote on complied with rule XLIV's earmark disclosure requirement. At the time, the Chair indicated that the disclosure list was not submitted at the time. That was 6 p.m. today.

My inquiry is this: Is the Chair aware of the disclosure list being made available as required by rule XLIV now as we vote in the next 30 minutes?

The ACTING PRESIDENT pro tempore. The Chair is not aware at this time whether that statement has been made.

The Senator from Connecticut is recognized.

Mr. DODD. Mr. President, I wish to take a few minutes in closing, if I may.

I spoke earlier this evening about the importance of the moment we have all come to appreciate, I believe, a moment that has been years in the making, dating back, as all have pointed out or most have pointed out who spoke in favor of this legislation, to the early part of the last century with Theodore Roosevelt, a former Republican, who first advocated the notion of a national health care system in our Nation. Franklin Roosevelt picked up that challenge, and Harry Truman, of course, was the one who articulated it in specific terms.

It was 69 years ago this very month that Franklin Roosevelt identified the four freedoms: freedom of religion, freedom of speech, the freedom from want, and the freedom from fear. It is

that last freedom that Franklin Roosevelt talked about in December of 1941 that is deserving of our attention in these closing minutes.

Whatever else one may argue about the specifics of this bill, it is that fear that so many of our fellow citizens have over whether they will be confronted with a health care crisis and have the resources to address it and the ability to have a doctor, a physician, a health care provider, a hospital to provide them with that kind of help when they need it. That fear is not just for those without health care; it is even for those who have health care insurance. That fear persists.

This evening, more than anything else, beyond the specifics of the legislation in front of us is our desire to address that freedom from fear that was addressed so eloquently almost 70 years ago. So this evening we attempt, anyway, to begin that journey of eliminating those fears so many of our fellow citizens have over the loss or inability to acquire that kind of health insurance or the inability to have a doctor.

So we are poised to make a monumental vote on legislation that finally makes access to quality health care a right for every American. If you do not believe it is a right, that it is only a privilege, then I suppose you could come to a different conclusion. And there are those, I guess, who believe it is a privilege to have access to health care as an American citizen. Those of us on this side of the aisle believe it is a right, and as a right, you ought not to be denied that right based on economic circumstances, your gender, or your ethnicity in this Nation. You ought to have access to health care as a fundamental right in our Nation.

Obviously, we need to participate, engage in responsible activities that will make sure we contribute to the well-being of all our Nation to reduce the cost of health care.

This is a comprehensive bill. It has been more than just a year specifically on this effort but goes back 40 or 50 years in terms of drafting, and efforts have been made to achieve what we are trying to achieve this evening.

At the end of the day, however, this legislation is really about freedom from fear, as I said a moment ago. The bill frees Americans from the fear that if they lose their job, they will never find insurance coverage again. The bill frees Americans from the fear that they might get sick and be unable to afford the treatment they need. And the bill frees Americans from the fear that one illness, one accident could cost them everything they built—their homes, their retirement, their life savings.

In a nation founded on freedom and sustained by unimaginable prosperity, as I mentioned before, this bill is long overdue and critically important. No

American can be free from fear when getting sick could mean going broke.

This fight is older than most of us who serve in this body. Our path has been illuminated by a torch lit years ago in the days of Harry Truman and sustained for decades by good people, Republicans and Democrats—the Nixon administration, the Clinton administration, Members such as John Chafee, who worked tirelessly in trying to craft a good health care bill. We heard others talk about the regrets they had not acknowledging his ideas when he proposed them or we might have been able to address this issue years ago. Good people have tried to come up with some answers to this issue. It is with a note of sadness this evening that we are going to have a partisan vote on this matter. I wish it was otherwise.

I would like to point out that many of us have fought and challenged us to come up with these answers, but tonight this is our answer, the 60 of us who will vote to go forward with this bill. As Senator HARKIN just pointed out, it is hardly the final answer on this matter, but it allows us to begin that process of addressing these issues in a more thoughtful and comprehensive way in the years ahead.

Of course, no one was a better champion of all of this, as Senator HARKIN pointed out, than our deceased and beloved colleague from Massachusetts, Senator Ted Kennedy. He fought these battles for so many years. He understood that you could never solve all of these issues in one fell swoop. It was going to take an incremental approach to get us there.

I can guarantee that if he read this bill, there would be disappointments he would have in it. I knew him well enough to say that this evening. If he had written it on his own, he would have written it differently. Were he here among us this evening, he would urge all of us to move forward on this bill to address it, to vote for it, to allow this Nation to begin to grapple with this issue that should have been solved more than 50 years ago.

So this evening, again, as we come down to the final minutes of this debate, let's remind ourselves that history will judge us well for taking up this challenge once again and asking ourselves to give Americans the opportunity to live free from those fears they have this very evening. And tonight, we begin to alleviate those fears.

I urge my colleagues to support this effort.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

Mr. McCONNELL. Mr. President, tonight marks the culmination of a long national debate. Passions have run high, and that is appropriate because the bill we are voting on tonight will impact the life of every American. It

will shape the future of our country. It will determine whether our children can afford the Nation they inherit. It is one of the most consequential votes any of us will ever take, and none of us take it lightly. But make no mistake, if the people who wrote this bill were proud of it, they would not be forcing this vote in the dead of night.

Here are just some of the deals we have noticed: \$100 million for an unnamed health care facility at an unnamed university somewhere in the United States. The bill does not say where and no one will even step forward to claim it. Mr. President, 1 State out of 50—1 State out of 50—gets to expand Medicaid at no cost to itself while taxpayers in the other 49 States pick up the tab. The same Senator who cut that deal secured another one that benefits a single insurance company—just one insurance company—in his State. Do the supporters of the bill know this? I say to my colleagues, do you think that is fair to all of your States? What about the rest of the country?

The fact is, a year after the debate started, few people would have imagined this is how it would end—with a couple of cheap deals—a couple of cheap deals—and a rushed vote at 1 o'clock in the morning. But that is where we are. And Americans are wondering tonight: How did this happen? How did this happen? So I would like to take a moment to explain to the American people how we got here, to explain what has happened and, yes, what is happening now.

Everyone in this Chamber agrees we need health care reform. Everybody agrees on that. The question is how. Some of us have taken the view that the American people want us to tackle the cost issue, and we proposed targeted steps to do it. Our friends on the other side have taken the opposite approach, and the result has been just what you would expect. The final product is a mess—a mess. And so is the process that has brought us here to vote on a bill that the American people overwhelmingly oppose.

Any challenge of this size and scope has always been dealt with on a bipartisan basis. The senior Senator from Maine made that point at the outset of the debate and reminded us all of how these issues have typically been handled throughout our history. The Social Security Act of 1935 was approved by all but six Members of the Senate. The Medicare Act of 1965 only had 21 dissenters, and the Americans with Disabilities Act in 1990 only had eight Senators who voted no.

Americans believe that on issues of this importance, one party should never be allowed to force its will on the other half of the Nation. The proponents of this bill felt differently.

In a departure from history, Democratic leaders put together a bill so heavy with tax hikes, Medicare cuts,

and government intrusion that, in the end, their biggest problem wasn't convincing Republicans to support it, it was convincing the Democrats.

In the end, the price of passing this bill wasn't achieving the reforms Americans were promised, it was a blind call to make history, even if it was a historical mistake, which is exactly what this bill will be if it is passed. Because in the end, this debate isn't about differences between two parties, it is about a \$2.3 trillion, 2,733-page health care reform bill that does not reform health care, and, in fact, makes the price of it go up.

"The plan I am announcing tonight," the President said on September 9, "will slow the growth of health care costs for our families, our businesses and our government. My plan," the President said, "would bring down premiums by \$2,500 for the typical family. I will not sign a plan that adds a dime to our deficit," the President said, "either now or in the future." And on taxes, "No family making less than \$250,000 a year will see any form of tax increase," he said.

He said he wouldn't cut Medicare. He said people who liked the plans they have wouldn't lose their coverage, and Americans were promised an open and honest debate. "That is what I will do in bringing all parties together," then-Senator Obama said on the campaign trail, "not negotiating behind closed doors, but bringing all parties together and broadcasting these negotiations on C-SPAN."

Well, that was then and this is now. But here is the reality. The Democratic bill we are voting on tonight raises health care costs. That is not me talking, it is the administration's own budget scorekeeper. It raises premiums. That is the nonpartisan Congressional Budget Office talking. It raises taxes on tens of millions of middle-class Americans, and it plunders Medicare by $\frac{1}{2}$ trillion. It forces people off the plans they have, including millions of seniors. It allows the Federal Government, for the first time in our history, to use taxpayer dollars for abortions.

So a President who was voted into office on the promise of change said he wanted to lower premiums. That changed. He said he wouldn't raise taxes. That changed. He said he wanted lower costs. That changed. He said he wouldn't cut Medicare. And that changed too.

And 12 months and \$2.3 trillion later, lawmakers who made these same promises to their constituents are poised to vote for a bill that won't bend the cost curve, that won't make health care more affordable, and it will make real reform even harder to achieve down the road.

I understand the pressure our friends on the other side are feeling, and I don't doubt for a moment their sincerity. But my message tonight is this:

The impact of this vote will long outlive this one frantic snowy weekend in Washington. Mark my words: This legislation will reshape our Nation, and Americans have already issued their verdict: They do not want it. They do not like this bill, and they do not like lawmakers playing games with their health care to secure the votes they need to pass it.

Let's think about that for a moment. We know the American people are overwhelmingly opposed to this bill, and yet the people who wrote it will not give the 300 million Americans whose lives will be profoundly affected by it as much as 72 hours to study the details. Imagine that. When we all woke up yesterday morning, we still hadn't seen the details of the bill we are being asked to vote on before we go to sleep tonight.

When we woke up yesterday morning, we still hadn't seen the details of the bill we are going to be asked to vote on before we go to sleep tonight.

How can anybody justify this approach, particularly in the face of such widespread and intense public opposition? Can all of these Americans be wrong? Don't their concerns count?

Party loyalty can be a powerful force. We all know that. But Americans are asking the Democrats to put party loyalty aside tonight, to put the interest of small business owners, taxpayers, and seniors first.

And there is good news: It is not too late. All it takes is one—just one. All it takes is one. One can stop it. One can stop it or everyone will own it. One can stop it or every single one will own it.

My colleagues, it is not too late.

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

Mr. REID. Mr. President, all over this great country of ours, people are dying soon—far too soon. More and more Americans who come down with the flu, develop diabetes, or suffer a stroke are dying far earlier than modern science says they should die. More and more Americans who contract skin cancer or have a heart condition are dying rather than being cured.

Pull out the medical records of these patients and the official forms will tell you they died from complications of disease or maybe some surgery. But what is really killing more and more Americans every day are complications due to our health care system.

Much of our attention this year has been consumed by this health care debate. A national study done by Harvard University found that 45,000 times this year, nearly 900 times every week, more than 120 times every day, on average every 10 minutes, on end, an American died as a result of not having health insurance. Every 10 minutes. The numbers are numbing, and they don't even include those who did have health insurance but who died because

they couldn't afford a plan that met their most basic needs.

This country—the greatest and richest the world has ever seen—is the only advanced Nation on Earth where dying for lack of health insurance is even possible. To make matters worse, we are paying for that privilege. The price of staying healthy in America goes up, it goes up, it goes up and, not surprisingly, so do the numbers of Americans who can't afford it. In fact, medical bills are the leading cause of bankruptcy in America. And the second choice is way down the list—it is medical bills.

That is why we are here. Just as we have the ability to prevent diseases from killing us too soon, we have before us the ability to provide quality health care to every American. We have the ability to treat our unhealthy health care system. That is what this historic bill does. It protects patients and consumers. It lowers the cost of staying healthy and greatly reduces our debt.

This landmark legislation protects America's youngest citizens by making it illegal for insurance companies to refuse to cover a child because of a pre-existing condition.

It protects America's oldest citizens by strengthening Medicare and extending its life for almost a decade. We are also taking the first steps to closing the notorious loophole known as the doughnut hole that costs seniors thousands of dollars each year for prescription drugs. These are some of the reasons the AARP—the American Association of Retired People—and its 40 million Americans are supporting this bill.

Contrary to what we heard from my distinguished friend, the Republican leader, premiums are reduced by 93 percent. Ninety-three percent of people who have insurance will have reduced premiums.

This effort also strengthens our future by cutting our towering national deficit by as much as \$1.3 trillion over the next two decades. What my distinguished Republican counterpart is saying is without basis in fact. These aren't numbers that I came up with, these are numbers that the Congressional Budget Office came up with—\$1.3 trillion. That is trillion with a “t.” It cuts the deficit more sharply than anything Congress has done in a long time. It lowers costs. I have talked about Medicare.

My friend, the Republican leader, said it is going to reshape our Nation. That is why we are doing it. That is why we are doing this. We want to reshape the health care delivery system in our country. Is it right that America has 750,000 bankruptcies a year, about 80 percent of them caused by health care costs, and 62 percent of the people who have filed bankruptcy have health care costs? We are reshaping the Nation. That is what we want to do. That is what we have to do.

With this vote, we are rejecting a system in which one class of people can afford to stay healthy while another cannot. It demands for the first time in American history good health will not depend on great wealth. Good health should not depend on how much money you have. It acknowledges, finally, that health care is a fundamental right, which my friend Senator HARKIN spoke about so clearly—a human right—and not just a privilege for the most fortunate.

President Johnson, former majority leader of the Senate, signed Medicare into law when he was President, with the advice: “We need to see beyond the words to the people they touch.” That is just as true today as it was 44 years ago when he signed that legislation.

This is not about partisanship or about procedure. And everyone knows we are here at 1 o'clock in the morning because of my friends on the other side of the aisle. For them to say with a straight face—and I know some of them didn't have that straight face—that we are here because of us is without any foundation whatsoever. And everyone knows that.

This is not about politics. It certainly is not about polling. It is about people. It is about life and death in America. It is about human suffering. Given the chance to relieve the suffering, we must.

Citizens in each of our States have written to tell us they are broke because of our broken health care system. Some have sent letters with even worse news—news of grave illness and preventable death. For weeks, we have heard opponents complain about the number of pages in this bill, but I prefer to think of this bill in terms of the people it will help.

A woman named Lisa Vocolka, who lives in Gardnerville, NV—a beautiful city below the Sierra Nevada mountains—lives with her two daughters, both of whom are in elementary school. The youngest suffers seizures. Her teachers now think she has a learning disability.

Because of her family history, Lisa, the girl's mom, is at high risk of cervical cancer. Although she is supposed to get an exam every 3 months, she doesn't go. She is lucky if she goes once a year, and most of the time she is not very lucky. When Lisa lost her job, she lost her health coverage. Now both Lisa and her daughter miss the tests and preventive medicine that could keep them healthy. Her long letter ended with a simple plea. It was: “We want to be able to go to the doctor.”

That is why this bill will ensure all Americans can get the preventive tests and screenings they need. I am voting yes because I believe Lisa and her daughter deserve to be able to go to the doctor.

A teenager named Caleb Wolz is a high school student from Sparks, NV.

Like so many students, he used to play soccer when he was younger. Now he sticks to skiing and rock climbing. You can forgive him, I am sure, for giving up soccer. You see, Caleb was born with legs that end above his knees.

As children mature, even Caleb, they grow out of their clothes. Most kids grow out of their shoes. Caleb doesn't. A lot of kids probably get a new pair every year but Caleb has needed a new pair of prosthetic legs every year since he was 5 years old. Unfortunately and unbelievably, Caleb's insurance company has decided it knows better than his doctor and has decided Caleb doesn't need those legs. That is why this bill will make it illegal for those insurance companies to use preexisting conditions as an excuse for taking our money but not giving coverage.

This is a big change. But isn't it a good change? I am voting yes because I believe Caleb deserves a set of prosthetics that fit.

Ken Hansen wrote to me from Mesquite, NV, a town on the border of Nevada, Utah, and Arizona. He has chronic heart problems and parts of his feet have been amputated but Ken can't go to the doctor because he makes too much to qualify for Medicaid and too little to afford private insurance. I share with the Senate exactly what Ken wrote me:

I am very frustrated because it seems my only hope is that I die very soon, because I cannot afford to stay alive.

That is why this bill will expand Medicaid to cover people like Ken from Mesquite, NV, who are caught in the middle. I am voting yes because when someone tells me his only hope is to die, I think we have to take a close look at that. I can't look away. I cannot possibly do nothing.

A man by the name of Mike Tracy lives in North Las Vegas. His 26-year-old son has been an insulin-dependent diabetic since he was a baby. The insurance Mike's son gets through work will not cover his treatments and the Tracys can't afford to buy more insurance on their own. But his family's troubles are about more than just money. Since they couldn't afford to treat his diabetes, it developed into Addison's disease—which of course they can't afford to treat either. It could be fatal.

This is what he wrote to me 2 weeks ago:

I don't know what to pray for first: that I will die before my son will so I don't have to bear the burden, or that I outlive him so I can provide support to his family when he is gone.

Quite a set of prayers. This should not be a choice any American should have to make. It should not be a choice any father or mother should have to make—and when given the chance to help people like Mike, our choice should be very easy.

That is what this legislation is all about. These are hard-working citizens

with heartbreaking stories. They are people who played by the rules and simply want their insurance company to also do the same. They are not alone. These tragedies do not happen only to Nevadans. They don't happen only to people who, despite all their pain, find time to write their leaders in Congress. These tragic events happen to people on the east coast, the west coast, and everywhere in between. These tragedies happen to Americans in small towns and in big cities. These tragedies happen to citizens on the left side of the political spectrum and on the right side. As Mike Tracy wrote in his powerful letter about his son:

Democrats need health care. Republicans need health care. Independents need health care. All Americans need health care.

Get it done.

He is right. Every single Senator, every one of us, comes from a State where these injustices happen every single day. Every single Senator represents hundreds, thousands of people who have to choose between paying an electricity bill or a medical bill; between filling a doctor's prescription or—well, maybe just hoping for the best—between their mother's chemotherapy treatment and their daughter's college tuition.

As I mentioned earlier, on average an American dies from lack of health insurance every 10 minutes. That means in the short time I have been speaking our broken system has claimed at least two lives. Another American has died, another American has died—two have died a preventable death, each of them.

So as our citizens face heart-rending decisions every day, tonight every Senator has a choice to make as well. That choice: Are you going to do all you can to avert the next preventable death? I hope so. I urge an aye vote to stop this filibuster.

Mr. President, I advise my Members that in 1984 the Senate adopted a resolution, S. 40, to impose a requirement that Senators vote from their desks. I know we do not do this all the time but I ask tonight we do vote from our desks and follow the rule, S. Res. 40, and have Senators vote from their desks.

CLOTURE MOTION

The PRESIDING OFFICER. The motion to invoke cloture having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the Reid amendment No. 3276 to the Reid substitute amendment No. 2786 to H.R. 3590, the Service Members Home Ownership Tax Act of 2009.

Christopher J. Dodd, Richard Durbin, Max Baucus, Paul G. Kirk, Jr., Claire McCaskill, Jon Tester, Maria Cantwell, Barbara A. Mikulski, Mark Udall, Arlen Specter, Sherrod Brown, Mark

Begich, Sheldon Whitehouse, Bill Nelson, Roland W. Burris, Kirsten E. Gillibrand, Ron Wyden.

The PRESIDING OFFICER. By unanimous consent the mandatory quorum call is waived. The question is, Is it the sense of the Senate that debate on amendment No. 3276 to the Reid substitute amendment No. 2786 to H.R. 3590, the Service Members Home Ownership Tax Act of 2009, shall be brought to a close?

The yeas and nays are mandatory under the rule.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

The yeas and nays resulted—yeas 60, nays 40, as follows:

[Rollcall Vote No. 385 Leg.]

YEAS—60

Akaka	Franken	Mikulski
Baucus	Gillibrand	Murray
Bayh	Hagan	Nelson (NE)
Begich	Harkin	Nelson (FL)
Bennet	Inouye	Pryor
Bingaman	Johnson	Reed
Boxer	Kaufman	Reid
Brown	Kerry	Rockefeller
Burris	Kirk	Sanders
Byrd	Klobuchar	Schumer
Cantwell	Kohl	Shaheen
Cardin	Landrieu	Specter
Carper	Lautenberg	Stabenow
Casey	Leahy	Tester
Conrad	Levin	Udall (CO)
Dodd	Lieberman	Udall (NM)
Dorgan	Lincoln	Warner
Durbin	McCaskill	Webb
Feingold	Menendez	Whitehouse
Feinstein	Merkley	Wyden

NAYS—40

Alexander	DeMint	McCain
Barrasso	Ensign	McConnell
Bennett	Enzi	Murkowski
Bond	Graham	Risch
Brownback	Grassley	Roberts
Bunning	Gregg	Sessions
Burr	Hatch	Shelby
Chambliss	Hutchison	Snowe
Coburn	Inhofe	Thune
Cochran	Isakson	Vitter
Collins	Johanns	Voinovich
Corker	Kyl	Wicker
Cornyn	LeMieux	
Crapo	Lugar	

The PRESIDING OFFICER (Mrs. SHAHEEN). On this vote, the yeas are 60, the nays are 40. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

The Chair announces that because cloture has been invoked, the motion to refer falls.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I would like to thank the employees in the Office of the Secretary of the Senate who read the managers' amendment aloud for more than 7 hours on Saturday, December 19, 2009. They are:

Kathie Alvarez, John Merlino, Mary Anne Clarkson, Scott Sanborn, Leigh Hildebrand, Sheila Dwyer, Adam Gottlieb, Joe Johnston, Elizabeth MacDonough, Ken Dean, Michelle Haynes, Patrice Boyd, William Walsh, Valentin Mihalache, and Cassie Byrd.

The readers represent the offices of the Legislative Clerk, Assistant Secretary of the Senate, Parliamentarian, Bill Clerk, Journal Clerk, Executive Clerk, Daily Digest, Enrolling Clerk, and the Official Reporters of Debates.

Mr. CARDIN. Mr. President, on Wednesday, the junior Senator from Vermont offered his "single-payer" health insurance amendment, amdt. No. 2837, to H.R. 3590. Under rule XV of the Standing Rules of the Senate, an amendment must be read aloud into the RECORD unless its reading is dispensed with by unanimous consent. Such consent is routinely granted but in this instance, the junior Senator from Oklahoma objected so the clerks commenced with reading the 767-page amendment. After several hours passed, Senator SANDERS withdrew his amendment.

Later in the day, the Republican leader came to the floor and complained that "the majority somehow convinced the Parliamentarian to break with the longstanding precedent and practice of the Senate" with regard to the reading of the amendment. He claimed that continued reading of the amendment could not be dispensed with absent consent being granted, suggesting that Senator SANDERS had no right to interrupt the reading to withdraw his amendment. The Republican leader cited Riddick's *Senate Procedure: Precedents and Practices*, pages 43-44, which states, in part:

Under Rule XV, paragraph 1, and Senate precedents, an amendment shall be read by the Clerk before it is up for consideration or before the same shall be debated unless a request to waive the reading is granted; in practice that includes an ordinary amendment or an amendment in the nature of a substitute, the reading of which may not be dispensed with except by unanimous consent, and if the request is denied the amendment must be read and further interruptions are not in order; interruptions of the reading of an amendment that has been proposed are not in order, even for the purpose of proposing a substitute amendment to a committee amendment which is being read.

When an amendment is offered the regular order is it reading, and unanimous consent is required to call off the reading.

A Senator has, at the sufferance of the Senate, reserved the right to object to dispensing with further reading of an amendment.

Later on Wednesday, the senior Senator from Illinois ably addressed the Republican leader's concerns but I bring the matter up again because I was presiding at the time Senator SANDERS withdrew his amendment and Senator COBURN called for regular order. I received several phone calls afterwards from individuals who claimed that I acted erroneously in permitting Senator SANDERS to with-

draw his amendment so I would like to set the record straight.

First of all, before Senator SANDERS withdrew his amendment, I consulted with the Senior Assistant Parliamentarian, who was on the floor while I was presiding. He assured me that a Senator has the right to withdraw an amendment if no action has been taken on it. No action can be taken on an amendment until it is officially pending. An amendment is not officially pending until it has been read into the RECORD or such reading has been waived by unanimous consent.

It is important to understand that while the Presiding Officer, not the Parliamentarian, makes rulings, it would be unusual for him or her to ignore the advice of the Parliamentarian. Martin Gold, who was the senior floor staffer to two former Republican majority leaders, Howard H. Baker, Jr., and William H. Frist, MD, of Tennessee, writes in his definitive book, "Senate Procedure and Practice," that former Parliamentarian Floyd M. Riddick "claimed that in twenty-five years of advising the presiding officer, the Senate only once voted to overturn him on appeal. He also cites an example of Vice President Alben Barkley ignoring the parliamentarian's advice, only to be overturned on appeal." The Parliamentarian is a nonpartisan officer of the Senate. In the 72 years since the position was created, there have been just five Parliamentarians. The Parliamentarian and his staff are experienced professionals. I sought and received the Parliamentarian's advice on this matter and I followed it, which is how the Senate usually operates.

The Parliamentarian and his staff conducted extensive research on rule XV and the precedents governing the reading and withdrawal of amendments prior to what happened during Wednesday's session. While the Riddick's text the Republican leader cited seems plain enough, it is trumped by section 2 of rule XV itself, which clearly and succinctly states:

Any motion, amendment, or resolution may be withdrawn or modified by the mover at any time before a decision, amendment, or ordering of the yeas and nays, except a motion to reconsider, which shall not be withdrawn without leave.

Prior to the time Senator SANDERS withdrew his amendment, no action had been taken on it that would have prevented such a move without consent for a very simple reason: the amendment wasn't officially pending while it was being read into the RECORD. So Senator SANDERS had an unfettered right to withdraw it under such conditions.

The precedent for a Senator's ability to withdraw an amendment while it is being read without gaining consent first, either to dispense with the reading or to withdraw it, was firmly established in 1950 and reiterated in 1992. On

April 14, 1950, Senator Forrest C. Donnell insisted that an amendment being offered by Senator William Benton be read in its entirety. Afterwards, Senator Benton sought unanimous consent to withdraw his amendment. Senator Donnell made a parliamentary inquiry of the Chair, asking the Presiding Officer whether a Senator may withdraw an amendment while it is being read. He further stated that if consent were necessary he would object. The Presiding Officer replied that an amendment may indeed be withdrawn while it is being read, citing the language in rule XV I just mentioned. And Senator Benton withdrew his amendment.

On September 24, 1992, Senator Brock Adams offered an amendment to a tax bill and sought consent twice to dispense with reading it. In both instances, Senator Bob Packwood objected so the clerk proceeded to read the amendment aloud. Later, Senator Adams asked for "permission" to withdraw the amendment and the Chair replied affirmatively that he had the right to do so.

The 1950 precedent is cited on page 119 of Riddick's for the proposition that an amendment may be withdrawn "even as soon as it has been read" but it is, in fact, the same ruling as the 1992 precedent, that a Senator may withdraw his amendment while it is being read.

The Republican leader did not refer to the 1950 precedent in his comments on Wednesday but spoke disparagingly of what happened in 1992, saying, "the Chair made a mistake and allowed something similar (to Senator SANDERS' move) to happen. But one mistake does not a precedent make."

The Parliamentarian doesn't share the Republican leader's contention that the 1992 action was a "mistake," not a precedent. The Parliamentarian's view is echoed by Walter Oleszek, the noted senior specialist in American National Government at the Congressional Research Service, CRS, who wrote last year, "Senators are free to modify or withdraw their amendments until the Senate takes 'action' on them." This is from *Senate Amendment Process: General Conditions and Principles*, CRS Report 98-707, May 19, 2008. Martin Gold's book, "Senate Procedure and Practice," states:

When a senator sends an amendment to the desk, he continues to "own" that amendment in the sense that he can modify or withdraw it *at will* (my emphasis) . . . Once "action" has been taken on the amendment, that situation changes, and the senator can modify or withdraw his amendment only by unanimous consent. This is from page 102.

The minority has tried to argue that there was Senate action on the Sanders amendment because the Senate previously had agreed to a unanimous consent request defining the amendment and the Hutchison motion to recommit as the only propositions in order at

that stage and prohibiting amendments to them. It is true that if an amendment is on a defined list of the only amendments made in order, that amendment when pending cannot be withdrawn except by unanimous consent. But that order is irrelevant in this case because, as I mentioned before, the Sanders amendment was not pending and could not be until it was read in full or unless the reading was dispensed with by unanimous consent. Another way to put it is that the reading of the amendment was not "interrupted" by Senator SANDERS; in withdrawing it he obviated the reason for a reading. The order allowed but did not require, as it could not, that Senator SANDERS offer the amendment and take steps to make it pending.

So, to summarize, rule XV of the Standing Rules of the Senate and the 1950 and 1992 precedents are clear that Senator SANDERS was well within his rights to withdraw the amendment, the reading of it notwithstanding. The Parliamentarian advised me accordingly and I followed his advice. I would add that Senator COBURN never explicitly objected to Senator SANDERS withdrawing the amendment. He called for regular order. While regular order was indeed the reading of the amendment, that status couldn't prevent Senator SANDERS from exercising his right to withdraw it.

Finally, I regret that several of my colleagues on the other side of the aisle made comments that were critical of the Parliamentarian and his staff following this incident. The current Parliamentarian helped to write, edit, and revise Riddick's Senate Procedure and he has served in his current capacity as Chief Parliamentarian for 17 years and counting, and as a Senate Parliamentarian for 33 years. He and his staff have a combined total of 84 years of experience. They are professionals who serve this institution and the American people with distinction.

ORDERS FOR MONDAY, DECEMBER 21, 2009

Mr. KAUFMAN. Madam President, I ask unanimous consent that the Senate now stand in recess until 12 noon today, that immediately upon reconvening at noon and after any leader time, the Senate then resume consideration of H.R. 3590, with the time until 12:30 p.m. equally divided and controlled between the two leaders or their designees; that from 12:30 p.m. to 6:30 p.m., there be 1-hour alternating blocks of time, with the majority controlling the first block; that all postcloture time continue to run during any recess, adjournment, or period of morning business until 6:30 p.m. Monday.

The PRESIDING OFFICER. Without objection, the request is agreed to.

RECESS UNTIL 12 P.M. TODAY

The PRESIDING OFFICER. The Senate stands in recess until 12 p.m. today.

Thereupon, the Senate, at 1:33 a.m., recessed until 12 p.m. and reassembled when called to order by the Presiding Officer (Mr. ROCKEFELLER).

SERVICE MEMBERS HOME OWNERSHIP TAX ACT OF 2009

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of H.R. 3590, which the clerk will now report.

The bill clerk read as follows:

A bill (H.R. 3590) to amend the Internal Revenue Code of 1986 to modify the first-time homebuyers credit in the case of members of the Armed Forces and certain other Federal employees, and for other purposes.

The PRESIDING OFFICER. Under the previous order, the time until 12:30 shall be equally divided and controlled between the two leaders or their designees.

The assistant Democratic leader is recognized.

Mr. DURBIN. Mr. President, this morning we are continuing to run time postcloture on the managers' amendment. Following any leader remarks, the time until 12:30 p.m. is equally divided between the two leaders or their designees. Senator REID has asked me to serve as his designee on the Democratic side. At 12:30 p.m., we will begin alternating 1-hour blocks of time until 6:30 p.m., with the majority controlling the first hour. If all 30 hours postcloture is required, then the rollcall vote on the managers' amendment will occur about 7:15 a.m. tomorrow, Tuesday morning, and the cloture vote on the substitute will occur immediately after that. So we expect at least two rollcall votes early Tuesday morning. Hopefully, votes will not be needed today to recess or adjourn this evening. That is the state of play and business on the floor.

I see the majority leader has arrived on the floor, and I wish to give him a chance, if he is seeking that opportunity, to make any announcements he believes will be timely and appropriate.

The majority leader indicates he is not going to make an announcement, so I wish to make some comments about where we are at this moment.

I can't imagine there are many people in America who have been following this day's session because it began at 12:01 a.m., when the Senate was reconvened for a vote on the managers' amendment to health care reform, which took place just a few minutes after 1 a.m. this morning. We recessed and now are returning for the rest of the legislative day.

When the history of the Senate is written, I think this vote will be included because it is a historic vote. We consider many issues in the Senate of great importance to individuals,

groups, States, and to our Nation, but seldom do we address an issue of this magnitude or scope. This health care reform issue literally touches every person who is following this debate and many who are not even aware of it. What we are doing is addressing some of the fundamentals of our health care system in America that need to be changed.

Whenever you are suggesting change in America, there is resistance. There are people who are currently comfortable with the health care system as we have it, and there are people who are benefiting from the system as we know it, particularly health insurance companies which enjoy great profits because of the current system of health care in America. But at the heart of the issue, we know this system is unsustainable and, as a result, we have engaged in almost a 1-year effort to thoroughly investigate our health care system and to find ways to change it for the better. This has called on so many of our colleagues to make extraordinary contributions to this search for reform.

I wish to commend, first, our majority leader HARRY REID, who usually stands at our caucus meetings and says: Stop congratulating me; I am just doing my job. I am going to do it anyway. Senator REID has worked tirelessly—and I have seen most of it firsthand—to build a coalition for health care reform within the Democratic caucus. We didn't have a single Republican vote that was in support of reform in the early morning hours. I hope that changes as time passes, but he had to build a coalition within our caucus of conservative and progressive Senators, and he did it, so we had all 60 Democratic Members voting for health care reform.

We are united in the belief that there are fundamental things that need to be changed in our health care system. First, it needs to be more affordable. People cannot afford this dramatic escalation in the cost of health care. Ten years ago, a health care policy for a family of four offered through their employer cost about \$6,000 a year in premiums. That is \$500 a month which, instead of being paid to an employee as salary, was taken from them for health insurance—\$500 a month.

Today, that number has grown to \$12,000 a year for an average family of four for health insurance through their employment. One thousand dollars a month that might otherwise go to a family for basic necessities of life and savings and buying things that are important to their future instead goes to pay for health insurance. That escalation, that 100-percent increase in health insurance premiums in 10 years, is troubling but not nearly as troubling as the projection that if we continue to see an escalation in costs of health insurance premiums based on what we

have seen in the past, in another 8 years it will double again. Imagine 8 years from now, in 2017, that you have to work and earn \$2,000 a month just to pay for your health insurance. How many people will be able to do that? How many businesses will be able to afford it? The answer is obvious. More and more people will be dropped. Today, 50 million Americans have no health insurance. Many of them go to work every single day, but their employers can't afford to provide health insurance or they are unemployed or they have some other problem where they have been excluded by a health insurance company. So in addition to dealing with the fundamental issue of health care reform, we are focusing on affordability, how to bend the cost curve, as they say, or reduce the increase in costs of health insurance premiums. I wouldn't stand here and say to the people of America, with the passage of the bill we are now considering, everyone's health insurance is going down, but I think I can say, with some confidence, the rate of increase is going to decline, and that will give people a better chance of affordability. That is essential.

Secondly, what about those 50 million uninsured people? I have met them, as the Senator from West Virginia has as well. These are not lazy, shiftless people who aren't trying. Many of them are trying hard, but they don't have a chance for health insurance coverage for a variety of reasons. We are going to change that. Of the 50 million currently uninsured, over 30 million will have insurance under this bill. Those in the lower income categories will qualify for what we call Medicaid, which is a Federal-State health insurance program for the poor and disabled. Most of those people—those who make less than \$15,000 a year—will not pay any premiums because they can't. They don't have enough money. For those who are making slightly more, we provide in this bill tax credits that will help people pay for their premiums. So if your family is making up to \$80,000 a year, the Tax Code will now help you pay for your monthly premium for health insurance.

So we are going to expand coverage. Thirty million people are going to have the security of health insurance coverage. We are bending the cost curve so the increase in health insurance premiums is not as steep, making sure more people are covered, and then, equally important, we are changing the rules when it comes to health insurance companies.

For too long, these health insurance companies have ruled the roost. Since the early 1940s, they have been exempt from antitrust laws which allow them to literally collude and conspire with these set prices. Over half the insurance markets in America are domi-

nated by only two companies, and it is legal under our law for those two companies to sit down and say: OK, how much are we going to charge? They don't compete with one another, they conspire with one another to set premium rates. If you think I am a conspiracy theorist, what I am stating to you is what the law clearly says in the McCarran-Ferguson Act—something I think should be repealed posthaste—because they can sit down and set premiums. They can also allocate markets. They can say to two companies: You take over St. Louis and those two companies will do Chicago and these two companies are going to do Wheeling, WV. They can set up the market structures so there is little or no competition. How can that be good? If we truly believe in a free market system, how can this be good for America?

So what we are doing as well is saying: We are going to change some of these rules, some of the most egregious abuses by these health insurance companies—first and foremost, preexisting conditions. How many of us are in such perfect health that we can count on a health insurance company covering us without delving into our background, finding something in our family history or something in our own personal history and saying: Well, we are either not going to cover you or we are going to charge you dramatically more. Those days have to end.

Let me tell my colleagues what this bill does. It says immediately—immediately—children under the age of 18 with preexisting conditions cannot be discriminated against by health insurance companies. You can't deny them coverage because a child is born and develops diabetes. You can't deny coverage because a child has had cancer and is fighting that cancer. You cannot deny coverage because of those preexisting conditions. That is fundamentally fair. It gets to the heart of what we should be doing as a nation.

Senator TOM HARKIN of Iowa stood at this podium early this morning and said: What this debate is about is whether health insurance is a right or a privilege. If it is a privilege only for the wealthy in America, then we have lost our way as a nation. We have to understand that protection of our well-being and health through health insurance is something every American is entitled to. We have to understand we are the only developed Nation on Earth where a person could literally die because they don't have health insurance.

If you think that is overly dramatic, let me give an illustration.

A man I met in Illinois had a health insurance policy that wasn't very good. It had a \$5,000 copay. He had to take that copay so his premiums would be low enough so he could afford it. That man went to a doctor who said to him: I see some indications from tests that

you need a colonoscopy. You may be developing colon cancer. So the man went and priced a colonoscopy procedure and found out it was \$3,000 he would have to pay out-of-pocket and he said: I don't have it. So he didn't go through with the procedure. That is a risky thing, and it is something no one should have to face, but that is the current system.

What we are trying to do is change that system so that basically preexisting conditions are excluded from the discrimination of health insurance companies, that basic procedures that are needed for prevention and wellness are included in every health insurance policy. We are also making certain that these health insurance companies can't cut you off when you need them the most, can't cancel your policy when you face an accident or a diagnosis where medical bills are going to pile up. That is one of the provisions of this bill as well.

We also say, for families with young children who are off to college—and my wife and I have been through this—that you reach the point where you finally say: Wait a minute. My daughter is graduating from college. I wonder if she is still under my family health insurance plan. Today, in most cases, if your child has reached the age of 24, they are off your family plan. Well, we extend that now so those 24 and 25 will have the protection of their family health insurance plan while they finish school, look for their first job and obtain their own health insurance. That is going to be peace of mind for a lot of families across America, just those 2 years when young people are the most vulnerable and need the protection of their family health insurance plan.

Are these worth anything, these changes? I think they are worth a lot. I think that is why 60 Democrats stood proudly and voted for this.

Senator MCCONNELL, the Republican leader, turned to us in the midst of this dramatic debate early this morning and said: If one of you—and he pointed to all of us sitting here—doesn't vote against it, then all of you Democratic Senators will own this.

We know that, and we have pride in that ownership because we know the alternative. Those who voted against change are voting for a system that is unsustainable and morally indefensible—a system which, frankly, today puts good, hard-working people, folks who follow the rules, Americans who believe they are doing the very best for their country, at a distinct disadvantage for one of the most basic things we expect in life: protection of good health care when we are facing illness and when we need a helping hand.

This bill is also going to change the face of health care in America. I don't think I overstated it. Our bill has \$10 billion to be invested in community health clinics. Senator BERNIE SANDERS of Vermont has been such a leader

on this issue and deserves credit for it. He was dogged. Some Members looked to this bill for a variety of things, but Senator SANDERS looked to this bill to provide a helping hand across America through community health clinics. As those clinics are built and expanded, more and more small towns in West Virginia and in Illinois are going to have satellite clinics where people, regardless of whether they are wealthy or not as wealthy, will have a chance to walk in the front door and see a medical professional. They will not be queuing outside the emergency rooms of hospitals, where their care is much more expensive. They will be going to these community health clinics and meeting primary care physicians who will give them the basic care they need before their medical problems become much more serious.

That is what this bill is fundamentally about. There are many other parts to it, parts I am proud to be co-sponsoring and proud to be supporting—giving a hand to small businesses, giving a hand to individuals to expand health insurance coverage.

Some might ask: If you voted on it at 1 o'clock this morning, why are you still here? Because the minority is exercising its right under the Senate rules which requires us now to wait 30 hours before we can vote again on this one section of the bill. As I announced this morning, that means that in the early hours tomorrow morning, about 7:15 or 7:20, Senators will be coming to the floor again for two votes to move this process forward. I understand it is the right of the minority to ask us to come in at 1 in the morning or early in the morning. They have that right. Historically, we have usually reached some accommodation and agreement, and I hope we can here. The 60 votes that were there last night will be there again tomorrow morning, and they will be there every time needed until this bill is finally passed.

Those on the other side believe this bill is so bad that it is going to revitalize the Republican Party in the next election. I disagree with them. I think the American people, as they come to understand this bill, will view it in its historic context, one of the most dramatic steps forward to provide peace of mind and security to families and businesses across America for an issue we know needs to be addressed.

There are some who came to the floor yesterday—there was one Senator. I invited him to come in and explain his remarks. He said people should say a prayer that someone would miss the vote at 1 a.m. I do not think we should be praying for misfortune for our Senators, that they would be delayed or for some other reason could not make the vote. Instead, we should be praying to overcome the misfortune of 30 million Americans who will not have health insurance if this bill fails. That

is the kind of misfortune I want to avoid in the future.

We also have one other item of business remaining, and that is the debt ceiling of America. It is something none of us want to face. It is almost like making your monthly payment for the mortgage, and that is what it is, the mortgage of America. We have to acknowledge the fact that as we fight a war and incur the costs, as we have the workings of government assessed, and we know there are costs, it adds to the expense of our government, and some of it is in debt, and that debt needs to be extended for a short period of time as we move forward into the next year that begins in just a few days. This debt ceiling issue is one we need to come to grips with before we leave at the end of this month. There is a short-term extension which I hope the Senate will consider.

I wish to also say that Senator CONRAD of North Dakota, chairman of the Senate Budget Committee, has been a real leader in talking about coming to grips with this long-term debt. I have said to him, in the midst of a recession, with high unemployment, most economists believe it would be a mistake for us to pull back in terms of the safety net for families out of work, to pull back in terms of the investment in infrastructure to put people to work, and Senator CONRAD says he agrees. Although he believes we need to be honest about the debt of America, he has said to me repeatedly that he is not a Hooverite, referring to that period in history when the Great Depression hit and President Herbert Hoover believed government should address the debt of America instead of the depression of America. He lost that election to Franklin Roosevelt in 1932 as a result of that point of view.

Many of us believe the debt is a serious issue to be grappled with, but at the current moment we have to focus on the millions of Americans out of work who need a helping hand, first with unemployment benefits, COBRA benefits, food stamps, the basic necessities of life. We have to provide opportunities for education and training, and then we have to find a way to spark this economy and move it forward.

Senator REID has given to me and Senator DORGAN of North Dakota the responsibility of looking at the Senate jobs-creation package. We have been working on that, and we are close with our colleagues in the House in coming up with some ideas on how to expand employment. I hope we can have bipartisan support for that. It would certainly make it a lot easier, and it would be done more quickly so that we do not lose jobs in the next construction season coming up next year.

That is the reality of the agenda we face when we return. I did tell you that now most Members of the Senate on

both sides of the aisle are anxious to share their holiday season with their families. It is one of those special times of the year. We now have a record vote of 60 Members on this side on health care reform. I hope we can get the agreement from the Republican side to bring this matter to closure soon, to vote on the debt ceiling, and to have at least a short adjournment for some time for us to return home to our States and home to our families.

Mr. President, if there is no one seeking recognition at this time, I suggest the absence of a quorum and ask that the time under the quorum call be assessed against both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant bill clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the time until 6:30 p.m. will be divided in 1-hour alternating blocks of time, with the majority controlling the first block.

Mr. BAUCUS. Mr. President, I wish to take a few moments this morning to talk about a provision in this package about which I am particularly proud. This would finally follow through on the Federal Government's responsibility to provide screening and medical care to residents at Superfund public health emergency sites.

The term "public health emergency" is defined by the Comprehensive Environmental Response Compensation and Liability Act of 1980, otherwise known as CERCLA. People call that the Superfund law—CERCLA. That law reserves the declaration of public health emergency for the most hazardous Superfund sites. These are sites where the release or potential release of a hazardous substance rises to the level of an emergency.

When a public health emergency is declared, the law requires that the Secretary of Health and Human Services provide screening and medical care services to people who have been exposed. But to date, the government has not created a mechanism to allow the Secretary to deliver the screening and medical care required under current law. The bill before us finally provides that mechanism.

First, it authorizes a grant program for the screening services. These screenings would determine if a medical condition is present that is attributable to environmental exposure. Then, it allows those individuals with a diagnosed medical condition due to the environmental exposure at the site to get medical care services.

It also establishes a pilot program to provide additional medical care appropriate for the residents of the Superfund site at Libby, MT. This language

responds to Libby's rural nature and the lack of access to traditional care. This provision is important because it will provide vital medical services to Americans who, through no fault of their own, have suffered horrible effects from their exposure to deadly poisons. It will provide the vital medical services we owe these Americans under our commitment in prior legislation; that is, the Superfund Act.

This provision is especially important to me for a special reason. The Environmental Protection Agency currently has 1,270 sites designated where pollution contamination presents a danger to public health and welfare. Throughout the history of the program, the EPA has found only one site where conditions are so severe and the contamination so pervasive to have it warranted a declaration of a "public health emergency." That declaration occurred on June 17 of this year. EPA Administrator Jackson found that a public health emergency exists at the Superfund site in Libby, MT.

Many Senators have heard me speak about Libby. Libby, MT, is a beautiful little town, a small town in northeastern Montana, surrounded by millions of acres of Federal forest lands. It appears to be an idyllic spot. It is home to families of all ages. It is a place where people spend their lives creating a sense of community not often found in the country today. It is also a town that has gone through lots of stress, lots of economic difficulties. The timber industry has virtually shut down Libby, one of the mainstays in Libby. Mining there is not quite what it used to be in years past. Here the people work together. They love Libby. It is tucked away, almost isolated in the northeastern part of Montana. Most people in Montana have never been to Libby, and some don't even know where Libby is, but they have this wonderful sense of community in their own town.

However, Libby is also a Superfund site. It is the home of a big mine. It is a place where hundreds of people have grown sick and died—died due to pervasive presence of asbestos spewed from the vermiculite mining and milling operations of W.R. Grace.

Gold miners discovered vermiculite in Libby in 1881. In the 1920s, the Zonolite Company formed and began mining vermiculite. In 1963, W.R. Grace bought the Zonolite mining operations, operated it, and made a lot of money, frankly, and the mine closed in 1990.

The EPA first visited Libby in 1999. In October 2002, EPA declared it a Superfund site. Cleanup was begun. It was very pervasive, very difficult, and it was a hard time getting the trust between the EPA and the people in the community. A lot of people didn't trust that EPA was doing the right job, not doing it the right way. In fact, I had to get so involved in so many ways in

holding EPA's feet to the fire because they weren't doing something such as a base-level study. They didn't know how clean clean was. They did not do a very good job.

A guy named Paul Peronard was the onsite coordinator, who was finally able to convince EPA back in Denver what they had to do. In my personal judgment, they didn't send Paul back because he was doing such a good job. Anyway, cleanup began in 2002, and we still have a long way to go.

For decades, the W.R. Grace operation belched 5,000 pounds of asbestos into the air in and around Libby every day. Deadly asbestos coated the town and its inhabitants. People used raw vermiculite ore or expanded vermiculite to fill their gardens, their driveways, they put the stuff on the high school track, the little league ballfield, and put the stuff up in their attics. It was used everywhere, this stuff. People sort of sensed there was something not quite right with all this vermiculite and asbestos, but it was kind of hard to put your finger on.

One day, I visited Libby, and I will never forget, when I went to the mine, I was stunned to see these miners come off the mine and into their buses. They were caked with dust. I mean, it added new meaning to a dustbin. They were just caked with the stuff on their clothes. They got on the bus, went home.

The one person I talked to and who got me interested in doing something about this—a guy named Les Scramsted—told me, when he got off the bus, he would go home—caked with dust—and embrace his wife, his kids would jump in his lap, and guess what: Les is now dead from asbestos-related vermiculite. His wife is ill, and one of his children has died as a consequence. Think of the pain he went through. He died because of mesothelioma asbestos. Also, even worse, he caused his wife to be ill and caused his son to die because of this disease.

Mine workers brought the dust home with them, as I mentioned, on their clothing. They contaminated their own families without knowing the dust was poison. We knew something was wrong, but we didn't know it was that wrong.

I think the company knew exactly what it was doing. In fact, I might say, the company has been subject to a criminal action against their officers, with allegations the officers knew they were contaminating the people and didn't disclose it. That suit went on for a year. It is true the officers were acquitted not long ago, but in my personal judgment, it was because of a lousy prosecution. But it is an example where somebody thought—a lot of people thought—not only did the officers of this company contaminate people, but they knew they were contaminating people at Libby, MT.

Asbestos was everywhere in Libby for decades. I must say, W.R. Grace Com-

pany sure did not help matters. I might say, parenthetically, this is the same company that is the subject of a book and a movie called "Civil Action," where W.R. Grace contaminated the water in Woburn, MA. In my judgment, they knew what they were doing. It is clear they knew what they were doing. As I recall, a big civil judgment was rendered against W.R. Grace because it was clear they knew what they were doing. They are now bankrupt. W.R. Grace shoved all their assets to another location so the plaintiffs in the suit against W.R. Grace could not attach their assets—and all the shenanigans this company undertook for their own benefit and at the expense of the people in Libby.

The type of asbestos in Libby is particularly deadly, and so many people in Libby are dead, dying, and sick because of this tremolite asbestos, an especially vicious, pernicious form of asbestos. This is not regular asbestos, such as chrysotile, this was tremolite asbestos mined at Libby, MT, where the fibers are deeper and they are stronger. They get in your lungs and they cause more damage and it takes longer to detect. It is that vicious.

The effect on Libby has been severe. Today, we know that nearly 300 residents of Libby have died—300. It is a small town. Thousands more have become sick with asbestos-related disease. That is 291 deaths in a county of 18,000. Lincoln County, MT, home to Libby, has the highest age-adjusted death rate due to asbestosis in the Nation.

Libby is an isolated community with limited access to health care. The median household income in Libby in 2007 was \$30,000. When I say "isolated community with limited access to medical care," what do I mean? There is just not that much there. And the company has reneged on its insurance policies. The company had mediocre insurance policies for folks, but as time goes on, the company just backs off—backs off. It is really what is happening in the health care reform here. They rescind—renege on their policies for one reason after another. The poor folks, when they know they have asbestos-related—either cancer or other lung-related disease, they do not have the resources to go to get the medical attention.

I have been at this for years. It is so frustrating, it is so wrong what has happened to the people of Libby, MT.

It is this combination of devastating characteristics that led the EPA Administrator in June to find that the public health emergency does exist at the Libby Superfund site. This finding was based on years of work, having originally been recommended by the EPA in 2001.

I might say, I read the transcripts between EPA Administrators and OMB back in those years. The EPA Administrator under the Republican administration recommended that this action

be taken, but it was squelched at the White House by OMB. The correspondence is clear. This is exactly what happened back then in a previous administration. That is why EPA has never used this authority, and the Agency indicates there are currently no sites on the National Priorities List that come close to the conditions at Libby.

It is worth highlighting a few parts of the Administrator's findings. Let me indicate what they are. The Administrator has said:

The Libby Asbestos Site is unique with respect to the multiplicity of exposure routes [all ways this stuff gets to them], the cumulative exposures experienced by community members, and the adverse health effects from asbestos exposure already present and documented in the residents.

Investigations performed by the Agency for Toxic Substances and Disease Registry (ATSDR) have found hundreds of cases of asbestos-related disease in this relatively small community. ATSDR documented a disease and death rate from asbestosis in the Libby area significantly higher than the national average for the period from 1979–1998. The occurrences of disease are not limited to vermiculite facility workers or their families, but are spread throughout the population.

This is pervasive in the town—ball fields, tracks, lawns; it is awful.

Medical care in Libby has historically been limited due to Libby's isolated location and economic situation, thus reducing the chance of early detection and treatment of asbestos-related disease.

This piece bears repeating:

Let me refine that point. For a long time, we have been talking to lung specialists across the country about the Libby tremolite asbestos, and we got just so-so responses about how dangerous it was. Why? Because virtually none of those doctors had experience dealing with the pernicious kind of asbestos we have in Libby, MT. It took a long time to get their attention. We finally got some doctors to say this stuff in Libby is wicked stuff. That is why, frankly, EPA has started to understand how bad this really is.

Essentially, the lack of access to health care services in Libby—I will say it again—has actually worsened the effects of this contamination. It just worked to their disadvantage.

The language before us today helps to solve this. It allows us to fulfill the commitment we made to the people of Libby when we passed the Superfund Act 30 years ago. Heaven forbid, if in the future another Superfund site like Libby emerges, the bill before us today will allow the Secretary to use the authorities in this provision to fulfill our commitment to provide health care services for those residents as well.

I can never talk about Libby without remembering my friend Les Skramsted. I mentioned his name a few moments ago. I first met Les in the year 2000 at the home of Gayla Benefield. Les was there, Gayla was there, and lots of other miners were

there pleading for help, for some attention: We are dying. Someone pay attention to us. We are a small, isolated community up here in northwestern Montana. Please, someone, pay attention to us.

This did get our attention. I was stunned by the stories they told. I was talking to Les over coffee and huckleberry pie—a very popular pie up in Libby. Les was watching me very closely when I said: You bet, I will help do something about this. He was very wary.

After his neighbors and friends had finished telling me their stories, I will never forget that Les came up to me and said: Senator, a lot of people have come to Libby, and they told us they would help. Then they leave and nothing happens.

He told me, I remember, I think at that instant—you know, in life sometimes you find four, five, six, seven instances, man to man, whatever it takes, you are going to make sure they get justice; whatever it takes, whatever it takes. Such a commitment. That was one. I said to myself: Boy, I am going to do whatever it takes to take care of this because these people of Libby deserve justice. They have not received it.

He said: Senator, I heard you say that, but I will be watching you.

I knew he would watch. I knew that would help. I didn't actually say it because I was going to do it anyway. I accepted Les's offer, and I have a big photograph of Les behind my desk.

Les passed away a couple or 3 years ago. I spent a lot of time with him and his family at the hospital. I have a wonderful picture of Les Skramsted that reminds me what we have to do for the people of Libby but also for all the people in the Nation, people like Les Skramsted. It means that much to me.

I have not forgotten Les. I will not forget Les. That is why this provision is in here. I think Les, right now, up there, may be smiling, saying: Yup, he did not forget Libby, he did not forget Les. That is what this provision is all about.

This is a photograph behind me of Les Skramsted in Libby, MT. He is in a cemetery there, graves of lots of people in Libby who died. Les played a pretty mean guitar. He was a great guy—still is, always will be.

I yield to my colleague from Montana, Senator TESTER.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. TESTER. Mr. President, come snow or sunshine—day or night—we are close to sealing the deal to change our country for the better, to finally hold insurance companies accountable, and to make health care affordable for all folks in this country.

Right now we are all paying far too much for health insurance. Many of us

can not get health insurance at all. And even worse, insurance companies don't always live up to their end of the bargain.

Sure, a lot of folks are happy with the health care they have.

Our doctors, nurses and hospitals and medical research are the best in the world.

But when you add it all up, many are paying too much for it. Or nothing for it. Too many lives are lost. Too much money is wasted. And too many folks are falling through the cracks.

They are calling out for help. I have heard their voices. Now I want you to hear their stories. They are ordinary people who stand to lose everything unless we reform our health care system.

I support this health care reform bill because it saves lives. It saves money. It saves Medicare. And it is tough on insurance companies—taking them to task to ensure affordable, fair coverage.

I have a perspective different than most of my friends in the Senate.

I am—and always will be—a third generation Montana farmer. My wife Sharla and I do all the work on our farm. I am the guy sitting on the tractor.

A farmer knows a good year from a bad year. And I have had my share of bad years. In fact, for a few of those years—not long after our first kid was born—Sharla and I had to give up health insurance to make ends meet. We had no other choice but to hope and pray for health and safety.

Thank God our prayers were answered.

Now, I have the honor of serving Montana in the Senate.

But mine is one of the thousands of real Montana families that has been forced to wing it, rather than depend on a health care system that works. And that holds insurance companies accountable.

I know of a woman from Ravalli, MT, who cannot afford health insurance because of her pre-existing condition. She and her husband got letters from the insurance company telling them their premiums were going up, \$500, to \$600, to \$700 per month. Through no fault of her own, her insurance just became too expensive. So she gave up.

This legislation will prevent that sort of nonsense in the insurance industry from happening again. In this bill, a health insurer's participation in the exchanges will depend on its performance.

Insurers that jack up their premiums before the exchanges begin will not be included. That is a powerful incentive to keep premiums affordable.

We all have friends and relatives who aren't fortunate enough to have a job where health insurance is part of the deal. So they do what millions of others are forced to do: they hope and pray they stay healthy.

We have a problem. It is time for a solution using common sense and fiscal responsibility. And that is why I am going to vote for this health care reform bill, so we can save lives, save money, save Medicare. And so we can hold insurance companies accountable, so they don't drop people when they are sick, or drive families into bankruptcy.

Because of tax credits, this bill is good for small businesses. It gives eligible small businesses access to up to 6 years of tax credits. That will help small businesses buy health insurance for their employees.

Because of tough new rules for the insurance industry, it is good for families and kids.

And because of commonsense ideas like cross-State insurance markets, more competition, and more choices, it is good for millions of Americans who—until now—have had to rely on hope and prayers.

If we do not pass this bill, our entire economy could fall apart beyond repair. Right now we are working hard to rebuild our economy, and it is working.

We are creating jobs and investing in the basic infrastructure needed to get our economy back out of the ditch. Fixing our broken health care system is part of that job.

Over the past few years, I have heard from thousands of Montanans telling me about the need to fix health care.

One of them is Roxy Burley. Roxy owns a hair salon in Billings, MT.

She just bought a home. She works hard. But she just can't afford health insurance. So, she says, she is walking a tightrope. Her home and her business are on one side. Her health is on the other side.

If Roxy gets sick, she worries she will lose her home and her business.

In Montana, our economy relies on people like Roxy Burley. We can't afford to have our economy walking a tightrope.

In this bill, Roxy will be protected from losing her home and business. Her annual out of pocket expenses are capped at no more than \$5,950 per year.

I want to share another story that hits home for me. It is the story of Mindy Renfro. She lives in Missoula, MT.

Mindy got breast cancer not just once, not just twice, not just three times—four times: Breast cancers, four different cancers.

The same cancer didn't come back. She got a different cancer each time. The first two times, Mindy's insurance paid for her treatment.

The third time, the insurance company called her and said: We are sorry, but we are not going to pay. The underwriter, she says, determined her chances of survival were just too slim, so instead they offered to send a hospice nurse.

Mindy was a single mom in her early 40s, and she was simply not ready to

check out. So she asked about her options. She was told if she wanted to start chemo, she would have to come up with more than \$100,000 in cash. Her only option was to sell her home. Mindy and her children sold their home, and moved into an apartment. They packed up and moved out of their home so they could sell it and she could start the treatment she needed to stay alive. After many years of trying to repay that debt, Mindy recently declared bankruptcy.

I have heard many stories from folks in Montana who are in the same boat that Mindy is in. This isn't good business. This needs to stop. It is why I support this health care reform bill. I support it because under this bill, Mindy and people like her wouldn't have to declare bankruptcy. She would have had insurance, despite her pre-existing condition of being a cancer survivor, and her annual out-of-pocket expenses would have been capped at no more than \$5,950 per year, not the \$100,000 in cash she needed to start cancer treatment. This bill is strong and decisive and tough on insurance companies so they cannot say, sorry, but no, when you get sick; so they cannot say, sorry, but no, if you have a pre-existing condition.

Another story is about former ranchers Dan and Pat Dejong. This picture is of Pat. Dan and Pat used to own a cattle ranch in northwestern Montana. The ranch had been in their family for four generations. Dan and Pat couldn't afford health insurance. Then Dan was diagnosed with cancer. To pay the bills they had to make the painful decision to sell off their ranch.

I am going to tell you, when a piece of land has been in the family for four generations, you develop an attachment to that piece of land. But nonetheless when Dan got cancer, they had to pay the bills. They sold the family ranch. Under this bill, the Dejonges would have had access to subsidies so that they could have afforded health insurance in the first place. They never would have had to sell the ranch to pay the doctors' bills.

I want to read what Pat wrote to me about that experience:

The cancer ravaged Dan's body, but selling our ranch to pay for medical costs broke his spirit.

Dan Dejong lost his battle with cancer 2 years ago. All his bills were paid, but the ranch that had been in the family for four generations was gone, as well as Dan. After all that, Pat still cannot afford health insurance today.

Under this health care reform bill, getting sick won't force folks such as Dan and Pat Dejong to sell the land that has been in their family for generations. That is because it limits the amount of money you would have to pay out-of-pocket to a rate you can afford based on how much you earn. That means no Americans would have to sell

their homes or their family ranches to pay the medical bills.

I know a lot of folks already have health insurance, and they are wondering, how is this going to affect me. Let me be clear: If you like your plan, you get to keep it. If you don't, you can look for a more affordable plan that works best for you and your family. Everyone will have access to affordable health insurance. Right now those with health insurance are subsidizing those without.

The other day I struck up a conversation with a trucker back in Montana who told me: I don't need insurance. I don't want insurance. I don't get sick. I asked: What happens if you get into an accident? You are a trucker; that is always a possibility. He said: All I have to do is go to the emergency room where they take care of me, no questions asked.

That is exactly the problem. When everybody is insured, costs will go down, because no one will be paying extra to cover the folks who rely on the emergency room for health care that they eventually never pay for. It is common sense. It saves lives, and it saves money.

I have been on the phone with tens of thousands of Montanans over the past few weeks answering questions about health care. A lot of them want to know how we are going to pay for this bill. How much will it increase our debt?

It won't increase our debt one thin dime. In fact, it will lower our deficit by hundreds of billions of dollars, \$132 billion over the next 10 years alone. It reduces the deficit even more in the decade after that. The fact that this bill saves money is pretty important to me. It doesn't add to the deficit. It cuts billions of dollars of government waste. It requires a bigger chunk of your premiums to go directly to better health care instead of administrative costs and profits, it saves money for families by lowering costs for everyone and by limiting the amount of money you have to pay out-of-pocket for health care and by emphasizing wellness and prevention—the low-hanging fruit of health care reform, and by holding insurance companies accountable so we don't pay more than our fair share for the health care we need.

When you turn on the TV these days or open the newspaper, you see all sorts of spin about the health care reform and Medicare. It amazes me how distorted the facts have become. I have read the bill. The plain-as-dirt fact is it makes Medicare stronger. All guaranteed Medicare benefits stay as they are. They are just that—guaranteed. Seniors are guaranteed to keep their benefits, such as hospital stays, access to doctors, home health care, nursing homes, and prescription drugs. How do we make Medicare stronger? We make it stronger by getting rid of wasteful

spending, by making prescription drugs for seniors more affordable, and by spending your money smarter.

Without this bill, Medicare will be on the rocks within a matter of years. If we don't fix it now, it will go broke, leaving entire generations in the lurch. Millions of Americans have worked hard all their lives for Medicare benefits. They have earned it. That is why we are making Medicare better, not worse. That is common sense.

The same goes for VA health care. This bill does not affect VA health care or TRICARE. I serve on the Veterans' Affairs committee. Over the past 3 years we have made good progress in delivering the promises made to veterans. We still have a lot of work to do, but this health care reform legislation takes us forward even further for America's veterans.

Finally, this bill preserves some of the most important parts of quality health care: the relationship between you and your doctor and the freedom of choice you have as a patient. In Montana, as in many parts of the country, we don't tolerate the government snooping around our private lives or making personal decisions for us. Health care is no exception. This health care reform bill not only saves lives, it saves money and saves Medicare. It keeps the government out of the exam room and waiting room.

I go home to Montana about every weekend to visit with the folks and hear what is on their minds. I meet with doctors and nurses, hospital administrators and regular folks from all over the State to hear their concerns. Everywhere I go, health care is the No. 1 issue. It is clear that the worst option is to do nothing at all. If that happens, insurance companies won't be held accountable. As costs go up, health care costs will continue to break families and people who need treatment to stay alive won't get it.

I know a fellow farmer who worked some land back in Montana. When he got sick, he had to sell off entire chunks of his family farm to pay the bills, piece by piece. Piece by piece, I watched as he made painful sacrifices for his health care. Piece by piece, his livelihood was broken apart. No American deserves that.

People are calling out for help, because a lot of folks are falling through the cracks. I say to them: We are listening. We hear you, and we are doing something about it. That is why this is a good bill. It is a bill I support. It will allow Americans to get the health insurance they have needed, and the insurance will be affordable. It is the result of a lot of hard work and working together to do what is right for the country—for America's rural families, seniors, veterans, small businesses, family farms, and ranchers. The people of this country deserve no less.

I yield the floor.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. SANDERS. Mr. President, I was proud last night to have voted for the health care bill. The reason is, as Senator TESTER indicated, this bill accomplishes a whole lot. Before I go on to talk about what I want to focus on this afternoon, I do want to say there are a number of provisions in the Senate bill I don't support and I hope we can improve in the conference committee by adopting the House language. One is the issue of the public option, with which the Presiding Officer has been so strongly involved. At the end of the day, it seems to me the American people have been very clear. If they are not happy with their private insurance, they want the option of a Medicare type public option. I think we should give them that.

Furthermore, as we look at the soaring cost of health care, we understand that one important mechanism to control escalating health care costs is a public option which provides real competition to private insurance companies that are only concerned about making as much money as possible. I know the Presiding Officer has worked very hard in that effort. I hope we can, in that regard, take the House language which includes a public option.

The other area where I disagree with the Senate and agree with the House is on the issue of taxing health benefits for middle-income workers. The House provision raises substantial funding by putting a surtax on the very wealthiest people in the country, people who received huge tax breaks during the Bush years. That makes a lot more sense to me than taxing the health benefits of middle-income workers.

Having said that, I want to focus on one new provision that was placed in the health care reform bill by Majority Leader REID. I thank him very much for his strong support for this concept. I also thank DICK DURBIN, CHUCK SCHUMER, PATTY MURRAY, the Presiding Officer, and the entire Democratic leadership for their support.

That provision simply provides \$10 billion over a 5-year period to the Federally Qualified Health Center Program and the National Health Service Corps. In my view, these two programs are some of the best and most effective public health care programs in the United States. They enjoy widespread bipartisan support. President Bush was a supporter. JOHN MCCAIN, when he ran for President, was a supporter of community health centers. Many Republicans have spoken positively of community health centers, as have virtually all Democrats. The reality, however, is that both community health centers and the National Health Service Corps have been starved for funding for many years. We are finally, in this bill, doing right by them.

I should mention, importantly, that while we have placed \$10 billion in the

Senate bill, in the House bill there is \$14 billion. My strong hope, expectation, and belief—and I have talked to the White House about this and the Senate leadership and House leadership—is that when this bill is finally passed, we will adopt the House language which calls for \$14 billion.

Let me tell you why this money is so terribly important. In a few days, the Senate will be voting on final passage of a historic health reform bill that will insure an additional 31 million Americans who have no health insurance. That is a huge accomplishment. About half of the new people who will get health insurance will be enrolled in an expanded Medicaid Program. While this reduction in the number of uninsured is an essential step in achieving reform, we have to ask a very simple question: If 15 million more people go into Medicaid, where are they going to access the health care they need?

It is no secret that today Medicare is a strained program. When some of my Republican friends make that point, I have to say they are right; it is a strained program. That is why expanding community health centers in the National Health Service Corps is so important.

We talk about the number of people uninsured—a very important number—46 million. But we do not talk about the number of people who every day do not have access to a physician or a dentist on a regular basis, and that number is close to 60 million. These are people who, when they get sick, cannot find a doctor. Where do they go?

Well, several things happen. They may end up going to the emergency room, which is the most expensive form of primary health care we have—that is where they go—or even worse, they do not go to any doctor at all. What happens is, they get sicker and sicker. Then they go stumbling into a doctor's office, and the doctor says: Why didn't you come in here 6 months ago?

And the person says: I don't have any health insurance. I couldn't afford it.

Then they go to the hospital, and we spend tens and tens of thousands of dollars treating somebody who is now suffering in a way they should not be suffering, at greater expense to the system than should have been the case. Now, what sense does that make?

Let me tell you the worst-case scenario. The worst-case scenario is, they walk into the doctor's office, and the doctor says: It is too late. I can't help you anymore. You should have been in here 6 months ago. I have talked to physicians who have told me about that. I suspect the Presiding Officer has as well. That is why this year we are going to see 45,000 of our fellow Americans die because they do not have health insurance, and they do not get to the doctor when they should.

Now, one of the advantages of the community health care program is

that it is an enormously cost-effective program. One study recently reported that \$20 billion is wasted every year in this country in unnecessary and inappropriate use of hospital emergency rooms for nonemergency care. When you walk into an emergency room—I do not know about West Virginia—but in Vermont it is about \$600. If you get that similar care for a nonemergency-type ailment, the cost is \$100. So think about all of the money we save—we save—when we have community health centers expanding all over the country.

One of the issues we have not focused on enough, in my view, in this whole health care debate is the very serious crisis in primary health care in general. The American College of Physicians, in a recent report, warned that the Nation's primary care workforce—which it called “the backbone of our health care system”—is, in its own words, “on the verge of collapse.” That is the American College of Physicians.

Over the past 8 years, for example, the number of family practice residents fell 22 percent, while the overall number of medical residents rose 10 percent. Currently—this is an extraordinarily frightening statistic—only 2 percent of medical students interested in internal medicine intend to pursue primary care as their specialty—2 percent.

This growing crisis was recently underscored in a report by the Association of Academic Health Centers, which warned that the country is rapidly running “out of time to address what is out of order in our health workforce.”

The good news is that 20 million of those people who live in medically underserved areas are fortunate to live where there are federally qualified community health centers.

Let me explain a bit. What is a federally qualified health center—which exists in all of our 50 States? It is a center which says: If you have no health insurance, you can walk in and do you know what. You will pay not only for primary health care but for dental care—which is a huge problem all over this country—for mental health counseling, and you will get the lowest cost prescription drugs available in America. And if you do not have any health insurance, you get it on a sliding-scale basis. If you have Medicaid, you are welcome into the center. If you have Medicare, you are welcome. If you have private health insurance, you are welcome into these centers. Currently, these centers serve 20 million Americans in all of our 50 States.

Conceived in 1965 as a bold, new experiment in the delivery of preventive and primary health care services to our Nation's most vulnerable people and communities, community health centers are an enduring model of primary care for the country and are designed to empower communities to create lo-

cally tailored solutions that improve access to care and the health of those they serve.

West Virginia centers will be different than Vermont centers, which will be different than California centers because they are designed and locally controlled to serve the needs of the local population.

By mission and mandate, community health centers must see all those who seek their care regardless of health status, income level, or insurance status. If you are rich, if you are poor, you will gain access to these community centers. Nobody is tossed away. Today, these health centers are America's health care home to one out of every four low-income uninsured individuals, one out of every six rural Americans, as well as one out of every seven Medicaid beneficiaries, and one in four low-income people of color. We need to guarantee that as we expand coverage, we expand community health centers as well. They are the one primary care provider who will see those on Medicaid without restrictions.

Furthermore, community health centers already employ so many of the features of what we seek in the medical home model. They provide integrated health care, which is what we are talking about.

A study recently by George Washington University—we are talking about spending money. What is so exciting about this whole concept is you are going to create more health care opportunities for people, and you save money—save money—by keeping them out of the emergency room and out of the hospital. A study by George Washington University found that patients using health centers have annual overall medical care costs that are more than \$1,000 lower than those who do not use a health center—\$1,000. That translated to more than \$24 billion in savings for the health care system last year alone.

We are keeping people out of the emergency room, we are keeping people out of hospitals, and we are keeping them from getting sicker than they otherwise would be. That is why I am so pleased Majority Leader REID has looked at this track record and concurred that we will guarantee—guarantee—funding of health centers over the next 5 years in order to provide health care to more people and to save money at the same time.

Let me tell you in concrete terms what \$14 billion—the amount of money that is in the House bill—will mean to the American people. What it will do is it will increase the number of people who have access to community health centers, from the current 20 million to 45 million over a 5-year period—20 million to 45 million. We are more than doubling the number of people who will be able to walk into a clinic for health care, dental care, low-cost prescription

drugs, primary health care—in 5 years going from 20 million to 45 million people.

This funding would create new or expanded health centers in an additional 10,000 communities—10,000 communities—from one end of our country to the other. In some cases, entirely new federally qualified health centers would be established. In other cases, new satellite centers would be created. In Vermont, for example, we have eight community health centers. We have 40 total sites. That is true all over this country.

But can you imagine, Mr. President, that in the United States of America, within a 5-year period, 10,000 new community health centers in this country would be established? People would not have to go 50 or 100 miles to find access to health care. It would be there in their own community. It would be in urban areas, in rural areas. This is extraordinary.

Now, these community health centers and the growth of these community health centers do not mean much unless we have the medical personnel to adequately staff them.

As I mentioned a moment ago, everybody concludes we have a real crisis in terms of access to primary health care in this country and the number of physicians and dentists and nurses who serve in the primary care area. What this language does, that we have just added, is it would—if we adopt the House numbers—triple funding in a 5-year period for the National Health Service Corps, which provides loan repayments and scholarships to medical students.

For the University of Vermont Medical School, if my memory is correct—this is fairly typical for America—the average medical school student graduates with \$150,000 of debt. Well, if you graduate with \$150,000 of debt, what are you going to do? You are not going to do primary health care. You are going to go into some fancy specialty and start making a whole lot of money to pay off that debt. But what the National Health Service Corps will be able to do is provide debt forgiveness and scholarships for an additional 20,000—an additional 20,000—primary care doctors, dentists, and nurses. That is a lot of new medical personnel that is going to get out into underserved areas all over America. That is a very exciting thought.

In short, when we more than double, in 5 years, the number of people who have access to community health centers, and within that same period of time we add an additional 20,000 primary health care doctors, dentists, and nurses, we are talking about nothing less than a revolution in primary health care in America—something which we have needed for a long time.

So let me conclude by saying: I want to again thank the majority leader,

Senator REID. I want to thank Senator DURBIN, Senator SCHUMER, Senator MURRAY, and thank the Presiding Officer and the Democratic leadership for their support of this concept. As you know, this idea was developed back in the 1960s with Senator Ted Kennedy, who developed this concept in the first place. It has expanded, and now we are going to take it a giant step forward and, in the process, I think we are going to make a difference—a real difference—in improving the lives and the well-being and the access to health care of tens of millions of Americans.

Mr. President, thank you very much. With that, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I would call to the attention of the leadership of the majority party that I have a unanimous consent request I wish to make. I am going to be visiting with my colleagues about the issue of taxes on medical devices, so my unanimous consent is in regard to that. I hope people would observe that if there is an effort to block this motion I am going to make, I think it is an endorsement of the tax on medical devices such as the Berlin heart and hundreds of others that children across this country rely on.

With that in mind, I ask unanimous consent to set aside the pending amendment in order to offer my motion to commit.

The PRESIDING OFFICER. Is there objection?

Mr. DURBIN. With regret, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. GRASSLEY. Mr. President, it is disappointing for those of us on this side of the aisle to not be permitted to offer an amendment or motion that is as important as this, so I will go ahead with my remarks.

This is another major problem in the Reid bill. Of the many taxes in this bill, I am especially worried about the excise tax on medical devices. Medical device technology is responsible for saving many lives and extending the overall life expectancy of people in the United States.

In the United States, over 6,000 companies are in the business of developing lifesaving medical products. The majority of these companies are very small businesses. Small business we tend to measure around here as being those with less than 500 employees. So what will happen when the Reid amendment imposes a tax hike of \$20 billion on these innovative medical de-

vices? I think that is something we ought to consider if we are considering the quality of life in America and quality health care to preserve that life and extend life expectancy.

During the markup of the Finance Committee bill, I asked the question to the nonpartisan Congressional Budget Office and the nonpartisan Joint Committee on Taxation—and let me emphasize the word “nonpartisan” because these folks are professionals. So both of these organizations, the Congressional Budget Office and the Joint Committee on Taxation, said these excise taxes will be passed on to consumers in the form of higher prices and higher insurance premiums.

Also, I wish to emphasize in this chart a statement of the Chief Actuary of the HHS. The Congressional Budget Office, the Joint Committee on Taxation, and the Chief Actuary all say the tax gets passed on to consumers. Who are the consumers of these devices? Who is going to bear the cost of the new medical device excise tax? Well, it is quite a burden, so I am going to share some real-life stories here.

I will start by telling the story of the Tillman family, a family who would bear the burden of this new medical device tax. At only 5 months old, Tiana Tillman had her life saved by a medical device. This story has received a lot of attention because Tiana's father is a professional football player for the Chicago Bears. However, lifesaving stories such as this happen all across the country regularly.

When Charles Tillman reported to training camp in 2008, it wasn't long before his coach told him that his 5-month-old daughter Tiana had been rushed to the hospital. When Charles got to the hospital, Tiana's heart rate was over 200 beats per minute. That doctor told Charles and his wife Jackie that Tiana may not make it through the night. Tiana survived that night, and after a series of tests, she was diagnosed with cardio myopathy, an enlarged heart that is unable to function properly. Her condition was critical, and without a heart transplant she would not survive. But finding pediatric donors is very difficult and many children do not survive the long wait time, so Tiana was immediately put on an ECMO, a device that would help the function of the heart while Tiana waited for a transplant.

However, ECMO is an old device that has many shortcomings. Infants can only survive on ECMO for about 3 weeks, much shorter than the average wait for a donor heart. ECMO also requires that the patient take a paralytic medication which prevents a patient from moving and at the same time that obviously weakens the body.

The Tillmans waited for one of two outcomes: Either Tiana would receive a transplant or she would die waiting on ECMO.

But then the doctors told them about a new pediatric medical device called the Berlin heart. The Berlin heart is an external device that performs the function of the heart and lungs. It is designed for a long-term support to keep infants and young children alive for up to 421 days while they wait for the donor heart—obviously a lot longer than the 3 weeks on ECMO. So the Tillmans decided to move forward with the Berlin heart.

After 13 days of being on ECMO without any movement, Tiana underwent surgery to connect the Berlin heart. So we have pictures here that show what this is like. These two photos are of Tiana with the Berlin heart. You can see that this device is run by a laptop at the foot of the hospital bed. It pumps the blood through her body, a job that her heart could not perform on its own.

Unlike ECMO, the Berlin heart and its long-term support capabilities allowed the Tillmans some peace of mind while they waited for that donor. The doctor said that the Berlin heart helped Tiana regain her strength because she was off the paralytic medication and was finally able to move. Not long after Tiana was connected to the Berlin heart, a donor was found and Tiana underwent an 8-hour transplant surgery. The risky surgery was a success. Usually it takes some time for the new heart to start working, but doctors said that due to Tiana's strength, her new heart started working immediately.

I wish to talk about the tax on devices such as this.

This picture shows Tiana today holding a football. That is Tiana today, and we shouldn't be surprised about her love for football, considering her father is a professional football player. She enjoys playing on her swing set and watching her dad play football.

There are many people responsible for the successful effort to save Tiana's life, but without the Berlin heart to keep her alive and help her to gain strength, they may not have had that opportunity.

What does this legislation have to do with this story about Tiana? Well, the Reid bill would increase costs for families such as the Tillmans. In fact, the Reid bill would tax every pediatric medical device.

Pediatric devices aren't the only devices affected by the tax on medical devices in the Reid bill. The Reid bill also taxes one of the most important modern technologies: automatic external defibrillators. The defibrillator is used to save people from sudden cardiac arrest, and that is the leading cause of death in this country. Each year, nearly 325,000 people die from sudden cardiac arrest. That is nearly 1,000 deaths a day. Sudden cardiac arrest occurs when the heart's electrical system malfunctions and the heart stops beating

abruptly and without warning. When this happens, the heart is no longer able to pump blood to the rest of the body, and for about 95 percent of the victims, death occurs. Once cardiac arrest occurs, the clock starts ticking and the victim's proximity to a defibrillator could mean the difference between living and dying. As many as 30 to 50 percent of the victims could survive if such a device is used within 5 minutes of sudden cardiac arrest.

Here we have the story then of Mari Ann Wearda. Mari Ann is a constituent of the county I have lived my entire 76 years in, Butler County, IA. She is also a survivor of a sudden cardiac arrest, thanks to the prompt response of the Hampton Police Department and the availability of a defibrillator.

On July 26, 2002, Mari Ann pulled up to a stoplight in Hampton, IA. Without any warning, Mari Ann experienced sudden cardiac arrest. As she slumped over the steering wheel, her car drifted across the road, climbed the curb, knocked over a sign, and came to rest against a tree. She was only minutes away from brain damage and death. At 11:38 a.m. the police station dispatched Officer Chad Elness, who arrived at the scene 2 minutes later, at 11:40. When Officer Elness arrived, Mari Ann was as blue as his uniform, according to his own report.

Officer Elness attached the defibrillator to Mari Ann and pushed the button, sending 200 joules of electricity through her heart. That was one of the two shocks that Mari Ann required. Between the shocks, the defibrillator prompted officer Elness to perform CPR. Twice he almost lost Mari Ann. But by 11:50 a.m., Mari Ann had a pulse and her color was improving. At 11:52, just 11 minutes after the defibrillator was turned on, it had saved her life and was turned off.

Mari Ann then was taken by helicopter to Mercy Hospital, Mason City, IA, where she received care. One week later—just one week later—she was back home with no permanent damage.

Defibrillators are only effective if they are used within minutes of cardiac arrest, which means that in order to save more lives, there needs to be more of these devices. But do you know what this bill would do about all that? It would increase the cost, meaning there would then be fewer defibrillators.

We understand the laws of economics. If we increase a price, we get less of it. If we lower a price, we get more of it. So we are going to increase the price of these devices. That would make it more difficult for police departments, schools, libraries, churches, and other public places to purchase defibrillators, or for an individual to have one. If you have to be within 5 minutes of their use, you can understand why they have to be in every police department, school, library,

church, and a lot of other places. Right now, only one-third of police departments are equipped with defibrillators. However, Mari Ann was lucky that the Hampton Police Department had already purchased the device.

Increasing the cost of defibrillators will make it more difficult for communities to make this lifesaving investment. We already have 62—62—defibrillator stations throughout the Capitol and the three Senate office buildings. So you and I are protected, but we are going to put a tax on them for the people in the rest of the country. It seems as though around here we have one set of morals and ethics for Capitol Hill and another set of morals and ethics for the rest of the country. Congress clearly understands why having so many of these devices, the importance of them and having them on hand to protect us and to protect our staffs and the million visitors who come to the Capitol.

I made a motion that was objected to, so I cannot go through with that motion. My motion would have stopped this new Federal tax from increasing the cost of defibrillators and hurting the chances of placing the devices where they need to be—hopefully, within 5 minutes of people who need them. It is a disappointment my colleagues on the other side of the aisle would not allow that motion to go through.

It is a sad state of affairs when the majority is not only blocking the offering of the motions and amendments that will improve the bill but also trying to ram through a bill before the American people even know what is in it.

Yesterday, we heard things about Republicans having not offered amendments. There are 214 Republican amendments at the desk. One would think we would have a chance to offer more than a dozen or so—I doubt it is even a dozen at this point—on a bill that is going to restructure one-sixth of the economy.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mrs. HUTCHISON. Mr. President, may I ask, is it 10 minutes—what is the procedural position as of now?

The PRESIDING OFFICER. The minority party controls the time until 2:30 and there are no individual limits.

Mrs. HUTCHISON. I thank the Chair.

Mr. President, for weeks we have been debating legislation that will dramatically and permanently reform our health care industry. It will impact the life of every American, and it will add to our growing national debt.

On Saturday, the majority leader filed an amendment increasing the size of this bill. Early this morning at 1 a.m., we had a vote to proceed to the revised bill that makes a mockery of transparency and public policy. Yet even though the majority took the op-

portunity to amend the bill, it is clear the concerns of the American people were not heard by my friends on the other side of the aisle.

I was astounded to see this revised bill still contains \$½ trillion in new taxes, \$½ trillion in Medicare cuts and mandates and penalties on individuals and businesses throughout our country at a time when businesses are struggling, unemployment is up, and families are trying to make ends meet.

I wish to talk about the taxes. The revised bill has an additional \$25 billion in taxes than the bill as introduced. We have been hearing for weeks about families who are struggling to pay their mortgage, struggling to find a job, struggling to pay their utility bills. Yet what do we find in this new bill? More taxes and more mandates.

The American people overwhelmingly oppose this bill, and just when we thought the final product could not get any worse, it does.

Under the revised bill, the taxes collected from individuals who cannot afford health insurance has been raised from \$8 billion to \$15 billion—almost double. Why? Because the penalty for not purchasing insurance has become more severe. If you cannot afford insurance, the tax is either \$750 or 2 percent of your taxable income, whichever is higher.

There are still taxes that begin next month, less than 2 weeks from now. Less than 2 weeks from now in this bill, \$22 billion in taxes on prescription drug companies will start, and the public can expect to see higher prices for medicines.

In 2011, we see \$60 billion in taxes on insurance companies except for companies in two particular States. That does not seem fair. Fortunately, the Constitution's equal protection clause may have something to say about this gross situation. This will not stand the test of the Constitution, I hope, because the deals that have been made to get votes from specific Senators cannot be considered equal protection under the law.

If it does stand and the taxes start in 2011, people who have insurance are going to pay higher premiums—even higher than what has been projected already.

In 2011, we also see the taxes on medical device manufacturers. So the public can expect to see higher prices for devices—thermometers, blood sugar machines, canes, walkers—the things people need to stay healthy. That is another \$19 billion in taxes.

Then there is another round of taxes in 2013: \$149 billion in taxes on high-benefit plans; a 40-percent excise tax on the amount by which premiums exceed \$8,500 for individuals and \$23,000 for families; \$87 billion collected from a Medicare payroll tax. This tax is actually \$33 billion higher than in the prior bill. Individuals earning more than

\$200,000 and couples earning more than \$250,000 are now assessed at a tax rate of 2.35 percent for a new Medicare payroll tax rather than 1.45 percent. So if you are a couple earning \$125,000 each, you have another tax increase, in addition to possibly a tax on not having insurance or a high-benefit plan.

Also, \$15 billion will be collected by raising the threshold for the medical deduction. To receive the medical deduction, you must now spend 10 percent of your income on medical expenses rather than 7.5 percent. This tax will impact those who have high medical costs or are suffering from a catastrophic or chronic illness.

This bill taxes those who have insurance and those who do not. All these taxes are collected. All the taxes I have mentioned will be collected before there would be the option that is the purpose of this bill. Whatever the insurance option becomes, it takes effect in 2014. All the taxes I have mentioned start before 2014.

Senator THUNE and I had a motion that would have sent this bill back to the committee and required that everything in this bill start at the same time. So if the program starts in 2014, the taxes would start in 2014. Under our motion, not one dime in taxes would be paid before Americans are offered the insurance option in the bill. The motion was defeated. Now the Democrats have revised their bill and the taxes collected are even higher than the previous bill.

But do not forget the penalties to businesses that cannot afford to offer health insurance to their employees. A tax of \$750 per employee is assessed. This at a time when unemployment has reached double digits. We should be encouraging employers to hire new workers. Yet this bill imposes \$28 billion in new taxes on employers.

What will these taxes do to small businesses which create 70 percent of the new jobs in our country? In a letter sent to the majority leader, the Small Business Coalition for Affordable Health Care stated:

With its new taxes, mandates, growth in government programs and overall price tag, the Patient Protection and Affordable Care Act—

The bill we are discussing—costs too much and delivers too little. . . . Any potential savings from those reforms are more than outweighed by the new taxes, new mandates and expensive new government programs included in this bill.

That letter is signed, in addition to the Small Business Coalition, by associations such as the Farm Bureau, Associated Builders and Contractors, Associated General Contractors of America, the National Association of Homebuilders, the National Association of Manufacturers, the National Automobile Dealers Association, the National Retail Federation, and more.

The National Federation of Independent Business, which is the voice of

small business, sent a letter expressing their strong concerns over this bill. It says:

The current bill does not do enough to reduce costs for small business owners and their employees. Despite the inclusion of insurance market reforms in the small-group and individual marketplaces, the savings that may materialize are too small for too few and the increase in premium costs are too great for too many.

That is the tax situation. How about the $\frac{3}{4}$ trillion in Medicare cuts? They are still there. They were in the first bill, and they are there now.

There are \$120 billion in cuts to Medicare Advantage, which we know reduces choices for seniors. In my State of Texas, over 500,000 currently enrolled enjoy the benefits of Medicare Advantage. That is in my State alone. Millions across the country like Medicare Advantage, but many seniors, without a doubt, are going to lose this option.

Oddly enough, once again, one of the points in the new bill is, there was an opt-out for certain States on Medicare Advantage cuts. So some States are going to have the Medicare Advantage cuts while other States will not.

The individual fixes for certain States, presumably to get the votes of certain Senators, do not pass the test of transparency. If you put it in the nicest way, it does not pass the test for fairness, for due process and equal treatment under the law, and it certainly does not pass the test for what is the right way for us to pass comprehensive reform legislation.

The other health care cuts in Medicare would be \$186 billion in cuts to nursing homes, home health care, and hospice providers.

Then there are the cuts to hospitals, approximately \$135 billion in cuts to hospitals. The Texas Hospital Association has estimated that hospitals in my State will suffer almost \$10 billion in reduced payments.

I have a letter from the Texas Hospital Association that outlines their concerns with these cuts and this bill and they are very concerned. Here is one of the quotes from their letter. The Texas Hospital Association says:

With a significant reduction in payments, hospitals may be forced to reduce medical services. [H]ospitals . . . may be forced to close or merge with another hospital, or severely reduce the services they provide to their community. Essential services, such as maternity care, emergency services, medical-surgical services or wellness programs may be reduced or entirely eliminated.

I have talked with so many hospital administrators and people on hospital boards, and they are very concerned about the cuts in this bill because most of them are on very thin margins. They are struggling, especially in our rural areas. They are very worried there are going to be shutdowns of hospitals throughout our State and certainly our country.

Our aging population is growing, so cutting payments to providers who treat those patients, whether it is in hospitals or health care providers, does not seem to be a way to reform Medicare.

Cuts in Medicare, and especially the payments for treating low-income seniors, will disproportionately impact rural hospitals which are the safety net for health care outside the metropolitan areas. The Texas Organization of Rural and Community Hospitals, which represents 150 rural hospitals in Texas, said in a letter:

We also fear the Medicare cuts as proposed could disproportionately hurt rural hospitals which are the health care safety net for more than 2 million rural Texans. Because of lower financial margins and higher percentage of Medicare patients, rural hospitals will be impacted more than urban hospitals by any reductions in reimbursement. These proposed Medicare cuts could have a devastating effect . . . which could lead to curtailment of certain services. And the closure of some of these Texas hospitals is a very real possibility. . . .

How could anyone support a reform bill that will result in seniors having to drive 30, 60, 90 miles and more to get the care they need—care that was accessible in their own community before this bill took effect?

Mr. President, what we have is a bill heavy with tax hikes, Medicare cuts, and government intrusion. This bill is being forced through Congress the week of Christmas because everyone knows this is not the reform that Americans want. The polls are showing that. We all know polls can have margins of error, and maybe they are not completely accurate, but the trend in the polls is clear: It has gone from people thinking that health care reform is a good thing and supporting it, in the majority, to going down now to the point where the trend is clear the American people now do not support this bill, they would rather have nothing, according to the latest polls, and have Congress start all over and do what they hoped it would do, and that is bring down the cost of health care not have this be a big government increase in debt, cuts to Medicare, and increases on taxes to small business and families, especially at this time in our country's economic period.

My Republican colleagues and I have tried to offer fiscally responsible alternatives to reform, allowing small businesses to pool together, increase the size of their risk pools, which will bring premiums down. If you have an exchange it would be fine unless you have so many mandates, such as we see in this bill, that are going to cause the prices to stay up and even go higher because of all the taxes on the underlying companies that are providing the health care.

Creating an online marketplace free from mandates and government interference where the public can easily

compare and select insurance plans would be a Republican proposal, something that I think would be a point at which we could start having health care reform that would be truly effective for America, if you didn't have the mandates that would drive up the cost.

Offering tax credits to individuals and families who purchase insurance on their own, that is a bill that we have put forward. Five thousand dollars per family would cut the cost and make it affordable without any government intervention that would be necessary.

Of course, medical malpractice reform could take \$54 billion out of the cost of health care by stopping the frivolous lawsuits, or at least limiting them. Yet Republicans were really not at the table. The bill was written in a room, with no transparency, no C-SPAN cameras, and no Republicans. We did not have input into this bill. That is why it is a partisan bill. That is why the vote last night—or this morning at 1 a.m.—was completely, 100 percent partisan. Why would a Republican vote for a bill that goes against every principle we have—higher taxes, higher mandates, and cuts in Medicare—and in which we had not one amendment pass? We offered amendments, but there were hundreds of amendments left on the table that we were closed out of offering because of the rush to pass this bill before Christmas.

Mr. President, Americans asked for reform; they deserve it. This bill is not the reform Americans hoped to get from a Congress that should have acted responsibly but did not.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. CORNYN. Mr. President, as my colleagues on this side of the aisle, I voted against the Reid health care bill last night because it cuts \$470 billion from Medicare to create a brand-new entitlement program that will cost approximately \$2.5 trillion over the next 10 years—a price we cannot afford. It increases premiums for American families who currently have health insurance and who are struggling to make ends meet during tough economic times. It increases taxes on small businesses and individuals, which is a terrible idea, particularly at a time when our economy is struggling and our job creators are struggling to be able to keep people on their payroll and possibly expand their payroll and hire people back and bring down the unemployment rate.

I want to talk about the way this bill came to pass—at least the cloture vote this morning at 1 a.m.—and I want to talk about the process. I recall when Senator Obama was running for President, he talked about wanting to change politics as usual in Washington, DC. But I have to tell you, the major-

ity and this administration have, in many ways, confirmed people's worst suspicions about Washington politics as usual. They have taken it to a new level—and not a higher level; it is a lower level.

As a matter of fact, the bartering for votes for cloture, the special sweetheart deals with drug industries, with Senators, in order to get the 60 votes last night, does nothing more than confirm the worst fears and cynicism the American people have about the way Washington works.

We know this bill is a direct result of many special deals with special interest groups and their lobbyists. We heard the President say when he campaigned that he wanted to have a transparent process; that this would take place in front of C-SPAN and at a roundtable so people could see who was making arguments on behalf of the drug companies and the insurance companies. But that rhetoric conflicts with the reality, where the drug companies and the insurance companies and others were negotiating behind closed doors for sweetheart deals that ultimately ended up getting 60 votes.

So it turned out it was the Obama administration that cynically said one thing during the campaign and then, when it came to actually passing legislation, did completely the opposite. This is tragic, in my view, Mr. President. The American people want to believe in their government. They want to believe their elected leaders are trying to do their best on behalf of the American people. But this process confirms their worst suspicions. No wonder public opinion of Congress is in the toilet.

Rather than listening to the American people, the creators of this bill started cutting deals with special interests first and cut those deals early. The White House struck a deal with the pharmaceutical industry, as you know, which produced in part, as the New York Times reported, about \$150 million in television advertising supporting this bill. This deal got 24 Democrats when we were debating the issue of drug reimportation to switch their votes from their previous position against drug reimportation earlier this month.

Notwithstanding all the rhetoric about insurance companies, basically this is a sweetheart deal with insurance companies because insurance companies will get \$476 billion of your tax dollars and my tax dollars to pay for the subsidies and the insurance provided in this bill.

The hospital industry cut a special deal that provided them an exemption from the payment advisory board. Then there were groups such as AARP that purport to serve seniors as a public interest but, as we know, primarily pocket money as a result of the sale of insurance policies—insurance policies

that are going to be necessary because of cuts in Medicare Advantage for 11 million seniors, just to name one example.

This bill was the result of backroom deals with specific Senators, persuading them to vote for cloture, which has caused some people on the blogs and the Internet to call it "Cash for Cloture." In order to get 60 votes for cloture, we know one of the first examples of that was the so-called "Louisiana purchase." Charles Krauthammer said it well:

Well, after watching Louisiana get \$100 million in what some have called "The Louisiana Purchase," she ought to ask for \$500 million at least. And that's because Obama said he would end business as usual in Washington. So it's a new kind of business as usual.

In other words, I guess the price has gone up. But as one business leader in Louisiana points out, notwithstanding the special sweetheart deal for the State of Louisiana directing \$300 million to the State, the Medicare expansion alone will result in the taxpayers and the people of Louisiana being a net loser.

We also know in order to get 60 votes, the majority leader had to cut a deal with a Senator from Nebraska—the senior Senator from Nebraska—in order to get the vote for cloture. It has been widely reported that the meeting with the senior Senator from Nebraska took place for 13 hours behind closed doors, after which they negotiated some language which, purportedly, no longer allowed the use of tax dollars to pay for abortions. But according to the Conference of Catholic Bishops and other pro-life groups, the language is completely ineffectual and it restores or actually produces taxpayer-paid-for abortions for the first time in three decades.

What else did the senior Senator from Nebraska get? Well, the State of Nebraska purportedly got a free ride from Washington's new unfunded Medicare mandates on the States. But, of course, we know every other State ends up paying for that sweetheart deal the senior Senator got for Nebraska. What do Nebraskans think about it? Well, ask the Governor—Governor Dave Heineman—who said yesterday he had nothing to do with that bill, and called the overall bill bad news for Nebraska and bad news for Americans. Governor Heineman said Nebraskans did not ask for a special deal, only a fair deal.

We also know that in order to get 60 votes, the majority leader had to cut a special deal for Vermont. One Senator from Vermont threatened to vote against the bill, but then, lo and behold, the managers' package included \$600 million benefiting only that one State. The Senator who threatened to vote no decided to vote yes after that special deal was concluded.

The New York Times lists several other sweetheart deals that produced

this monstrous piece of legislation. The intended beneficiaries, though, in many instances, were identified in a vague and sort of cryptic way, such as: Individuals exposed to environmental health hazards recognized as a public health emergency in a declaration issued by the Federal Government on June 17. Well, there is only one State that would qualify for that, notwithstanding this sort of vague description designed to hide the ball and obscure what was actually happening through another sweetheart deal as part of this bill.

Another item in the package would increase Medicare payments to doctors and hospitals in any States where at least 50 percent of the counties are "frontier counties," defined as those having a population density of less than six people per square mile.

Then we know there was another \$100 million sweetheart deal for an unnamed health care facility affiliated with an academic health center at a public research university in a State where there is only one public medical and dental school. The Associated Press reports that the State that qualifies for that special deal is the State of Connecticut, where the senior Senator currently is in a tough reelection fight.

When asked about these special deals in the managers' amendment, the response of Mr. Axelrod—the architect of the campaign strategy for this administration to bring change to Washington—was pretty telling. He said: That is the way it has been; that is the way it will always be.

Well, maybe in Chicago, but not in my State, and not in the heartland and the vast expansion of this great country where the American people want us to come and represent our constituents and vote for what is right in terms of policy, not what kind of sweetheart deals we can eke out at the expense of the rest of the American people.

The very thing that is happening with this health care bill demonstrates why Washington takeovers are such a terrible idea because instead of health care decisions being made between patients and doctors, health care decisions are overcome through a political process where elected officials choose winners and losers.

Politics has become a dirty word outside the beltway, and certainly we can understand why. This process has only reconfirmed in the minds of many people that what we are doing here is not the people's business but protecting special interests and special sweetheart deals. Rather than making decisions about what is best for the American people, this deal has been driven by deals with special interest groups and lobbyists. Rather than listen to constituents, individual Senators have decided that their votes should be traded for tax dollars and other sweetheart benefits that go to their States. No

doubt about it, this bill takes the power from individual Americans to make their own health care decisions and transfers that to Washington, DC, and this new low level of politics as usual.

According to one recent poll that was reported today, Rasmussen, for one State I will not mention by name, found only 30 percent of the respondents to this poll favor this health care bill and 64 percent are opposed. The Senators from those States voted for the bill where only 30 percent of their constituents reportedly support the bill. That is not the only example.

You can only ask yourself why in the world would Senators vote for a bill when two-thirds of their constituents are opposed to it. Who must they be listening to? Are they listening to the people whom they represent and who sent them here to Washington to represent them or are they listening to the special interests or have they decided somehow that they have become miraculously smarter than their constituents and they know what is better for their constituents than what their constituents know themselves?

This debate is not over. There is still a chance to vote against this bill. As Senator MCCONNELL said last night, any single Senator on the other side of the aisle can stop this bill or every one who votes for it will own it.

I yield the floor.

The PRESIDING OFFICER (Mr. WARNER). The Senator from Nebraska.

Mr. JOHANNIS. Mr. President, let me start my comments today by complimenting the Senator from Texas. I thought he did an excellent job of shining the light on something that is now gathering a lot of attention because the managers' amendment is out and we can read the words and we can start to understand the special deals that were cut to get the votes to make this happen. I applaud the Senator for standing here so courageously.

My State, the great State of Nebraska, has been pulled into the debate. I want to start out today by saying here on this Senate floor that I am enormously proud of my State, probably like all Senators in reference to their State. I am enormously proud of the people of Nebraska. I have gotten to know them well. I was their Governor. On a more localized basis, I was also the mayor of Lincoln. I date my time in public service back to the time when I was Lancaster County commissioner and a city council member in Lincoln. These are good, decent, honorable people who are always looking to try to figure out the right way of doing things.

I stand here today to acknowledge that and to tell all Nebraskans how proud I am to be here today. But I rise today to share with my colleagues the reactions of Nebraskans to the special deal that got cut for Nebraska that

came to light over the weekend as the managers' amendment was released and analyzed.

Less than 24 hours after the announcement of the special carve-out for Nebraska, with virtually no warning, no preparation to speak of, 2,000 people gathered in Omaha, NE, Nebraskans who, in one voice, cried foul. Nebraskans are frustrated and angry that our beloved State has been thrust into the same pot with all of the other special deals that get cut here. In fact, they are outraged that a backroom deal for our State might have been what puts this bill across the finish line.

You see, I fundamentally believe that if this health care bill is so good, it should stand on its own merits. There should be no special deals, no carve-outs for anyone in this health care bill—not for States, not for insurance companies, and not for individual Senators.

I stand here today and I find it is enormously ironic that advocates for this bill, who worked overtime to vilify insurance companies, in the last hours of putting this bill together struck a special deal with two insurance companies in Omaha, NE, that they would be carved out of their responsibility in this bill to pay taxes. I find it painful to even acknowledge that happened.

I said at the beginning of this debate that changes of this magnitude, affecting one-sixth of our economy, must be fair and they must be believed to be fair by the people. The special deal for Nevada was wrong. I said that. In fact, one of the six reform principles I publicly outlined and took out to townhall meetings I stand by today. It simply said: No special deals.

The special deal for Nevada was wrong, as is the carve-out for Louisiana. And the same applies for the backroom deal that was struck for my State, the great State of Nebraska.

All of the special deals should be removed from this legislation. If this bill cannot pass without the carve-outs and the special deals, what further evidence could we possibly need to draw the conclusion that this is enormously bad policy? If you literally had to sit down in the last hours of negotiations and strike a special deal, do we need any other argument about how bad the policy of this bill is for my State and the citizens of Nebraska?

Our Governor said it well: Nebraskans don't want a special deal. You see, I went around the State for months doing townhalls and listening to Nebraskans. They do not want a special deal. No Nebraskan came up to me and said: MIKE, give me a special deal. You see, their request is simple: They want to be able to see the doctor of their choice and to keep the current plan they have. They want our job creators, our small businesses, to get our economy moving and create jobs in our

communities from large to small, free of the \$½ trillion in taxes and fees this bill will keep on our employers.

The managers' amendment does nothing to change the core problems with this bill. The nearly \$500 billion in Medicare cuts will be devastating to Nebraska. No special deal with an insurance company is going to make Nebraskans feel better about that. No special deal to make the State budget look better is going to make Nebraskans feel any better about the Medicare cuts and the impacts on our hospitals, our nursing homes, our home health care industry, and our hospice industry. Nationally, Governors—Republicans and Democrats—have stepped forward to say they cannot afford the unfunded mandates that come from Washington and drive their budgets into the red.

The special deal struck on abortion is enormously tragic and insufficient. It breaks my heart. This is a far cry from the 30 years of policy by this U.S. Government. You see, when this is done and over, what we will be reporting to our citizens is that taxpayer funds will fund abortions if this bill passes. You see, no watered-down accounting gimmick will convince the pro-life community in my State otherwise. In fact, they have publicly said they feel betrayed.

I will wrap up with this. This bad deal is not sealed. There is time for truly pro-life Senators to stand tall and say no. There is still time for principled Senators to reject the carve-outs and to cast aside the bad backroom deals. There is still time for Senators to listen to the people and reject reckless Federal policy.

Fair treatment is not too much to ask of Washington. I know in my State, that is what they are asking for. I will firmly stand behind any Senator who has the courage to stop this train wreck. I will be the first to lead the applause. I am confident that the standing ovation for that courageous Senator will extend all the way back to Nebraska and it will be deafening.

I yield the floor.

Mr. GRASSLEY. Mr. President, how much time remains?

The PRESIDING OFFICER. There is 2½ minutes.

Mr. GRASSLEY. I would think one of the things we would have seen from the majority at this point is a list of what the last two Senators were talking about, all the earmarks that are in this bill, because I asked for a parliamentary inquiry yesterday—I am not going to ask that again—but, as we said yesterday, rule XLIV was adopted as part of a major ethics and reform legislation, adopted in 2007. It was part of the Honest Leadership and Open Government Act. The Democratic leadership made it the first bill to be introduced when they took the majority in 2007, taking control of Congress for the first

time for a long period of time. This bill passed by unanimous consent.

When rule XLIV was passed, the theory behind it was that we ought to have total transparency on earmarks. It applies to floor amendments such as the pending Reid bill. It requires the sponsor of the amendment to provide a list of earmarks in that amendment.

Earmarks are provisions that provide limited tax benefits. Those words, "limited tax benefits," are words out of the rule. Another substitute language for limited tax benefits is "congressionally-directed spending items" or "earmarks," as they are generally referred to by the public at large.

Given what a priority the new rule passed in 2007 was given and the importance of it, one would expect that the majority leader would be making every effort to comply with it. One would think he would be wanting to set a good example in complying with the rule and disclosing these earmarks. In order to assure transparency of these very narrow provisions, such as what Senator JOHANNIS just referred to, to get the votes of specific Members of the majority party who probably would not have voted for this bill, you would think that ought to be made public. That is what rule XLIV is about. Of course, that burden under that rule is on the sponsor to provide the list.

Once again, I am going to ask the Democratic leadership to comply with the Honest Leadership and Open Government Act.

The PRESIDING OFFICER. The time for the minority has expired.

The Senator from Montana.

THE CALENDAR

Mr. BAUCUS. Mr. President, I ask unanimous consent that the Senate proceed en bloc to the following bills: Calendar Nos. 235 through 242; that the bills be read a third time and passed en bloc, the motion to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to these matters be printed in the RECORD.

The PRESIDING OFFICER. Is there objection?

Mr. GRASSLEY. I object. I don't know what this is all about. Has this been cleared with our side?

Mr. BAUCUS. These are post office bills.

Mr. GRASSLEY. I withdraw my objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate proceeded to consider the bills.

1ST LIEUTENANT LOUIS ALLEN POST OFFICE

The bill (H.R. 2877) to designate the facility of the United States Postal Service located at 76 Brookside Avenue

in Chester, New York, as the "1st Lieutenant Louis Allen Post Office", was ordered to a third reading, read the third time, and passed.

COACH JODIE BAILEY POST OFFICE BUILDING

The bill (H.R. 3072) to designate the facility of the United States Postal Service located at 9810 Halls Ferry Road in St. Louis, Missouri, as the "Coach Jodie Bailey Post Office Building", was ordered to a third reading, read the third time, and passed.

ARMY SPECIALIST JEREMIAH PAUL McCLEERY POST OFFICE BUILDING

The bill (H.R. 3319) to designate the facility of the United States Postal Service located at 440 South Gullwing Street in Portola, California, as the "Army Specialist Jeremiah Paul McCleery Post Office Building", was ordered to a third reading, read the third time, and passed.

PATRICIA D. MCGINTY-JUHL POST OFFICE BUILDING

The bill (H.R. 3539) to designate the facility of the United States Postal Service located at 427 Harrison Avenue in Harrison, New Jersey, as the "Patricia D. McGinty-Juhl Post Office Building", was ordered to a third reading, read the third time, and passed.

CLYDE L. HILLHOUSE POST OFFICE BUILDING

The bill (H.R. 3667) to designate the facility of the United States Postal Service located at 16555 Springs Street in White Springs, Florida, as the "Clyde L. Hillhouse Post Office Building", was ordered to a third reading, read the third time, and passed.

W. HAZEN HILLYARD POST OFFICE BUILDING

The bill (H.R. 3767) to designate the facility of the United States Postal Service located at 170 North Main Street in Smithfield, Utah, as the "W. Hazen Hillyard Post Office Building", was ordered to a third reading, read the third time, and passed.

CORPORAL JOSEPH A. TOMCI POST OFFICE BUILDING

The bill (H.R. 3788) to designate the facility of the United States Postal Service located at 3900 Darrow Road in Stow, Ohio, as the "Corporal Joseph A. Tomci Post Office Building", was ordered to a third reading, read the third time, and passed.

JOHN S. WILDER POST OFFICE
BUILDING

The bill (H.R. 1817) to designate the facility of the United States Postal Service located at 116 North West Street in Somerville, Tennessee, as the "John S. Wilder Post Office Building", was ordered to a third reading, read the third time, and passed.

SERVICE MEMBERS HOME
OWNERSHIP TAX ACT OF 2009

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. I yield 20 minutes to the chairman of the HELP Committee, Senator HARKIN, and 18 minutes to the Senator from Colorado, Senator BENNET.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I guess I can say we crossed the Rubicon last night at 1 o'clock. Reading some of the press reports, of course, most of the news didn't have it because it occurred at 1 a.m. Some of the different reports have been online this morning. It occurred to me that a lot of people are missing the overall importance of what happened last night. We can get into the fine tuning and the nitpicking and sort of the fear and the anger I hear from the other side. Every time I listen to speeches over there, with the exception of the last speaker, almost all the speeches I hear from the other side, it is fear, be afraid, be afraid. It is some built-up anger over there. I think what happened last night is, we crossed a demarcation line, the demarcation line of which on one side health care is a privilege. We have been on that side of the line for a long time. On the other side of that line, health care is a right. We stepped across that line last night. We are now in the process of saying health care is a right, an inalienable right of every American citizen.

Is that what so upsets my friends on the Republican side? I don't know. Something is upsetting them. Because this is a momentous change we are doing.

I keep hearing from Republicans they want us to deal in a bipartisan way. We tried all this year, both in the HELP Committee and in the Finance Committee. Senator BAUCUS bent over backward to accommodate. But at every turn, Republicans said no, no, no, no, no—all year long. How can you be bipartisan when the other side has nothing to offer? There is no bill on the Republican side. There is a bill. It has about nine cosponsors—Senator COBURN, Senator BURR, maybe seven others, but not every Republican is on that. I hear bits and pieces of this and that every time I hear these speeches. Most of it is attacking what we have done. I hear nothing positive from their side. It is very hard to deal with a party that is in total disarray as the

Republicans are. If they had a bill they were supporting and that was supported by all of them, such as the bill we have here which is supported by 60 Democrats, I think then you could find some reason for meeting and working things out. But since there is no one on that side who has a comprehensive proposal, it is hard to do that. We have had to kind of plow ahead as best we can. We have not done this alone. In our committee, we met for 13 days. We had 54 hours of markup. No amendment was denied. Republicans offered over 200 amendments. We adopted 161 of them. That is pretty good. Yet in the end, every Republican voted against it. So it is not as if we didn't try and we didn't hold out an olive branch to work with people to get a bill that was truly bipartisan. We did in our committees, both the Finance and HELP Committees. Now it has come down to fear and anger on the other side and some nitpicking.

My friend from Iowa—and he is truly my friend—was talking about some provisions put in the bill for special reasons and so forth. I admit fully and openly that I was part of that. Did I put something in the bill that was sort of particular to my State of Iowa? Yes, I did. But it doesn't just affect Iowa. There are several States in which we have hospitals that are not as big as the big hospitals with the volume. They are not so small that they are low-volume hospitals that get help. They are kind of in between. They call them tweener hospitals. We have eight of them in Iowa: at Grinnell, Keokuck, Spencer Municipal, in Carroll, St. Anthony Regional; Muscatine; Fort Madison; and Lake Regional Hospital at Spirit Lake. There are a number of these in the United States. I forget the total number; not a large number, they just fall in a place where they are too small for the big and too big for the small. As a result, they have been getting a bad deal from Medicare reimbursement. There is a fix in this bill that will allow them to get adequate reimbursement. I don't see anything wrong with that. It is fixing a specific problem that the bureaucracy can't seem to quite get fixed. That is in the bill. I make no bones about having put that in there. I think it is a good deal. It is something that is going to help a lot of hospitals, not only in Iowa but a few other States.

One of the things I wish to talk about today is something I have been on for many years, and that is the huge amount in this bill on prevention and wellness. It has not been written about a lot. People have been focused on the public option and the abortion issue and a few other items such as that. Perhaps one of the most profound parts of this bill and the one I believe will do more to bend the cost curve, as they say, than any other single thing is the provisions dealing with prevention and

wellness. In the past I have said many times that we don't have a health care system in America. We have a sick care system. When you think about it, if you get sick, you get care. But precious little is spent out there to keep one healthy in the first place. So people get sick. You go to the doctor, the hospital. We patch and fix and mend and try to make them well.

Your mother was right, you know: Prevention is worth a pound of cure. We have fallen far short of that in this country. There is a remarkable array of provisions in this bill that promote wellness, disease prevention, and public health. Together they will move us from a sick care society into a genuine wellness society, into a true health care system, not just sick care. What better way to reform our health care system than to restrain health care costs by helping Americans to prevent chronic diseases, stay healthy and out of the hospital in the first place. Right now, as we have heard so many times, we spend more than \$2 trillion each year on sick care. But 4 cents of every dollar is invested in prevention and public health. I submit this is a major reason why Americans spend twice as much per capita on health care as European countries, but we are twice as sick with chronic disease. We spend twice as much as Europe on health care, but we are twice as sick with chronic diseases.

The good news is that by ramping up the emphasis on wellness and prevention, we have tremendous opportunities to both improve the health of the American people and to restrain health care spending. That is the aim of this bill which makes significant new investments in prevention. For example, our bill would ensure that seniors have access to free annual wellness visits and personalized prevention plans under Medicare. We have never had that. For the first time seniors will have access to free annual wellness visits and personalized prevention plans under Medicare. That is a big deal. So many seniors today, if they get sick, go to the doctor and get more pills. Now they will be able to go in, have their annualized checkup, see what is wrong, and have a personalized prevention plan for each person under Medicare.

It will also encourage States to improve coverage and access to recommended preventative services and immunizations under Medicaid. At a minimum, States will provide Medicaid coverage for comprehensive tobacco cessation services for pregnant women. That is just the start. Right away, at a minimum, they have to do that. In addition, the bill requires insurance companies to cover recommended preventative services with no copayments or deductibles. This is critical because we know that all too often people forgo their yearly checkups or essential

screenings because either their insurance companies don't cover them or because they have high copays and deductibles.

Another critical element in the bill essential to a sustainable push for wellness is the creation of a prevention and public health trust fund. Typically prevention and public health initiatives are subject to unpredictable and unstable funding. This means that important interventions, things such as education about nutrition and assistance for smokers who want to quit, often go unfunded from one year to the next. They get funded a little bit one year or cut the next; funded a little bit the next year, cut the next. The prevention and public health fund in this bill will provide an expanded and sustained national investment in programs that promote physical activity, improve nutrition, and reduce tobacco use. We all appreciate that checkups and immunizations and other clinical services are important. But this bill also recognizes that where Americans live and work and go to school also has a profound impact on our health. That is why a number of provisions in the bill focus on creating healthier communities with better access to nutritious foods as well as safe places to engage in physical activity.

A 2007 study by the Trust for America's Health found major savings from community-based prevention programs designed to increase levels of physical activity, improve nutrition, and reduce smoking rates. This study concluded that a national investment of \$10 per person per year in these kinds of community-based programs could yield net savings of more than \$2.8 billion annually in health care costs in the first 1 and 2 years, more than \$16 billion savings within 5 years, and nearly \$18 billion savings annually within 10 to 20 years, starting at \$10 per person per year.

More generally, this bill aims to give Americans the tools and information they need to take charge of their own health. For example, it requires large chain restaurants to post basic nutrition information on the menu so consumers can make healthy choices. That is in this bill. It will start next year.

The bill also focuses on prevention and public health needs of a number of generally overlooked populations, including children, individuals with disabilities, Americans living in rural communities, and certain ethnic minorities. For many months I have made the case that it is not enough to talk about how to expand insurance coverage, how to pay the bills—those are important—but it makes no sense to figure out a better way to pay the bills for a system that is dysfunctional, ineffective, and broken.

We have to change the health care system itself, beginning with a sharp new emphasis on prevention and public

health. We also have to realize that wellness and prevention must be truly comprehensive. It is not only about what just goes on in the doctor's office; it also encompasses community-wide wellness programs, about which I just spoke, things such as building bike paths, walking trails, getting junk food out of our schools, out of the vending machines, making our school breakfasts and lunches more nutritious, increasing the amount of physical activity our children get, and so much more.

Some of this is going to be addressed in other bills. For example, next year, in the Agriculture Committee, we will be reauthorizing the child nutrition bill. That deals with school lunches and school breakfasts. We need a major effort there to make our lunches and our breakfasts more nutritious for our kids in school.

Next year, in the committee I chair, the HELP Committee, we are going to reauthorize the Elementary and Secondary Education Act, the so-called No Child Left Behind Act. There are a lot of things we are going to be doing on that. I see one of our committee members, the Senator from Colorado, Mr. BENNET, in the Chamber, a former superintendent of schools, who is going to play a key role in helping get that Elementary and Secondary Education Act through and refined and brought up to date where we will make some changes.

But there is one other part of that bill we have to focus on; that is, the amount of physical activity kids get in school. I talked many times both to Secretary Duncan and, before him, to Secretary Spellings about this idea of No Child Left Behind. If we are not going to leave kids behind in terms of their writing and their math and their English, how about not leaving them behind in terms of their health? Yet recess is gone. I saw a statistic this year that said 80 percent of elementary school kids in America today get less than 1 hour of physical exercise a week in school—80 percent get less than 1 hour a week.

Mr. President, I do not know about you, but I remember when I was in school, in elementary school, we had an hour a day for recess. We had 15 minutes in the morning, 15 minutes in the afternoon, and a half hour at lunch. So there was 1 hour every day, and we had to go out and do stuff. We couldn't sit around and play with Game Boys and things like that. So we got an hour a day of physical exercise. Well, we need to reinvigorate our schools to make sure they get that physical exercise.

So we have done a lot in this bill to move this paradigm toward a health care society rather than a sick care society. There is more to do, as I said, in both the Education bill next year and in the Agriculture Committee in terms of the child nutrition reauthorization.

But in this bill we have made a great start. We have laid a great foundation. I am just thrilled so many of the wellness and prevention initiatives I have championed for so many years are included in this bill.

As I look forward to going to conference, we look forward to working with the House to strengthen it even more and to put more emphasis on wellness and prevention.

Just about an hour ago or so, we had a press conference with the president-elect of the American Medical Association, Dr. Wilson. I am proud of the fact that the American Medical Association has now endorsed our bill. As I said at the time, I said the doctors of America have examined this bill, and they have made the right prescription: Pass it. Pass the health care reform bill.

But Dr. Wilson, in his statement, made particular note of the wellness and prevention programs we have in this bill. He did not say this, but I was thinking, when he was talking, that it made sense. Doctors want to keep people healthy. They do not want to see people go to the hospital. They would rather be working with their patients one on one. How can they structure a patient's profile so the patient stays healthy, does not get sick so often? That is what Dr. Wilson was talking about: letting doctors practice medicine in a way that focuses on a person's health and keeping them healthy.

As President Obama said in his speech to Congress early this year:

[It is time] to make the largest investment ever in preventive care, because that's one of the best ways to keep our people healthy and our costs under control.

That was the President of the United States in his State of the Union message. Well, President Obama has it right. It is one of the best ways to keep our people healthy and our costs under control, and that is a big part of this bill. I do not know—I have not listened to every speech made by the Republicans on the other side—but I hardly ever hear them talk about this, but it is a very important part of the bill.

So, Mr. President, we are changing the paradigm. We are going to extend quality, affordable health coverage to nearly every American. We are going to transform ourselves into a genuine wellness society, and we are going to give our citizens access to a 21st-century health care system, one that is focused on helping us to live healthy, active, and happy lives.

Mr. President, I yield the floor.

THE PRESIDING OFFICER. The Senator from Colorado.

Mr. BENNET. Mr. President, I would like to first thank the Senator from Iowa for his leadership over many years, especially on prevention and wellness, and to see so much of this bill devoted to that is a real testament to his efforts. So I thank the Senator for that.

Mr. President, a number of years ago, I left a rewarding job in business because I had a chance to lend a hand to my community during a very difficult time in Denver. The economy was slow and the city was facing a record budget deficit. Our great mayor, John Hickenlooper, asked me to come be his chief of staff. It was not a glamorous job, but it was rewarding because we got results—not by seeking out what divided the people of Denver, who were going through a very rough time, but by reaching out time and time again to what the mayor called “our alignment of self-interest.”

We fixed the city's budget, and then I had the chance of a lifetime to become the superintendent of public schools and serve our children and the people who work so hard every day to support them. I came away from that experience believing that much of the Republican and Democratic orthodoxies relating to public education are essentially useless to our children—and maybe worse—and that Washington as a whole has absolutely no clue about what is going on in America's classrooms.

So it is fair to say I did not come to Washington with a partisan ax to grind. As is probably obvious to everyone around here—for good or for ill—I am not a career politician. I did not come here to win political points so that someone else could lose. I am not interested in that. I am here as the father of three little girls with an abiding concern we are at risk of being the first generation of Americans to leave less opportunity to our kids and our grandkids than our parents and grandparents left us. That prospect is shameful.

We are not the only Americans who have been working weekends and late into the night recently. There are people in small towns and big cities all across America doing jobs much harder than ours, who are taking an extra shift before Christmas so they can afford that extra gift beneath the tree—Americans who are unemployed in this savage economy and still trying to make sure the kids know Santa remembered them.

These same people are reading their papers and watching their televisions wondering what in the world we are doing here in Washington. All they see are talking heads yelling at each other on cable news, needless partisanship paralyzing their government, and even people praying that Senators will not be able to make votes.

I am not naïve about politics, but I expected more. I will vote for health care reform because it is a step in the right direction. But I will not go home and defend the actions of a Washington that is out of touch, a Washington that is more interested in scoring political points, more interested in the 278 health care lobbyists who used to work

for Members of Congress than it is in what our constituents have to say, a Washington that is more concerned with the millions being spent by big insurance companies than the thousands of dollars being lost by working families who are struggling to pay for coverage.

Columnists opposed to reform have criticized me for saying that I am willing to lose my seat to enact meaningful health care reform. Now I am being asked why I did not negotiate a special deal with leadership. In fact, there was a report this morning criticizing me because the National Republican Senatorial Committee was rejoicing that I did not ask for special favors. Only in Washington would someone be attacked for not negotiating a backroom deal. Just because others choose to engage in the same tired Washington rituals does not mean I have to.

So I have a message for the columnists, the political professionals, and those back home: I am not happy about the backroom deals. I am not happy that the public option was held hostage by people in our own party. I do not support rewarding delay with special deals. I will let others justify their vote and their tactics.

As for me, I am voting to provide coverage to 840,000 uninsured Coloradans, voting to extend Medicare for our seniors and provide free preventive care for everyone, voting to close the prescription drug loophole and provide tax cuts to small business, voting to make health care more affordable and eliminate exclusions based on pre-existing conditions, voting for health care reform that is fully paid for.

The people in my State and in our country deserve better than a politics that cares more about lobbyists and talk show hosts than the people we represent. I am committed to delivering on that despite what the political experts have to say. And, in the end, when the dust settles and the stories focus more on substance and process, I am confident Coloradans will see it the same way.

I also commit to the people of Colorado and the people of this Chamber that I will do everything I can to make sure this bill is fully paid for. That is why I submitted an amendment that will ensure that health care will help pay down the deficit by forcing Congress to make adjustments if reform does not meet the cost estimates we have projected.

I urge my colleagues and the leadership in the Senate to see to it that this amendment is included in the conference report. If not, I will fight to get it passed on its own. I believe so strongly in this because everyone here knows that keeping things the way they are is no longer acceptable.

When I first started in the Senate, 800,000 Coloradans were without health insurance. That number has grown by

40,000 in the months we have debated this bill. On average, 111 Coloradans have lost their health insurance every single day. This number will only get worse if we do nothing. Our State has spent \$600 million in the last year alone on uncompensated care.

Colorado's working families suffered double-digit health insurance cost increases year after year for the last decade. Many families have made terrible sacrifices—no longer investing in their children's futures, saving for a home, or carrying crushing credit card balances—all to pay for health care.

Small businesses pay 20 percent more for health insurance than large businesses do just because they are small.

I think back to the Coloradans who shared their stories with me during this debate.

I remember Bob and Deb Montoya of Pueblo. They were torn between providing health care for their small business employees and keeping their business afloat. Last year, their business paid out \$36,000 to cover two families and one employee. They could not afford to give their other 12 employees health care or they would be literally forced out of business. So they dropped coverage for the 12 employees to keep their doors open.

Hollis Berendt owns a small business in Greeley and told me about her daughter Abby who graduated from Colorado State University in 2004 and found a job in New York with a large company. Her daughter's company made her wait a year before she was eligible for health insurance, and during that time Abby was diagnosed with ovarian cancer. Hollis took out a second mortgage to pay for her daughter's bills and told me:

This experience brought to light, all too clearly, how close we all are to losing everything due to a health issue.

I have spoken here before about a young boy named Alex Lange. Alex's parents' insurance company refused to cover Alex because he was 4 months old and 17 pounds. They said he had a pre-existing condition, at 4 months, of obesity.

Then there was 2-year-old Aislin Bates, whose parents' insurance company denied her coverage because she was underweight. One child too big, the other too small. Today in America, you have to be just right to get insurance.

There was Peggy Robertson of Golden, CO, who was told she could not receive coverage unless she was sterilized, Mr. President. She came and bravely testified in Washington about the need for reform. There was Matthew Temme of Castle Rock, who could not receive coverage because his wife was pregnant, even though she had her own health insurance.

The sad thing is, there is nothing unusual about these stories. None of these people were trying to cheat or game the system. They were trying to

gain some peace of mind, some stability in their lives and, instead, they wasted weeks of their lives fighting against insurance company bureaucracy and mounting bills.

We have debated health care reform for over a year. Some have been working on these issues for decades. Killing health care reform under the guise of starting over is not an option. We cannot wait until after the next election. We cannot wait until our economy recovers or until we have come home from Afghanistan to deal with our broken health care system.

Now standing so close to the finish line, it is completely understandable that some Americans doubt whether this bill will improve their situation. They understand we cannot live with the current system. But they are also deeply concerned about our capacity to make it worse.

The special interests are using tried-and-true tactics that have been employed over and over across the decades to prevent reform: phone calls to scare seniors, direct mail to scare those already covered, television ads to scare just about everyone else, and opponents of this reform in this body are trying every delay tactic permitted by the Senate rules.

Amidst all this, there is still a reason to hope. After almost a century of trying, the Senate is very close to finally passing a meaningful health care reform bill, a piece of legislation that while not perfect, represents a substantial step forward from business as usual. We have a bill that does three important things: It saves money, it saves lives, and it gives families a fighting chance in their relentless struggle with health insurance companies.

This bill will save money. It reduces the deficit by \$130 billion over the first 10 years, according to the nonpartisan Congressional Budget Office, and is projected to reduce the deficit by 10 times that—up to \$1.3 trillion—in the second decade. We will save $\frac{1}{2}$ trillion by improving the way we deliver services to our seniors. These savings will prevent Medicare from going broke in 7 years by extending the life of the Medicare trust fund.

This bill will save lives. It will extend health insurance coverage to 31 million Americans who don't have it today. Over 90 percent of Americans will have health insurance coverage, the highest percentage in the history of the United States. For Colorado, that means over 840,000 people who don't have insurance will now have access and another 300,000 people who have insurance in the unstable individual market will be able to get affordable coverage through the new health insurance exchange.

The Senate bill makes preventive services, such as breast cancer and colorectal cancer screening, available

without copayments. Now mammograms and colonoscopies, which can cost between \$150 and \$200, on average, will be free as well for seniors—half a million seniors in my home State alone. This means catching diseases earlier, promoting wellness, and saving millions of lives.

For our Nation's working families, this bill will also rein in the worst practices of private insurance companies. They will have to commit to covering patients instead of gouging them for excessive profits and overhead. Starting in 2011, if an insurance company doesn't give you value for your dollar, they will have to refund you back the difference. They will not be able to impose arbitrary lifetime limits on consumers and punish you just for getting sick or deny you insurance because of a preexisting condition. The newest Senate bill does more to contain costs, more to demand accountability and transparency from insurance companies, and more to give consumers a better choice.

For my home State, in particular, I am glad the bill addresses other critical areas. This reform does more for small business and small business workers than ever before. Small business tax credits will begin next year, giving eligible businesses a tax credit for 6 years to purchase health insurance for their employees. We have extended tax credits for small businesses, allowing more than 68,000 small businesses in Colorado to buy health insurance.

This bill makes a significant investment in Medicare payments to rural areas. When I first joined the Senate, my first piece of legislation called for a deficit-neutral reserve to address the differences in Medicare payments between urban and rural areas. This Senate bill recognizes the geographic differences between rural and urban areas and makes sure providers in rural Colorado that provide higher quality at lower cost receive higher Medicare payments.

This bill also delivers on its promise to seniors. It doesn't use a dime of the Medicare trust fund to pay for reform and does not cut guaranteed benefits. That is why, on the first day of the health care reform debate, I introduced an amendment that would make sure seniors will still see their guaranteed benefits, such as hospital stays and prescription drug coverage, no matter what changes we make in health reform. It was the most bipartisan piece of legislation we have had this year, with 100 Senators agreeing health reform would not take away guaranteed Medicare benefits for seniors. For Colorado, that means half a million Medicare beneficiaries will continue to have their guaranteed benefits protected and preventive services free of charge through health reform.

I am very pleased Majority Leader REID included a version of a piece of

legislation I wrote based on the work in Mesa County, home of Grand Junction, CO. Currently, one out of every five Medicare patients who is released from the hospital in this country winds up back in the hospital in the same month they were released but not in Mesa County. They have reduced the readmission rates at the hospital to about 2 percent, compared to the national average of 20 percent. That is 12 million patients who aren't receiving the care they need. In Mesa County, they have lowered readmissions by creating a transitional model that makes sure that when patients leave the hospital, they do so with a coach. That coach helps them go from the emergency room to their primary care physician, their mental health provider, making sure they get the care they need over a period of time, making sure they don't forget their prescriptions, and making sure they have the guidance they need to take responsibility for their own care. I am pleased the Senate bill compensates and reimburses hospitals and providers that set up models such as the one in Mesa County that actually saves money.

On another note, I wish to thank the Presiding Officer and my fellow freshmen. Together, we worked hard to introduce a package of amendments to further contain costs and make our system more efficient. As I traveled throughout Colorado on the August break, I heard from doctors and nurses who told me repeatedly all they wanted to do was work with patients, while all the government was doing was making them fill out one form after another. When I came back, I was determined to do something to help cut the red tape and bureaucracy for these people so they could spend more time with their patients. That is why, as part of the freshman package, I introduced an amendment to put an end to multiple forms, confusing codes, and unnecessary paperwork that burden providers. If health plans don't follow the rules, they will suffer financial penalties. Our health care workers deserve better, and this amendment gives them back time to spend with their patients.

Our freshman package rewards and emphasizes efficiency: one form to fill out, not 10; less red tape; fewer bureaucrats; a system that makes sense. Thanks to the leadership of the Presiding Officer, that package was endorsed by the Business Roundtable, the AFL-CIO, and the Consumers Union—proof that at least off this floor, there are still people from all different points of view who are willing to work together.

This bill also makes progress in the area of tort reform. It includes language I worked on with Senators BAUCUS, CARPER, and LINCOLN to create a State grant program for States to develop, implement, and evaluate alternatives to tort litigation for medical

malpractice claims. The purpose of these grants is to limit litigation while preserving access to courts for patients and promoting strategies to reduce medical errors.

I know many in this Chamber take issue with one particular part of this bill or another. I have my own issues with the bill. I am one of many who have expressed their strong preference for a public option. But I urge my colleagues to consider how much good this bill can do for the American people—those with skyrocketing health care costs, small businesses forced with the impossible choice of helping workers keep their coverage or even just maintaining their business. To have the nonpartisan experts at the Congressional Budget Office validate that in the second decade we will have cut health care costs by up to \$1.3 trillion and that we will reduce the rise in costs of Medicare from 8 percent in the next two decades to 6 percent in the next two decades, while covering 31 million insured Americans, is truly groundbreaking.

We know what more time elapsing without fixing this system means for Colorado's working families and small businesses. It means more double-digit premium increases, less time to fix Medicare before it goes bankrupt in 2017, and more names added to the rolls of the uninsured. It means another big win for the special interests, more people denied coverage for preexisting conditions, and more small business employers will have to make impossible decisions about covering their workers or keeping their doors open.

So let's reject business as usual. Let's look at the promise of this Senate bill as a whole. Let's put the pettiness, scare tactics, and obstruction aside. Reform is what is needed to control costs, give people more choice, and provide support for our small businesses. This package will reduce our deficit, and it does so by reforming the way we provide health care.

We have much to do. Even before we were in the worst recession since the Great Depression, during the last period of economic recovery, working families' incomes in this country actually declined, the first time in the history of the United States, the first time our economy grew and left the middle class behind. At the same time, in my State of Colorado and in all States across the country, the cost of health insurance rose by 97 percent and the cost of higher education in my State went up by 50 percent. Finally, because of the short-term politics practiced around here, we now have an annual deficit and long-term debt that is cheating our children and constraining our choices.

We still have a lot to do to live up to the legacy that our parents and grandparents left us. It has taken me less than a year to understand that Wash-

ington still doesn't get it. I know we can do better, and despite so much evidence to the contrary, I believe we will.

I believe we will because, in the end, the national creed that each generation of Americans has fought for and fulfilled—the idea expressed in our Constitution that our responsibility lies not just with ourselves but to our posterity—is so much more powerful than the trivial politics that animate so many of the charges and countercharges that ricochet around this building.

It is for this reason I urge my colleagues to come together and support this meaningful improvement in our health care system.

I yield the floor.

The PRESIDING OFFICER. The Senator from Minnesota.

Ms. KLOBUCHAR. I ask unanimous consent to yield myself 10 minutes.

The PRESIDING OFFICER. The Senator is recognized.

Ms. KLOBUCHAR. Mr. President, late last night, as my colleagues are aware, the Senate took the important step to move forward on health care reform. After all the work, the debate that has gone on for this entire year, we owe the American people a vote on this issue. We can't afford to ignore this situation anymore.

I know some of my colleagues on the other side of the aisle have been talking about a lack of debate. I think anyone who has turned on C-SPAN for the last few months will tell you there has been a lot of debate—not only that, a number of Republican amendments were actually included in the original bill, the HELP Committee bill. When it came out, I believe it was something like 130 amendments that were included that came from their side—and the Finance Committee as well.

I remember the first bipartisan meeting we had on health care reform was something called Ready to Launch that the Finance Committee put together. I remember Senator WHITEHOUSE and I were there. It was literally a year and a half ago. So many of the ideas that are now incorporated in this bill that Senator BENNET from Colorado just so eloquently went through in this bill, so many of the bipartisan ideas to kick off cost reform, to start rewarding high-quality care, to start bringing down those costs in a way that gives us the high-quality care.

We all know that rising costs are not sustainable. If we don't act, these costs are going to continue to skyrocket.

So what was the vote about last night? The vote last night was to say we are not going to put our heads in the sand anymore. We are not going to keep letting these costs go up.

Ten years ago, the average family was paying \$6,000 a year for their health insurance. Now they are paying \$12,000 a year. Well, 10 years from now, if we don't do anything about this,

they are going to be paying \$24,000 to \$36,000 a year for their health insurance. Just look at these numbers. Look at where we are. In 1999, a single person was paying about \$2,100 for their health care. They were paying for a family, \$5,790 for their health care. Where are we now? Last year, in 2008, a single person was paying \$4,700 for their health care and then a family was paying \$12,680. Especially during this difficult economic time when wages haven't been going up, people have been losing their jobs, cutting back on their hours, and look what their health care costs have been. It has been a higher and higher percentage of their family budget, a higher and higher percentage.

At the same time, health care expenditures are going up and up and up. In 1995, we were spending something like \$12 billion and now it is way up to \$2.5 trillion. This is the kind of money we are talking about when we look at why we have to do something to bend the cost curve. When people at home hear this term "cost curve" and they don't know what it means—well, this is exactly what it is: The cost curve has been going up and up and up for health care in America.

So \$1 out of every \$6 spent in our economy is on health care. Over 20 percent of our economy, by 2018, we believe, will be spent on health care. American families can no longer afford it.

Who has been taking it the worst? Small businesses. They are paying 20 percent more than large businesses for their health care. In a recent survey, nearly three-quarters of small businesses that did not offer benefits cited high premiums as the reason.

These are little companies such as Granite Gear up in northern Minnesota and Two Harbors. I went up there and visited them. They are a thriving little company. They now have 15 employees. They are making backpacks for our Nation's soldiers because they make such high-quality backpacks. Do you know what the man who started that company told me? That if he had known how much his health care would cost with his family of four—he did not have kids when he started the business—he would not have started it today. He is paying \$24,000 in Two Harbors, MN, for a family of four.

This is what it really means when you look at the numbers. Inflation usually raises the cost of most goods and services between 2 and 3 percent a year. What have health care premiums been doing? Health care premiums have been going up close to 8 percent a year, and that is an increase Americans simply cannot afford.

What does this bill do? I was listening to some of the commentary and taking part in it myself over the weekend. There seems to have been a lot of talk about these delayed benefits. Why don't we talk about the benefits that

are taking place right when the President signs this bill, within the first year of this bill?

The first thing is, if your kid loses their coverage because something goes wrong—if they get diabetes or if they have some childhood disease—guess what. They are going to be able to get health care. There is no longer a ban on preexisting conditions immediately, and then in later years that applies for adults as well but immediately for kids.

Immediately, by 2011, within the first year of the bill, our seniors are going to be covered in that doughnut hole for their prescription drugs. So many of them for so long—I know my own mother would complain about this doughnut hole where they fall off a cliff and are not able to pay for their drugs because they do not have enough money. That will be covered.

A number of the small business tax credits take effect by 2011. These are real benefits for the people of this country—real benefits.

The thing I care most about in this bill which Senator BENNET discussed is this idea of getting our money's worth for our health care dollars. What does this bill do? This new bill—we have taken a lot of the good from the original bill and made things even better: \$132 billion off the deficit in the first 10 years and in the next 10 years, \$1.3 trillion off the deficit. That was the most important thing to people in my State when I went around. They said: We want to get rid of these preexisting conditions, we want to make things better so we have better health care, but we want to make sure we do something about the deficit, start doing something about costs.

As you know, Mr. President, Minnesota is a mecca for health care. We have one of the high-quality, cost-efficient, low-cost States in the country. In fact, when we look at some of the numbers, one of my favorite ones—and maybe this will be the last time I will say this before the end of the year—is Mayo Clinic. They did a study out of Dartmouth, and they looked at what Mayo did with chronically ill patients. What they found was this: If other hospitals in the country simply use the same high-quality care Mayo uses—bring the family in, talk to them about what the care should be for the patient—they talk to the patient and then figure out what is the best course. They work as a team, like a quarterback with a team working with that quarterback. They do not have 20 specialists falling all over each other; they work as a team. What this study showed was this kind of health care for that subset of chronically ill patients in the last 4 years of their lives, the quality ratings were sky high for the Mayo Clinic. The families felt good about how their loved ones were treated.

What Dartmouth found is if all the hospitals in the country followed the same protocol, we would save, for this subset alone, \$50 billion every 5 years in taxpayer money, giving patients that Mayo health care, giving them high-quality health care. It is counter-intuitive to people. If you go to a hotel and you pay the most, you are going to get the best room with the best view. That has not been the same in American health care. In fact, there is an inverse relationship.

I see my friend from Ohio. Ohio has the Cleveland Clinic, and there is Geisinger. Those places that offer high-quality care also tend to have some of the lowest costs.

Those are the incentives we are putting in this bill—incentives for accountable care organizations, incentives for that integrated care I talked about instead of people running around with x rays to 20 specialists, getting charged every single time, but then one specialist does not know what the other specialist is doing. They don't know what kind of drugs you are allergic to when you go in for surgery. This is because there is no communication. This bill promotes that integrated care where you put the patient in the driver's seat so they have their pick of a doctor. That is what we want—bundling of payment so you start rewarding outcomes instead of the number of tests and procedures.

My favorite example of this came out of the Geisinger Clinic in Pennsylvania, where they said: We are not that happy with how we are treating diabetes patients. So instead of having everyone wait to see an endocrinologist, a doctor, we are going to have some of the routine cases see nurses, and the nurses will report to the doctors, and the patients will be happier because they will be able to see a nurse more often. The most difficult cases will be treated by endocrinologists.

They did that for about a year and looked to see what the results were. Guess what. The patients were much happier because they were able to communicate one-on-one with the nurse. The doctors were able to handle the most difficult cases and monitor the other cases. They saved \$200 a month per patient with this kind of system. Higher quality care and better patient outcomes.

What does our system do when they see this kind of smart, cost-effective result for the doctors and for the system and for the taxpayers? They actually are told: You get punished for this under our system. You are going to get a lot less money if you do something like this. That is what I am talking about.

On hospital readmissions, we could save \$18 billion a year. If you go in the hospital and you are treated, you want to go home. You don't want to go back into the hospital because someone

made a mistake or they gave you an infection. Let's provide incentives—that is what this bill does—so that we reduce those hospital readmissions, make life better for the patient and at the same time reduce taxpayer money. That is what this bill is about.

Right now, fraud is \$60 billion. I don't think anyone would believe this. A senior who just depends on Medicare, right—we have to tell our seniors today that \$60 billion a year is wasted on Medicare fraud, going to con men, going to people who set up storefronts and they get fake checks and they are not even real. That is where the money is going right now—down the tube, siphoned off by fraudsters. What this bill does is give the tools to improve that situation so that will not happen anymore.

That is what we are doing with this bill. It is about reducing costs, it is about raising quality, and it is about saving Medicare so it does not go in the red by 2017, giving it 10 more years and beyond because of the delivery system changes.

I am proud to support this bill. We continue to work for reform. As you know, this is not just an end, this is a beginning. There will be more work to do in the future, but we cannot put our heads in the sand. We have to vote on this bill. We have to get this done.

I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. BROWN. Mr. President, it has been said that a cynic knows the price of everything and the value of nothing. I spent, as we all have, as the Senator from Minnesota has, as the Presiding Officer has, the last 4 weeks listening to my colleagues come to the Senate floor to describe health reform legislation that bears no resemblance to what is actually before us. They take liberties with the cost of the bill. They seem to have no concept of the value of health care to a family who has it and to a family who does not have it. I guess they believe it is not important for us to get this done, it is not important for other Americans to have affordable health insurance.

My colleagues are not at risk of losing their coverage. They can afford the health care they and their families need. So what is it to them if another 14,000 people lose their insurance every day? Mr. President, 390 people every single day in my State lose their insurance. What is it to them if people with preexisting conditions cannot get coverage, if women are overcharged for insurance, if the self-employed cannot afford the outrageous premiums they are charged, if too often American small businesses pay more for health coverage than they earn in profits? What is it to them?

I have listened as Republican Senators have come to the Senate floor day after day to tell tales about health

care reform and try to manipulate public opinion by any means possible. I hear them mostly stalling: Slow down, not yet. They have done it since the Gang of 6 in the Finance Committee met in June. No, actually they had begun to stall even before that when the Finance Committee and the HELP Committee began their deliberations, informal deliberations.

What they forget or what they do not want to think about, perhaps, is that every day they stall, 390 people from Galion to Gallipolis, from Buckeye Lake to Avon Lake, from Ashtabula to Cincinnati, 390 people in my State lose their insurance every day. Every day, we see 14,000 Americans lose their insurance, and 1,000 Americans die every week because they do not have insurance. One thousand Americans die every week because they do not have insurance, and on the other side of the aisle they say: Slow down. What is the rush? Why do we have to move into this?

They forget or maybe they just do not want to hear that a woman with breast cancer is 40 percent more likely to die if she is uninsured than if she has insurance. Women with breast cancer are 40 percent more likely to die if uninsured than if they have insurance. Yet they continue to say: Slow down.

I wish my friends on the other side of the aisle would actually meet some of these people who do not have insurance. Let me put a human face on this, if I can. Let me share three letters from Ohioans. I have come to the floor since July day after day reading letters from people directly affected by this health insurance situation, if you will. In most cases, these are people who were happy with their health insurance a year ago, and something happened in their lives—they got laid off and lost their insurance; had a child with a pre-existing condition for whom they could not get insurance; maybe they got sick and the cost of their health care was so high that the insurance industry cut them off, simply eliminated their coverage. Let me read a couple of these.

Marie from Hancock County, OH:

My husband and I both have preexisting conditions and are stuck paying \$1,300 a month for health insurance. He has been out of work for 2 years and we are living off the money that we got when we sold our house. We are afraid to go without insurance. We are in a fix and in our late middle ages and find ourselves watching our retirement savings go down the drain. Please fight for us and others like us.

Think about that. Does anyone in this Chamber, does anyone who comes to work as a Senator or down the hall as a Congressman—can any of us really understand what this couple is all about, this couple from rural, smalltown Ohio paying \$1,300 a month? How are they paying for their insurance? They sold their house so they could pay for their health insurance. They are in their late middle ages. I

am guessing they are probably in their late fifties, early sixties. They are not eligible for Medicare.

So many people say to me through these letters and through my meetings and discussions and when I am traveling around my State: I am 63. I only have 2 years before Medicare because I trust Medicare. It is stable, predictable. It will be there for me, and it will help.

Instead, Republicans in this body, all 40 of whom even voted against the bill last night—40 said: Stop. Don't even move forward on this bill. Do any of those 40 really understand people such as Marie from Hancock County? Do any of them understand? Do any of them understand that 390 people are losing their insurance every day in just one State? Do any of them understand that 1,000 people a week are dying in this country because they do not have insurance? Do any of them understand, any of the Members of Congress, the House of Representatives or the Senators, the 40 Senators who said no and stall and stall, saying: Not yet; can't do this yet; have to slow it down. Do any of them understand that a woman with breast cancer is 40 percent more likely to die if she does not have insurance than if she does?

Charles from Cuyahoga County, the Cleveland area, writes me:

The hands-off-health-care people claim that many Americans are very satisfied with their own health insurance. I am one of those. I have Medicare. But I don't believe their implication that health care reform is not needed. I think if you were to really ask those lucky people who were somewhat satisfied with their plan—a great majority would say they support reform that would benefit everyone.

Charles understands. He is on Medicare. He understands the stability and predictability of the Medicare system.

I might add parenthetically that my Republican friends, all 40 of whom last night said: Stop, slow down, stop, slow down, all 40 of them understand that their party overwhelmingly opposed the creation of Medicare. When they had a chance, they tried to cut it and privatize it in the nineties. Then when President Bush was sworn in, with Republican leadership in the House and Senate, they moved forward on their giveaway to the drug companies and insurance companies in their attempts to privatize Medicare. Now they say they are all for Medicare.

Understand, Charles knows what this bill is going to do. It is going to strengthen Medicare. It is going to lengthen the lifespan of Medicare. It is going to give free physicals, once-a-year checkups, colonoscopies, and mammograms for people on Medicare, and it is going to close the doughnut hole so fewer people will have to pay so much out of pocket.

Last letter. Raymond from Delaware County:

My wife and I had to drop our coverage because it cost us \$30,000. The country needs re-

form that bars insurance companies from denying coverage or charging higher premiums on the basis of preexisting conditions. Health reform is the right solution for the people of Ohio.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BROWN. I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. BARRASSO. Mr. President, I just heard my colleague, the Senator from Ohio, say: I wish some of my colleagues on the other side of the aisle would understand families who don't have insurance.

I practiced medicine for 25 years, taking care of families in the State of Wyoming. During that time, I took care of all patients, regardless of their ability to pay. I will tell you, I believe, as a physician who practiced medicine for 25 years—and as someone whom the Obama administration has decided to completely ignore, as he did the other Senator of this Chamber who is a physician—that I know specifically and personally about what happens to families who lose their insurance. My colleague and I know specifically what happens to families who are on Medicaid, a health care program which my colleague who is now leaving the Chamber after asking if anyone in this body understands people without insurance but not staying to hear the discussion for the next hour—making statements and then leaving—I understand those families. I understand the families on Medicare, I understand the families on Medicaid, I understand the families without insurance, I understand the families worried about losing their insurance, I understand about the families worried about disease.

My colleague from Ohio said: Do people understand women with breast cancer? Well, my wife is a—

Mr. BROWN. Will the Senator from Wyoming yield?

Mr. BARRASSO. Regular order, Mr. President.

Mr. BROWN. I just wished to let the Member know I am still in the Senate.

Mr. BARRASSO. My wife was a breast cancer survivor, and her breast cancer was discovered in her forties by a screening mammogram. It was that screening mammogram that saved her life because the cancer had already spread. It had already spread to a lymph node. She had three operations, two bouts of full chemotherapy, radiation—35 treatments and all—all—because of the screening mammogram that saved her life. Yet because of this bill that was brought to the Senate floor—with the government knowing better than the rest of America, knowing what health care ought to be given and shouldn't be given—all of a sudden what we see is the government knows best, people don't know—her life would have been lost because she is one of those 1,900.

So I understand, having practiced medicine, having lived that life as a physician—taken care of people without health insurance and on Medicaid and Medicare and those worrying about losing their insurance when they lose their job—the implications. Yet I took care of all of them, as did all my partners. We dealt with all these people, trying to help each and every one of them, regardless of their ability to pay. It is why we need health reform in this country that actually works on availability of care, affordability of care, access to care, and quality care. This bill that I voted against last night doesn't address the needs of the country. It fails time and time again.

The President made a number of promises—a number of promises—to the people of this country. He said people would see their insurance premiums drop by \$2,500. Instead, the budget officers say: Oh, no, it is going to go up \$2,100 for a family. Has the President not read the bill, not read the responses that have come from the Congressional Budget Office? Does he not see the difference there of \$4,600 per family?

The President said this wouldn't add a dime to the deficit. Well, it is going to add a lot of dimes to the deficit. This is going to add \$1 trillion to the deficit. He said: Oh no, will not at all. Yet they didn't do the doctor fix—the Medicare doctor fix. Now the Speaker of the House says: Oh, we will handle that in January or February for \$250 billion, since they are not going to pay for it here.

The President said: Taxes will not go up on anybody making under \$250,000 for a family. There are a dozen taxes in the bill that will be passed on to the American people. Now any teenager who goes to a tanning salon is going to get taxed 10 percent. I don't think any of those people are making over \$250,000 apiece.

The President said: People will not lose their coverage. Oh, they are going to lose their coverage. Many will lose the coverage they have, coverage they like, because they have cut 11 million people on Medicare Advantage—a program people like, a program my patients like. People whom I have taken care of like it because there is actually an advantage to the program. It is a program that deals specifically with preventive care. It is coordinated care. That is what happens with Medicare Advantage. The President doesn't like. They will lose their coverage.

Of course, the President said we wouldn't see any cuts to Medicare. Yet the bill says \$500 billion of cuts to Medicare for the seniors who depend upon Medicare.

The President said we would have an open, honest debate. He said C-SPAN would be there covering the debates. Those of us with the most experience—the two physicians, with 50 years in the

practice of medicine and taking care of families in this country—were completely excluded—completely excluded—even though we offered to go to the White House and read the bill with the President.

So what do we have? What is the verdict of the American people on the vote that was taken in the dark of night—at 1 a.m. in the morning—a Monday morning vote, taken at 1 a.m. so the American people, hopefully, according to the Democrats, would be asleep and not see what they were doing to the American people? The verdict is the American people are overwhelmingly opposed—opposed—to the bill the Senate last night voted 60 to 40 on cloture and decided to move ahead on.

The deals in the bill are absolutely astonishing: \$100 million for a hospital in a State we still can't identify and no one is claiming, a payoff to one State, a payoff to another State, and then the cuts in Medicare for our seniors who depend on Medicare, a program that is going to go broke in the year 2017—not to save Medicare. Instead of saving Medicare, to start a whole new government program.

I see my colleague from the State of Tennessee is standing, and he has worked closely with people on Medicare in his home State. He is familiar with that and with Medicaid and he knows how difficult it is for patients to get to see a doctor. With the cuts in Medicare, it is going to make it harder for those hospitals to stay alive and open in your community, and for patients to get the kind of care they need.

So I would ask my friend from Tennessee: Are there concerns you have about the cuts to Medicare and how they are going to impact on the care of people in your home State?

Mr. ALEXANDER. I thank the Senator from Wyoming and appreciate his leadership on this bill. It is of tremendous value to have within our body two practicing medical doctors to help us interpret the effect of this bill, which affects all 300 million Americans so dramatically.

We find, when we discuss this bill with our colleagues on the other side of the aisle, we sometimes become exasperated with one another because it seems like they are talking about one set of facts and we are talking about another set of facts. So what I would like to do is take a moment and talk about Medicare.

If anyone is watching our debate, you hear the Democrats talk about three things: We are saving Medicare, we are extending its length, and you hear Republicans say they are cutting Medicare. So who is right?

Well, let me tell you why we talk about Medicare cuts. Medicare, of course, is a government program which 40 million seniors depend on. We all pay into it, and then when we get to be

of a certain age we depend upon it for our medical care. For many Americans, it is very important. It was established with broad bipartisan support in the 1960s.

What are the proposals that have to do with Medicare? Well, basically half this health care bill is paid for by reductions in the growth of Federal spending for Medicare. Those are Medicare cuts. Who says they are? Well, the President of the United States, for one, says we will have no deficit from this bill. So the way we are going to do that, for this bill, which the Congressional Budget Office figures show us will cost \$2.5 trillion over 10 years when fully implemented, is basically paid for one-half by Medicare cuts and one-half by new taxes. Give the Democrats credit for that, that helps to avoid a large part of the deficit. The rest is done by sending a huge bill to States to help pay for another big government program called Medicaid, but I will leave that to the side for a moment.

The Medicare cuts which are reductions in the spending for Medicare, are \$466 billion over the first 10 years and over a fully implemented 10 years it is about \$1 trillion in Medicare cuts. That is money coming out of the Medicare Program and going somewhere. Where does it go? Well, it goes to start a new program.

What is wrong with that? Well, one thing wrong with it is the trustees of Medicare say that there is already more money coming out of Medicare than is being paid in, and by the year 2015 or 2017 it will be insolvent. That means going broke. These aren't Republican trustees or Democratic trustees, these are the men and women whose job it is to report to the Nation on the condition of this program that takes care of 40 million people and their medical care.

Already we see that the Medicare Program is under some stress. The doctors, for example, who serve Medicare are only paid about 83 or 84 percent as much as doctors who serve patients with private health care. As a result of that, we have to come along year after year and appropriate more money to reimburse doctors who serve Medicare patients. If we do not do that, they will not be serving Medicare patients, and Medicare will become similar to Medicaid, the program for low-income Americans, where about 50 percent of doctors will not take a new Medicaid patient. It is akin to telling somebody: I am going to give you a ticket to a bus line where the bus only runs about half the time.

So what the Democrats are saying to us is that by taking \$1 trillion out of Medicare over 10 years when fully implemented, and there is no dispute about that amount of money, and spending it to pay for this new program that is somehow good for Medicare and

for the seniors who depend upon it. I mean, they are suggesting we believe if you take \$135 billion from hospitals and \$120 billion from the 11 million seniors who participate in Medicare Advantage and \$15 billion from nursing homes and \$40 billion from home health agencies and \$7 billion from hospices, that somehow that is good for seniors.

Perhaps it could be, if all that money were put back into Medicare; if the money were taken from grandma and spent on grandma. But no, this money is taken out and spent on a new program. The Director of the Congressional Budget Office—not a Republican, not a Democrat, the nonpartisan Director said, for the 11 million on Medicare Advantage that one-half of their benefits will be diminished. That is what he said about these cuts.

Even when it is all said and done, we completely leave out the $\frac{1}{4}$ trillion that we need to appropriate to pay the physicians to serve Medicare patients. Because if we don't, their payments are going to be cut by 21 percent next year and fewer of them will see Medicare patients. We have already heard the Mayo Clinic, for example, is beginning to restrict some patients on Medicare because they lost \$840 million serving Medicare patients last year.

I have taken a few moments to talk about Medicare. That is just one thing wrong with this bill. But when you hear the other side say they are helping Medicare, and if you listen to what I said about how can you take \$1 trillion out of the Medicare Program—which is going broke—when it is fully implemented over 10 years and claim you are helping Medicare by starting a new program, I don't think that is possible. That is the source of the great concern on our side of the aisle about this bill on that one issue.

I see the assistant Republican leader, the whip. I have heard a number of people say, and I will just propound this question and then I will yield the floor, if I may, to the Senator from Arizona. But I have heard them say: Why are Republicans keeping everybody in here this week? We want to go home and see our families.

We all want to see our families. But there is a reason this bill was suddenly presented to us in the middle of the greatest snowstorm in the history of Washington in the month of December, and we were asked to start voting on it in the middle of the night on the same day, and to finish the work by Christmas. If I am not mistaken, and this is my question to the distinguished assistant Republican leader who has been here a number of years, who is in the leadership and whose job is to help manage the floor: Is it not entirely the prerogative of the majority leader of the Senate to schedule what comes up on the floor? Is that not his job? Isn't it true that if Senator REID wanted to say let's take this bill down, let's go

home, let's let the people hear about it, let's come back and vote on it after Christmas, after New Year, after Valentine's Day, could he not do that and isn't that peculiarly his power and not our power?

Mr. KYL. Mr. President, I would say to our colleague, as a general rule that is correct. The majority leader has two great powers that no one else in the Senate has. One is the right of first recognition by the Presiding Officer and the other is the power to set the schedule. That power is limited by Senate rules, and it can be altered by unanimous consent. I can go on and explain a little bit to folks who are wondering why we would be in this predicament of voting on Christmas Eve based upon the majority leader's decision. If I can just proceed, I will do that.

All of these rather odd times for debates, 1 o'clock in the morning, 7:20 a.m. in the morning, and so on, are as a result of the majority leader's decision to make sure that this bill is completed by Christmas. That is the precipitating cause for everything else that follows because once he says the bill has to be completed by Christmas, then he has to, in effect, count backwards on how long it takes to do the various things the Senate rules say we have to do.

If there are three cloture motions filed—which is what the majority leader did; he filed three cloture motions simultaneously—under Senate rules certain timeframes then attach.

You have to take the vote with 1 day intervening between the filing of the cloture motion and the vote. If cloture is invoked, then 30 hours for debate is permitted after which there can be additional action by the Senate. So when the majority leader takes all that into account, he finds that he has to vote at 1 a.m. in the morning, 7:20 a.m., and so on.

He could change that, of course. He could change that by saying we do not actually have to have the whole thing completed by Christmas. That is strictly an arbitrary date he set.

There have been some who said: Why don't we have a unanimous consent request to not put us through all of this and try to complete the debate a couple of days earlier?

Republicans have said: Now wait a minute. You are telling us on the one hand that the majority leader is saying we have to have this completed by Christmas, but since that is kind of tough on all of us, now you are saying let's move that up a couple of days.

Republicans are saying: We have had barely enough time to consider this bill as it is. We are not going to agree to move it up any more than that. We don't like voting on Christmas Eve any more than you do, but the answer to it is not making the time even shorter but, rather, taking our time and doing it right. As the Senator from Maine

has pointed out, let's go home for the Christmas recess, stop and listen to what our constituents are telling us they would like to have us do, and then come back and complete it. That could all be done by unanimous consent. My colleague is correct that once the majority leader made the decision that this has to be done by Christmas, then the time is pretty well set by the Senate rules, absent a unanimous consent by the body that would either extend the time or shorten that amount of time.

I would like to make another point, off that subject if I could, but if my colleague has another question in that regard I would be happy to try to respond to it.

Mr. ALEXANDER. No, I thank the Senator. I yield the floor.

Mr. KYL. I talked to the Senator from Wyoming. Of course, Arizona is a State that has a lot of Medicare patients. Our State is hurt as much as any by the cuts to Medicare and particularly the Medicare Advantage cuts. We do not have the benefit that was extended to residents of other States, primarily the State of Florida, by a special provision that was inserted into the bill. As a result, our constituents are going to suffer more than those of some other States.

But the more we read this bill—and one of the reasons Republicans have not been willing to truncate this debate is that the more we read it the more we find in it that is troublesome. We found yesterday that the Congressional Budget Office—actually the Congressional Budget Office brought to our attention the fact that they had made a little mistake. I think it was a quarter of 1 percent in one of their calculations. That quarter of 1 percent amounted to \$600 billion. So a small error by the Congressional Budget Office can make a huge difference to the people of America. That is \$600 billion.

We also saw there were special provisions in the bill for residents of one particular State, and that has gotten quite a bit of attention lately. There has also been a dental/vision clinic in a State that has benefited. I am still not sure we have figured out exactly what that State is, but I understand one of the Senators from Connecticut has taken credit for it. I don't know if that is true. It is hearsay. If that is incorrect, I can be corrected. But the more we see about it, the more we realize that support for it was garnered, not on the merits but on the basis of special favors done to certain Members.

My staff has indicated there is yet another one of these in the bill, and it has to do with so-called specialty hospitals or, as they are referred to in the legislation, physician self-referral hospitals, that have physician ownership.

Just a little bit of background on this. The Hospital Association that is primarily representative of the community hospitals has been pleading for

a long time that they are not adequately reimbursed, and we need to try to help them. I have been an advocate for that. I have tried to help them, for example, for reimbursement in the care provided to illegal immigrants, and we were successful in that.

But one area I departed from that is when they concluded the best way to help themselves was to hurt their competition. At that point I said no. Their competition is the physician-owned, self-referral hospitals. These are generally specialty hospitals in a community that provide very good care. While they do in one sense provide competition to the community hospitals, they are all in the same boat in terms of the kind of reimbursement that Congress provides. What I have said is you should not solve your problem by hurting your competition but having Congress solve the problems that affect you both. I have been willing to try to help on that.

In this legislation what they have done, they struck a deal with the Hospital Association to stop the competitors, the physician self-referred hospitals, from building any more hospitals. You have to be under construction by a certain date under the bill—it is February 10, 2010. You have to have a provider agreement in operation—that is the technical term—or else you cannot go any further with your new physician self-referred hospital. That is going to hurt a lot of communities. It turns out that some of the communities hurt were in a particular State, the State of Nebraska.

Again, I have an affinity for Nebraska because I was born there, and I know a lot of people there. The Senator from Nebraska, Mr. JOHANNIS, a little bit earlier today said he didn't think the special deals that were created for the State of Nebraska were appreciated by Nebraskans who stand more on principle and have the view that if something is bad for Nebraskans and it is bad for the folks in other States, therefore it ought to be solved for all of the States, not just for the State of Nebraska.

It turns out that is the case with this particular provision on page 332 of the Reid so-called managers' amendment, which would extend the date on which a hospital may have physician investment and a provider agreement in place for the purpose of being grandfathered. That date was extended until August 1, 2010.

It turns out that helps, at least according to staff, at least three hospitals in the State of Nebraska—one in Omaha, one in Kearney, and one in Bellevue. In fact, I will just quote briefly from an article that Robert Pear of the New York Times did on this.

The Senate health bill, would impose tough restrictions like the one passed by the House last month, would impose tough new

restrictions on referrals of Medicare patients by doctors to hospitals in which the doctors have financial interests. The package assembled by Mr. Reid would provide exemptions to a small number of such hospitals, including one in Nebraska.

He goes on to describe this and then quotes Molly Sandvig, executive director of Physician Hospitals of America, which represents doctor-owned hospitals, who said the change would benefit Bellevue Medical Center, scheduled to open next year in Bellevue, NE.

Under the proposal Ms. Sandvig said, "doctor-owners can continue to refer Medicare patients to the hospital" in eastern Nebraska.

"Senator Nelson has always been a friend to our industry," she said. "But doctor-owned hospitals in other states were not so fortunate. They would not meet the August 1 deadline."

I would like to help all the physician-owned hospitals. I agree that all of them should have the same kind of support that was gained by the Senator from Nebraska for three specific hospitals in Nebraska. I understand, by the way, that three or four hospitals in Arizona would also benefit from that. I think that is a great thing.

But instead of just benefiting the hospitals in a few States by moving the date back to where you catch the ones in the State of Nebraska, we ought to eliminate this requirement altogether because what you are going to do is prevent more competition from very high-quality hospitals in communities that can provide a real service to constituents in all of our States, not just one State.

It is just one more example, I say to my friend from Tennessee, that the more we read the bill and learn what is in it, the more we find that the 60 votes for it were obtained less by persuasion and on the merits of the bill than by special provisions that were inserted to assist folks in particular States.

As I said, I think if something is good for one State, it ought to be good for all States. If it is not good for one State, it ought not be a requirement on the other States as well.

Mr. BARRASSO. Mr. President, what you are hearing is what we are noticing as Republicans take a look at the bill. I saw the majority whip come onto the Senate floor a few minutes ago. Yesterday he was on the floor and said the Republicans have not offered amendments to this bill, so I brought four amendments yesterday. The chairman of the Finance Committee objected.

One had to do with letting people on Medicare keep their own doctors or choose who they want to go to see for a doctor. The purpose of this what was called "Medicare Patient Freedom to Contract" is it "allows Medicare patients the right to privately contract for medical services with the physician of their choice."

I ask my friend from Tennessee, who has just spoken about Medicare,

wouldn't he think that patients who have been promised that they can keep the health care they want should be able, or at least this Senate ought to be able to debate an amendment about allowing Medicare patients the right to privately contract for medical services with the physician of their choice? Wouldn't that seem fair?

Mr. ALEXANDER. Mr. President, I agree with the Senator from Wyoming. I think it is important for the American people to know, the 400-page amendment that was added to the underlying bill over the weekend is being presented to us in way that will not allow the bill to be amended. So something that affects one-sixth of the economy, which we have had a day and a half to read, which is part of an overall bill that will raise taxes, cut Medicare, and send big bills to States could be improved with amendments but cannot be amended under the current procedure.

Mr. BARRASSO. Another amendment—I see my colleague from South Dakota is here—is an amendment I offered on the floor of the Senate yesterday to protect individuals from skyrocketing insurance premiums. You may recall the President of the United States said premiums—families in Wyoming and other States, families across the country—health insurance premiums would go down \$2,500 per family. Yet what I read and studied, and as I look at this, it says to me it looks like premiums will go up instead of going down. Instead of going down \$2,500, they will go up \$2,100. I think for 90 percent of the families in this country, their insurance premiums will either stay the same or go up more because the bill is passed than if we did nothing.

I ask my friend from South Dakota—I know he has been bringing forth information; I know he put a chart together on it—would there not be some value in allowing the Senate to discuss an amendment because this amendment basically said let the State insurance commissioners—because every State has an insurance commissioner—let the State insurance commissioner take a look at what happens to insurance premiums in their State. If the insurance commissioner finds that the premiums have gone up faster than the Consumer Price Index, then in that State where those premiums have gone up faster than the Consumer Price Index, all of these laws and regulations and rules would no longer apply. The mandates, the rating rules, the benefit mandate, all of those included in the Reid bill would not apply.

Wouldn't that make sense, I ask my colleague from South Dakota? What is the Senator's understanding of this and should not we be allowed to at least discuss and debate that as a Senate when we have been promised as citizens of this country that premiums would go down?

(Mrs. HAGAN assumed the Chair.)

Mr. THUNE. Madam President, the Senator from Wyoming is correct. Of course, we would like to offer amendments. I know the Senator from Wyoming has deep experience in this field, being a practicing physician, someone who brings great knowledge and background to the debate and obviously has great insight about how this 2,100-page bill could be improved upon. What we have here is the 2,100 pages that we started with, and this represents one-sixth of our entire economy. We are talking about reordering one-sixth of the entire economy. Saturday we received an amendment, a 400-page amendment which nobody up until Saturday had seen. In fact, many of the Democrats hadn't seen it either, including members of the Democratic leadership. There was a discussion on the floor last week between Senator MCCAIN and Senator DURBIN in which Senator MCCAIN said: They are writing this amendment behind closed doors. We don't have any idea what is in it. The Senator from Illinois, the No. 2 person in the Democratic leadership, said: I am in the dark just like you are. You had a handful of people who were adding 400 pages of content to the 2,100 pages we already have.

In addition, there is another amendment that adds another 300. We are talking about 2,700 pages that will reorder and restructure literally one-sixth of the entire American economy. Right now what we are being told is that we are not going to be allowed to offer amendments to that humongous piece of legislation. When you get this much legislation coming at you and receiving this on Saturday, not having the opportunity to read it for the first time, is why we have been saying we need to push this back and not try to jam it through before the Christmas holiday. You find all kinds of things in these bills. Sometimes people take credit for those being there. Sometimes they don't. We have had a debate about some of the provisions that benefit specifically Nebraska. You have this Medicaid provision that requires the taxpayers of the other 49 States to subsidize and pay the Medicaid matching share for the State of Nebraska which will cost millions and millions of dollars. The Senator from Arizona mentioned this late add, a \$100 million item for construction of a university hospital which, again, is being reported as being inserted by the Senator from Connecticut. You have all these sorts of deals that get made to try and get that elusive sixtieth vote that are now coming to light. The American people have a right to know it. Frankly, Members of the Senate who have to vote on this have a right to know what is in these volumes of pages, 2,700 pages, that will spend \$2.5 trillion. The original 2,100-page bill spent \$1.2 billion per page, \$6.8 million per word. It creates

70 new government programs. This is a massive overhaul of health care delivery.

What it ought to be about is driving down the cost of health care for people. In fact, we have heard a lot of discussion from the other side about how this drives down the cost of health care. This bends the cost curve down. They can say that, but the experts we rely on, the referees or the umpires, say otherwise. In fact, what the CBO has said is that the cost curve would be bent up by this bill. The blue line on this chart represents the increasing health care costs year over year if we do nothing. The blue line represents what we would be looking at if we continue on the current course which everybody here acknowledges is unacceptable. We all want to see the cost curve go down and see overall health care costs go down. But the ironic thing is, according to the CBO, the red line represents what happens if the bill proposed by the Democratic majority actually becomes law. The cost curve is bent up. We will actually spend more on health care than we are spending today, even the year-by-year twice the rate of inflation increases in health care premiums today.

The Senator from Wyoming is absolutely right to be offering amendments to address the issue of premiums. This bill does not do anything to reduce premiums for most Americans. About 10 percent of Americans, because of the subsidies in the bill, would get their premium costs reduced, but 90 percent—we are told by the CBO—would see their premiums stay the same or go up. When I say stay the same, it means go up at the current rate of twice the rate of inflation. Worst-case scenario, if you are buying your insurance in the individual marketplace, you will see your insurance premiums go up above and beyond this by 10 to 13 percent. Health care costs for 90 percent of Americans, the best they can hope for, is the status quo which is year-over-year increases that are twice the rate of inflation. If you are one of the unlucky who buys their insurance in the individual marketplace, your premiums go up by another 10 to 13 percent. This ought to be about driving down health care costs and getting premiums under control.

The overall cost of health care in this country represents about one-sixth of our entire economy. If this bill passes, according to the Congressional Budget Office, according to the Actuary of CMS, health care spending will no longer be one-sixth of the economy; it will be more than one-fifth. Because if this bill passes, health care spending will go up to about 21 percent of our gross domestic product.

Tell me, what does this bill do then to get costs under control? If we are driving up the cost of health care for individuals in the form of higher pre-

miums, if we are driving up the overall cost of health care as a percentage of our economy, why would we be jamming this thing through before the Christmas holiday, these 2,700 pages, spending \$2.5 trillion of taxpayer money, raising taxes on small businesses, which obviously have weighed in on this, and the National Federation of Independent Business, which represents a lot of small businesses around the country, has said, if enacted, this bill would cost us 1.6 million jobs because of all the new taxes it imposes—you are raising taxes, when fully implemented, by about \$1 trillion, cutting Medicare by about \$1 trillion. After all that, what do you have? You have the same or worse insurance premiums for 90 percent of Americans. I argue that is a bad deal for the American people.

Coming back to the special deals, this is not the way to legislate. To carve out deals, to go and try and find or buy or however you want to characterize it that sixtieth vote is essentially what we are talking about. These are special goodies packed into this bill essentially because the majority decided that rather than trying to include Republicans and pass it with Republican votes, they had to pass it with all Democrats which meant that every one of the Democrats had tremendous leverage. Clearly, they decided to use it. There are lots of carve-outs, lots of special deals in this that cost the American taxpayers hundreds of millions of dollars in additional spending simply because they wanted to get this done by an artificial deadline and wanted to do it with all Democratic votes.

I say to my colleagues, this process itself, when the American people find out about particularly this latest deal, smells. I don't think they are going to like it. I don't think they are going to like the end product when they find out it will raise insurance premiums.

Mr. BARRASSO. I try to stay in close touch with the people of Wyoming. I go home every weekend. We have not been able to do that the last couple of weekends so I have had telephone townhall meetings. I know the Senator from Tennessee has done the same. There is a way people can push a button to indicate whether they are in favor or against. Ninety-three percent of the people of Wyoming are opposed to the bill the Democrats are trying to jam through in the middle of the night. I know the Senator from Tennessee has recently had telephone townhall meetings with his constituents because he was not able to be home personally with them. Maybe the Senator wants to share with us some of the experiences he has had and some of the messages he has heard from the fine folks of Tennessee.

Mr. ALEXANDER. Madam President, the telephone townhalls are interesting. This is the 21st consecutive day

and the third weekend we have been debating this bill. One would think we could probably do a better job of it, if we were going back home every weekend to hear what people thought about what we were doing. But maybe the strategy has been to keep us here talking to each other, bring the bill up in a snowstorm, pass it in the middle of the night and go home for Christmas, and the people won't find out what we are doing until it is too late. One way to find out is tele-townhalls. I was skeptical before I did one but it is a pretty interesting way to stay in touch with people from Tennessee. You get on the telephone and an automated system calls thousands of people and says: The Senator from Wyoming or Illinois or North Carolina or Tennessee wants to talk with you about health care. People can either stay on the phone when they get the call or they can hang up. What normally happens is a person stays on the call, this time a surprisingly large number of people stayed on the call, because of their strong interest in this issue.

The other night I did the phone call between 7:30 and 8:30. I called to about 18 west Tennessee counties, including Shelby, which is Memphis, and as reported to me by the service, about 30,000 people were on the telephone sometime during that hour, with a maximum number of 3,016 on the call at any one time. Someone might pick up the phone and say: Senator BARRASSO is on the phone. They might tune in for 15 or 20 minutes and then hang up. Maybe they have to cook dinner or the ball game comes on. Maybe they get tired of talking to you, but they are on for 15 or 20 minutes. During that time, I was able to take a number of questions. After it was over, 563 messages from constituents were sent to my Web site.
